Undergraduate Education

As a prospective UC Berkeley undergraduate, you should give careful thought to preparing yourself adequately in reading, writing, mathematics, and other areas related to your intended major. The more comprehensive and challenging your high school or college program is, the better prepared you will be for work at Berkeley.

Applying for Admission

UC Berkeley is among the more selective universities in the country; far more students apply than can be enrolled. For fall 2013, Berkeley admitted 14,158 of 61,701, or about 21% of freshman applicants, and approximately 3,916 of 15,989, or about 24.5% of transfer applicants. Consequently, to gain admission to Berkeley, you need to present an academic profile much stronger than that represented by the minimum University of California admission requirements.

To learn more about our student profile, click here (<http://admissions.berkeley.edu/studentprofile>).

See Appendix for more information on selection criteria for the Berkeley campus.

Admission to Berkeley is a two-step process: Satisfying college and major requirements; and selection. The process is outlined below, but more details and answers to other questions can be found online on the Office of Undergraduate Admissions website (<http://admissions.berkeley.edu>).

There you will find information on how to apply, admissions policy, tuition and fees, scholarship opportunities, and more. You can apply to as many UC campuses as you wish, using one application form. (*Note:* The San Francisco campus, which is devoted to the health sciences, has its own application and filing procedures.)

You may apply either as a freshman or a transfer student. Berkeley does not accept applications for transfer applicants at the freshman or sophomore level, nor for the spring semester.

Applications for admission are available beginning in October of the year prior to the year in which you would enter Berkeley. The application filing period is November 1-30. All applications must be submitted by November 30.

Berkeley does not offer any early admissions or any early decisions.

Application Fees and Fee Waivers

The basic application fee of \$70 entitles you to apply to one University campus. (The fees is \$80 for international and non-immigrant applicants.) If you apply to more than one campus, you must pay an additional \$70 for each campus you select. These fees are not refundable. You must submit your fees with the application or the application will not be processed.

The University will waive application fees for up to four campuses in order to assist students for whom payment is a barrier to application to the University. Students who qualify for fee waivers and who select more than four campuses must pay \$70* for each additional choice. For the fee waiver request, please provide your family income and the number

of dependents. The fee waiver program is for US citizens, permanent residents, and applicants eligible for AB540 benefits only.

There are two ways to obtain a fee waiver:

1. You can apply for a fee waiver when you submit an online application. You will be notified immediately if you qualify.
2. You may submit the College Board fee waiver. Applications for this waiver are available from your high school counselors.

Admission as a Freshman

Berkeley considers you a freshman applicant if you are currently enrolled in the 12th grade or if you have graduated from high school and have not enrolled in a regular session at any college or university after high school graduation. If you only attended college/university summer term immediately after graduating from high school, you are still a freshman applicant.

You can find out more information concerning general freshmen admission requirements to the University of California system online here (<http://universityofcalifornia.edu/admissions>). For specific information on preparing to apply to Berkeley, please see the Office of Undergraduate Admissions website (<http://admissions.berkeley.edu>).

Satisfying Requirements

All Berkeley applicants must meet University of California admission requirements:

1. Meet the subject requirement by completing a minimum of 15 college-preparatory courses ("a-g" courses), with at least 11 finished prior to the beginning of your senior year;
2. Earn a grade point average (GPA) of 3.0 or better (3.4 for nonresidents) in these courses with no grade lower than a C; and
3. Meet the examination requirement by taking the ACT Plus Writing or the SAT Reasoning Test by December of your senior year.
Note: UC no longer requires SAT Subject Tests (except to qualify for consideration of admission by examination alone), but certain programs at Berkeley recommend them. For more details, see Examination Requirement.

In addition, applicants who are residents of California will be guaranteed admission somewhere in the UC system if space is available, and they:

1. Rank in the top 9% of all high school graduates statewide (according to the UC admissions index (<http://universityofcalifornia.edu/admissions/freshman/california-residents/admissions-index>)); or
2. rank in the top 9% of their graduating class at a participating high school. This is also referred to as "Eligibility of the Local Context (ELC)."

Eligibility in the Local Context

If you rank in the top 9% of students in your California high school class--and your high school participates in our Eligibility in the Local Context (ELC) program--you may be eligible for the ELC designation.

We will identify the top 9% of students on the basis of GPA in UC-approved coursework completed in the 10th and 11th grades. To be considered for ELC, you must have a minimum GPA of 3.0 and complete the following "a-g" courses prior to your senior year:

- History/social science: 1 year
- English: 2 years
- Mathematics: 2 years
- Laboratory Science: 1 year
- Language other than English: 1 year
- College-preparatory elective (chosen from the subjects listed above or in another course approved by the University): 4 year-long courses or equivalent

After you enter your coursework and grades in your application, we'll compare your GPA to the historic top GPA for your school. If you meet or exceed that GPA, you'll be designated ELC and we'll add a note to your application. Applications from California will be automatically screened for ELC eligibility when they are submitted.

Subject Requirement

You must complete a minimum of 15 college-preparatory ("a-g") courses, with at least 11 finished prior to the beginning of your senior year. The 15 courses are:

- **a. History/Social Science:** Two years required. Two years of history/social science, including one year of world history, cultures, and geography (may be a single year-long course or two one-semester courses); and one year of US history or one-half year of US history and one-half year of civics or American government.
- **b. English:** Four years required. Four years of college-preparatory English that include frequent writing, from brainstorming to final paper, and reading of classic and modern literature. No more than one year of ESL-type courses can be used to meet this requirement.
- **c. Mathematics:** Three years required; four years recommended. Three years of college-preparatory mathematics that include the topics covered in elementary and advanced algebra and two- and three-dimensional geometry. Approved integrated math courses may be used to fulfill part or all of this requirement, as may math courses taken in the seventh and eighth grades that your high school accepts as equivalent to its own courses.
- **d. Laboratory Science:** Two years required; three years recommended. Two years of laboratory science providing fundamental knowledge in two of these three foundational subjects: biology, chemistry, and physics. The final two years of an approved three-year integrated science program that provides rigorous coverage of at least two of the three foundational subjects may be used to fulfill this requirement.
- **e. Language Other than English:** Two years (or equivalent to the 2nd level of high school instruction of the same language other than English) required; three years (3rd level of high school instruction) recommended. Courses should emphasize speaking and understanding, and include instruction in grammar, vocabulary, reading, composition, and culture. American Sign Language and classical languages, such as Latin and Greek, are acceptable. Courses taken in the seventh and eighth grades may be used to fulfill all or part of this requirement if your high school accepts them as equivalent to its own courses.
- **f. Visual and Performing Arts (VPA):** One year required. One yearlong approved course of visual and performing arts from the following: dance, drama/theater, music, or visual art.

- **g. College-Preparatory Electives:** One year required. One year (two semesters), in addition to those required in "a-f" above, chosen from the following areas: visual and performing arts (non-introductory-level courses), history, social science, English, advanced mathematics, laboratory science and language other than English (a third year in the language used for the "e" requirement or two years of another language).

Examination Requirements

You must submit scores from either: the ACT Plus Writing or the SAT Reasoning Test. Students may submit official scores from either test. We will use the highest scores from a single test administration.

College of Chemistry and College of Engineering applicants only: While SAT Subject Tests are not required, the presence of SAT Subject Tests--particularly in a science and Math Level 2--will be considered value-added, as would evidence of high academic performance in math and science.

Eligibility by Examination Alone

If you don't meet UC's minimum requirements, you may still be considered for admission by earning high scores on the ACT Plus Writing or the SAT Reasoning Test, plus two SAT Subject Tests. To qualify for consideration for admission to UC by examination, you must earn a minimum UC Score total--calculated according to instructions listed on the UC website--of 410 (425 for nonresidents).

In addition, you must earn a minimum UC score of 63 on each component of the ACT or SAT Reasoning Test and on each SAT Subject Test.

You may not use an SAT Subject Test to meet these requirements if you have completed a transferable college course in that subject with a grade of C or better.

Learn more by clicking here (<http://admission.universityofcalifornia.edu/freshman/requirements/examination>).

Freshman Selection

All achievement--both academic and non-academic/personal--is considered in the context of your educational circumstances, with an emphasis on the opportunities or challenges presented to you and your response to them. No single attribute or characteristic guarantees the admission of any applicant to Berkeley.

The campus selects its freshman class through an assessment that includes a holistic review of your academic performance as measured primarily by:

- Your weighted and unweighted UC grade point average (calculated using 10th and 11th grade UC-approved courses only)
- Your planned 12th grade courses
- Your pattern of grades over time
- The number of college preparatory, Advanced Placement (AP), International Baccalaureate (IB), honors and transferable college courses you have completed
- Your level of achievement in those courses relative to other UC applicants at your school

- Your scores on the ACT Assessment Plus Writing or the SAT Reasoning Test
- Your scores on AP or IB exams
- Honors and awards that showcase extraordinary intellectual or creative achievement
- Sustained participation in rigorous academic enrichment and outreach programs
- Your likely contribution to the intellectual and cultural vitality of the campus
- Diversity of personal background and experience
- Qualities such as leadership, motivation, and concern for others and for the community
- Nonacademic achievements in athletics, the performing arts, employment, and/or personal responsibilities
- Demonstrated interest in the major and/or sustained academic achievement, particularly in math and science, is an important consideration for applicants to the College of Engineering and the College of Chemistry

 Guaranteed Admission (<http://www.universityofcalifornia.edu/admissions/freshman/california-residents>)

Admission as a Transfer Student

You are a transfer student if you have completed coursework during a regular session at a college or university after high school. (The summer session immediately following high school graduation does not count.) While UC gives California community college students first priority over other transfer applicants, we also accept those from four-year institutions.

You can find more information concerning general transfer admission requirements to the University of California system online here (<http://admission.universityofcalifornia.edu/transfer/requirements>). For specific information on preparing to transfer to Berkeley, see the Appendix in this bulletin and the announcements of the individual colleges and schools. You can also obtain information online here (<http://admissions.berkeley.edu/transferstudents>).

Minimum Admission Requirements for Transfer Students Requirements for California Residents

Most transfer students enter UC at the junior level. This means that they have completed 60 semester units, general education, and most, if not all, of their lower-division major prerequisites.

We review all information, both academic and non-academic/personal, in the context of each student's individual circumstances. To be competitive, present an academic profile with strong grades that includes preparation for your intended major/college.

Most programs will not offer admission to students with excess units, i.e., more than 80 UC transferable semester units before enrollment. *Note:* If all coursework was completed at a two-year college, this excess unit policy does not apply.

- If *all* coursework was completed at a two-year college, *this excess unit policy does not apply*.
- All coursework from a two-year college is considered lower-division.

Obtain information on all requirements on ASSIST (<http://www.assist.org>). ASSIST lists Berkeley requirements and the California community college courses approved as satisfying those requirements. If you are applying from a school other than a California community college, select "UC Berkeley" and then any community college from the pull-down menu on ASSIST. You will then have access to Berkeley requirements; take comparable courses at your school.

Requirements for Non-Residents

The minimum eligibility requirements for non-resident transfer applicants are the same as those for residents except that non-residents must have a GPA of 3.0 or higher in all transferable college coursework.

Transfers from Other UC Campuses

After you enroll at a UC campus, it may be possible for you to transfer to another UC campus. Applications for intercampus transfer are considered in light of your personal circumstances and the availability of space in your prospective major. These students must apply as junior transfers with 60-89 semester/90-134 quarter units.

If you wish to transfer from one UC campus to another, you must submit an application for undergraduate admission during the appropriate filing period.

Transfer Selection

The campus selects its transfer class primarily on the basis of academic performance and preparation, as assessed by a review of: GPA and completion of lower division prerequisite courses for the intended major and breadth requirements.

We also consider:

- Grade trends
- Demonstrated interest in the major, an important consideration for all applicants
- Personal qualities such as leadership or motivation
- Extracurricular accomplishments
- Employment
- Potential contribution to the intellectual and cultural vitality of the campus

Admission of International Applicants

You are an international applicant if a visa is required to reside and study in the United States. A US citizen, permanent resident, refugee, or asylee who currently lives and studies outside the US is considered a domestic

applicant with foreign credentials. International students in the US on a visa cannot be classified as California residents for tuition purposes.

Learn more by clicking here (<http://admissions.berkeley.edu/internationalstudents>).

Readmission

You must file an "Undergraduate Application for Readmission" if you are an applicant who:

- Formally withdrew from the University
- Were absent for one or more semesters
- Are returning to Berkeley as a limited-status student

For further information, including deadlines; fee information; and copies of the required application, please see the Readmission page (http://registrar.berkeley.edu/current_students/readmission.html) on the Office of the Registrar's website.

Limited Status

Limited-status students are a special category of undergraduates who have earned an undergraduate degree with a record of superior scholarship (an overall GPA of at least 3.3), but need additional undergraduate coursework for a specific and clearly defined purpose. Currently only the College of Chemistry will consider admitting students in limited status.

Limited status is granted only in special circumstances; students' needs, abilities, and programs should have enough urgency to justify admitting them in place of students in regular status, and there should be no reasonable alternative available. Use of limited status to enable students to raise their scholarship average is not permitted.

Work Toward a Second Bachelor's Degree

Currently, only the College of Chemistry will consider admitting students for a second bachelor's degree for the Chemistry and Chemical Biology majors.

In practice, Berkeley admits very few students to the Limited Status or second bachelor's programs each year. If you are not eligible for the second bachelor's or the limited status programs, you may consider concurrent enrollment through UC Berkeley Extension as an alternative. For further information on concurrent enrollment, please see the UC Berkeley Extension website (<http://www.unex.berkeley.edu>).

Undergraduate Majors and Degrees Planning for and Declaring a Major

Your major is your opportunity to study a discipline or interdisciplinary area in depth, so be sure to choose a major you are passionate about. UC Berkeley offers an astonishing range of major programs. You can use this bulletin as a starting point to learn about the options available to you. Advisers in your college and in the departments you are considering will also be an invaluable resource to you as you weigh and explore your options.

In some colleges, students are admitted directly into a major program. If you have been admitted as an undeclared student, view your first year as a time of exploration. Do not choose your major prematurely: many of the fields taught at Berkeley will be unfamiliar to you, so there is no way anyone would reasonably expect you to choose one as soon as you arrive. Try courses in a variety of fields that tempt you, and be on the lookout for the discipline that asks and answers the kinds of questions you find most vital and compelling.

Keep an eye on the lower division prerequisites for all of the majors of possible interest, so you can build them in to your class schedule for the first two years where possible. Be on the lookout for courses that are prerequisite to more than one major of possible interest to you. But also remain open to the possibility that a course you are taking just for breadth credit may lead you unexpectedly to a major that you find rewarding and compelling.

Some majors are capped: they cannot accommodate all interested students. If you are drawn to a capped major, it is particularly important to consult with the major adviser early on to maximize your chances of being chosen, and to have a non-capped major in mind as a second option.

Regulations and procedures for declaring the major, or changing your major, vary by college. In general, you will be expected to choose a major by the end of your sophomore year.

Declaration and Change of Major

Regulations and procedures for declaring the major vary for each college. You may, at any time up to the last semester of residence, file a petition for a change of major. (*Note:* This policy does not apply to students in the College of Engineering. If you are in the College of Engineering, you must file your petition for a change of major at least two semesters prior to your anticipated graduation date.) You must secure approval for this action from the dean or other authorized person in the college or department to which you are transferring.

Preparation for Graduate Study

If you are preparing for study toward a higher degree, you should learn, as early as possible, the entrance and degree requirements of your graduate field, in order to include all prerequisite steps in your undergraduate program.

Undergraduate Degree Requirements

As soon as you have been accepted for admission to Berkeley, you should learn the requirements you will have to fulfill to earn your bachelor's degree. These requirements are prescribed by four sources: the University, the Berkeley campus, your college or school, and your department. All are summarized below.

University Requirements

The University sets two general requirements for the baccalaureate degree: Entry-Level Writing and American History and Institutions.

Entry Level Writing Requirement

The University assumes that you are proficient in English and in writing about academic topics. Fulfillment of the University of California Entry-Level Writing requirement is a prerequisite to enrollment in all reading and composition courses. If you have not taken the Analytical Writing

Placement Examination (AWPE) (<https://www.awpe.org/candidate>) or fulfilled the requirement by the time you enter the University, you should take the AWPE during your first semester and begin your Reading and Composition sequence the following semester. If you took the AWPE and did not pass, you should enroll in College Writing R1A during your first semester. College Writing R1A is a 6-unit course that satisfies the Entry-Level Writing requirement and the first half of the Reading and Composition requirement.

In addition to a passing score on the AWPE, the Office of Undergraduate Admissions accepts the following means of fulfilling the Entry-Level Writing requirement *before* you enter the University:

1. A minimum score of 680 on the SAT Reasoning Test, Writing Section
2. A minimum score of 680 on the SAT II: Subject Test in Writing
3. A minimum score of 30 on the ACT combined English/Writing Test
4. A minimum score of 3 on the Advanced Placement Test in English Composition and Literature or in English Language and Composition
5. A minimum score of 5 on the International Baccalaureate Higher Level Examination in English (Language A only)
6. A minimum score of 6 on the International Baccalaureate Standard Level English and Exam; and
7. A minimum grade of C in a transferable college-level English composition course completed at an accredited college or university and accepted by the Office of Undergraduate Admissions at Berkeley.

For further information on satisfying the Entry-Level Writing Requirement, please see the College Writing Program's website (<http://writing.berkeley.edu/classes-and-awp/awp-exam>), or the College Writing Program FAQ's (<http://writing.berkeley.edu/about-us/frequently-asked-questions/#3>).

American History and Institutions Requirements (AH&I)

The AH&I requirements are based on the principle that a US resident graduated from an American university should have an understanding of the history and governmental institutions of the United States.

Satisfying the AH&I Requirements Before Enrolling at Berkeley

Both the American History and American Institutions requirements may be satisfied in one the following ways:

1. **High School Coursework:** By fulfilling the portion of the "A" subject requirement for freshman admission that consists of one year of US history or one-half year of US history and one-half year of US government in high school with letter grades of C or better.
2. **Advanced Placement or SAT Exam:** By passing the high school Advanced Placement American History exam with a score of 3 or better; or the SAT Subject Test (formerly Achievement Test) in US history with a score of 550 or better (500 or better if taken before April 1995). Note: Only the American Institutions requirement may be satisfied by passing the high school Advanced Placement US Government exam with a score of 3 or better.
3. **International Baccalaureate Exam:** By passing the International Baccalaureate Higher Level (IBHL) History of the Americas exam with a score of 5, 6, or 7.

4. **Other College or University Coursework:** By passing with a grade of C or better or P, one quarter or semester of a transferable course in basic US history or US government at a college or university before entering Berkeley. Students may also visit assist.org to find California community college courses that have been approved to satisfy the AH&I requirements. Inquiries about specific courses at institutions other than a California community college should be directed to the Office of Undergraduate Admissions, 110 Sproul Hall.
5. **For Students Transferring From Another UC Campus:** By passing any course or courses that satisfy the AH&I requirements of that campus.

Satisfying the AH&I Requirements After Enrolling at Berkeley

After enrolling at Berkeley, students who have not already satisfied the AH&I requirements must complete two courses: one course to satisfy the American History requirement and one course to satisfy the American Institutions requirement.

1. **Berkeley Coursework:** By passing with a grade of C- or P, at Berkeley, after July 1, 2005, History 7A, 7B, 130B, 131A, 131B, N131B, or 138 for the History requirement; and Political Science 1, 1AC, or 108A for the Institutions requirement. (Note: These courses are not necessarily offered every semester or year. Check with the department to find out when a course will be offered.) From fall 1988 through summer 2005, only History 7A or 7B satisfied the History requirement, and only Political Science 1 satisfied the Institutions requirement. Political Science 100 satisfied the Institutions requirement from spring 1985 to spring 1995. (Students who took other courses before fall semester 1988 may check with the Registrar's office for possible AH&I credit.)
2. **Other College or University:** By passing with a grade of C or better or P, a course or courses at another collegiate institution, approved by the Admissions office.
3. **Combination of Berkeley and Other College or University:** By mixing these alternatives (i.e., taking an approved course at Berkeley for one requirement and an approved course at another college for the other requirement).
4. **New Students:** You can check the status of your AH&I requirements by logging into Bear Facts midway through your first semester at Berkeley.

International Students

The AH&I requirements will be waived if you have at least 90.5 semester units (senior status) and hold both a current, non-immigrant visa (F is the most common) and an I-94 departure record. You must present your visa and I-94 record to the Office of the Registrar, 120 Sproul Hall, during the semester in which you will graduate.

For further information regarding the AH & I requirement, please see the Office of the Registrar's website (<http://registrar.berkeley.edu/Default.aspx?PageID=ahi.html>).

Berkeley Campus American Cultures Breadth Requirement

The American Cultures requirement is a Berkeley campus requirement, the one course that all undergraduate students at Berkeley need to take and pass in order to graduate. You satisfy the requirement by passing, with a grade not lower than C- or P, an American Cultures

course. You may take an American Cultures course any time during your undergraduate career at Berkeley. The requirement was instituted in 1991 to introduce students to the diverse cultures of the United States through a comparative framework. Courses are offered in more than fifty departments in many different disciplines at both the lower and upper division level.

The American Cultures requirement and courses constitute a new approach that responds directly to the problem encountered in numerous disciplines of how better to present the diversity of American experience to the diversity of American students whom we now educate.

Faculty members from many departments teach American Cultures courses, but all courses have a common framework. The courses focus on themes or issues in United States history, society, or culture; address theoretical or analytical issues relevant to understanding race, culture, and ethnicity in American society; take substantial account of groups drawn from at least three of the following: African Americans, indigenous peoples of the United States, Asian Americans, Chicano/Latino Americans, and European Americans; and are integrative and comparative in that students study each group in the larger context of American society, history, or culture.

These courses focus upon how the diversity of America's constituent cultural traditions have shaped and continue to shape American identity and experience. This is not an ethnic studies requirement, nor a Third World cultures requirement, nor an adjusted Western civilization requirement, nor courses on racism.

Visit the Online Schedule of Classes (<http://schedule.berkeley.edu>) or the American Cultures website (<http://americancultures.berkeley.edu>) for the specific American Cultures courses offered each semester. See your academic adviser if you have questions about your responsibility to satisfy the American Cultures breadth requirement.

College and School Requirements

Each college and school has established a program of requirements for the degree, which may be in addition to those of a field of concentration. These requirements may include: (1) preparatory subject requirements for admission; (2) preparatory college-level courses for your particular field of study-to be completed, if possible, during your early period of residency in the college or school, or in some cases before entrance; (3) breadth requirements, courses outside the field of study, considered essential to a well-rounded curriculum; (4) the credit requirement, which is the total number of units to be completed, with specifications of how these credits are to be distributed; and (5) a minimum scholarship requirement.

For detailed information, please consult your college or school:

Haas School of Business (http://www.haas.berkeley.edu/Undergrad/degree_requirements.html)

College of Chemistry (http://chemistry.berkeley.edu/student_info/undergrad_info/current_undergrad.php)

College of Engineering (<http://coe.berkeley.edu/students/current-undergraduates/requirements>)

College of Environmental Design (<http://ced.berkeley.edu/ced/students/undergraduate-advising/continuing-students/#grad>)

College of Letters and Science (<http://ls-advise.berkeley.edu/requirement/summary.html>)

College of Natural Resources (http://cnr.berkeley.edu/site/general_reqs_new.php)

School of Public Health (<http://sph.berkeley.edu/undergraduate-major/course-requirements>)

School of Social Welfare (<http://socialwelfare.berkeley.edu/sites/default/files/docs/Undergraduate%20Handbook%20August%202013.pdf>)

Reading and Composition Requirement

The Berkeley campus is strongly committed to developing high levels of ability in critical thinking and communication among its undergraduates. Hundreds of courses require long papers and a number of courses provide training in writing or speaking. In addition to the University-wide Entry-Level Writing requirement, the College of Letters and Science and most other colleges and schools require two semesters of lower division work in composition, to be completed by the end of the sophomore year. The following departments and programs offer writing courses that satisfy all or part of the Reading and Composition requirement:

African American Studies (p. 217)

Anthropology (p. 255)

Asian American and Asian Diaspora Studies (p. 298)

Celtic Studies (p. 332)

Chicano Studies (p. 358)

Classics (p. 405)

College Writing (p. 417)

Comparative Literature (p. 429)

English (p. 575)

Environmental Design (p. 618)

Film and Media (p. 661)

French (p. 670)

Gender and Women's Studies (p. 685)

German (p. 706)

History (p. 740)

History of Art (p. 775)

Italian Studies (p. 860)

Legal Studies (p. 913)

Linguistics (p. 922)

Native American Studies (p. 1081)

Near Eastern Studies (p. 1091)

Philosophy (p. 1140)

R (p. 1290)hetoric (p. 1290)

Scandinavian (p. 1303)

Slavic Languages and Literature (p. 1312)

South and Southeast Asian Studies (p. 1367)

South Asian Studies (p. 1363)

Spanish (p. 1377) and Portuguese (p. 1209)

Theater, Dance, and Performance Studie (p. 1403)s

You can also satisfy this requirement by taking courses offered during Summer Sessions (<http://summer.berkeley.edu>).

Course content and orientation vary according to field or discipline.

Contact the individual departments for details, and consult your college or school for the particular courses that satisfy its requirements.

Minimum Scholarship Requirement

If you fail to maintain the minimum GPA prescribed by your college or school, you will normally be dismissed or put on probation. Since scholarship rules are applied only at the close of regular sessions, grade points that you earn in a University of California summer session or by

removing an Incomplete grade are not taken into consideration until the close of your next semester of attendance.

For further information, please consult your college or school:

Haas School of Business (http://www.haas.berkeley.edu/Undergrad/academic_guidelines.html)

College of Chemistry (http://chemistry.berkeley.edu/student_info/undergrad_info/degree_programs/chem_major/minimum_academic_reqs.php)

College of Engineering (<http://coe.berkeley.edu/students/guide/degree-requirements-and-major-information.html#Degree7>)

College of Environmental Design (<http://ced.berkeley.edu/ced/students/undergraduate-advising/policies-resources/#probation>)

College of Letters and Science (http://ls-advise.berkeley.edu/probation/aca_difficulty.html)

College of Natural Resources (http://cnr.berkeley.edu/site/changing_status.php)

School of Public Health (<http://sph.berkeley.edu/sites/default/files/2013handbook.pdf>)

School of Social Welfare (<http://socialwelfare.berkeley.edu/sites/default/files/docs/Undergraduate%20Handbook%20August%202013.pdf>)

Senior Residence Requirement

After you have completed 90 units toward the bachelor's degree, you must complete at least 24 of the remaining units in residence in no fewer than two semesters in the college or school of the University in which you will take your degree. You must begin these final 24 units in the semester in which you exceed 90 units.

For further information, please consult your college or school:

Haas School of Business (http://haas.berkeley.edu/Undergrad/senior_residence_requirement.html)

College of Chemistry (http://chemistry.berkeley.edu/student_info/undergrad_info/degree_requirements.php)

College of Engineering (<http://coe.berkeley.edu/students/guide/degree-requirements-and-major-information.html#Degree6>)

C (http://chemistry.berkeley.edu/student_info/undergrad_info/degree_requirements.php) College of Environmental Design (<http://ced.berkeley.edu/ced/students/undergraduate-advising/continuing-students/#senior>)

College of Letters and Science (<http://ls-advise.berkeley.edu/requirement/residence.html>)

College of Natural Resources (http://cnr.berkeley.edu/site/general_reqs_new.php)

School of Public Health (<http://sph.berkeley.edu/undergraduate-major/about-major>)

School of Social Welfare (<http://socialwelfare.berkeley.edu/sites/default/files/docs/Undergraduate%20Handbook%20August%202013.pdf>)

Departmental Requirements

Every student must select a field of concentration and pursue a major or curriculum, normally by taking a minimum number of units in one department or school. Occasionally, as with business administration and others, the school and the department are synonymous. In some cases a major may embrace more than one department, as with the interdisciplinary studies field major in the College of Letters and Science.

Major Requirements

Major requirements that must be fulfilled before you may receive a baccalaureate degree are outlined in each department in the Departments and Subjects pages of this bulletin (p.). Please also, see your department adviser.

Academic Opportunities

Cross-Registration Programs with Other Schools

UC Berkeley has cross-registration agreements with California State University East Bay; Mills College; San Francisco State University; Sonoma State University; Holy Names University; John F. Kennedy University; Dominican University; St. Mary's College; and University of New Orleans. The program enables students to enroll in one course per semester at the host campus. With the approval of your adviser and the dean of your school or college, you may register and pay applicable tuition and fees at Berkeley and be exempt from tuition and fees at the host campus.

In addition to these established special programs, the Intersegmental Cross-Enrollment program (at the discretion of the appropriate campus authorities on both campuses) allows an undergraduate student who meets certain eligibility criteria AND is enrolled in any campus of the California community colleges, the California State University, or the University of California to enroll without formal admission in a maximum of one course per academic term at a campus of either of the other systems on a space-available basis. CSU and CA Community College students participating in the program at Berkeley will be assessed a nonrefundable administrative fee of \$46 per unit (fee subject to change). The fee is based on the per-unit fee at CA Community Colleges and is subject to change.

For detailed information about these and other visitor and exchange programs, please visit the Special Registration Programs page of the Office of the Registrar website (http://registrar.berkeley.edu/current_students/registration_enrollment/spec_registration.html); call 510-664-9181; or visit Cal Student Central (<http://studentcentral.berkeley.edu>), 120 Sproul Hall, Monday through Friday, 9 a.m. to 4 p.m.

Studying Abroad

Berkeley Study Abroad (UC Education Abroad Program- UCEAP, Berkeley Abroad, and Global Internships programs) offers a broad spectrum of opportunities for students to gain first-hand experience living in other cultures while progressing toward their bachelors' degrees. BSA offers a diverse array of programs across all the major disciplines in more than 30 countries. Students earn University credit for their participation while enhancing their undergraduate experience. Options include semester-long, year-long, and summer programs. Many programs do not require foreign language proficiency. Financial Aid recipients qualify for financial aid assistance while abroad on BSA programs, and scholarships are available for BSA students with financial need.

For further information, contact Berkeley Study Abroad at 160 Stephens Hall, (510) 642-1356, or see the Berkeley Study Abroad website. (<http://studyabroad.berkeley.edu>)

Programs Not Sponsored by the University of California

Many Berkeley undergraduates choose to attend overseas study programs sponsored by institutions and organizations other than the University of California. To obtain information about these programs, you should contact the programs directly. Berkeley Study Abroad has information on how to participate in non-UC study abroad programs, including a small library of non-UC program materials. Additionally, most students will be eligible to retain student status and access to most study systems while abroad by completing the process of Planned Leave for Study Abroad. To complete the process, students must submit a Planned Leave for Study Abroad Form directly to the BSA office by the established deadlines, several weeks before beginning the non-UC study abroad program. Credit for coursework completed is dependent on a review of your final transcript by the Office of Undergraduate Admissions. Before enrolling in any program, consult with the international admission specialists at 110 Sproul Hall, or (510) 642-3246, concerning the transferability of the coursework from a particular program. Finally, consult with a college and major adviser as to the appropriateness of your proposed courses toward degree progress and, if necessary, procedures for readmission.

The UC Berkeley Washington Program

The UC Berkeley Washington Center hosts 25-30 juniors and seniors from all majors during the fall and spring of each year. The academic program allows students to combine coursework at the UC Berkeley Washington Center with field research in an internship that reflects each student's particular area of interest. Participants have worked in a wide variety of organizations and agencies. All participants will be registered as full-time Berkeley students and will remain eligible for financial aid as long as they meet the minimum number of units.

Applicants must have a minimum 3.0 grade point average (GPA) and have achieved junior status by the start of their semester in Washington. Applicants must have taken at least two upper division courses on the Berkeley campus that will prepare them for the research project they will pursue in Washington.

For more information, contact the UC Berkeley Washington Program office at 231 Evans Hall, (510) 642-9102, ucdc@berkeley.edu, or see the program's website (<http://ucdc.berkeley.edu>).

Research and Internships

Berkeley offers many opportunities for you to conduct research projects and engage in internships either as volunteers or paid employees.

Office of Undergraduate Research (OUR)

OUR seeks to involve undergraduates more deeply in the research life of the University. To this end, OUR coordinates and develops programs and resources that bring undergraduates into the field, the laboratories, and the archives. Whether assisting faculty with research or pursuing their own research under faculty supervision, Berkeley students can experience what it means to be a part of cutting-edge research at a world-class research university. For information on the great variety of undergraduate research opportunities at Berkeley, visit the Undergraduate Research at Berkeley website (<http://research.berkeley.edu>) at or email research@learning.berkeley.edu.

Undergraduate Research Apprentice Program (URAP)

URAP is the ideal place for students to begin to put their classroom learning to use. As research apprentices, students gain skills and perspectives as they assist faculty with research. Over 1,400 students participate in this program each year, working with faculty from nearly every department and college. Visit the URAP website (<http://research.berkeley.edu/urap>) for a current list of faculty projects.

When students are ready to embark on research of their own design, the Summer Undergraduate Research Fellowship and the Haas Scholars Program offer fellowships that allow students to pursue sophisticated research. For information about these and other programs, visit the Undergraduate Research at Berkeley website (<http://research.berkeley.edu>).

The Office of Undergraduate Research is located in 5 Durant Hall, or call (510) 643-5376.

Internships

A wide variety of internships—loosely defined as structured field experience—is available to you on and off campus. The positions may be paid or unpaid, may sometimes carry academic credit, and may have educational and career value. Courses with field components occur principally in the 97, 98, 99, 197, 198, and 199 series. Check the course listings in the bulletin for specific information.

The following offices have listings of numerous internships, both on and off campus:

Career Center (<https://career.berkeley.edu>), 2111 Bancroft Way
Work-Study Program (<http://financialaid.berkeley.edu/work-study>), 212 Sproul Hall
Cal Corps Public Service Center (<http://publicservice.berkeley.edu>), 505 Eshleman Hall

Individual internship programs are available through campus-based offices. Look for internships on CalJobs (<https://career.berkeley.edu/callisto/caljobs.stm>) or consult individual offices and departments.

Honors Courses

Berkeley offers some honors courses for highly qualified students, usually in their senior year. A few of these courses are available to lower division students. See your major adviser for information.

Freshman and Sophomore Seminars

The Freshman and Sophomore Seminars arose from the conviction that early intellectual contact with faculty members would greatly enhance the undergraduate experience at Berkeley. Professors from nearly every campus department join together each semester to offer an impressive array of seminars. The courses numbered 24 (and in some cases 90) bear 1 unit of credit; they are limited to 15 students, and freshmen are given priority for enrollment. The courses numbered 84 bear 1 or 2 units of credit; they are limited to 15 sophomores. The courses numbered 39A-39Z are limited to 25 freshmen and sophomores.

Seminars, which emphasize interaction and discussion, provide a counterpoint to the learning experience in Berkeley's large lecture halls. These seminars also offer lower-division students an unprecedented opportunity to explore a wide range of majors and even fields of study

usually reserved for graduate students. As you browse through this bulletin, you will find lower-division seminars sponsored by Letters and Science departments, as well as by the professional schools and colleges.

Descriptions of all the seminars scheduled for the upcoming semester can be found in time for TeleBears registration on the program's website (<http://fss.berkeley.edu>), which also contains other useful information and features for undergraduates. For additional information regarding the Freshman and Sophomore Seminars, contact the program office at 231 Evans Hall or (510) 642-8378.

DeCal: Student-Initiated Courses

The Program for Democratic Education at Cal (DeCal), a student-run organization, promotes leadership and encourages students to initiate classes that will help maximize their educational experience at Berkeley. While departments have ultimate responsibility for approving and overseeing student-initiated classes, DeCal promotes opportunities for students to sample diverse disciplines for 1-4 units of credit on a passed/not passed basis. It also provides a forum for more advanced, focused study. The program encourages academic interests outside of the boundaries of established disciplines and has a long history of encouraging progressive, socially responsible courses. As well as mainstream subjects, DeCal courses are ideal for explorations into issues of culture, race, ethnicity, and gender. They may also involve internships aimed at transforming theoretical knowledge into practical experience. For more information, contact the DeCal office at 112 Hearst Gym Station 15, (510) 642-9127, or decalprogram@gmail.com, or see the program's website (<http://www.decal.org>).

Advising and Academic Assistance

College and Department Advisers

For information regarding academic advising, please see the following college- and school-specific links:

Haas School of Business (<http://www.haas.berkeley.edu/Undergrad/facultyadvisors.html>)

College of Chemistry (http://chemistry.berkeley.edu/student_info/undergrad_info)

College of Engineering (<http://coe.berkeley.edu/students/current-undergraduates/advising-and-tutoring.html>)

College of Environmental Design (<http://ced.berkeley.edu/ced/students/undergraduate-advising>)

College of Letters and Science (<http://ls-advise.berkeley.edu>)

College of Natural Resources (<http://www.cnr.berkeley.edu/site/sao.php>)

School of Public Health (<http://sph.berkeley.edu/undergraduate-major/advising>)

School of Social Welfare (<http://socialwelfare.berkeley.edu/undergraduate-program>)

Student Learning Center

The Student Learning Center (SLC) Study Strategies Resources Program assists students in managing their current and future coursework by introducing appropriate study strategies. Professional staff and trained peer tutors connect students with an elaborate array of resources that enhance students' retention and academic success. Services are holistic in approach, helping students with a range of courses.

Education 98/198: Strategies for Success at Cal is a 2-unit, passed/not passed seminar that encourages discussion, emphasizes collaborative

learning, and focuses on study strategies. The seminar for freshmen emphasizes time management and procrastination, active reading and learning, effective writing and communication, and test preparation. The seminar for continuing students examines the cognitive, metacognitive, and affective variables that determine success at Berkeley. By actively engaging in a collaborative problem-solving process with other students, peer mentors, and instructors, students establish goals, monitor progress, and improve their academic success.

Education 98/198: To the Capstone and Beyond is a 2-unit passed/not passed course that supports upper division students who are preparing to or are currently composing a culminating senior thesis, research project, and/or other creative endeavor. The course supplements existing departmental and campus resources that are available to students at various stages of their research processes.

Other Voices is a 2-unit passed/not passed course that supports the efforts of all students who are considering or entering literary studies. The course introduces students to diverse, innovative, and emerging literary cultures.

History 98: Ethnic Perspectives is a 2-unit passed/not passed student-run course and lecture series that provides students the opportunity to survey disciplines within the social sciences through overlooked perspectives.

For more information about these courses and the SLC, visit the reception desk at the César Chávez Student Center on lower Sproul Plaza, call (510) 642-7332, or visit the Student Learning Center website (<http://slc.berkeley.edu>).

Student Athletes

The Athletic Study Center (ASC), located in 179 César Chávez Center, offers academic support services for Berkeley's student athletes. Services are geared to ensuring academic achievement through academic advising, tutoring, study groups, and a computer lab. For more information, visit the ASC website. (<http://asc.berkeley.edu>)

Academic Excellence

Semester Honors

To be eligible for semester honors, you must have completed a minimum of 12 units undertaken for letter grades at Berkeley and must have achieved the minimum grade point average (GPA) required by your school or college.

Honors at Graduation

To be eligible for honors in general scholarship at graduation, you must have completed a minimum of 50 semester units at the University of California, of which a minimum of 43 units must be undertaken for a letter grade; completed a minimum of 30 units at Berkeley; and achieved a GPA that ranks you in your school or college in the top 3 percent for highest honors, the next 7 percent for high honors, and the next 10 percent for honors.

These criteria are minimal; consult your college or school for more detailed information:

Haas School of Business (http://www.haas.berkeley.edu/Undergrad/academic_guidelines.html)

College of Chemistry (http://chemistry.berkeley.edu/student_info/undergrad_info/academic_policies.php#hag)

College of Engineering (<http://coe.berkeley.edu/students/guide/procedures-and-regulations.html#Procedure28>)
College of Environmental Design (<http://ced.berkeley.edu/ced/students/undergraduate-advising/continuing-students/#honor>)
C (<http://ced.berkeley.edu/ced/students/undergraduate-advising/continuing-students/#honor>)
College of Letters and Science (<http://ls-advise.berkeley.edu/honor/honor.html>)
College of Natural Resources (<http://cnr.berkeley.edu/site/achievements.php>)
School of Public Health (<http://sph.berkeley.edu/undergraduate-major/about-major>)
School of Social Welfare (<http://socialwelfare.berkeley.edu/sites/default/files/docs/Undergraduate%20Handbook%20August%202013.pdf>)

Honor Societies

Berkeley has a number of honor societies that elect students in recognition of academic excellence. Among these are Phi Beta Kappa, a national honor society; the Prytanean Society, founded in 1900 to honor upper division and graduate women for academic accomplishment and service to the University; the Honors Students Society; Tau Beta Pi, the national honor society for all engineering disciplines and various other engineering honor societies (see The Student Guide to Engineering Societies, available at the Engineers Joint Council office); Alpha Mu Gamma, a national society for students with demonstrated excellence in languages; and individual societies in most language departments. See your adviser for more information.

Prizes

Awards for outstanding ability in some area of creative, scholarly, or athletic achievement are available at Berkeley in two general categories: competitive prizes for creative effort or departmental awards for outstanding scholastic achievement. For more information, please see the Financial Aid website (<http://financialaid.berkeley.edu/prizes-and-honors>).

Scholarship Connection

Scholarship Connection is Berkeley's clearinghouse for information on scholarships that are funded by sources outside the University. Enrolled Berkeley students may search for awards on Scholarship Connection's online database (<http://scholarships.berkeley.edu>). In addition to providing information on many externally funded awards, Scholarship Connection also administers the campus recruitment and selection for several highly competitive awards, such as the Rhodes, Marshall, and Truman Scholarships. Scholarship Connection offers workshops and individual advising to help applicants prepare competitive applications for these prestigious awards. For more information, contact Scholarship Connection at 5 Durant Hall, (510) 643-6929, or scholarships@learning.berkeley.edu.

Graduate Education

Graduate education embraces study for all degrees and certificates beyond the bachelor's degree—principally, the master's and doctoral degrees. Graduate degrees fall into two broad categories:

1. **Academic:** Degrees awarded in recognition of a student's command of a wide range of subject matter and research methodologies within an academic field, and, at the doctoral level, generation of original research leading to a significant contribution to a field of study.
2. **Professional:** Degrees awarded in recognition of a student's command of a comprehensive body of professional knowledge and demonstrated ability to organize and carry out investigation of significant problems in the field. These degrees are offered largely by the professional schools, although some academic departments also offer professional degrees.

The main purpose of graduate study is to inspire independence and originality of thought in the pursuit of knowledge. As a graduate student you are expected to achieve mastery of your chosen field through independent study and research as well as advanced course work. Graduate courses demand a capacity for critical analysis and a specialization of research interests not normally appropriate for an undergraduate major. Course offerings vary between:

1. Advanced lecture courses
2. Seminars in which faculty and students critically examine elected problems within the subject field
3. Independent study or reading courses
4. Research projects conducted under faculty supervision

Degrees Offered

For a complete list of degrees offered at UC Berkeley and links to the programs offering them, see the Graduate Division website (<http://grad.berkeley.edu/admissions/list.shtml>).

Interdisciplinary Graduate Degrees

Berkeley has established graduate programs in a number of fields that cut across conventional departmental lines yet comprise distinct cores of knowledge. These programs are administered by faculty from several related departments, comprising an approved "graduate group." If it is a joint degree, faculty from another campus are included. In the list of graduate degrees offered at Berkeley available through the Graduate Division website (<http://grad.berkeley.edu/admissions/list.shtml>) mentioned above, interdisciplinary graduate programs are indicated by a footnote ("1").

Interdisciplinary Doctoral Minors: the "Designated Emphasis"

Berkeley has a variety of interdisciplinary minors for doctoral students, called "Designated Emphases." A "Designated Emphasis" is defined as an area of study constituting a new method of inquiry or an important field of application relevant to two or more existing doctoral degree programs, and are administered by participating faculty in an approved "graduate group." You are required to complete the academic work in the Designated Emphasis in addition to all the requirements of the doctoral program. You must apply to a DE before you take the qualifying examination, as you must have faculty representation from the

Designated Emphasis on your qualifying examination and dissertation committees as well as completing special course work. The DE also appears on your diploma. For more information, contact the DE graduate group of interest. DE graduate programs offered:

- Communication, Computation, and Statistics (<http://www.eecs.berkeley.edu/CCS>)
- Computational and Genomic Biology (p. 78)
- Computational Science and Engineering (<http://citris-uc.org/decse>)
- Critical Theory (p. 79)
- Dutch Studies (p. 82)
- Energy Science and Technology (http://www.me.berkeley.edu/Grad/Areas/Research_Focus_Areas/energy_science_technology.html)
- Film Studies (p. 110)
- Folklore (p. 113)
- Global Metropolitan Studies (p. 118)
- Jewish Studies (p. 134)
- Nanoscale Science and Engineering (p. 161)
- New Media (p. 169)
- Renaissance and Early Modern Studies (<http://rems.berkeley.edu>)
- Science and Technology Studies (p. 194)
- Women, Gender, and Sexuality (p. 114)

Graduate Admissions

Applying for Admission

A complete list of graduate academic departments, the degrees offered, and the deadlines for application can be found here (<http://grad.berkeley.edu/programs/list.shtml>).

You must file a completed Graduate Division application to be considered for admission, in addition to any supplemental documents specific to the program for which you are applying. The online application can be found here (<http://grad.berkeley.edu/admissions>). There are exceptions to this general rule. Applicants to Haas School of Business master's programs, the Doctor of Optometry in the School of Optometry, the Information School's Master of Information and Data Science, or programs at the School of Law should not use this application but should contact those schools directly.

You must pay an application fee by credit card when you apply. The application fee is not refundable. US citizens or current permanent residents who can demonstrate financial need are eligible to apply for a waiver of the application fee. Contact the Graduate Admissions office at gradadm@berkeley.edu for further information.

Admission Requirements

The minimum graduate admission requirements are:

1. A bachelor's degree or recognized equivalent from an accredited institution
2. Sufficient undergraduate work to undertake graduate work in your chosen field
3. A minimum grade point average (GPA) of 3.0 (B)

Many departments or groups have additional requirements, including the Graduate Record Examination (GRE) or other tests and higher GPA minimums. Department contact information can be found here (<http://grad.berkeley.edu/programs/list.shtml>).

Satisfying minimum standards, however, does not guarantee your admission, since the number of qualified applicants far exceeds the number of places available. As a result, many well-qualified applicants cannot be accommodated.

Graduate Record Examination (GRE)

Most degree programs require applicants to take a standardized test such as the General Test of the GRE, a Subject Test of the GRE, the GMAT, MCAT, OAT, or LSAT. Check with the department to which you are applying for specific test requirements and deadlines. For more information, or to register for the GRE, consult their website (<http://www.gre.org>), or call 1-866-473-4373.

International Applicants

International applicants must fulfill all previously stated admission requirements and have an excellent command of the English language before beginning graduate study at Berkeley; students cannot be admitted to graduate standing to learn English. If you are applying from a country in which English is not the official language, you are required to submit official evidence of English language proficiency. There are two standardized tests you may take, the Test of English Language as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). TOEFL is currently administered in two formats: paper-based (PBT) and Internet-based (iBT). Minimum score and other requirements for these tests are listed on the Admissions section of the Graduate Division website. Individual academic departments may choose to require a higher score than the minimum requirement set. Further information on TOEFL can be found online here (<http://www.toefl.org>) or by calling 1-877-863-3546 or 1-609-771-7100. IELTS information can be found online here (<http://www.ielts.org>).

Graduate students who plan to teach but do not speak English as a native language and do not hold a bachelor's degree from an institution in the United States must demonstrate oral English proficiency to be eligible for appointment as a graduate student instructor (GSI). In those countries where the iBT TOEFL has been introduced, English language proficiency is determined by the speaking section score of the iBT TOEFL. In those countries where the iBT TOEFL is not available, students can demonstrate their proficiency by taking and passing the Test of Spoken English (TSE) before enrolling in Berkeley or the SPEAK test offered on the Berkeley campus. Information on passing scores, testing options, and language courses can be found on the GSI Teaching and Resource Center's website (<http://gsi.berkeley.edu>).

Special Circumstances

Readmission

If you have previously registered and withdrawn and want to re-enroll or have completed any graduate degree program at Berkeley, you must file an "Application for Readmission," a form obtainable from the Registrar's website (http://registrar.berkeley.edu/current_students/elecforms.html). A nontransferable, nonrefundable readmission fee must accompany the "Application for Readmission" when first submitted, or the application will not be reviewed. A "Statement of Legal Residence" (downloadable from the Registrar's website (http://registrar.berkeley.edu/current_students/elecforms.html)) must also be submitted. *Note:* Approval of readmission is not guaranteed. The Graduate Division and your department, school, or group will review your application and academic record and notify you whether your readmission has been approved.

Duplication of Higher Degrees

Duplication of degrees is not permitted. Students may enroll for a second academic or professional degree if the second degree is in a distinctly different field.

Notification of Action on Admission

A written notice from the Vice Provost for Graduate Studies is the only valid and official proof of admission. You will be advised as soon as possible after a decision has been reached. Normally, acceptance letters for admission only will be issued between February and March for the coming fall semester.

Role of Faculty Graduate Advisers

To advise you regarding your program and issues that arise with selecting programs of study, status in the program, and other concerns, head graduate advisers who are tenured faculty are appointed by the Vice Provost for Graduate Studies for each degree program. Head Graduate advisers:

1. Endorse applications for candidacy for higher degrees and for qualifying examinations
2. Approve readmission applications and petitions
3. Assist the Graduate Division in the enforcement of Graduate Council regulations, particularly those relating to registration, admission to graduate courses, and maintenance of acceptable scholastic performance (Head graduate advisers are often assisted by other faculty graduate advisers who assist students in selecting programs of study and endorse petitions for study list changes)

You may also have an individual or major adviser frequently appointed in the earlier stages of your training. The individual or research advisers may be the same individuals as the major's official graduate advisers. You should keep in close touch with your individual adviser and should confer with your official graduate adviser about your program of study.

Basic Requirements for Graduate Degrees

The Master's Degree

A partial description of basic Master's degree requirements follows. For complete and up-to-date information, refer to the Guide to Graduate Policy (<http://www.grad.berkeley.edu/policies/ggp/ggp.pdf>).

Academic Residence Requirement

A minimum of two semesters of academic residence is required for the master's degree. Academic residence is defined as enrollment in at least four units in 100-200 series courses, but enrollment in 12 units per semester is required for all degree programs except for self-supporting degree part-time degree programs.

Transfer of Credit

A maximum of four semester or six quarter units completed in graduate status at an institution outside the University of California system may be transferable if:

1. The units were not required for the completion of a previous degree
2. The units involved are equivalent to work normally offered within your current program of study and were completed previously in graduate status at an institution of high standing

3. The grade recorded was at least a B; and (4) you have an overall scholastic record (at least a 3.3 GPA) at both your original institution and at Berkeley

Note: The units transferred cannot be used to reduce the minimum required in the 200-series courses or the minimum residence requirement.

Concurrent Enrollment- UC Berkeley Extension

Courses taken concurrently through UC Berkeley Extension but held on the Berkeley campus under the instruction of a regular member of the Berkeley faculty are not applicable toward a Berkeley master's degree unless they have the "BX" designation. These courses are intended to provide Extension students with an opportunity to take courses that would not ordinarily be available to them. Concurrent enrollment cannot replace normal registration by Berkeley graduate students, nor may it be used to accumulate credit toward a Berkeley degree by an individual not formally admitted to graduate standing at Berkeley.

Master's Degree Plans

If you work toward a master's degree on the Berkeley campus, you will pursue one of two plans, as authorized for your program. Many programs require more units than the minimums listed below.

- **Plan I** requires a minimum of 20 semester units of upper division and graduate courses and a thesis. At least 8 of these units must be in graduate courses (200 series) in your major subject. Course units are not granted for the thesis.
- **Plan II** requires a minimum of 24 semester units of upper division and graduate courses, followed by a comprehensive final examination administered by your school, department, or group. At least 12 of the units must be in graduate courses (200 series) in your major subject.

Advancement to Candidacy: Master's Plan I

All students under Master's Plan I who plan to file a thesis are required to submit an approved advancement to Candidacy application no later than the end of the fifth week of the semester in which your degree will be awarded. You must be advanced to candidacy to be eligible to receive your degree. The Advancement to Master's Candidacy form is downloadable from the Graduate Division website (<http://grad.berkeley.edu/policies/forms.shtml>). The application must be approved by the head graduate adviser of your program. You should consult your adviser as early as possible about your thesis committee.

The Master's Thesis

If you are following Plan I, described above, you must submit a thesis, according to the Library-designated format described in Thesis Filing Guidelines (<http://grad.berkeley.edu/policies/guides/thesis-filing>). For filing deadlines, refer to the Graduate Division website (http://www.grad.berkeley.edu/policies/degree_filing_deadlines.shtml).

The thesis explicates results obtained in an original investigation of a problem. The problem in question is discreet in scope; however, the thesis should be comparable to a doctoral dissertation in style and organization.

You must submit your thesis to a committee of three members of the faculty appointed by the Graduate Division, one of whom may be chosen from a department other than that of your major subject. You are required to confer with all members of your committee before beginning your thesis. If your thesis involves use of human subjects or animal, see that subsection below. The Graduate Division will also not accept a thesis

that involves human or animal subjects without official evidence of an approved protocol number from the appropriate committee.

Use of Human Subjects or Animal Subjects

If the research for a master's thesis involves the use of human subjects, the student is required to have an approved protocol from the Committee for Protection of Human Subjects (<http://www.cphs.berkeley.edu>) before beginning any research. Students using human subjects also must complete the "Course in the Protection of Human Subjects" (referred to as the CITI course), which is available online at [citiprogram.org](http://www.citiprogram.org) (<http://www.citiprogram.org>), and print out the certificate of completion. The certificate of completion must be submitted with the advancement form.

Students whose research projects involve the proposed use of live vertebrate animals must contact the Animal Care and Use Committee (ACUC) at 642-8855 before the initiation of research and, if so advised by the ACUC: (a) the faculty member who is supervising the research must obtain ACUC approval prior to any proposed use of live vertebrate animals, and (b) the student must ask the ACUC to inform the Graduate Division of the adviser's approved Master Animal Use Protocol number within six months of the advancement to candidacy date.

The Doctoral Degree

The doctoral degree is awarded in recognition of a student's knowledge of a broad field of learning and for distinguished accomplishment in that field through an original contribution of significant knowledge and ideas that demonstrates high critical ability.

Basic requirements for the doctoral degree are described in the sections below. However, consult with your individual program to verify all its program requirements, in particular what courses must be undertaken. For complete and up-to-date information on specific topics, refer to the Guide to Graduate Policy (<http://www.grad.berkeley.edu/policies/ggp/ggp.pdf>).

Academic Residence Requirement

A minimum of two years or four semesters of academic residence is required for the PhD degree. For a joint doctoral degree, a minimum of one year of academic residence is required at each campus.

Foreign Language Requirement

Your program may have a foreign language requirement which ensures that you have the ability to acquire wide knowledge in your field of study and to keep up with foreign developments in your field. You are urged to complete the foreign language requirement early in your graduate career. You must fulfill the foreign language requirement before admission to the qualifying examination and advancement to candidacy. If you are a prospective student, you are urged to inquire about the foreign language requirement as soon as possible and, if you can, to fulfill it while still an undergraduate. In some graduate programs, applicants for admission must have satisfied the foreign language requirement before applying.

Qualifying Examinations

Before you are admitted to doctoral candidacy, you must pass an oral qualifying examination administered by a four- or five-member committee approved by the Graduate Division on behalf of the Academic Senate's Graduate Council. You must be registered in the semester in which you take the examination. To be eligible to apply to take the qualifying exam, you must have removed any previous deficiencies in training, including incomplete grades in courses that your graduate adviser required for your program. You must have at least a B average in all coursework you

undertook in graduate status, and you must have fulfilled any language requirement(s).

Note: Your program may have performance standards that are higher than the minimum B average required by the Graduate Division. They may also require passage of preliminary examinations before a student is eligible to apply for the qualifying examination.

Advancement to Candidacy

As soon as possible after passing your qualifying examination, you must submit an approved Advancement to Candidacy petition. The form is downloadable from the Graduate Division website (<http://grad.berkeley.edu/policies/forms.shtml>). It must be endorsed by your head graduate adviser and dissertation chair. Payment of a fee is required when you file the application, and you must have completed all doctoral degree requirements except the dissertation before you may be advanced to candidacy.

Advancement to Candidacy and Reduced Nonresident Supplemental Tuition

For graduate students who have been advanced to candidacy for the doctorate, annual nonresident supplemental tuition is reduced by 100 percent, subject to the understanding that: graduate doctoral students may receive the reduced nonresident supplemental tuition rate for a maximum calendar period of three years; and all such students who continue to be enrolled or who re-enroll after the three-year period will be charged the full nonresident supplemental tuition rate that is in effect at that time.

Satisfactory Academic Progress and Normative Time

Normative time is the elapsed time (calculated to the nearest semester) recommended by program faculty and approved by the Graduate Council that students would need to make satisfactory program in completing requirements for the doctorate. Normative time has two components:

1. Time from the beginning of the student's graduate work to advancement to doctoral candidacy; and
2. Time in candidacy until the dissertation is filed. Graduate programs have total normative times ranging from five to seven years (10 to 14 semesters); most programs have the standard University of California norm of six years. In order for a student to be considered in good standing, the student must be progressing within the normative time established for his or her program and the student is responsible for being aware of the program's normative time standards.

Annual Review of Doctoral Candidates: the Academic Progress Report

The Graduate Council requires all doctoral students who have been advanced to candidacy to meet annually with at least two members of their dissertation committees to discuss progress during the last year and to set goals for the next. Prior to the meeting, students complete the online Academic Progress Report (APR) by logging on to GLOW (<https://gradlink.berkeley.edu>). The dissertation chair reads the student's report, and works with the student to schedule a progress meeting, and records the results in the APR. For full information, see the Graduate Division website (<http://grad.berkeley.edu/policies/guides/apr>).

The Doctoral Dissertation

The dissertation, the product of independent investigation under faculty supervision, is the capstone requirement for the doctoral program. The dissertation must be submitted to the committee in charge (see below) and must receive its approval. The dissertation must be filed according to Graduate Division procedures (<http://grad.berkeley.edu/policies/guides/dissertation-filing>). For filing deadlines see the Graduate Division website (http://grad.berkeley.edu/policies/degree_filing_deadlines.shtml). You are to work under one of two plans, as authorized for your degree program:

- **Plan A:** On behalf of the Graduate Council, the Graduate Division appoints a committee of five Academic Senate members which determines whether you have met the requirements for the degree. Three members of the committee, one of whom must be from a department other than that of your major subject, guide you in research and judge the merits of your dissertation. The entire committee conducts a final oral examination dealing with the relationship between your dissertation and the general field of study in which the subject of the dissertation lies. Admission to the final oral examination may be restricted to the members of the committee, members of the Academic Senate, and guests of equivalent rank from other institutions.
- **Plan B:** On behalf of the Graduate Council, the Graduate Division appoints a committee of three Academic Senate members, one of whom must be an Academic Senate member outside the unit administering your degree program. This committee may require any necessary conferences to elucidate the subject treated in the dissertation. After submission of the dissertation but before final action is taken upon it, the committee may, at its discretion, require you to defend the dissertation in a formal oral examination.

After your committee has approved your dissertation, you will file your manuscript with the Graduate Division (318 Sproul Hall).

Programs using Plan A: Buddhist Studies, Interdisciplinary Program, Logic and the Methodology of Science

Programs using Plan B: All other programs not listed above

Further Information on Academic Policies and Procedures

For up-to-date and detailed information, see the Graduate Division website (<http://www.grad.berkeley.edu/current/index.shtml>) for current students and the Guide to Graduate Policy (<http://www.grad.berkeley.edu/policies/ggp/ggp.pdf>).

Academic Opportunities

Exchange Programs

Graduate students not enrolled in self-supporting professional degree programs who are in good standing may participate in several campus exchange programs. These programs enable them to take advantage of research facilities, courses, and faculty expertise that might not be available at Berkeley. Applications and further information on all of the programs are available at the Graduate Services: Degrees Office (318 Sproul Hall, 642-7330, degrees@berkeley.edu). **Note:** Berkeley students will not automatically receive credit for courses taken at schools that are not part of the University of California system. For information on transferring credit, see t (p.)he Degree Requirements section. (p. 17)

University of California Intercampus Exchange Program for Graduate Students

This program allows students to study at any of the other UC campuses. This privilege is available to graduate students who would like to associate with fields of study not available on the home campus, or who seek the use of special facilities and collections. This privilege will be granted where there is evidence of serious and high-quality scholarship.

The Berkeley registration fee entitles students to library, health service, and other privileges at the host campus. Students who participate in the intercampus exchange program can receive credit for courses they take at the host campus. Students in self-supporting programs at Berkeley cannot enroll in state-supported courses at another UC.

To be eligible for the Intercampus Exchange Program, a student must be registered at Berkeley by the semester deadline and have the approval of the Head Graduate Adviser, the Chair of the host department, and the Vice Provost for Graduate Studies at both Berkeley and the host campus. Students must apply for this program at least three weeks before the beginning of the term of enrollment at the host campus (all other UC campuses except Merced are on the quarter system). Applications are available from the Graduate Division, 318 Sproul Hall. Whenever possible, students should make personal arrangements with faculty members on both campuses to ensure that the courses, seminars, and facilities will be available to them.

Stanford-California Exchange Program

Students may participate in this program if they want to take courses that are not offered at Berkeley. Their participation must be approved by the Graduate Division, their departments, and Stanford University. Usually, students are not allowed to participate in the Stanford program until they have completed a year of graduate study at Berkeley. Participants register and pay the applicable fees at Berkeley and are exempt from tuition and fees at Stanford. Students who want to apply for this program must enroll in at least one course at Berkeley.

Exchange Scholar Program

This program permits doctoral students from Berkeley, Brown, the University of Chicago, Columbia, Cornell, Harvard, MIT, the University of Pennsylvania, Princeton, Stanford, and Yale to study at one of the other participating universities. Berkeley registration entitles students to student privileges at the host campus for up to a year. Usually, students are not eligible for this program until they have completed one year in a Berkeley graduate degree program. Students who wish to enter this program should familiarize themselves with its "Terms and Conditions" statement (<http://www.sas.upenn.edu/sites/www.sas.upenn.edu/files/exchange-scholar-application.pdf>), which provides information on additional fees for which the student is responsible. For example, the host institution is responsible for assuring that hospitalization and health services are locally available. However, the host institution may charge the student additional fees for local health services. Students are not eligible for *in absentia* registration.

Cross-Registration Programs with Local Institutions

With the approval of the Graduate Division and the departments involved, students may attend any of the campuses of the California State University or the Community Colleges systems, as well as Dominican, Holy Names, Mills, and St. Mary's Colleges, and John F. Kennedy University. Students may enroll for only one course per semester, and they must register and pay applicable fees at Berkeley. For more

information, contact the Graduate Services: Degrees Office (318 Sproul Hall, 642-7330).

Graduate Theological Union (GTU) Reciprocity Program

Students registered at either UC Berkeley or GTU may take courses at the other institution, subject to appropriate academic approvals (Graduate Services Degrees, 642-7330).

Studying Abroad

Graduate students may be granted permission to study abroad. To be eligible, they must have completed at least one year in residence at Berkeley before departing for study abroad, and they must demonstrate appropriate language proficiency when required. Graduate students may be eligible to apply to most of the study centers under the University-wide Education Abroad Program (EAP). For more information, students should check the Berkeley Programs for Study Abroad website (<http://studyabroad.berkeley.edu>), or contact the program at 160 Stephens Hall, 642-1356, eapucb@berkeley.edu. Graduate students who study abroad must have the approval of their departments and the Graduate Division. Students in an EAP program are not eligible for *in absentia* registration.

To avoid jeopardizing their immigration status, international students in F or J status intending to participate in any of the exchange programs described above must consult with an international student adviser at the Berkeley International Office (<http://internationaloffice.berkeley.edu>) (International House, 2299 Piedmont Avenue; 642-2818).

Individual (*Ad Hoc*) Doctoral Programs

To allow you to work in a field that, in its breadth, falls between that of a department and an interdisciplinary group, the Graduate Council permits the informal establishment of ad hoc programs leading to the PhD degree.

Note: You will be considered for an interdisciplinary program only if you have completed at least two semesters of graduate study in a doctoral program on this campus and have shown superior academic performance in your graduate studies here. To apply for an individual major, you must prepare a proposal for a course of study under the sponsorship of five faculty members. Final approval of every individual graduate program and admission of each student into such a program must be granted by the Graduate Council. You must complete degree requirements in accordance with Plan A of the Graduate Council policies, and the degree is awarded in the field approved. For more information, see the Graduate Division website (<http://grad.berkeley.edu>).

Teaching and Research Appointments

At Berkeley, teaching assistants are called graduate student instructors (GSIs) and research assistants are similarly named graduate student researchers (GSRs). Many programs hire qualified graduate students as GSIs, readers and tutors as well as provide research appointments. Contact your department for more information and also refer to the Graduate Division's *What You Need to Know about being a GSI, GSR, Reader or Tutor* (<http://grad.berkeley.edu/policies/guides/category/appointments-guide/what-you-need-to-know-appts>).

Additionally, see the Tuition, Fees, and Financial Aid (p. 23) section of the *Berkeley Bulletin*.

Visiting Scholar and Postdoc Affairs Program (VSPA)

Berkeley is host to more than 3,000 visitors from other universities, colleges, research laboratories, and government agencies who conduct research using University facilities. The Visiting Scholar and Postdoc Affairs (VSPA) Program was established to accommodate scholars with a PhD or equivalent degree to pursue their research and professional interests on the Berkeley campus.

The VSPA Program has four decentralized authorizing units: College of Chemistry (Departments of Chemistry and Chemical and Biomolecular Engineering), College of Engineering, College of Letters and Science, and College of Natural Resources. All other campus units are under the auspice of the central VSPA Program office.

Appointments in the VSPA Program are contingent upon the interest and ability of a campus department or organized research unit (ORU) to accommodate the affiliate for the period of time desired. In order to be affiliated as a postdoc, visiting scholar or visiting student researcher, you must be sponsored by a faculty member of Berkeley and meet certain requirements.

Note: Visiting scholars and visiting student researchers are assessed an annual \$400 University Services Fee. Postdoctoral appointees are not charged this fee.

Without the payment of tuition or other fees, VSPA affiliates may informally audit classes (with the exception of courses offered by Summer Sessions or University Extension); participate in seminars with permission of the instructor; confer with faculty members; and access facilities that the sponsoring unit may be able to offer. Standard privileges include use of campus libraries, email services, fee parking permit, football ticket discounts, recreational sports facilities discounts, and access to housing services for a fee.

Note: VSPA Program affiliates should not expect sponsoring units or libraries to provide them with work space.

For more information about the VSPA Program, visit the website. (<http://vspa.berkeley.edu>)

Academic Calendar

Please note that the calendar below is subject to change. For updates, please see the official Academic Calendar, found on the Office of the Registrar's website (<http://registrar.berkeley.edu/CalendarDisp.aspx?terms=current>).

Other important dates and deadlines can also be found on the Student Calendar (<http://registrar.berkeley.edu/stucal.html>).

Please also review Campus Guidelines and Policies Concerning the Academic Calendar (http://bulletin.berkeley.edu/academiccalendar/Academic_CalendarSp_2014.pdf).

For further information regarding Reading/Review/Recitation week, please click here (<http://registrar.berkeley.edu/Registrar/RRRFAQ.html>).

For Summer Sessions registration dates and deadlines, please see the Summer Sessions website (<http://summer.berkeley.edu/registration/schedule/#deadlines>).

Fall Semester 2013

TeleBears begins	Monday, April 8, 2013
Fee payment due	Thursday, August 15, 2013
Fall semester begins	Thursday, August 22, 2013
Welcome activities	Saturday, August 24, 2013- Thursday, August 29, 2013
Instruction begins	Thursday, August 29, 2013
Labor Day holiday	Monday, September 2, 2013
Homecoming	Friday, October 4, 2013-Sunday, October 6, 2013
Veterans Day holiday	Monday, November 11, 2013
Thanksgiving holiday	Thursday, November 28, 2013- Friday, November 29, 2013
Classes end	Friday, December 6, 2013
Reading/Review/Recitation week	Monday, December 9, 2013-Friday, December 13, 2013
Last day of instruction	Friday, December 13, 2013
Final examinations	Monday, December 16, 2013- Friday, December 20, 2013
Fall semester ends	Friday, December 20, 2013
Winter holiday	Tuesday, December 24, 2013- Wednesday, December 25, 2013
New Year's holiday	Tuesday, December 31, 2013- Wednesday, January 1, 2013

Spring Semester 2014

TeleBears begins	Monday, October 21, 2013
Charter Gala	TBD
Spring semester begins	Tuesday, January 14, 2014
Fee payment due	Wednesday, January 15, 2014
Martin Luther King, Jr., holiday	Monday, January 20, 2014
Instruction begins	Tuesday, January 21, 2014
Presidents' Day holiday	Monday, February 17, 2014
Spring recess	Monday, March 24, 2014-Friday, March 28, 2014
Cesar Chavez Day holiday	Friday, March 28, 2014

Cal Day	Saturday, April 12, 2014
Reading/Review/Recitation week	Monday, May 5, 2014-Friday, May 9, 2014
Last day of instruction	Friday, May 9, 2014
Final examinations	Monday, May 12, 2014-Friday, May 16, 2014
Spring semester ends	Friday, May 16, 2014
Commencement convocation ceremony	Saturday, May 17, 2014
Memorial Day holiday	Monday, May 26, 2014

Summer Sessions 2014

TeleBears begins	Monday, February 3, 2014
Memorial Day holiday	Monday, May 26, 2014
First 6-week session begins	Tuesday, May 27, 2014
10-week session begins	Monday, June 9, 2014
8-week session begins	Monday, June 23, 2014
First 6-week session ends	Thursday, July 3, 2014
Independence Day holiday	Friday, July 4, 2014
Second 6-week session begins	Monday, July 7, 2014
3-week session begins	Monday, July 28, 2014
Second 6-week session ends	Friday, August 15, 2014
10-week session ends	Friday, August 15, 2014
8-week session ends	Friday, August 15, 2014
3-week session ends	Friday, August 15, 2014

Tuition, Fees, and Financial Aid

It is important that you carefully consider the total financing of your education, from your first term at UC Berkeley to completing your degree. If financial help will be needed beyond the funds that you or your family are able to provide, you should make the necessary applications for financial assistance well in advance of enrollment.

You should pay particular attention to early deadlines for application for grants, scholarships, Federal Work-Study, Federal Perkins, and Federal Direct Loans. While the needs and resources of each student differ, the University can provide a general list of tuition and fees and expenses normally encountered.

Note: Fees are subject to change without notice.

Part of your tuition and fees may be refunded if you cancel your registration before the opening day of the semester or withdraw before the beginning of the sixth week of classes of any semester. For specific information regarding this, please see the Tuition & Fees page (p. 23) of this bulletin.

Please note that the cost of attending the University varies according to individual circumstances. The expenses listed in this bulletin are approximate costs for the nine-month academic year and should be used only as a guideline.

Required Tuition and Fees

Visit the Office of the Registrar's website (<http://registrar.berkeley.edu/feesched.html>) for current fee information. **All tuition and fees are subject to change.**

Note: In November 2010, the Regents approved changing the name of the Educational Fee to "Tuition;" the name of Fee for Selected Professional School Students to "Professional Degree Supplemental Tuition;" and the name of Nonresident Tuition to "Nonresident Supplemental Tuition," effective July 1, 2011.

Student Services Fee

This fee (formerly referred to as the University Registration Fee) is paid by all students and shall be used to support services and programs that directly benefit students and that are complementary to, but not a part of, the core instructional program. These services and programs include, but are not limited to, operating and capital expenses for services related to the physical and psychological health and well-being of students; social, recreational, and cultural activities and programs; services related to campus life and campus community; technology expenses directly related to the services; and career support. These services and programs create a supportive and enriched learning environment for University of California students.

Tuition (formerly Educational Fee)

Tuition is used to support a portion of the student services costs of the educational program, such as financial aid, social and cultural activities, Admissions and Registrar operations, counseling and career guidance, student affirmative action, and academic tutoring. In exceptional circumstances, tuition may be reduced by one-half for

part-time undergraduate students. Approval of part-time undergraduate study is made only in exceptional cases and is based on considerations of occupation, family responsibility, and health. Applications must be approved by the appropriate dean before the start of each term. A tuition reduction will be made only if you enroll in no more than two courses.

Berkeley Campus Fee

This fee provides support for a wide range of activities sponsored by the Associated Students of the University of California (ASUC), including work with academic and administrative units of the campus. It covers use of the Student Union, helps pay construction costs of the Union building and the Lower Sproul Project, and assists with the provision of ethnic studies on the Berkeley campus.

Class Pass Transit Fee

This fee, required of all students, gives students unlimited transportation on the local bus system (AC Transit).

UC Berkeley Extension Fee

Students enrolled in the UC Berkeley Extension Fall Program for Freshmen are assessed fees through UC Berkeley Extension. For information, call (510) 643-0379.

Professional Degree Supplemental Tuition (formerly Professional Degree Fee)

Graduate students in the professional schools (Optometry, Business, Law, Public Health, Public Policy, Social Welfare, Information Management, Developmental Practice, Product Development, Translational Medicine and various programs in the Colleges of Environmental Design and Engineering) and the Health and Medical Sciences Joint Medical Program pay additional professional degree supplemental tuition. These amounts are available on the Office of the Registrar's website (<http://registrar.berkeley.edu>) and from the individual schools and programs.

University Health Insurance Fee

All students attending Berkeley must be covered by major medical health insurance. All students are therefore automatically enrolled in the University's Student Health Insurance Plan (SHIP), which provides for specialized care and hospitalization and supplements campus care services provided by University Health Services (UHS) at the Tang Center. The cost for the plan is billed with tuition and registration fees each semester. Payment for both the fall and spring semesters provides major medical coverage for the entire calendar year, including summer. You may waive out of the University's plan and not pay the fee if you can show proof of coverage comparable to the University's plan. For more information, call (510) 642-2000 or visit the UHS website (<http://uhs.berkeley.edu/ship>).

Nonresident Supplemental Tuition

At the time of registration, students are classified as a resident or nonresident for tuition and fee purposes. Only US citizens and holders of immigrant visas can qualify for resident classification. Under California law you may be classified as a resident for tuition and fee purposes if you have lived in California for more than one year immediately before the day instruction begins at the last of the campuses to open for a semester. Residency is the combination of physical presence within California, intent to live in California permanently, plus demonstrated financial independence for the two years immediately preceding the request for residence classification. Nonresidents must pay nonresident supplemental tuition each semester. For detailed information regarding

the establishment of California residence, please see the California Residency section of this bulletin (p. 28); or write to the Legal Analyst, Residence Matters, 1111 Franklin St., 8th Floor, Oakland, CA 94607-5200.

Additional Fees and Expenses

Document Management Fee

New students are assessed a Document Management Fee which covers various transactions fees for documents and services, including official transcripts, verification of enrollments and degrees, certificates of completion, and one-time mailing of diplomas, for the lifetime of the degree.

Late Registration Fee

A \$150 late registration fee will be charged to all students who fail to become officially registered by the end of the third week of instruction each semester. To be officially "registered," a student must be enrolled in at least one course; pay at least 20% of assessed tuition and registration fees; and have no active registration blocks.

Late Fee Payment

Payments must be received, not postmarked, by the deadline indicated on the Campus Accounts Receivable System (CARS) statement. All other delinquent accounts more than \$50 will be assessed penalties as follows:

- \$20 on accounts one month past due
- \$25 on accounts two months past due and monthly thereafter until the account is brought current.

Returned Check Charges

A processing charge of \$50 is assessed when the bank returns a check for payment of tuition and registration fees. A processing charge of \$20 is assessed for all other returned checks.

Reinstatement after Having Been Dropped from University Rolls

\$10

Collection Costs

Additional costs may be assessed on any defaulted debts requiring remedial collection activity. These costs may include applicable attorney's fees.

Cal Intercollegiate Athletics

Student season tickets are available for purchase here (<http://www.calbears.com>) for football and men's basketball, while supplies last. Admission to other regular season home events is free to all currently registered full-time Berkeley students with student ID.

Note: There are no student discounts for post-season events. For additional information, click here (<http://www.calbears.com>), call 800-GO-BEARS or call (510) 642-3277.

Financial Aid

The Financial Aid and Scholarships Office works closely with students to make a UC Berkeley education an affordable reality. At Berkeley, we are proud to say that nearly everyone is eligible for financial aid.

Through strategic partnerships and rigorous planning, our dedicated staff:

- Offers innovative aid programs to make higher education affordable
- Helps students and parents navigate financial aid processes
- Counsels students so they understand their options and feel empowered to make the best choices to manage their financial lives
- Advocates on behalf of students
- Teaches students about financial literacy
- Creates a comprehensive, holistic culture of care that transforms the student experience and helps us recruit, retain, and graduate students and prepare them for success in life
- Fosters a sense of community by encouraging alumni and donors to connect with the university and give the gift of access to the next generation of students

For detailed information about the various types of financial aid available to Berkeley students, please see the Financial Aid and Scholarships Office website (<http://financialaid.berkeley.edu>).

Students apply for financial aid by submitting a Free Application for Federal Student Aid (FAFSA) online (<https://fafsa.ed.gov>), or if a Dream Act student, by submitting a California Dream Act Application online. (http://www.csac.ca.gov/dream_act.asp) The deadline for applying is March 2.

All financial aid except fellowships, honorary scholarships, teaching and research appointments, and prizes is granted on the basis of financial need. Financial need is the difference between the cost of attendance for the academic year and the amount you and your family can contribute toward those costs. Prizes are awarded on the basis of competition or outstanding ability in some area of creative or scholarly endeavor. Most scholarships are awarded on the basis of academic performance and financial need.

Much of the funding for graduate students comes from sources other than the Financial Aid and Scholarships Office. Fellowships are awarded through the Graduate Division. Information and applications are available at the Graduate Division, 318 Sproul Hall.

Reserve Officers Training Corps

The University of California, as a land-grant institution established by the Morrill Act of 1862, offers courses and programs in military training. This training is voluntary and affords you the opportunity to qualify for a commission as an officer in the Army, Navy, Air Force, or Marine Corps while completing your college education. Reserve Officers Training Corps (ROTC) courses are offered by three departments: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). Scholarship programs are available; they carry a monthly stipend and pay for tuition, books, and most fees for qualified students. Individual programs are described under Military Officers Education Program in the Courses and Curricula section of this catalog.

Veterans' Educational Benefits

UC Berkeley's Veteran Services unit in the Office of the Registrar provides veterans and their dependents the information and assistance

required to seamlessly receive veterans' educational benefits while pursuing their academic careers at Berkeley.

The Veteran Services unit serves as a liaison between the U.S. Department of Veterans Affairs (VA) and UC Berkeley students eligible for federal veterans' educational benefits, and assists students eligible for the California Department of Veterans Affairs College Fee Waiver (Cal Vet) program.

For detailed information about initiating and receiving veterans educational benefits at Berkeley, please visit our website (<http://registrar.berkeley.edu/veterans.html>).

If you have questions please visit or contact Veteran Services at:
Office of the Registrar
120 Sproul Hall #5404
University of California
Berkeley, CA 94720
Fax: 510-643-4222
Phone: 510-642-1592
Email: veteranservices@berkeley.edu

Fellowships, Graduate Scholarships, and Academic Appointments for Graduate Students

Numerous programs—from fellowships, grants-in-aid, and loans to assistantships, subsidized housing, and child care programs—provide ways in which you can reduce the costs of graduate school. Some of the programs are need-based and are administered through the Financial Aid and Scholarships Office. Others are merit-based and are administered through the Graduate Services: Fellowships and Appointments Offices and the academic departments. For detailed information about all the sources available to you, consult the Graduate Application for Admission and Fellowships (<http://grad.berkeley.edu/admissions/index.shtml>).

Fellowships and Graduate Scholarships

Applications for University fellowships and graduate scholarships are considered only once a year. Awards are made for the academic year beginning with the fall semester. U.S. citizens and permanent residents should complete the "Free Application for Federal Student Aid" (FAFSA) for determination of financial need.

Fellowship Application Procedure

If you are applying for admission/fellowship, you must file the combined Graduate Application for Admission and Fellowships (<http://grad.berkeley.edu/admissions/index.shtml>), according to instructions included in the application.

If you are applying for admission for the spring semester, you should see your department for a financial award to begin the following fall semester.

If you are a continuing or returning graduate student at Berkeley, you may obtain the necessary fellowship application materials from your department or graduate group. For a list of funding opportunities throughout the year, visit the Graduate Fellowships website (<http://grad.berkeley.edu/financial/deadlines.shtml>).

The fellowship application deadlines for new students range from early December to late January, depending on the department; see the Graduate Application for Admission and Fellowships (<http://grad.berkeley.edu/admissions/index.shtml>) for deadlines. Continuing students should see their departments before January 5.

Announcement of Awards

Awards are announced by March 1 and must be accepted or declined, in writing, by April 15.

Fellowship Supplementation

Fellows receiving stipends plus fees (the latter from either fellowship or academic appointments) may be subject to an employment restriction: students may work up to 25% during the academic year (that is, 25 percent each term or 50 percent for one term only). There is no work restriction for the Summer term.

Additional fellowships are announced monthly in eGrad, our online newsletter. To sign up for eGrad, email gradpub@berkeley.edu and put "eGrad mailing list" in the subject line.

Graduate Diversity Program (GDP)

GDP provides a foundation of active support for underrepresented students through a number of important services:

- Outreach visits throughout the country
- Academic advising/mentoring throughout the student's academic career
- Undergraduate research opportunities
- Advice on applying to graduate school
- Monthly seminars on professional development
- Career advice/planning
- Networking opportunities on campus

Underrepresented students will find social and academic support in the numerous student organizations on campus, such as those listed on the Graduate Minority Students' Project website (<http://ga.berkeley.edu/projects/gmsp>). In addition, the University maintains discipline-based student diversity programs in engineering, the humanities, public health, and the biological, physical, and social sciences. For information regarding opportunities and support on behalf of diversity, contact the Graduate Diversity Program, 104 California Hall #1500; (510) 642-7294; e-mail grad.diversity@berkeley.edu; or visit the website. (<http://diversity.berkeley.edu/graduate/gdp>)

Graduate Student Academic Appointments

Academic appointments are an important source of financial support for Berkeley graduate students, although their availability varies from department to department. As part of an offer of admission, some departments may propose a combination of teaching and research appointments as part of a financial support package. Other departments may expect graduate students to arrange for appointments once they have been admitted.

Graduate students appointed by the University to most academic titles must meet minimum academic requirements, such as GPA and a limit on incomplete grades, and be registered and enrolled in at least 12 units of 100- to 200-level courses per semester until they are advanced to doctoral candidacy. Units in the 600 series may be substituted for 200-level units when appropriate. Lower division units taken to prepare for departmental requirements (languages, mathematics, statistics) may be substituted for 100-level units. Most graduate student academic appointments are eligible for tuition and fee remissions in addition to salary. For more information on eligibility requirements and the availability of appointments, contact the department for which you wish to work. Departments occasionally may list openings with the Career Center.

Graduate students are restricted to working no more than half time regardless of the positions they hold. To ensure proper academic progress, the University may not appoint candidates for higher degrees in any capacity at more than half time during the academic year without the express consent of the Vice Provost for Graduate Studies. Summer appointments may be full time.

Graduate student instructors (GSIs), acting instructors (AI-GS), readers, tutors, nursery school assistants, and community teaching fellows are covered by a collective bargaining agreement with the United Automobile Workers (UAW). Under the language of the contract, students hired in these titles are referred to as ASEs (academic student employees). You will find this acronym used in the contract and in campus communications. ASEs should familiarize themselves with the contract; see the Labor Relations website (<http://hrweb.berkeley.edu/labor/contracts/BX>). Information on anticipated appointments for the next academic year can be found on the Labor Relations website (<http://hrweb.berkeley.edu/labor/contracts/BX/job-opportunities/expected>).

Teaching Appointments

Many departments make GSI positions available to qualified graduate students. GSIs must be registered full-time students and are limited to working half time or less. They are chosen for scholarly achievement and promise as teachers, and they serve under active supervision of the regular faculty. Some departments require their students to complete a specified minimum period of teaching as part of their PhD programs.

Graduate students who do not speak English as a native language and do not hold a bachelor's degree from an institution in the United States must pass a test of spoken English before they can be appointed as graduate student instructors. If you have taken the Test of English as a Foreign Language (TOEFL) Internet-Based Test (iBT), your speaking section score will be used to determine your proficiency. If you have not taken the TOEFL iBT and need to demonstrate oral English proficiency, the Speaking Proficiency English Assessment Kit (SPEAK) will be administered at Berkeley.

For further information on the Language Proficiency Program (testing and courses), visit the GSI Teaching and Resource Center website. (<http://gsi.berkeley.edu>) For information on the TOEFL visit here. (<http://www.ets.org/toefl>)

Research Appointments

If you are a qualified registered full-time graduate student, you may seek a research appointment in the departments, centers, and institutes of the University. Graduate student researchers (GSRs) perform research broadly related to their degree programs in an academic department or research unit under the direction of a faculty member or authorized principal investigator. The duration and extent of such an appointment may vary. If interested, you should apply directly to the department, center, or institute in which you wish to work.

Stipends and Tuition and Fee Remissions

Stipend figures for all positions mentioned above are subject to US income tax deductions. If you are offered an appointment, you should obtain information about payment schedules, since payment for work performed is later than the deadline for payment of tuition and registration fees. For teaching appointments, payment is usually in five equal installments per semester.

Some appointments carry a benefit called a fee remission, which offsets either a portion or all of your assessed tuition and fees. Check with your

department to determine your specific eligibility, but you'll find all the basic requirements in the Fee Remission Bulletin (<http://grad.berkeley.edu/policies/guides/fee-remission-bulletin>).

More information about being a graduate student instructor, graduate student researcher, reader, or tutor is available from the Graduate Services: Appointments Guide (<http://grad.berkeley.edu/policies/guides/category/appointments-guide>).

Undergraduate Student Budgets 2013-2014

The Undergraduate Student Budgets represent the average amounts paid by UC students in various housing situations. The Financial Aid and Scholarships Office updates these figures annually through student surveys and other research. The Student Budget is a major factor in setting the amount of financial aid you may receive; your budget is based on the housing option you selected on your Free Application for Federal Student Aid (FAFSA) until your housing status is confirmed by the Financial Aid and Scholarships Office. The Student Budget is subject to change. These amounts are the most recent estimates available as of July 18, 2013.

Undergraduate Residence Halls

Housing & Utilities	\$14,232
Food	\$948
Books & Supplies	\$1,226
Personal	\$1,430
Transportation	\$606
Health Insurance	\$2,014
Tuition & Fees	\$12,864
Total Resident Budget	\$33,320
Nonresident Supplemental Tuition & Fees	\$22,878
Total Nonresident Budget	\$56,198

Undergraduate Off-Campus

Housing & Utilities	\$7,458
Food	\$2,626
Books & Supplies	\$1,226
Personal	\$1,746
Transportation	\$924
Health Insurance	\$2,014
Tuition & Fees	\$12,864
Total Resident Budget	\$28,858
Nonresident Supplemental Tuition & Fees	\$22,878
Total Nonresident Budget	\$51,736

Undergraduate Commuter (living with relatives)

Housing & Utilities	\$2,506
Food	\$1,706

Books & Supplies	\$1,226
Personal	\$1,962
Transportation	\$1,814
Health Insurance	\$2,014
Tuition & Fees	\$12,864
Total Resident Budget	\$24,092
Nonresident Supplemental Tuition & Fees	\$22,878
Total Nonresident Budget	\$46,970

Graduate Student Budgets 2013-2014

The Graduate Student Budget represents average living expenses, based on Student Expense Surveys conducted every year by the Graduate Division. The Student Budget is a major factor in setting the amount of financial aid you may receive. The Student Budget is subject to change. These amounts are the most recent estimates available as of July 18, 2013.

Graduate Students

Housing & Utilities (\$1,198/month)	\$10,778
Food (\$711/month)	\$6398
Personal (\$163/month)	\$1,468
Transportation (\$329/month)	\$2,964
Total Living Expenses	\$21,608
Books	\$696
Tuition & Fees	\$12,864
Total Graduate Budget (California residents)	\$37,940
Nonresident Supplemental Tuition & Fees	\$15,102
Total Graduate Budget (Nonresidents)	\$53,042

Registration and Enrollment

Tele-BEARS

Tele-BEARS is an online enrollment system that allows you to enroll in classes at UC Berkeley. You use Tele-BEARS to add, drop, or make other changes to your class schedule. For information on how to use TeleBears, please see the Office of the Registrar's website (http://registrar.berkeley.edu/current_students/tbinfo.html).

Paying Tuition and Registration Fees

A monthly billing statement indicating all University tuition and registration fees due will be generated for you and posted online by the Student Billing Services office. You may pay your tuition and fees in full or in five installments on the Deferred Payment Plan. Tuition and fee payments (either in full or the first installment) are due on August 15 for the fall semester and January 15 for the spring semester. For more information, see the Student Billing Services website (<http://studentbilling.berkeley.edu>).

The Deferred Payment Plan

You may pay your tuition and registration fees in five installments if you wish. A nonrefundable processing fee will be charged to your first installment. Your billing statement will indicate the amount due for the first payment; subsequent statements for the remaining payments will be generated for you automatically. For full information about the Deferred Payment Plan, visit the Student Billing Services website (<http://studentbilling.berkeley.edu>).

Criteria for Being an Officially Registered Student

In order to be officially registered at Berkeley, you must meet three criteria:

1. You must be enrolled in at least one course.
2. Your tuition and registration fees must have been paid, either in full or at least the first installment if you are on the Deferred Payment Plan.
3. You must have no blocks against your registration.

Note: You must be officially registered to use campus services (e.g., the library, RSF).

Bear Facts

Bear Facts provides critical information regarding your registration, grades, billing, class schedule, and more. You can access Bear Facts here. (<https://bearfacts.berkeley.edu/bearfacts>)

Cancellation or Withdrawal of Registration

If you do not wish to attend the University for a semester and instruction has not yet begun, you must formally request a cancellation of your registration from the University. If instruction has already begun and you

find it necessary to stop attending classes, you must formally request a withdrawal from the University. Whether you cancel or withdraw, any classes in which you are enrolled will be dropped from your schedule, and you will no longer be eligible to attend for that semester or any future semester until you are readmitted.

For further information on Cancellation and Withdrawal, please see the Office of the Registrar's website (http://registrar.berkeley.edu/current_students/registration_enrollment/canwd.html).

Tuition and Registration Fee Adjustments

The amount of tuition and registration fees that you may be responsible for at the time of your withdrawal or cancellation is prorated based on the effective date of your withdrawal or cancellation, according to the tables found here (http://registrar.berkeley.edu/current_students/registration_enrollment/canwd.html).

Note: The Health Insurance and Class Pass, and Document Management fees are nonrefundable and, therefore, remain assessed at 100 percent for all withdrawals, regardless of the effective date.

Returning to UC Berkeley After Cancellation

New Students

If you cancelled your registration and wish to attend Berkeley in a future semester, you must submit a new application for admission. Your previous admission status will have no bearing on the decision for admission in the future.

Continuing Students

If you cancelled your registration and wish to attend Berkeley in a future semester, you must submit an "Application for Readmission."

- **Undergraduate Students:** For further information and a copy of the application, please see the readmissions page of the Office of the Registrar's website (http://registrar.berkeley.edu/current_students/readmission.html).
- **Graduate Students:** For further information, please see the Graduate Division website (<http://grad.berkeley.edu/policies/guides/d1-9-readmission>).

Returning to Berkeley After Withdrawal

If you withdrew from the University and wish to return in a future semester, you must submit an "Application for Readmission."

- **Undergraduate Students:** For further information and a copy of the application, please see the readmissions page of the Office of the Registrar's website (http://registrar.berkeley.edu/current_students/readmission.html).
- **Graduate Students:** For further information, please see the Graduate Division website (<http://grad.berkeley.edu/policies/guides/d1-9-readmission>).

California Residency and the Non-Resident Supplemental Tuition

If you have not been living in California with the intent to make it your permanent home for more than one year immediately before the residence determination date for each semester in which you propose to attend the University, you must pay a non-resident supplemental tuition fee in addition to all other tuition and fees. The residence determination date is the day instruction begins at UC Berkeley.

Law Governing Residence

The rules regarding legal residence for tuition and fee purposes at the University of California are governed by the California Education Code as adopted by Standing Order 110.2 of The Regents of the University of California. Under these rules, adult citizens or certain classes of aliens can establish residence for tuition and fee purposes. There are also particular rules that apply to the residence classification of minors.

Who Is a California Resident?

If you are an adult who is a US citizen or permanent resident and you want to be classified as a resident for tuition and fee purposes, you must have established your continuous presence in California more than one year immediately preceding the residence determination date for the semester during which you propose to attend the University, and you must have given up any previous residence. If you are not a US citizen or permanent resident and carry a non-immigrant visa, some visas may preclude you from establishing residency (i.e. B, F, J, TD/TN). You must also present objective evidence that you intend to make California your permanent home. Evidence of intent must be dated one year before the term for which you seek resident classification. If these steps are delayed, the one-year duration period will be extended until you have demonstrated both continuous presence and intent for one full year. Physical presence within the state solely for educational purposes does not constitute the establishment of California residence under state law, regardless of the length of your stay. Your residence cannot be derived from your spouse nor, since you are an adult, from your parents. Likewise, a registered domestic partner does not derive residence from the other registered domestic partner.

Establishing Intent to Become a California Resident

Indications of your intent to make California your permanent residence can include registering to vote and voting in California elections; designating California as your permanent address on all school and employment records, including military records if you are in the military service; obtaining a California driver's license or, if you never had a driver's license from any state, a California Identification Card; obtaining California vehicle registration; paying California income taxes as a resident, including taxes on income earned outside California from the date you establish residence; establishing a California residence in which you keep your permanent belongings; licensing for professional practice in California; and the absence of these indications in other states during any period for which you claim California residence. Documentary evidence is required. All relevant indications will be considered in determining your classification. Your intent will be questioned if you return to your prior state of residence when the University is not in session.

Financial Independence Requirement

Effective fall 1993, if your parents do not meet the requirements to be considered California residents for tuition and fee purposes or if you were not previously enrolled in a regular session at any University of California campus, you will be required to be financially independent in order to be a resident for tuition and fee purposes. If you are an adult student and your parents are not California residents, you must demonstrate financial independence, along with physical presence and intent, when seeking resident classification for tuition and fee purposes. You are considered "financially independent" if one or more of the following applies:

1. You are at least 24 years of age by December 31 of the year you request residence classification;
2. You are a veteran of the US Armed Forces;
3. You are a ward of the court or both of your parents are deceased;
4. You have legal dependents other than a spouse or registered domestic partner;
5. You are married, a registered domestic partner, or a graduate or professional student and you were not/will not be claimed as an income tax deduction by your parents or any other individual for the tax year preceding the term for which you are requesting resident classification; or
6. You are a single undergraduate student who was not claimed as an income tax deduction by your parents or any other individual for the two tax years immediately preceding the term for which you are requesting resident classification, and you can demonstrate self-sufficiency for those years and the current year.

Note: Graduate students who are graduate student instructors, teaching or research assistants, or teaching associates employed at 49% time or more (or awarded the equivalent in University-administered funds, e.g., grants, stipends, fellowships) in the term for which resident classification is sought are exempt from the financial independence requirement.

General Rules Applying to Minors

If you are an unmarried minor (under age 18), the residence of the parent with whom you live is considered your residence. If you have a parent living, you cannot change your residence by your own act, by the appointment of a legal guardian, or by the relinquishment of a parent's right of control. If you live with neither parent, your residence is that of the parent with whom you last lived. Unless you are a minor present in the United States under the terms of a non-immigrant status which precludes you from establishing domicile in the United States, you may establish your own residence when both your parents are deceased and a legal guardian has not been appointed. If you derive California residence from a parent, that residence must satisfy the one-year duration requirement.

Specific Rules Applying to Minors

Divorced/Separated Parents

If you want to derive California resident status from a California resident parent, you must move to California to live with that parent before your 18th birthday and establish the requisite intent and remain in California until school begins. Otherwise, you will be treated like any other adult coming to California to establish your legal residence.

Parent of Minor Moves from California

If you are a minor US citizen or eligible alien whose parent was a resident of California but who left the state within one year of the residence determination date, you are entitled to resident classification if you remain in California after your parent departs, enroll in a California public postsecondary institution within one year of your parent's departure, and, once enrolled, attend continuously until you turn 18.

Self-Support

If you are a US citizen or eligible alien and are a minor and can prove that you lived in California for the entire year immediately before the residence determination date, that you have been self-supporting for that year, and that you intend to make California your permanent home, you may be eligible for resident status.

Two-Year Care and Control

If you are a US citizen or carry an eligible immigrant status and you lived continuously for at least two years before the residence determination date with an adult who was not your parent but was responsible for your care and control, and who, during the one year immediately preceding the residence determination date was a resident of California, you may be entitled to resident status. This exception continues until you become 18 and have resided in the state long enough to become a resident, as long as you continuously attend an educational institution.

Exemptions from Non-Resident Supplemental Tuition (Proof of Eligibility Is Required)

Member of the Military

If you are a member of the US military stationed in California on active duty, unless you are assigned to a state-supported institution of higher education for educational purposes, you may be exempted from non-resident supplemental tuition. You must provide the residence deputy on campus with a statement from your commanding officer or personnel officer indicating the dates of your assignment to California and confirming that the assignment to active duty in the state is not for educational purposes. If you are a graduate or professional student, you are eligible for this exemption until you have resided in the state the minimum time necessary to become a resident (366 days).

As an active duty member, you may be eligible for an exemption while continuously enrolled, during which time you must fulfill Federal Higher Education Opportunity Act (HEOA) requirements in order to maintain waiver eligibility. You must be on active military duty in California for a period of more than 30 days on or during the residence determination date of the term for which the exemption is requested and whose domicile or permanent duty station is in California.

If you are an undergraduate, graduate, or professional student and a former active duty member of the military, you may be exempt from non-resident supplemental tuition if you were stationed in California and were on active duty for more than one year (366 days) immediately prior to being discharged from the military.

Spouse, Registered Domestic Partner, or Other Dependents of Military Personnel

You may be exempt from payment of non-resident supplemental tuition if you are a dependent natural or adopted child, stepchild, registered

domestic partner, or spouse of a member of the armed forces of the United States stationed in California on active duty. If you are a graduate or professional student, you will be entitled to this exemption until you have resided in the state the minimum time necessary to become a resident (366 days). If you are enrolled in an educational institution and the member of the armed forces is transferred outside California where he or she continues to serve on active duty or retires from active duty, you will not lose your exemption until you have resided in the state the minimum time necessary to become a resident (366) days.

If you are a student who is a dependent natural or adopted child, stepchild, spouse, or registered domestic partner of a member of the armed forces of the United States who is stationed in CA on active duty, you may be entitled to a resident classification. The student must be the dependent of a member of the armed forces who is stationed in California on active duty on the residence determination date or, after serving in California on active duty, has been transferred outside California where he continues to serve, or has retired from active duty immediately after serving in California.

Child, Spouse, or Registered Domestic Partner of Faculty Member

To the extent funds are available, if you are an unmarried dependent child under age 21 or the spouse or registered domestic partner of a member of the University faculty who is a member of the Academic Senate, you may be eligible for a waiver of non-resident supplemental tuition. Confirmation of the faculty member's membership in the Academic Senate must be secured each semester before this waiver is granted.

Child, Spouse, or Registered Domestic Partner of University Employee (Whose Assignment is Outside California)

If you are an unmarried dependent child, spouse, or registered domestic partner of a full-time University employee whose assignment is outside California (e.g., Los Alamos National Laboratory or the University of California Washington, D.C., Center), you may be eligible for a waiver of non-resident supplemental tuition. Your parent's, spouse's, or registered domestic partner's employment status with the University must be ascertained each semester.

Child, Spouse, or Registered Domestic Partner of Deceased Public Law Enforcement or Fire Suppression Employee

If you are the child, spouse, or registered domestic partner of a deceased public law enforcement or fire suppression employee who was a California resident and was killed in the course of fire suppression or law enforcement duties, you may be entitled to a waiver of non-resident supplemental tuition.

Dependent Child of a California Resident Parent

If you have not been an adult resident of California for more than one year and you are a dependent child of a California resident parent who has been a resident for more than one year immediately before the residence determination date, you may be entitled to a waiver of non-resident supplemental tuition until you have resided in California for the minimum time necessary to become a resident as long as you maintain continuous attendance at an educational institution.

Native American Graduates of a Bureau of Indian Affairs High School

If you are a graduate of a California high school operated by the Federal Bureau of Indian Affairs, you may be eligible for an exemption from non-resident supplemental tuition.

Employee of a California Public School District

Any person holding a valid credential authorizing service in the public schools of the state of California who is employed by a school district in a full-time certificate position may be eligible for a non-resident supplemental tuition waiver.

Student Athlete in Training at US Olympic Training Center, Chula Vista

Any amateur student athlete in training at the US Olympic Training Center in Chula Vista may be eligible for a waiver of non-resident supplemental tuition until he or she has resided in the state the minimum time necessary to become a resident.

Graduate of a California High School

You may be entitled to an exemption from non-resident supplemental tuition if you attended high school in California for three or more years and graduated from a California high school (or attained the equivalent). You are not eligible for this exemption if you are a non-immigrant alien.

Spouses, Registered Domestic Partners, and Dependents of California Residents Killed in September 11, 2001, Terrorist Attacks

If you are an undergraduate student who is a spouse, registered domestic partner, or dependent of a California resident killed in the September 11, 2001, terrorist attacks on the World Trade Center and the Pentagon or the crash of United Airlines Flight 93, you may be eligible for an exemption from non-resident supplemental tuition. Eligible students must meet the financial need requirements for the Cal grant A program.

Recipient or Child of a Recipient of the Congressional Medal of Honor

If you are a recipient of the Congressional Medal of Honor or the child of a recipient of the Congressional Medal of Honor, you may be eligible for an exemption from non-resident supplemental tuition.

For more information, please see the Office of the Registrar's website (http://registrar.berkeley.edu/current_students/residency.html).

Temporary Absences

If you are a non-resident student who is in the process of establishing California residency for tuition and fee purposes and you leave California during non-academic periods (for example, to return to your former or parent's home state), your presence in California will be presumed to be solely for educational purposes, and only convincing evidence to the contrary will rebut this presumption. Students who are in the state solely for educational purposes will not be classified as residents for tuition and fee purposes, regardless of the length of stay.

If you are a student who has been classified as a resident for tuition and fee purposes and you leave the state temporarily, your absence could result in the loss of your California residence. Again, only strong evidence will rebut the presumption that you are/were in California solely

for educational purposes. The burden of proof will be on you to verify that you did nothing inconsistent with your claim of a continuing California residence during your entire absence.

If you are a minor student, your residence is determined by the residence of the parent(s) with whom you live or last lived, and you would not lose that residence unless you perform acts inconsistent with a claim of permanent California residence. Some steps that you (or your parent(s) if you are a minor student) should take to retain resident status for tuition and fee purposes are:

1. Satisfy California resident income tax obligations. It should be noted that individuals claiming permanent California residence are liable for payment of income taxes on their total income, including income earned outside the state (abroad or in another state).
2. Continue to use a California permanent address on all records (educational, employment, military, etc.).
3. Attend an out-of-state public institution as a non-resident for the entire period of enrollment there.
4. Retain your California voter's registration and vote by absentee ballot.
5. Maintain a California driver's license and vehicle registration. If it is necessary to change your license or registration while temporarily residing in another state, the license must be changed back to California within 10 days of the date of return to the state, and the vehicle registration must be changed within 20 days of the date of return.
6. Return to California during your vacation periods.

Form and Documentation Deadlines

Please see the Office of the Registrar's website (<http://registrar.berkeley.edu/Registrar/deadline.html>) for information on all deadlines for new and continuing students. Additionally, there is a documentation deadline for each semester. If you do not provide the requested documents within the deadline you may be held responsible for the non-resident supplemental tuition.

Incorrect Classification

If you were incorrectly classified as a resident, you are subject to reclassification and to payment of all non-resident supplemental tuition not paid. If you concealed information or furnished false information and were classified incorrectly as a result, you are also subject to University discipline and may be referred to the Center for Student Conduct. Resident students who become non-residents must immediately notify the campus residence deputy.

Inquiries and Appeals

Inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to:

Residence Affairs Unit, Office of the Registrar, 120 Sproul Hall, Berkeley, CA 94720-5404, telephone (510) 664-9181, email orres@berkeley.edu
OR

the Legal Analyst: Residence Matters, 1111 Franklin Street, 8th Floor, Oakland, CA 94607-5200

No other University personnel are authorized to supply information relative to residence requirements for tuition and fee purposes.

Any student, following a final decision on residence classification by the residence deputy, may appeal in writing to the legal analyst within 30 days of notification of the residence deputy's final decision.

Caution: This summary is not a complete explanation of the law regarding residence for tuition and fee purposes. Additional information is available from the Office of the Registrar's website (http://bulletin.berkeley.edu/registrationandenrollment/%20http://registrar.berkeley.edu/current_students/residency.html). **Note:** Changes may be made in the residence requirements between the publication date of this statement and the relevant residence determination date.

Academic Policies

The Semester System

Under the semester system on the UC Berkeley campus, the academic year is divided into two semesters and one summer session. Quarter units, either earned previously at Berkeley or at another institution, are converted to semester units by multiplying by two-thirds (for example, 180 quarter units equal 120 semester units).

Courses and Units

Most University courses are assigned a unit value. One unit represents three hours of work per week by the student, including both class attendance and preparation.

Repetition of Courses

You may repeat only courses in which you received a grade of D+, D, D-, F, NP, or U. You may repeat an I grade subject to certain limitations (see Grade I). Courses in which you received a grade of D+, D, D-, or F, and courses that you undertook for a letter grade but for which you received a grade of I, may not be repeated on a passed/not passed or satisfactory/unsatisfactory basis. Repetition of a course more than once requires approval by the dean of the college, school, or division in which you are enrolled at the time you repeat the course. Without this approval, a course repeated more than once will not be included in the grade point average (GPA), but a passing grade in the repeated course will be accepted in satisfaction of unit requirements for the degree. Degree credit for a repeated course will be given only once, but the grade assigned at each enrollment is permanently recorded. If you repeat courses in which you received a grade of D+, D, D-, or F, the units are counted only once and only the most recently earned grades and grade points are used for the first 12 units repeated. Second repetitions that are approved by the Dean of a student's college or school are to be included in the 12-unit limitation. In case of repetitions beyond the 12 units, the GPA is based on all grades assigned and total units attempted. If, however, you receive a grade of I upon repetition of a course, the grade of D+, D, D-, or F will continue to be computed in the GPA until the I grade is replaced. If you repeat an I in a letter-grade course, the I will lapse to an F unless you have permission of the dean of your college or school to retain the I grade for a longer period.

Grades

The work of all students on the UC Berkeley campus is reported in terms of the following grades: A (excellent); B (good); C (fair); D (barely passed); F (failure); P (passed at a minimum level of C- for undergraduate students); NP (not passed); S (satisfactory, passed at a minimum level of B- for graduate students); U (unsatisfactory); I (work incomplete due to circumstances beyond the student's control, but of passing quality); and IP (work in progress, final grade to be assigned upon completion of entire course sequence). The grades A, B, C, and D may be modified by plus (+) or minus (-) suffixes.

A course in which the grade A, B, C, D, or P (undergraduate students only) is received is counted toward degree requirements. A course receiving the grade S (graduate students only) is similarly counted subject to Academic Senate regulations. A course in which the grade F, NP, or U is received is not counted toward degree requirements. A course in which

the grade of I or IP is received is not counted toward degree requirements until the I or IP is replaced by grade A, B, C, D, P, or S.

Grade Points

Grade points per unit are assigned as follows: A=4, B=3, C=2, D=1, and F=none. When attached to the grades A, B, C, or D, plus (+) grades carry three-tenths of a grade point more per unit, and minus (-) grades three-tenths of a grade point less per unit than unsuffixed grades, except for A+, which carries 4.0 grade points per unit as does the A.

Grade Point Average (GPA)

Your GPA is computed on courses undertaken in the University of California. Effective fall 2005, XB courses undertaken in UC Berkeley Extension count toward your GPA. Grades A, B, C, D, and F are used in determining your GPA; grades IP, P, S, NP, and U carry no grade points and are excluded from all grade-point computations. Grade I, if assigned before fall 1973, is included and is computed as an F; an I grade assigned fall 1973 and later is excluded from computations. For additional information, see Repetition of Courses in the Overview section. (p. 33)

Special Provisions: Graduate Students

Only courses graded A, B, C (with or without plus or minus signs), or S are accepted in satisfaction of degree requirements. Courses graded below C- do not yield unit credit toward a higher degree, regardless of your overall GPA. Graduate students must maintain a minimum GPA of 3.0 in all upper division and graduate coursework undertaken in graduate standing in the University of California or its exchange programs. *Note:* Departments, schools, and groups may have a higher performance standard than the minimum B average (3.0 GPA) required by the Graduate Division. You must also work full time at your academic or professional program unless a program with fewer units is approved under special circumstances by your graduate adviser. In addition, you must successfully complete all coursework required by your department, school, or group program, be advanced to candidacy, pass the required examinations, and fulfill other requirements specified for the program.

For a course extending over more than one semester in which evaluation of your performance is deferred until the end of the final semester, provisional grades of In Progress (IP) may be assigned in the intervening semesters. The provisional grades are replaced by the final grade if you complete the full sequence. If you do not complete the full sequence, then you will be given an I grade if the instructor has no other basis for assigning a grade. Further changes will be made according to Academic Senate regulations.

With the consent of the department involved, graduate students may enroll in courses in the 600-series. These courses are evaluated by means of the grades satisfactory and unsatisfactory (S and U). They prepare you for appropriate master's or doctoral examinations and do not count toward academic residence or the unit requirements for a higher degree. You may earn 1-8 units of 601 or 602 per semester or 1-4 units per summer session toward examination preparation. Units earned in these courses may not be used to meet academic residence or unit requirements for the Master or Doctor's degree. No credit is allowed for work graded unsatisfactory.

Passed/Not Passed and Satisfactory/Unsatisfactory Grades

If you are an undergraduate in good academic standing (2.0 GPA or better, or in good academic standing under the academic probation regulations of your college or school), you may elect to take letter-graded

courses on a passed/not passed basis, and if you are a graduate student in good academic standing, you may elect to take letter-graded courses on a satisfactory/unsatisfactory basis with the consent of your department, school, or group. Credit for courses taken on these bases is limited to one-third of the total units that you have taken and passed on the Berkeley campus at the time your degree is awarded. Included in this one-third are any units completed in an Education Abroad program, or on another University of California campus in an intercampus exchange program, or in a joint doctoral program. For graduate degree programs, grades of satisfactory assigned in courses numbered 299 and of the 300, 400, or 600 series are excluded from this computation. If you enroll in a course offered only on a passed/not passed or satisfactory/unsatisfactory basis, you will be graded P/NP if an undergraduate and S/U if a graduate.

A course that is required in or prerequisite to your major may be taken on a P/NP or S/U basis only upon approval of the faculty of your school or college.

If you are a special or limited-status student, you may take courses on a P/NP basis at the discretion of the dean of your college or school. You may not repeat on a course on a P/NP basis that you have previously taken on a letter-graded basis.

The option of being graded P/NP or S/U in a course may be cancelled if you are found to be ineligible for the option. If the course is offered on a P/NP or S/U basis only, it may be deleted from your study list at the option of your dean or the Office of the Registrar.

If you want honors at graduation, you should consult your college, school, or division for additional restrictions.

Your level of performance must correspond to a minimum letter grade of C- if you are to receive a passed grade, and to a B- if you are to receive a satisfactory grade.

These rules may be further limited by the faculties of the various schools and colleges and by the Graduate Council.

Grade I (Incomplete)

The grade I may be assigned if your work in a course has been of passing quality, but is incomplete for reasons beyond your control. Prior arrangements must be made with the instructor because in assigning the I grade the instructor is required to specify the reasons to the department chair.

For graduate students, the I grade will remain on the record until the required work is completed. Graduate students should finish the course requirements as soon as possible. To remove an I grade from your record, you must file the appropriate petition with the Office of the Registrar.

Although I grades are not counted in computing the GPA, it is important to remove them quickly. You should seek the advice of the Graduate Division if you have further questions concerning I grades.

For undergraduate students, an I grade received in the fall semester must be replaced by the first day of instruction in the following fall semester.

An I grade received in the spring semester or summer session must be replaced by the first day of instruction in the following spring semester.

When you complete the required work or deferred examination, grade points will be assigned if you receive a grade of A, B, C, or D. If you repeat the course, grade points will then be assigned to the earned grade

only if the dean has given prior written approval to repeat it. If you repeat the course without the approval of the dean, the I grade will be converted to an F and the repeated course will be treated the same as any other course in which you receive an F. The dean of your college or school may extend the deadline for undergraduate completion of an I grade. For undergraduates, except as noted below, any I grade which has not been replaced within the above deadlines will, at the end of that time, be converted to grade F (or NP if taken passed/not passed). After that time, but not retroactively, the grade is counted in computing your GPA.

Exceptions: Within the above deadlines for completing an I grade, undergraduate students may notify the dean that they have not attempted completion and will not complete the work required for removal of the I grade, and may request that the grade not be replaced by an F (or NP). This procedure is limited to a maximum of two courses. Once the decision has been made, it is irrevocable; the course cannot afterward be completed by any means, including repetition of that course or any equivalent course.

If a degree is conferred before the end of the above deadlines following the assignment of an I grade, the grade will not be converted to an F (or NP). However, you still have the option of removing the I grade within the above deadlines.

If you are an undergraduate student with 12 or more units of I on your record, you may not register without the permission of the dean.

All students who receive an I grade must file a "Petition for Grade and Grade Points in an Incomplete Course," available here (http://registrar.berkeley.edu/current_students/elecforms.html), and at Cal Student Central, 120 Sproul Hall. You should file the petition with the department in which you received the I grade as soon as you and the instructor have established the date you completed the course. You should make arrangements to complete the course at least 30 days before the deadline. The final grade cannot be recorded until you have filed the petition with the department.

Note: The I grade is not physically replaced or removed from the academic record. Completion of the work is reflected as a subsequent line entry on the record, and the units and grade points thus earned will be included in the grade-point computations at the close of the next session.

Grade IP (In Progress)

If you take a course extending over more than one term and evaluation of your performance is deferred until the end of the final term, provisional grades of IP (In Progress) are assigned in the intervening term(s). The provisional grades are replaced by one final grade if you complete the full sequence. The IP grade is not included in the GPA. Effective with an IP assigned fall 1973 or later, if the full sequence is not completed as scheduled, the IP will be replaced by a grade of Incomplete. Further changes in your record will be subject to the rules pertaining to I grades above.

Changes of Grade

All grades except I and IP above are considered final when assigned by an instructor at the end of a term. An instructor may request a change of grade when a computational, clerical, or procedural error occurred in the original assignment of a grade, but a grade may not be changed as a result of re-evaluation of your work. No final grade may be revised as a result of re-examination or the submission of additional work after the close of the term.

Grade Appeal Process

If you have a grievance about a grade, you should first try to speak with your instructor and/or the student ombuds (<http://sa.berkeley.edu/ombuds>). If that does not resolve your grievance, you may formally appeal. The following are grounds for appeal: the application of non-academic criteria, such as the consideration of race, politics, religion, sex, or other criteria not directly reflective of performance related to course requirements; sexual harassment; or improper academic procedures that unfairly affect your grade. Formal procedures may not be activated unless you, the instructor in charge, an ombuds (or any mutually accepted third party), and the department chair have failed to resolve the dispute informally. The formal procedure, once initiated, is to be completed at the unit level within 20-working days and at the Senate level within 40-working days if both parties are in residence and the University is in regular session. The formal process must be initiated within one calendar year from the last day of the semester in which the final grade for the course was posted.

Formal Appeal of Grades in Courses and Examinations

Each department or other instructional unit shall establish a standing grievance committee chair who is not the chair of the department. For each case, the grievance committee chair will appoint an ad hoc grievance committee composed of three faculty members, including the ad hoc grievance committee chair, one other faculty member from the same unit, one faculty member from a different unit, and two students in good standing appointed by the student association of the unit. If no student association exists, the students are to be appointed by the ASUC or the Graduate Assembly. (The student members must have passed courses or an examination in the unit at least at the level of the disputed course or examination and have been in residence for at least one year.) The ad hoc grievance committee will review all the required materials (from the student and instructor) and make a recommendation regarding a resolution to the grievance. The ad hoc grievance committee's recommendation to the Committee on Courses of Instruction (COCI), including any minority views, must be given in writing.

If COCI finds in the student's favor, it may change a failing grade to a P or S, drop a course retroactively, retain the course but eliminate the grade from the GPA, or adopt the letter grade, if any, that was recommended by four of the five members of the grievance committee of the unit(s).

For a complete copy of current grade grievance procedures, please see the COCI page on the Academic Senate's website (<http://academic-senate.berkeley.edu/committees/coci>). For a complete copy of Berkeley Division Regulation A207, which governs grade appeals, click here (<http://academic-senate.berkeley.edu/manual/regulations/a207-grade-appeals>).

Credit by Examination

Undergraduate Students

You may earn credit by examination in two ways:

1. If you are a new or re-entering undergraduate student, on the recommendation of the Board of Admissions you may be allowed credit by examination for knowledge that you acquired since graduation from high school, either by independent study or at another institution, and for which you have not been allowed advanced standing credit. You should apply to the Office of

the Registrar (<http://registrar.berkeley.edu/DisplayMedia.aspx?ID=CREDIT.EXAM.Pet.pdf>) for credit.

2. If you are a student in good standing and currently registered in a regular session, you may qualify for course credit by examination. You may apply for credit to the dean of your college or school on the "Petition for Credit by Examination," obtainable from the Office of the Registrar (<http://registrar.berkeley.edu>). You may apply for credit by examination in any course listed in the current bulletin that pertains to the regular sessions at UC Berkeley. However, the subject in which you want to be examined should be one in which, in the opinion of the instructor in charge or the department, knowledge can be tested by examination. You must file a separate petition for each course. In certain laboratory, field, or practice courses, neither a written nor an oral examination may be a satisfactory test.

You may not receive credit by examination:

1. If the credit would duplicate credit that you presented for admission to the University.
2. In elementary courses in your native language if it is not English.

The examination must cover the entire course and be administered at one sitting of no longer than three hours. It may be the regularly scheduled final examination for the class, provided that the examination meets the foregoing criteria. The result of the examination may be reported to the Office of the Registrar only as passed or satisfactory, according to the regulations governing the assignment of these grades. Further information concerning credit by examination may be obtained from the Office of the Registrar (<http://registrar.berkeley.edu/DisplayMedia.aspx?ID=CREDIT.EXAM.Pet.pdf>).

Graduate Students

If you are a graduate student in residence, you may petition to receive a limited amount of course credit toward your degree by passing examinations on material covered in certain courses in lieu of taking those courses. Laboratory courses, graduate seminar, and research courses are excluded. You must be registered for at least 4 units of upper division and/or graduate coursework at the time you take the examination and you must be in good academic standing (3.0 GPA or better). The final result of the examination will only be reported as satisfactory or unsatisfactory. You may obtain the petition from the Office of the Registrar (<http://registrar.berkeley.edu/DisplayMedia.aspx?ID=CREDIT.EXAM.Pet.pdf>). Approval to take these examinations must be given by the dean of the Graduate Division and by the course instructor, or, if no instructor is designated, by the department chair.

Midterm and Final Examinations

The number of midterm examinations varies at the discretion of the instructor. Deficient grades for undergraduate students whose work at midterm is of D, F, or NP quality are posted on Bear Facts during the ninth week of the semester.

Final examinations are required in all undergraduate non-laboratory courses, with the exception of courses that the online Schedule of Classes (<http://schedule.berkeley.edu>) indicates do not require a final examination. This requirement allows you to demonstrate mastery of course material while providing the instructor with written evidence for evaluation. The examination may last no longer than three hours and must be administered at the time announced in the online Schedule of Classes (<http://schedule.berkeley.edu>). Any deviation from this announced time requires approval from the Committee on Courses of

Instruction or the department chair. This requirement guarantees you ample prior notice of the examination time and eliminates conflict with other examinations.

It is the responsibility of instructors and/or departments to return to students their final examinations or copies of them, or to retain students' final examinations or copies of them, for 13 months after the dates of such examinations.

For information on faculty, student, and University responsibilities regarding final exams, please click here (http://registrar.berkeley.edu/prospective_students/finals.html).

For further information regarding final examinations, including alternative methods of final assessments and changing the method of final assessment offered in a course, please see:

Final Exam FAQ's, Office of the Registrar (<http://registrar.berkeley.edu/Default.aspx?PageID=RRRFAQ.html>)

Committee on Courses of Instruction (COCI) handbook, section 2.1.3 (<http://academic-senate.berkeley.edu/committees/coci/handbook2/#2-1-3>) and section 3.2.1 (<http://academic-senate.berkeley.edu/committees/coci/handbook3/#3-2>)

Alternative Methods of Final Assessments, Center for Teaching and Learning (<http://teaching.berkeley.edu/alternative-methods-final-assessments>)

Accommodation of Religious Creed and Exam Scheduling

For information regarding the accommodation of religious creed and exam scheduling, please see the Academic Senate regulation found here (<http://students.berkeley.edu/uga/religion.stm>).

Progress Toward a Degree: Undergraduate Students

At the close of each semester, the courses, units, grades, and grade points earned are added onto your cumulative University record. From this record, you may determine your progress toward a degree.

In working for a degree, you should keep in mind the various levels on which you must satisfy requirements-- University, campus, college or school, and department-- as well as the kinds of requirements you must fulfill: course, unit, grade point, and amount of upper division work. You may receive additional counsel in these matters from your adviser.

Academic Probation: Undergraduate Students

Regulations and procedures governing academic probation vary with each college and school. For specific details, consult your college or school announcement. Students on probation may not take courses on a passed/not passed basis.

Academic Dismissal: Undergraduate Students

Regulations and procedures governing academic dismissal vary with each college and school. For specific details, consult your college or school.

If you are dismissed, you may appeal for a hearing by formal petition to the dean of your college or school, but the action of dismissal is normally considered final. If you are dismissed and want to transfer to another college or school at Berkeley, you may petition the dean of that college or school.

Minimum Progress: Undergraduate Students

For undergraduates, normal progress toward a degree requires 30 units of successfully completed coursework each year. If you fail to achieve minimum academic progress, you may continue to be enrolled only with the approval of the dean of your college or school. To achieve minimum academic progress, you must have successfully completed a number of units no fewer than 15 times the number of semesters, less one, in which you have been enrolled on the Berkeley campus. Summer session is not counted as a semester. A course load of 15 units per semester is considered normal. Minimum course load requirements, however, vary by college or school; see the specific college or school announcement for details. If you enroll in a course load of fewer units than the minimum, you will need to have your schedule approved by the dean of your college or school.

Probation and Dismissal: Graduate Students

Graduate students are subject to probation and dismissal for academic deficiencies at the discretion of the Graduate Division under the policies established by the Graduate Council of the Academic Senate. Probation may be initiated by the Graduate Division or by recommendation of the head graduate adviser of your major. The most common reasons for probation are a low GPA and failure to make adequate and timely progress toward the degree. If your probationary status is not rectified within the specified time allowed, you may be subject to dismissal. If a student has advanced to doctoral candidacy, the student may be "lapsed" for failure to make adequate progress toward completing the dissertation; although a different term, "lapsing" is a probationary status that may make you subject to dismissal.

You may appeal dismissal from graduate standing. The "Graduate Appeal Procedure" is available on the Graduate Division website (<http://www.grad.berkeley.edu/policies/pdf/gradappeal.pdf>). The procedure may not be used for complaints regarding actions based solely on faculty evaluation of the academic quality of a student's performance, or decanal evaluations of a student's appropriate academic progress, unless the complaint alleges that the actions may have been influenced by non-academic criteria.

Graduation from Berkeley: Undergraduate Students

Declaration of Candidacy

If you know at the beginning of a semester that you will have fulfilled graduation requirements by the end of the semester, enter the appropriate code when you access Tele-BEARS. You may also declare your candidacy in person at Cal Student Central, 120 Sproul Hall. The period for declaring candidacy is the first five weeks of the semester. If for any reason you do not meet the requirements for graduation after declaring

your candidacy, you must file a new declaration in the filing period for the subsequent term in which the degree will be awarded.

If you are an unregistered student at the time you are ready to declare your candidacy, you may go in person to Cal Student Central, 120 Sproul Hall, to fill out the "Candidate for Bachelor's Degree" form. The form is available online here (<http://registrar.berkeley.edu/DisplayMedia.aspx?ID=BACH.DEG.CAND.pdf>). It can be mailed to Office of the Registrar, 124 Sproul Hall, UC Berkeley; Berkeley, CA 94720-5404. The filing deadline is the same as that stated above.

Degree Check

The Office of the Registrar will check your records to ensure that you have completed the University requirements (American History and Institutions and Entry-Level Writing, 120 units, and are in good academic standing) and the Berkeley campus American Cultures requirement. Your college or school will check for the fulfillment of major, department, and college or school requirements.

Confirmation of Candidacy

To verify that your name is on the degree list for the current term, check Bear Facts. If you think there is an error, please contact Cal Student Central (<http://studentcentral.berkeley.edu/contact>).

Certificate of Completion

A "Certificate of Completion" is official proof that you have been granted the degree toward which you were working. All undergraduates, except engineering students, may request a certificate form from Cal Student Central, 120 Sproul Hall. The form is also available here (<http://registrar.berkeley.edu/DisplayMedia.aspx?ID=Cert.of.Cmpl.pdf>). It can be mailed to Office of the Registrar, University of California, Berkeley, 124 Sproul Hall, Berkeley, CA 94720-5404. The certificate will be mailed to you eight to 10 weeks after the end of the semester. You must fill out a separate application for each request.

Note: Students in the College of Engineering must visit the college before requesting a Certificate of Completion.

Graduation from Berkeley: Graduate Students

To receive a graduate degree, students must successfully complete all coursework required, pass the requisite examinations, advance to candidacy, and fulfill other requirements specified for the degree. For detailed procedures and requirements, students should consult their department, school, or graduate group, and become familiar with the Graduate Division website (<http://grad.berkeley.edu>). General information regarding degree requirements and degree progress can be found in the Graduate Education section (p. 16) of this bulletin.

Commencement

Commencement exercises to honor students who have earned baccalaureate and graduate degrees and to give recognition and awards to students who are graduating with distinction are held each year in May. Students who have earned their degrees in the previous fall semester or in summer sessions are welcome to participate. The ceremonies are held by individual schools or colleges or, in the College of Letters and Science, by individual departments. There are about 60 ceremonies each year.

The ceremonies consist of speakers and the presentation of degrees and awards and are followed by a reception.

For further information on commencement, please see the Commencement at Cal website (<https://commencement.berkeley.edu>).

Diplomas

Diplomas are not given out at Commencement but are available approximately four months afterward.

Diplomas will be mailed automatically without a fee. Degree candidates should update their diploma mailing addresses on Bear Facts prior to the end of the term in which the degree is to be awarded. If a diploma address is not supplied, the diploma will be mailed to the student's permanent home address.

For further information, please see the Diploma page on the Office of the Registrar's website (http://registrar.berkeley.edu/current_students/academic_records_transcripts/diplomas.html).

Note: These fees are subject to change.

Student Conduct and Appeals

Student Conduct

When you enroll in the University, you assume an obligation to conduct yourself in a manner compatible with the University's function as an educational institution. Rules concerning student conduct, student organizations, use of University facilities, and related matters are set forth in both University policies and campus regulations, copies of which are available online at the Center for Student Conduct's website (<http://sa.berkeley.edu/conduct>). You should pay particular attention to the *Berkeley Campus Regulations Implementing University Policies* and the *Berkeley Campus Code of Student Conduct*.

Cheating or Plagiarism

Achievement and proficiency in subject matter includes your realization that neither is to be achieved by cheating. An instructor has the right to give you an F on a single assignment produced by cheating without determining whether you have a passing knowledge of the relevant factual material. That is an appropriate academic evaluation for a failure to understand or abide by the basic rules of academic study and inquiry. An instructor has the right to assign a final grade of F for the course if you plagiarized a paper for a portion of the course, even if you have successfully and, presumably, honestly passed the remaining portion of the course. It must be understood that any student who knowingly aids in plagiarism or other cheating, e.g., allowing another student to copy a paper or examination question, is as guilty as the cheating student.

Sexual Harassment Policy

The Berkeley campus actively monitors and supports full compliance with the official University of California Policy on Sexual Harassment, which states: "The University of California is committed to creating and maintaining a community where all persons who participate in University programs and activities can work and learn together in an atmosphere free of all forms of harassment, exploitation, or intimidation. Every member of the University community should be aware that the University is strongly opposed to sexual harassment, and that such behavior is

prohibited both by law and by University policy. The University will respond promptly and effectively to reports of sexual harassment, and will take appropriate action to prevent, to correct, and if necessary, to discipline behavior that violates this policy."

The campus has complaint procedures designed to facilitate prompt and equitable resolution of sexual harassment and other sex discrimination complaints. If you believe that you have been a target of sexual harassment, have questions about the sexual harassment policy or about the complaint resolution procedures, or have questions about the interrelationship between the sexual harassment complaint procedures and other campus policies and procedures, you may address your inquiries to the Campus Climate and Compliance/Title IX Office, (510) 643-7985. The full text of the University Policy and further information is available here (<http://ophd.berkeley.edu/policies-procedures/sexual-harassment>).

Sexual Harassment/Assault Peer Education Program

The Sexual Harassment/Assault Peer Education Program, coordinated by the campus Gender Equity Resource Center, provides educational workshops for student groups, resource referral, and support for individuals who may have experienced harassment or an assault. Short-term crisis intervention counseling is also available. For further information, call the Sexual Assault/Harassment Resource specialist at (510) 643-5727. University Health Services Social Services also offers counseling support, as well as services for recent survivors; call (510) 642-6074.

Student Grievance Procedure

The Berkeley campus Student Grievance Procedure gives you an opportunity to resolve complaints alleging discrimination based on race, color, national origin, sex, handicap, age, and sexual orientation. You may also use the procedure to resolve any complaints you may have alleging that any other rules or policies of the Berkeley campus were inappropriately applied and resulted in an injury to you. The procedure is not applicable to certain kinds of complaints for which other appropriate appeals procedures exist, such as a grade appeal based on the application of nonacademic criteria. (See Formal Appeal of Grades in Courses and Examinations on the Grades page (p. 33) of the Academic Policies section of this bulletin for a description of the grade appeal process.) The procedure contains important time limitations and provisions about the interrelationship between this procedure and other campus complaint procedures. Copies of the procedure are available in 102 Sproul Hall or online here (<http://students.berkeley.edu/uga/grievance.stm>).

Graduate Student Appeals

Through the Graduate Appeal Procedure, graduate students have the right to appeal academic or administrative decisions that have resulted in termination of their graduate status or have materially hindered their degree progress.

Students must first initiate an appeal with the academic unit (the department, school, or graduate group) responsible for the alleged action under dispute. The Graduate Council requires each instructional unit to maintain copies of its current internal appeal procedure for information and use by its graduate students. The academic unit and the student must make all reasonable efforts at resolving the difficulty, as outlined in the

Graduate Appeal Procedure, before the student may take the matter to the next level, which is the Graduate Division. Students may also consult with the Ombuds for Students (<http://sa.berkeley.edu/ombuds>) at (510) 642-5754 for assistance with informal resolution.

If attempts to resolve the matter with the student's home unit were unsuccessful, the student may submit a formal appeal to the Graduate Division, after carefully following the guidelines and deadlines in the Graduate Appeal Procedure (<http://www.grad.berkeley.edu/policies/pdf/gradappeal.pdf>). The Graduate Appeal Procedure Form (<http://grad.berkeley.edu/policies/pdf/appealform.pdf>) must accompany the appeal.

Grade Reports and Transcripts

After grades are recorded for a semester, they are available on Bear Facts. Transcripts for registered students may be ordered online approximately 30 days after the date of the last final exam. Alumni and students who are not registered may order transcripts at Cal Student Central, 120 Sproul Hall. For further information, please see the Office of the Registrar's website (<http://registrar.berkeley.edu/Default.aspx?PageID=transcripts.html>).

Cal 1 Cards

Your Cal 1 Card is your official identification as a student at UC Berkeley. If you have not already had your photograph taken for the card, you should do so as soon as possible. If you are a newly admitted student, you can have your photograph taken as soon as you receive your admissions letter for the semester. In order to get your Cal 1 Card, you will need to present a current government-issued identification card (i.e., driver's license or passport) and know your student ID number. The first card is free; replacement cards are \$25 (nonrefundable). For more information, stop by the Cal 1 Card office, 180 César Chávez Student Center, lower Sproul Plaza; call (510) 643-6839; or see the Cal 1 Card website (<http://cal1card.berkeley.edu>).

Change of Address

Changes to your local or permanent address or telephone number can be entered directly on Bear Facts. You can also change your address at your department or college/school dean's office.

Change of Name

If you change your name, stop by Cal Student Central, 120 Sproul Hall, and complete a "Petition for Change of Name" form and provide appropriate documentation. For further information on the Name Change Policy, please see the Office of the Registrar's website (<http://registrar.berkeley.edu/Registrar/namechng.html>).

Access to Records

You are entitled by law and University policy to examine and challenge most of the records that the University maintains on you. These records may be confidential and in most circumstances may be released to third parties only with your prior consent. Such matters are detailed in the Berkeley Campus Policy Governing Disclosure of Information from Student Records, available at Cal Student Central, 120 Sproul

Hall, or online here (<http://campuspol.chance.berkeley.edu/policies/studentrecdisclosure.pdf>).

Classroom Note-Taking and Recording Policy

The University encourages students to take notes in class and other instructional settings as part of their education. Note-taking is a means of recording information and helps students absorb and integrate what they learn. Note-taking or other recording of an instructor's presentation can also facilitate further discussion of the material with students and the instructor. However, class notes and recordings are based on the intellectual effort of the instructor, who has an interest in protecting this effort and ensuring the accuracy of any public representation of his or her work. Prior approval of the instructor is required for the recording of course notes and the sharing of course notes and other class materials beyond the students enrolled in the course. Only a course note-taking service authorized by the campus may make course notes available commercially. The relevant policies can be found here (<http://campuspol.chance.berkeley.edu/policies/coursenotes.pdf>).

Disability-related Policies and Guidelines

In compliance with the Federal Rehabilitation Act of 1973, as amended (Public Law 93-112) and the Americans with Disabilities Act of 1990 (Public Law 101-336), University of California policy prohibits unlawful discrimination on the basis of disability in its programs, services, and activities.

The University of California's system-wide Policies Applying to Campus Activities, Organizations, and Students can be found on the UC Office of the President's website, here (<http://policy.ucop.edu/doc/2710534/PACAOS-140>).

For further information regarding services for students with disabilities, please see the Disabled Students' Program website (<http://dsp.berkeley.edu>).

Officers of Administration

Note: The lists appearing on this page are only valid as of December 2013. For current, up-to-date information on the Officers of Administration, please click on the following links:

Members of the Board of Regents and Advisers to the Board (<http://regents.universityofcalifornia.edu/about/members-and-advisors>)

 Christopher F. Edley, Jr., *Dean of the School of Law*
 Mark A. Richards, *Executive Dean and Dean of Mathematical and Physical Sciences-College of Letters and Science*
 Anthony Cascardi, *Dean of Arts and Humanities-College of Letters and Science*
 G. Steven Martin, *Dean of Biological Science-College of Letters and Science*
 Carla Hesse, *Dean of Social Sciences-College of Letters and Science*
 Tyler Stovall, *Dean of Undergraduate Division-College of Letters and Science*
 J. Keith Gillespie, *Dean of the College of Natural Resources*
 Dennis M. Levi, *Dean of the School of Optometry*
 Stefano Bertozzi, *Dean of the School of Public Health*
 Henry E. Brady, *Dean of the Goldman School of Public Policy*
 Jeffrey Edelson, *Dean of the School of Social Welfare*
 Diana Wu, *Dean of UC Berkeley Extension*
 Thomas C. Leonard, *University Librarian*
 Richard Russo, *Dean of Summer Sessions, Study Abroad, and Lifelong Learning*

Other Administrative Officers

Rachelle Feldman, *Assistant Vice Chancellor and Director of Financial Aid*
 Marguerite Bennett, *Chief of Police*
 Kelsey Finn, *Director, Associated Students of the University of California Auxiliary*
 Jefferson Coombs, *Executive Director, California Alumni Association*
 Thomas C. Devlin, *Director, Career Center*
 Delphine Regalia, *Assistant Vice Chancellor-Finance and Controller*
 Jeannine Raymond, *Assistant Vice Chancellor-Human Resources*
 Sandra Barbour, *Executive Director, Intercollegiate Athletics and Recreational Sports*

Departments and Subjects

UC Berkeley has been recognized and ranked as the greatest public university in the world. And it's no wonder—we offer more than 350 degree programs within 14 colleges and schools.

To explore degrees, read program overviews and see detailed requirements for Berkeley majors, minors, and graduate programs, please click on the corresponding links provided on the left.

Aerospace Studies (Air Force ROTC)

Special Studies

Department Office: 176 Hearst Gymnasium, (510) 642-3572

Department Website: Air Force ROTC (<http://airforcerotc.berkeley.edu>)

Overview

The Department of Aerospace Studies offers students in virtually all academic areas the opportunity to qualify for a commission as a 2nd Lieutenant in the United States Air Force while simultaneously completing university degree requirements. Each eligible student must have at least three full academic years remaining in his/her bachelor's degree program; under certain circumstances, an Air Force Reserve Officers' Training Corps (AFROTC) cadet may finish the AFROTC program while simultaneously completing one year of a graduate degree program.

Students interested in AFROTC are eligible to compete for scholarships which cover the costs of tuition, books, and most fees. In addition, a \$250-\$400 monthly living allowance is paid to each student on scholarship. Cadets competing for scholarships should contact the Recruiting Flight Commander at (510) 642-3572.

The AFROTC Detachment at Berkeley emphasizes student participation and involvement. Classes are conducted as seminars and call for active student discussion. In addition, there is a weekly two-hour leadership laboratory that is mandatory for all AFROTC cadets. In this laboratory, students become involved in the management of their own cadet organization. Cadets also participate in volunteer projects, visits to Air Force bases, and various community outreach programs.

Completion of the program to earn a commission as an Air Force 2nd Lieutenant requires enrollment during each semester in a specified course in Aerospace Studies or Military Affairs. The normal sequence for the four-year program is as follows: freshman, Aerospace Studies 1A (fall) and Aerospace Studies 1B (spring); sophomores, Aerospace Studies 2A (fall) and Aerospace Studies 2B (spring); juniors, Aerospace Studies 135A (fall) and Aerospace Studies 135B (spring); seniors, Military Affairs 145A (fall) and Military Affairs 145B (spring). The freshman and sophomore courses are each one credit hour, and the junior and senior courses are both three credits each.

Aerospace Studies courses are open to all University students; students from other institutions may participate in the AFROTC program through cross-enrollment arrangements or through the University Extension.

For further information on enrollment requirements and procedures, contact the Recruiting Flight Commander at (510) 642-3572, afrotc@military.berkeley.edu, and check out the AFROTC Detachment 85 website (<http://bulletin.berkeley.edu/departmentsandsubjects/aerospacestudies/%20http://airforcerotc.berkeley.edu>).

African American Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 660 Barrows Hall, (510) 642-7084

Chair: Na'ilah Svad Nasir, PhD

Department Website: African American Studies

Overview

The Department of African American Studies offers students a bachelor of arts degree, as well as a minor in African American Studies. The curriculum focuses on Africa and the African diaspora, with particular attention paid to the life and culture of the populations of African descent in North America and the Caribbean. There is also some focus on populations of African descent in Latin America and Europe. The program is interdisciplinary and prepares students to use and develop analytical approaches to critical issues associated with the African diaspora.

In preparation for declaring a major in African American Studies, students should complete the Reading and Composition requirement and freshman/sophomore seminars. African American Studies offers lower division courses that satisfy the American Cultures and College of Letters and Science breadth requirements. For a list of current semester freshman/sophomore seminars and other courses with selected topics, consult the description of courses for the current semester available at the department office. Students must have an overall grade point average (GPA) of 2.0 to declare.

Major Requirements

Completion of or enrollment in two of the following four courses is required in order to declare the major: 4A-4B, Africa: History and Culture; and 5A-5B, Black Life and Culture. Students are strongly encouraged to complete the lower division requirements early in their academic program; however, they may declare with only two of the four required courses completed.

Upon declaring the major, students are required to complete the following upper division core requirements:

- AAS 100 — Black Intellectual Thought
- AAS 101 — Interdisciplinary Research Methods
- AAS 116 — Colonialism, Slavery, and African American Life Before 1865
- AAS 117 — African Americans in the Industrial Age, 1865-1970

To complete the major, students must take a cluster of eight to ten courses (depending on thesis status) focused on a specific area of concentration. Such a concentration is expected to form the basis for a

senior thesis. Five of the eight courses must be selected from Department of African American Studies course offerings. The remaining three courses may be taken from other departments. Students can meet with the undergraduate advisor to discuss possible cluster topics.

Honors Program

To be eligible for admission to the honors program, a student must have completed at least two semesters at UC Berkeley and have attained senior standing with a GPA of 3.3 or higher in all University work, as well as a 3.5 GPA or higher in the African American Studies major. Students in the program must complete two consecutive semesters of African American Studies H195A-H195B under the supervision of a faculty member, culminating in the completion of a senior honors thesis or equivalent project.

Minor Requirements

Students in the College of Letters and Science may complete one or more minors of their choice, normally in a field both academically and administratively distinct from their major.

For the minor in African American Studies, students must complete at least one lower division course selected from 4A, 4B, 5A, or 5B and five upper division courses in the Department of African American Studies.

Consistent with Letters and Science requirements, a GPA of 2.0 is required in all courses applied to the minor program. All courses in the minor must be taken for a letter grade. Students may petition to have transfer credits accepted, but transfer students must take a minimum of three upper division courses from the Department of African American Studies.

Graduate Program

Students are admitted to graduate studies in the fall semester only. Applicants must file a University of California, Berkeley graduate application; two official transcripts from all colleges and universities attended; three letters of recommendation; writing sample (no more than 15 pages) that best reflects their program/research interests. TOEFL (required for all international students). Applications are accepted for the PhD only.

The African American studies graduate program focuses on life, culture, and social organization (broadly defined) of persons of African descent. Africa, North America, and the Caribbean are central components of the program. Students are expected to apply a multidisciplinary approach to the study of the international and national divisions of race as they pertain to persons of African descent, wherever they may find themselves. Such an approach is to be employed for the study and understanding of development and underdevelopment, domination and power, self-determination, mutual cooperation, and aesthetic and creative expression. Issues of identity construction, marginality, territoriality, and the universal role of race in the organization of political economy and in class formation are critical to the program's intellectual agenda.

Applicants must have completed an undergraduate degree and should demonstrate a general knowledge of African American history and an understanding of the disciplinary bases for the study of the African diaspora. Demonstrated knowledge in the field should include understanding relations among social, economic, and political structures and culture in African American life.

Fields of Emphasis

The fields of emphasis are focused in two general areas representing current faculty fields of expertise:

1. **Issues of Development:** History of the African Diaspora; Social and Cultural Institutions; Urban Sociology; Politics of Culture; Political Economy of the Diaspora.
2. **Cultural Studies:** Comparative Literatures and Cultures; Critical Theory, Popular Culture, Performance and Film; and Women's Studies.

The University requires a minimum of two years or four semesters of academic residence for all PhD programs. Academic residence is defined as enrollment in at least four units in the 100 or 200 series of courses. Thus every graduate student must enroll in and complete a minimum of four units of upper division or graduate coursework or both per required semester of academic residency. The program will require at least 48 semester units. At least 24 of the 48 units completed must be graduate courses in the Department of African American Studies. After successful completion of coursework with a minimum GPA of 3.3, the department will administer a pre-qualifying examination based upon general knowledge in the field of African American studies.

Students who have been accepted to this program and have earned a master's degree in another program will be evaluated based on requirements for the pre-qualifying examinations.

Agricultural and Resource Economics

College of Natural Resources (<http://nature.berkeley.edu/site>) **(BS, Graduate Programs)**

College of Letters and Science (<http://ls.berkeley.edu>) **(BA)**

Department Office: 207 Giannini Hall, (510) 642-3345

Chair: David L. Sunding, PhD

Department Website: Agricultural and Resource Economics (<http://are.berkeley.edu>)

Undergraduate Program

Students can complete a major in environmental economics and policy in either the College of Letters and Science for a Bachelor of Arts (BA) degree or the College of Natural Resources for a Bachelor of Science (BS) degree. Major and breadth requirements are identical for all students, regardless of college. Please refer to the website of the appropriate college for details. All students must complete the L&S seven-course breadth requirements and essential skills before graduation. Junior transfer students may satisfy these requirements by completing IGETC.

Major in Environmental Economics and Policy

The undergraduate major in Environmental Economics and Policy (ENVECON) offers an opportunity to explore those aspects of economic and political institutions that affect the development and management of natural resources and the environment. The focus of concern includes both renewable resources such as food, forests and water, and resources in fixed supply such as land and minerals. The distinctive feature of

the major is that it adopts a problem-solving approach to these issues. The core requirement for the major is micro-economic theory, and the economics of resources and the environment. These core courses are supplemented by other courses that apply the methods of social science to resource problems.

The major is structured to ensure that students obtain a sufficient background in the natural and physical sciences and sufficient training in basic mathematics, statistics, and communication skills in order to approach resource-related issues in an effective and practical manner. It can also be excellent preparation for business school. Students who graduate from the major are prepared to undertake a career in public or private agencies and firms engaged in the planning or management of natural resources, or to enter a graduate school for further study in programs such as economics, law, public policy, business, or resources administration.

Lower division major requirements include a course in microeconomics and courses in calculus (equivalent to Mathematics 16A-16B or 1A-1B) and statistics.

Upper division work includes courses in methods, core courses in environmental economics and policy, and courses in an area of concentration chosen by the student. For specific major requirements, contact the Student Services Office, 203 Giannini Hall, (510) 642-3347 or go to the website. (<http://are.berkeley.edu>)

Minor Program

Students may declare a minor in Environmental Economics and Policy. A minimum of six courses from the ENVECON curriculum is required. Students must declare in advance their intention to minor with the undergraduate adviser. Students who believe they have already completed the requirements for a minor should apply for departmental certification. For more information, contact Gail Vawter, Student Affairs Officer, 203 Giannini Hall (510) 642-3347.

Graduate Programs

The Department of Agricultural and Resource Economics offers programs leading to the MS and PhD degrees. Because of quota limitations, students are rarely admitted for the master's degree, although it may be awarded to students who are pursuing work toward the PhD in our program (or in another field at Berkeley) after fulfillment of the appropriate MS requirements. Applicants should hold a degree (not necessarily in agricultural economics) comparable to a bachelor's degree at the University of California and must have demonstrated strong scholarship potential.

The agricultural and resource economics program is relatively flexible; however, the program stresses economic theory, quantitative methods, and two elective fields defined in consultation with the graduate adviser. Some common elective fields include agriculture in economic development, agricultural policy, natural resource economics, international markets and trade.

The first year of coursework in the PhD program is normally devoted to economic theory and quantitative methods, after which the student writes departmental preliminary examinations in each of these areas. The level of sophistication expected in these preliminary examinations is defined with reference to a specific set of courses, and most students are advised to take these courses.

Outstanding facilities are available within the department, including the Giannini Foundation Agricultural Economics Library, one of the world's foremost research libraries of its type.

American Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Group Major Office: Division of Undergraduate and Interdisciplinary Studies, 231 Evans Hall, (510) 642-9320

Director: Louise Monzingo, MLA

Group Major Website: American Studies (<http://ls.berkeley.edu/ugis/as>)

Group Major in American Studies

American Studies is an individualized interdisciplinary major that offers undergraduates a unique opportunity to take advantage of the depth and breadth of Americanist scholarship and research on the campus in order to explore and understand the United States and its place in the globalizing world. American Studies courses integrate a variety of subjects, methods, and materials from many academic disciplines, including the traditional blend of history and literature, as well as the social sciences, material culture, the built environment, law, technology, urbanism, ecology, economy, and the arts.

Prerequisites to the Major: In order to declare the major, students with less than 60 units must complete American Studies 10 and one other Lower Division Requirement. Students beyond 60 units must be enrolled in AS 10 and speak with a faculty advisor before being allowed to declare.

Lower Division Requirements: Students are required to take four lower-division courses relevant to the major. One of the four is American Studies 10, Introduction to American Studies (4 units). The other three may be chosen from among courses that focus on the culture and history of the United States, with no more than two courses from any one department. A minimum grade of "C" is required in all lower division courses taken for the major. For further information about particular courses that satisfy the lower division requirements, please contact the American Studies student academic advisor.

Upper Division Requirements: 30-36 units distributed among the following:

1. *Core Methods Courses.* (6-8 units) Students are required to take one course each from the two methods series, "Examining US Cultures in Time" and "Examining US Cultures in Place." See department listings for available courses every semester.
2. *Area of Concentration.* At least 20 units of upper division coursework drawn from the College of Letters and Science and the professional schools and colleges, in the student's individually articulated area of concentration. Areas of concentration may be highly individualized, depending on the student's intellectual focus, prior preparation, and the availability of courses. Therefore, students planning to declare the major should meet with a faculty advisor early in their junior year, at the latest, to plan their upper division program. Subsequently, this program can be revised only with the approval of the faculty advisor.

3. **Thesis Requirement.** All majors are required to enroll in an American Studies senior thesis seminar (4 units) in which they write a substantial research paper.
4. **Historical Requirement.** One of the courses taken to complete the American Studies major (either upper or lower division) must focus on US history, culture, and/or politics before 1900. Students should check with an American Studies student academic advisor to ensure that the course they take meets this requirement.

Honors Program

Students who wish to be eligible to graduate with honors must enroll in the honors thesis seminar, American Studies H195. For admission to H195, students must have senior standing, an overall GPA of 3.51, and a GPA of 3.65 in the major.

For further information, please contact the student academic advisor at 231 Evans Hall, (510) 642-9320, or amerstd@berkeley.edu.

Ancient History and Mediterranean Archaeology

College of Letters and Science (<http://ls.berkeley.edu>)

Group Office: 7233 Dwinelle Hall, (510) 643-8741

Group Website: Ancient History and Mediterranean Archaeology (<http://ls.berkeley.edu/dept/ahma>)

Major Requirements

There is no undergraduate major.

The Graduate Program

UC Berkeley offers an interdisciplinary program of graduate study in Ancient History and Ancient Near Eastern and Mediterranean Archaeology (AHMA). The program is conducted by an interdisciplinary group that includes more than 20 faculty members affiliated with seven different Berkeley departments and the Graduate Theological Union. A chair, a graduate adviser, and student affairs officers administer the program.

The AHMA program offers MA and PhD degrees in areas that combine work in archaeology and history and related disciplines of ancient studies. Most of its graduates have successfully secured teaching positions in Departments of Classics, Art History, History, Anthropology or Near Eastern Studies in colleges and universities in the US or abroad, including Bar-Ilan, Haifa, Volos, Oxford, Toronto, Columbia, Madison, Austin, and Penn.

Students in "the Group," as the AHMA program is also known, are expected to acquire command of two ancient and two modern languages; to enroll in advanced courses and seminars from two or more departments; and to obtain practical archaeological experience. All requirements for the PhD degree (from entrance with either a BA or an MA to completion of the dissertation) must be concluded within a period of eight years. Students who enter with a BA are required to complete a Qualifying Paper (which may be converted into an MA) before proceeding to the PhD.

Students are considered as making satisfactory progress if they submit their Qualifying Paper during the fourth semester after admission and complete all PhD requirements except the dissertation within five years after admission. This allows for two years—or more in some cases—for the writing of the dissertation. Highly motivated and well-prepared students may complete the program more quickly.

Admissions Procedures and Requirements

The AHMA program is open to students with a BA degree in a relevant field of study (such as Classics, Near Eastern Studies, History, or History of Art) that have completed at least one year of undergraduate work in ancient history, ancient art, archaeology, or related fields. Applicants primarily interested in the Greek and Roman worlds should be prepared to undertake advanced work in either Greek or Latin and its culture, and also should have basic competence in the second of these two languages. Applicants primarily interested in the ancient Near East and Egypt do not have to display competence in one of the area's ancient languages before applying, but to do so may strengthen their application considerably.

Students who have already acquired the MA degree in a relevant field are especially encouraged to apply, and will be considered for direct admission to the PhD program. The AHMA faculty as a group approves all applicants for admission. AHMA policy is to limit enrollment to the number of students who can be adequately supported for the first five years of their graduate career. Although AHMA receives around 50 applications per year, its admission quota (set by Graduate Division) is currently only around 5-6, with the expectation that 2-3 new students will enroll each fall. Competition therefore is extremely keen. As a result, while some applicants may be rejected for lack of preparation or for undistinguished academic records, a substantial number who are capable of doing good graduate work unfortunately also must be denied admission.

The AHMA faculty judges and ranks applicants on a combination of criteria that includes:

- Preparation to undertake advanced scholarly work
- Academic distinction as reflected in overall GPA, major GPA, and junior and senior year GPA, as well as awards, prizes, or publications
- A minimum of three letters of recommendation
- GRE scores (use 2901: Classics, or 2609: Classical Languages for scores to be reported by ETS)
- A statement of purpose, which should be clearly and cogently written and indicate why the applicant is interested in the AHMA program and where his or her specialization might lie
- A scholarly writing sample of no more than 25 pages and indicating the origin of the writing sample (i.e. a class paper, senior honors thesis, MA thesis)

An applicant with an MA is expected to offer substantially stronger preparation than one with only a BA. Applications must be submitted electronically either via Graduate Division's online application (<http://grad.berkeley.edu/prospective>) or via the link on the AHMA website. The online application process for fall normally opens in early September.

The deadline for all online applications is December 15th. We request that applicants email all their supplemental material, such as all official transcripts, writing samples, applicant Reading List in Ancient Languages, or any other material, as PDFs to casmaadm@berkeley.edu. They will be manually uploaded by the admissions staff into the applicant's online application. Additionally, a second hard copy of all official transcripts must also be sent directly to The Graduate Group in Ancient History and Mediterranean Archaeology, Attn. Graduate Admissions, UC Berkeley,

7233 Dwinelle Hall #2600, Berkeley, CA 94720-2600. Supporting material (such as transcripts and letters of reference) must be received within a week after the December 15th deadline to receive proper consideration. Material sent to the Graduate Division itself will be delayed, sometimes for so long that the AHMA faculty will be forced to discard the application as incomplete.

Note: Applicants also have the option of submitting the required "Applicant's Reading List in Ancient Languages." More information is available here. (http://ahma.berkeley.edu/sample_reading_list) Applicants must submit a list of three contacts for letters of recommendation during the online application process. These recommenders will be contacted by email to submit their recommendations online. We strongly urge you to request the letters of recommendation from your recommenders well before the time of submitting your online application. The Berkeley campus has a commitment to increasing the diversity of its graduate student population. The AHMA program strongly encourages applications from members of underrepresented groups (such as U.S. citizens or residents of African-American, Hispanic, Asian-American, or Native American descent) who are qualified to pursue interdisciplinary graduate work in areas appropriate to the program.

General Information

The AHMA program is housed in the seventh floor of Dwinelle Hall in an administrative cluster known as CASMA. CASMA comprises the Departments of Classics and South and Southeast Asian Studies, and the graduate program in Medieval Studies, as well as AHMA. Dwinelle Hall facilities available to our students include a student lounge, a coffee shop, the Nemea/Sardis Archives, the Sara B. Aleshire Center for Greek Epigraphy, the Center for the Tebtunis Papyri, GSI offices, and a dedicated office for research equipment and computers. The office provides a focus for mail pick-up (every student has a mail slot), copying, advising, and consulting. Some program specifics are provided below. Further details are available in the AHMA Graduate Student Handbook, or from the Student Affairs Officer.

Advising

There is a three-tiered advisory system for AHMA students. The Student Affairs Officer counsels students on campus policies, regulations and procedures, helps monitor students' degree progress, and assists students with bureaucratic problems related to the completion of degree requirements. A Graduate Adviser takes responsibility for general academic counseling, offers suggestions on programs of study and advisory committees, and monitors the student's overall academic progress. Direct supervision of each student's academic progress is conducted by a faculty Advisory Committee selected by the student in accordance with his or her areas of interest. Committee members meet with the student to recommend a suitable program of study and to help determine his or her major and minor fields. The committee also periodically reviews the student's progress.

Coursework and Requirements

There is no prescribed course of study for the AHMA program and work is tailored to suit the interests and goals of the individual student. Recommendations for particular courses are generally made by the student's advisory committee in consultation with the student. Work in the ancient languages is an early and high priority, however, and students should plan to continue course work in languages already begun. Those who begin an ancient language after admission should plan to study that language continuously for at least two years. In addition, students are expected to enroll in methodology and interdisciplinary courses and seminars, and in courses and seminars relevant to their major and minor

fields (see below, under PhD). Independent study courses with individual faculty members can also be arranged.

Financial Support

The AHMA program makes every effort to support students throughout their graduate career, provided they continue to make good progress towards their degree(s). Entering students are eligible to compete for a number of university-wide fellowships. Usually only three entering students can be offered support, in various three or four year packages. The recipients of such packages are also regularly supported by additional fellowships and graduate student instructorships (teaching assistantships) right through to the PhD, provided they make good progress. Applicants are strongly encouraged also to apply to external programs for funding, such as the Mellon Fellowship Program, Danforth Foundation, and Javits Fellowship Program. Your undergraduate institution and home department should be able to provide information about these programs.

Available awards for continuing students include resident fellowships, travelling fellowships, extramural fellowships, and dissertation fellowships. Students in the Group are also urged to compete for Graduate Student Instructorships in a number of different departments, including Classics, History, Near Eastern Studies, and History of Art, as well as in programs such as Religious Studies or Undergraduate and Interdisciplinary Studies. GSI-ships are rarely awarded in the first year of graduate study.

Financial aid may also take the form of Research Assistantships (collaboration in the work of a particular faculty member) or Readerships (grading papers in a particular course. Such appointments depend upon the recommendation of individual faculty members.

Stage I of the PhD Program and the MA Degree

Requirements for Stage I include:

- Successful completion of a minimum of six courses, including a methodology course in the area of the student's main focus of interest and an interdisciplinary AHMA seminar team-taught by faculty from two different departments
- The achievement of competence in one ancient and one modern language
- Successful completion of a third semester review
- Production of a Qualifying Paper, which may be turned into an MA thesis if the student wishes

Stage II of the PhD Program and the PhD Degree

Requirements for the Stage II include:

- Successful completion of a total of eight courses (of which up to three may be courses taken at Stage I level) in one major field of study, one minor field, and one outside field, normally distributed in a 4:2:2 ratio
- A three-hour written examination in the major field
- Competence in a second ancient language and reading ability in at least two modern languages
- A dissertation prospectus prepared in consultation with the student's advisory committee
- Successful completion of the PhD Oral Qualifying Examination
- Fieldwork experience
- Successful completion of a dissertation

The student should plan to complete all the qualifying examinations (including the oral) within five years after admission to the program and

two and a half years after completing Stage I. To accommodate individual student programs, a wide range of choices is available for both major and minor fields, which the student selects in consultation with his or her advisory committee. These fields should be distributed across the geographical and disciplinary areas covered by the AHMA program (the Ancient Near East and Egypt, Greece, and Rome; archaeology, history, art history, and so on). So, for example, students whose major field is in the Greco-Roman world should choose an outside field in Pharaonic Egypt and/or the Ancient Near East, and vice versa. Students whose major field is text-based must choose a minor field in the material culture of that field (excluding epigraphy and papyrology), and vice versa.

Each AHMA student is also expected to acquire practical experience in archaeology and material culture, broadly defined. This experience may be obtained in a number of ways: through participation in excavations, such as AHMA sponsored projects like those at Nemea and Mycenae in Greece, Dhiban in Jordan, El-Hibeh in Egypt, or Sardis in Turkey; through topographical and other on-site work such as that sponsored by AHMA at Pompeii; through enrollment in approved study programs abroad (e.g., at the American School of Classical Studies in Athens or the American Academy in Rome); or through supervised research projects conducted at approved museums or research institutions such as the American Numismatic Society, the Getty Center and Museum, the Albright Institute of Archaeology at Jerusalem, the Cyprus American Research Institute, the American Research Center in Egypt, or the American Center for Oriental Research in Amman. In the interests of broadening the student's experience, this dimension of the program must be fulfilled outside Berkeley.

Upon completion of all qualifying exams and all requirements, the student is admitted to candidacy for the PhD. He or she then proceeds to select a dissertation topic and a committee of three faculty members from at least two different departments who will guide the research and writing. The committee member most closely involved with the student's research is usually named as Chair.

Anthropology

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 232 Kroeber Hall, (510) 642-3391

Department Chair: Mary Elizabeth Berry, PhD

Department Website: Anthropology (<http://anthropology.berkeley.edu>)

Overview

The Department of Anthropology offers students the opportunity to study humankind from the broadest historical and geographical perspective. Courses in the department offer knowledge of social and cultural aspects of behavior, as well as the physical nature of humans. Lower division courses are intended to give a general understanding of human evolution, prehistory, and the nature of human cultures, while upper division courses elaborate particular themes.

The anthropology major is designed to serve two purposes: to provide a general education in anthropology for students who are pursuing a liberal arts education, and to provide preparation for graduate work for students who wish to become professional anthropologists. Students who do not intend to do graduate work in anthropology may plan their program with

considerable freedom, so long as they fulfill the requirements of the major listed below. Students who plan to go on to graduate study, either at UC Berkeley or at another institution, should select a combination of courses to form a unified plan of study that meets special intellectual interests.

The collections and research facilities of the Phoebe A. Hearst Museum of Anthropology are available for study in archaeology, ethnography, physical anthropology, and related subjects by graduate and undergraduate students, and visiting scholars; the museum's exhibition hall is used for instructional and educational purposes, particularly in connection with classwork. Those interested may address the Director, 103 Kroeber Hall.

The Anthropology Library, 230 Kroeber Hall, is part of the campus library system. It contains nearly 70,000 bound volumes and receives 965 current serial titles. The Anthropology Library houses a large reading room and facilities for reading microfilm. It is open to all members of the University but serves primarily the faculty and students of the Anthropology Department.

Students seeking information on the Undergraduate Program may inquire at 209 Kroeber Hall. Students seeking information on the Graduate Program may inquire at 205 Kroeber Hall.

Major Requirements

Lower Division Prerequisites (3 total):

Anthropology 1, 2 or 2AC, and 3 or 3AC. The three lower division prerequisites may be taken in any order.

Upper Division Requirements (9 total):

- Anthropology 114: History of Anthropological Thought
- One course in biological anthropology (choose from Anthropology 100-112, 127A, 127B)
- One course in archaeology (choose from Anthropology 121-136J, 174AC)
- One course in social/cultural anthropology (choose from Anthropology 115-119, 138-189A)
- Five anthropology electives (choose five from Anthropology 100-196)
- The nine required upper division courses listed above must include at least one Area course and one Method course:
 - a. Area courses: 121-125B, 128A, 147C, 170-188, 189A
 - b. Method courses: C100, C103, 121C, 127A, 128M, 131-136J, 138B, 139, 169A, 169B, 189M

Courses taken to satisfy the Area and Method requirement also simultaneously satisfy one of the nine required courses. For example, taking Anthropology 189A will satisfy both the Area requirement and one of the five electives; Anthropology 132A would satisfy both the Method and the Archaeology Core.

All courses taken to satisfy the major requirements must be taken on a letter grade basis.

Students wishing to pursue a PhD in Anthropology should consider tracking their five elective requirements. (This concentration would not be noted on the transcript or diploma.) Faculty advisers are available to meet with students who have questions on how best to prepare for graduate work in Anthropology. See the undergraduate adviser in 209 Kroeber for a referral to one of the faculty undergraduate advisers.

A minimum grade point average (GPA) of 2.0 must be maintained in the lower and upper division Anthropology courses.

Lower division courses may be completed in any order. Start with the course that seems most interesting to you. *Note:* Anthropology 1 is offered once a year (either fall or spring) and during summer. Anthropology 2 and 3 are offered during both fall and spring of each year, and usually during the summer.

Anthropology 114 is only offered in the spring and should be taken no later than the spring of junior year.

Study Abroad

A maximum of four courses taken at other institutions, including those of the Education Abroad Program of the University of California, may be used to meet upper-division major requirements. Submit a Course Substitution petition and a detailed syllabus for each class you'd like evaluated to the undergraduate adviser in 209 Kroeber. *Note:* A course description alone is never sufficient for evaluation; a syllabus is always required for course evaluation.

Honors Program

The Honors Program in anthropology is an independently pursued course of research undertaken by qualified students under the mentorship of a faculty thesis adviser. A GPA of 3.3 overall, and 3.5 in the major in courses completed at Berkeley is required to qualify for the program. A year-long senior program, it may begin in either the fall or spring semester. The program requires the sponsorship of an anthropology professor as thesis adviser and a second reader. The honors courses, H195A and H195B, may also count as elective requirements for the major. Applications and more information are available at 209 Kroeber Hall.

Minor Requirements

Lower Division Requirements

Choose two from Anthropology 1, 2/2AC, or 3/3AC.

Upper Division Requirements

Any five anthropology courses. All courses must be taken for a letter grade, and the student must achieve a C average in all anthropology coursework. At least four of the five courses must be completed at Berkeley. For more information about the minor, please contact the undergraduate adviser in 209 Kroeber.

Preparation for Graduate Study

Admission to graduate studies at Berkeley does not presuppose a BA in anthropology. The graduate program is oriented toward the doctorate, and only candidates for the PhD will be accepted. The MA degree is awarded in the course of study leading to the doctorate.

Because of the number of students who wish advanced training, only a small percentage of applicants can be accepted. Applications are considered only once a year for the following fall semester. The deadline for applications is December 15.

Graduate Programs

Anthropology PhD Program

The Department of Anthropology offers a PhD in anthropology, with the subdisciplines of social-cultural anthropology or archaeology. The PhD in

anthropology is concerned with diverse analytic and substantive problems in the contemporary world and includes research sites across the United States and around the world. For example, the PhD in anthropology might focus on globalization and political economy; gender and feminist analysis in archaeology and social-cultural anthropology; genomics and the anthropology of science and reason; folklore theory; ethno-archaeology; linguistic anthropology; paleo-ethnobotany; the anthropologies of tourism, food, energy, space, and the body; sexuality and difference; aging and the life course; cultural politics of identity, space, and the body; political ecology and agrarian micropolitics; coastal archaeology; urban anthropology and psychoanalytic anthropology.

The program for the PhD degree normally takes six years and is divided into three steps, as follows:

- **Step I:** The students begin to narrow down their interests to particular topical and geographical fields of specialization, a process that normally takes one year.
- **Step II:** Students attend seminars, prepare three field statements in their specializations, satisfy their language requirement, and prepare for their PhD oral qualifying examination. This step lasts one to two years. With the successful passing of the orals, students are advanced to candidacy for the PhD degree.
- **Step III:** Students undertake research for the PhD dissertation under a three-person committee in charge of their research and dissertation. Students do original field, laboratory, or library research, which generally takes a minimum of one year. The students then write the dissertation based on the results of this research. On completion of the research and approval of the dissertation by the committee, the students are awarded the doctorate.

For further information, please address correspondence to the Graduate Adviser, Department of Anthropology, University of California, Berkeley; Berkeley, CA 94720.

Medical Anthropology PhD Program

General Information: The Department of Anthropology at Berkeley, and the Graduate Group in Anthropology at the University of California at San Francisco, currently offer a joint PhD in medical anthropology. Students may apply to enter the program through either the Berkeley or the San Francisco campus *but not to both*. The point of entry determines the student's home base during the program. Financial aid, primary advising, and other routine services are provided by the campus through which the student enters the program. All students, however, benefit by taking required coursework on both campuses and by the participation of the faculty on both sides of the program on all qualifying examinations and on the doctoral dissertation committees. The degree is the same and bears the name of both campuses.

Medical Anthropology: Medical anthropology entails the exploration of humans as simultaneously physical and symbolic beings in both contemporary and evolutionary contexts. As such, medical anthropology participates in anthropology as a whole, encompassing theory and practice from sociocultural, psychological, biological, biocultural, symbolic, and linguistic anthropology. It is concerned with questions of both theoretical and applied significance, and with research that is of relevance to the social sciences as well as to medicine and the biological sciences. Courses in bioevolutionary dimensions of disease are accompanied by seminars that explore pain, suffering, madness, and other human afflictions as a social language speaking to the critically sensitive or contradictory aspects of culture and social relations. Anthropological epidemiology asks the questions, "*Who* gets sick with

what ailments?" (differential risks, forms of medical knowledge, and medical systems) and "Why?" (what social arrangements, cultural features, and biotechno-environmental forces account for these risks). Medical anthropology interprets individuals as actively constructing their medical realities and not simply adjusting to or coping with them.

Given the broad definition of medical anthropology, the joint graduate program at Berkeley-UCSF is extremely flexible, allowing for the individual needs and interests of each student. During the first year of training, students are required to take core courses in both sociocultural and biological aspects of medical anthropology, taught at both campuses. After the first year and successful completion of the preliminary qualifying examination, medical anthropology students develop a more specialized and individually tailored program under the supervision and guidance of their adviser.

For students entering Berkeley with a BA, the doctoral program is estimated to take between five and six years, as follows: three years of coursework, one to two years of dissertation research, and one to two years of writing the dissertation.

For a complete list of faculty, consult the Medical Anthropology brochure available from the Program Office, 232 Kroeber Hall, Berkeley, CA 94720-3710, or the *Berkeley Bulletin* or catalog for the UCSF campus.

Applications to all graduate programs are considered once each year for admission the following fall semester. The application period opens in early September, and the deadline for receipt of both department and Graduate Division applications is December 15. Applications are screened by the anthropology faculty, and selections are made on the basis of academic excellence, letters of recommendation, GRE scores, relevant experience, and a strong statement of intellectual and professional purpose.

The minimum requirement for admission to the Berkeley doctoral program in anthropology and in medical anthropology is a B.A. The UCSF program in medical anthropology requires a master's degree in anthropology or a related discipline, or a postbaccalaureate professional degree.

The Master of Arts in Folklore

The folklore program is designed to provide graduate students with a competent knowledge of both the materials of folklore and the various methods of studying these materials.

For information, see the Folklore section (p. 113) of this bulletin.

Applied Science and Technology

College of Engineering (<http://coe.berkeley.edu>)

Group Office: 210 Hearst Memorial Mining Building, (510) 642-0449

Graduate Group Website: Applied Science and Technology (<http://coe.berkeley.edu/ast>)

Overview

This graduate group is administered by the College of Engineering, Materials Science and Engineering Department. The program has three major areas of emphasis: applied physics, engineering science, and mathematical sciences. Faculty associated with the program are drawn from several departments within the College of Engineering,

as well as from the Departments of Physics, Chemistry, Chemical and Biomolecular Engineering, Statistics, and Mathematics. Topics of interest include the novel properties and applications of nanostructures, thin films and interface science, microelectromechanical systems (MEMS), short wavelength coherent radiation, X-ray micro-imaging for the life and physical sciences, plasma physics and plasma-assisted materials processing, laser-induced chemical processes, laser probing of complex reacting systems, ultrafast phenomena, particle accelerators, nonlinear dynamics, chaotic systems, numerical methods, and topics in computational fluid mechanics and reacting flows. This program awards the Doctor of Philosophy degree.

In addition, students who are admitted to the program may also apply for the Designated Emphasis (DE) in nanoscale science and engineering (DE NSE), Energy, Science, and Technology (DE EST), and Computational Science and Engineering (DE CSE). Students usually apply for these DE during their first or second year of study. For further information about the DE NSE, see here (<http://nano.berkeley.edu/educational/DEGradGroup.html>); the DE EST, see here (<http://me.berkeley.edu/deest>); and the DE CSE, see here. (<http://citris-uc.org/decse>)

Graduate research in the AS&T Program benefits from state-of-the-art experimental facilities at the Berkeley campus and the Lawrence Berkeley National Laboratory. Among these facilities are the National Center for Electron Microscopy, with the world's highest resolution high-voltage microscope; a microfabrication lab for student work involving lithography, MEMS ion-implantation, and thin-film deposition; an integrated sensors laboratory; femtosecond laser laboratories; optical, electrical, and magnetic resonance spectroscopies; short wavelength laser and X-ray research laboratories; an unparalleled variety of material, chemical, and surface science analytic equipment; and a soft X-ray synchrotron dedicated to materials, chemical, and biological research using high-brightness and partially coherent X-rays. The interdisciplinary, collaborative nature of the AS&T Program provides ample opportunity to develop new research directions by making the best use possible of these facilities and of the other research instrumentation available to AS&T faculty.

Graduate Courses

Students in the AS&T Program take courses from regular departments with the concurrence of faculty advisers. In addition, AS&T sponsors the following courses: AST 210/EE 213, Soft X-Rays and EUV Radiation (3 units); AST 239/EE 239, Partially Ionized Plasmas (3 units); AST 225/MSE 225, Thin-Film Science and Technology (3 units); AST 295R/ChemE 295R, Applied Spectroscopy (3 units); AST 299, Individual Study or Research (1-12 units).

Admission

The complete application, including transcripts, GRE scores, TOEFL scores (if applicable), three letters of reference, and a statement of academic and professional goals, is due in mid-December for the following fall semester. For more information, students should contact the Applied Science and Technology Graduate Group, 210 Hearst Memorial Mining Building #1760, University of California, Berkeley; Berkeley, CA 94720-1760. Phone: (510) 642-0449 e-mail at ast.program@coe.berkeley.edu.

Arabic

Please see the Near Eastern Studies Department (p. 166) for program and degree requirements.

Architecture

College of Environmental Design (<http://ced.berkeley.edu>)

**Department Office: 232 Wurster Hall
#1800, (510) 642-4942**

Chair: Tom J. Buresh, MArch

Department Web Site: Architecture (<http://arch.ced.berkeley.edu>)

Related Course Descriptions:

Environmental Design courses (p. 618)

Visual Studies courses (p. 1450)

Department Overview

The Department of Architecture at UC Berkeley has a strong tradition of fostering independent design thinking and research. Our award-winning faculty offer vigorous undergraduate and graduate educational programs and carry out leading research in constructed and virtual environments, architectural technologies, and architectural humanities. The multidisciplinary interests of our faculty and graduate students form the basis of exciting new research collaborations with a variety of other disciplines, including anthropology, international studies, engineering, new media, and urban studies.

Architecture is more than design. To create livable environments means balancing complex social, political, economic, and technical requirements with human needs. Students take courses in environmental history, behavioral sciences, resource management, and design theory, as well as in the technical, aesthetic, and cultural components of design. The department prides itself on educating not only good architects, but also environmentally knowledgeable citizens.

School Philosophy

Undergraduate Philosophy

Undergraduate study in the College of Environmental Design provides a liberal education among an active community of students, scholars, creative designers, and technologists concerned with the built environment, within the larger environment of a great university.

Graduate Philosophy

The graduate programs in architecture aims to educate architects and scholars who contribute to the practice and discipline of architecture and to the development of a technologically sophisticated and humane built environment. The professional program is intended to develop students' abilities to conceive and accurately describe appropriate built spaces at several scales, to help them learn the processes used to bring buildings into place, and to provide a basis for understanding the consequences that complexes of buildings and open spaces have for inhabitants, society, and the environment.

In both its undergraduate and graduate programs, the department puts special emphasis on the studio element of its academic program, recruiting active architecture professionals to work in consultation with regular faculty in leading the courses.

Undergraduate Program

Berkeley's undergraduate program in architecture leads to the bachelor of arts (B.A.) degree. The program combines required courses in environmental design and architecture with opportunities for highly varied individual programs. Through its core courses, the program offers a broad introduction to the field of architecture, and through studies in the various areas it provides opportunities to prepare for specialization in the field in the areas of architectural design and representation, architectural technologies and building performance, architectural history, and society and culture. In addition to offering a sound and well-rounded education, undergraduate studies can also provide pre-professional competency for entry-level employment in architecture, the option for graduate work in architecture, or further studies in a related environmental design field.

Some graduates go on to obtain professional degrees in architecture or in other related fields; many others work in architectural practice, construction, government, or industry. Employment opportunities exist also at the community level, particularly in those communities that traditionally have not been served by professional architectural practice. The overall aim of the undergraduate program is to establish a strong foundation for a diversity of careers and to provide for mobility and flexibility to suit changing individual opportunities.

Course of Study

All undergraduates follow the same path through their junior year. In the first two years, students take a breadth of lower-division courses and the introductory environmental design courses. The junior year is architecture-intensive. In the fall semester, students take a design studio and a history and humanities option. In the spring, the required courses include another studio, a course in history and a technology option.

Program Tracks

During the spring semester of the junior year, students choose either a project track or a studio track for the senior year:

- **Project Track:** The project track option explores a particular theme for both the fall and spring semesters of the senior year. This theme changes each year, and is taught by a group of faculty members on a subject of their shared interest. For the fall semester, students enroll in a project preparation seminar, and for the spring semester, students take a studio — led by the same faculty — in which they develop their research and explorations, culminating in a design project and documented in a pamphlet.
- **Studio Track:** The studio track option is studio-intensive, with more architecture courses required in addition to a design studio each semester. Studio-track students enroll in a structures course in the fall, and choose between an energy and environment or construction course in the spring.

Accreditation/Licensure

The BA degree is a pre-professional degree and provides the foundation for entry to a Master of Architecture program, the most widespread professional degree program in architecture in the United States. The B.A. degree can also be applied toward licensing requirements in the State of California. See the National Architectural Accrediting Board (<http://www.naab.org>) (NAAB) for more information on accreditation. See the California Architects Board (<http://www.cab.ca.gov>) and the National Council of Architectural Registration Boards (<http://ncarb.org>) (NCARB) for more information on licensing.

For more information, see the department website (<http://ced.berkeley.edu/academics/architecture/programs/bachelor-of-arts-in-architecture>).

Graduate Programs

The department offers the accredited professional degree Master of Architecture, the research degrees Master of Science and Doctor of Philosophy, and several other degree programs as described below.

Master of Architecture

The Master of Architecture program is designed to provide students seeking their first accredited professional degree with a comprehensive and challenging education leading to the practice of architecture. Graduate students have the flexibility to choose a variety of paths within a two-to-three-year rigorous program, depending upon previous education and experience. The department makes no restriction as to the field of undergraduate preparation. However, the length of the required residence period, the number of required semester course units, and the specific list of required courses may vary depending upon undergraduate major, professional and other work experience, and previous graduate study, if any.

Additional prerequisites for admission to the professional Master of Architecture program are college-level or equivalent mathematics through analytical geometry and beginning calculus and beginning physics through mechanics.

A required studio each semester introduces design issues through the study of a variety of building types, styles, and sites. The curriculum in technology and building performance, history, society and culture, structures and construction and professional practice provides the breadth and background for the individual's professional education and career goals. Students who have completed equivalent courses at other institutions may have the requirements waived to allow for more elective units.

The basic course leading to the Master of Architecture degree takes three academic years and requires the completion of at least 72 units during that period of residence. Persons who hold a bachelor of arts or bachelor of science degree with a major in architecture may receive up to one year of advanced standing. The Master of Architecture Committee of the department will determine the specific amount of advanced standing individually for each student at the time she or he first registers for graduate study in the department. Special one-year Master of Architecture programs are available to persons holding the five-year, professional undergraduate degree, Bachelor of Architecture, from an accredited school, or comparable five-year degrees from foreign universities and technical institutes.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards. Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute

an accredited professional education. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

[Name of university, name of academic unit] offers the following NAAB-accredited degree program(s) (*If an institution offers more than one track for an M.Arch or D.Arch. based on the type of undergraduate/preparatory education required, please list all tracks separately*):

[Name of degree] (Prerequisite + total number of credits required)
In addition, the program is required to publish the year of the next accreditation visit for each accredited program.

Master of Science Degree in Architecture

This nonprofessional degree program offers the opportunity for advanced research in specialized areas within the architecture curriculum. A research degree, it is appropriate for those who already hold a degree in architecture but wish to study a particular subfield. Applicants from related disciplines may be accepted into the program, provided they demonstrate experience related to the discipline of architecture. Depending upon previous preparation, students are required to complete a minimum of 32 to 48 credit units, including a combined research methods course taught by a faculty team. Remaining coursework will be determined by the nature of the proposed research. A research thesis culminates the student's program. Further information about requirements for admission and application materials may be obtained from the department's graduate assistant.

Doctor of Philosophy (PhD) Degree in Architecture

This advanced degree prepares students with outstanding academic records for research and teaching in architecture and environmental design. It is a research-oriented program, in which the student chooses specific fields of specialization, prepares sufficiently in the literature and research of those fields to pass written and oral examinations, and completes original research culminating in the written dissertation. The PhD program provides detailed focus in specific study areas, including architectural design theory and criticism; architectural technologies, including building science, and building performance; the history of architecture and urban design; environmental design in developing countries; and the social and cultural basis of design.

For the PhD program, applicants should review the Graduate Division requirements with respect to admission, language requirements, candidacy, and the dissertation regulations. Applicants must hold a bachelor's degree from an accredited institution, but the department makes no restriction as to the discipline of the undergraduate preparation. Additional information is available from the departmental graduate assistant.

Program in Visual Studies (Master of Arts Degree in Design)

There is a small program in Visual Studies at the graduate level leading to the Master of Arts degree in design. Students with an interest in pursuing graduate work involved with visual design issues may apply.

The present degree is offered under Plan 1 of the Graduate Division, which requires 20 semester units plus a thesis. The length of time required for completion varies with the individual, depending in part upon previous preparation. An undergraduate degree from the College of Environmental Design or in an art-related field is helpful but not necessary. The principal emphasis in the admission process is on the portfolio that all applicants for admission to the graduate program must submit.

Concurrent Program with the Department of City and Regional Planning

The Department of Architecture and the Department of City and Regional Planning offer a concurrent degree program leading to the dual M.Arch. and M.C.P. degrees for students holding the five-year Bachelor of Architecture degree or a four-year Bachelor of Arts/Bachelor of Science degree in architecture, or equivalent degrees in related disciplines. The Master of City Planning degree portion of the concurrent program requires completion of 36 semester units; the M.Arch. segment calls for 24-72 semester units, depending upon the undergraduate degree. Applicants should indicate that they wish to be considered for the Concurrent Program in Architecture and City and Regional Planning when completing the UC Berkeley Graduate Application.

Concurrent Program with the Department of Landscape Architecture and Environmental Planning

The Departments of Architecture and Landscape Architecture and Environmental Planning offer a concurrent degree program. This program will lead to two professional degrees: Master of Architecture and Master of Landscape Architecture. The program brings together two closely connected branches of environmental design—the design of sites and the design of buildings. This program is for exceptionally qualified students who have an undergraduate degree in architecture or landscape architecture and who satisfy the admission requirements of the one- or two-year M.Arch. program and/or the two-year M.L.A. program. Applicants should indicate that they wish to be considered for the Concurrent Program in Architecture and Landscape Architecture when completing the UC Berkeley Graduate Application. Acceptance into the concurrent degree program is limited to outstanding applicants. More information may be obtained from the Graduate Office in 202 Wurster Hall or from the Department of Landscape Architecture and Environmental Planning website at laep.ced.berkeley.edu (<http://laep.ced.berkeley.edu>).

Concurrent Degree Program with the Department of Civil and Environmental Engineering, Division of Structural Engineering, Mechanics, and Materials

The two departments offer a joint program with a concurrent degree for exceptionally qualified students. Students must fulfill the course requirements for both departments but are allowed a reduction in elective units that will achieve a savings in the time enrolled, varying from one semester to one year, depending on undergraduate preparation. Some engineering courses are prerequisite to entering the program or may be taken during the first year of enrollment without credit toward the minimum course requirements. Applicants should indicate that they wish to be considered for the Concurrent Program in Architecture and Civil and Environmental Engineering when completing the UC Berkeley Graduate Application.

Concurrent MA in International and Area Studies

The concurrent M.A. program in International and Area Studies (IAS) is designed to complement the graduate degree programs in architecture. It is intended to produce graduate students who combine advanced professional training with a detailed knowledge of contemporary international issues or particular world areas or countries. The content of each M.A. program will be shaped in consultation with the departmental IAS adviser to meet the specific needs and interests of the individual student.

In addition to satisfying all Graduate Division and departmental requirements for the Master of Architecture, MS, or PhD degrees,

students in this concurrent program must complete a minimum of 24 units outside architecture in the special area agreed upon with the IAS adviser.

For additional information on these degree programs, please see arch.ced.berkeley.edu/programs (<http://arch.ced.berkeley.edu/programs>) or the Graduate Office.

Special Activities and Programs

The department offers several unique programs and activities including study-abroad programs for undergraduate students and internationally focused studios for graduate students. Recent studios have worked in India, Thailand, Mexico, Brazil, and Italy. The college also offers career workshops, job fairs, and internship placements. A weekly lecture series offers students the opportunity to hear internationally acclaimed speakers who often participate in classes and seminars as part of their visit. Opportunities are also provided to visit department exhibitions, participate in a mentor program, and become involved in student chapters of professional organizations such as the American Institute of Architects. Cross-disciplinary connections are established in joint graduate degree programs with the Departments of City and Regional Planning and Landscape Architecture and Environmental Planning as well as the Division of Structural Engineering, Mechanics, and Materials in the Department of Civil and Environmental Engineering. A post-professional Master of Urban Design degree is also available in the college. Department publications include *Process*, *Concrete*, *Architecture and Media*, and the refereed journals *Places* and *Traditional Dwelling and Settlements Review*.

Asian American Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Program Office: 506 Barrows Hall, (510) 643-0796

Department of Ethnic Studies Chair: Catherine Ceniza Choy, PhD

Department Website: Department of Ethnic Studies (<http://ethnicstudies.berkeley.edu>)

Program Website: Asian American and Asian Diaspora Studies (<http://aaads.berkeley.edu>)

Undergraduate Program

The Asian American and Asian Diaspora Studies major at UC Berkeley is dedicated to the multidisciplinary study of historical and contemporary experiences of Asian-ancestry groups in local, national and global contexts. Although attention is focused on Asians in the US, the program situates the experiences, contributions, issues, and concerns of Asian American communities within their larger transnational and diasporic contexts. Connections among Asian communities in the US and around the world are explored in terms of the entangled histories and circuits of migration and the interconnected space through which people, capital, ideas, influences, and activism flow between Asia and the US and among Asian diasporic communities.

Major Requirements

Lower Division (4 courses): Asian American and Asian Diaspora Studies 20A; Asian American and Asian Diaspora Studies 20B or 20C; and two courses from the following: Ethnic Studies 10AC, 11AC, 20AC, 21AC, or 41AC.

Upper Division (8 courses): Asian American and Asian Diaspora Studies 131; Ethnic Studies 101A or 101B; Asian American and Asian Diaspora Studies 197 (4 units total); and completion of one course from each group below:

- *Group 1 (History):* 121, 122, 123, 124, 126, 127, or 128AC;
- *Group 2 (Community Studies):* 125, 132AC, 141, 143, 144, 145, 146, 150, 151, or 165;
- *Group 3 (Cultural Studies):* 138, 171, 172, 173, 175, 176, 177, 178, 180, 181, or 183.

Two additional electives that can be satisfied with related courses from outside departments (i.e., Asian Studies, History, East Asian Languages and Cultures, South & Southeast Asian Studies), additional courses from the Asian American and Asian Diaspora Studies curriculum, other UC campuses, EAP courses from an Asian university, or Asian language courses.

Honors Program

The Asian American and Asian Diaspora Studies Program will provide a program leading to the BA degree with honors. A student will be recommended for honors if the student has completed at least 30 units and two semesters with a grade point average (GPA) of at least 3.5 for all work undertaken in the Asian American and Asian Diaspora Studies Program. Students must also have been approved specifically for honors by the chair of the Department of Ethnic Studies Chair and the vice chair of the Department of Asian American and Asian Diaspora Studies upon the recommendation by the faculty adviser for the major. The honors student will be required to complete H195A/B Senior Honors Seminar for Asian American and Asian Diaspora Studies Majors. In order to graduate with a BA degree with honors, a student must obtain at least 3.5 GPA for all coursework undertaken at the university.

Minor Requirements

Five elective courses from Asian American and Asian Diaspora Studies 121, 122, 123, 124, 125, 126, 127, 128AC, 131, 132AC, 138, 141, 142, 143, 144, 145, 146, 150, 151, 165, 171, 172, 173, 175, 176, 177, 178, 179, 180, 181, 183, 190, or 190AC.

College of Letters and Science (<http://ls.berkeley.edu>)

Undergraduate Office: 101 Stephens Hall, (510) 642-0333

Graduate Office: 2223 Fulton Street, Room 524, (510) 642-0333

Group Chair: Bonnie C. Wade, PhD (Department of Music)

Group Website: Asian Studies (<http://ieas.berkeley.edu/gas>)

Group Major in Asian Studies

The undergraduate Group Major in Asian Studies is a rigorous but flexible interdisciplinary program designed to assist students to take advantage of the rich course offerings in the Asian field campuswide in a way that is not available through individual departments. There are three concentrations from which a student may select in the major: a Multi-Area thematic

concentration, a concentration on China, or a concentration on Japan. "Multi-Area" includes all countries and regions of Asia. One of the areas chosen must be either China or Japan. Other areas can include Korea and countries in South Asia or Southeast Asia.

Prerequisite Courses in the Major

Students petitioning to enter the Group Major in Asian Studies must have completed (grade C or better) the following:

- Asian Studies 10, Introduction to Asia (offered in the fall only).
- One lower-division history course (choose one): History 6A (China, Early empires); History 6B (Modern China); History 11 (India); History 14 (Japan); SEAsian 10A (Southeast Asia—mainland); SEAsian 10B (Southeast Asia—insular).

Additional Major Requirements

Once accepted into the major, the student is expected to select one of three concentrations: Area I (Multi-Area); Area II (China); or Area III (Japan). For Area I, one area must include either China or Japan with others including Korea, countries of Southeast Asia or South Asia. The following coursework is required:

1. Two years of language appropriate to the concentration. After the second year, further study of the language at the upper division level is encouraged and will count toward the major unit requirements. In the Multi-Area thematic concentration, the language will be Chinese or Japanese, as appropriate.
2. Completion of a minimum of 30 units of upper division coursework.
3. Two upper-division courses in the same discipline. One of the two must be a course whose primary purpose is to introduce the theories and methods of the discipline.
4. One upper division course must be a course in Asian history appropriate to the student's concentration.
5. Five Inter-Area/Interdisciplinary courses. In the concentration on Area I (Multi-Area), the student will create his/her own emphasis in the form of a theme or topic that can be pursued through five courses on countries and regions of East Asia, Southeast Asia, and South Asia. In the concentration on Area II (China), three out of the five courses must be on China. In the concentration on Area III (Japan), three out of the five courses must be on Japan.

Area Focus

At the time of declaring the major, the student identifies the concentration of Area I, II, or III.

For the Multi-Area concentration, students must submit a statement detailing a theme or topic that will be pursued and a potential list of courses that are pertinent to the plan of study.

Multi-Area

Students with a Multi-Area thematic concentration must take (in addition to the prerequisite courses of Asian Studies 10 and a lower division history course):

1. Two years of either Chinese or Japanese. Students who choose China as one of their areas must take Chinese; students who choose Japan as one of their areas must take Japanese.
2. Disciplinary focus: one upper division Theory and Methods course and one upper division course on either China or Japan from the same discipline/department. Students who choose China as one of their areas must take the second disciplinary course on China;

students who choose Japan as one of their areas must take the second disciplinary course on Japan.

3. One upper division history course on either China or Japan. Students who choose China as one of their areas must take Chinese history; students who choose Japan as one of their areas must take Japanese history.
4. As part of the Inter-Area/Interdisciplinary requirement, the student will create his/her own emphasis in the form of a theme or topic to be pursued through courses on countries and regions of East Asia, Southeast Asia, and South Asia.

Advanced language study classes can be counted towards the five Inter-Area/Interdisciplinary upper division course requirement only if they are in keeping with the theme or topic of the student's concentration. Students completing the honors program can apply H195 and B towards the upper division requirements.

For a list of courses that can be applied towards the Multi-Area concentration, refer to the Group in Asian Studies website (http://ieas.berkeley.edu/gas/courses_multi-area.html).

China

China-focused students must take the following (in addition to the pre-requisite courses of Asian Studies 10 and a lower division history course):

1. Two years of Mandarin Chinese or equivalent.
2. Disciplinary focus: one upper division Theory and Methods course and one upper division course on China from the same discipline/department.
3. One upper division history course on China.
4. As part of the Inter-Area/Interdisciplinary requirement, three upper division courses on China, one upper division course on area outside of China, and one upper division course on Asia.

Advanced language study classes, such as the Chinese 100 series, can be counted towards the three upper division courses on China. Students completing the honors program can apply H195 and B towards the upper division requirements.

For a list of courses that can be applied towards the China focus, refer to the Group in Asian Studies website (http://ieas.berkeley.edu/gas/courses_china.html).

Japan

Japan-focused students must take the following (in addition to the pre-requisite courses of Asian Studies 10 and a lower division history course):

1. Two years of Japanese or equivalent.
2. Disciplinary focus: one upper division Theory and Methods course and one upper division course on Japan from the same discipline/department.
3. One upper division history course on Japan.
4. As part of the Inter-Area/Interdisciplinary requirement, three upper division courses on Japan, one upper division course on area outside of Japan, and one upper division course on Asia.

Advanced language study classes, such as the Japanese 100 series, can be counted towards the three upper division courses on Japan. Students completing the honors program can apply H195 and B towards the upper division requirements.

For a list of courses that can be applied towards the Japan focus, refer to the Group in Asian Studies website (http://ieas.berkeley.edu/gas/courses_japan.html).

Optional Senior Thesis

Qualified students may complete a senior thesis approximately 50 pages in length under the supervision of the major adviser or other appropriate faculty member. Three units of upper division credit in Asian Studies 196 will be given for completion of the thesis.

Honors Program

Open to seniors in the Group Major in Asian Studies whose grade point average (GPA) is 3.5 or higher in all university work and 3.6 or higher in the major. The program consists of completion of Asian Studies H195A-H195B (3,3), which includes the writing of an honors thesis. The honors thesis is expected to be a substantial research paper, both in its length and originality; it is read by two faculty members.

Minor Program in Asian Studies

Students in the College of Letters and Science may complete one or more minors of their choice, normally in a field both academically and administratively distinct from their major.

There are three minor program options in Asian studies: Chinese studies, Japanese studies, and Korean studies. These programs give students an introduction to the study of one region of Asia through social science and humanities courses. Minimum requirements are five upper division courses with a C or better in each course. At least three of the courses must be completed at UC Berkeley; only one may overlap with those credited to the student's major. There is no Asian language requirement for the minor. Only two upper division language/literature courses may be used. For specific courses that satisfy minor requirements, see the department.

Graduate Program

The Group in Asian Studies offers an MA degree program in Asian Studies. Students in the program emphasize one of four areas of Asia: East Asia (China), Northeast Asia (Japan/Korea), Southeast Asia, or South Asia. The group, in cooperation with the Graduate School of Journalism and the School of Law, also offers a concurrent MJ/MA in journalism and Asian studies, and a concurrent JD/MA in law and Asian studies. The group is authorized to award the degree of Doctor of Philosophy in Asian Studies, but for practical and academic reasons this degree program is very restricted. Applicants with specific disciplinary interests should apply to a particular department rather than to the interdisciplinary group. Only those who have first completed the M.A. with the Group in Asian Studies may apply to the PhD program.

Astronomy

College of Letters and Science
Department Office: B 20 Hearst Field
Annex, (510) 642-5275

Chair: Imke de Pater, PhD

Department Website: Astronomy (<http://astro.berkeley.edu>)

Overview

The Department of Astronomy offers undergraduate and graduate instruction in a wide variety of fields, including theoretical and observational astrophysics; infrared, optical, and radio astronomy; galactic structure and dynamics of stellar systems; high-energy astrophysics and cosmology; star and planet formation; and spectroscopy. A considerable amount of research and teaching related to astronomy is done in other units at UC Berkeley, including the Physics Department, Earth and Planetary Science, Space Science Laboratory, and the Lawrence Berkeley National Laboratory. Various professors in the Chemistry, Mathematics, Statistics, and Engineering departments have an active interest in astronomy and are available for consultation.

A variety of instruments is available to students and staff, including two 10-meter telescopes at the Keck Observatory on Mauna Kea in Hawaii; 30-inch, 40-inch, and 120-inch telescopes at Lick Observatory; a 30-inch telescope at Leuschner Observatory (near the campus); and a 16-element millimeter-wave interferometer in Southern California. Laboratories are available for the development of radio, infrared, and optical instruments, and for the precise measurement of images and spectra. Numerical simulations play an increasing role in Astrophysics, and we have a variety of expertise and machines available for this.

The Major in Astrophysics

During the first two undergraduate years, students must, in addition to fulfilling certain specific requirements of the College of Letters and Science, pursue studies that will prepare them for future work in astronomy or in other careers that benefit from an education in a physical science, such as science teaching or technical positions in industry. Specifically, the department requires that during the first two years, and in any case before declaring the major, students take courses that provide a thorough understanding of the following:

1. Basic principles of physics: mechanics, properties of matter, electricity and magnetism, heat, wave motion, sound and light (Physics 7A, 7B, 7C).
2. Basic mathematics: analytic geometry, differential and integral calculus, differential equations, and linear algebra (Math 1A-1B, followed by Math 53 and 54).
3. An introduction to astrophysics (Astronomy 7A-7B) is recommended for the major but not required.

The last two years, leading to the BA degree in astrophysics, are spent in more intensive work, primarily in the fields of astronomy, physics, earth and planetary science, and mathematics. The specific plan of study to be followed by each student is to be worked out in consultation with the departmental advisers for the major, and must include 30 units of upper division work in astronomy and allied fields. For students who are

double majors in astrophysics and another science, the upper division requirement is reduced to 24 units.

All students are required to take at least one semester of undergraduate laboratory (Astronomy 120 or 121) and two of the senior-level courses Astronomy 160, C161, C162. Many students pursuing a dual-major of Astrophysics and Physics will be most interested in 160 and C161. Double-majors in Astrophysics and Earth & Planetary Science will be most interested in 160 and C162. With the approval of the undergraduate faculty adviser, outstanding students may take a graduate course in Astronomy.

Honors Program

For honors in astrophysics a student must fulfill the following additional requirements: 1) maintain a grade-point average of at least 3.5 in all courses in astronomy and related fields, and an overall grade-point average of at least 3.3 in the University; 2) carry out an individual research or study project, involving at least three units of H195. The student's project is chosen in consultation with a departmental adviser, and the written report is judged by the student's research supervisor and by a departmental adviser.

For more detailed information about the astrophysics major, please contact the undergraduate student academic adviser.

The Minor in Astrophysics

Petitioning for the Minor. Students may petition for the minor in Astrophysics only after they have completed all required courses for the minor in Astrophysics. Graduating seniors must petition no later than two weeks after the end of the term. To petition students must fill out a "Completion of L&S Minor" form (<http://ls-advise.berkeley.edu/fp/00minor.pdf>) available from the College of Letters and Science Advising Office in 206 Evans or from the L&S Advising website. Turn in to the Undergraduate Adviser: 1) the completed petition for the minor; and 2) a copy of transcripts (unofficial transcripts are OK) showing your completed astrophysics courses.

The Minor Requirements

The Astrophysics minor program conforms to the College of Letters and Science specifications and consists of the following coursework:

- **Prerequisites:** Physics 7A, 7B, 7C (or equivalent); Math 1A, 1B, 53, 54 (or equivalent). These courses must be taken for a letter grade. Physics 7A-7B-7C must each be passed with a letter grade of "C" or better. Students must achieve a minimum grade point average (GPA) of 2.0 in the seven courses. Astrophysics 7A and 7B are recommended for the minor but not required.
- **Course Requirements:** The minor program consists of two courses: either Astronomy 120 or 121; or 160, C161, or C162; plus three additional upper division courses.

All upper division courses must be taken for a letter grade (thus Astronomy H195, 198 and 199 will not count toward the minor program). A minimum of three upper division courses must be completed at Berkeley. Only one upper-division class may overlap your major and the Astrophysics minor. An overall minimum GPA of 2.0 is required in upper division courses applied to the minor program.

For more information regarding the minor program, please contact the Astrophysics undergraduate academic adviser.

Graduate Programs

The graduate program is aimed at the PhD degree in astrophysics. Entering students need not have majored in astronomy, although some background in astronomy is desirable. A strong background in physics, however, is essential.

In addition to the qualifying examination required by the University, the department requires students to pass a preliminary examination which tests breadth and depth of knowledge of three specialized research areas chosen by the student from a list of about 10. Students choose, with the aid of their adviser, courses in the department which are useful in preparing for the preliminary and qualifying examinations. In addition, students must pass two graduate courses taken outside the department and must acquire one year's teaching experience. The program normally takes five to six years. Additional information on the program is available upon request from the department.

The requirements for the MA degree are 24 units in graduate or upper division undergraduate courses (12 of them in graduate courses) and the preliminary examination.

Bengali

Please see the South and Southeast Asian Studies department (p. 202) for program and degree requirements.

Bioengineering

College of Engineering (<http://coe.berkeley.edu>)

Department Office: 306 Stanley Hall, (510) 642-5833

Chair: Matthew Tirrell, PhD

Department Website: Bioengineering (<http://bioeng.berkeley.edu>)

Overview

Bioengineering applies engineering principles and practices to living things, to solve some of the most challenging problems that face our world today. In Bioengineering, also known as Biomedical Engineering, our work is concentrated on high-impact applications instrumentation, molecular and cellular engineering, and computational biosciences that will bring about major advances in medicine and the life sciences.

Founded in 1998, the department is supported by exceptional faculty, strong ties to other departments on campus, and close collaborations with other institutions such as UC San Francisco and Lawrence Berkeley National Laboratory. We continue to expand our department with new faculty, staff, facilities, and research programs.

The field of bioengineering applies engineering principles and practices to living things, integrating biological and medical sciences with advanced technology to help people live longer and healthier lives. No other field fulfills the potential for interdisciplinary research and education more than bioengineering. We anticipate future breakthroughs ranging from the design of drugs customized to an individual's genome, to tiny implantable drug delivery devices, to software and components that allow researchers to design bacteria like electronic circuits.

Bioengineering at UC Berkeley is supported by exceptional faculty, strong ties to other departments on campus, and close collaborations with institutions, such as UC San Francisco and Lawrence Berkeley National Lab. Our curriculum provides a solid foundation in engineering and the biological sciences, with the freedom to explore a variety of topics and specialize in advanced areas of research. This unique environment for learning and research in a rapidly growing discipline provides dedicated students with the education required to become a leader in the field of bioengineering.

See the College of Engineering Undergraduate Guide, *College of Engineering Announcement: A Guide to Undergraduate and Graduate Study* (<http://coe.berkeley.edu/college-of-engineering-announcement>), for more information.

Undergraduate Program

Rated one of the top 10 bioengineering undergraduate programs in the country, Bioengineering at Berkeley is a multidisciplinary major intended for academically strong students who excel in the physical sciences, mathematics, and biology. Coursework provides a strong foundation in engineering and the biological sciences, with the freedom to explore a variety of topics and specialize in advanced areas of research. All students benefit from intensive group design work, either through a senior capstone project (<http://bioeng.berkeley.edu/undergrad/capstone>) or through independent research in faculty laboratories.

The stimulating environment of Berkeley offers a wealth of opportunity for learning, research, service, and community involvement, and provides dedicated students the knowledge and skills to become the next leaders in bioengineering.

Our major features small, specialized upper division courses and direct interaction with faculty. We offer six distinct concentrations: Biomaterials, Biomechanics and Cell & Tissue Engineering; Biomedical Devices; Computational Bioengineering; Imaging; Premed; and Synthetic Biology.

Bioengineering is a multidisciplinary undergraduate major intended for academically strong students who excel in the physical sciences, mathematics, and biology. It offers students an opportunity to learn how to apply the physical sciences and mathematics in an engineering approach to biological systems. The undergraduate curriculum is designed to ensure that students will be well grounded in the fundamental principles and methods of engineering, as well as in integrative and molecular biology. There are further opportunities for specialization in advanced areas of both engineering and biology, including laboratory and clinical components.

The undergraduate bioengineering major offers defined concentrations in biomaterials, biomechanics, biomedical devices, cell and tissue engineering, computational bioengineering, imaging, synthetic biology, and pre-med. Bioengineering graduates may enter industry, go on to medical school, and/or pursue graduate studies in bioengineering and related disciplines.

Major Requirements

Students must complete a minimum of 120 units, in which they must satisfy the University of California and Berkeley campus requirements outlined in this Bulletin. In addition, students must complete the requirements for the College of Engineering and the bioengineering program. Full details on these requirements can be found in the College of Engineering Undergraduate Guide, *College of Engineering Announcement: A Guide to Undergraduate and Graduate Study* (<http://coe.berkeley.edu/college-of-engineering-announcement>).

coe.berkeley.edu/guidecoe.berkeley.edu/college-of-engineering-announcement). Please also see our eight defined concentrations in the Announcement for suggested programs of study.

Undergraduate Program in Bioengineering * (p.)

Course	Fall	Spring

Total	14-15	15-16

Notes

¹ Chemistry 4A and 112A/B are intended for students majoring in chemistry or a closely related field. *Note:* Prerequisites to Chemistry 112A/B include Chemistry 1A and Chemistry 1B (or Chemistry 4A and Chemistry 4B).

² This requirement may be completed at any time in the program.

³ The Humanities/Social Science (H/SS) requirement includes two approved reading and composition courses and four additional approved courses, with which a number of specific conditions must be satisfied. Reading and Composition "A" and "B" must be completed by no later than the end of the sophomore year. The remaining courses may be taken at any time during the program. See the website (<http://coe.berkeley.edu/hssreq>) for complete details and a list of approved courses. Consult the "Ethics Content List" on the previous page for courses with ethics content.

⁴ Select two from the Engineering/Biology Preparation list (<http://bioeng.berkeley.edu/undergrad/program/engbioprep>).

⁵ Choose courses from the approved Bioengineering Fundamentals list (<http://bioeng.berkeley.edu/undergrad/program/biofundamentals>).

⁶ Choose courses from the approved Engineering Topics list (<http://bioeng.berkeley.edu/undergrad/program/engtopics>).

⁷ Choose courses from the approved Technical Elective list (<http://bioeng.berkeley.edu/undergrad/program/techelect>). Pre-Med students should take Chemistry 3B/3BL and Biology 1B.

⁸ Choose courses from the approved Upper Division Biology list (<http://bioeng.berkeley.edu/undergrad/program/udbiology>).

⁹ Choose courses from the Bioengineering Topics list (<http://bioeng.berkeley.edu/undergrad/program/engtopics>).

¹⁰ Choose course from Bioengineering Design Project or Research list (<http://bioeng.berkeley.edu/undergrad/program/design>).

¹¹ Choose course from Bioengineering Lab list (<http://bioeng.berkeley.edu/undergrad/program/bioelabs>).

* Program of study must include:

(a) 42 units of upper-division coursework in technical subjects such as engineering, chemistry, physics, integrative biology, molecular and cell biology, mathematics, or statistics. Of these units, at least 22 must be in bioengineering. The 42 units must be from the bioengineering core curriculum (excluding BioE 100) or the Curriculum Electives lists.

(b) 45 units of engineering (upper or lower division). These units must be from courses that appear on the Bioengineering Topics or Engineering Topics lists.

Students are advised to consult the approved concentrations (<http://bioeng.berkeley.edu/undergrad/program/concentrations>) to identify an appropriate course sequence for bioengineering specialty areas, and may also design their own program that meets with the above requirements with permission from their faculty adviser. Regular consultation with an adviser is strongly encouraged. Recommended courses for each concentration can be found here. (<http://bioeng.berkeley.edu/undergrad/program/concentrations>)

¹² Junior Transfer admits are exempt from completing BIOE 10

* A minimum of 120 units is required for graduation.

Joint Major in Bioengineering/Materials Science and Engineering

The Department of Bioengineering offers a joint major with The Department of Materials Science and Engineering for students who have an interest in the field of biomaterials. The broad curriculum includes exposure to fundamental courses in engineering and life sciences and will allow students to understand the interface between the two major fields.

Students taking this joint major will successfully compete for jobs in the field of biomaterials in academia, industry, and government.

Bioengineering Minor

The department offers a minor in bioengineering that is open to all students who are not majoring in bioengineering and who have completed the necessary prerequisites for the minor requirements. Information is available in 306 Stanley Hall.

Graduate Program

The Department of Bioengineering offers two professional Master's degrees and a joint PhD program.

The (<http://bioeng.berkeley.edu/meng>) **Master of Engineering (MEng)** is a one-year masters degree with a strong emphasis on engineering and entrepreneurship designed for students planning to move directly into industry after completing the program.

The (<http://bioeng.berkeley.edu/mtm>) **Master of Translational Medicine (MTM) program** links the Department of Bioengineering at Berkeley with the Department of Bioengineering and Therapeutic Sciences at UCSF, and is designed to train students in applying translational research and engineering approaches to solve fundamental problems in healthcare delivery. This one-year program should appeal to engineers, scientists and clinicians who seek to bring innovative treatments and devices into clinical use.

The (<http://bioegrad.berkeley.edu>) **PhD in Bioengineering** is granted jointly by Berkeley and UCSF, two of the top public universities in the world in health sciences and engineering. Our interdisciplinary program combines the outstanding resources in biomedical and clinical sciences at UCSF with the excellence in engineering, physical, and life sciences at Berkeley.

All students have full access to the breadth of resources and courses on both campuses, and the opportunity to work with over 100 affiliated faculty in the colleges of engineering, chemistry and biological sciences at Berkeley and medical and dental schools at UCSF. Our program offers students unparalleled opportunities for fundamental and applied bioengineering research in a wide variety of related fields. Innovation and collaboration across campuses and disciplines is encouraged, and often led by graduate students.

The PhD and Master's Degree in bioengineering are jointly offered by Berkeley and UCSF, administered at Berkeley by the Department of Bioengineering. This program permits students to benefit from both the excellent clinical and health sciences resources available on the San Francisco campus and the outstanding engineering and basic life sciences resources available on the Berkeley campus.

With more than 140 faculty members from many departments on the two campuses, our program offers unmatched graduate training opportunities in bioengineering. Students in the program may take courses and perform research on either or both campuses.

All students in the program are simultaneously enrolled in the graduate divisions of both the San Francisco and Berkeley campuses and are free to take advantage of courses and research opportunities on both campuses. The program awards the PhD in Bioengineering degree from both campuses.

Students with a BA or BS degree in engineering, biology, or other science are eligible for admission. Students can obtain additional information and application materials by contacting the Bioengineering Graduate Program, 306 Stanley Hall, University of California, Berkeley; Berkeley, CA 94720-1762. Phone: (510) 642-9931. Website: bioegrad.berkeley.edu (<http://bioegrad.berkeley.edu>).

Biology (General)

College of Letters and Science (<http://ls.berkeley.edu>)

College of Natural Resources (<http://www.cnr.berkeley.edu/site>)

Overview

There is no department of biology at UC Berkeley; courses in the biological sciences are offered through the departments of Integrative Biology, Molecular and Cell Biology, and Plant and Microbial Biology.

However, Berkeley offers three interdepartmental biology courses, which provide a broad, basic introduction to the biological sciences for both majors and non-majors. These courses are taught by faculty from all three of the biology departments on campus. The name "biology" has been retained for these courses to reflect their interdepartmental character.

Biology 1A/1AL and 1B are each taught both semesters, and students may enroll in either (but not both) during either the fall or spring semester. Courses do not need to be taken in any particular order.

Degree Requirements

For degree requirements and program information, please see the listings in this bulletin for each department:

Integrative Biology (p. 127)

Molecular and Cell Biology (p. 158)

Plant and Microbial Biology (p. 177)

Biophysics

College of Letters and Science (<http://ls.berkeley.edu>)

Graduate Group Office: 299 Life Sciences Addition, (510) 642-0379

Chair: Eva Nogales, PhD

Graduate Group Website: Biophysics (<http://biophysics.berkeley.edu>)

Overview

The graduate program is administered by the Graduate Group in Biophysics. This campuswide, interdepartmental group provides an opportunity for interested students to receive training leading to the PhD in biophysics. Students may work under the supervision of any faculty member belonging to the group.

Students interested in pursuing graduate work in biophysics typically acquire undergraduate training in one of the basic physical or biological sciences and take key courses in biology, physics, and chemistry during the first two years at UC Berkeley. Relevant graduate courses are listed in the Courses tab. Additional courses may be found under the Departments of Molecular and Cell Biology, Chemistry, Physics, and Bioengineering.

Further information is available from the Group Office in 299 LSA or the website (<http://biophysics.berkeley.edu>).

Biostatistics

College of Letters and Science (<http://ls.berkeley.edu>) and **School of Public Health** (<http://sph.berkeley.edu>)
Graduate Group Office: 101 Haviland Hall, (510) 642-3241

Chair: Sandrine Dudoit, PhD
Graduate Group Website: Biostatistics (<http://www.stat.berkeley.edu/biostat>)

Graduate Group in Biostatistics

Many issues in the health, medical, and biological sciences are addressed by collecting and exploring relevant data. The development and application of techniques to better understand such data is the fundamental concern of the Group in Biostatistics. The program offers training in theory of statistics and biostatistics, the computer implementation of analytic methods, and opportunities to use this knowledge in areas of biological/medical research. The curriculum is taught principally by members of the Department of Statistics (College of Letters and Science) and the Division of Biostatistics (School of Public Health) and provides a wide range of ideas and approaches to the analysis of data.

Graduate Programs and Degrees

The Group in Biostatistics offers two graduate programs: MA and PhD. These programs are appropriate for students who have either a strong mathematical and statistical background with a focus in the biomedical sciences, or degrees in the biological sciences with a focus in mathematics and statistics. (The MA degree can be obtained under Plan I or Plan II. The PhD dissertation is administered according to Plan B.)

The Group in Biostatistics, in conjunction with other departments on the UC Berkeley campus, offers a PhD in biostatistics with a Designated Emphasis (DE) in Computational and Genomic Biology (DE-CGB) or a Designated Emphasis in Computer Science and Engineering (DE-CSE). For information on the DE-CGB, go to the website (<http://computationalbiology.berkeley.edu>). For information on the DE-CSE, go to the website. (<http://cse.berkeley.edu>)

For further information, consult the Biostatistics website. (<http://www.stat.berkeley.edu/biostat>)

Graduate Program

For the MA, minimum entrance requirements consist of two full-year courses in calculus, a course in linear algebra, and a one-year course in statistics or biostatistics. Those applying for the PhD should possess a strong quantitative background exceeding the minimum requirements for the MA.

Research Facilities

Graduate students in the group have direct access to a variety of specialized computing resources, as well as the services of the campus computing facilities. Research activity of the faculty currently includes

biostatistical computing, statistical issues in AIDS research, survival analysis, environmental health, epidemiology, and statistical methods in genetics and computational biology. Projects in research areas provide opportunities for both practical experience and individual research. Cooperation with other departments allows unusually broad and effective training in both theoretical and applied directions.

Courses of Instruction

A wide variety of appropriate courses from a number of departments is available to candidates for either the MA or the PhD degree, giving both programs considerable flexibility. Such flexibility allows students in consultation with the graduate adviser to arrange an individualized program. See Public Health (http://sis.berkeley.edu/catalog/gcc_view_req?p_dept_cd=PB+HLTH) and Statistics in this Bulletin for course listings.

Buddhist Studies

College of Letters and Science (<http://ls.berkeley.edu>)
Group Office: 3413 Dwinelle Hall, (510) 642-3480

Director: Alexander von Rospatt, PhD
(Department of South and Southeast Asian Studies)
Group Website: Buddhist Studies (<http://buddhiststudies.berkeley.edu>)

Undergraduate Program

There is currently no undergraduate degree in Buddhist Studies. However, the Department of East Asian Languages and Cultures (http://sis.berkeley.edu/catalog/gcc_view_req?p_dept_cd=EA+LANG) offers a minor in Buddhism, and the Group in Religious Studies (http://sis.berkeley.edu/catalog/gcc_view_req?p_dept_cd=RELIGST) offers an emphasis in Buddhism. Undergraduate courses with a Buddhism emphasis can also be found in the Departments of History of Art (http://sis.berkeley.edu/catalog/gcc_view_req?p_dept_cd=HISTART) and South and Southeast Asian Studies (http://sis.berkeley.edu/catalog/gcc_view_req?p_dept_cd=S.SEASN).

Graduate Program

The Berkeley Group in Buddhist Studies offers an interdisciplinary program of study and research leading to a PhD degree in Buddhist Studies. The group, which cooperates closely with the Departments of South and Southeast Asian Studies (SSEAS) and East Asian Languages and Cultures (EALC), emphasizes the study of Buddhism in its many forms within its Asian historical and cultural context.

The ability to read and analyze Buddhist texts in their original languages is an indispensable skill for research in the field. Accordingly, the study of classical Asian languages constitutes a core element of the doctoral program. The specific combination of Asian languages required for the PhD will depend on each student's area of research, but all students will be expected to gain facility in a minimum of two Asian languages, at least one of which will be Classical Chinese, Classical Japanese, Pali, Sanskrit, or Classical Tibetan.

While linguistic competence is crucial, it is not considered an end in itself. Students are expected to acquire a sophisticated appreciation of the historical, social, and cultural milieu from which the Buddhist textual legacy emerged. All students in the PhD program are encouraged to broaden and deepen their understanding of Buddhist phenomena through incorporating archaeological, ethnographic, and visual materials and perspectives. Because of UC Berkeley's particular strength in the area of Buddhist visual culture (three of the group's faculty are specialists in Buddhist art), all students in the program are expected to take at least one course in art history. In addition, depending on their research interests, students are encouraged to do additional work in fields such as anthropology, critical theory, history, literature or philosophy. The goal of our program is not only to provide students with the linguistic, methodological, and conceptual skills to produce significant new research on Buddhist phenomena, but also to have students bring their research into dialogue with ongoing issues and concerns in the humanities writ large.

The PhD program in Buddhist studies is designed for students who intend to become scholars and teachers at the university level. Students wishing to enter the Ph.D. program must have a master's degree in a relevant field, typically East Asian, South Asian, or Southeast Asian studies. A master's degree in religion is deemed relevant only if it includes significant training in an Asian language relevant to their intended area of research at the time of admission.

For application procedures, financial support, and program requirements, please refer to the Buddhist studies website. (<http://buddhiststudies.berkeley.edu>)

Business Administration

Walter A. Haas School of Business

(<http://www.haas.berkeley.edu/?gclid=CKns2IDchbwCFe6DQgodpF4AAA>)

Office: S545 Student Services Building #1900

Dean: Richard K. Lyons, Ph D

Department Website: Business Administration
(<http://haas.berkeley.edu>)

Related Course Descriptions:

Undergraduate Business Administration courses
(p. 1432)

Master's in Business Administration courses (p. 937)

Evening and Weekend Master's in Business Administration courses (p. 638)

Executive Master's in Business Administration courses (p. 655)

Master's in Financial Engineering courses (p. 956)

PhD in Business Administration courses (p. 1140)

Undergraduate Program

The highly competitive, two-year Haas Undergraduate Program accepts applications from both transfer and continuing UC Berkeley applicants.

The program's goal is to provide students with the knowledge and technical skills necessary to understand the modern business world, to prepare for subsequent graduate work, and to achieve the highest levels of success in their professional careers. Students earn a Bachelor of Science degree that takes a general management perspective. Coursework is fully integrated with the University's liberal arts curriculum, allowing students to gain a broad perspective on business management and its environment. Students are challenged to develop creative and innovative solutions to contemporary business problems and to develop leadership skills and a sense of community service through classroom experiences and extracurricular activities.

Students preparing for admission to the Undergraduate Program may complete required lower division courses in any college in the University or equivalent courses at other institutions. Before applying to the school, you should visit our website. (<http://haas.berkeley.edu/undergrad>) The website contains complete information concerning academic qualifications for admission, with details about prerequisites and degree requirements (http://haas.berkeley.edu/Undergrad/degree_requirements.html). Because there are many more applicants than spaces available, completion of the prerequisites does not guarantee admission.

Upon admission, business majors must take the following upper division core courses at Haas:

- UGBA 100—Business Communication
- UGBA 101A—Microeconomic Analysis for Business Decisions
- UGBA 101B—Macroeconomic Analysis for Business Decisions
- UGBA 102A—Introduction to Financial Accounting
- UGBA 102B—Introduction to Managerial Accounting
- UGBA 103—Introduction to Finance
- UGBA 104—Analytic Decision Modeling Using Spreadsheet
- UGBA 105—Organizational Behavior
- UGBA 106—Marketing
- UGBA 107—Social, Political, and Ethical Environment of Business

Beyond these required core courses and other courses outside the Haas School needed to fulfill the degree requirements, business majors must take additional classes from the following 11 business disciplines: accounting, business and public policy, corporate social responsibility, economic analysis and policy, entrepreneurship, finance, management of organizations, marketing, nonprofit management, operations and information technology management, and real estate.

Contact Information: Haas School of Business, University of California, Berkeley, S450 Student Services Building #1900, Berkeley, CA 94720-1900; Telephone (510) 642-1421; haas.berkeley.edu/undergrad (<http://haas.berkeley.edu/undergrad>).

Graduate Degrees

The Haas School of Business offers curricula leading to the Master of Business Administration (MBA) degree, Master's in Financial Engineering, and the PhD degree. The Haas School offers three MBA programs: a two-year program for full-time students, the Evening & Weekend MBA Program, and the Berkeley MBA for Executives, a 19-month program for senior professionals.

Full-Time MBA Program

The Full-Time MBA Program at the Haas School of Business offers an unsurpassed education in the fundamentals of management and in-

depth exposure to the trends shaking the foundations of business. It brings together outstanding men and women from around the world and teaches them to be innovative leaders in any type of organization. At the end of the two-year program, students will receive the Berkeley MBA, embodying a spirit of challenge that will become their approach to leadership throughout their professional lives. Students learn to pursue new ideas aggressively, to defy convention, and to lead through innovation. In addition, the program is shaped by its flexible curriculum, distinguished faculty, and strong connections with business in nearby Silicon Valley and the San Francisco Bay Area.

Students are marked by a unique blend of entrepreneurial drive and team spirit, underpinned by serious scholarship and a global outlook. With approximately 33 percent international students (evenly divided between Europe, Asia, and South America) and 30 percent women, the program reflects the diverse global environment in which its graduates will pursue their careers. The diverse student body of some 480 students represents more than 200 colleges and universities, 40 countries, and a wide range of academic and professional backgrounds.

The Haas School co-sponsors four concurrent-degree programs:

- MBA/JD with Berkeley Law or Hastings College of the Law;
- MBA/MPH in health services management with the School of Public Health; and
- MBA/MA in international and area studies.

Curriculum: Students in the full-time program must complete 51 semester units to graduate: 21 units of core required courses and 30 units of electives. Students who pass a waiver exam may replace core courses with electives. For a complete list of graduation requirements, visit the website. (<http://haas.berkeley.edu/MBA/academics/academic/graduation-requirements.html>)

Students outside the MBA Program may take courses on a space-available basis only. They should consult the Full-Time MBA Program office directly before attempting to register for courses.

Exchange Programs: The Haas School offers seven exchange programs with some of the finest business schools in Europe, Asia, and North America. The following schools participate: London Business School in Great Britain, L'Ecole des Hautes Etudes Commerciales (HEC) outside Paris, IESE in Barcelona, Hong Kong University of Science and Technology, and Columbia Business School in New York City. In addition, the Washington Campus Program in Washington, DC, and the MBA Enterprise Corps in emerging economies provide Berkeley students with opportunities to enhance their education.

Admission: Applications for the Full-Time MBA Program are accepted for fall entry only. Typically, the school receives 3,000-4,000 applications for about 240 positions in the entering class. The average age of entering students is 28 years and all have significant full-time business experience before entering the program.

We admit candidates with substantial professional experience and considerable leadership potential who come from a wide variety of industries and backgrounds. In addition, we seek candidates who will add to the richness of the classroom experience and participate actively in the Haas community.

Applicants are strongly urged to submit completed applications as early as possible. Applications are reviewed beginning in October and are evaluated in four decision periods, or rounds.

Career Center: The Career Center guides students through their career-planning process. Job search preparation includes workshops on interviewing, résumés, networking, and industry-specific informational sessions. Workshops are presented by Career Center staff and outside experts. On-campus recruitment opportunities include formal job interviews and informal opportunities to meet company representatives.

Campus Visits: The Haas School encourages prospective students to attend information sessions at Berkeley. Organized by first- and second-year students, these presentations cover life in the program from the student perspective. Information sessions are held daily at 1 p.m. throughout the academic year (September through mid-May, with the exception of school holidays). The sessions last approximately one hour. During a visit, prospective students may arrange to visit classes or request a no-host lunch and school tour with current students. For further information or to arrange for a classroom visit, call (510) 642-5610.

Off-Campus Information Sessions: The Full-Time MBA Program offers off-campus information sessions around the world during the autumn months. For a complete schedule, click here. (<http://mba.haas.berkeley.edu/events.html>)

Applications: Candidates should apply online through the Haas School of Business website. (<http://haas.berkeley.edu>) The online application is typically available in mid-August. Please read the application information carefully.

Evening & Weekend MBA Program

The Haas School of Business also offers the Berkeley MBA in a three-year program for working professionals who are seeking to add value to their academic backgrounds and professional experience while maintaining their current career momentum.

Students enter the program in the fall semester. They must have completed two prerequisite courses in mathematics and statistics or their equivalents before enrollment. Waiver examinations are also available. Admission criteria for the Evening & Weekend MBA Program are similar to those for the full-time program.

Students in the Evening & Weekend MBA Program must complete 42 units to graduate, including 18 units of required core courses, one unit for a Mid-Program Academic Retreat (MPAR), and 23 units of elective courses, including an experiential learning elective to fulfill the Berkeley Innovative Leader Development (BILD) curriculum requirement. Evening classes are held on the Berkeley campus Monday through Thursday from 6 p.m. to 9:30 p.m. Students attend classes two nights per week. Weekend classes are held Saturdays from 9 a.m. to 6 p.m. and alternate between Berkeley and a South Bay campus.

Applications: The Evening & Weekend MBA Program accepts applications online here. (<http://ewmba.haas.berkeley.edu/admissions/requirements.html>) For more information, please contact The Evening & Weekend MBA Program, Haas School of Business, University of California, Berkeley, #1906, Berkeley, CA 94720-1906. Phone (510) 642-0292. Website: ewmba.haas.berkeley.edu (<http://ewmba.haas.berkeley.edu>).

Master's of Financial Engineering Program

The Master's of Financial Engineering (MFE) degree is a full-time, one-year graduate degree offered by the Haas School of Business. Students enrolled in the MFE Program learn to use theoretical finance,

mathematics, and computer programming skills to make pricing, hedging, trading, and portfolio management decisions.

Admission is extremely competitive, with 60 students admitted annually. The program starts and ends during the spring semester, and applications are accepted only for spring enrollment. In addition to meeting the Berkeley Graduate Division admissions requirements, applicants should have solid backgrounds in advanced mathematics and computer programming. Most students admitted to the program have academic and work experience in engineering, finance, statistics, physics, economics, and computer science.

The MFE curriculum consists of 28 units of coursework taught over four terms of eight weeks each. Advanced courses cover topics in credit risk modeling, derivatives pricing, fixed income securities, bond portfolio management, equity and currency markets, corporate finance, dynamic asset management, arbitrage, hedging, futures and options pricing, trading, and dynamic investment strategies. An applied finance project of 1-3 units is also required for graduation. Credits and transfers from other universities and programs are not accepted.

Graduates of the MFE Program find positions in commercial and investment banking, insurance and reinsurance, corporate treasuries, corporate strategy, and money management. Specializations include risk management, asset/liability modeling/optimization, security structuring, derivative valuation and trading, consulting, asset management, research, option-based securities valuation, special hedging, and real-option investment analysis.

For complete admissions, curriculum, and program information, please visit the Master's of Financial Engineering Program's website at mfe.haas.berkeley.edu (<http://mfe.haas.berkeley.edu>).

The PhD Program

The PhD Program of the Haas School of Business is an advanced and scholarly course of study in the functioning of business and its interaction with the environment. It combines an in-depth examination of one or more of the traditional fields of study in business administration with a broader, integrative investigation of basic and applied theory in the social sciences and in quantitative methods. Fields of study include accounting, business and public policy, finance, marketing, operations management, management of organizations, and real estate.

The PhD Program trains men and women for careers in the research, study, and teaching of the sophisticated technical and theoretical disciplines underlying business administration. These skills have become mandatory for jobs in academia and are increasingly important in business and government, as well as in consulting, research, and technical advisory firms. Although some PhD graduates take positions as administrators in large companies, the Berkeley MBA Program at the Haas School is a more appropriate course of study for those seeking a professional degree in preparation for high-level administrative positions.

Graduates of the PhD Program enjoy excellent prospects for placement at the world's top academic institutions. In the best tradition of advanced scholarship, the Haas PhD Program offers a first-rate course of study in business functions and interactions with the social environment. The in-depth examination of one or more traditional fields of study combines with a broader, integrated investigation of basic and applied theory in the social sciences and quantitative methods. The program includes intensive formal courses as well as individually developed reviews of special

topics and research programs. Students work closely with the school's internationally known faculty, both in the classroom and independently.

Instruction in the program is separated into three general phases. The first encompasses formal coursework in basic and advanced subjects. The time devoted to these studies depends on a student's prior preparation, but generally requires two years. In the second phase, devoted to directed study, students work in close consultation with faculty members to prepare for research in their selected fields.

The final phase is individual research, when students undertake the work required for their dissertations. The second and third phases together usually require two to three years for completion. In addition to coursework, students without previous experience in either research or teaching will normally be expected to serve as either teaching or research assistants for one or more semesters.

Preparation for the PhD Program

Admission to the PhD Program is open to students with an accredited bachelor's degree, or higher, from any field. No preference in admission is given to any previous field of study or to applicants who have had some graduate training. Applicants should possess strong skills in writing and oral communications and have a basic understanding of differential calculus.

PhD applications will be evaluated on the basis of evidence of a high level of scholarly ability in both quantitative and qualitative skills, the motivation to complete a strenuous academic program, and a clear statement of career objectives that are consistent with the PhD degree.

Applications for the PhD Program can be found online via our website at haas.berkeley.edu/Phd (<http://haas.berkeley.edu/Phd>). You can also write to the PhD Program Office, Haas School of Business, University of California, Berkeley; 545 Student Services Bldg, #1900, 2220 Piedmont Avenue, Berkeley, CA 94720-1900.

Business Administration - MBA

Haas School of Business (<http://haas.berkeley.edu>)

Program Office: 430 Student Services Building #1902, (510) 642-1405

Executive Director: Stephanie Fujii, MBA
Program Website: Masters of Business Administration (<http://mba.haas.berkeley.edu>)

Overview

Business school is about developing you as a leader and teaching you fundamental business concepts. But the Berkeley MBA Program goes beyond that to offer you a special set of leadership skills that are extremely valuable in the global marketplace.

You will learn to become an innovative leader. Berkeley-Haas is uniquely positioned to deliver such leaders.

A General Management Education

Your Haas education is anchored in the fundamentals of general management, including the latest theories of and best practices in business – from accounting and finance to marketing and strategy. You learn to lead and manage an enterprise as a whole.

A Rigorous Curriculum

The Haas curriculum (<http://mba.haas.berkeley.edu/academics/curriculum.html>) provides you with a basic framework of qualitative, quantitative, analytical, strategic, and problem solving skills. It's rooted in the scientific disciplines of the university – economics, mathematics, social sciences such as psychology and sociology, and other areas.

Faculty Experts

Faculty members who are experts in these fields apply them toward increasing our knowledge of successful management, leadership, human behavior, organizational performance, and economic and market functions.

A Deeper Understanding

You not only gain knowledge about best business practices, but also learn about the fundamental principles behind them – the "how" and the "why." The Berkeley MBA program will make you think deeply and expand your understanding of the world.

A Leader Archetype in Sync with the Times

The goal of the Berkeley MBA Program is to develop you as an innovative leader. And a unique aspect of the Berkeley MBA innovative leadership approach is the conscious use of Haas School culture to shape how and what you learn.

An Innovative Leader

We define this leadership archetype as an individual who drives growth by putting new ideas into action in every corner and every function of his or her organization, and who does so responsibly. Leaders of this kind define what's next, for our markets and for our societies.

Whether it is producing more fuel-efficient autos or creating new business processes, innovative leaders are the ones who will create opportunity from the major challenges facing the world.

Berkeley-Haas has been producing such leaders for many years. The school's unique curriculum has been specifically tailored to deliver this kind of leader even more effectively.

A Supportive Culture and Environment

The school's distinct culture is marked by four defining principles (<http://haas.berkeley.edu/strategicplan/culture>), which are emphasized in the admissions process and actively integrated into the MBA curriculum. They are:

- *Question the Status Quo*
- *Confidence Without Attitude*
- *Students Always*
- *Beyond Yourself*

The defining principles are heavily influenced by the school's location in the San Francisco Bay Area – the world's epicenter for innovation and entrepreneurship. And the principles are shaped by the culture of UC Berkeley, a world-class research generator with a legendary atmosphere of fresh thinking.

Degree Requirements

The MBA program requires completion of 51 semester units of coursework: 12 core courses (<http://mba.haas.berkeley.edu/academics/core.html>), an applied innovation requirement (<http://mba.haas.berkeley.edu/academics/experiential-learning.html>), and

elective courses (<http://mba.haas.berkeley.edu/academics/elective.html>). To qualify, you must register and pay fees for both fall and spring semesters in each academic year (a total of four 15-week semesters); there are no courses offered during the summer.

Core Requirements

The core (<http://mba.haas.berkeley.edu/academics/core.html>) consists of 12 courses. All must be taken in the first year to provide the foundation for the second year's advanced work.

Applied Innovation Requirement

As part of the applied innovation requirement (<http://mba.haas.berkeley.edu/academics/experiential-learning.html>), students participate in a team performance module. Students may take these courses as early as the spring of their first year.

Elective Courses

Students may select from hundreds of elective courses (<http://mba.haas.berkeley.edu/academics/elective.html>), both within and outside of the business school, to fulfill the remainder of their 51-unit requirement. Up to six units may be taken as either graduate or upper-division undergraduate courses in other departments on campus; all other elective course units must be taken in graduate business classes. With the permission of the MBA program director, students may take two lower-division undergraduate language courses and apply 60% of the credits earned toward the elective unit requirement.

Waiver Examinations

Students may substitute elective courses (<http://mba.haas.berkeley.edu/academics/elective.html>) for certain required courses if they demonstrate sufficient mastery of the subject by passing a waiver examination, which approximates the course final examination. These exams are available for six of the 12 required core courses, and are given during the week before classes begin in August and January. Short study guides are available for each course.

Business Administration - PhD

Haas School of Business (<http://www.haas.berkeley.edu>)

Program Office: 545 Student Services Building, (510) 642-1409 or (510) 642-3944

Program Director: Martin Lettau, PhD
Program Website: PhD in Business Administration (<http://haas.berkeley.edu/Phd>)

Overview

The Berkeley-Haas PhD Program offers seven fields of academic study, for a curriculum of unusual richness and breadth. Since the program enrolls only 14 to 16 new PhD students each year, you work very closely with the faculty members in their chosen specialties. This strong partnership, combined with the high intellectual caliber and diverse academic and cultural backgrounds of PhD students, creates an atmosphere of close cooperation and intellectual excitement.

Program of Instruction

The Berkeley-Haas PhD Program is strongly oriented toward discipline and research. Emphasis is placed on preparing you to evaluate the

state of knowledge in your particular field and to advance it through the application of theory from the social sciences, mathematics, or statistics.

Upon applying to the program, you are required to choose a field of study, which will not only determine your coursework, but also focus your future employment opportunities. You may choose from the following seven fields:

- Accounting (<http://haas.berkeley.edu/Phd/academics/accounting>)
- Business and Public Policy (<http://haas.berkeley.edu/Phd/academics/bpp>)
- Finance (<http://haas.berkeley.edu/Phd/academics/finance>)
- Marketing (<http://haas.berkeley.edu/Phd/academics/marketing>)
- Operations Management (<http://haas.berkeley.edu/Phd/academics/oitm>)
- Management of Organizations (<http://haas.berkeley.edu/Phd/academics/management>)
- Real Estate (<http://haas.berkeley.edu/Phd/academics/realestate>)

Instruction in the program is separated into three general phases. The first encompasses formal coursework in basic and advanced subjects and generally requires two years. The second and third phases together usually require two to three years for completion. In addition to coursework, students are normally expected to serve as either teaching or research assistants for one or more semesters.

Curriculum

Instruction in the program is separated into three general phases. The first encompasses formal coursework in basic and advanced subjects. The time devoted to these studies depends on prior preparation, but generally requires two years. Students are usually required to complete two semester courses in each of the following areas:

Common Core Courses

The subjects in the common core of knowledge encompass economic theory and basic quantitative methodology. The economic theory requirement calls for a strong grounding in the principles of this field at the intermediate level. This may be achieved through the completion of graduate-level micro- and macro-economic theory courses in the Department of Economics. The quantitative methodology requirement calls for training in calculus, linear algebra, mathematical modeling, and intermediate statistics. Typically, graduate courses in the departments of Statistics and Mathematics are used to fulfill this requirement. Certain fields, such as accounting and finance, prescribe more advanced work in the quantitative area, much of which must be taken in the departments of Statistics and Mathematics. Core courses taken at Berkeley must be passed with a minimum grade of B+.

Fields of Study Courses

Fields of study provide PhD students with at least eight semester units in advanced courses. Additional work may include courses in the business school but often involves developing research skills in theory and methodology through other departments at UC Berkeley. In consultation with their advisers, students may choose from a wide range of courses in such disciplines as economics, statistics, engineering, and psychology. On completion of this coursework, usually at the end of their second year of study, doctoral students take a written preliminary examination, graded by faculty within the student's chosen field.

Basic Discipline Courses

In addition to the field of study, students choose a basic discipline from a department outside the business school, such as economics, psychology, sociology, or political science. The development of analytic skills in one of several disciplines gives students the depth they need to place their training within a fuller and more unified understanding of the world of business and research.

Research Strategy Courses

Unless similar work has been taken elsewhere, students must take either Research and Theory in Business: Economics and Management Science (PHDBA 297A) or Research and Theory in Business: Behavioral Science (PHDBA 297B). The first focuses on normative models of decision making, while the latter examines research methodology in behavioral sciences. For a formal description of these courses, please refer to the course listings. In addition, students are generally expected to take further work of their own choosing in research methodologies. This work may take the form of intermediate or advanced statistical courses in psychology, statistics, or economics. In the third year of their studies, doctoral students take another methods course through the business school.

The first phase ends with the preliminary exam. The second and third phases together usually require two to three years for completion. In addition to coursework, students are normally expected to serve as either teaching or research assistants for one or more semesters.

Business Administration - Undergraduate

Please see the main Business Administration page (p. 61) for program and degree requirements.

Catalan

Please see the Spanish and Portuguese Department (p. 204) for program and degree requirements.

Celtic Studies

College of Letters and Science (<http://biophysics.berkeley.edu>)

Program Office: 6303 Dwinelle Hall, (510) 642-4661

Director: Eve Sweetser, PhD (Department of Linguistics)

Program Website: Celtic Studies (<http://ls.berkeley.edu/dept/celtic>)

Overview

The program in Celtic Studies is designed to give students both a broad understanding of the place of Celtic languages and cultures in the world and a firm grounding in one or more of the Celtic languages. In addition to at least three semesters of language study and the other major requirements, students will be required to organize their studies with reference to one other methodological or disciplinary area chosen from anthropology, art history, comparative literature, linguistics, history, rhetoric, Scandinavian, or another language and literature. Some students

may find it advantageous to declare a minor in one of the language departments that offers it. Students interested in the major should consult the student services adviser at the Celtic Program's office in 6303 Dwinelle Hall.

Major Requirements

Lower Division (12 units)

Celtic Studies 70 (survey course, The World of the Celts) plus two semester courses from the following course sequences: 15 and 85 (Irish) or 16 and 86 (Welsh), or the equivalent. Students with prior knowledge of a Celtic language may apply for Credit by Examination.

Upper Division (32 units)

- One culture, an Irish literature, and a mythology course from each sequence: 128 or 129, 138 or 139, and C168 or 169* (12 units).
- One semester of upper-division language from: 102A, 102B, 105A, 105B, 144A, 145A, 146A (4 units).

Note: One third-year course is taken following either the 15 & 85 (Irish) or 16 & 86 (Welsh) sequence.

- Two Medieval or modern literature courses chosen from: 118A*, 118B*, 119A, 119B, 125, 126*, or Comparative Literature 152A or 165 Medieval or Arthurian literature courses (8 units).
- *Electives (2 courses, 8 units minimum)* chosen from any of the following: Celtic Studies 161*, 169*, 170, 171, 173 or Celtic Studies courses not used in fulfillment of other major requirements; history, mythology, and folklore from Scandinavian 123, C160, and 165, outside electives with prior approval of the Student Services Advisor.

*Infrequently offered

Honors Program

In order for students to graduate with honors in Celtic studies, they must have achieved an overall GPA of 3.3 or higher in all work completed at the University and a minimum 3.5 GPA in all courses required for the major. Enrollment is required in Celtic Studies H195A-B, the Honors course sequence, culminating in a written honors thesis.

Minor in Celtic Studies (24 units)

Students in the College of Letters and Science may complete one or more minors of their choice, normally in a field both academically and administratively distinct from their major. The minor in Celtic Studies requires:

Lower Division (4 units)

Celtic Studies 70 (The World of the Celts)

Upper Division (20 units)

Five upper division courses chosen from the major course listings and approved by the student services adviser. All upper division courses applied to the minor must be completed on a letter-graded basis; at least three of the five courses must be completed at UC Berkeley, and a minimum overall grade point average (GPA) of 2.0 is required in the upper division courses.

Students interested in the minor should consult the student services adviser at the Celtic Program's office in 6303 Dwinelle Hall.

Education Abroad

The University offers students the opportunity to study abroad in the Republic of Ireland, England, Scotland, Wales, and Northern Ireland. These programs feature language study along with courses in culture, history, literature, and many other areas within the humanities and social sciences. Up to 3 courses or 12 units may be applied toward language and upper division credit in the major and 1 courses (4 units) for the minor with advance approval of the student services adviser. Details of the programs are available from Berkeley Programs for Study Abroad, 160 Stephens Hall, (510) 642-1356; or on the Study Abroad website. (<http://studyabroad.berkeley.edu>)

Graduate Studies

Although no graduate degrees in Celtic Studies are offered at present, it is possible to pursue research in Celtic languages, literature, history, anthropology, etc., in a variety of departments. Dissertations on Celtic subjects have been accepted in the Departments of Comparative Literature, History, Linguistics, Rhetoric, English, French, and Anthropology, and in the Folklore Program.

Chemical and Biomolecular Engineering

College of Chemistry (<http://chemistry.berkeley.edu>)

Department Office: 201 Gilman Hall, (510) 642-2291

Chair: Jeffrey A. Reimer, PhD

Department Website: Chemical and Biomolecular Engineering (<http://cheme.berkeley.edu>)

Chemical Engineering Major

The College of Chemistry offers a major in chemical engineering leading to the BS degree. The program equips the student for professional work in development, design, and operation of chemical processes and of process equipment. Students with high scholastic attainment are well prepared to enter graduate programs. The curriculum is accredited by the Accreditation Board for Engineering and Technology.

Degree Requirements

1. A total of 120 semester units
2. Mathematics 1A, 1B, 53, 54
3. Physics 7A, 7B
4. Chemistry 4A, 4B, 112A, 120A or Physics 137A
5. Chemical Engineering 140, 141, 142, 150A, 150B, 154, 160, 162
6. Engineering 7, 45
7. Electrical Engineering 40
8. Biology 1A
9. An engineering elective

Additional technical courses are required to complete either the open elective program or one of the concentrations within the chemical engineering program. Students must satisfy the Entry-level Writing, the American History and Institutions, and the American Cultures Breadth requirements. Nineteen units in reading and composition, humanities, and social sciences are required to fulfill the breadth requirement.

For further information on degree requirements, please see the department website (http://chemistry.berkeley.edu/student_info/undergrad_info/degree_programs/cheme_major).

Undergraduate Research

Students are encouraged to participate in individual undergraduate research in collaboration with one of the faculty during their junior or senior year.

Joint Major Programs with the College of Engineering

Two joint major programs involving the Colleges of Engineering and Chemistry are offered:

- Chemical Engineering/Materials Science and Engineering
- Chemical Engineering/Nuclear Engineering

These joint majors include the core courses in both departments. Details on the course requirements can be found on the College of Chemistry web site (http://chemistry.berkeley.edu/student_info/undergrad_info/degree_programs/cheme_major/joint_major_programs.php) and in the *College of Engineering Announcement: A Guide to Undergraduate and Graduate Study*.

Intercollegiate Transfers

Transfer applicants are expected to complete, at a minimum, courses equivalent to Chemistry 1A/L-1B, Mathematics 1A-1B, Physics 7A (calculus-based mechanics and wave motion), English R1A, and two additional courses toward the major before transfer. Additional chemistry, mathematics, calculus-based physics, engineering, computer programming using MATLAB, and some biology is encouraged.

Coursework taken the summer before enrollment at Berkeley is not considered in the selection of applicants.

Chemical Engineering Minor

A minor in chemical engineering will be awarded to students who have successfully completed five upper division chemical engineering courses as follows: 140, 141, and 150A plus any two courses selected from 142, 150B, 162, 170A, 170B, 171, 176, C178, or 179. Students who have completed courses in other departments at Berkeley that are essentially equivalent to 141 and 150A can substitute other courses from the above list. At least three of the five courses taken for the minor must be taken at Berkeley. All courses taken for the minor must be taken for a letter grade. Students must achieve at least a 2.0 GPA in the courses taken for the minor for both of the following: (1) courses taken at Berkeley and (2) courses taken at another institution and accepted by the College of Chemistry as equivalent to courses at Berkeley. For the minor to be awarded, students must submit a notification of completion of the minor to the College of Chemistry Undergraduate Advising Office.

Note: Consult with your college or school for information on rules regarding overlap of courses between majors and minors.

Graduate Programs

Students interested in graduate study are invited to visit the department's website (http://cheme.berkeley.edu/grad_info) for more information.

Chemistry (College of)

College of Chemistry (<http://chemistry.berkeley.edu>)

Office of the Dean: 420 Latimer Hall

Dean: Douglas S. Clark, PhD

College Website: College of Chemistry (<http://chemistry.berkeley.edu>)

Overview

The College of Chemistry comprises two departments, the Department of Chemical and Biomolecular Engineering (p. 66) and the Department of Chemistry (p. 68). Both disciplines impact major world problems. Discovering new sources of energy, recovering and utilizing dwindling mineral resources, developing new drugs and food supplies, understanding and protecting the environment, and synthesizing new products biochemically all depend centrally upon chemistry and chemical engineering. Students entering these fields will spend their careers in the middle of the action on these and other highly important areas of research.

Both departments in the College of Chemistry rank nationally and internationally among the most prominent in their fields, and both are renowned for their breadth of activity in a diverse range of sub-disciplines and applications. At the same time, with only two departments, the college is a relatively small and comfortable place in which to work. Faculty members have many demands on their time, but students are able to develop close and satisfying contacts with them while in the college.

The college offers programs leading to the BS, MS, and PhD degrees in both chemistry and chemical engineering and the BS degree in chemical biology. The BS degree in chemistry is intended for students who are primarily interested in careers as professional chemists or wish a thorough grounding in chemistry in preparation for professional or graduate school. The BS degree in chemical biology is intended for students who are interested in careers as professional chemists, or in the biological sciences, including the biomedical, biotechnology, and pharmaceutical industries. The BS degree in chemical engineering is intended as preparation for a career in chemical engineering and related disciplines. Chemical engineering majors may choose one of five concentrations: applied physical science, biotechnology, chemical processing, environmental technology, or materials science and technology. Also, two BS degree joint major programs (Chemical Engineering and Materials Science and Engineering, and Chemical Engineering and Nuclear Engineering) are available.

The College of Letters and Science offers a chemistry major leading to a BA degree through a curriculum with a greater proportion of courses in the humanities and social sciences than is included in the BS chemistry program. It is intended for students interested in careers in teaching, medicine, or other sciences in which a basic understanding of chemical processes is necessary.

Advanced undergraduate and graduate students have opportunities to conduct research in analytical chemistry, molecular structure and dynamics, inorganic chemistry, theoretical chemistry, nuclear chemistry, organic chemistry, biophysical chemistry and chemical biology, condensed matter and surface science, catalysis, biomolecular engineering and synthetic biology, multiscale modeling and computer

simulation, micro- and nanosystems and technologies, and polymers and polymer physics.

Recommended high school preparation for chemistry, chemical biology, or chemical engineering should include chemistry (one year; AP chemistry strongly recommended); physics (one year); mathematics (four years, including trigonometry, intermediate algebra, analytical geometry, and pre-calculus); and a foreign language (two or three years).

For more specific descriptions of the degree programs, please see the College of Chemistry website (<http://chemistry.berkeley.edu>). (<http://chemistry.berkeley.edu>)

Chemistry Major in the College of Chemistry (BS Degree)

The requirements for a BS degree in the College of Chemistry, with a chemistry major, are: A total of 120 semester units; Mathematics 1A, 1B, 53, 54; Physics 7A, 7B; Chemistry 4A, 4B, 104A, 104B, 112A, 112B, 120A, 120B, 125, and a choice of 105, 108, 115, or 146. In addition to these specified courses, the BS chemistry major consists of 15 units of advanced study in chemistry and related fields, including at least one lecture course in chemistry. These courses permit the student to emphasize chemistry in areas of personal interest or to specialize in related fields, such as physics, biology, geology, mathematics, materials science, or nuclear science.

The Materials Chemistry concentration within the Chemistry major requires Chemistry C150, two chemistry laboratory courses (105 or 125, plus 108 or 115), and 10 units of upper division electives. These courses are taken in place of the following upper division Chemistry requirements: Chemistry 125; Chemistry 105, 108, 115, or 146; and 15 units of advanced study in chemistry and related fields.

The following requirements must also be satisfied: Entry-level Writing; American History and Institutions; American Cultures; a second-semester foreign language course or equivalent; and the 15 unit breadth requirement, which includes courses in reading and composition (English R1A and R1B or equivalent), humanities, and social sciences.

Chemical Biology Major

The requirements for a BS degree in Chemical Biology are as follows: A total of 120 semester units; Mathematics 1A, 1B, 53, 54; Physics 7A, 7B (8A, 8B may be taken in place of 7A, 7B, but 7A, 7B are recommended); Biology 1A and 1AL; Chemistry 4A, 4B, 103, C110L, 112A, 112B, 120A, 120B, 135, and one of 105, 125, C170L, or C182; Molecular and Cell Biology 110. In addition to these specified courses, the BS chemical biology major requires 7 units of advanced study in chemistry and related fields, including at least one lecture course in chemistry.

The following requirements must also be satisfied: Entry-Level Writing; American History and Institutions; American Cultures; a second-semester foreign language course or equivalent; and the 15 unit breadth requirement, which includes courses in reading and composition (English R1A and R1B or equivalent), humanities, and social sciences.

Undergraduate Research

Students are encouraged to participate in individual undergraduate research in collaboration with one of the faculty during their junior or senior year.

Intercollegiate Transfers

Transfer applicants are expected to complete, at a minimum, courses equivalent to Chemistry 1A-1B, Mathematics 1A-1B, Physics 7A (Physics 7A or 8A for chemical biology majors), English R1A-R1B, and two additional courses toward the major before transfer. In addition, completion of additional chemistry, mathematics, calculus-based physics, and some biology is encouraged. Chemistry and chemical biology majors who transfer without having covered quantitative analysis are required to take a quantitative analysis course after transfer. Coursework taken the summer before enrollment at UC Berkeley is not considered in the selection of applicants.

Chemistry Major in the College of Letters and Science (BA Degree)

The requirements are: Mathematics: 1A, 1B, 53, 54. Physics: 7A, 7B. Chemistry: 4A, 4B, 104A, 104B (103 and 135 may be taken in place of 104A, 104B), 112A, 112B, 120A, 120B, and a choice of one of the following: 105, 108, 115, 125, C170L, or C182.

Honors at Graduation for a BA Degree

To be eligible to receive honors in Chemistry at graduation, candidates for the BA degree must earn a grade point average (GPA) of at least 3.5 in upper division courses in the major and at least 3.3 overall at Berkeley; and complete at least three units of Chemistry H194 or another advanced chemistry course as approved by the department.

Chemistry Minor in the College of Chemistry

Note: The Chemistry minor is not available to Chemical Biology majors.

A minor in Chemistry will be awarded to students who have successfully completed one year of organic chemistry (3A plus 3AL and 3B plus 3BL or 112A-112B or equivalent), one year of physical chemistry taken at Berkeley (120A-120B, or C130 and 130B), and two additional upper division chemistry courses taken at Berkeley (with the exception of courses numbered 190-199). All of the courses taken for the minor must be taken for a letter grade. Students must achieve at least a 2.0 GPA in the courses taken for the minor for each of the following: upper division

courses, courses taken at Berkeley, and organic chemistry courses if taken at another institution and accepted by the College of Chemistry as equivalent to 3A plus 3AL, 3B plus 3BL, 112A, or 112B. For the minor to be awarded, students must submit a notification of completion of the minor to the College of Chemistry Undergraduate Advising Office.

Please consult with your college or school for information on rules regarding overlap of courses between majors and minors.

California Teaching Credential

For information concerning the California Teaching credential (Single or Multiple Subject), see the Graduate School of Education's *Guide to Graduate Studies*.

Graduate Programs

Students interested in graduate study are invited to visit the department's website (http://chem.berkeley.edu/grad_info) for more information.

Chicano Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Program Office: 506 Barrows Hall, (510) 643-0796

Department of Ethnic Studies Chair: Catherine Ceniza Choy, PhD

Department Website: Department of Ethnic Studies (<http://ethnicstudies.berkeley.edu>)

Program Website: Chicano/Latino Studies (<http://ethnicstudies.berkeley.edu/programs/cls.php>)

Overview

The Chicano studies major offers an interdisciplinary curriculum of academic study that critically examines the historical and contemporary experiences of people of Mexican descent in the context of American society and institutions. Moreover, in light of continuous immigration from Mexico, and now Central America, the Chicano studies major curriculum includes the study of particular aspects of Mexican history, culture and politics as they bear upon the Chicano community, past and present. Emphasis is given in the major to the student developing a broad knowledge of the Chicano experience. Thus, the major stresses the analysis of the interrelationships in the historical background, cultural patterns, and artistic expression of the Chicano community in order to acquire a well-rounded, in-depth understanding of the contemporary interface between Chicanos and American society. In this connection, the major strives to incorporate various disciplines in its approach, such as political science, sociology, anthropology, history, literary criticism, and art. Through the interdisciplinary nature of our curriculum, the major is aimed at preparing students for incorporation into the world of work and for a wide range of advanced graduate work and/or professional training in various fields.

Major Requirements

Lower Division

- Ethnic Studies 10AC and 11AC
- Completion of two courses from Chicano Studies 20, 40, 50, or 70.

Upper Division

- Ethnic Studies 101A, 101B, and 103
- Completion of four elective courses from Chicano Studies 101, 110, 130, 133, 135A, 135B, 135C, 141, 142, 143, 145, 148, 149, 150A, 150B, 159, C161, 163, 165, 172, 174, 176, 179, 180, 180AC, or an approved course from another department
- Chicano Studies 197 (4 units total).

Honors Program

The Chicano Studies program provides an option leading to the AB degree with honors. Students must have junior standing; a 3.5 University GPA; and a 3.5 GPA in the major. The honors thesis consists of a 6-unit research project. The faculty will establish criteria and grade the project. For more information, see the Chicano Studies adviser in 532 Barrows Hall.

Minor Requirements

Completion of five courses from Chicano Studies 101, 110, 130, 133, 135A, 135B, 135C, 141, 142, 143, 145, 148, 149, 150A, 150B, 159, C161, 163, 165, 172, 174, 176, 179, 180, 180AC. Students may also use one approved course from another department or EAP.

Chinese

Please see the East Asian Languages and Cultures department (p. 86) for program and degree requirements.

City and Regional Planning

College of Environmental Design (<http://ced.berkeley.edu>)

Department Office: 228 Wurster Hall, (510) 642-3256

Department Website: City and Regional Planning (<http://dcrp.ced.berkeley.edu>)

Overview

The mission of the Department of City and Regional Planning is to improve equity, the economy and the environment in neighborhoods, communities, cities, and metropolitan regions by creating knowledge and engagement through our teaching, research and service. We aim to design and create cities, infrastructure, and public services that are sustainable, affordable, enjoyable, and accessible to all.

Wisely and successfully intervening in the public realm, whether locally, nationally, or globally, is a challenge. Our urban future is complex and rapidly changing. Resource scarcity and conflict, technological innovation, retrofitting of existing built environments, and social empowerment will alter the ways in which planning has conventionally been carried out. We believe the planning academy has a special responsibility to always address social justice, equity, and ethics; to teach and research means of public participation, collective decision making, and advocacy; and to

focus on reforming institutions, urban governance, policy and planning practices to make these goals possible.

Urban Studies Major

The undergraduate major in urban studies introduces interested students to cities and urban environments as objects of study, analysis, criticism, and planned transformation. The major has a core in urban studies and planning with courses in city planning and environmental design, and an interdisciplinary curriculum in various urban-related social science fields and disciplines.

City and Regional Planning Minor

The Department of City and Regional Planning offers an interdisciplinary minor in city planning that is open to students in all majors. The minor trains students in the study and analysis of urban environments and teaches them about the practices, policies, and politics that constitute the field of urban planning.

Graduate Programs

The Master of City Planning Degree

The two-year Master of City Planning (MCP) program comprises a solid core of knowledge in the field of city and regional planning—including history and theory, planning methods, urban economics, and urban institutions analysis—and an opportunity to specialize in one of four concentration areas: housing, community, and economic development; environmental planning and policy and healthy cities; transportation policy and planning; and urban design.

The MCP degree requires the completion of 48 units of coursework during four consecutive semesters in residence. Unless they already have equivalent work experience, students must also complete a three-month internship. The terminal MCP requirement, undertaken during the second year of study, takes the form of a professional report or a client report. Alternatively, some elect to write a master's thesis.

The Department of City and Regional Planning participates in concurrent master's degree programs with the Departments of Architecture, Landscape Architecture and Environmental Planning, Civil and Environmental Engineering, and Public Health; and with UC Berkeley School of Law, UC Hastings College of the Law, and International and Area Studies.

The Doctor of Philosophy Degree in City and Regional Planning

The PhD in City and Regional Planning at Berkeley provides training in urban and planning theory, advanced research, and the practice of planning. Alumni of the program have established national and international reputations as planning educators, social science researchers and theorists, policy makers and practitioners. Today the program is served by nearly 20 City and Regional Planning faculty with expertise in community and economic development, transportation planning, urban design, international development, environmental planning, and global urbanism. With close ties to numerous research centers and initiatives, the program encourages its students to develop specializations within the field of urban studies and planning and to expand their intellectual horizons through training in the related fields of Architecture, Landscape Architecture & Environmental Planning, Civil

Engineering, Anthropology, Geography, Sociology, Public Policy, Public Health, and Political Science.

Each student's program of study is individually designed with the assistance and support of a faculty adviser, in accordance with the student's specific intellectual interests and prior preparation. PhD students are required to complete an outside field requirement (in another department) and an inside field requirement in city and regional planning before taking their oral exams and undertaking their dissertation research. The normative time in the program is five years.

Civil and Environmental Engineering

College of Engineering (<http://coe.berkeley.edu>)

Department Office: 760 Davis Hall #1710, (510) 642-3261

Chair: Samer Madanat, PhD

Department Website: Civil and Environmental Engineering (<http://ce.berkeley.edu>)

Overview

The mission of the Department of Civil and Environmental Engineering at UC Berkeley is to serve as the world's academic leader in civil and environmental engineering, defining the evolving domains of the field through teaching and scholarly research. The department educates undergraduate and graduate students to be knowledgeable, forward-thinking, and ethical professionals, so that they may pursue careers characterized by leadership and innovation. The faculty values professional and public service, and through research, seeks scientific and technological advances that address critical societal needs.

For more information, see the *College of Engineering Announcement: A Guide to Undergraduate and Graduate Study* (<http://coe.berkeley.edu/guide>).

Undergraduate Program

Within the context of this broad objective, the Bachelor's of Science (BS) degree program provides a solid foundation in the scientific and engineering fundamentals along with exposure to humanities and social sciences. This foundation is essential for solving societal problems in the areas of public safety, resource protection, natural hazard mitigation, and the efficient functioning of urban and natural systems within the United States and worldwide.

The four-year undergraduate curriculum leading to the BS degree provides an education that is sufficiently comprehensive for students who wish to embark on a professional career directly after graduation and keep abreast of new developments in civil engineering practice. The program also serves as a preparation for graduate study in any of the specialized branches of civil and environmental engineering. The BS program in civil engineering is accredited by the Engineering Accreditation Commission of the ABET, Inc. (<http://www.abet.org/accreditation>)

Major Requirements

The undergraduate curriculum provides a broad general education in civil engineering. In addition, students with a specific interest within civil

and environmental engineering may select an optional area of emphasis in Engineering and Project Management; Environmental Engineering; Geoengineering; Structural Engineering, Mechanics and Materials; or Transportation Engineering.

Students must complete a minimum of 120 units, in which they must satisfy the University of California and Berkeley campus requirements outlined in the *Berkeley Bulletin*. In addition, students must complete the requirements for the College of Engineering and the civil engineering program. Full details on these requirements can be found in the *College of Engineering Announcement: A Guide to Undergraduate and Graduate Study* (<http://coe.berkeley.edu/guide>). Please also see our optional areas of emphasis in the announcement for suggested programs of study.

Minor Requirements

The department offers three minors in structural engineering, geoengineering, and environmental engineering. The structural engineering minor is designed particularly for students in the Department of Architecture but is also available to any student who has met the prerequisites and who is enrolled in a non-civil and environmental engineering program. The environmental engineering minor is primarily for students majoring in physical, mathematical, social, or biological sciences but is open to non-civil and environmental engineering students. For details, contact the Civil and Environmental Engineering Academic Affairs Office, 750 Davis Hall, (510) 643-6640.

Graduate Program

The Department of Civil and Environmental Engineering is comprised of the following graduate programs: Engineering and Project Management; Environmental Engineering; Geoengineering; Structural Engineering, Mechanics and Materials (SEMM); and Transportation Engineering. The Civil Systems program and the Energy, Civil Infrastructure and Climate program are cross-disciplinary and span the other programs. Students may pursue the academic degrees of MS and PhD, and the professional degree of MEng. The MS program normally lasts one year and the MEng program, two years; the doctoral program requires at least two years after the attainment of a master's degree and includes a dissertation or an equivalent design project. The department also offers programs leading to dual degrees in the following areas: (1) MS in Engineering and Master of Architecture (SEMM and the Department of Architecture), (2) MS in Engineering and Master of City Planning (Transportation and the Department of City and Regional Planning), and (3) MS in Engineering and Master of Public Policy (Environmental and the School of Public Policy).

The Department of Civil and Environmental Engineering includes the following areas of professional specialization:

- **Civil systems:** Civil systems integrates engineering, science, and management tools and techniques for solving complex civil and environmental engineering problems. To understand the interdisciplinary nature and many scales of civil and environmental engineering problems, students take courses in technical tools (e.g., information management, control, modeling) and human dimensions (e.g., economics, public policy, management, city and regional planning), in addition to deepening and expanding their fundamental knowledge base in engineering and science as applied to the physical world.
- **Energy, Civil Infrastructure, and Climate:** This graduate program focuses on the application of engineering, environmental, economic,

and management principles to the analysis and improvement of civil infrastructure from the perspective of energy and climate impacts. Example focus areas include energy efficiency of buildings, environmentally-informed design and operation of transportation systems, embodied energy of construction materials, biofuels, and adaptation of infrastructure to a changing climate.

- **Engineering and project management:** Engineering and project management deals with planning, organizing, leading, constructing, designing, operating, and financing projects during the life cycle of civil engineered systems. This program is concerned with the fundamental principles and knowledge that underlie management and leadership, human organizational factors, quality and reliability assessments, life cycle engineering and management processes, engineering and the environment, construction engineering and management, and implementation processes and strategies.
- **Environmental engineering:** Environmental engineering involves the application of science and technology to manage environmental resources and prevent or limit environmental degradation. Specific subject areas include water and air quality engineering, hazardous waste management, ecological engineering, hydrology and water resources management, and environmental fluid mechanics.
- **Geoengineering:** Geoengineering is concerned with planning, design, and construction on, in, or with soil and rock, and with protection and enhancement of the environment. It includes the fields of soil mechanics, foundation engineering, geological engineering, rock mechanics, environmental geotechnics, groundwater, and geotechnical aspects of earthquake engineering. Also included is the field of engineering geosciences which adds geophysics, reservoir modeling, and petroleum engineering.
- **Structural engineering, mechanics, and materials:** Structural engineering, mechanics, and materials consists of several emphases. Structural engineering is concerned with the analysis and design of all types of structures, including earthquake-resistant design. Structural mechanics employs the disciplines of applied mathematics and the engineering sciences to examine a wide range of problems in the behavior of structural elements and systems, and to investigate the mathematical description of properties. Structural materials engineering is concerned with the development of construction materials for engineering projects, such as mechanical and thermal response, microstructure behavior and durability. Structural materials include steel, concrete, aluminum alloys, timber, plastic, and composite materials.
- **Transportation engineering:** Transportation engineering is concerned with the planning, design, construction, operation, performance, evaluation, maintenance, and rehabilitation of transportation systems and facilities, such as highways, railroads, urban transit, air transportation, logistic supply systems and their terminals.

For more details, please consult the *College of Engineering Announcement: A Guide to Undergraduate and Graduate Study* (<http://coe.berkeley.edu/students/guide>) or contact the department's Academic Affairs Office in 750 Davis Hall, (510) 643-6640.

Note: In addition to the courses listed on the courses tab, the Department of Civil and Environmental Engineering offers the following courses, found in the Engineering section of this bulletin (p. 567): ENG 7, Introduction to Computer Programming for Scientists and Engineers, and ENG 10, Engineering Design and Analysis.

Classics

College of Letters and Science (<http://ls.berkeley.edu>)

Related Course Descriptions:

Greek courses (p. 722)

Latin courses (p. 909)

Overview

The Department of Classics offers a complete undergraduate and graduate program in Greek and Latin languages, literatures, and civilizations. It groups its courses of instruction under the headings of Greek, Latin, and Classics. The object of the Greek and Latin courses is to teach undergraduates to read major works of ancient literature in the original languages and to give a general understanding of the achievements of classical civilization. The purpose of the Classics undergraduate courses is to provide instruction in Greek and Roman civilization in all its aspects—literature (read in translation), philosophy, mythology, religion, social and political life and archaeology. The latter courses require no knowledge of Greek and Latin. The graduate courses, all of which are designated Classics, are advanced courses in Greek, Latin, and classical archaeology, and require knowledge of both languages.

Majors

The Department of Classics offers four undergraduate majors: Greek, Latin, classical languages, and classical civilizations. Students considering any of these majors should consult with the departmental undergraduate adviser as early as possible.

Major in Classical Civilizations

Lists of courses approved to meet the requirements described below are available from the departmental office and on the website.

1. **Prerequisites:** Classics 10A and 10B (L&S R44 may be substituted for one but not both).
2. **Lower Division Requirements:** Any two lower division courses in the Classics department (not including Classics 24), or courses from a selected list of courses in other departments. Go to the Classics Department website (<http://www.classics.berkeley.edu>) for a list of acceptable courses.
3. **Area of Concentration:** Five courses (at least three must be in the Classics department) in one of the following areas of concentration: Classical Art and Archaeology (five upper division courses from a list of selected courses), Classical History and Culture (five upper division courses from a list of selected courses), Greek Language (five Greek courses including up to two lower division), Latin Language (five Latin courses including up to two lower division). Go to the Classics website (<http://www.classics.berkeley.edu>) for a list of acceptable courses.

4. **Area of Breadth:** Two courses from any combination of upper and lower division offerings in a non-Greco-Roman pre-industrial culture (please consult with the Classics faculty undergraduate adviser in selecting these courses)
5. Two additional upper division courses from a list of selected courses without duplication from the other requirements; all students in this major must take Classics 130.

Major in Classical Languages

Elementary Greek (either Greek 1-2 or Greek 10 or the Greek Workshop, offered during Summer Sessions); Elementary Latin (either Latin 1-2 or Latin 10 or the Latin Workshop, offered during Summer Sessions); either Greek 40 or Latin 40 (may be taken concurrently with upper division courses); Greek 100, 101, and 102; Latin 100, 101, and 102; two courses chosen from Greek 115-123, Latin 115-140; Classics 10A and 10B. Majors are encouraged to take additional courses from the list of recommended courses available in the departmental office and on the Classics Department website (<http://www.classics.berkeley.edu>).

Major in Greek

Elementary Greek (either Greek 1-2 or Greek 10 or the Greek Workshop, offered during Summer Sessions); Greek 40 (may be taken concurrently with upper division courses); Greek 100, 101, and 102; four courses chosen from Greek 115-123; Classics 10A and 10B (under exceptional circumstances, the undergraduate adviser may authorize substitution of Classics 100A for 10A, or 100B for 10B); one course from the list of recommended courses available in the departmental office and on the Classics Department website (<http://www.classics.berkeley.edu>).

Major in Latin

Elementary Latin (either Latin 1-2 or Latin 10 or the Latin Workshop, offered during Summer Sessions); Latin 40 (may be taken concurrently with upper division courses); Latin 100, 101, and 102; four courses chosen from Latin 115-140; Classics 10A and 10B (under exceptional circumstances, the undergraduate adviser may authorize substitution of Classics 100A for 10A, or 100B for 10B); one course from the list of recommended courses available in the departmental office and on the Classics Department (<http://www.classics.berkeley.edu>) website.

Substitutions

Under exceptional circumstances the undergraduate adviser is empowered to authorize substitution of a more advanced reading course for any required reading course numbered 100 to 102, if such substitution is deemed necessary and advisable.

Honors Program

Restricted to majors with an overall University GPA of at least 3.3 and a GPA of at least 3.3 in the major. Consists of (a) one of the major programs, with the added requirement for students in the Greek, Latin, and classical languages majors that at least one of the Senior Reading courses (Greek 115-123, Latin 115-140) must be in prose and at least one must be in poetry; (b) one semester of Greek H195 (for Greek or classical languages majors), Latin H195 (for Latin or classical languages majors), or Classics H195 (for classical civilizations majors); H195 consists of largely independent study, including the writing of a thesis; the project undertaken in this one-semester honors course (4 units) must be related to work completed in a previous upper division course in the Classics department. The thesis will be evaluated by an Honors Committee of three members; the written thesis is due on Monday of the 13th week of the semester and the committee will agree upon the level of Honors

(Honors, High Honors, or Highest Honors) and the grade to be awarded no later than the Monday of examination week.

Minors

Minor in Classical Civilization

Five upper division courses in the Classics department. Courses or seminars taught by Classics professors in other departments may also be accepted, in consultation with the undergraduate faculty adviser.

Minor in Greek Studies

Five upper division courses in Greek language and related courses. At least three courses must be in the Greek language; up to two courses may be in courses with substantial content relevant to Greek literature, philosophy, culture, or history.

Minor in Latin Studies

Five upper division courses in Latin language and related courses. At least three courses must be in the Latin language; up to two courses may be in courses with substantial content relevant to Roman literature, philosophy, culture, or history.

Preparation for Graduate Study

To enter graduate study in Classics, students should complete the major in Classical Languages (or a satisfactory equivalent). Students are urged to supplement the requirements for the major with two or three senior reading courses (Greek 115-123, Latin 115-123). They are strongly advised also to have an adequate reading knowledge of German and/or French or Italian before admission if possible, since they must pass examinations in two of these languages for the PhD degree and in one of them for the MA degree. Prospective graduate students are also encouraged to take Advanced Prose Composition in Greek and Latin (Classics 250, 260) since the graduate program requires demonstration of competence in prose composition. *Note:* The major in Classical Civilizations is not considered to be adequate preparation for graduate study.

The Graduate Program

Master of Arts

The Master of Arts degree may be taken in Classics (under Plan B: a program of 24 units in graduate and advanced undergraduate courses, and a series of examinations) or Classical Archaeology (under Plan A: a program of 20 units of graduate and advanced undergraduate courses, and a thesis).

Doctor of Philosophy

The Doctor of Philosophy degree may be taken in Classics or Classical Archaeology. Whatever the graduate students' principal interest—literature, history, philosophy, archaeology, or other subjects—they should take a broad program and acquaint themselves with every field of classical study. Students are advised to read widely in Greek and Latin authors of all kinds since both MA and PhD regulations require an extensive knowledge of literature, history, and philosophy. They are also encouraged to take courses in epigraphy, comparative grammar, and Greek dialects when they are offered, since the interval between offerings of each can be three years. The graduate course offerings are varied from year to year so that in a normal period of graduate study students may take courses in several fields and periods. Service for two semesters as a graduate student instructor is normally required as part of the PhD program in classics. Most seminars may be taken for either 4 units (for a

letter grade) or 2 units (on a satisfactory/unsatisfactory basis), subject to some restrictions. For details of the MA and PhD programs, consult the graduate adviser.

Cognitive Science

College of Letters and Science (<http://ls.berkeley.edu>)

Program Office: Undergraduate and Interdisciplinary Studies, 243 Evans Hall, (510) 642-2628

Program Director: Terry Regier, PhD

Program Website: Cognitive Science (<http://ugis.ls.berkeley.edu/cogsci>)

Major

Cognitive science is the cross-disciplinary study of the structure and processes of human cognition and their computational simulation or modeling. This interdisciplinary program is designed to give students an understanding of questions dealing with human cognition, such as concept formation, visual perception, the acquisition and processing of natural language, and human reasoning and problem solving.

The program draws on relevant courses found within the fields of anthropology, biology, computer science, education, linguistics, philosophy, and psychology, as well as specially designed lower and upper division courses in cognitive science. The structure of the major follows.

Lower division requirements

Prerequisites for declaring major:

- Cognitive Science 1 or N1 (Introduction to cognitive science)
- Math 1A (Calculus) or Math 16A (Analytical geometry and calculus)
- Computer Science 61A (Structure and interpretation of computer programs) or Engineering 7 (Introduction to computer programming for scientists and engineers)

Note: An average GPA of 2.0 or higher in these prerequisites is required for admission to the major.

Other lower-division requirements:

- Molecular and Cell Biology 61 (Brain, mind, and behavior) or 64 (Exploring the brain: Introduction to neuroscience)
- Math 55 (Discrete mathematics) or CS 70 (Discrete mathematics and probability theory)

Upper division requirements

All students must complete a minimum of 30 upper division units. These must include 9 cognitive science courses, as follows: 6 courses fulfilling distribution requirements and 3 elective courses.

Distribution requirements:

1 course from each of the following 6 areas:

Cognitive neuroscience:

Psychology 117 (Human neuropsychology)

Cognitive Science/Psychology C127 (Cognitive neuroscience)

Psychology 133 (Psychology of sleep)

Cognitive psychology:

*Cognitive Science C100 / Psychology C120 (Basic issues in cognition)

Cognitive Science C102/Psychology C129 (Scientific approaches to consciousness)

Cognitive Science/Psychology C124 (Psycholinguistics)

Cognitive Science/Psychology C126 (Perception)

Psychology 122 (Human learning and memory)

Psych 143 (Language acquisition)

Psych 164 (Social cognition)

Computational modeling:

Cognitive Science 131 (Computational models of cognition)

Computer Science 188 (Introduction to artificial intelligence)

Linguistics:

*Linguistics 100 (Introduction to linguistic science)

*Cognitive Science C101 / Linguistics C105 (The mind and language)

Cognitive Science/Linguistics C142 (Language and thought)

Cognitive Science/Linguistics C147 (Language disorders)

Philosophy:

Philosophy 122 (Theory of knowledge)

Philosophy 132 (Philosophy of mind)

Philosophy 133 (Philosophy of language)

Philosophy 135 (Theory of meaning)

Philosophy 136 (Philosophy of perception)

Society, culture, and cognition:

Cognitive Science C103 / History C192 / Media Studies C104C / Information C103 (History of information)

Cognitive Science/Linguistics C104 (The mind, language, and politics)

Anthropology 166 (Language, culture, and society)

Economics 119 (Psychology and economics)

Education 140AC (Literacy: Individual and societal development)

Linguistics 150 (Sociolinguistics)

Psychology 107 (Buddhist psychology)

Psychology 160 (Social psychology)

Psychology 164 (Social cognition)

Psychology 166AC (Cultural psychology)

Sociology 150 (Social psychology)

Sociology 150A (Social psychology: Self and society)

Note: Courses that are listed within more than one area of concentration can be counted for only one requirement.

Concentrations and Electives

Cognitive science students who have completed the major requirements may wish to add an optional concentration. Courses taken toward the required 30 upper division units may be applied toward a concentration if they fall into the appropriate categories. A concentration consists of three listed courses, all within one of the six cognitive science categories. *Note: Both the cognitive psychology and linguistics concentrations must include a gateway course (designated with a *).*

Cognitive neuroscience:

Molecular and Cell Biology/Neuroscience C160 (Introduction to neurobiology)

Molecular and Cell Biology 160L (Neurobiology lab)

Molecular and Cell Biology 163 (Mammalian neuroanatomy)

Molecular and Cell Biology 164 (Sensory and integrative neurobiology)

Molecular and Cell Biology 165 (Molecular neurobiology)

Molecular and Cell Biology 166 (Biophysical neurobiology)

Psychology 110 (Biological psychology)

Psychology 111 (Sensory processes: Vision)

Psychology 114 (Biology of learning and neural plasticity)

Cognitive Science C110 / Computer Science C182 / Linguistics C109 (Neural basis of thought and language)

Integrative Biology 245/245L (Functional neuroanatomy and lab)

Cognitive psychology:

Cognitive Science/Psychology C127 (Cognitive neuroscience)

Psychology 107 (Buddhist psychology)

Psychology 111 (Sensory processes: Vision)

Psychology 121 (Animal cognition)

Psychology 133 (Psychology of sleep)

Music 108 or 108M (Music perception and cognition)

Education 224A (Mathematical thinking and problem solving)

Education 229A (Problem solving and understanding)

Computational modeling:

Cognitive Science C110 / Linguistics C109 / Computer Science C182 (Neural basis of thought and language)

Computer Science 160 (User interface design and development)

Computer Science 170 (Efficient algorithms and intractable problems)

Computer Science 186 (Introduction to database systems)

Computer Science / Vision Science C280 (Computer vision)

Computer Science 287 (Advanced robotics)

Computer Science 288 (Artificial intelligence approach to natural language processing)

Vision science 265 (Neural computation)

Linguistics:

Linguistics 110 (Introduction to phonetics and phonology)

Linguistics 120 (Introduction to syntax and semantics)

Linguistics 106 (Metaphor)

Cognitive Science / Linguistics C108 (The challenge of cognitive science to Western philosophy)

Cognitive Science C110 / Linguistics C109 / Computer Science C182 (Neural basis of thought and language)

Linguistics 115 (Phonology and morphology)

Linguistics 121 (Logical semantics)

Linguistics 123 (Pragmatics)

Linguistics 158 (Computational methods)

Cognitive Science C140 / Linguistics C160 (Quantitative methods in linguistics)

Linguistics 181 (Lexical semantics)

Cognitive Science/Psychology C124 (Psycholinguistics)

Psychology 143 (Language acquisition)

Philosophy:

Philosophy 128 (Philosophy of science)

Philosophy 130 (Philosophy of social science)

Philosophy 138 (Philosophy of society)

Philosophy 140A,B (Intermediate logic)

Philosophy 174 (Locke)

Philosophy 176 (Hume)

Philosophy 178 (Kant)

Philosophy 185 (Heidegger)

Philosophy 186 (Wittgenstein)

Philosophy 188 (Phenomenology)

Cognitive Science/Linguistics C108 (The challenge of cognitive science to Western philosophy)

Society, culture, and cognition:

Anthropology 149 (Psychological anthropology)

Anthropology 160AC (Forms of folklore)

Anthropology 161 (Narrative folklore)

Information 146 (Foundations of new media)

Linguistics 130 (Comparative and historical linguistics)

Linguistics C139 / Slavic C139 (Language spread)

Linguistics 151 (Language and gender)

Linguistics 170 (History, structure and sociolinguistics of a particular language)

Native American Studies 151 (Native American philosophy)

Philosophy 153 (Chinese philosophy)

Political Science 161 (Public opinion, voting and participation)

Political Science 164A (Political psychology and involvement)

Psychology 167AC (Stigma and prejudice)

Rhetoric 103A (Approaches and paradigms in the history of rhetorical theory)

Rhetoric 105 (Rhetorical theory and practice in historical eras)

Rhetoric 110 (Advanced argumentative writing)

Rhetoric 170 (Rhetoric of social science)

Rhetoric 174 (Rhetoric of scientific discourse)

Rhetoric 175 (Rhetoric of philosophical discourse)

Rhetoric 177 (Language, truth, and dialogue)

Honors Program

Cognitive science majors who wish to graduate with honors must have an overall GPA of 3.30 or higher in all work completed at the university and a 3.30 GPA or higher in the major program at the time of their graduation. In addition, they must complete a thesis of high quality, based upon independent study with a member of the cognitive science faculty and marked by satisfactory completion of at least three units of course H195A-H195B or 199.

Students interested in the major should consult with the student academic advisor in 243 Evans Hall, (510) 642-2628.

College Writing Programs

College of Letters and Science (<http://ls.berkeley.edu>)

Office: 112 Wheeler Hall, (510) 642-5570

Director: Jane Stanley, PhD

Department Website: College Writing Programs
(<http://writing.berkeley.edu>)

Overview

College Writing Programs, a unit within the Undergraduate Division in the College of Letters and Science, offers courses that instruct students in writing in a variety of contexts.

For information regarding the Entry-Level Writing requirement and the Analytical Writing and Placement Exam, please see the Undergraduate Education section (Majors and Degrees tab) in this bulletin (p. 9).

Comparative Biochemistry

Interdepartmental Graduate Group
Group Office: 324 Barker Hall, (510)
643-1711

Chair: Fenyong Liu, PhD

Group Website: Comparative Biochemistry (<http://compbiochem.berkeley.edu>)

Overview

The interdisciplinary Graduate Group in Comparative Biochemistry administers the PhD degree for students interested in a biochemical and molecular approach to problems in the biological sciences. Students work under the supervision of faculty from diverse disciplines including Molecular and Cell Biology; Nutritional Science and Toxicology; Plant and Microbial Biology; Chemistry; Chemical Engineering; Environmental Science, Policy, and Management; Public Health; and the Lawrence Berkeley National Laboratory.

For further information, please review the program website (<http://compbiochem.berkeley.edu>).

Comparative Literature

College of Letters and Science (<http://ls.berkeley.edu>)
Department Office: 4125 Dwinelle Hall,
(510) 642-2712

Chair: Miryam Sas, PhD

Department Website: Comparative Literature
(<http://complit.berkeley.edu>)

Overview

The Department of Comparative Literature is a vibrant place for the research and study of literatures and cultures in an interdisciplinary framework, from a transnational and cross-cultural perspective.

We have particular strengths in Latin American literatures, French and German, Hebrew and Yiddish studies, classics, critical theory, East Asian literatures and arts, performance studies, postcolonial theory, film and media, poetry and poetics, English and American literatures, Early Modern and Renaissance studies and Slavic literatures and cultures. Though undergraduates often read in translation, we focus on close readings as well as critical study of works in context.

Major Requirements

Comparative Literature majors are trained in the cross-cultural and critical reading of literatures and cultures. With a grounding in the theory and history of literature and in the close analysis of texts and cultural discourses, Comparative Literature students come to engage in original research projects that cross disciplinary and national boundaries.

The junior course (CL 100) introduces students to a variety of literary texts and critical and theoretical approaches. The senior course (CL 190) takes up a specific literary context and leads to an independent project involving several literary traditions. For honors students, the senior thesis writing seminar (CL 170) provides support for a more extended independent research project in a topic developed by the student in consultation with a faculty advisor. Comparative Literature students must gain at least third-year level proficiency in a language other than English in order to begin to read works in the original language by the end of their studies.

Upper Division Requirements

A minimum of 30 approved upper division units in literature, including:

- A section of CL 100, a section of CL 190, and one Comparative Literature period course (the 151-155 series).
- At least four courses in the "major" literature, totaling not fewer than 12 units, with readings in the original language (this could include English).
- At least two courses in the "minor" literature totaling not fewer than 6 units, with readings in the original language and selected to fit the student's period of primary interest (e.g. classical, medieval, early modern, modern); and
- At least one upper division course in a classical literature, where works are read in translation or in the original from Greek, Latin, Classical Arabic, Biblical Hebrew, Sanskrit, or Classical Chinese or Japanese.

Honors Requirements

Students who have attained junior standing may be admitted to the honors program if they:

1. Have accumulated at least an overall 3.3 grade point average (GPA) and at least a 3.55 GPA in the major, and at the time of graduation have accumulated at least a 3.65 GPA in the major and a 3.4 average in all work completed at the University.
2. Have completed at least eight upper division units in literature, including Comparative Literature 100 or the equivalent.
3. Are prepared to do upper division work in one vernacular foreign literature or one classical literature.

In addition to the requirements for the regular program outlined above, candidates for the BA with honors in Comparative Literature must demonstrate, through either examination or coursework, a sense of the historical development of their principal literature, and earn a grade of B or higher for an honors thesis in Comparative Literature H195. Students interested in the honors program are urged to consult an adviser in the Department of Comparative Literature at their earliest opportunity.

Program for Study Abroad

While progressing toward the undergraduate degree in comparative literature, you may have the opportunity to earn credit while studying abroad. Comparative literature majors and minors are encouraged to participate in the Berkeley Programs for Study Abroad (EAP).

For information about these programs, contact an adviser in the Berkeley Programs for Study Abroad Office, 160 Stephens Hall #2302, Berkeley, CA 94720-2302, or phone (510) 642-1356. Information is also available online at the Study Abroad website. (<http://studyabroad.berkeley.edu>)

The Graduate Program

Students are admitted for post-baccalaureate work leading to the PhD degree. This degree prepares students for teaching and research in classical and modern languages and literatures and is especially designed to encourage interdisciplinary research involving the study of literary and theoretical documents in several languages. The program is designed to provide students with the maximum of flexibility compatible with a rigorous course of study. The program emphasizes comprehensive historical coverage of one literature, with students designing an individual program of study that involves two additional literatures. Further information concerning the program should be sought from the office of graduate studies in the Department of Comparative Literature.

Undergraduate Preparation

Students interested in the graduate program in comparative literature at Berkeley are advised that strong undergraduate preparation in at least two foreign languages will speed up their work at the graduate level.

Requirements for the PhD Degree

A minimum of 10 graduate courses is required for the PhD degree, counted cumulatively from the beginning of graduate study at Berkeley. (Students entering with MA's from other institutions will be able to count up to two MA courses toward the 10-course requirement.) Students must demonstrate competence in three languages other than English. Courses include Approaches to Comparative Literature, as well as graduate-level courses in the major and each of two minor literatures. These are intended to help prepare students for the PhD written and oral qualifying examinations, which examine the three literatures in a comparative context and are based on reading lists and a statement of interests drawn up by the student in consultation with an adviser. Students are expected to complete these examinations no later than the fourth year of study and to devote the following three years to the development of a prospectus and the completion of a doctoral dissertation. Dissertation committees are ordinarily composed of members of the Department of Comparative Literature and other related departments.

Computational Biology

Graduate Division (<http://grad.berkeley.edu>)
Center Information: 174 Stanley Hall
MC#3220, (510) 666-3342

Website: Center for Computational Biology (<http://qb3.berkeley.edu/ccb>)

Director: Rasmus Nielsen, PhD

Graduate Chair: Steven Brenner, PhD

Overview

Computational biology is an academic growth area that binds together multiple areas of biological research with the mathematical and computational sciences. It takes center stage in the new data-oriented biology by facilitating scientific discoveries based on high-throughput methods. The genomic revolution has fundamentally changed the biological sciences, and computational biology provides the means by which we translate the genomic discoveries into a new understanding of complex biological systems, and eventually to improvements of the human condition through development of solutions to environmental problems, new drug discoveries, and personalized medicine.

The Center for Computational Biology is Berkeley's hub for research and training in computational biology and bioinformatics. Through courses,

seminars, scientific meetings, and innovative training programs for PhD students (see below), the Center catalyzes biological discoveries at the interface of biology, computation, and mathematics/statistics. As a campus strategic initiative, the Center fosters an interactive, innovative, and collegial environment for faculty, students, and postdocs drawn from five colleges and over a dozen academic departments. Faculty research interests are likewise diverse, ranging from computational and statistical genomics to population, comparative, and functional genomics; from bioinformatics and proteomics to evolutionary biology, phylogenomics, and statistical and computational methods development for modeling biological systems.

Graduate Programs

The Center offers two graduate programs under auspices of the Computational Biology Graduate Group: (1) a PhD in Computational Biology; and (2) the Designated Emphasis in Computational and Genomic Biology, a graduate specialization for students in select PhD programs. With the exception of the three courses listed under the Course tab above, both programs draw upon departmental course offerings for their curricula. Please visit the programs' websites for course lists.

Computational Biology PhD

The goal of the Computational Biology PhD is to advance basic research at the interface of the biological, computational, mathematical, and physical sciences. The program is therefore intended for students who are both passionate about exploring the interface, and committed to functioning at a high level in both computational and biological fields. Though undergraduate preparation varies, entering students have demonstrated outstanding potential as a research scientist and have clear academic aptitude in multiple disciplines, as well as excellent communication skills. This is assessed based on research experience, grades, standardized exams, course selection, essays, personal background, and letters of recommendation. The program emphasizes research. As such, the curriculum design bends more toward biology programs than computational, requiring course work and laboratory rotations in the first year, and thesis research beginning in the second year. Because student backgrounds vary, the program tailors each student's coursework to meet their specific needs and interests. (Students should note that in some cases coursework may be necessary in the second year.) Students seeking detailed information about admission, curriculum, and sources of financial support should see the program's website (<http://ccb.berkeley.edu/research-education/phd-in-computational-biology>) or contact the staff adviser at compbiograd@berkeley.edu.

Designated Emphasis (DE)

For information regarding the Designated Emphasis in Computational and Genomic Biology, please see the program's page in this bulletin (p. 78).

Designated Emphasis (DE) in Computational and Genomic Biology

The Designated Emphasis in Computational and Genomic Biology is for students from affiliated doctoral programs. The DE provides students with a solid foundation in the different facets of genomic research, and an awareness of the culture, techniques, and challenges of disciplines outside of their own. The training DE students receive enables them to collaborate across disciplinary boundaries to solve a wide range of computational biology and genomic problems, and it provides them with the ensuing competitive edge for the most desirable jobs in academia and industry, which increasingly require interdisciplinary training. Coursework requirements include three courses, participation in a group seminar and retreat, and a thesis on a germane topic. Students completing the program receive the designation "Designated Emphasis in Computational and Genomic Biology" on their diplomas. Students must apply before their Qualifying Examination. For a list of participating programs and courses,

please visit the program's website (<http://ccb.berkeley.edu/research-education/decgb>).

Computer Science (Engineering)

Please see the Electrical Engineering and Computer Sciences Department (p. 89) for program and degree requirements.

Computer Science (Letters and Science)

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 377 Soda Hall, (510) 642-7214

Department Contact: Christopher Hunn

Department Website: Computer Science (L&S)
 (<http://ls-advise.berkeley.edu/major/compsci.html>)

Choice of College

There are two ways to study computer science at UC Berkeley. One is to be admitted to the Electrical Engineering & Computer Sciences (EECS) major in the College of Engineering (COE) as a freshman. Admission to the COE, however, is extremely competitive. The other way is to enter the College of Letters and Science and, after two years and successful completion of required courses, be admitted to the L&S computer science major. The EECS path is appropriate for people who want an engineering education. The L&S path is appropriate for people who are interested in a broader education in the sciences and arts, and/or are not sure at the time of application that they can gain admission to EECS.

Details about the computer science and engineering program in the Department of Electrical Engineering and Computer Sciences may be found on the Electrical Engineering and Computer Sciences website. (<http://eecs.berkeley.edu>)

Computer Science Major in the College of Letters and Science

Berkeley emphasizes the *science* of computer science, which means much more than just computer programming. It includes the theory of computation, the design and analysis of algorithms, the architecture and logic design of computers, programming languages, compilers, operating systems, scientific computation, computer graphics, databases, artificial intelligence, and natural language processing. Our goal is to prepare students both for a possible research career and long-term technical leadership in industry. We must therefore look beyond today's technology and give students the primary ideas and the learning skills that will prepare them to teach themselves about tomorrow's technology.

It is necessary to achieve an overall and technical grade point average (GPA) of 2.0 to declare the computer science major. The technical GPA (that is, the GPA in the lower division courses required for the major) is the main determining factor and students meeting the criteria are routinely approved. Applications to the major should be submitted to the Computer Science Advising Office, 377 Soda Hall, (510)-642-7214, during the semester in which the final technical prerequisites are being completed.

Transfer students admitted to Berkeley must, in addition, apply separately to the computer science major. Not all transfer students will meet the

criteria required for the major. Therefore, we recommend that transfer students be prepared to pursue an alternative major at Berkeley. For further information, contact the Advising Office.

Major Requirements

Lower Division Requirements: The following lower division courses are required for admission to the major:

1. College-level calculus and linear algebra/differential equations (Math 1A-1B, 54).
2. Discrete Mathematics and Probability Theory (CS 70).
3. Electronics (EE 20 or 40).
4. Computer science (CS 61A-61B-61C).

All the above courses must be graded. All of the above courses *except* EE 20 or 40 must be taken prior to declaring. EE 20 or 40 must be taken before graduation.

Upper Division Requirements: A total of 27 units of upper division courses including:

1. One Design course from the following: CS 149, 150, 152, 160, 162, 164, 169, 184 or EE 125, 128, 130, 140, 141, 143, 149, 192;
2. Any two additional upper-division CS courses*: (in addition to above list) CS 150, 152, 160, 161, 164, 169, 184, 186, 188;
3. Any two additional EE/CS courses*: (in addition to above lists) EE 105, 113, 117, 118, 120, 121, 122, 123, C125, 126, 127, C128, 129, 130, 134, 137A, 137B, 140, 141, 142, 144, C145B, C145L, C145M, C145O, 147, and C149;
4. Technical Electives* to 27 units: (in addition to above lists) Any course from the approved list of non-CS technical electives found at eecs.berkeley.edu/csugrad/tech_electives (http://eecs.berkeley.edu/csugrad/tech_electives).
5. Total of *at least* 27 upper division units.

* Denotes that all courses for the major must be technical in nature. 199, 198, 197, 195 and various seminars do not count.

Note: Please check the following website (<http://eecs.berkeley.edu/csugrad>) for updates and/or current information.

Minimum Scholarship

All courses taken in satisfaction of the major requirements must be graded; none may be taken *passed/not passed*. A GPA of 2.0 in the upper division courses is required for graduation. The division monitors the progress of majors and expects them to maintain a 2.0 GPA from semester to semester.

Honors Program

Computer science majors with an overall GPA of 3.75 or above are eligible to apply to the EECS Honors Program. Information is available here. (<http://eecs.berkeley.edu/Programs/honors.html.html>)

Minor Requirements

A minor in computer science is available to all undergraduate students at Berkeley with a declared major, with the exception of CS majors in EECS. Requirements for the minor are CS 61A, 61B or 61BL, 61C or 61CL, CS70 plus any three upper division courses in CS. Students submit applications to the minor program only after completing the majority of the lower division requirements with a technical GPA of at least 2.0. The computer science minor is awarded when all courses are completed

with a technical GPA of 2.0. A notation is made on the final transcript. For more information, please see the EECS minor website. (<http://eecs.berkeley.edu/csugrad/minor.html>)

Advanced Degree Program

The Five-Year Bachelor's/Master's Program in EECS (BA/MS or BS/MS): The combined Bachelor's/Master's Program is designed to take outstanding EECS and CS L&S undergraduates immediately into an intensive two-semester program conferring the Master of Science degree. This combined program promotes interdisciplinary focus and is best suited to those who are more "professionally oriented," as opposed to those wishing to pursue a more traditional research-based and discipline-specialized advanced course of study. As such, a distinguishing feature of this five-year program is its emphasis upon extended study in interdisciplinary, though allied, technical fields, such as physics, biology, and statistics, or in professional disciplines, such as business, law, or public policy. The program is aptly entitled, Educating Leaders for the Emerging Global Economy, and reflects a growing need for those who are technically skilled and also possess an understanding of the business, legal, and social context of technology development and use.

Conferral of the degree requires either writing a thesis (Plan I) or reporting on a project (Plan II), as is required of our other master's students.

Complete information is available at the Five-Year MS website. (<http://eecs.berkeley.edu/FiveYearMS>)

Graduate Program

Graduate degree programs are available as preparation for research and teaching (Master's of Science and Doctor of Philosophy in computer science or engineering) and for careers in design, development, and management (Master's of Engineering and Doctor of Engineering). For details on graduate programs and procedures, see the Electrical Engineering and Computer Sciences section of the *Berkeley Bulletin*.

Critical Theory

College of Letters and Science (<http://ls.berkeley.edu>)

Program Office: 4327 Dwinelle Hall, (510) 642-1328

Co-Directors: Martin Jay, PhD (Department of History); and Robert Kaufman, PhD (Department of Comparative Literature)

Program Website: Critical Theory (<http://criticaltheory.berkeley.edu>)

Overview

The Designated Emphasis (DE) in Critical Theory permits interested students to specialize in critical theory, and to obtain certification of this specialization, while pursuing a PhD in an established UC Berkeley Department. Critical Theory is not an independent degree granting program. Students admitted to the DE and completing the requirements will receive a parenthetical notation to that effect on their doctoral degrees.

Critical Theory is typically associated with the work of the Frankfurt School, and that tradition of theory figures significantly in the DE curriculum. However, the program at Berkeley broadens and extends the

meaning of critical theory to include 19th-century philosophers of critique, on the one hand, and contemporary critical theoretical work on culture, religion, nationalism, postnationalism, identity, and capitalism, on the other. Above all, Critical Theory at Berkeley emphasizes the centrality of theoretical critique to the examination of contemporary values, conflicts among schemes of values, the powers that organize political, social, cultural, and economic life, and modes of justification and legitimation for cultural inquiry and political analysis.

All students enrolled in PhD programs at Berkeley are eligible to apply for the DE in Critical Theory. Students must apply before advancing to candidacy, preferably in the first or second year of graduate study, so they may complete the DE coursework requirements before taking the qualifying exams in their home department. The DE in Critical Theory admits no more than 15 new students each year. The DE in Critical Theory consists of a five-course track (three core courses and two approved electives) that will culminate for students in a degree certificate in the field of critical theory in addition to their PhD. The aims of this curriculum are to establish an historical grounding for the notion of critique and critical theory, to investigate the claims of the Frankfurt School in relation to other critical projects, and to consider the contemporary formation of critical theory and new debates that form its intellectual focus.

Cuneiform

Please see the Near Eastern Studies department (p. 166) for program and degree requirements.

Demography

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 2232 Piedmont Avenue, (510) 642-9800

Chair: Joshua R. Goldstein, PhD

Department Website: Demography (<http://demog.berkeley.edu>)

Overview

The Department of Demography offers an interdisciplinary training program leading to the MA and PhD in demography. Demography is the systematic study of human populations, a topic central to many pressing policy issues such as the economic development of Third World countries, population aging, the environment, health and mortality, family and household change, immigration, and ethnicity. Demography also has strong intellectual and institutional ties to other fields such as sociology, economics, social history, anthropology, biology, public health, and statistics. The program at UC Berkeley is one of the few in the United States granting graduate degrees in demography, rather than offering demography only as a field of specialization within some other department. This training strategy permits greater concentration and depth in demography, as well as program flexibility and breadth in related subjects. The program stresses both quantitative aspects of demography and demography in the context of social science theory.

No Undergraduate Major

Although there is no undergraduate major, seniors may take graduate courses with consent of the instructor. The department offers an

undergraduate minor in demography, which is open to all interested undergraduates at Berkeley. (See below.)

Graduate Programs

The master's degree in demography is designed both as a final degree for those who wish to pursue a professional career at that level of training, and as a second degree for students earning a doctorate in demography or a related discipline. The basic coursework for the master's program is required for the doctoral degree as well.

Students already enrolled at a UC campus or at Stanford University are admissible to demography courses if they have completed the prerequisites. Students already enrolled in another graduate program at Berkeley who wish to earn a degree in demography may apply by executing a change or addition of major.

Students not already enrolled at Berkeley who wish to enter the degree programs or pursue coursework only for professional development should complete the required application and submit it to the student affairs officer in the department's main office. The general deadlines for application specified by the Graduate Division apply, as do the general degree program requirements of the Academic Senate and the Graduate Division. For specific degree requirements, please consult the department's website (<http://www.demog.berkeley.edu>) or contact the graduate student services adviser.

Doctoral students in demography are required to have or to earn a master's degree in an allied discipline.

Graduate Group in Sociology and Demography (PhD Program)

See the listing under Sociology and Demography (http://sis.berkeley.edu/catalog/gcc_view_req?p_dept_cd=SOCDEM), or go to the website. (<http://demog.berkeley.edu/students/socdemog.shtml>)

Minor Requirements

UC students may complete one or more minor programs, normally in a field both academically and administratively distinct from their major.

The undergraduate minor in demography provides an opportunity to combine a traditional major, typically in one of the social sciences, with specialized training in population studies. Students in the minor must complete, with a grade point average (GPA) of at least 2.0 (C), a total of five upper division courses. All courses applied to the minor must be taken for a letter grade. The courses are chosen as follows:

1. Three required courses: Demography 110, 126, and 175. Substitutions are not allowed.
2. One elective course from Public Health 140 or 142A; Economics 140 or 141; Sociology 105; Statistics 102, 131A, 135, or Psychology 101. These courses are in statistical methods or vital statistics. Similar courses of at least three units may be substituted with consent of the department.
3. One elective course from Demography 140, 145, 164, 165, 189; Economics 155, 157, or 171; History 137; Sociology 111, 125. These are courses in social science dealing with demographic factors. Similar courses of at least three units may be substituted with consent of the department.
4. At least three of the five required courses must be completed at Berkeley. *Note:* According to University policy, no more than

one course can be counted for both a student's major and minor degrees.

For up-to-date information about course requirements, go to the website. (<http://demog.berkeley.edu/degrees/undergraduate.shtml>)

Development Practice

**Interdepartmental Graduate Group
Program Office: 311 Wellman Hall, (510)
542-1585**

**Director: David Silberman, PhD (Agricultural and
Resource Economics Department)
Program Website: Master of Development
Practice (<http://mdp.berkeley.edu>)**

Overview

The creation of the Berkeley Master of Development Practice (MDP) is part of the response to one of the core recommendations of the International Commission on Education for Sustainable Development Practice, and is generously supported by the John D. and Catherine T. MacArthur Foundation. The commission concluded that there is a significant and growing demand for generalist development professionals—individuals highly trained in a set of cross-disciplinary competencies that prepares them to address the complexities of sustainable development. Students in the program will be immediately plugged into the Global MDP network of 20 universities and partner organizations all over the globe.

For information regarding the curriculum and degree requirements, please see the program's website (<http://mdp.berkeley.edu/curriculum>).

Development Studies

College of Letters and Science (<http://ls.berkeley.edu>)

**Group Major Office: International and
Area Studies, 101 Stephens Hall, (510)
642-4466**

**Co-Chairs: Gillian Hart, PhD (Department of
Geography); and Michael Watts, PhD (Department
of Geography)**

Program Website: Development Studies (<http://iastp.berkeley.edu>)

Overview

The Development Studies major focuses on social transformation or change. The problems of social transformation are urgent, massive, complex, and often transcend the boundaries of conventional academic disciplines.

DS examines the problems, processes, and prospects for the development of human and material resources in what are generally thought to be the less developed areas of the world. To study comparative development effectively, one must draw upon many disciplines and construct a balanced understanding of historical and contemporary processes. Thus, studying development as a social transformation requires a blending of knowledge and perspectives from political science,

economics, sociology, psychology, anthropology, geography, history, and environmental science.

Student Learning Goals

Undergraduates should have the following knowledge and skills when they graduate with a major in Development Studies from UC Berkeley:

Develop Strong Interdisciplinary Training with Control over Key Concepts in the Social Sciences

- Develop a critical understanding of conventional and non-conventional measures and indices of development
- Comprehend core concepts pertaining to Development Studies that are part of larger social scientific traditions and analysis (state, market, civil society)
- Understand the genealogy of particular theoretical traditions of development that are both rooted in and cross cut the disciplines.
- Grasp the complex relations between development as a series of planned interventions (at various levels) and the dynamics, conflicts and rhythms of historical change and social transformation.

Apply an Interdisciplinary Approach to the Analysis of International Development Theory and Practice

- Recognize how differing concepts and ideas are translated into development practice
- Identify the multiple forms of state and non-state interventions – and the map of multilateral, bilateral and local development institutions – associated with contemporary international development
- Integrate understandings of market, state and civil society, and grasp how they are deployed in development theory and practice

Acquire Historical & Geographical Knowledge and Language Skills

- Examine the historical processes by which the Global South emerged from within the modern world system (post 1450)
- Develop a comparative understanding of major world regions and their interrelations
- Gain a substantive knowledge of cultural, political, economic, and historical development of one particular region of the developing world; if possible, participate in Education Abroad Program in a country in the region
- Acquire language skills relevant to regional expertise

Demonstrate Research, Critical Reading, and Writing Skills

- Formulate well-organized arguments supported by evidence
- Write clearly and effectively
- Apply basic quantitative skills
- Critically evaluate arguments in professional, public and advocacy literatures
- Gain some practical experience through internships

Learning Goals Appendix (<http://iastp.berkeley.edu/sites/default/files/DSELearningGoalsAppendix.pdf>)

Major Requirements

Lower Division

Five Courses

- **DS 10: Introduction to Development Studies.** (You must earn a C or better prior to declaring. This course can only be repeated once). DS 10 is restricted to freshmen, sophomores, and first-semester junior transfer students. Continuing juniors or seniors who have not taken DS 10 may substitute with any course listed in Appendix B in the DS Handbook.
- **Econ 1 or 2: Introduction to Economics.** (You must earn a C or better prior to declaring. This course may be repeated only once).
- **Anthro 3: Introduction to Social and Cultural Anthropology.**
- **IAS 45: Survey of World History.**
- **Statistics 2, 20, or 21.**

Foreign Language

All students must demonstrate a proficiency equivalent to four college-level semesters in any modern language other than English. Equivalency can be achieved through coursework, AP credit, examination, and/or study abroad. For more information on how to complete the language requirement, please consult the DS Handbook. Languages accepted by the College of Letters and Science are not automatically accepted by the DS major. Please check with the department for eligible languages.

Upper Division

- **Development Studies 100: History of Development and Underdevelopment.**
- **Disciplinary Courses:** two courses in the same discipline selected from Appendix A in the DS Handbook.
- **Development Courses:** two courses selected from Appendix B in the DS Handbook.
- **Methodology:** one course selected from Appendix C in the DS Handbook.
- **Concentration:** three upper-division courses are selected to provide substantive knowledge of the cultural, political, economic, and historical development of one particular region of the developing world. It is best to choose courses from more than one discipline. Concentration courses must be pre-approved by an adviser. Courses are chosen from Appendix D in the DS Handbook.

How To Declare

Applications are accepted during the fall and spring semesters from the third week of instruction until the last day of instruction (not the last day of finals). Applications are accepted during the summer from the last week in May until the beginning of the fall semester (not the beginning of classes).

To be eligible to declare students must have:

- completed DS 10 with a grade of C or better (students may repeat DS 10 only once to achieve a grade of C or better);
- completed Economics 1 or 2 with a grade of C or better; and
- are not in the final semester of undergraduate work.

Additionally, students are encouraged – but not required – to complete two semesters of college-level foreign language or the equivalent before applying to the major.

To get declared you must both:

- Attend a Major Declaration Workshop (check the Teaching Program Calendar for dates)
- Meet with an advisor to submit the DS application materials

Bring a completed DS Application – including all materials and transcripts listed below – to the Workshop. Application materials may be submitted after attending the Major Declaration Workshop. However, students will not be officially declared until they have both attended a Workshop and submitted all declaration papers.

Honors Program

To be eligible for honors, students must have senior standing and a GPA of 3.6 in the major and 3.5 in all work completed at UC Berkeley. Doing honors includes a year-long course sequence (IAS H102 in the fall and DS H195 in the spring) in which students learn how to formulate a hypothesis, conduct supporting research, and complete a thesis paper of approximately 75 pages or longer.

After Graduation

The DS major is designed to provide a broad-based liberal arts background as well as the intellectual skills appropriate for careers in both the public and private sectors. Additionally, the major offers an excellent background for students planning postgraduate careers in social science disciplines and professional schools.

More Information

This description is for introductory purposes only. Students interested in completing a major or minor in DS should consult the DS Handbook.

Dutch Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 5319 Dwinelle Hall, Berkeley, CA 94720-3243

Program Director: Jeroen Dewulf, PhD

Department Website: Dutch Studies (<http://dutch.berkeley.edu>)

Overview

Introduce yourself to the language, literature, culture and history of the Netherlands. Dutch Studies offers English-taught courses on Dutch cultural history, literature and linguistics, as well Dutch language courses. Through a broad curriculum, you learn about important cultural developments from the medieval towns in Flanders over the Dutch "Golden Age" and the Netherlands' colonial expansion up to the contemporary multicultural, liberal and European identity of the Low Countries.

Major Requirements

As flexibility and interdepartmental cooperation are of essential importance to the Dutch Studies Program, there are no requirement courses to the Dutch Minor or Major besides the two introductory Dutch language courses (Dutch 1 and 2). This enables students to compose the Dutch Minor or Major according to their personal interests. It also makes it easier to add Dutch Studies as a minor or a double major. Due to the fact that the number of upper division courses offered in the Dutch Studies program is limited, we strongly encourage students considering a major in Dutch Studies to apply to the UC Berkeley Study Abroad Program (<http://>

studyabroad.berkeley.edu/eap/Netherlands) and to spend a semester at one of our partner universities in the Netherlands.

Formal Requirements

Dutch Minors are required to take the following courses:

- **Prerequisites:** Elementary Dutch 1 and Elementary Dutch 2 or equivalent
- **Five upper division courses from the following:**
 - Advanced Dutch 110
 - Dutch for Reading and Translation Knowledge 100
 - The Structure of Modern Dutch 107
 - Conversation and Composition Dutch 125
 - Topics in Dutch Literature Dutch 140
 - Travel/Study Course Dutch 177
 - One course in the Dutch 160-series (may be repeated as topics change)
 - One course in the Dutch 170-series (may be repeated as topics change)
 - One related upper division course outside the Department (with approval by the program director)

Dutch majors and double majors are required to take the following courses:

- **Prerequisites:** Elementary Dutch 1 and Elementary Dutch 2 or equivalent
- **A minimum of 30 upper division units. Required courses include:**
 - Advanced Dutch 110
 - Conversation and Composition Dutch 125
 - Additional courses are to be selected from the following to complete the major:
 - i The Structure of Modern Dutch 107
 - ii Dutch for Reading and Translation Knowledge 100
 - iii Topics in Dutch Literature Dutch 140
 - iv Travel/Study Course Dutch 177
 - v Senior Thesis Dutch 190
 - vi One course in the Dutch 160-series (may be repeated as topics change)
 - vii One course in the Dutch 170-series (may be repeated as topics change)
 - viii A maximum of two related upper-division courses outside the Department (with approval by the program director)

For more information on the Dutch Studies course requirements, please contact the student adviser Mrs. Nadia Samadi at germanic@berkeley.edu.

Graduate Program

Designated Emphasis (DE) in Dutch Studies

In October 2012, the Graduate Council of UC Berkeley established the "Designated Emphasis in Dutch Studies." The DE in Dutch Studies will provide curricular and research resources for students who want to concentrate on Dutch Studies within their respective disciplines and have their work formally recognized in their degree designation. Designed to bring together faculty and students from different departments, the DE will be administered by the Graduate Group in Dutch Studies and will provide a unique context for rigorous cross-disciplinary research. Sponsoring

departments include German, History, History of Art, Southeast Asian Studies, African-American Studies, Comparative Literature, French, and Sociology. However, the DE is open to interested students regardless of whether their home department is officially affiliated with the DE. The program will help advance Berkeley's position as America's leading Dutch Studies program and facilitate research in and cooperation with other universities in the Netherlands, Belgium, South Africa, Indonesia, and the Caribbean, for example, who also have strong Dutch Studies programs. Students applying to the DE must be prepared to integrate high-level research in Dutch Studies into their coursework, qualifying exam and dissertation.

For information regarding curricula and program requirements, please see the Dutch Studies website (<http://dutch.berkeley.edu/graduate/requirements-for-designation>).

Earth and Planetary Science

College of Letters and Science (<http://ls.berkeley.edu>)

**Department Office: 307 McCone Hall
#4767, (510) 642-3993**

Chair: Bruce Buffett, PhD

Department Website: Earth and Planetary Science
(<http://eps.berkeley.edu>)

Overview

The Department of Earth and Planetary Science (formerly Geology and Geophysics) offers a program of instruction that focuses on the origin, evolution, structure and dynamics of the Earth and other planetary bodies. This is an emerging discipline built from such fields as geology, geophysics, geochemistry, oceanography, and the atmospheric, environmental and planetary sciences. We offer classes that provide core training in specialized topics, as well as integrative courses that provide a broad overview. Beginning with an introduction to planet Earth, the undergraduate major has six specializations giving students many options for courses. Extensive opportunities are provided for field work, laboratory analysis and theoretical investigations. Our upper division and graduate courses are relatively small in size, allowing close interactions between students and faculty. Our undergraduate program provides strong technical training for those who wish to pursue professional careers in the Earth, environmental and planetary sciences, but it also provides training in critical thinking and communication that serves well those who choose other paths, such as teaching, law, resource management and other sciences. The graduate program is driven largely by collaborations in research with faculty who are leaders in their field.

Major

The Department of Earth and Planetary Science offers six specializations—Atmospheric Science, Environmental Earth Science, Geology, Geophysics, Marine Science, and Planetary Science—which lead to a Bachelors degree. Students in the earlier majors should consult with the department about their program. Lower division prerequisite courses must be taken on a letter-graded basis (except when a course is offered only on a P/NP basis) and must be completed with a grade of C- or higher in each course. The department will allow one D grade in a lower division class as long as the student maintains at least a C average in the major.

Atmospheric Science

This course of study explores the fundamental natural processes controlling atmospheric composition, circulation dynamics, and climate. Understanding how these processes have changed in the past and may change in the future are among the greatest intellectual and technological challenges of our time. Topics covered will include the physics of climate variability and climate change, changes in stratospheric ozone, coupling of atmospheric chemistry and climate, changes in the oxidation capacity of the troposphere, smog, and the impacts of atmosphere-biosphere exchange on atmospheric composition.

Degree Requirements

- **Lower Division:** Math 1A-1B-53-54, Physics 7A-7B-7C, Chem 1A, EPS 50
- **Upper Division:** EPS 102, 150, C180, 181, 182 plus 9 additional upper division units (see department for a list of electives)

Environmental Earth Science

The Environmental Earth Science major is designed to provide students with a broad background in the earth sciences with an emphasis on environmental sciences. Interrelationships between physical, biological, and chemical processes at the Earth's surface will be emphasized.

The major focuses more broadly on the natural sciences by using earth science mainly as a base for expanding outward depending upon students' interests by incorporating courses in biology, hydrology, hazardous waste management, ecology and natural resources. The program is designed to provide background for graduate study in environmental science, preparation for work within governmental agencies such as the Environmental Protection Agency, Bureau of Land Management, United States Geological Survey or consulting firms, or broader involvement in land use planning, business, policy, law or management.

Degree Requirements

- **Lower Division:** Math 1A-1B (or 16A-16B), Physics 7A-7B (or 8A-8B), Chem 1A, Biology 1B, EPS 50
- **Upper Division:** EPS 102, 117, 150, ERG 102 plus 12 additional upper division units (see department for a list of electives)

Geology

Geology is the science of the Earth—of its minerals and processes, of its origin and evolution. It is a broad science concerned with a vast range of physical phenomena in both space and time, and requires a broad scientific background. Trained geologists can address a wide range of concerns, including energy supply, mineral resources, and environmental protection. This major provides strong background in the processes shaping the Earth; it emphasizes quantitative understanding and a strong foundation in the physical sciences.

Degree Requirements

- **Lower Division:** Math 1A-1B, Physics 7A-7B, Chem 1A, EPS 50
- **Upper Division:** EPS 100A, 100B, 101, 102, 118, 150 plus 10 additional upper division units (see department for a list of electives)

Geophysics

The Geophysics major is designed to provide students with theoretical, field and laboratory experience in studying geodynamic processes and the structure of the Earth and other planets. It is designed for students with good physics and mathematics ability. It provides a solid background in

physical science and mathematics with an emphasis on the physics of the Earth.

Degree Requirements

- **Lower Division:** Math 1A-1B-53-54, Physics 7A-7B-7C, Chem 1A, EPS 50
- **Upper Division:** EPS 102, 104 or Math 121A, 130, 150 plus 11 additional upper division units (see department for a list of electives)

Marine Science

The ocean plays a central role in physical, biological, chemical, and geological processes on Earth. The field of marine science thus requires an understanding of the interactions between the biosphere, hydrosphere, lithosphere, and atmosphere. Some examples of the current research directions of societal concern in the marine sciences include: the role of the ocean in climate change; the ocean's role in climate phenomena such as El Niño and La Niña, and their effect on modern marine ecosystems; the history of El Niño and other climatic/oceanographic events recorded in marine sediments and corals; coastal pollution and its affect of coastal marine ecosystems; coastal erosion (natural and human-caused).

Degree Requirements

- **Lower Division:** Math 1A-1B (or 16A-16B), Physics 7A-7B (or 8A-8B), Chem 1A, Biology 1B, EPS 50, C82
- **Upper Division:** EPS 102, 150 and four courses from the following: EPS 100A, 100B, 103/203, 109, 115, C146, IB 106, IB 106A plus 8 additional upper division units (see department for a list of electives)

Planetary Science

Planetary science encompasses the study of the physical and chemical nature of planetary bodies, both in the Solar System and in extrasolar systems. The formation of planets, the forces that sculpted their orbits, the processes that shaped their interiors, surfaces, and atmospheres and the development of life all fall under its rubric. Understanding these complex phenomena requires knowledge of astronomy and astrophysics, earth science, meteorology, atmospheric science, space science, plasma physics, chemistry, and biology. The Planetary Science major has been developed to study the remarkable interface among these disciplines.

Degree Requirements

- **Lower Division:** Math 1A-1B-53-54, Physics 7A-7B-7C, Chem 1A, EPS 50
- **Upper Division:** EPS 102, 150, C162 plus 14 additional upper division units (see department for a list of electives).

Honors Program

Students in the honors program must fulfill the following additional requirements: (1) maintain a GPA of at least 3.3 in all courses in the major, and an overall GPA of at least 3.3 in the University; and (2) carry out an individual research or study project, involving at least three units of H195. The project is chosen in consultation with a departmental adviser, and written report is judged by the student's research supervisor and a departmental adviser. Application for the Honors Program should be made through the student's adviser no later than the end of the student's junior year.

Minor Requirements

Lower Division

Earth and Planetary Science 50 or equivalent

Upper Division

Five upper division courses chosen from the major list and approved by the major adviser. In consultation and with prior approval of the major adviser, students will have the opportunity to choose a coherent program which parallels the department's major specializations or a combined earth and planetary emphasis. Course selections will be guided by the same parameters as those in each of the majors. At least three of the five upper division courses must be completed at Berkeley. No more than one of the five required courses for your minor may be included in your major program. All courses must be taken for a letter grade and a minimum 2.0 GPA is required in the upper division courses applied to the minor. Students interested in the minor should contact the Student Affairs Officer in 305 McCone Hall.

Graduate Programs

The department offers PhD degrees in Earth and Planetary Science. The central objective of the graduate program is to encourage creative thinking and develop the capacity for independent and original research. A strong undergraduate background in the sciences other than geology is especially helpful, and a significant number of our graduate students have their training in physics, chemistry, mathematics, engineering or astronomy. Graduate students are formally accepted into the Earth and Planetary Science program, and they normally work directly toward a PhD. A master's degree is not a prerequisite for a PhD.

Master's Degree

Admission to the Master of Arts degree is available only to graduates of our bachelor's degree program in Earth and Planetary Science. We do not accept applications from other majors or universities. Requirements for the degree consist of 24 semester units of upper division and graduate courses (at least 12 must be graduate, non-research units), followed by a comprehensive oral examination.

PhD Degree

Candidates for the PhD degree must pass the oral qualifying examination by the end of the second year and complete a thesis to the satisfaction of the appointed thesis committee. Students must have two research propositions to present at the qualifying examination, each developed under the supervision of a different professor on substantially different topics.

Research Facilities

Center for Isotope Geochemistry, directed by Professor Donald DePaolo, is a joint research center of both UC Berkeley and Lawrence Berkeley National Laboratory. CIG provides state-of-the-art analyses for measuring concentrations and isotopic compositions of elements in rocks, minerals, fluids and gases in the Earth's crust, oceans, and atmosphere. CIG has seven mass spectrometers that provide high precision isotopic and isotope dilution analyses of Rb, Sr, Nd, Sm, Ca, K, Re, Os, Fe, U, Th, Pb, Ba, La, Ce; clean laboratories; and clean mineral separation and rock preparation laboratories. Materials analyzed are rock, ocean and ground waters, and naturally occurring noble gases.

The Center for Atmospheric Sciences is a new multidisciplinary academic group at Berkeley. It focuses on the processes that maintain

and alter the atmosphere's chemical composition and circulation. It also examines the climatic effects of changes in these processes. A special emphasis is the interaction between the geosphere-biosphere and climate, with the atmosphere as the synthesizer of changes at its boundaries, and the communicator of these changes to the other spheres. Center members and associates are from the Department of Earth and Planetary Science, Department of Chemistry, Department of Environmental Science, Policy and Management, Department of Mechanical Engineering, Space Sciences Laboratory, Lawrence Berkeley National Laboratory, among others. Research approaches are multi-faceted, and include: global three-dimensional circulation models, satellite observations, high-precision instrumentation for atmospheric chemistry, aircraft measurements of stratospheric-tropospheric exchange, measurements and simulations of atmosphere-biosphere exchange of trace gases. This diversity permits the Center to pose and attack new questions about past and future climate change.

Berkeley Geomorphology Group prospers because of the diversity of strong research programs across the campus and because of a commitment to undergraduate teaching and graduate training. The core faculty consist of Kurt Cuffey (Geography), William Dietrich, Jim Kirchner, and Michael Manga (Earth and Planetary Science). Their research programs tackle a wide range of topics including glacier mechanics, paleoclimate analysis, hydrology, environmental geochemistry, landscape evolution, hillslope erosion mechanics, fluvial processes, restoration geomorphology, and biologic extinctions and evolutionary processes. These faculty and their students interact and collaborate with many other related groups on campus.

Active Tectonics Group uses an interdisciplinary approach to investigate active tectonic processes and the rheology of the Earth's lithosphere. This approach integrates geodetic, seismologic, geomorphic, and geologic observations with theoretical models to improve scientific understanding of fault zone processes and crustal deformation. Of particular value in this endeavor are space geodetic observations employing the Global Positioning System and Synthetic Aperture Radar Interferometry to precisely measure deformation near active faults, volcanoes, and landslides. Members of the group, led by Roland Bürgmann, often interact closely with colleagues in the Berkeley Seismological Laboratory and the Geomorphology Group.

The Berkeley Geochronology Center is a non-profit research institution dedicated to establishing the evolution of the Earth, its various inhabitants, and its interactions with the rest of our Solar System, throughout the 4.6 billion years of our Planet's existence. BGC scientists determine the ages of rocks and other materials to date important events in geological and biological history. Through understanding such information in geologic context, BGC research provides key insights into such processes as plate tectonics, volcanism, mountain building, mass extinctions, climate change, interactions between the Earth and Solar System, and the evolution of life, including humankind.

The Berkeley Seismological Laboratory (<http://seismo.berkeley.edu>): The University operates several networks of geophysical instruments in northern California to study earthquakes and tectonic processes at the regional scale: a network of 26 broadband seismometers regionally distributed and linked by continuous telemetry to UC Berkeley forms the core of the monitoring program. In addition, a network of permanent GPS stations and a network of borehole seismometers are maintained and operated by the lab, as well as an on-line archive for earthquake related data in northern California. Research includes the study of earthquake

wave propagation through complex structures, the nature of earthquake sources, eigenvibrations of the earth and global tomography.

Center for Computational Geoscience (<http://esd.lbl.gov/research/facilities/ccg>): Within the Earth Sciences Division at the Lawrence Berkeley National Laboratory is a facility for modern seismological research which relies heavily upon intensive computational analysis (e.g., acoustic imaging, 3D wave propagation, high resolution inverse earthquake analyses) or large database manipulations. The center is used in a number of Ph.D. and postdoctoral research studies.

The Engineering Geoscience Group teaches and researches Applied Geophysics. It is an integral part of the Geological Engineering Group within the Department of Civil and Environmental Engineering at the University of California at Berkeley. The group formed originally in 1962, to study and encourage the use of geophysical methods in mineral and petroleum exploration programs. Recently, attention has shifted to the more general topic of subsurface mapping and imaging. While research in resource exploration topics is still actively pursued, the group's activities now include work on methodology and instrument development for a variety of near surface applications related to the resolution of geotechnical and environmental problems. In this area, the group works jointly with the Department of Civil and Environmental Engineering on site remediation, near surface hydrology and soil stability projects. Incidentally, geophysical technology developed for use in shallow subsurface regions can also be used as an aid to archeological searches. The technology is also expected to play a key role in resolving contemporary problems associated with the detection and removal of buried explosive ordinance.

Center for Integrative Planetary Science (CIPS) (<http://cips.berkeley.edu>) is a new organized research unit at the University of California, Berkeley. Our task is to unite scientists and students from many disciplines on a rapidly emerging scientific landscape characterized by striking developments. These discoveries, and others during the past decade, have revealed a remarkable set of connections among many separate traditional sciences: geophysics, astrophysics, meteorology, oceanography, organic chemistry, biology, and planetary science. These disciplines are well represented at Berkeley, where strong research programs with long records of accomplishment have existed for some time in diverse campus departments, the Space Science Laboratory, and the Lawrence Livermore National Laboratory. CIPS takes advantage of these strengths with the integrated study of the physical origin and geochemical evolution of planets and planetary systems. Much of the compelling research about our solar system and other planetary systems will require knowledge across traditional disciplinary boundaries. From the condensation of planets within protoplanetary discs to the geochemical history of planets and moons, future researchers will require frontier knowledge of all related disciplines.

East Asian Languages and Cultures

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 3413 Dwinelle Hall, (510) 642-3480

Chair: Mark Csikszentmihalyi, PhD

Department Website: East Asian Languages and Cultures (<http://ealc.berkeley.edu>)

East Asian Languages and Cultures Course Descriptions:

Chinese courses (p. 364)

East Asian Languages and Cultures courses (p. 480)

Japanese courses (p. 867)

Korean courses (p. 890)

Tibetan courses (p. 1419)

The Undergraduate Majors

The Department of East Asian Languages and Cultures offers undergraduate majors in the languages and cultures of China and Japan, minors in Chinese, Japanese, Korean, and Buddhism, and honors programs, all of which introduce the vast and variegated literary, artistic, philosophical, and cultural legacies of East Asia and their transformations in modernity. The courses of study are designed to train students in the humanistic investigation of major East Asian traditions, through a curriculum that centers on the acquisition of the modern and classical forms of the languages, the informed and engaged reading of a wide variety of East Asian texts in their historical and cultural contexts, and the development of effective writing skills and critical thinking.

Chinese

Prerequisites (must earn a grade of C or higher)

- Chinese 1A, 1B (5, 5): Elementary Chinese
- Chinese 7A or 7B (4): Introduction to Chinese Literature (must be taken at UC Berkeley)

Lower Division (minimum of three courses and 12 units)

- Chinese 10A, 10B (5 units, 5 units): Intermediate Chinese*
- Chinese 7A or 7B (4): Introduction to Chinese Literature (whichever was not taken as a prerequisite)

Upper Division (minimum of eight courses and 32 units; minimum grade point average (GPA) of 2.0)

- Chinese 100A, 100B (5, 5): Advanced Chinese*
- Chinese 110A, 110B (4, 4): Introduction to Literary Chinese
- One modern Chinese literature course (C153, C155, C156, C157, C158, or C159)
- One East Asian Languages upper division course (e.g., EA 100, EA 102)
- Two electives selected in consultation with the adviser.

Total units required: 62

Japanese

Prerequisites (must earn a grade of C or higher):

- Japanese 1A, 1B (5, 5): Elementary Japanese
- Japanese 7A or 7B (4): Introduction to Japanese Literature (must be taken at Berkeley)

Lower Division (minimum of three courses and 12 units):

- Japanese 10A, 10B (5, 5): Intermediate Japanese*
- Japanese 7A or 7B (4): Introduction to Japanese Literature (whichever was not taken as a prerequisite)

Upper Division (minimum of eight courses and 32 units; minimum GPA of 2.0):

- Japanese 100A, 100B (5, 5): Advanced Japanese*
- Japanese 120: Introduction to Classical Japanese
- One classical Japanese literature course (J130, J132, J134, J140, J142, J144, J146)
- One modern Japanese literature course (J155 or J159)
- One East Asian Languages upper division course (e.g., EA 100, EA 102)
- Two electives selected in consultation with the adviser.

Total units required: 62

Note: Students with previous language experience will be required to take a placement exam with department language coordinators. Students in the heritage tracks or who place out of language courses will be required to take additional adviser-approved literature or culture courses offered by the department in order to meet the above unit requirements.

Honors Program

A senior undergraduate student who has completed 12 units of upper division language courses in the department, and who has a GPA of 3.5 in those courses and an overall average of 3.0 may apply for admission to the honors program. If accepted, the student will enroll in an honors course (any H195 course) for two consecutive semesters leading to the completion of an honors thesis, which must be submitted at least two weeks before the end of the semester in which the student expects to graduate. While enrolled in the honors program, the student will undertake independent advanced study under the guidance of the student's honors thesis adviser. Upon completion of the program, a faculty committee will determine the degree of honors to be awarded (honors, high honors, highest honors), taking into consideration both the quality of the thesis and overall performance in the department. Honors will not be granted to a student who does not achieve a minimum cumulative GPA of 3.3 in all undergraduate work in the University by the time of graduation.

The Undergraduate Minors

The Department of East Asian Languages and Cultures (EALC) offers four minor programs: Buddhism, Chinese, Japanese, and Korean. Each minor requires 20 units and five upper division courses (except where otherwise noted) in addition to fourth-semester language proficiency.

Minor in Buddhism

Proficiency in Chinese or Japanese equivalent to 10B. (Other relevant Asian languages may be substituted with adviser approval.) Five upper division courses: three courses in Buddhism; two additional courses

chosen in consultation with the adviser. Buddhism 50 may be substituted for one of the five courses.

Minor in Chinese

Chinese 10B or equivalent. Five upper division courses: three courses in Chinese; two additional EALC courses. Either 7A or 7B may be substituted for one of the five courses.

Minor in Japanese

Japanese 10B or equivalent. Five upper division courses: three courses in Japanese; two additional EALC courses. Either 7A or 7B course may be substituted for one of the five courses.

Minor in Korean

Korean 10B or equivalent. Five upper division courses: three courses in Korean; two additional EALC courses. Either 7A or 7B course may be substituted for one of the five courses.

Note: All minor courses require adviser approval and must be taken for a letter grade. EAP course(s) may be used to satisfy one of the electives; however, not all EAP courses will be approved for the minor.

Graduate Programs

MA and PhD programs are offered in Chinese Language and Literature and in Japanese Language and Literature. Within either area of specialization, students may focus on literary criticism, comparative studies, cultural history, linguistics, a specified period, or the like, but in every case students will be expected to acquire a solid grounding in the classical and modern versions of the primary language.

The primary purpose of our degree training is to prepare students to become scholars and teachers of advanced courses at the university level. Persons aiming solely at modern-language teaching will not find the program suited to their needs.

Information about the graduate program can be obtained from the department website. (<http://ealc.berkeley.edu/graduate>)

East European Studies

Please see the Slavic Languages and Literatures (p. 196) department for program and degree requirements.

Economics

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 530 Evans Hall, (510) 642-0822

Chair: James Powell, PhD

Department Website: Economics (<http://econ.berkeley.edu>)

Overview

Founded in 1903, our department is well-known for the excellence of its teaching and advising, with a strong reputation for producing outstanding PhD graduates, as well as rigorous and innovative economic research. In recent years, UC Berkeley economics PhD's have been hired at many other leading institutions, including Harvard, MIT, Yale, the U.S.

Federal Reserve, and the World Bank. We are also consistently ranked among the world's top research departments. Berkeley faculty have won five Nobel Prizes (<http://emlab.berkeley.edu/econ/awards.shtml/#nobel>), five John Bates Clark Medals (<http://emlab.berkeley.edu/econ/awards.shtml/#nobel>), and 21 Alfred P. Sloan Research Fellowships (<http://emlab.berkeley.edu/econ/awards.shtml/#nobel>) (an average of one per year since 1995). Berkeley economics faculty and students have done ground-breaking work in economic theory, econometrics, macroeconomics, and all major fields of applied research, and have served as policymakers at the highest levels, both in the US and abroad.

Admission to the Major

As an impacted major with a highly competitive admissions process, the economics major is capped. Students who want to apply to the economics major must have completed or be currently enrolled in all the major prerequisites. After Fall 2004, students admitted to Berkeley as freshmen must apply by their fifth semester of post-high school coursework unless they have fewer than 80 total units. This total includes coursework in progress but excludes high school enrichment units, e.g. Advanced Placement, International Baccalaureate, or other college units earned prior to high school graduation. Transfer students admitted to Berkeley in Fall 2006 and later are required to enroll in missing prerequisites and apply to the major during their first semester at Berkeley. The unit cap does not apply to transfer students.

For more information, please visit our website. (<http://econ.berkeley.edu/econ/ugrad/ugrad.shtml>)

Major Requirements

Prerequisites

One year of calculus (Mathematics 1A-1B or Mathematics 16A-16B) and one semester of statistics: either Statistics 20, 21, 25, 101, 102, 131A or 134 (the statistics course must have a calculus prerequisite); Economics 1 or 2; and Economics 100A, 100B, 101A, or 101B. At least one semester of the calculus/statistics requirement *must be completed at UC Berkeley*.

Lower and Upper Division Requirements

Economics 100A and 100B, or 101A and 101B, Econometrics (either Economics 140 or 141) and five upper division economics courses. All courses must be taken on a letter-graded basis.

Advising

All majors are encouraged to consult with faculty advisers and the undergraduate adviser frequently in planning their programs. Students planning to do graduate work in economics are urged to take more quantitative courses in economics.

Department Honors

Students interested in graduating with honors in economics should consult with a faculty adviser no later than their first semester of the senior year. The department recommends a student for graduation with honors based on: evidence of superior performance provided by a thesis written in the senior year, and the student's course grade record overall and in the major. The minimum major grade point average (GPA) requirement is 3.5 in upper division economics courses and 3.3 GPA overall. The senior thesis may be an extension of a seminar paper prepared under the continued guidance of a faculty member through enrollment in H195A/B.

Graduate Program

The graduate program trains doctoral students interested in pursuing advanced study and conducting original research in economics. A strong mathematics background is a must. Detailed information concerning admission, financial aid, and degree requirements may be found on the Department of Economics website (<http://bulletin.berkeley.edu/departmentsandsubjects/economics/%20http://www.econ.berkeley.edu/grad/home>).

New admissions to the graduate program are restricted to students pursuing the PhD degree. There is no external, terminal program for the MA degree; only students enrolled at the Berkeley Law or in other doctoral programs at Berkeley may enroll for an M.A. degree in economics if approval is given by both departments.

Other requirements for the internal M.A. degree are as follows:

1. Coursework in economic theory equivalent to Economics 101A-101B, 200A-200B, or 201A, 202A
2. Completion of 24 units of approved coursework, of which 12 units must be in graduate economics courses numbered 201 or greater
3. Satisfactory performance in two written field examinations (interested students should contact the graduate adviser for further details and an application at gradofc@econ.berkeley.edu)

Law and Economics

Berkeley Law and the Department of Economics sponsor a concurrent program which permits students to study for the degree of Juris Doctor (JD) while preparing for the PhD in economics. In four years, a well-prepared student can receive the law degree and also complete the pre-thesis requirements for the PhD. Further information may be obtained from the graduate adviser of the Department of Economics at gradofc@econ.berkeley.edu.

Education

Graduate School of Education (<http://gse.berkeley.edu>)

Office: 1501 Tolman Hall, (510) 642-5345

Dean: Judith Warren Little, PhD

School Website: Graduate School of Education
(<http://gse.berkeley.edu>)

Overview

The Graduate School of Education is committed to high-quality scholarship and professionalism in order to prepare future leaders of education practice, policy, and research. Faculty research and teaching are grounded equally in theory and practice.

The Graduate School of Education offers Doctor of Philosophy (PhD), Doctor of Education (EdD), Master's of Arts (MA), and credential degree programs. The PhD degree is designed for students interested in pursuing scholarly research and academic careers in education. The EdD is a professional degree designed for individuals seeking advanced professional preparation to become school administrators or other educational leaders. The MA degree serves the interest of students who want to carve out a career in education, either as an education researcher or as an education practitioner. Credential programs, which all contain an MA component, are designed for students who plan to work in schools

as teachers, principals, district and county administrators, and school psychologists.

Areas of Study

Degree and credential programs are grouped under three main areas of study: Cognition and Development; Language and Literacy, Society and Culture; and Policy, Organization, Measurement and Evaluation.

- The **Cognition and Development (CD)** (<http://gse.berkeley.edu/cognitionanddevelopment>) area of study focuses on the interplay among cognitive, social, and developmental processes in diverse areas of human knowledge and experience. Faculty concentrate on learning in mathematics, science, and technology, as well as a wide range of issues involving cognitive, social, and moral development. Faculty and student research typically occurs in field settings (e.g. classrooms), providing fertile sites for conceptual advances, as well as the improvement of educational practices. Cognition and Development supports both professional and academic programs, each enriching the other in courses and research opportunities.
- Faculty and students in **Language and Literacy, Society and Culture** (<http://gse.berkeley.edu/language-literacy-society-culture>) (**LLSC**) study, design, and participate in transformative approaches to individual and social development within schools and in diverse contexts of communities, workplaces, and social movements. They focus on methodically grounded examinations of talk and activity, and language and literacy, through the lens of sociocultural theories to understand and inform the ecology of learning and schooling. Of special concern is work toward equity and social justice for students, groups, families, and communities, including non-native speakers of English. Offerings include both professional and academic programs.
- Programs in **Policy, Organization, Measurement, and Evaluation** (<http://gse.berkeley.edu/policy-organization-measurement-evaluation>) (**POME**) emphasize the study of schools as institutions and school systems; the formulation and effects of educational policy; and methods of research, measurement, and evaluation. POME students enter as a cohort, take courses together, join faculty research groups, and cultivate their own areas of interest and expertise in education. POME faculty have strengths and interests that combine a focus on the institutions of schooling analyzed from various disciplinary perspectives, including sociology, economics, and history; experience in linking research, policy, and practice at the local, state, and national levels; a breadth and depth of methodological, measurement, and evaluation expertise to conduct policy-oriented research and to inform sound institutional leadership and decision making; and the analysis of and practice related to leadership in schools at both school and district levels.
- The **Leadership for Educational Equity Program (LEEP)** is a School-wide EdD program that offers a three-year course of study with evening, weekend, and summer schedule to accommodate needs of working professionals. LEEP uses a cohort model that builds professional relationships among peers. Students participate in school- and district-based residencies to undertake problem-based research. Students strive to understand how to create effective, equitable, and democratic schools that value cultural diversity.
- The **Graduate Group in Science and Mathematics Education (SESAME)** (<http://gse.berkeley.edu/other/sesame>) is an interdisciplinary academic unit dedicated to advancing the understanding and practice of learning and teaching in science and mathematics. SESAME's faculty include scientists, mathematicians, engineers, computer scientists, and education professors. Students are

expected to have or obtain at least master's-level competency in their mathematical or scientific discipline on the way to the PhDs.

Undergraduate Minor

The School of Education offers a minor in education for undergraduates currently enrolled at Berkeley. The minor in education provides an opportunity to examine systematically an institution that occupies a unique position in society and profoundly influences virtually everyone. This program is designed to enable students to develop a critical understanding of the relationship of education to the development of societies and individuals. Its focus is on the potential as well as the reality of diverse forms of education. The minor offers an opportunity for intellectual inquiry to broaden and complement students' work in their major fields of study. In the process, students will encounter the wide array of professional possibilities in the field of education, enabling those considering a career in the field to make an informed choice.

Egyptian

Please see the Near Eastern Studies department (p. 166) for program and degree requirements.

Electrical Engineering

Please see the Electrical Engineering and Computer Sciences Department (p. 89) for program and degree requirements.

Electrical Engineering and Computer Sciences

College of Engineering (<http://coe.berkeley.edu>)

Department Office: 231 Cory Hall #1770, (510) 642-3214

Computer Science Division Office: 385 Soda Hall, (510) 642-7699

Chair: David Culler, PhD

Associate Chair: Tsu-Jae King Liu, PhD

Department Websites: Electrical Engineering and Computer Sciences (<http://eecs.berkeley.edu>), **Computer Science (Engineering)** (<http://cs.berkeley.edu>)

Overview

The Department of Electrical Engineering and Computer Sciences (EECS) offers one of the strongest research and instructional programs in this field anywhere in the world. Our key strength is our cross-disciplinary, team-driven projects. The integration of Electrical Engineering (EE) and Computer Science (CS) forms the core, with strong interactions that extend into biological sciences, mechanical and civil engineering, physical sciences, chemistry, mathematics, and operations research. Our programs have been consistently ranked in the top three nationwide and worldwide by various organizations that rank academic programs.

Each year, top students from all parts of the world are attracted to UC Berkeley by the excellence of the faculty; the breadth of educational opportunities in EECS and campuswide; the proximity to the vibrant

California high-tech economy; and the Berkeley environment. The department's close ties to the industry, coupled with its commitment to engineering research and education, ensure that students get a rigorous, relevant, and broad education.

Faculty members at Berkeley are committed to research and discovery at the highest level, informed and creative teaching, and the creative desire to excel. The distinction of the EECS faculty has been recognized in a long list of prestigious honors and awards, including two National Medals of Science, three ACM Turing Awards, three IEEE Medals of Honor, 36 members of the National Academy of Engineering, seven members of the National Academy of Sciences and 14 fellows of the American Academy of Arts and Sciences.

Unlike many institutions of similar stature, regular faculty teach the vast majority of our courses, and the most exceptional teachers are often also the most exceptional researchers. The department's list of active teaching faculty includes seven winners of the prestigious Berkeley Campus Distinguished Teaching Award.

The mission of the EECS Department has three parts:

1. Educating future leaders in academia, government, industry, and entrepreneurial pursuit, through a rigorous curriculum of theory and application that develops the ability to solve problems, individually and in teams;
2. Creating knowledge of fundamental principles and innovative technologies, through research within the core areas of EECS and in collaboration with other disciplines, that is distinguished by its impact on academia, industry and society; and
3. Serving the communities to which we belong, at local, national, and international levels, with a deep awareness of our ethical responsibilities to our profession and to society.

Our strategy to accomplish this mission is simple: recruit and retain the very best faculty, students, and staff, and then empower them to direct and drive the creation and dissemination of knowledge. We know that we have succeeded in this mission when our students succeed, becoming leaders and serving society.

Electrical Engineering began on the Berkeley campus more than a century ago, with the hiring of the first electrical engineer, Clarence Cory, into the College of Mechanics. The early days focused on electric power production and distribution, and Cory's laboratory, in fact, provided the first light and power to the entire campus.

The evolution since then has been dramatic, accelerating rapidly in the latter half of the 20th century. The development of our world-class computer science faculty followed naturally from the synergies between electronics, systems theory, and computing. In the 21st century, EECS has become a broader field, defined more by its intellectual approach to engineering problems than by particular technical solutions. Broadly, EECS harnesses physical processes to perform logical functions, and hence easily extends beyond its core technology base in electronics to, for example, biological systems.

Current strengths in biosystems and computational biology, nanotechnology, artificial intelligence, concurrent and distributed systems, embedded systems, novel devices (such as organic semiconductors), robotics, advanced networking, computer security and trusted computing, energy, and sensor networks, complement beautifully our traditional strengths in physical electronics, integrated circuits, operating systems and networking, graphics and human-computer interaction, communications systems, computer architecture, control theory, signal

processing, the theory of computing, programming languages, scientific computing, electronic design automation, power systems, and database management systems. Many of our current research projects are focused on enormous societal challenges and opportunities such as energy efficiency, network intelligence, transportation systems, security, and health care. More than any other engineering discipline, EECS bridges the physical world and the semantic one, creating technologies to serve humanity.

Organizationally, the Department of Electrical Engineering and Computer Sciences smoothly integrates its world-class faculty with dedicated staff and extremely active and involved student groups. Our undergraduate programs recognize the daunting intellectual breadth of the field by offering a great deal of flexibility. These programs are accredited by ABET, Inc. (<http://www.abet.org>) and by the CAC, (<http://www.abet.org/accreditation>) the Computing Accreditation Commission of ABET, Inc.

Our graduate programs emphasize research, preparing students for leadership positions in industrial labs, government, or academia. Our laboratory and computing facilities are among the best anywhere, and have conceived many transformative inventions. Our research programs are well funded, and nearly all of our graduate students receive full financial support.

See the College of Engineering Announcement: A Guide to Undergraduate and Graduate Study (<http://coe.berkeley.edu/college-of-engineering-announcement>) for more information.

Undergraduate Programs

Under the auspices of the College of Engineering, EECS offers two undergraduate programs: Electrical and Computer Engineering (ECE) and Computer Science and Engineering (CSE). The CSE program puts a greater emphasis on computer science, whereas the ECE program puts a greater emphasis on electrical engineering. Both programs require the same set of five lower-division core courses in EECS (EE 20N, 40; CS 61A, 61B, and 61C) and nearly the same math and science courses. After satisfying program requirements at the lower-division level, students are free to choose from a variety of elective upper-division courses.

Our department offers two formal programs (options) within the EECS major: Electrical and Computer Engineering (ECE), and Computer Science and Engineering (CSE). Your selected program will eventually be noted on your transcript, but does not restrict the set of courses open to you and may be changed at any time.

The **ECE Program** is best suited for students interested in focusing on Electrical Engineering upper-division classes after completing the lower-division requirements. The transcripts of ECE students indicate that their degree is from the Electrical and Computer Engineering program. There are no specific requirements for the ECE program beyond those of the EECS major.

The **CSE Program** is best suited for students interested in focusing on Computer Science upper-division classes after completing the lower division requirements. The transcripts of students in CSE indicate that their degree is from the Computer Science and Engineering Program. In order to complete the CSE program, 16 units of the major's upper division units must come from CS courses.

Diplomas received by students in both the ECE and CSE program state that the students received a Bachelor of Science from the UC Berkeley College of Engineering. The diploma does not indicate the option or the

ECE or CSE program. The student's transcript indicates whether the program was ECE or CSE.

Curriculum and Requirements for the Bachelor's Degree

Students must complete a minimum of 120 units, in which they must satisfy the University of California and Berkeley campus requirements outlined in this catalog. In addition, students must complete the requirements for the College of Engineering. Full details on these requirements can be found in the College of Engineering Announcement: A Guide to Undergraduate and Graduate Study (<http://coe.berkeley.edu/college-of-engineering-announcement>) available online and the "EECS Undergraduate Notes (<http://eecs.berkeley.edu/Programs/Notes/index.shtml>)."

EECS Honors Degree Program

The Honors Degree Program is designed to provide very talented undergraduate students with more flexibility at the undergraduate level. Honors students select an academic concentration outside of EECS. In addition, students receive a special faculty adviser, engage in research, receive official notation of the honors degree on their Berkeley transcript, and are invited to special events with faculty and EECS Honors alumni.

For more information, read about the Honors Degree Program here. (<http://eecs.berkeley.edu/Programs/honors.html.html>)

Joint Major Programs

The joint major programs are designed to qualify students for employment in either of two major fields of engineering, or for positions where competence in both fields is required. Both majors are listed on the student's transcript. Two such majors are currently established:

- **EECS/Materials Science and Engineering:** For students interested in materials and devices. The program combines the study of materials from a broad perspective, as taught in MSE, with the study of their applications in electronic devices and circuits, as taught in EECS. Students selecting this double major have two faculty advisers, one from each major.
- **EECS/Nuclear Engineering:** Combines the traditional EE program with that in Nuclear Engineering, both of which share a concern for electrical power generation, automatic control, computer sciences, and plasmas. Students selecting this double major have two faculty advisers, one from each major.

Computer Science Leading to the Bachelor of Arts Degree

In addition to a CS major through the College of Engineering, which confers the BS degree, the Computer Science Division also offers the major through the College of Letters and Science, which confers the BA degree. An essential difference between the two majors is that the EECS program requires a greater number of math and science courses than the CS program, which requires a greater number of non-technical, or breadth, courses. The computer science major under L&S is not accredited. For further information about L&S computer science programs and requirements, see here. (<http://eecs.berkeley.edu/csugrad>)

Details about the computer science major offered through the College of Letters and Science also may be found under the course listings for Computer Science (http://sis.berkeley.edu/catalog/gcc_list_crse_req?p_dept_name=Computer+Science&p_dept_cd=COMPSCI&p_path=1) in this catalog.

Computing Service Courses

Students may earn a total of at most five units of credit toward graduation for courses labeled as "computing service" courses, which include at Berkeley the CS 9 courses and CS10 (and the following CS courses no longer taught CS 3, 3L, 3S; Engineering 110.) Students will receive no more than one unit of credit for each computing science course taken after the first or after any of the CS 61 courses. Any units beyond these limits will not count toward graduation, although they will count for the sole purpose of determining whether the study list falls within the minimum and maximum unit loads.

Course Materials Fee

The Department of Electrical Engineering and Computer Sciences charges a course materials fee for Electrical Engineering 143. The amount of the fee is listed in the Online Schedule of Classes (<http://schedule.berkeley.edu>).

Advanced Degree Programs

The Five-Year Bachelor/Master's Program in EECS (BA/MS or BS/MS)

The combined Bachelor/Master's program is designed to take outstanding EECS and CS L&S undergraduates immediately into an intensive two-semester program conferring the Master of Science degree. This combined program promotes interdisciplinary focus and is best suited to those who are more "professionally oriented," as opposed to those wishing to pursue a more traditional research-based, and discipline-specialized advanced course of study. As such, a distinguishing feature of this five-year program is its emphasis upon extended study in interdisciplinary, though allied, technical fields, such as physics, biology, and statistics, or in professional disciplines, such as business, law, or public policy. The program is aptly entitled, "Educating Leaders for the Emerging Global Economy," and reflects a growing need for those who are technically skilled and also possess an understanding of the business, legal, and social context of technology development and use.

Conferral of the degree requires reporting on a project (Plan II), as is required of our other master's students.

Complete information is available here. (<http://eecs.berkeley.edu/FiveYearMS>)

Graduate Programs

The EECS Graduate Program offers a comprehensive program geared toward research and teaching (Master of Science and Doctor of Philosophy). The Master of Science Program requires three to four semesters of study, while the Doctor of Philosophy Program is normally completed in five to six years. Admission into the graduate program is extremely competitive, but once admitted, students have a wide variety of cluster areas from which to choose an affiliation, and a large number of courses and seminars taught by leaders in their fields from which to design their study programs. Students apply to either the Electrical Engineering Division or to the Computer Science Division, although once they have been admitted to the department, the boundaries between the divisions are fluid. Students should apply to the division most appropriate to their principal area of interest.

Students whose principal interests are in the following areas should apply to Electrical Engineering:

- **Communications and Networking:** Includes information theory and coding (multiterminal problems, feedback, adversarial models, separation theorems and layering, low density parity check codes, VLSI implementation of codes, algorithms for decoding, message passing algorithms), wireless and sensor networks (ad-hoc, mobile and vehicular networks, multiple antennas, opportunistic communication, cognitive radio and spectrum sharing distributed source coding, distributed estimation, spatial sampling), network design and analysis (optical networking, market-based architectures, incentive compatibility, auction design, peer-to-peer networks, Quality of Service, communication for control, cross-layer optimization, network coding, and simulation tools, secure wired and wireless links, network availability and resilience, market based approaches, authentication).
 - **Control, Intelligent Systems, and Robotics:** Concerned with the general problem of modeling systems and machines, and then making them respond appropriately to inputs. Optimization and mathematical techniques play a key role, especially as systems of interest grow in scale. Control ranges from applications in semiconductor process control to hybrid and networked control to nonlinear and learning control, and includes interactions with faculty in Mechanical Engineering and Integrative Biology, as well as between Electrical Engineering and Computer Sciences. Robotics is interpreted broadly to include mobile autonomous systems from millimeter-sized mobile robots to three meter rotor span helicopters, fixed autonomous systems for assembly, as well as human augmentation capabilities, such as telepresence and virtual reality. Providing robots with image understanding capabilities is one of the key research areas, as well as using computer vision to assist humans.
 - **Design of Electronic Systems:** Includes electronic design automation (computer-aided design and optimization of complex hardware and software systems), embedded software systems (models of computation, specification languages, real-time systems, and hardware and software synthesis and compilation technologies), and modeling and verification (models of hardware and software systems together with analysis techniques that identify design flaws, performance problems, and vulnerabilities).
 - **Energy:** Includes new devices and energy sources (solar thermal electric generation, vibration energy harvesters, bio energy generation, biofuels, fusion energy simulations, plasma physics, ultra low power delivery systems, power electronics, and electrical machines), on-device energy (on-chip power supplies, power management for mobile electronics, intermittent energy storage, organic semiconductor photovoltaics, and nonconventional actuation), sensor networks (distributed power management, ambient power, energy management for microrobotics), system-wide issues (advanced power metering, stability of the power grid, preventing catastrophic failures, power grid security, large scale power network energy management, and demand response), and public policy (energy infrastructure in developing countries, energy issues in scaling device technology to low cost devices, and pricing policy and economic models).
 - **Integrated Circuits:** Includes applications (analog-to-digital and digital-to-analog conversion, automotive electronics, biosystems, computation, consumer electronics, instrumentation, medical systems, signal processing, ubiquitous electronics, and wireless communications), circuit design (high-speed digital and high-frequency analog circuits, microwave circuits, memories, nanoscale analog circuits, precision measurement, timing, voltages and currents, robust circuit design, and system architecture), devices and technology (bio/silicon interfaces, integrated sensors, mixed signal systems, mixed material systems, and microelectromechanical systems), and energy management (high-power circuits, on-chip power distribution, power/ performance tradeoffs, ultra-low-power circuits, and ultra-low-voltage circuits).
 - **Micro-Electro and Mechanical Systems (MEMS):** Includes microelectromechanical systems (electronic and biomedical applications, micro-robotics, resonators, sensors and actuators, and silicon structures), nanotechnology (carbon nanotubes, nanowires, molecular-scale structures, quantum dots, and biological materials), and optoelectronics (lasers, light emitting diodes, optical detectors, optical tweezers, optical communication, and solar cells).
 - **Physical Electronics:** Includes electromagnetics (high frequency integrated circuit design, simulation, waveguides, and wireless channels), electronic devices (integrated circuit devices, organic electronics, semiconductor technologies, and superconductive devices), micro/nano fabrication (fabrication technologies for semiconductor, electromechanical, photonics, and other micrometer and nanometer-scale systems, advanced processing modules, integration of heterogeneous systems, process modeling and simulation, lithography, and advanced metrology and manufacturing systems).
 - **Signal Processing:** Includes theory and algorithms (adaptive signal processing, machine learning, and signal modeling; indexing, searching, and retrieval; multirate and multi-channel processing; restoration and enhancement; signal analysis, identification, spectral estimation, and understanding; signal representation, compression, coding, quantization and sampling; statistical signal processing, detection, estimation, and classification; watermarking, encryption, and data hiding; wavelets, filter banks, time frequency techniques), signal processing applications (audio, speech, image, and video processing; graphics; biological and biomedical signals; computer vision; radar and lidar; geophysical signals; synthetic signals; and astronomical signals), signal processing systems (VLSI architectures; embedded and real-time software; capture, acquisition, and sensing; sensor networks; imaging; and auditory enhancement).
- Students whose principal interests are in the following areas should apply to Computer Science:**
- **Artificial Intelligence:** Includes knowledge representation and reasoning (logical and probabilistic formalisms and combinations thereof), machine learning and probabilistic inference (graphical models and statistical and computational learning theory), decision making (problem solving search, planning, games, Markov decision processes, and reinforcement learning), search and information retrieval (collaborative filtering, information extraction, image and video search, intelligent information systems), speech and natural language processing (parsing, machine translation, information extraction), speech recognition, computer vision, and robotics.
 - **Computer Architecture and Engineering:** Includes processor and system design (multicore, parallel, and cluster computing architectures), domain-specific architectures, reconfigurable computing, memory hierarchies, performance analysis (theoretical analysis, simulation, and emulation hardware), low-power design, VLSI implementation, compiler technology, network interfaces, storage systems, and quantum computing architectures.
 - **Database Management Systems:** Includes scalable techniques for data acquisition (sensor tasking, sampling), data integration and cleaning (federated databases, deep web, structure induction, anomaly detection), query processing and search (structured data, text and web repositories, personal information, data streams), distributed and parallel data management (cluster computing, peer-to-peer Internet software, wireless sensor networks and RFID), storage (transaction

management, indexing, stream archiving), inference and mining (probabilistic databases, data reduction, sketching), data security and privacy (verifiable and privacy-preserving multiparty query execution), declarative data-intensive systems (declarative networking, sensor tasking, inference), data visualization (visual querying, data display, interactive data analysis and cleaning), and theoretical foundations (query optimization, indexability, stream algorithms).

- **Graphics:** Includes geometric modeling (splines, subdivision surfaces, rapid prototyping, computer aided design, and surface optimization), rendering (real-time rendering, global illumination, monte carlo sampling, image-based rendering, inverse rendering, and vision-simulation, fluid simulation, video games), imaging (computational photography and video, texture synthesis, appearance acquisition).
- **Human-Computer Interaction:** Includes visualization (multivariate data visualization, cartographic visualization, 3D visualization, graphical perception, collaborative analysis), context-aware computing (activity analysis, smart spaces, location-aware systems, privacy technologies), perceptual interfaces (vision-based interfaces, speech and discourse interfaces), and collaboration and learning (pattern-based authoring tools, English as a second language learning, group collaboration technologies).
- **Operating Systems and Networking:** Includes internet architecture (overlay architectures, distributed hashing, naming, next generation network design, peer to peer networking, mobile and ad-hoc networking), security (malware detection, secure routing, testbeds for security, operating systems security, intrusion detection, availability, and authentication), distributed systems (experimental testbeds, distributed logging, distributed software systems, time synchronization), operating systems (OS for sensor networks, monitoring OS behavior for malware, detection, performance analysis, programming languages for systems, and power aware computing), network economics (price of anarchy, game theory), and technology for developing regions.
- **Programming Systems:** Includes programming language design and implementation (compiler optimization, semantics), programming environments and tools (monitoring, debugging), program analysis and verification (model checking, static analysis, theorem proving), and software design and synthesis (software design for parallel computing, embedded systems, numerical computing, symbolic computing, and distributed computing).
- **Scientific Computing:** Includes parallel computing (parallel high speed libraries, architectures), computer algebra (symbolic mathematical computation), mesh generation, matrix computing (language design for scientific computing, algorithms for memory and cache optimization for numerical linear algebra, grid based computing, extended precision arithmetic, redundant arithmetics), numerical methods (extended precision arithmetic, reliable floating point standards, architectural and run time implications of floating point standards, programming language implications of floating point standards), and animation (simulation and visualization of physical processes).
- **Security and Privacy:** Spans the development of mechanisms and systems designed for operation in the presence of adversaries who either seek to subvert the correct operation of the system, misuse its capabilities, or unduly extract information from it. Includes security and privacy in the context of software, languages, operating systems, networking, distributed/mobile/embedded systems, malware analysis and defense, usability, human factors, anonymity, threat evolution, economic and legal issues, and cryptography.
- **Theory:** Includes computational complexity (intractability, complexity classes, completeness, approximability, randomness), parallel

and distributed computation, design and analysis of algorithms (including Monte Carlo algorithms, optimization algorithms), quantum computation, computational learning theory, computational geometry, computational biology, cryptography, and logic and concurrency theory.

Students with interests in the following areas can apply to either division:

- **Biosystems:** Includes systems neuroscience (sensory motor control, vision, audition, biomimetics, brain-machine interfaces, and computational neuroscience), biomedical systems (sensors, healthcare systems, physiological modeling, medical imaging and bioimage analysis), cellular systems (protein structure modeling; gene regulatory networks; synthetic biology; computational systems biology; cellular signaling pathways, transport, and metabolism; and self-assembling systems), and bioinformatics (comparative genomics, genetic analysis, phylogenetics, molecular evolutionary modeling, and gene regulatory networks).
- **Education:** Includes aspects of computer science and engineering education (especially at the high school and undergraduate levels), gender issues of science education, and the teaching of technology.

With the exception of those in the Five-Year Bachelor/Master's Program, most who enter the graduate program do so with the expectation of pursuing their doctorates. The department does, however, accept "Masters Only" students and offers three types of degrees, discussed below.

Master's of Science (MS)

The department awards two types of Master's of Science degrees in:

- **Engineering—EECS:** For EE students with a BS degree from an accredited engineering program, or for those who have the equivalent of a BS degree as determined by the department.
- **Computer Science:** For CS students with a BS in computer science, or an equivalent as determined by the department.

Students may choose to pursue Plan I, which requires writing a thesis, or they may pursue Plan II, which requires a report on a project. In either case, earning the MS degree usually takes from 1.5 to 2 years to achieve.

Masters of Engineering (MEng)

The Master of Engineering (MEng) in Electrical Engineering & Computer Sciences, first offered by the EECS Department in the 2011-12 academic year, is a professional masters with a larger tuition and is designed for students who plan to join the engineering profession immediately following graduation. The accelerated program is designed to develop professional engineering leaders of the future who understand the technical, economic, and social issues of technology. This one-academic year interdisciplinary experience includes three major components: an area of technical concentration, courses in leadership skills, and a rigorous capstone project experience. More information about this degree program can be found at the MEng Program description (<http://www.eecs.berkeley.edu/MEng>) and the College of Engineering Fung Institute. (<http://www.funginstitute.berkeley.edu/masters>)

Master of Advanced Study in Integrated Circuits (MAS-IC)

The Master of Advanced Study in Integrated Circuits (MAS-IC) is an online part-time degree program focused on developing an in-depth and advanced knowledge in the field of Integrated Circuits, including but not restricted to the digital, mixed-signal and radio-frequency domains. The program is targeted to working professionals who are seeking to advance

their careers by getting in-depth state-of-the-art knowledge and becoming a true expert in the field of Integrated Circuits, which has revolutionized society over the past five decades and will continue to do so even more in the decades to come.

Doctor of Philosophy (PhD)

The department offers two types of PhD degrees, awarded to students under the same conditions as the corresponding MS degrees, above:

- *Engineering—EECS*
- *Computer Science*

The principal requirements for the PhD are:

1. Coursework from a major subject area and two minor subject areas;
2. The departmental preliminary requirement, consisting of an oral exam and breadth courses, which differ for EE and CS;
3. The qualifying exam; and
4. The dissertation.

There is no foreign language requirement. The median time for completion for the PhD is 5.5 years.

For further information on establishing major and minor subject areas, division-specific requirements for prelims and breadth requirements, qualifying exam, and the dissertation, please refer to the Graduate Handbook (<http://eeecs.berkeley.edu/Gradnotes>) prepared by the Graduate Admissions Office for more information.

Designated Emphasis: In keeping with the departmental priority given to cross-disciplinary applications of engineering and computer science, graduates may also choose to add a designated emphasis to their program. A designated emphasis is a specialization offered by existing PhD programs that provides multidisciplinary training and research opportunities outside of EECS proper, but in areas that share overlapping interests and goals. At present, five such designated emphases are available to our doctoral students in:

- Communication, Computation and Statistics
- Computational and Genomic Biology
- Computational Science and Engineering
- Energy Science and Technology
- Nanoscale Science and Engineering
- New Media

Students who pursue a DE receive recognition of their specialization on their transcript and diploma are well positioned to compete for preferred jobs in academia and industry.

Endocrinology

College of Letters and Science (<http://ls.berkeley.edu>)

**Group Office: 299 Life Science Addition,
(510) 643-7330**

**Chair: Gary L. Firestone, PhD (Department of
Molecular and Cell Biology)**

Program Web Site: Endocrinology (<http://endo.berkeley.edu>)

The Graduate Program

The faculty associated with the Graduate Group in Endocrinology leading to the MA and the PhD degrees have diverse interests representing endocrinology in the broadest sense: chemical mediators in the living world directed by autocrine, paracrine, endocrine and ectohormonal factors. The main goal of our program is to engage students in the interdisciplinary aspects of the field of Endocrinology through seminars, courses and our diverse faculty research perspectives that range from structural, molecular and cellular endocrinology through organismal and comparative endocrinology to chemical ecology. Our program faculty encompasses hormone-oriented research programs such as cancer biology, signal transduction, drug design, membrane biology, virology, metabolism, differentiation, morphogenesis, toxicology and gene transcription. Graduates from our Endocrinology program have transitioned into careers in a variety of fields including education, research in both academic and industry settings, government regulation, and private business.

For more information, please go to our website. (<http://endo.berkeley.edu>)

Energy and Resources Group

Special Studies

**Department Office: 310 Barrows Hall,
(510) 642-1640**

**Chair: Harrison Fraker, MFA (Department of
Architecture)**

Group Website: Energy and Resources Group
(<http://erg.berkeley.edu>)

Overview

The Energy and Resources Group (ERG) is an interdisciplinary academic unit of UC Berkeley, conducting programs of graduate teaching and research that treat issues of energy, resources, development, human and biological diversity, environmental justice, governance, global climate change, and new approaches to thinking about economics and consumption. Established in 1973, ERG offers two-year MA and MS degrees in Energy and Resources, as well as a PhD and an undergraduate minor.

Faculty

The faculty of ERG consists of eight professors of energy and resources plus some 100 affiliated faculty members whose main appointments span all five colleges and four of the schools of the Berkeley campus, as well as the University's Lawrence Berkeley and Lawrence Livermore National

Laboratories. The chair is normally drawn on a rotating basis from the affiliated faculty.

Students

There are approximately 60 graduate students enrolled in ERG degree programs, about half of them doctoral candidates. The students come from a wide variety of backgrounds—engineering, natural sciences, social sciences, and humanities. The characteristics they have in common are an interest in interdisciplinary approaches to energy and resource issues and the intellectual credentials to succeed in a rigorous academic program. All receive training at ERG in the technological, environmental, economic, and sociopolitical dimensions of energy and resource issues while pursuing additional coursework and individual research tailored to their interest and backgrounds.

Graduates

ERG graduates are employed across the US and around the world in universities, governmental and international agencies, legislative staff positions, national laboratories, public and private utilities, other energy and resource companies, consulting firms, and public-interest organizations.

Undergraduate Courses

ERG offers an undergraduate minor in the field of energy and resources. The undergraduate courses in ERG deal with the essence of energy and resource issues on both a national and global level in their technical, environmental, sociopolitical and economic aspects. The courses provide both basic surveys of the field and introductory training in interdisciplinary research methods. There are no prerequisites for enrollments in the courses unless specifically noted otherwise in the descriptions.

For information on the requirements for the undergraduate minor, please see the program's website (http://erg.berkeley.edu/info/undergraduate_minor.shtml).

Graduate Courses

The graduate courses in ERG provide advanced training in interdisciplinary analysis and research. Individual courses review current developments in the field or emphasize particular disciplinary perspectives: economics, resources, politics, public policy, or environmental sciences.

Graduate Programs

Admission

Applications for both the Masters and PhD programs are considered once a year for fall semester admission only. Continuing students may be recommended for admission to the PhD program upon completion of their master's work.

Master's Degree Requirements

The purpose of the ERG Master's program is to educate the next generation of interdisciplinary leaders. Specifically, students are taught the range of methods and subjects they should be able to understand, advance, and critique to address critical issues stemming from the interaction of humans and the environment. To that end, the requirements for the ERG Master's degree are both broad and deep, stressing analytic,

methodological, theoretical, and practical approaches to problems in energy, resources, and the environment.

The course requirements provide for a substantive introduction to the disciplinary approaches that are employed in studying energy and resource issues. The requirements also ensure experience in interdisciplinary analysis applied to a key resource concern. The curriculum provides an opportunity—through a topical cluster and an independent project—to extend and deepen the areas of investigation and understanding to satisfy the intellectual interests of each student.

The curriculum is intended to serve those students for whom the Master's degree will be the final formal education in support of a professional career and also those students who intend to continue their education, for example by pursuing a PhD in Energy and Resources.

To obtain a Master's degree from ERG, each student must meet the following requirements:

- Complete a minimum of 40 post-baccalaureate units.
- Complete a minimum of 18 units of graduate-level study in energy and resources, some of which can be fulfilled by courses from other departments and schools.
- Complete the ERG Masters Degree Series:
 - ER 201: Interdisciplinary Analysis in Energy and Resources (3 units)
 - ER 299: Research Skills (2 units)
 - ER 292C: Masters Project Development (2 units)
 - ER 292D: Masters Project Presentation (2 units)
 - ER 295: ERG Colloquium (1 unit) Two semesters are required to ensure exposure to a broad array of topics and approaches.
- Six additional units of approved graduate-level courses.
- Complete one course from each of the areas A-E listed below. Teaching and research in the Energy and Resources Group draws heavily on four academic traditions, as they are applied to the interactions of societies with resources and the natural environment: environmental science; resource and environmental economics; social science approaches to energy, resources and the environment; engineering approaches to energy, resources and the environment. Students must complete at least one course in each of the A-E topics.
 - A: Interdisciplinary Energy and Resource Analysis
 - B: Environmental Science
 - C: Resource and Environmental Economics
 - D: Social Science Approaches to Energy, Resources and the Environment
 - E: Engineering Approaches to Energy, Resources and the Environment
- Complete a Master's project; an undertaking of an independent investigation that culminates in an oral presentation before the ERG community and a written report approved by two faculty readers.
- Complete a cluster of three courses (minimum of 9 units) in a subject area defined by the student and approved by his/her adviser. This cluster is designed to ensure depth of study in a topic within the domain of Energy and Resources. At least one of these courses (3 units) must be a graduate-level course. Suitable areas include (but are not limited to) climate change, energy, water, environmental justice, and development. The cluster may include one of the courses used to satisfy the area A-E requirement, and cluster courses can fulfill the requirement of 18 units of graduate-level study in energy and resources.

The following limits and restrictions apply on credit toward the 40-unit requirement: A maximum of 4 units of credit of 299 units(individual research) can be counted. 298 units (group study) cannot be counted. All courses that are used to satisfy degree requirements must be taken for a letter grade if that option is available. A minimum GPA of 3.0 ("B") in all courses completed must be achieved.

PhD Degree Requirements

The course requirement for admission to the PhD program is that the totality of the student's coursework after the Bachelor's degree, including courses taken at other universities and inside and outside of ERG at Berkeley, must meet the substantive and unit requirements for the ERG MA or MS degree. Thus a student entering the PhD program from the ERG Master's program will already have met the course requirement for the PhD. Students entering with other Master's degrees usually need additional coursework at ERG to meet the requirements.

There is no formal language requirement for the PhD degree. However, those students conducting research in a non-English speaking country must demonstrate competency in the language of the country.

After the doctoral student and his or her advisers have agreed on a subject for the dissertation, the student must defend in a three-hour oral examination the suitability of the topic and his/her preparation for attacking it. This exam, called the Qualifying Examination, is conducted by a committee of four faculty members chosen by the student, in consultation with his/her faculty adviser and subject to the approval of the Graduate Dean.

This examination should be taken at least one year before the expected completion of the dissertation. The final requirement for the PhD is completion of the dissertation to the satisfaction of a committee consisting of three faculty advisers/readers chosen by the student, subject to approval by the Graduate Dean. The PhD degree in Energy and Resources is typically completed three to five years beyond the Master's degree.

Contact the Energy and Resources Group, 310 Barrows Hall #3050, University of California, Berkeley; Berkeley, CA 94720-3050; (510) 642-1640; or visit the website (<http://erg.berkeley.edu>). (<http://erg.berkeley.edu>)

Engineering

College of Engineering (<http://coe.berkeley.edu>)

Office of the Dean: 320 McLaughlin Hall #1700, (510) 642-5771

Dean: S. Shankar Sastry, PhD

College Website: Engineering (<http://coe.berkeley.edu>)

Overview

The Engineering—Undeclared Program is for students who are interested in pursuing an engineering education but are undecided on a particular major within the college.

Students admitted to the program enjoy the benefit of a team comprised of an adviser who works with undeclared students and faculty from each major. Together they help students in the program explore their academic interests, understand and complete requirements and select a major. The common first year engineering curriculum is supplemented with introductory seminars and courses, such as Engineering 92, BioEng 24 and various major courses and/or Freshman Seminars, which are intended to generate enthusiasm for and develop a better understanding of the different engineering fields.

Students admitted into the program must declare a major by the end of their fourth semester, and if in good academic standing, may choose from any of the College of Engineering majors. For detailed information on these majors, see the corresponding sections of this Bulletin and the College of Engineering Undergraduate Guide available online. (<http://coe.berkeley.edu/guide>)

Admission to Engineering—Undeclared

Freshman applicants interested in applying to the Engineering—Undeclared Program should follow the procedures outlined in the Undergraduate Education (p. 6) section of this Bulletin. Junior transfer applicants may not apply to the program.

Historically, the Engineering—Undeclared Program admits from the strongest applicants to the College of Engineering; admission to this program is generally more competitive than admission to other engineering majors. Applicants who know which field of engineering they wish to study should apply to that major.

Curriculum Overview

The Engineering Undeclared curriculum provides students the opportunity to explore the various majors in the College of Engineering while completing the core Math, Physics and Chemistry courses required of all Engineering students in their first two years.

Undergraduate Programs

The College of Engineering's bachelor of science programs are designed to equip graduates with a full command of engineering principles and practice, and the tools to become leaders in their chosen profession. The lower division curriculum emphasizes foundations in mathematics, science and engineering, leading to more focused upper division coursework in one of the engineering programs, and in many cases, specific specializations or emphases within the program. The curriculum also calls for study of the humanities and social studies to supply additional skills needed to compete in a global economy.

Degree Requirements

Students must complete a minimum of 120 units, in which they must satisfy the University of California and UC Berkeley campus requirements outlined in this Bulletin. In addition, students must complete the requirements for the College of Engineering and for one BS program. Full details on these requirements can be found in the *College of Engineering Announcement: A Guide to Undergraduate and Graduate Study* (<http://coe.berkeley.edu/college-of-engineering-announcement>).

Accreditation

The following programs are accredited by the Engineering Accreditation Commission of ABET, Inc., 111 Market Place, Suite 1050, Baltimore,

MD 21202-4012; (410) 347-7700: civil engineering, electrical and computer engineering, industrial engineering and operations research, materials science and engineering, mechanical engineering, and nuclear engineering. In addition, the computer science and engineering program is accredited by the Computing Accreditations Commission of ABET, Inc.

Graduate Programs

The College of Engineering offers Master of Science (MS), Master of Engineering (MEng) and Doctor of Philosophy (PhD) degrees. See Overview above or the section for your department of interest for information on specific degrees awarded by department. The Master of Science and Doctor of Philosophy degrees emphasize engineering and applied sciences, while the Master of Engineering degree program emphasizes advanced professional studies.

Degree Requirements

Graduate students must follow the degree and scholarship requirements outlined in the Graduate Education (p. 16) section of this Bulletin and in the Graduate Division's *Guide to Graduate Policy* (<http://grad.berkeley.edu/policies>).

Graduate Admission

Interested applicants should follow the procedures outlined in the Graduate Education (p. 16) section of this Bulletin. See the website of your department or program of interest for further details.

Note: Students may not apply for the MS only, although it may be awarded to students pursuing work toward the PhD after fulfillment of the appropriate requirements.

Engineering Science

College of Engineering (<http://coe.berkeley.edu>)

Program Office: 230 Bechtel Engineering Center, (510) 642-8790

Chair: Robert Harley, PhD

Program Website: Engineering Science (<http://engineeringsscience.berkeley.edu>)

Undergraduate Program

The undergraduate Engineering Science Program is multidisciplinary and interdisciplinary. The majors consist of closely related fields of the natural sciences, mathematics, physics, and engineering. The majors offered within the Engineering Science Program prepare students especially for advanced graduate study in engineering or the natural sciences. The four engineering science majors include engineering mathematics and statistics, engineering physics, and environmental engineering science, and energy engineering. Applicants may apply to any of the engineering science majors. Students will be advanced to the upper division in engineering science upon satisfactory completion of the lower division requirements.

For more information, see the College of Engineering Undergraduate Guide (<http://coe.berkeley.edu/guide>).

Major Requirements

Students must complete a minimum of 120 units, in which they must satisfy the University of California and UC Berkeley campus requirements

outlined in this Bulletin. In addition, students must complete the requirements for the College of Engineering and one of the engineering science majors. Full details on these requirements can be found in the College of Engineering Undergraduate Guide (<http://coe.berkeley.edu/guide>).

- Energy Engineering (<http://engineeringsscience.berkeley.edu/energy-engineering>)
- Engineering Mathematics and Statistics (<http://engineeringsscience.berkeley.edu/engineering-mathematics-and-statistics>)
- Engineering Physics (<http://engineeringsscience.berkeley.edu/engineering-physics>)
- Environmental Engineering Science (<http://engineeringsscience.berkeley.edu/environmental-engineering-science>)

Engineering--Joint Major Programs

College of Engineering (<http://coe.berkeley.edu>)

Program Office: 230 Bechtel Engineering Center, (510) 642-7594

Dean: S. Shankar Sastry, PhD

Program Website: Engineering-Joint Major Programs (<http://coe.berkeley.edu/joint-majors>)

Overview

The joint major programs are designed for students who wish to undertake study in two areas of engineering in order to qualify for employment in either field or for positions in which competence in two fields is required. These curricula include the core courses in each of the major fields. While they require slightly increased course loads, they can be completed in four years. Both majors are shown on the student's transcript of record.

Admission directly to a joint major is closed to freshmen and junior transfer applicants. Students interested in a joint program may apply to change majors during specific times in their academic progress. See the College of Engineering joint majors website (<http://coe.berkeley.edu/joint-majors>) for complete details.

The joint major programs currently offered are listed below:

- Bioengineering/Materials Science and Engineering (<http://coe.berkeley.edu/students/guide/joint-majors/bioe-mse.html>)
- Electrical Engineering and Computer Sciences/Materials Science and Engineering (<http://coe.berkeley.edu/students/guide/joint-majors/eecs-mse.html>)
- Electrical Engineering and Computer Sciences/Nuclear Engineering (<http://coe.berkeley.edu/students/guide/joint-majors/eecs-ne.html>)
- Materials Science and Engineering/Mechanical Engineering (<http://coe.berkeley.edu/students/guide/joint-majors/mse-me.html>)
- Materials Science and Engineering/Nuclear Engineering (<http://coe.berkeley.edu/students/guide/joint-majors/mse-ne.html>)
- Mechanical Engineering/Nuclear Engineering (<http://coe.berkeley.edu/students/guide/joint-majors/me-ne.html>)

In addition to the joint major programs within the College of Engineering listed above, two joint major curricula involving the College of Engineering and the College of Chemistry are offered. These are: Chemical Engineering/Materials Science and Engineering; and Chemical Engineering/Nuclear Engineering.

Details on the chemical engineering joint major programs and curricula can be found in the Announcement of the College of Chemistry (http://chemistry.berkeley.edu/student_info/undergrad_info/publications). Students interested in one of the chemical engineering joint majors should contact the College of Chemistry (<http://chemistry.berkeley.edu>) for more information.

Engineering--Undeclared

College of Engineering (<http://coe.berkeley.edu>)

Engineering Student Services: 230 Bechtel Engineering, (510) 642-7594

Dean: S. Shankar Sastry, PhD

Program Website: Engineering (undeclared)—Undeclared (<http://coe.berkeley.edu/engineering-undeclared>)

Overview

The Engineering—Undeclared Program is for students who are interested in pursuing an engineering education, but are undecided on a particular major within the college.

Students admitted to the program enjoy the benefit of a team comprised of an adviser who works exclusively with undeclared students and faculty from each major. Together they help students in the program explore their academic interests, understand and complete requirements and select a major. The common first year engineering curriculum is supplemented with introductory seminars and courses intended to generate enthusiasm for and develop a better understanding of the different engineering fields.

Students admitted into the program must declare a major by the end of their fourth semester, and if in good academic standing may choose from any of the College of Engineering majors, including: bioengineering, civil engineering, electrical engineering and computer sciences, engineering mathematics and statistics, engineering physics, environmental engineering science, industrial engineering and operations research, materials science and engineering, mechanical engineering, and nuclear engineering. For more information on these majors, see the corresponding sections of this catalog and the *College of Engineering Announcement: A Guide to Undergraduate and Graduate Study* (<http://coe.berkeley.edu/college-of-engineering-announcement>) available online.

Admission to Engineering—Undeclared

Freshman applicants interested in applying to the Engineering—Undeclared Program should follow the procedures outlined in the Undergraduate Education (<http://catalog.berkeley.edu/education.html>) and College of Engineering (p. 96) sections of this bulletin. Junior transfer applicants may not apply to the program and must choose a specific major.

Historically, the Engineering—Undeclared Program admits from the strongest applicants to the College of Engineering; admission to this program is generally more competitive than admission to other engineering majors. Applicants who know which field of engineering they wish to study should apply to that major.

English

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 322 Wheeler Hall, (510) 642-3467

Department Chair: Katherine O'Brien O'Keefe, PhD

Department Website: English (<http://english.berkeley.edu>)

Overview

The Department of English offers courses in literature, in language, and in writing. Our courses in literature have many different focuses: major authors, historical periods, genres, critical theories and methods, as well as cultural and multicultural studies. Courses in language offer instruction in both the history and the structure of the English language. Writing courses offer training in both expository and creative writing.

The major in English is designed to introduce students to the history of literature written in English, to acquaint them with a variety of historical periods and geographical and cultural regions of English language and writing, to create an awareness of methods and theories of literary and cultural analysis, and to provide continued training in critical writing. Before declaring the major, students must have completed the Reading and Composition requirement of the college.

The core of the major consists of six courses: English 45A-45B-45C, a course in Shakespeare, an upper division course in literature before 1800, and one upper division seminar: English 190 or English H195A/B. English courses 45A-45B-45C are an intensive survey of literature in English from Chaucer through the 20th century, including British, American, and Anglophone writing. Together with the required course in Shakespeare, this sequence provides a foundation on which to build more specialized upper division coursework. Prerequisites, as well as a detailed description of major requirements, may be found under "Major Program" below.

Entry Level Writing Requirement

Students must have fulfilled the Entry Level Writing Requirement before taking any course in the Department of English. For further information, see the College Writing Programs section of this bulletin (p. 75), or the information contained in the Undergraduate Education section of this bulletin (p. 9).

Note: Specific topics in the following staff courses vary from semester to semester: English 24, 31AC, 39, 84, 102, 133T, 135AC, C136, 137T, 138, 139, 152, 165, 165AC, 166, 166AC, 170, 171, 172, 173, 174, 176, 177, 180N, 180R, 180Z, 190, 201A, 201B, 203, and 250.

Many of the courses listed below have limited enrollments.

Major Requirements

The English major consists of no fewer than 12 courses (not including R1A-R1B), of which at least seven must be upper division courses. Six of these must be the core courses noted above; the remaining courses are electives.

Foundational Courses

All majors must take English 45A-45B-45C (or upper division paired equivalents, when approved by a major adviser) plus one of the following Shakespeare courses: English 17, 117A, 117B, 117J, or 117S. All these required courses must be taken for a letter grade.

Students may declare the major once they have taken 30 units, satisfied the L&S Reading and Composition requirement, and completed these *two* major requirements:

1. 45A or 45B; and
2. One of the following: Shakespeare (see list above), 45A, 45B, or 45C

Upper Division Courses

Of the 12 courses required for the major, at least seven must be upper division.

Pre-1800 Course

One upper division course in British, American, or Anglophone literature from an historical period before 1800 is required and must be taken for a letter grade. Standard course offerings that meet this requirement include English 104, 105, 110, 111, 112, 114A, 114B, 115A, 115B, 118, 119, 120, 125A, and 130A; this requirement may not be fulfilled by English C107 or any Shakespeare course. (*Note:* Certain designated sections of English 190 can be used to satisfy the pre-1800 requirement.)

Seminar

One upper division seminar-English 190 (Research Seminar)-is required and must be taken for a letter grade.

Note: With the approval of a major adviser, students may count up to two upper division courses in departments other than English toward the major. The request for course approval should be grounded in a compelling intellectual rationale, one that explains how the student's work for the English major will be enriched through the inclusion of the particular outside course the student wishes to take. There is no pre-approved list of courses. For appropriate courses outside English, consult the listings for Comparative Literature, Ethnic Studies, foreign language departments, History, History of Art, Linguistics, Philosophy, Rhetoric, Women's Studies, etc. Students gaining 8 units or more of credit toward the English major from education abroad programs normally will not be permitted to count additional upper division coursework from other Berkeley departments.

Meeting with Major Adviser

English majors should meet with a faculty adviser no later than the beginning of the semester following declaration to plan their courses of study.

Pass/Not Pass

English majors are permitted to take no more than two of the 12 required courses on a *pass/not pass* basis. These two courses may not include

any of the specifically required courses, i.e., 45A-45B-45C (or their upper division equivalents), Shakespeare, the pre-1800 course, English 190.

Summer Session Courses

Two 3-unit summer session courses taken at Berkeley may be counted toward the major, one of which must be taken through the Department of English. One of these courses may be taken at another institution, with approval. Courses taken through the Department of English at Berkeley during summer session do not require major adviser approval. For courses taken elsewhere (or outside the major), students must petition for approval by providing documentation, including a course syllabus and a transcript showing the completion of the course.

Education Abroad Programs

Credit toward the major for coursework completed through an education abroad program is determined by a major adviser on a case-by-case basis. Students should submit documentation (e.g., course descriptions, syllabi, completed exams, papers, and other written work) to demonstrate that the education abroad course is comparable in coverage, rigor, and substance to a Berkeley upper division course. Students gaining 8 units of credit or more toward the English major for EAP courses normally will not be permitted to count additional upper division coursework from other Berkeley departments toward the major. Two literature courses in a foreign language will be routinely counted toward the major, if the major adviser determines that the courses meet Berkeley academic standards.

Internships

Students may apply to a faculty adviser to receive course credit (either as a 99 or 199) for an internship. No more than 2 units will be awarded on a pass/not pass basis. Students must provide official documentation about the internship and, upon completion of this program, a statement from the internship director that describes duties that the student performed. In addition, students must produce critical or creative writing on a topic related to the internship. This writing will be assessed by a Department of English faculty member who has agreed in advance of the internship to supervise the student. This faculty member will be the instructor of record for the 99/199. *Note:* Students must register for Summer School Session C for summer internships.

Extension and Online Courses

Only one UC Berkeley Extension or Online course may be counted toward the major. No UC Berkeley Extension or Online course may be used to satisfy the core requirements for the major: 45A/45B/45C (or their upper division equivalents); Shakespeare; 190; or the pre-1800 requirement. To count toward the major, UC Berkeley Extension or Online courses must be comparable in coverage, rigor, and substance to department courses. Students seeking to count a UC Extension or Online course toward the major should submit course materials and other relevant documentation to a Department of English major adviser or to the department's Director of Undergraduate Studies for assessment.

Honors Program

H195A-H195B is a two-semester course, graded IP at the end of the first semester. Honors in English cannot be granted without the successful completion of this course. Students who take H195A-H195B may choose to waive their English 190 requirement. H195A is organized as a course in literary criticism working toward the formation of a thesis topic. H195B will include regular meetings with the thesis adviser plus small group meetings with the H195 instructor. During the second semester each student will write an honors thesis of 40-60 pages. Completion of the thesis is required for a passing grade in the course. Students with an overall GPA of 3.51 or higher and a GPA of 3.65 or higher in courses

taken at Berkeley in the major are eligible to apply. Those accepted must enroll in H195A for the fall semester of their senior year. There may be more than one section offered per semester.

Minor Requirements

Students in the College of Letters and Science may complete one or more minors of their choice, normally in a field both academically and administratively distinct from their major. English majors may not complete a minor in the Department of English.

The minor in English requires the completion of at least five upper division courses taken for a letter grade, of which at least three must be taken at Berkeley, with a GPA of at least 2.0.

Students may register for the English minor once they have declared another major and completed one upper division course in the Department of English. At that time, students should fill out a Minor Registration Card, to be kept on file in the Department of English. After completing the five courses or during their final semester at Berkeley, students should meet with a minor adviser to complete the Minor Completion Petition.

Please see the Department of English website (<http://english.berkeley.edu>) for additional details regarding the English minor.

Graduate Program

Students are admitted to graduate studies only in the fall semester. The GRE General Test and Subject Area Test in Literature are required.

MA Degree

The Department of English does not offer a separate MA program. Students working toward the PhD may, however, receive an MA degree after fulfilling the appropriate requirements.

PhD Program

The PhD program requires successful completion of 13 courses undertaken in graduate status at Berkeley. These include English 200 (an introductory course in literary scholarship, normally taken in the first semester of graduate study); one course at the graduate level in each of four historical fields: Medieval through 16th Century; 17th through 18th Century; 19th Century; and 20th Century; one course organized in terms other than chronological coverage (e.g., special problems, theory, minority discourse). At least one of these courses must be an English 250 seminar, requiring a substantial piece of writing. In addition, students must take English 375 (The Teaching of Composition and Literature). See the department's website regarding satisfaction of the Shakespeare requirement. The foreign language requirement must be met, through coursework or examination, by demonstrating advanced knowledge in one, or proficiency in two, approved language(s). The balance of the PhD program includes passing a two-hour oral examination, a prospectus conference, and writing a dissertation. The normative time for completing the doctoral program is six years. Additional details regarding the PhD program are available on the department's website.

Prospective students are urged to undertake substantial coursework in English and American literature, as well as to gain a solid background in foreign languages. Prospective applicants should request additional information about program requirements and application procedures from the English Graduate Office, 319 Wheeler Hall.

Environmental Design

College of Environmental Design (<http://ced.berkeley.edu>)

**Undergraduate Office: 232 Wurster Hall,
(510) 642-0832**

Dean: Jennifer Wolch, PhD

College Website: Environmental Design (<http://ced.berkeley.edu>)

Overview

The College of Environmental Design combines in a single academic unit professional instruction in architecture, city and regional planning, and landscape architecture and environmental planning, along with related undergraduate and advanced graduate instructional programs. In addition to preparing students in these three professions, the college is committed to improving practice, contributing to basic knowledge, and addressing ethical issues in areas related to the built environment and its natural setting. To this end, instruction, service, and research programs in this college aim at educating people to build more efficiently and equitably, more beautifully, and in ways better fitted to the multiplicity of human, social, and ecological needs.

The college consists of three departments: Architecture, City and Regional Planning, and Landscape Architecture and Environmental Planning. Undergraduate degree programs in architecture, landscape architecture, urban studies, and sustainable environmental design offer unusual learning opportunities that combine general education, basic skills, and knowledge in the professional fields, with a broad introduction to the built and natural environments. All three departments offer undergraduate minor programs that are open to students majoring in other fields. No undergraduate major or minor programs are professionally accredited by their respective professions. At the graduate level, each department offers the professionally accredited master's degree. A unique interdisciplinary program among all three departments offers a master's degree in urban design. And each department provides advanced graduate work leading to the PhD.

For more information about the College of Environmental Design, see the website. (<http://ced.berkeley.edu/about-ced/welcome>)

Undergraduate Programs

Undergraduates enroll in a four-year curriculum leading to the Bachelor of Arts (BA) degree with a major in architecture, landscape architecture, urban studies, sustainable environmental design, or an individual major. These curricula provide a broad educational base and preprofessional competency in environmental design fields. In addition, they serve as undergraduate preparation for graduate education both in the design fields and, with properly selected elective courses, in other fields such as business, law, and engineering. Graduates also work in related fields such as urban development, real estate, and construction.

Admission

Freshman applicants should consult the UC Berkeley Office of Undergraduate Admissions website (<http://admissions.berkeley.edu>) for requirements. Transfer applicants must follow closely the admission requirements outlined on the CED Prospective Student website. (<http://ced.berkeley.edu/admissions/undergraduate/transfer-applicants>)

Prospective undergraduates can find more information about majors and admission requirements on the CED website. (<http://ced.berkeley.edu/admissions/undergraduate>)

Degree Requirements

See the website (<http://ced.berkeley.edu/ced/students/undergraduate-advising/continuing-students>) for more information on undergraduate degree requirements.

Minor Programs

The College of Environmental Design offers several minors, including Architecture, City and Regional Planning, Environmental Design and Urbanism in Developing Countries, Geospatial Information Science and Technology (with CNR), History and Theory of Landscape Architecture and Environmental Planning, History of the Built Environment, Social and Cultural Factors in Design, and Sustainable Design. For further information, see the website. (<http://ced.berkeley.edu/ced/students/undergraduate-advising/continuing-students/#minor>)

Information on the courses and degree programs in architecture, city and regional planning, urban studies, landscape architecture and environmental planning, and sustainable environmental design can be found in those sections of this Bulletin, as well as on the college's website. (<http://ced.berkeley.edu>)

Graduate Programs

Architecture, City and Regional Planning, and Landscape Architecture and Environmental Planning each offer accredited professional master's degree programs that serve as the basic credential for professional practice in the respective fields. The departments also have concurrent and joint degree programs that combine professional degrees in two fields either within the college or with other professional schools. An MA degree in design is offered for a very few students, and an interdisciplinary program offers a master's degree in urban design.

The three departments have advanced graduate programs leading to the PhD degree for students who have the capacity to engage in research and teaching. A research M.S. degree in architecture also is available. These programs have limited enrollments and are not regarded as advanced degrees for professional practice.

An undergraduate major in architecture or landscape architecture is not a prerequisite for admission to graduate study in these fields. Likewise, an undergraduate major in urban studies is not a prerequisite for admission to graduate study in city and regional planning.

For information on the Master of Urban Design degree, see the Urban Design (http://sis.berkeley.edu/catalog/gcc_view_req?p_dept_cd=URBDES) section of this Bulletin.

Organizational Units

Architecture (<http://arch.ced.berkeley.edu>)

Department Office: 232 Wurster Hall, (510) 642-4942
Graduate Office: 232 Wurster Hall, (510) 642-5577
Chair: Tom J. Buresh, MArch

City and Regional Planning (<http://dcrp.ced.berkeley.edu>)

Department Office: 228 Wurster Hall, (510) 642-3256
Graduate Office: 228 Wurster Hall, (510) 643-9440

Chair: Louise A. Mozingo, MLA

Environmental Economics and Policy

Please see the Agricultural and Resource Economics Department (p. 43) for program and degree requirements.

Environmental Health Sciences

School of Public Health, Interdepartmental Graduate Groups (<http://sph.berkeley.edu/areas-study/environmental-health-sciences>)

Department Office: 760 University Hall, (510) 643-5160

Chair: Michael Jerrett, PhD

Program Website: Environmental Health Sciences (<http://ehs.sph.berkeley.edu>)

Overview

Academic degree programs in the Graduate Group in Environmental Health Sciences (EHS) are recommended for individuals with clear research orientations who wish to complete work of an interdisciplinary nature. Applicants may apply to the MS program, MPH program, the PhD program, or to the joint MS/PhD program. (Continuation into the PhD program is contingent upon successful completion of the MS requirements). EHS is administered within the Division of Environmental Health and the School of Public Health. Although students receive their academic degrees from the graduate group (under the jurisdiction of the Graduate Division of the UC Berkeley campus), students are also affiliated with and apply to the School of Public Health. For further information, please visit the website. (<http://ehs.sph.berkeley.edu>)

Environmental Science, Policy and Management

College of Natural Resources (<http://www.cnr.berkeley.edu/site>)

Department Office: 130 Mulford Hall, (510) 643-7430

Chair: Ronald Amundson, PhD

Department Website: Environmental Science, Policy, and Management (<http://espm.berkeley.edu>)

Overview

The mission of the Department of Environmental Science, Policy, and Management (ESPM) is to bring a diverse research, teaching, and extension capacity to bear on environmental problems from local to global scales. The biological, physical, and social scientists of the department are organized into three divisions on the basis of similar disciplinary or

topical research interests, but all work within the unifying framework of the analysis of environmental problems and the development of management strategies to address them. Environmental problems demand increased understanding of social, physical, and biological systems as well as the transfer of basic research findings through modeling, implementation, teaching, and extension. ESPM facilitates the cross-disciplinary collaboration necessary to address vital, contemporary questions.

The department includes three divisions: Ecosystem Sciences, Organisms and Environment, and Society and Environment. The faculty have expertise in diverse areas of critical importance to environmental issues. Excellence in research and teaching in many disciplines, all brought together to focus on environmental problems, offers students the opportunity to become leaders in research, conservation, restoration, and management of the environment, biodiversity, and natural resources.

Facilities

The Department of Environmental Science, Policy, and Management is spread among Giannini Hall, Mulford Hall, Hilgard Hall, the Valley Life Sciences Building, and Wellman Hall. In addition to laboratories and classrooms, the facilities include outstanding libraries and collections: the Bioscience and Natural Resource Library has some of the world's largest collections of books and periodicals on forestry, entomology, and natural resources, and extensive periodical collections in plant pathology and soils. ESPM also houses specialized laboratories for remote sensing and photogrammetry, tree physiology, pesticide chemistry, plant pathology, natural products chemistry and physiology, and ecology and wildlife biology, as well as well-equipped chemical and microbiological laboratories. There are also extensive herbaria, wildlife specimen collections, an entomological museum, insectary buildings, growth chambers, bioclimatic chambers, and greenhouses at the nearby Oxford Research Unit and at the Division of Biological Control on the Gill Tract near Albany.

Computer facilities include microcomputer laboratories and terminal rooms. ESPM manages field facilities at the 3,000-acre Blodgett Forest near Georgetown, Whitaker's Forest adjacent to Sequoia National Park, the Howard Forest near Willits, Russell Reservation near Lafayette, and the Baker Forest adjacent to the department's Summer Camp property. Berkeley's location also provides easy access to numerous public and private resource management and conservation agencies including the US Forest Service, the US Fish and Wildlife Service, the US National Park Service, the California Department of Forestry and Fire Protection, and the California Department of Fish and Game.

Undergraduate Programs

Courses offered by the Department of ESPM serve students in the College of Natural Resources and across the campus in such diverse but related studies as forestry, conservation and resource studies, botany, biochemistry, geology, geography, and social science. A number of our courses are of sufficient general interest to attract students who wish to expand their intellectual horizons by learning something about environmental studies. Consult our website for updates here. (<http://ourenvironment.berkeley.edu>)

Transfer Applicants

Transfer candidates should complete all lower division requirements for their intended major before entering Berkeley and may be denied admission if they have not done so. The Intersegmental General

Education Transfer Curriculum (IGETC) is highly applicable to the Conservation and Resource Studies major and the Society and Environment major, and is of limited application to other ESPM programs. In cases where the transfer institution does not have a course equivalent to a specific prerequisite for the major, applicants must take the coursework the first semester of enrollment at UC Berkeley.

Summer Field Program

In the beautiful mountains of the Plumas National Forest, the UC Summer Field Camp provides students a unique opportunity to study the biota, soils, and geology of the Feather River Country. Tall ponderosa and sugar pines tower over the area, with white fir, Douglas fir, incense cedar, and black oak intermixed in the dense forests. Several streams pass through the camp. Housing is provided in cabins and bunkhouses, with a central kitchen and dining facility and a large campfire area in front. Residents enjoy easy hiking to waterfalls, lakes, and mountain meadows.

The courses of the summer field program cover wildland ecology as well as forest, range, and wildlife management; forest resource inventory; forest products; harvesting practices; and many other subjects. During the eight-week program students acquire a broad working knowledge of the concepts and techniques that wildland resource managers use in their work. Your experiences studying forestry and wildland resources in a field setting will enrich your further academic studies at Berkeley.

The courses are an integral part of the core curriculum in the forestry and natural resources major, but students of any major on the Berkeley campus are welcome to apply. Students may complete most requirements of the minor in forestry by attending camp. Information and an application may be found here. (<http://nature.berkeley.edu/espm/summercamp/main.html>) The courses that comprise the camp are ESPM 105A-105D, including Sierra Nevada Ecology, Forest Measurements, Silviculture and Utilization, and Forest Management and Assessment, for a total of 11 units.

Major in Conservation and Resource Studies

The Conservation and Resource Studies major is an interdisciplinary program designed for those who are interested in environmental issues and areas of interaction among natural resources, population, energy, technology, societal institutions, and cultural values. Students draw on the course offerings of the entire campus and appropriate community resources in the development of individual programs of study. The major's orientation is toward flexibility and an individualized educational approach to understanding the structure and dynamic functions of complex environmental systems within our society and biosphere. It encourages interaction among students, faculty, and community.

Course requirements for the major include one ESPM environmental science course, one ESPM social science course, and ESPM 90, 100, and 194A. In the freshman and sophomore years, students will be expected to take two courses in reading and composition and one course in calculus or statistics. In addition, students must take one course in general biology with lab, one social science, one course each in physical sciences and the humanities; and two courses preparatory to the individual areas of interest. For transfer students, IGETC will satisfy all lower division requirements except ESPM 90, and one course in general biology with lab, equivalent to UC Berkeley's Biology 1B (recommended), Biology 1A/1AL or Biology 11/11L. In the junior and senior years, students will concentrate on their areas of interest. A more detailed statement of major requirements is available at the ESPM website and from the department office.

Major in Forestry and Natural Resources

The major in Forestry and Natural Resources (FNR) is the result of a merger of the former majors in forestry and in resource management. Specializations in natural science and human dimensions are offered in the study of the ecology and management of forest, woodland, and grassland ecosystems. Emphases in wildlife biology, water policy, fire science, ecosystem restoration, environmental justice, remote sensing and geographical information systems, and rural sociology are available. This major prepares students for graduate school and careers in environmental consulting, public agencies, nonprofit conservation organizations, and private companies, and for professional careers in forestry, wildlife, and range management. Participation in an eight-week summer field program in the northern Sierra Nevada is required.

Accreditation and Licensing: Established in 1914, forestry at Berkeley was the first forestry degree in California to be accredited by the Society of American Foresters. Completion of the Bachelor of Science degree in forestry provides four years of credit toward meeting the required seven years of qualifying education or professional experience for licensing as a professional forester in California. Students may obtain an additional year of credit toward licensing by completing the master of forestry degree. By careful selection of electives, students who complete the Bachelor of Science in forestry degree can meet the U.S. Civil Service and state requirements for the forester position.

Major in Molecular Environmental Biology

The Molecular Environmental Biology (MEB) major is designed to expose students to the organization and function of biological organisms at the molecular, cellular, organismal, and ecological levels. The breadth of this vertically integrated program is valuable in the added perspective it provides for students interested in how organisms function in their environment. Molecular approaches are expected to play an increasing role in environmental problem-solving in the near future, and educated citizens and researchers alike will need to have a grasp of basic molecular through ecological principles in order for these approaches to be effective in problem solving. This major is appropriate for pre-health (pre-med, pre-vet, pre-pharm, etc.) students, as well as students interested in general biology. Students in this major have a choice among six areas of emphasis:

1. Animal Health and Behavior
2. Biodiversity
3. Ecology
4. Environment and Human Health
5. Anthropod Science
6. Microbiology

Major in Society and Environment

Social and environmental problems are deeply intertwined. The Society and Environment major introduces students to the main approaches and theory for environmental social sciences, including how social science tools can be applied to environmental problems, and how social science theories contribute to understanding environmental problems. At the upper division level there are three major areas of concentration. Students are exposed to all three areas and choose to focus in one: US Environmental Policy and Management, Global Environmental Politics, or Justice and Sustainability.

Major in Environmental Sciences

The Environmental Sciences (ES) major is designed for students interested in studying environmental problems from a scientific

perspective. The ES major prepares students to deal with issues arising from the impact of human interaction on natural systems. To address these problems, all ES students acquire strong backgrounds in math, biological sciences, and physical sciences. Students may choose to specialize further in a biological or physical science field such as ecology, conservation biology, toxicology, geology, hydrology, meteorology, engineering, or a social science field such as planning, policy analysis, economics, environmental justice, education. Each ES student completes a year-long senior research project with the support of a mentor in a biological, physical, or interdisciplinary research area.

Minors

Minor in Conservation and Resource Studies (CRS)

Conservation and Resource Studies is an interdisciplinary program designed for those who are interested in environmental issues and areas of interaction among natural resources, population, energy, technology, societal institutions, and cultural values. Students draw on the course offerings of the entire campus and appropriate community resources in the development of individual programs of study.

The CRS minor is oriented toward flexibility and an individualized educational approach to understanding the structure and dynamic functions of complex environmental systems within our society and biosphere. It encourages interaction among students, faculty, and community.

Minor in Forestry and Natural Resources

A minor in Forestry and Natural Resources is for students who are interested in learning about the conservation and restoration of the earth's natural resources through hands-on study of the ecology, stewardship, and management of forest, woodland, and grassland ecosystems. Many students elect to complete the minor by participating in the eight-week summer field program, Forestry Field Camp, in the northern Sierra Nevada and taking one additional course on the UC Berkeley campus.

Students in many diverse majors such as integrative biology, business administration, and civil engineering may find this minor complimentary to their professional career goals.

Graduate Programs

The degree programs address environmental problems of major social and political impact, which are based in the biological and physical sciences. Two general types of education are needed to produce people qualified to address these hybrid problems: broadly based interdisciplinary education, and disciplinary education in relevant fields supplemented with exposure to cross-disciplinary communication and problem solving. The ESPM program offers both types of education.

Interest in environmental problems has resulted in a dramatic recent increase in undergraduate and graduate programs dealing with various aspects of environmental science. Our program integrates the biological, social, and physical sciences to provide advanced education in basic and applied environmental sciences, develops critical analytical abilities, and fosters the capacity to conduct research into the structure and function of ecosystems at molecular through ecosystem scales and their interlinked human social systems.

The goal of the program is to provide both a strong disciplinary education and broadly based experience in cross-disciplinary communication and problem solving. In order to achieve this, the program leading to the MS and PhD in environmental science, policy, and management will

require that a student complete three core courses, and coursework in the following four broad areas: disciplinary emphasis, area of specialization, research methods, and breadth requirement. The graduate adviser and a guiding committee, chosen by the student and approved by the graduate adviser, will be responsible for designing a program that fulfills the degree requirements and meets the student's needs. This program structure provides the student with flexibility for interdisciplinary interaction within the graduate program, while ensuring at least a minimum level of disciplinary competence and understanding.

Three Fields of Emphasis

Students will be required to demonstrate competence in one of the three fields of emphasis defined below. Specific coursework within each field will be chosen by the guiding committee in conjunction with the student and approved by the graduate adviser. The three fields provide flexibility within a clear program structure.

Disciplinary Emphasis

The disciplinary emphasis is the broadest academic area encompassing the student's interests. Currently the three disciplinary emphases within the department are ecosystem sciences, organisms and environment, and society and environment. A student pursuing a strongly interdisciplinary program may study more than one of these disciplines in depth.

1. **Ecosystem Sciences:** The Ecosystem Sciences Division increases knowledge of the biological, chemical, and physical processes that determine terrestrial ecosystem dynamics in order to provide a scientific basis for management and to analyze the adverse stresses that society places on terrestrial ecosystems. Central to this is collaboration between biological and physical scientists, leading to an integrated understanding of ecosystem composition, structure, and function, as well as to the extension of basic research findings through modeling, implementation, and educational activities. The principal research and teaching efforts are directed toward forests, grasslands, and agricultural lands, including their interactions with contiguous aquatic, wetland, and marine ecosystems and the atmosphere. Investigation is carried out over a wide range of spatial and temporal scales, with emphasis on extending understanding of processes derived from research at smaller scales to landscape, regional, and global scales. The role of human activities, including ecosystem management scenarios, is an integral component.
2. **Organisms and Environment:** The mission of the Division of Organisms and Environment is to use fundamental research on insect systems to address critical environmental issues and to solve vital environmental problems. Research interests in this division are wide ranging, from the molecular to whole ecosystems, providing a strong integration of biological processes and a diversity of intellectual challenges for graduate students. Systematics and biodiversity, behavior and neurobiology, and ecology and biological control are notable strengths in Organisms and Environment. Other research emphases include environmental toxicology, medical entomology, and insect-microbe interactions.
3. **Society and Environment:** Faculty and students of the Division of Society and Environment study how social distributions of power and resources affect environmental dynamics and their social consequences. Research and teaching focus on how cultural, social, political, and economic institutions affect the treatment of natural resources and interactions with environmental phenomena; and on the practical processes, methods, and implications of forming, choosing, and applying policy and management regimes in different institutional frameworks and environmental settings. This knowledge is applied to concrete problems in human-ecosystem relations from

local to global scales in a wide variety of cultural and historical contexts. Theories and methods are chosen from the full range of science and interpretive analysis to satisfy the standards of both significant scholarship and effective practical contribution for the problem of interest.

Area of Specialization

The area of specialization is a narrower field within the context of the disciplinary emphasis. Some examples of these areas are microbial community ecology, ecosystem function, insect population and community ecology, biological control of arthropods, insect conservation biology, American environmental history and policy, international forest management, biogeochemistry, Mediterranean grassland ecosystems, remote sensing, and forest management.

Research Methods

Candidates for the PhD must demonstrate competence in research techniques appropriate for the disciplinary emphasis and area of specialization. Preparation in this field must include experimental design, sampling design, estimation, and hypothesis testing.

Breadth Requirement

Each student's program must include coursework addressing human and ecosystem processes and the relationship between them. All students must complete the required core courses, ESPM 201A-201C-201S. In addition, while in residence, doctoral students in the natural sciences must complete one additional course in the application of social sciences to environmental problems, and those in the social sciences must complete one additional course in the biological or physical sciences. The level of this course will be determined by the guiding committee, based on the student's background and experience. The course must be a minimum of 2 graduate units or 3 upper division undergraduate units, and must be taken for a letter grade unless it is offered on an S/U basis only.

Required Core Courses

All master's and doctoral students in ESPM are required to take a core course sequence. The first required course, ESPM 201A, Research Approaches in Environmental Science, Policy, and Management (3 units), will be taken in the first fall semester by all new master's and doctoral students. ESPM 201C, the seminar entitled Environmental Forum (1 unit), is required for all doctoral students and must either have been taken before, or be in progress, when the doctoral oral qualifying examination is held. Master's students are not required to take 201C. ESPM 201S, Environmental Science, Policy, and Management Colloquium (1 unit), is required for all doctoral students and must be taken once before the oral qualifying examination. ESPM 201S may be repeated for credit.

Students are also required to complete a minimum of 6 units in their area of specialization. In addition, students in natural sciences must complete one additional course in the application of social sciences to environmental problems, and students in social sciences must complete one additional course in the biological or physical sciences. The Guiding Committee and the head graduate adviser will approve the selection of appropriate courses to meet these course requirements.

Admission to the Graduate Program

Applicants for admission to the graduate program must hold a bachelor's degree from a university or college with curricula and standards equivalent to those of the University of California. The completed undergraduate program should normally be in a field relevant to the disciplinary emphasis chosen. Applicants without this background may be admitted with the understanding that their coursework must compensate

for deficiencies in their preparation. We suggest that prospective applicants consult with faculty or the Graduate Student Services Office for advice on what courses may be recommended.

It is critical that all applicants identify on their application faculty whose research and work overlap with their strengths and interests. Without this information, the admission committee will not be able to evaluate your application properly. You may wish to contact faculty during the application process, but it is not required. Faculty sponsorship of entering graduate students will be determined once all applications have been reviewed and final admission offers have been made. The ESPM admission committee, not individual faculty, makes the final decisions on who will be offered admission to the program. Applications are accepted for the fall semester only.

Research Facilities

Departmental facilities of high quality are available to support graduate student research and education. Facilities include state-of-the-art instrumentation and laboratories, insectary buildings, controlled environment chambers, extensive greenhouse space, and field plots at the Oxford Tract (on campus). Field facilities available to departmental faculty and students include the 3500 acre Blodgett Forest; Whitaker's Forest with giant sequoia stands adjacent to King's Canyon National Park; Russell Reservation, located 13 miles east of the campus. Students may conduct research with an agricultural orientation at any of several University of California field stations which are located throughout the state.

Supplementing the University library are extensive holdings covering the physical, biological, and sociological dimensions of forestry and wildland resource management. The department also houses an outstanding entomological museum that supports both teaching and research programs in insect systematics and ecology.

Master of Forestry (MF)

The Master of Forestry (MF) degree is the advanced professional forestry degree granted by the Department of Environmental Science, Policy, and Management. The student who has completed an undergraduate curriculum in forestry is usually broadly trained in the principles of forestry but has not yet developed proficiency in the application of these principles to diverse problems involved in professional practice. The Master of Forestry program is designed to advance the student's understanding of the essentials of professional forest management at the graduate level within the context of resource and environmental planning of sustainable systems.

The MF program consists of three components: coursework, an internship, and a professional paper. The coursework consists of 24 semester units of upper division and graduate courses of which at least 12 units must be at the graduate level. This program of study must be approved by the graduate adviser and guiding professor as constituting appropriate advanced specialized training in professional forest resource management. The internship, normally with a public or private forest land management organization, provides direct experience in the application of theory to professional land management. The purpose of the professional paper is to demonstrate, within a distinct framework, a student's ability to assemble and analyze data and to recommend a resolution of an applied forest problem. The paper may be based on the internship or on another supervised professional work experience, or may be a report based on

independent analysis. The paper must be accepted and approved by the guiding professor and graduate adviser.

Upon completion of the program of coursework, and approval of the professional paper, the student will take a comprehensive oral examination covering the field of forest management and present the results of their professional paper. Although major emphasis will be placed on the professional project, students should be prepared to demonstrate mastery of the general field of forestry.

Interdepartmental Graduate Group in Range Management (MS)

For information about the MS degree in range management, see the Range Management section of this bulletin. Additional information about the graduate programs offered by the Department of Environmental Science, Policy, and Management may be obtained from the Graduate Student Services, 133 Mulford Hall, (510) 642-6410; fax: (510) 643-2759; e-mail: espmgrad@nature.berkeley.edu ; or from the department's website (<http://ourenvironment.berkeley.edu/graduate-programs/degrees/ms-range-management>).

Environmental Sciences

College of Natural Resources (<http://nature.berkeley.edu/site>)

Department Office: 260 Mulford Hall, (510) 643-9479

Major Director: Dennis Baldocchi, PhD

Program Website: Environmental Sciences (<http://environmentalsciences.berkeley.edu>)

Major

The environmental sciences major is administered by the College of Natural Resources (CNR), within the department of Environmental Science, Policy, and Management (p. 101). The curriculum of the major emphasizes a broad and comprehensive education in the fundamentals of biology, chemistry, physics, and mathematics, and in social science directly related to environmental problems. Such training is indispensable for those who wish to acquire more than a superficial understanding of the impact of human activities on the environment. Students acquire the necessary skills to rigorously document and predict environmental problems and to make sound recommendations for their avoidance or mitigation.

The environmental sciences major is concerned with interactions between human activities and biological and physical environments on all scales, from local to global. Students elect to emphasize one of three disciplinary fields: biological science, physical science, or social science. The differences between these emphases lie mainly in upper division electives; most required courses, both lower and upper division, are virtually the same for each of the three emphases. Details of course requirements appear below.

The senior research seminar, Environmental Sciences 196A-196B, in which students work intensively on individual research projects under faculty guidance, is a key feature of this major.

Declaring the Major

Students in the College of Natural Resources may enter as freshmen into the environmental sciences major. Students wishing to transfer from another major and/or college should contact the undergraduate adviser, Carina Galicia, in 260 Mulford Hall, or by email at EnvSci@berkeley.edu, for details. Students transferring from a California community college are also encouraged to utilize ASSIST (<http://assist.org>) for course selection guidelines.

Required Courses for All Three Areas of Emphasis (Biological, Physical, Social Science)

Lower Division Major Requirements

- ESPM Environmental Science Core, ESPM Social Science Core, plus 2 more breadth courses
- Environmental Economics and Policy (EEP) C1 or Economics C3
- Biology 1A-1B (required for biological science) or Biology 11/11L plus one of the following: Environmental Science, Policy, and Management (ESPM) 102A, 113, 114, 115B, 116A, 116B; Integrative Biology 153, 154, 155 (option for physical and social science only)
- Chemistry 1A/1AL and 3A/3AL (for biological and physical science); Chemistry 1A/1AL and either 1B or 3A/3L for social science
- Mathematics 16A-16B (for biological and social science); Mathematics 1A-1B (required for physical science)
- Physics 7A-7B (required for physical science), Physics 8A (for biological and social science)

Upper Division Major Requirements

- Energy and Resources 102 or ESPM C104/EEP C115 or ESPM 183
- Statistics 131A (prerequisite to ESPM 100ES), ESPM 173, Public Health 141 (offered summer only), or Public Health 142A
- ESPM 100ES (prerequisite to ESPM 175A-175B)
- ESPM 175A/L and 175B/L
- One of the following: ESPM 102D, ESPM 151, ESPM 155, ESPM 160AC/History 120AC, ESPM 161, ESPM 162, ESPM 163AC/Sociology 137AC, ESPM 166, ESPM C167/Public Health C160, ESPM 168, ESPM 169, ESPM 186; EEP C101/Econ C125, 131, EEP 140AC, EEP 153, EEP 162, C180; ERG 170, ERG 175; Geography 130, 138; Anthropology 137

In addition, students must take at least one upper division course in the chosen area of emphasis (biological, physical, social science) and the second from any area of emphasis. Please check the ES major website (<http://environmentalsciences.berkeley.edu>) for the list of approved courses. Students are required to have a minimum of 30 upper division units of major coursework. Any remaining units may come from courses on the electives list.

Honors Program

To be eligible for honors, students must meet the minimum GPA established by the college. Contact the CNR Honors Program Coordinator for further details.

Epidemiology

School of Public Health (<http://sph.berkeley.edu>)

Department Office: 101 Haviland Hall, (510) 643-9912

Chair: Arthur Reingold, MD

Group Website: Epidemiology (<http://epi.berkeley.edu>)

Overview

The PhD group in epidemiology is interdisciplinary and includes faculty from a number of departments at UC Berkeley, as well as the University of California, San Francisco (UCSF). Students receive either an MS or PhD degree from the Graduate Division of the Berkeley campus. The group is within the academic jurisdiction of the Graduate Council and is administratively located in the Division of Epidemiology.

The group brings together faculty with disciplinary knowledge in epidemiology, biostatistics, demography, sociology, anthropology, behavioral science, molecular biology, genetics, vector biology, and other fields relevant to the study of human health and disease at a population level. MS and PhD students receive a strong background in epidemiologic and biostatistical methods and theory and, in addition, must choose a third disciplinary area in which to develop competence. Doctoral dissertation research is generally focused on developing new knowledge about the factors that influence the distribution of health or given disease outcomes within human populations.

Ethnic Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 506 Barrows Hall, (510) 643-0796

Chair: Catherine Ceniza Choy, PhD

Department Website: Ethnic Studies (<http://ethnicstudies.berkeley.edu>)

Related Course Descriptions:

Asian American Studies (p. 298)

Chicano/Latino Studies (p. 358)

Native American Studies (p. 1081)

Overview

The group major in ethnic studies provides a core curriculum designed to develop a comparative and multidisciplinary understanding of the experiences and communities of African Americans, Asian Americans, Chicanos, and Native Americans.

Students majoring in ethnic studies study the history, culture, politics, and sociology of Third World communities in the United States within the general context of American society and institutions. Thus, they pursue knowledge vital for a critical understanding of contemporary society and for social changes to improve the lives and communities of racial minorities. Ethnic studies majors also prepare themselves for advanced graduate study in either academic or professional fields.

Major Requirements

Lower Division

Ethnic Studies 10AC and 11AC. Completion of one additional elective course from either African American Studies, Asian American Studies, Chicano Studies, Ethnic Studies, Native American Studies, or an ethnic studies-related course from another department.

Upper Division

Ethnic Studies 101A, 101B, and 190; Completion of three elective courses from Ethnic Studies 100, 103, 122AC, C126, 130, 135, 136, 141, 144AC, 147, 150, 159AC, 174, 175, 176, 180, N180, 181AC, 190, 190AC, or N190; Completion of two additional elective courses from either African American Studies, Asian American Studies, Chicano Studies, Ethnic Studies, Native American Studies, ethnic studies-related courses from other departments, or an approved EAP course; Ethnic Studies 197 (4 units cumulative).

Honors

The Department of Ethnic Studies provides a program leading to the BA degree with honors. Students will be recommended for honors if they have completed at least 30 units and two semesters with an average grade point average (GPA) of at least 3.5 for all work undertaken in the Department of Ethnic Studies and have been approved specifically for honors by the department chair upon recommendation by the faculty adviser for the group major. Honors students will be required to complete Ethnic Studies H196A/B, Senior Honors Seminar for Ethnic Studies Majors. In order to graduate with an BA degree with honors, students must obtain at least a 3.5 GPA for all coursework undertaken at the University.

Minor

Completion of three courses from Ethnic Studies 100, 101A, 101B, 103, 122AC, C126, 130, 135, 136, 141, 144AC, 147, 150, 159AC, 174, 175, 176, 180, N180, 181AC, 190, 190AC, or N190; completion of two additional elective courses from either African American Studies, Asian American Studies, Chicano Studies, Native American Studies, ethnic studies-related courses from other departments, or an approved EAP course.

Ethnic Studies Graduate Group

College of Letters and Science (<http://ls.berkeley.edu>)

Group Office: 506 Barrows Hall, (510) 643-0796

Chair: Catherine Ceniza Choy, PhD

Group Website: Ethnic Studies Graduate Group
(<http://ethnicstudies.berkeley.edu/graduate>)

Overview

The Ethnic Studies Graduate Group doctoral program focuses on the historical and sociocultural study of the core groups racialized in United States history: African Americans, Asian Americans, Chicanos and Latinos, and Native Americans. Transdisciplinary in approach, the program encourages students to adopt a broad range of theories and methods to analyze the construction of these racialized ethnocultural

groups in relation to each other, in the EuroAmerican context, and in a transnational context.

The Ethnic Studies PhD Program is a graduate group program, which means that its courses are taught, and its students advised, by faculty not only from the Department of Ethnic Studies but also from other departments on campus. The core faculty consists of faculty from the Department of Ethnic Studies (composed of Asian American Studies, Chicano and Latino Studies, and Native American Studies) and the Department of African American Studies. The affiliated faculty is composed of faculty from other departments on campus whose expertise and research interests address the concerns of comparative ethnic studies and who have expressed a special interest in working with graduate students in ethnic studies. Both core and affiliated faculty may teach courses and sit on the examination and dissertation committees of students in the Ethnic Studies Graduate Group doctoral program.

Students may obtain information regarding the requirements and curriculum from the student affairs officer of the Ethnic Studies Graduate Group.

Eurasian Studies

Please see the Slavic Languages and Literatures (p. 196) department for program and degree requirements.

Evening and Weekend MBA

Haas School of Business (<http://haas.berkeley.edu>)

430 Student Services Building, Phone: (510) 642-0292

Executive Director: Jon Kaplan, MBA

Program Website: Evening and Weekend MBA Program (<http://ewmba.haas.berkeley.edu>)

Overview

Business school is about developing you as a leader and teaching you fundamental business concepts. But the Berkeley MBA Program goes beyond that to offer you a special set of leadership skills that are extremely valuable in the global marketplace.

You will learn to become an innovative leader. Berkeley-Haas is uniquely positioned to deliver such leaders.

A General Management Education

Your Haas education is anchored in the fundamentals of general management, including the latest theories of and best practices in business – from accounting and finance to marketing and strategy. You learn to lead and manage an enterprise as a whole.

A Rigorous Curriculum

The Haas curriculum (<http://ewmba.haas.berkeley.edu/academics/curriculum.html>) provides you with a basic framework of qualitative, quantitative, analytical, strategic, and problem solving skills. It's rooted in the scientific disciplines of the university – economics, mathematics, social sciences such as psychology and sociology, and other areas.

Faculty Experts

Faculty members who are experts in these fields apply them toward increasing our knowledge of successful management, leadership, human behavior, organizational performance, and economic and market functions.

A Deeper Understanding

You not only gain knowledge about best business practices, but also learn about the fundamental principles behind them – the "how" and the "why." The Berkeley MBA program will make you think deeply and expand your understanding of the world.

A Leader Archetype in Sync with the Times

The goal of the Berkeley MBA Program is to develop you as an innovative leader. And a unique aspect of the Berkeley MBA innovative leadership approach is the conscious use of Haas School culture to shape how and what you learn.

An Innovative Leader

We define this leadership archetype as an individual who drives growth by putting new ideas into action in every corner and every function of his or her organization, and who does so responsibly. Leaders of this kind define what's next, for our markets and for our societies.

Whether it is producing more fuel-efficient autos or creating new business processes, innovative leaders are the ones who will create opportunity from the major challenges facing the world.

Berkeley-Haas has been producing such leaders for many years. Now the school is sharpening its curriculum to deliver this kind of leader even more effectively.

A Supportive Culture and Environment

The school recently codified its culture into four defining principles (<http://haas.berkeley.edu/strategicplan/culture>), which are emphasized in the admissions process and actively integrated into the MBA curriculum. They are:

- Question the Status Quo
- Confidence Without Attitude
- Students Always
- Beyond Yourself

The defining principles are heavily influenced by the school's location in the San Francisco Bay Area – the world's epicenter for innovation and entrepreneurship. And the principles are shaped by the culture of UC Berkeley, a world-class research generator with a legendary atmosphere of fresh thinking.

Curriculum

As a Berkeley MBA student, you will be immersed in a rigorous, comprehensive curriculum in which you master the essential skills of general management, from accounting and finance to marketing and strategy. You will build a basic framework in qualitative, analytical, strategic, and problem-solving skills.

Berkeley Innovative Leader Development (BILD)

BILD (<http://groups.haas.berkeley.edu/BILD>) is our strategy for developing innovative leaders—through culture, specific capabilities, and experiential learning.

Infused with the unique BILD perspective, the Berkeley MBA's rigorous general management curriculum teaches you to become a leader who can harness new ideas to create value for your firm. You acquire skills and qualities that enable you to drive growth to ensure your organization thrives.

First Year

Pre-Term

Prerequisite Courses

College-level Math

Orientation Weekend (Required)

The program kicks off with an informative and social orientation. During the mandatory weekend, you'll get to know other new students and gain a sense of what the classroom experience will hold. Held in August near the Berkeley campus, the New Student Orientation features team-building exercises, lectures and workshops on special topics.

The weekend is an introduction to life at Haas, focusing on class networking, leadership principles (<http://ewmba.haas.berkeley.edu/academics/innovation.html>), and getting to know your classmates. You'll also use the case study method that will feature prominently in your coursework at Haas to tackle a real-life business challenge.

Fall A & B (First Semester)

The Core

Required Core Courses A (First Half)

- Economics for Business Decision Making (Microeconomics)
- Leading People

Required Core Courses B (Second Half)

- Marketing Organization and Management
- Data & Decisions

Spring A & B (Second Semester)

The Core

Required Core Courses A (First Half)

- Financial Reporting (Accounting)
- Macroeconomics in the Global Economy

Required Core Courses B (Second Half)

- Leadership Communications
- Introduction to Finance
- Ethics

Second Year

Fall A & B (Third Semester)

Required Core Courses A (First Half)

- Quantitative Analysis for Business Decisions (Operations)
- Problem Finding, Problem Solving (PFPS)

Required Core Courses B (Second Half)

- Competitive Strategy
- Applied Innovation

Mid-Program Academic Retreat

During the second year of the program, students gather for an intense weekend of off-campus team competition and camaraderie, demonstrating the knowledge acquired in the first year-and-a-half of study. Students must attend the Mid-Program Academic Retreat (MPAR) in order to complete the Applied Innovation core course.

Spring Electives (Fourth Semester)

In your fourth semester, you are able to choose from a variety of electives that reflect the newest ideas, trends, and thinking in business.

Electives

Choice of two electives

Summer

You have the option of taking an elective course offered during the summer. You may also consider spending two weeks abroad in one of the school's Seminar in International Business (<http://haas.berkeley.edu/HaasGlobal/ewmba.html>) programs.

Third Year

In your third year, you complete your electives.

- Fall Elective Courses (Fifth Semester)
- Spring Elective Courses (Sixth Semester)
- Commencement

Executive MBA

Haas School of Business (<http://haas.berkeley.edu>)

Department Office: 2220 Piedmont Avenue, Phone: (510) 643-1046

Executive Director: Jon Kaplan, MBA
Program Website: Berkeley MBA for Executives
 (<http://mbaforexecs.haas.berkeley.edu>)

The Path to Innovative Leadership

Business school is about teaching you fundamental business concepts and helping you further develop your general management skills. But the Berkeley MBA for Executives Program goes beyond that to offer you a special set of innovative leadership skills that are extremely valuable in the global marketplace—and tailored for executive MBA students.

Immediate Impact

Our executive MBA program focuses on applying knowledge and skills to challenges that managers face in today's workplace. As an accomplished professional seeking a highly relevant learning experience, you will find that your studies and classroom discussions have direct bearing on choices you are making for your organization.

Class exercises and team and special projects provide an unparalleled opportunity for you to apply learning to your organization's current business challenges. The EMBA program's structure—a foundation of rigorous general management skills in the early terms, followed by electives that deepen your knowledge in areas deemed most important to one's personal growth followed by electives that deepen your knowledge in areas deemed most important to one's professional growth—maximizes your ability to learn and apply new skills.

A General Management Education

Your Berkeley MBA education is taught from a general management perspective and anchored in the fundamentals of business—from accounting and finance to marketing and strategy. You learn to lead and manage an enterprise as a whole.

A Rigorous Curriculum

The Berkeley MBA curriculum provides you with a basic framework of qualitative, quantitative, analytical, strategic, and problem-solving skills. It's rooted in the scientific disciplines of the university—economics, mathematics, social sciences such as psychology and sociology, and other areas.

Faculty Experts

Faculty members in the EMBA program are experts in their fields. They apply their expertise toward increasing your knowledge of successful management, leadership, human behavior, organizational performance, and economic and market functions.

A Deeper Understanding

You not only gain knowledge about best business practices, but also learn about the fundamental principles behind them—the "how" and the "why." The Berkeley MBA for Executives Program will make you think deeply and expand your understanding of the world.

A Leader in Sync with the Times

The goal of the Berkeley MBA curriculum is to develop you as an innovative leader. And a unique aspect of the Berkeley Innovative Leadership Development (BILD) (<http://groups.haas.berkeley.edu/BILD>) approach is the conscious use of the Berkeley-Haas culture to shape how and what you learn.

An Innovative Leader

We define this leadership archetype as an individual who drives growth by putting new ideas into action in every corner and every function of his or her organization, and who does so responsibly. Leaders of this kind define what is next for our markets and for our societies. Whether it is producing more fuel-efficient autos or creating new business processes, innovative leaders are the ones who will create opportunity from the major challenges facing the world. Berkeley-Haas has been producing such leaders for many years, but we have recently sharpened our curriculum to deliver this kind of leader even more effectively.

A Supportive Culture and Environment

The unique nature of the Berkeley-Haas culture is rooted in four defining principles, which are emphasized in the admissions process and actively integrated into the EMBA curriculum. They are:

- Question the Status Quo
- Confidence Without Attitude
- Students Always
- Beyond Yourself

The defining principles are heavily influenced by the school's location in the San Francisco Bay Area—the world's epicenter for innovation and entrepreneurship. They are also shaped by the culture of UC Berkeley, a world-class research generator with a legendary atmosphere of fresh thinking.

EMBA Curriculum

The Berkeley MBA for Executives Program educates you to become a new type of business executive distinguished by your ability to lead innovatively—the driver of value in today's marketplace.

The EMBA program's rigorous curriculum is taught from a general management perspective, focusing on the fundamentals of business, including finance, marketing, accounting, and leadership—skills that can be applied to any industry over the course of a lifelong career. Your courses will also leverage the Berkeley Innovative Leadership Development (BILD) (<http://groups.haas.berkeley.edu/BILD>) curriculum, which will give you a specific skill set that helps you become a more effective leader.

You begin your executive MBA studies with core courses to build a basic framework around which to mold real-world experiences. Elective courses and an international seminar add depth in chosen areas. Taught by renowned members of the Berkeley-Haas faculty, all classes follow the high standards of the MBA courses in our full-time program. It is anticipated that executive MBA students will devote an average of 20 hours per week to their studies, outside of class time.

Throughout the EMBA curriculum, faculty members use a variety of teaching methods. Case studies, seminars, simulations, guest speakers and group projects all facilitate the learning process. Classroom learning is enhanced by numerous opportunities to apply the lessons to real-world situations.

Applied Innovation

As part of the Applied Innovation course in the EMBA program, you will first learn problem framing, specifically to navigate the design and innovation process by applying different modes of thinking in order to find, frame, reframe and solve difficult business problems. Later in the course, you will team up with classmates to apply these tools to address an actual company challenge or global issue, such as providing safe drinking water. Faculty will coach and mentor you on working effectively in cross-disciplinary teams, on the content area of the project, and on experimenting with alternative solutions.

Learning Modules and International Seminar

In addition to regular courses and week-long electives on the Berkeley-Haas campus, the executive MBA program features a select set of off-site learning modules. Locations will include Silicon Valley and Washington D.C. These learning modules are tailored to take advantage of their local knowledge, giving you a diverse set of experiences and deeper knowledge into various business ecosystems, such as Silicon Valley's technology industry and Washington D.C.'s international business and public policy environment.

The International Seminar in Shanghai offers you a real-world opportunity to apply and deepen the global business concepts you learn in your course work. You will travel with your EMBA classmates for a week of experiential learning through lectures, discussions with local business and government leaders, and site visits. The trip examines key factors influencing global business success. You will also have the opportunity to take classes, meet with local companies, visit cultural sites, practice your

foreign language skills, learn cross-cultural business etiquette, and build your personal international network.

Please see the South and Southeast Asian Studies Department (p. 202) for program and degree requirements.

Film and Media

College of Letters and Science (<http://ls.berkeley.edu>)

**Department Office: 7408 Dwinelle Hall,
(510) 642-1415**

Chair: Kristen Whissel, PhD

Department Website: Film and Media (<http://fm.berkeley.edu>)

Overview

The Department of Film & Media at UC Berkeley offers an interdisciplinary program leading to a BA in Film, a PhD in Film and Media, and a Designated Emphasis in Film Studies for doctoral students located in other departments. This program engages with all forms of moving-image culture, exploring the most popular media forms of the last century (film and still photography) and the most exciting new media form of the new century (digital media). It teaches students to think historically, theoretically and analytically about a wide range of images within the broad context of humanistic studies. Production opportunities in digital media are available to students who have demonstrated excellence in theory, history and analysis.

Major

Berkeley offers an interdisciplinary undergraduate program leading to a BA in Film. The program offers rigorous engagement with the entire culture of moving-images, teaching students to think historically, theoretically and analytically about a wide range of cinematic forms. At the same time, it encourages students to look at moving-images from the vantage point of other disciplines. To this end, the Film and Media department cooperates with a number of other departments and programs on campus. Students earning their BA in Film may also choose to complement their study of the history and theory of moving images with the hands-on experience provided by production classes.

To Declare the Film Major

Film 25A or 25B must be completed. In addition, the student must be progressing in the chosen languages.

Lower Division Requirements

History of Film

Two courses, one on film from its beginnings, covering the silent period and the conversion to sound (to 1930) [Film 25A], and the other on the classical period through the New Wave and the emergence of new ethnic and national cinemas (1930-1971) [Film 25B].

Film majors have two options for completing their language requirement:

1. Students may complete the third semester of a college-level language course in a single language (e.g., French 3); or
2. Students may choose to complete the second semester of a college-level language course in two different languages (e.g., German 2 and Swahili 2). (If a student has taken three or more years of a language in high school, that language can count as one of the two languages. In that case students need only complete the second semester of one additional language.)

Language courses that are strictly conversational are not acceptable. Students may enroll in the courses being used to satisfy the film language requirement on a passed/not passed basis. Students should be aware that if they are also using the course to satisfy the L&S foreign language requirement, it must be taken on a letter-graded basis. Any natural language is acceptable. Students who are native speakers of a language other than English may demonstrate their language competency by satisfactorily passing a language proficiency exam administered by a language department at Berkeley, or by taking an advanced course in the language (such as an upper division course which is taught in the language). Students are expected to demonstrate both verbal and written proficiency.

Upper Division Requirements (32 units of upper division credit are required)

1. **Film Theory:** History of film theory (Film 100)
2. **Documentary Film:** Analysis of the development of the documentary film (Film 128)
3. **Avant-Garde Film:** A survey of the history and aesthetics of avant-garde film (Film 129).

Plus one of the following:

1. **Genre:** Focus on a particular genre, e.g., western, horror, noir (Film 108); or
2. **Auteur:** Focus on an individual or several related auteurs, e.g., Griffith, Lang, Fellini (Film 151); or
3. **National Cinema:** Focus on the cinema of a particular nation or region (Film 160).

Film Electives

16 units are required to complete the major requirements of 32 upper division units. Please check with the department office for approved courses.

Students may choose to take additional courses from the upper division Film and Media offerings, including Film 108 (Genre), Film 140 (Special Topics), Film 151 (Auteur), Film 160 (National Cinema), Film 180A and 180B (Screenwriting), Film C185 (Digital Video), Film 186 (Special Topics in Moving Image Production), Film C187 (Advanced Digital Video). Approved film elective courses drawn from course offerings across the campus may also be used. Students should consult with the Undergraduate Adviser to obtain a list of approved courses. The list changes each semester.

Honors Program

To be eligible for admission to the honors program in Film, a student must have attained senior standing with a grade point average (GPA) of

3.3 or higher on all University work and a 3.5 GPA or higher in courses in the major. The levels of honors are as follows: Honors, High Honors, and Highest Honors. Students in the honors program are to take Film H195 for a letter grade to complete a senior honors thesis. Although the production of a film may be part of the preparation of the thesis and the film submitted as a documentation or example, it is expected that the thesis will be a substantial piece of writing on film criticism or film history.

Graduate Program

PhD in Film and Media

Students in the Film and Media PhD are encouraged to situate moving images within the larger theoretical and analytical frameworks of a range of other disciplines. They integrate the traditions of history, law, literature, religion and political theory to the newer disciplines of Film Studies and Digital Media, applying the tools of post-structuralism, psychoanalysis, new historicism, Frankfurt School, feminist theory, queer theory, post-colonialism and deconstruction. Many combine their degree study with a campus Designated Emphasis (graduate "minor") in New Media, in Critical Theory, or in Women, Gender and Sexuality.

For information regarding program requirements, please see the department's website (<http://fm.berkeley.edu/graduate>).

Designated Emphasis in Film Studies

PhD students at Berkeley may add a Designated Emphasis in Film Studies to their major fields. The designated emphasis provides curricular and research resources for students who want to concentrate on film within their respective disciplines and have their work formally recognized. Designed to bring together faculty and students from different departments, the program provides a unique context for rigorous cross-disciplinary thinking and promotes innovative research in the theory and history of cinema.

Applicants must be enrolled in a doctoral program at Berkeley and must have completed the film theory seminar (Film Studies 200), offered each fall semester.

Students admitted to the designated emphasis program must complete the following requirements: a minimum of three graduate seminars in film studies taken at Berkeley; Film Studies 200, Film Studies 201, Film Studies 240, or a graduate seminar cross-listed with Film Studies 240. *Note:* Independent study courses may not be used to fulfill this requirement.

A member of the Graduate Group in Film Studies must be an unofficial member of the PhD oral qualifying examination committee. The dissertation must contribute to the study of film.

Financial Engineering

Haas School of Business (<http://haas.berkeley.edu>)

S545 Haas School of Business, (510) 642-4417

Executive Director: Linda Kreitzman, PhD
Program Website: Master of Financial Engineering Program (<http://mfe.berkeley.edu>)

Overview

The UC Berkeley Master's of Financial Engineering (MFE) curriculum prepares you to work as a financial engineer immediately after graduating. MFE courses are designed exclusively for MFE students, and are seamlessly integrated with one another.

This cooperation between course material allows the mathematical, statistical, and computer science methods to be integrated with the theoretical framework and institutional settings in which they are applied. For example, macroeconomics is taught in relevant context in the fixed income markets course, during the discussion of term structure, and during the equity and currency markets course, in the context of exchange rate determination. Similarly, insurance concepts are introduced in the advanced derivatives courses where students can easily understand their relation to similar products.

The MFE requires only one year of study, which is ideal for motivated students with strong quantitative skills and focused career interests.

Degree Requirements

MFE students must successfully complete 28 units of coursework plus an internship or on-site project. The 10-week internship project is a required condition for graduation. Because of the school's reputation and close ties to the best firms, Haas has an exceptional record of helping students secure internships, consistently placing nearly 100 percent of students each year.

The Master of Financial Engineering degree is awarded to MFE students who have maintained a minimum cumulative grade point average of 3.0 (B) and completed:

- New Student Orientation (required)
- Required courses (16 units*)
 - Courses vary by semester and are listed on the program website (<http://mfe.berkeley.edu/academics/curriculum.html>).
- Elective courses (9-11 units)
 - Courses vary by semester and are listed on the program website (<http://mfe.berkeley.edu/academics/curriculum.html>).
- The Morgan Stanley Applied Finance Project (1-3 units; required)
- Internship (10-12 weeks; required)
- A total of 28 units of coursework (1 unit = 15 class hours)

*The number of required courses or units is subject to change.

New Student Orientation

The program kicks off with an informative and social week-long orientation. During the week-long introduction to the program, you'll get to know other new students and gain a sense of what the classroom

experience will hold. The orientation features team-building exercises and lectures, and workshops on special topics, including a thorough overview of the job market and career resources.

Course Curriculum

Designed by a world-class business school, the MFE Program's curriculum challenges you to think of innovative ways to integrate quantitative methods with the theoretical framework and institutional settings in which they are applied. Taught by a renowned faculty comprised of prominent scholars and industry luminaries, MFE courses are anchored in cutting-edge research and best practices in financial engineering.

The Berkeley MFE Program is a one-year program beginning in March, with an internship period from October to January, and graduation the following March.

Industry Leaders in the Classroom

The curriculum also includes weekly Financial Practice Seminars featuring a diverse slate of finance practitioners. In the first term, speakers discuss jobs available to graduates of the MFE and the skills needed to contribute to a firm's mission. In the second term, speakers provide insights into the way the financial world is changing: new products and needs; evolving data and information systems; and similar topics. Over the past two years, more than 50 industry leaders have shared their expertise as part of the Financial Practice Seminars series. Recent speakers have included Jean-Marc Orlando, head of E-commerce trading at BNP Paribas; Arnold Miyamoto, managing director of Citigroup; and Joseph Langsam, managing director of Morgan Stanley.

The Morgan Stanley Applied Finance Project

In addition to the internship, MFE students are required to complete an applied finance project that develops or uses quantitative finance tools and techniques learned in the program or internship. Students have the option of completing a one-credit project or three-credit project. The \$5,000 Morgan Stanley Applied Finance Project Award is given to the best three-credit project.

Internship Period

The Internship/Special Topics in Finance project is a required condition for graduation. The internship or approved, on-site project takes place from mid-October to mid-January. Students must enroll in MFE230N, the Internship/Special Topics in Finance course for the fall term.

Because of the school's reputation and close ties to the best firms, Haas has an exceptional record of helping students secure internships, consistently placing nearly 100 percent of students each year.

For more information and semester specific course listings, please visit the Masters of Financial Engineering Program website (<http://mfe.berkeley.edu>).

Folklore

College of Letters and Science (<http://ls.berkeley.edu>)

Program Office: 232 Kroeber Hall, (510) 642-3406

Chair: Charles Briggs, PhD (Department of Anthropology)

Program Website: Folklore Graduate Program (<http://folklore.berkeley.edu>)

Overview

This program is designed to provide graduate students with a competent knowledge of both the materials of folklore and the various methods of studying these materials. The program is an interdisciplinary one in which faculty members from both the humanities and the social sciences participate. The scope of the courses is international. However, students may specialize in a particular genre, e.g., folktales, or in a particular area such as Russian folklore.

Major

There is no undergraduate major in folklore.

Preparation for Graduate Study

The best preparation for the graduate program in folklore is a strong undergraduate record in one of the broad fields with which folklore is closely affiliated. Since it is a study of the humanist expression which is handed down by tradition rather than by writing, it is related to all departments that deal with literature, art, music. Since folklore also deals with the entire traditional culture of mankind as manifested in customs and beliefs, it has close affiliations with anthropology, design, history, linguistics, philosophy, psychology and sociology. Consequently, a good undergraduate record in any of these disciplines is highly desirable though not necessarily required.

Graduate Program

The requirements for the MA in folklore include 20 units of which at least 10 must be graduate level (200 number) in folklore, and an MA thesis based upon field work or some other research project. (No course credits are allowed for the thesis.)

Students must take at least one course in two of the following three areas: Folk narrative, folk or ethnic music, folk or primitive art.

As an introduction to the discipline, students must take Anthropology 160, The Forms of Folklore.

In addition, all students are required to take the interdisciplinary Folklore 250A-250B, Folklore Theory and Techniques.

The student must also demonstrate proficiency in reading at least one foreign language. German is perhaps the most useful language for folklore studies, but French, Spanish, or some language intimately connected with the MA thesis may be approved to satisfy the language requirement. Questions on the requirements for the MA in folklore should

be addressed to the graduate adviser, Folklore Program, in 205 Kroeber Hall.

French

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 4125 Dwinelle Hall, (510) 642-2712

Chair: Michael Lucey, PhD

Department Website: French (<http://french.berkeley.edu>)

Overview

The Department of French places primary emphasis on instruction in French at all levels, and the majority of its upper division courses are conducted entirely in that language. Non-majors and non-minors, however, may write in English in any upper division course.

Note: Students should consult the current Course Listings (which are revised at the beginning of each semester) via the department's website (<http://french.berkeley.edu>).

Major Requirements

Courses 1, 2, 3, 4, and 35 or their equivalents; eight upper division courses in French. Twelve upper division units must be taken in residence.

Upper Division Courses

French 102; two courses chosen from 145-185; two courses chosen from two different centuries (112-120); three electives. At least two of the upper division courses completed in fulfillment of French major course requirements must cover material focusing on the 18th century or earlier (historical period requirement).

Honors Program

Senior majors in French with a grade point average (GPA) of 3.5 overall and in the major may apply to the honors program in French. Students who meet specific criteria may obtain the application to the honors program from the undergraduate assistant. Upon admission to the honors program, students undertake research on an approved topic of their choice in French literature or civilization. The results of this research constitute an honors essay, written under the supervision of a member of the regular faculty. Credit and grade are awarded upon completion of the sequence. The honors sequence is undertaken in addition to the coursework for the major.

Additional information is available on the department's website (<http://french.berkeley.edu>).

Minor Requirements

Students in the College of Letters and Science may complete one or more minors of their choice, normally in a field both academically and administratively distinct from their major.

The Department of French offers four minor options: a general French minor, French literature, French civilization, and French Language Studies. Each minor requires five upper division courses.

1. **General Minor in French:** French 102 and four upper division courses from French 103-189 (see note below).
2. **Minor in French Literature:** French 102 and four courses from 103-126 or 140A-140D (see note below).
3. **Minor in French Civilization:** French 102 and four courses from 140A-140D or 150-189 (see note below).
4. **Minor in French Language Studies:** French 102 and four courses from 130-139 or 145-149, and French 35 (Phonetics).

Note: All minor courses must be taken for a letter grade. Conversation courses cannot be included as electives. One course each from French 102, 103A-103B and 140A-140D may be counted toward the major or minor programs.

Graduate Study

The graduate programs in the Department of French blend strong coverage in the traditional, historically based divisions of French literature and culture with a wide array of ancillary fields and topics—from psychoanalysis, linguistics, and philosophy to the study of gender, law, historiography, visual arts and film, music, popular culture, francophone studies, and politics.

Both the PhD Program in French Literature and the PhD Program in Romance Languages and Literatures enable students to undertake original research, to engage in scholarly and critical writing in the field, and to prepare for teaching careers at the college and university level.

The PhD Program in French Literature

The PhD Program in French Literature is divided into two phases, the MA (the first two years of graduate study) and the PhD (thereafter). For the master's degree, students take a minimum of eight courses including French 270 or 274. The remaining courses are chosen in consultation with the graduate adviser to ensure historical coverage and to prepare students for the master's exam. (*Note:* The department does not admit students who intend to pursue only the MA degree.)

Upon completion of the MA phase, students must:

1. Take a minimum of four more courses, for a total of 12.
2. Fulfill the foreign language requirement either through examination or through the successful completion of upper division of graduate courses (Option I requires students to demonstrate reading knowledge of two foreign languages other than French, while Option II requires students to demonstrate an exceptionally thorough reading knowledge and an adequate knowledge of the grammatical structure of one foreign language other than French).
3. Pass a written and oral qualifying examination in three areas of study based on the students' interests and reading lists developed in consultation with faculty.
4. Complete a dissertation.

PhD in Romance Languages and Literatures (Emphasis in French)

Students admitted for this degree have a choice of two plans of study:

1. **In the Literature track**, students will gain a detailed knowledge of the French literature. They will also develop a familiarity with two other Romance literatures sufficient to allow them to do the focused comparative work necessary for the preparation of the Qualifying Examination. Moreover, students will develop both historical and practical expertise in both Latin and in the Romance languages.

2. **In the Linguistics track**, students will gain in-depth knowledge of the structure and history (internal and external) of French. They will also develop expertise in the linguistics of two other Romance languages and specialize in the area of general or applied linguistics. This together with some basic training in Latin, will prepare them for the comparative Romance linguistic work that is required for the Qualifying Examination.

Designated Emphasis

Graduate students may also participate in a Designated Emphasis (DE) as part of their graduate study. DEs in which French graduate students have enrolled include Critical Theory; Film Studies; Folklore; Gender, Women, and Sexuality; and Renaissance and Early Modern Studies. Students obtaining a DE must fulfill additional course and other requirements. Students interested in completing a DE as part of their graduate study in French or in Romance Languages and Literatures (French emphasis) should consult the French Student Services Adviser early in their graduate career.

For more detailed information concerning these programs, students should consult the department.

Gender and Women's Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 608 Barrows, (510) 642-2767

Chair: Juana Maria Rodriguez, PhD
Department Website: Gender and Women's Studies (<http://womensstudies.berkeley.edu>)

Overview

The Department of Gender and Women's Studies offers interdisciplinary perspectives on the formation of gender and its intersections with other relations of power, such as sexuality, race, class, nationality, religion, and age. Questions are addressed within the context of a transnational world and from perspectives as diverse as history, sociology, literary and cultural studies, postcolonial theory, science, new technology, and art.

The undergraduate program is designed to introduce students to gender and women's studies, focusing on gender as a category of analysis and on the workings of power in social and historical life. The department offers an introduction to feminist theory as well as more advanced courses that seek to expand capacities for critical reflection and analysis and to engage students with varied approaches to feminist scholarship. The curriculum draws students into interdisciplinary analysis of specific gender practices in areas such as feminism in a transnational world, the politics of representation, feminist science studies, women and work, women and film, gender and health, and the politics of childhood.

The department offers an undergraduate major and minor. It also houses an undergraduate minor in Lesbian, Gay, Bisexual, and Transgender (LGBT) studies, a program whose courses overlap productively with feminist and gender studies. Faculty in the department collaborate with an extensive group of extended faculty through the Designated Emphasis in Women, Gender and Sexuality, which provides graduate students across campus with a site for transdisciplinary learning and teaching. The department is now in the process of developing a PhD program in Transnational Studies of Women and Gender. The department fosters

connections with scholars in feminist and sexuality studies throughout the campus by cross-listing courses, collaborating in research, and participating in the Gender Consortium, which links research and teaching units that focus on gender.

Major Requirements

Prerequisites

To declare the gender and women's studies major, students must have completed GWS 10 and GWS 20 and have a minimum grade point average (GPA) of 2.0.

Upper Division Requirements

The requirements for a gender and women's studies major consist of a minimum of eight upper division courses on gender and women's issues (30-32 units) distributed as follows:

- **Core courses (20 units):** 101, Doing Feminist Research; 102, Transnational Feminisms; 103, Identities Across Difference; 104, Feminist Theory; 195, Senior Seminar.
- **Electives (10-12 units):** Three electives, at least one in the Department of Gender and Women's Studies; the other two may be fulfilled by classes offered by other departments that are listed in *Courses on Gender and Women*, published each semester by the Department of Gender and Women's Studies.

Honors Program

To be eligible for the GWS Honors Program (GWS H195), students must have an overall 3.3 GPA, a 3.5 GPA in the major, and receive an A in GWS 195.

To receive honors in GWS, students must have a 3.6 for honors, a 3.8 for high honors, or a 3.9 for highest honors. In addition, the student must receive a minimum of an A- in GWS H195.

Minor Requirements

Gender and Women's Studies

Students in the College of Letters and Science may complete one or more minors of their choice, normally in a field both academically and administratively distinct from their major. To be admitted to the minor in gender and women's studies, students must complete GWS 10. Minors in gender and women's studies must complete five upper division courses as follows: any three of the core courses (GWS 101, 102, 103, 104) plus two electives in gender and women's studies. A minimum GPA of 2.0 is required for the minor program.

LGBT Studies

LGBT Studies works to establish sexuality as a crucial category of analysis in the humanities and social sciences. It draws on disciplines such as anthropology, sociology, psychology, history, literature, and cultural studies, in order to document the extent to which sexuality itself is a complex cultural and historical phenomenon that bears careful examination. Just as Women's Studies, for instance, is not only by, about, and for women, LGBT Studies is not only by, about, or for lesbian, gay, bisexual, or transgendered people, but includes all humanity in its purview.

This minor is organized around four core courses: an introductory overview of LGBT culture and history in the US; a visual and literary studies course; a cross-cultural studies course; and a history of sexuality course. In addition to these core courses, students are required to take

two electives, which are approved each year by the director and posted online. Teaching is largely done by about 12 ladder-rank faculty.

Prerequisites for Nonmajors and Minors

Students who are not majoring or minoring in gender and women's studies but wish to take gender and women's studies core courses (101, 102, 103, and 104) must take GWS 10, GWS 20, or their equivalent beforehand.

Graduate Program: Designated Emphasis in Women, Gender, and Sexuality

PhD students at Berkeley may add a Designated Emphasis (DE) in Women, Gender, and Sexuality (DEWGS) to their major fields. Designed to enhance interdisciplinary graduate studies at Berkeley, the DEWGS provides curricular and research resources and opportunities to students who are already admitted to graduate degree programs on campus.

The designated emphasis program was developed to accommodate some of the many students who conduct graduate-level research in related topics across numerous fields. Administered by the Department of Gender and Women's Studies, the designated emphasis program provides its students with certification as well as with a context for the interdisciplinary exchange of ideas and development of research.

Applicants will be selected according to their academic qualifications, the appropriateness of their interests to the program's teaching resources, and the enrollment capacity of its graduate seminars. To be admitted to the program, applicants must already be accepted into an existing PhD program at Berkeley (*master's students and students at other institutions are not eligible*). Graduate students should apply in their third semester for admission to the program in their fourth semester. Students must apply before completing their qualifying examinations.

Students admitted to the designated emphasis program will be enrolled in the required introductory seminar (GWS 200) offered each spring. Students must fulfill the following requirements before completion of the degree: The introductory seminar (GWS 200), an elective seminar (GWS 210), and a dissertation research seminar (GWS 220). A member of the Department of Gender and Women's Studies or its Affiliated Faculty must be on the qualifying examination committee; a topic on women/gender/sexuality must be on the qualifying examination, and a member of the department or Affiliated Faculty must be on the dissertation committee.

For more detailed information concerning this program, students should consult the department.

Further Information

For further information, see the online *Schedule of Classes* (<http://schedule.berkeley.edu>) and the department's course descriptions issued before the start of each semester. The department publication, *Courses on Gender and Women*, provides detailed, up-to-date information about courses offered by the Department of Gender and Women's Studies.

For further information about the department, events, and links to other sites of interest, please see the department (<http://womensstudies.berkeley.edu>) website. (<http://womensstudies.berkeley.edu>)

Geography

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 507 McCone Hall, (510) 642-3903

Chair: Nathan Sayre, PhD

Department Website: Geography (<http://geography.berkeley.edu>)

Overview

The Department of Geography provides a broad-ranging perspective on humans as inhabitants of Earth, both as transformers of nature and as the creators of social spaces. Geography provides an environmental bridge between the natural and human sciences and an interdisciplinary link among the social sciences and humanities through its concern with space and spatial relations. As geographic theory and research have expanded their horizons over the past quarter century, three research focuses have emerged to define geography at UC Berkeley:

1. **Earth System Science** is concerned with understanding the interlocking subsystems of the natural environment (atmosphere, hydrosphere, biosphere, lithosphere, and cryosphere) in which we live and how they may change with time. Departmental research and teaching in this area aim to provide a complex picture of a dynamic and changing Earth, including landforms, the atmosphere, oceans, ice sheets, and ecosystems. Area strengths lie in climate change and variability, glacial and riverine environments, terrestrial biogeochemistry, paleoecology, Quaternary stratigraphy, atmospheric physics and chemistry, and paleoenvironmental reconstruction. Our scholarship blends a rigorous understanding of process with curiosity about large-scale geographical phenomena.
2. **Development and Environment** is concerned with the social origins of natural resource use and abuse and the relation of economic growth to environmental quality around the world. Research and teaching in Development and Environment draw upon political ecology and social theory to explore the relations between natural and social systems, emphasizing patterns of access to and control over resources, property and management regimes, and systems of cultural meaning. Special emphasis is given to gendered practices, indigenous rights, religious signification, and the history of environmental thought.
3. **Urban and Cultural** is concerned with the intersection of global processes and locally situated systems of culture, politics, and economics at various spatial scales (urban, regional, national, international). Central concerns of Urban and cultural are shifting spatial patterns of industry, cities and modern life. Research and teaching address global economic forces, state politics, racial formations, social movements, labor organization, and consumer cultures.

Geography students are expected to have diverse interests and independent thought. We welcome students from a variety of backgrounds, including those with professional experience who wish to deepen their education. Students are encouraged to range freely through the curriculum and to follow their inspiration where it leads, working in tandem with faculty advisers. Graduate students often use two or three faculty in equal measure (including faculty affiliates and members from other departments) and collaborate with faculty on research, writing, and

teaching. We expect students to read extensively, develop their research, technical and teaching skills, and produce well-crafted papers, projects, and dissertations.

Extensive information on the department can be found on the website. (<http://geography.berkeley.edu>)

Minor Requirements

Students in the College of Letters and Science may complete one or more minors of their choice, normally in a field both academically and administratively distinct from their major.

A minimum of five upper division courses, all taken for a letter grade. Students must maintain an overall grade point average (GPA) of 2.0 for all courses taken for the minor. A minimum of three courses must be taken on the Berkeley campus. Students must take at least one course in the physical area (109, 134, C136, C139, 140A, 140B, C141, 142, 143, 144, C145, 148, 171, 173B, 175, 180) and one course in the human area from among the courses listed in the range of Geography 109-175. Students may select courses in the range of 175-188, but several of those courses have limited enrollment and require permission of the instructor. Geography 197, 198, and 199 cannot be used to satisfy a minor program requirement. Students should contact the student services assistant to obtain an update to the courses listed above.

Graduate Program

The graduate program is directed toward the PhD. Students are admitted to graduate studies only in the fall semester. The GRE general examination is required. For admissions information contact Marjorie Ensor at (510)642-3904 or consult the department's (<http://geography.berkeley.edu>) website. (<http://geography.berkeley.edu/grad>)

The Doctoral Program

All students take Geography 200A-200B in the first year and must take at least eight units every semester (primarily in the form of appropriate graduate seminars) before taking the qualifying exam and advancing to candidacy.

By the end of the third year, students entering with a BA or BS only must hand in a paper that would be suitable, in length and in quality, for submission to an academic or scientific journal. The paper must be handed in and approved by the main adviser no later than a month before the qualifying exam.*

Prior to taking the Qualifying Examination, all students must prepare a preliminary dissertation prospectus of between five and ten pages for their exam committee.

The qualifying exam (the "orals") *must* be taken by the end of the third year, although it is recommended that students entering with a master's degree take it by the end of their second year. The exam is based on a discussion of three broad geographic fields built around bibliographies produced in consultation with the examining committee.** Before starting dissertation research, each student must have a dissertation prospectus meeting—during which the student discusses a written research proposal—with at least two members of the Exam Committee. The PhD dissertation is written under the supervision of a committee of three University faculty members, one of whom must be from outside the Department of Geography and a member of the Berkeley Academic Senate. Upon final acceptance of the dissertation, the degree of PhD is

awarded. Students are expected to complete the PhD by the end of their sixth year in the program.

**Students who do not hand in satisfactory papers can be terminated from the program and awarded terminal MA degrees.*

***Students who do not pass the qualifying exam can be terminated from the program and awarded terminal MA degrees.*

German

College of Letters and Science (<http://ls.berkeley.edu>)

**Department Office: 5319 Dwinelle Hall,
(510) 643-2004**

Chair: Deniz Gokturk, PhD

Department Website: German (<http://german.berkeley.edu>)

Related Course Descriptions:

Dutch courses (p. 464)

Yiddish courses (p. 1452)

Overview

The Department of German offers undergraduates the opportunity to obtain a broad background in the field of German language, literature, and culture, and introduces them to the principles of literary analysis and criticism. German language instruction ranges from elementary courses to advanced courses in German style. Upper division courses cover German literature and culture from the earliest times to the present, as well as the linguistic study of German.

The graduate program emphasizes seminars that provide an in-depth study of more specialized areas in German literature, culture, and language. Instruction in methodology is provided for graduate student instructors and prospective teachers, and seminars in applied linguistics and second-language acquisition provide a theoretical and practical foundation for teachers.

We also provide programs of study in Dutch and Yiddish.

Major Requirements

Lower Division

German 1, 2, 3, 4, or the equivalent.

Upper Division

Ten upper division courses totaling at least 30 units; at least five courses and 15 units must be taken at UC Berkeley. The following courses are required: German 100, 101, and 103. Three additional courses in which a knowledge of German is required, as indicated in the course descriptions. German 100 or 101 is prerequisite for these courses. Two courses may be taken from a list of affiliated courses taught outside the Department of German. Courses must be taken in the literature and culture of at least two different centuries; consult the major adviser or undergraduate student affairs officer when in doubt about this requirement.

A letter grade of "C" or better is required for *each* upper division course applied to the major.

Transfer Students

If you are transferring from another institution and wish to declare a major in German, see the major adviser or the undergraduate student affairs officer.

Honors Program

- A grade point average (GPA) of 3.5 in the major and an overall GPA of 3.3 are required for participation in the program during the senior year.
- **Course requirement:** Writing an honors thesis (30-40pp) is a commitment over two semesters. In the first semester the student must enroll in a 2-unit independent study (199; P/NP); in the second semester, the student must enroll in H196 (4 units). Students are urged to meet with professors who might serve as thesis advisor prior to enrolling in German 199. The Honors Committee, consists of the major adviser and the thesis director, approves the topic and evaluates the thesis.

Minor Requirements

Lower Division

German 1, 2, 3, 4, or their equivalent.

Upper Division

Five courses (of which three must be taken at Berkeley). Students must enroll in at least two courses in which the knowledge of German is required (see the course descriptions that follow or the departmental booklet for current information). One affiliated course from another department may be applied to the minor. A letter grade of "C" or better is required for *each* upper division course applied to the minor.

Graduate Programs

The MA Program

A Bachelor of Arts degree (or its equivalent) in German or a related field is required for admission to the graduate program. Students are not admitted solely to pursue a Master of Arts, which is an integral part of the PhD program. The MA examination, involving interpretation of a literary text, is normally taken in the third semester.

For more detailed information on the MA program, students should consult the Department of German website. (<http://german.berkeley.edu/graduate/curriculum>)

The PhD Program

The Department of German offers a PhD in German. The program aims at comprehensive historical knowledge of German literature and culture and/or linguistics and is designed to train students in rigorous scholarship, original research, and independent thinking.

For more detailed information on the PhD program, students should consult the Department of German website. (<http://german.berkeley.edu/graduate/curriculum>)

Global Metropolitan Studies

Interdepartmental Graduate Group
Program Office: 226 Wurster Hall, (510)
643-9440

Co-Directors: Jason Corburn, PhD (School of Public Health and Department of City and Regional Planning) & James Holston, PhD (Anthropology Department)
Program Website: Global Metropolitan Studies
 (<http://metrostudies.berkeley.edu>)

Overview

The 21st century will be an urban century with more people around the world residing in metropolitan regions than in any other form of human settlement. This urbanization is taking place in both the global North and the global South. Its implications are widespread: from environmental challenges to entrenched patterns of segregation to new configurations of politics and social movements. The Global Metropolitan Studies Initiative is concerned with this urban condition. Bringing together numerous faculty, this multidisciplinary endeavor supports research and houses graduate and undergraduate curricula. It is one of a handful of "strategic" initiatives selected by the UC Berkeley campus to mark a new generation of scholarship and to consolidate an emerging academic field.

Undergraduate Program

Currently, there is no undergraduate major or minor in Global Metropolitan Studies. Interested students should consider the existing major in Urban Studies administered by the Department of City and Regional Planning (p. 69).

Graduate Program

The Designated Emphasis in Global Metropolitan Studies is for selected Berkeley PhD students with interest in metropolitan and regional issues. Students may come from any discipline across campus.

For information regarding curriculum and program requirements, please see the program's website (<http://metrostudies.berkeley.edu>).

Global Poverty and Practice

College of Letters and Science (<http://ls.berkeley.edu>)
Minor Office: Blum Hall, (510) 643-5316

Minor Director: Ananya Roy, MCP, PhD (Department of City and Regional Planning)
Minor Website: Global Poverty and Practice Minor
 (<http://blumcenter.berkeley.edu/education/gpp>)

Overview

The Global Poverty and Practice minor is an interdisciplinary program designed to introduce students to the theoretical frameworks, methods, and practical skills necessary to engage with global poverty and inequality in imaginative and effective ways. The "Practice Experience" is a central component of the Minor in which students partner with organizations

engaged in poverty action (e.g. non-governmental organizations, community organizations, government agencies, and other poverty or development programs). In conjunction with the coursework, this real world experience, which can take place domestically or internationally, allows students to connect theories and practices of poverty action. Students from all disciplines are encouraged to undertake the minor.

Eligibility

All currently matriculated undergraduate students are eligible to apply. Students must be able to demonstrate their ability to complete all minor requirements within the established unit norms for their degree program.

Courses

The minor is organized around 3 core and 2 elective course requirements, in addition to the practice experience. The requirements must be completed in the following sequence:

1. GPP/CP 115: Global Poverty: Challenges and Hopes in the New Millennium
2. GPP 105: The Ethics, Methods, and Pragmatics of Global Practice
3. Practice Experience
4. Reflection Course (GPP 196 or Major Thesis)

In addition, two required elective courses may be taken at any time during that sequence, but will most benefit students if taken prior to the practice experience. These electives, categorized as "Global and Area Studies" and "Sectors and Methods," must be relevant to the student's practice experience. Approved elective courses are listed on the GPP Minor Website.

How to Apply

Students must submit a minor declaration form to the GPP Minor Advising Office (100 Blum Hall). The deadlines are generally in early October and early March. For more information, please see the Global Poverty and Practice minor website (<http://blumcenter.berkeley.edu/education/gpp>).

Graduate Student Professional Development Program

Graduate Division (Academic Services Unit) (http://grad.berkeley.edu/acapro/academic_services.shtml)
Program Office: 301/321 Sproul Hall, (510)
642-4456

Program Chair: Rosemary Joyce
Program Directors: Linda von Hoene, Sabrina Soracco
Program Website: Academic Services Unit, Graduate Division (http://grad.berkeley.edu/acapro/academic_services.shtml)

Overview

The Graduate Division's Graduate Student Professional Development Program (GSPDP) supports graduate students in the successful completion of their graduate programs and in preparing for future careers.

The program currently offers courses in academic writing, teaching, and mentoring.

For further information regarding these courses, please see the program's website (http://grad.berkeley.edu/acapro/academic_services.shtml), or click on the Courses tab above.

Greek: Classical

Please see the Classics Department (p. 72) for program and degree requirements.

Health Services and Policy Analysis

School of Public Health (<http://sph.berkeley.edu>)

Department Office: 247C University Hall, (510) 643-8571

Chair: Ann Keller, PhD

Program Website: Health Services and Policy Analysis (<http://hspa.berkeley.edu>)

Overview

The PhD Program in Health Services and Policy Analysis is distinguished by its unique approach to interdisciplinary training in social sciences and its emphasis on real-world health policy issues. The program is a full time, four-to-five year curriculum of study that prepares students for careers in academia and research. Students pursue a disciplinary focus in health economics, organizations, health politics/policy, or population health and acquire breadth through additional coursework taken in several departments and schools across campus in each of those fields. Students receive a PhD degree from the Graduate Division of the UC Berkeley campus. The group is within the academic jurisdiction of the Graduate Council and is administratively located in the School of Public Health. The Faculty Group is comprised of 24 professors drawn from the Economics, Political Science, and Demography departments, Haas School of Business, and Goldman School of Public Policy.

The group integrates and applies disciplinary knowledge from the social sciences to the health care system. Students receive a thorough grounding in research methods and the application of these methods to the analysis of health policy issues. Dissertation research is empirically based and relevant to the provision, financing, and evaluation of health services. For further information, see the department website (<http://www.hspa.berkeley.edu>). (<http://hspa.berkeley.edu>)

Health and Medical Sciences Program

School of Public Health (<http://sph.berkeley.edu>)

Program Office: 570 University Hall, (510) 642-5479

Director: Ann Stevens, MD

Program Website: Joint Medical Program (<http://jmp.berkeley.edu>)

Overview

A five-year program leading to a Master of Science degree in Health and Medical Sciences from UC Berkeley and a MD from UCSF. The program's mission is to produce academic and community leaders in American medicine through early exposure to public health disciplines, medical humanities, bioethics, and social and behavioral sciences. Berkeley awards the master's degree upon successful completion of the first three years of work and UCSF awards the medical degree after successful completion of the fourth and fifth years. The master's program is coordinated with both a clinical skills curriculum and a case-based preclerkship science curriculum during the first three years. The master's curriculum requires a minimum of 20 additional units of academic coursework as well as the researching and writing of a thesis. Students are expected to acquire mastery of the preclerkship sciences and scholarly expertise in a selected area of interest related to health. Students selected for this program meet the rigorous academic requirements for entrance into both medical school and graduate school. The selection process screens for students who have a strong interest in determinants of human health and disease beyond the purely medical and who seek a collaborative small-group process for learning.

Admissions

Applicants to the UC Berkeley-UCSF Joint Medical Program must be eligible for admission to the University in graduate standing, with an undergraduate upper division grade point average (GPA) of at least 3.0, and a bachelor's degree from an accredited college or university. They must have fulfilled the standard premedical requirements and have taken the Medical College Admission Test (instead of the GRE) within three years of application. Initial application is via AMCAS, and admission is coordinated with the School of Medicine at UCSF.

For more detailed information about the UC Berkeley-UCSF Joint Medical Program, call (510) 642-5671, or see the program website (<http://jmp.berkeley.edu>).

Hebrew

Please see the Near Eastern Studies Department (p. 166) for program and degree requirements.

Hindi-Urdu

Please see the South and Southeast Asian Studies Department (p. 202) for program and degree requirements.

History

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 3229 Dwinelle Hall, (510) 642-1971

Department Chair: Ethan H. Shagan, PhD

Department Website: History (<http://history.berkeley.edu>)

Overview

The study of History is not about remembering names, dates and facts. It is about the study of change over time, of how, why, where and when it happens. History classes explore how the past has shaped, or enable us to think differently about, the world we inhabit today. Studying history will enrich your life, make you a better citizen of the globe, and equip you with skills that are in great demand by a vast range of employers. It is also fun.

The Department of History offers a program of instruction ranging widely over the historical record of human experience. The chronological, geographical, and topical range affords great flexibility to students working toward degrees in history and to those who wish to give a historical dimension to their studies in other disciplines. Lecture courses and seminars are available to students at introductory and advanced levels.

Major Requirements

The major in history consists of 12 courses (usually for a total of 49 units), at least 11 of which must be completed within the Department of History. Students may be allowed to include one course from another department in constructing their "fields of concentration" (see below).

Individual programs must satisfy both lower and upper division requirements. They must also include at least one course devoted entirely to premodern history (to be selected from courses focused on one or more of the following eras: antiquity, the classical period, and the medieval period; courses dealing solely with the early modern period do not satisfy this requirement).

Courses Satisfying the Premodern History Requirement

History 3, 4A, 4B, 6A, 30A, 100AP, 100BP, 100UP, 105A, 105B, 105C, 106A, 106B, 107D, 108, 109A, 109B, 111A, 113A, 114A, 116A, 116B, 117A, 117C, 117D, 118A, 149B, 150A, 150B, 150C, 155A, 155B, 156A, 156B, 171A, C175A, 177A, 185A

Students may declare the major after completing three courses in the Department of History, including at least two courses in the lower division.

Lower Division Requirements

Four courses, to include the following:

- one survey course in the history of the United States;
- one survey course in the history of Europe;
- one survey course in the history of another world area;
- one elective (of any additional offering, including History R1, 2, and 39).

Students may substitute one upper division course for any one of the first three requirements.

Upper Division Requirements

Eight courses, to include the following: one proseminar (History 103); one research seminar (History 101). At least four upper division courses must constitute a field of concentration, which is defined by at least one of the following rubrics:

- a period (such as the ancient world, the medieval world, the 20th century, or a similarly broad temporal span);
- a geographical area (such as Eastern Europe, China, the Mediterranean, or a similarly broad spatial expanse);
- a thematic approach (such as science and medicine, law, popular culture, religion, or a similarly broad subject matter).

The four courses constituting the field of concentration must include History 101. The three additional courses in the field of concentration may include History 103. They may also include one appropriate upper division course (of at least 3 units) from another department. Students must secure approval for their fields of concentration from the Committee on the History Undergraduate Major (CHUM) two semesters before graduation (thus, for example, during the spring of the junior year for majors expecting to graduate the following spring).

While individual majors must define their own particular fields of concentration, CHUM offers the following sample of possible fields to assist students in making their decisions:

Fields Defined by Period

- An era (for example, the ancient period, the medieval period, the early modern period)
- A century (for example, the 13th century, the 18th century, the 19th century)
- An age of transregional connection or crisis (for example, the age of global voyages, the age of revolution in Europe and North America, the age of nation-building in the Middle East)

Fields Defined by Geographical Area

- A national unit (for example, China, France, Kenya, Mexico)
- An empire (for example, the Roman Empire, the Byzantine Empire, the Ottoman Empire, the Spanish Empire, the British Empire, the Japanese Empire)
- A geopolitical region (for example, East Africa, Eastern Europe, Latin America, the Middle East, Southeast Asia)
- A geophysical region (for example, the Atlantic world, the Black Sea, the Indian Ocean, the Mediterranean, the Persian Gulf)

Fields Defined by Theme

Childhood and family history, gender history, imperialism and colonialism, legal history, race and ethnicity, history of religion, history of science, history of technology, urban history.

Remember that these sample lists are suggestive rather exhaustive or prescriptive. Students are free to combine fields by selecting, for example, a geographical emphasis on the Mediterranean while specifying an interest in the early modern period. In general, students should select fields with breadth and comparative dimensions.

Undergraduate Honors Program

To graduate with Honors in History, a major must achieve a general GPA of 3.3, a department GPA of 3.5, and a minimum grade of "A-" in History 101.

To be eligible for graduation with High Honors in History, a major must achieve a general GPA of 3.3, a departmental GPA of 3.5, and a grade of "A" in History 101. The student must also receive a nomination for High Honors from the 101 instructor. The decision to award High Honors, made in consultation with a second reader of the thesis, rests with the Honors Committee.

To be eligible for graduation with Highest Honors in History, a major must achieve a general GPA of 3.3, a departmental GPA of 3.7, and a grade of "A" in History 101. The student must also receive a nomination for Highest Honors from the 101 instructor. The decision to award Highest Honors, made in consultation with a second reader of the thesis, rests with the Honors Committee.

A major who is eligible for Honors after completing History 101 and interested in continued research may pursue a second thesis project under the rubric H195. The second project may substitute for the 101 thesis in determining eligibility for High or Highest Honors if the student meets the GPA standards and receives a nomination from the H195 instructor.

Minor Requirements

The minor in History consists of six courses (for a total of at least 24 units), all of which must be completed within the Department of History at UC Berkeley. An exception will be made for the lower division course, if it is taken at a California community college and has been articulated per assist.org. Exceptions may also be made for upper division courses; students may elect to take courses crosslisted with Department of History courses from any offering department. Courses taken through EAP and/or other study abroad programs will not be counted towards the minor. Only one course may be used to satisfy both a minor and a major requirement and only one course may be used to satisfy two minor programs' requirements.

An individual program must consist of at least one lower-division course and at least five upper-division courses. Within the six courses, at least two fields must be represented. The fields are Africa; Asia; Europe; Latin America; Near and Middle East; United States; and Comparative (e.g. History of Science, Transnational/Global History etcetera).

All courses for the minor must be taken for a letter grade and an overall GPA of 2.0 is required. The only exception of the letter grade requirement is for students declaring the minor in Fall 2013: they may apply one previously completed (Summer 2013 or earlier) course taken P/NP towards the minor. For students declaring the minor in Spring 2014 or later, no P/NP coursework will be able to be applied towards the minor.

History majors are not eligible to complete the minor.

Approved Courses

- Lower-Division: 2, 3, 4A/B, 5, 6A/B, 7A/B, 8A/B, 10, 11, 12, 14, 30, and 39A/C/D/E/F/G/H/I/J/K/L/M
- Africa: 100H, 103H, and 112B/C
- Asia: 100F, 103F, 111A/B/C/111B, 113A/B, 114A/B, 116A/B/C/D, 117A/D, 118A/B/C, and 119A
- Europe: 100B, 103B, 105A/B, 106A/B, 107, 149B, 150B, 155A/B, 156, 151A/B/C, 152A, C157, 158A/B/C, 159A/B, 162A, 164A/B/C, 165A/B/D, 166A/B/C, 167A/B/C, 168A, 169A, 170, 171A/B/C, 172, 173B/C, 174A/B, 178, 185A/B, and C194
- Latin America: 100E, 103E, 140B, 141B, 143, and 146
- Near and Middle East: 100M, 103M, 108, 109A/B/C, and 177A/B

- United States: 100AC, 100D, 103D, 120AC, 121B, 122AC, 123, 124A/B, 125A/B, 126A/B, 127AC, 130B, 131B, C132B, 134A, 135, 136/AC, 137AC, 138/T, C139B/C, and 154
- Comparative: 100L, 100U, 103L 103U, 160, 162B, C175B, 180/T, 181B, 182A/AT, 183A, 186, C187, C191, and C192
- History 199 (independent study) will count but only if taken for four units and for a letter grade. The appropriate field to which the 199 should be applied will be determined by the supervising professor.

Due to the evolving nature of our curriculum, new courses may be added to this list. If a student has any questions about a history course not represented here, s/he should consult with the minor advisor for clarification.

Higher Degrees

Students planning to work toward the degrees of MA and PhD should address inquiries to Graduate Admissions, Department of History. Candidates will be admitted for the fall semester only.

Further Information

The Online Schedule of Classes (<http://schedule.berkeley.edu>) issued before each semester and the department course descriptions issued at the beginning of each semester provide further detailed information about the courses offered by the Department of History, including when and by whom each course will be given.

History of Art

College of Letters and Science (<http://ls.berkeley.edu>)

Office: 416 Doe Library, (510) 643-7290

Chair: Christopher Hallett, PhD

Department Website: History of Art (<http://ls.berkeley.edu/dept/arhistory>)

Major Requirements

The major offers an introduction to the history of the visual arts in Western and Asian culture as well as the opportunity to do specialized study in areas of the student's choice. Fundamentally, a humanistic inquiry and often multi-disciplinary in approach, the field provides majors with essential training in those perceptual and historical, research and critical skills needed for many specialized professions. Majors frequently go on to careers in business, law, or the arts as well as graduate study in the history of art and careers in teaching, museum work, and conservation.

Majors in the History of Art select one of three areas of Emphasis: Western, Asian, or Independent Specialization. This tripartite organization underscores the Department's commitment to multiple fields of scholarly inquiry and to thematic specialization, while addressing the cross-border, multi-cultural dimensions of the visual arts that cannot be adequately explored within a single culture.

Study in a given field or independent specialization builds from courses in common at the Lower Division level together with HA100: Methodology in Art History. Students then select Upper Division courses relevant to their field or independent specialization with distribution across three subfields of the discipline.

For students in Western Art, the subfields are:

- Ancient (to ca. 400 C.E.)
- Medieval-Early Modern (ca. 400-1800 C.E.)
- Modern/Contemporary (after ca. 1800 C.E.)

For students in Asian Art, the subfields are:

- South/Southeast Asian
- Chinese
- Japanese

For students in Asian Art or an Independent Specialization, two of these three courses must predate 1800 CE and one must postdate 1800.

Within the Western and Asian specializations, students should then develop an area or areas of special competence or focus (such as Ancient; Medieval; Renaissance; Baroque; Modern; Contemporary; or Indian; Southeast Asian; Chinese; Japanese; Korean; etc.) defined by a cluster of Upper Division History of Art courses and seminars within their field and a course outside the Department in a field relevant to their focus within it.

The course outside the department is integral to and foundational for the student's emphasis and specific focus; it often is a course in history, literature, philosophy, or religion. It may not be an instructional language course. It requires the prior approval of an Undergraduate Adviser and should be taken as soon as the student's focus is defined, not left until her/his final semester. An Honors Thesis can serve as a capstone of a student's work within her/his emphasis, and a student may integrate a major in History of Art with a second major.

How and When to Declare the Major, Select an Emphasis

To declare the major in the History of Art Department, a student must complete two courses taught in the department and receive a grade of C- or higher in each course. All subsequent courses a student wishes to apply to the major must also receive a grade of C- or higher. Once these prerequisites are met, students may formally petition to declare the major by making an appointment with an undergraduate faculty adviser at any time during the fall and spring semesters. (Students in residence at UC Berkeley are strongly urged to complete all lower division requirements and one upper division course by the end of their sophomore year.)

Advantages of Declaring Early

Majors who declare early, especially in the sophomore year, enjoy several advantages:

1. A more thorough preparation for seminars and time to study more closely with several members of the faculty
2. Greater flexibility in coordinating major requirements with College of Letters and Science (L & S) requirements and in planning a sequence of courses that allows for special courses or programs of study, e.g., study abroad, curatorial internships, independent study, a double-major, and the Honors Program
3. Time for a generally higher level of study in the senior year, and opportunity to experiment with and prepare for diverse career opportunities

Advising

Declared majors must see an Undergraduate Adviser at least once each semester during the registration period (advisers are listed on the Department website and in the Department office). These advising

meetings provide majors with the opportunity to work closely with a faculty member who can help them develop an overall program of study well-suited to individual strengths and career goals. The advisers also apprise majors of special courses and opportunities, both in the History of Art Department and elsewhere. Please note that faculty advisers are typically not available during the summer and winter holidays. Advising appointments can be made by signing up online. (<http://arthistory.berkeley.edu/programs/undergraduate-welcome>)

In addition to general advising and coursework approval, advisers must approve all changes in registration, including withdrawals and add-drop changes, certain special study courses (History of Art 193, 194, H195, C196W, 199), and some special programs. Appointments should be made well in advance of deadlines.

Each semester during the Tele-BEARS enrollment period every Art History major must see an adviser to discuss her/his program of study and to obtain an adviser code in order to gain access to the Tele-BEARS system. Students should sign up for an advising appointment prior to their enrollment "phase," having considered carefully the department's course descriptions and having planned a schedule of proposed courses to be discussed with the adviser. Special additional office hours are held during enrollment periods, and advisers may decline to provide last-minute advising. Adviser codes will only be given out over the phone or via email if a student is studying abroad or is physically incapacitated.

Department undergraduate advisers do not administer or approve coursework or degree requirements in the College of Letters and Science other than the requirements of the major. For L&S requirements, students should make an appointment to see an L&S adviser in 206 Evans Hall.

Transfer of Credit

Major advisers may credit courses taken at other institutions toward completion of the History of Art major at Berkeley. This process is independent of the transfer of credit toward completion of L&S requirements for graduation. Transfer students should come to their first departmental advising appointment with copies of transcripts from all institutions they have previously attended as well as information about the content and requirements of the courses they wish to transfer. Transfer credit from community colleges is granted only for Lower Division requirements. Coursework from other universities or four-year colleges and from study abroad may be considered for Upper Division credit. For transfer of credit from study abroad, please see the Department Study Abroad Information sheet. Please note as well the residency requirements under "Special Restrictions for all Majors."

AP Credit

Course credit may be given to students who receive a score of four or five on the Advanced Placement (AP) Examination in History of Art. This credit may be to satisfy one lower division course requirement.

Suggestions for All Majors

1. **Foreign languages** are not required in lower or upper division courses but a reading knowledge of European or Asian languages may be helpful in seminars and other research courses. Students planning on graduate study in the History of Art are urged to develop a reading knowledge of German and French or Italian as early as possible. Special language requirements pertain for graduate study in Ancient and Asian art.

2. **Recommended course load** in History of Art will vary according to the student, course level, and individual course requirements. In general, no more than two History of Art courses per semester are recommended. A student's final academic year may include a greater number of courses in History of Art, especially if all L&S breadth requirements have been fulfilled.
3. **Special programs**, such as study abroad, internships, and double majoring require considerable advance planning. If you are interested in any of these, discuss your plans early with your adviser. Courses taken through study abroad must be discussed in advance with an adviser and will not be formally approved until after completion and until satisfactory documentation has been submitted. In order for courses taken abroad to satisfy major requirements, the breadth and depth of the course, the work demanded, and your performance must all meet Berkeley upper division standards. Your performance will be evaluated by your adviser upon your return to campus to determine whether major requirements have been satisfied. Please see the Department Study Abroad Information sheet.
4. Students with special intellectual or pre-professional interests may wish to enroll in independent study or research courses (193, 199), in a second seminar (192), or in additional, related courses in other departments. These students should discuss their interests with their advisers as early as possible.

Major Requirements

The Undergraduate Major comprises the following distribution of units: Lower Division (16); Upper Division (32): Total (48).

1. **Letter Grade:** All courses to be counted toward completion of the major must be taken for a letter grade except for the lower division studio art course and Art History 194 & 199, which may only be taken Pass/Not Pass.
2. **Declaring the History of Art major:** Students must complete two courses taught in the department and receive a grade of C- or higher in each course.
3. **Summer School:** Two summer school courses at Berkeley or elsewhere may be credited toward completion of the major.
4. **Residency:** A minimum of five upper division courses must be taken in the History of Art Department at Berkeley, of which one must be a seminar.
5. **Approval of Other Courses:** Except for specific courses named as co-requisites, courses taken in other departments for credit in the major must be approved in advance by a faculty adviser.

Department and University Honors

Honors in Art History: Students with at least a 3.5 grade point average (GPA) in History of Art are eligible for admission into the honors program. Candidates for honors in the History of Art are required to complete satisfactorily, within their senior year, an honors thesis consisting of at least two semesters of continuing academic work under faculty supervision (usually a seminar, directed research, or independent study course in the first semester plus, in the second semester, H195 Special Study). Those who have completed the program will graduate with honors, high honors, or highest honors in the major depending upon their final GPA in all upper division courses taken to fulfill the major requirements. Please see the Department Honors Program information sheet.

University Honors are awarded upon the recommendation of the department to students on the basis of overall GPA as follows: honors, high honors and highest honors. Requisite GPAs for both department and University honors change each year.

Maybelle M. Toombs Awards: These awards recognize the potential talent and ability of students based upon their record in the major up to the beginning of the senior year. By that time, the students must have completed at least two semesters of coursework as a History of Art major at Berkeley. Criteria for the award are outstanding grade point average and receiving financial aid. The award carries a stipend payable in the student's senior year for research and travel.

For the **Departmental Citation**, presented at Commencement to a graduating senior, the Departmental Award Committee considers grades to be the principal criterion, but it also takes into account the character of the student's overall program, its ambition and depth; the student's ability to sustain a high level of excellence throughout his or her undergraduate work, from the freshman to the senior year, in Art History as well as in other subjects; and the ways in which this broad experience is brought to bear in an honors thesis of high quality, one that notably demonstrates the ability to do research in the discipline and a genuine independence of mind and maturity of judgment.

Details to Remember

Registration

Once you have declared your major in History of Art, an appointment with an adviser is required every semester in order to discuss and approve your academic program. Appointments should be made early, especially if you are unsure of what courses you plan to take. Students who do not make early arrangements for appointments take the chance of not being able to see an adviser before the registration deadline. Advisers are generally not available during the summer. See the website of the Office of the Registrar for information and late fees. At the beginning of each semester, the advisers will hold special office hours during the first and second weeks of classes to approve adds, drops or other changes in your program. Sign up for an appointment with an adviser.

Incompletes

Incompletes must be made up within the deadlines indicated below. When the work is completed, you must complete a "Petition to Remove Incomplete" and then give it to the instructor along with your completed coursework; the instructor will then assign a grade and submit the form to the Undergraduate Student Services Adviser, where it will be sent to the Records Division at Sproul for processing.

Deadline for submitting completed work for Fall Incompletes: First day of instruction of the following fall semester. Deadline for submitting completed work for Spring/Summer Incompletes: First day of instruction of the following spring semester.

Incompletes in H195: If you are doing an Honors thesis during your final semester and receive an Incomplete *and* you do not need the Honors thesis course to satisfy major or L&S requirements, you will graduate without receiving honors in History of Art. If the Honors course is required to complete major or L&S requirements, receiving an Incomplete grade will lead to the removal of your name from the degree list and automatically prevent graduation.

Graduation Procedure

1. **A degree check in L&S:** A degree check from the Office of Undergraduate Advising in L&S (206 Evans Hall) should be done

the semester before you graduate to make sure you have completed L&S requirements.

2. **Departmental Adviser's approval:** In order for students to be cleared by the Department for completion of the major, all categories on the major advising form must have the adviser's initials as approval for coursework taken.
3. **Contact the College of Letters & Science Office of Undergraduate Advising** to confirm that you have completed requirements for Subject A, American History & Institutions, and American Cultures.
4. **Placing Yourself on the Degree List:** You must declare your candidacy to graduate during the semester in which you plan to meet all your degree requirements. You can do this through Tele-BEARS when you enroll for classes for your final semester, or by filing in person at the Office of the Registrar in the first eight weeks of your final semester (fee imposed after the third week).

Letters of Recommendation

Students should plan to request letters of recommendation from those faculty members with whom they have studied most closely, especially in seminars and other special study courses. General letters of reference for employment, internships, or graduate school/professional programs, may be placed on file with the Career Center (2111 Bancroft).

Graduate Study

Students who anticipate applying to graduate schools should discuss their plans with their adviser or with the faculty member whose field most closely corresponds to their interests. If you plan to begin graduate study in the fall after your graduation from Berkeley, you will have to prepare applications in the fall of your senior year. Most schools have deadlines in December through February, especially if application is made for both admission and fellowship support. Arrangements should also be made in the fall of your senior year for taking the Graduate Record Exam (GRE) or other graduate entrance exams that many schools require.

Brochures, Announcements, and Files

Announcements and brochures on graduate study, internships, work experience, fellowships, study abroad, training programs, and special lectures and symposia are posted on the Departmental bulletin board or distributed by email. If you are interested in a particular program and need more information, please contact the Undergraduate Student Services Adviser.

Appeals

If, at any time, a student has a complaint, the department has an "Undergraduate Grievance Procedure" that should be followed. A copy of this procedure may be obtained from the Undergraduate Student Services Adviser. Its purpose is to permit students in the History of Art Department to resolve complaints at the departmental level prior to filing complaints pursuant to the Berkeley Campus Student Grievance Procedure.

Undergraduate Association

The History of Art Undergraduate Student Association is an official campus group that exists to serve the interests of the department's majors. In the past, the Association has compiled an internship directory, hosted a student-faculty brunch, sponsored special lunchtime talks with faculty and graduate students, and assisted in organizing career seminars. All majors are invited and encouraged to participate in the Association. If you would like more information please leave a message in

the Association's mailbox in 416 Doe or see the Undergraduate Student Services Adviser.

Note: Major forms and other Departmental information can be found at the History of Art website. (<http://arthistory.berkeley.edu>)

Major Requirements

Western Art

Lower Division

1. Any two generally non-overlapping lower division History of Art surveys in Western Art and one lower division survey in Asian Art. (Notes: [i] History of Art R1B does not satisfy any major requirements; [ii] with prior Departmental approval, one upper division lecture course may be substituted for one of the three required lower division surveys.)
2. One lower division course in the Practice of Art or New Media (may be taken Pass/Not Pass.)

Upper Division

1. Three upper division lecture courses (not seminars), comprising one in each of the following three subfields of Western Art: Ancient (to ca. 400 CE); Medieval-Early Modern (ca. 400-1800 CE); Modern/Contemporary (after ca. 1800 CE).
2. Two additional upper division courses in the History of Art, as follows: one seminar in Western Art and History of Art 100: Methodology of Art History.
3. Three additional upper division courses, as follows: two lecture courses *or* one lecture course and a seminar in Western Art; and one upper division course outside the Department related to the student's main focus of study within Western Art (this course must be approved in advance by a departmental undergraduate adviser).

Asian Art

Lower Division

1. Any two generally non-overlapping lower division History of Art surveys in Asian Art and one lower division survey in Western Art. (Notes: [i] History of Art R1B does not satisfy any major requirements; [ii] with prior Departmental approval, one upper division lecture course may be substituted for one of the three required lower division surveys.)
2. One lower division course in the Practice of Art or New Media (may be taken Pass/Not Pass.)

Upper Division

1. Three upper division lecture courses (not seminars), comprising one in each of the following three subfields of Asian Art: South/Southeast Asian; Chinese; Japanese. Two of these courses must predate and one must postdate 1800.
2. Two additional upper division courses in the History of Art, as follows: one seminar in Asian Art and History of Art 100: Methodology of Art History.
3. Three additional upper division courses, as follows: two lecture courses *or* one lecture course and a seminar in Asian Art; and one upper division course outside the Department related to the student's main focus of study within Asian Art (this course must be approved in advance by a departmental undergraduate adviser).

Independent Specialization

Lower Division

1. Three generally non-overlapping lower division History of Art surveys including at least one Western and one Asian (Notes: [i] History of Art R1B does not satisfy any major requirements; [ii] with prior Departmental approval, one upper division lecture course may be substituted for one of the three required lower division surveys.)
2. One lower division course in the Practice of Art or New Media (may be taken Pass/Not Pass.)

Upper Division

1. Three upper division lecture courses (not seminars) that fit the specialization, in separate subfields of the History of Art as defined in this Department. Two of these courses must predate and one must postdate 1800.
2. Two additional upper division courses in the History of Art, as follows: one seminar that fits the specialization, and History of Art 100: Methodology of Art History.
3. Three additional upper division courses, as follows: two lecture courses or one lecture course and a seminar in the History of Art that fit the specialization; and one upper division course outside the Department related to the specialization (this course must be approved in advance by a departmental undergraduate adviser).

Minor Requirements

The Minor Program in the History of Art is designed to provide a structured and broad program for those students majoring in other disciplines but with a strong interest in the History of Art. The requirements for the minor program are as follows:

Breadth Requirements

Five upper division courses, covering at least three of the six subfields of Art History as taught in this Department: in Western Art, Ancient (to ca. 400 C.E.); Medieval-Early Modern (ca. 400-1800 C.E.); Modern/Contemporary (after ca. 1800 C.E.); and in Asian Art, South/Southeast Asian; Chinese; Japanese. One of the five courses may be a seminar (192); the rest must be lecture courses.

One of the five upper division courses may be a seminar (192); the rest must be lecture courses.

Recommended

Minor program students are also strongly urged to take two lower division survey courses (10, 11, 30, 34, 35, 41, 51, 62, etc.) and one course in the Practice of Art or New Media.

Residency Requirements

A minimum of three required upper division courses must be taken at Berkeley.

Grades

All courses to be applied toward the minor program must be taken for a letter grade. An overall GPA of 2.0 is required in all courses applied to the minor.

Note: Work for the minor must be completed within the 130-unit minimum limit for graduation. Courses accepted for a Minor Program may also satisfy L&S breadth requirements. A maximum of one course may be used to satisfy requirements of both a student's major and minor.

Industrial Engineering and Operations Research

College of Engineering (<http://coe.berkeley.edu>)

Department Office: 4141 Etcheverry Hall, (510) 642-5484

Chair: Phil Kaminsky, PhD

Department Website: Industrial Engineering and Operations Research (<http://ieor.berkeley.edu>)

Overview

Industrial engineering and operations research are closely related fields that deal with the design, analysis, and control of complex systems that include people, machines, material, and information, and the interactions of such systems with their environment. Formal models, often computer-based, are extensively used in systems analysis, while systems design, as in other fields of engineering, requires well-developed integrative skills and creativity. The theoretical foundations of optimization, stochastic systems, reliability, and engineering economics often form the basis for operations research studies. Industrial engineering frequently uses knowledge of production, human/machine systems, incentives, organizational behavior, and automation in the design and improvement of goal-seeking systems. These methods may be applied to a great variety of human activities in both public and private sectors, including manufacturing, banking, health care, communications, waste management, transportation, and logistics.

For more information, see the *College of Engineering Announcement: A Guide to Undergraduate and Graduate Study* (<http://coe.berkeley.edu/students/college-of-engineering-announcement>) online.

Undergraduate Program

Undergraduates in the Department of Industrial Engineering and Operations Research receive broad training in engineering fundamentals, principles of economics and advanced mathematics and statistics in order to prepare them for elective sequences which stress the construction of systems models, the role of the human being in these systems, and the related mathematical and computer methods of optimization and control. A unified core program is offered both for students who wish to pursue the professional aspects of the field, and for those who, after further education at the graduate level, wish to engage in teaching and research. In order to satisfy the needs of students with diverse objectives, considerable flexibility in planning individual programs is provided.

The BS program is accredited in industrial engineering and operations research by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET), 111 Market Place, Suite 1050, Baltimore, MD, 21202-4012; phone: (410) 347-7700.

Students interested in industrial engineering and operations research may also be interested in the operations research and management science major in the College of Letters and Science. See the "Operations Research and Management Science" section of this catalog for more information.

Curriculum and Requirements for the Bachelor's Degree

Students must complete a minimum of 120 units, in which they must satisfy the University of California and Berkeley campus requirements outlined in this bulletin. In addition, students must complete the requirements for the College of Engineering and the industrial engineering and operations research program. Full details on these requirements can be found in the *College of Engineering Announcement: A Guide to Undergraduate and Graduate Study* (<http://coe.berkeley.edu/college-of-engineering-announcement>) available online.

Graduate Programs

Graduate programs are offered leading to the MS or PhD.

The programs have been developed to meet the needs of individuals with backgrounds in engineering or the mathematical sciences who wish to enhance their knowledge of the theory, development, and use of quantitative models for the analysis, design, and organization of complex systems in the industrial, service, or public sectors. Students may concentrate on theoretical studies in preparation for doctoral-level research, or on applications of state-of-the-art techniques to real world problems.

Undergraduates from scientific disciplines other than engineering may be accepted into these programs. A master's degree may be earned by thesis or by comprehensive examination. Doctoral degrees require oral examination in the major and two minor fields followed by submission of a thesis demonstrating ability to conduct independent advanced research. Several computing laboratories, as well as a robotics laboratory, are available for graduate research.

The department requires all graduate applicants to submit scores of the general Graduate Record Examination (GRE). Further information on graduate programs may be obtained from the Industrial Engineering and Operations Research Office, 4141 Etchevery Hall, Berkeley, CA 94720-1777, and in the *College of Engineering Announcement* (<http://coe.berkeley.edu/college-of-engineering-announcement>).

Please visit this website (<http://ieor.berkeley.edu/AcademicPrograms>) for more information about the undergraduate and graduate programs.

Infectious Diseases and Immunity

School of Public Health, (<http://sph.berkeley.edu>) Interdepartmental Graduate Group

Department Office: 293 University Hall

Program Director: Richard Stephens, PhD

Department Website: Infectious Diseases and Immunity (<http://microbe.berkeley.edu/idgroup>)

Overview

The Graduate Group in Infectious Diseases and Immunity provides opportunity for the study of the biology of infectious agents, their interaction with human and other hosts, and their relationship with the environment. The program is unique in its emphasis on integrated multidisciplinary training in host-pathogen environmental interactions. Important areas of inquiry include the biology of host-pathogen interactions, molecular and cellular aspects of pathogenesis, the ecology and evolution of disease agents, environmental factors in

transmission, intermediate hosts and vectors, the biology of surveillance and epidemiological analysis, vaccine and drug development, and public health practices for disease prevention and control.

The objective of this program is to provide students with research-oriented pursuits that will train them to design and implement independent investigations. The goal is to promote health by integration of basic research and applied technologies for the development of new approaches for the diagnosis, treatment, prevention, and control of infectious disease in humans.

Students matriculating through this program will acquire expertise in fundamental infectious disease research and thus are well prepared for careers in academia, governmental agencies, and biotechnology. For further information, please see the department website (<http://microbe.berkeley.edu/idgroup>).

Information

School of Information (<http://www.ischool.berkeley.edu>)

Office: 102 South Hall, (510) 642-1464

Dean: AnnaLee Saxenian, PhD

School Website: School of Information (<http://www.ischool.berkeley.edu>)

Overview

The School of Information (I School) was created in 1994 to address one of society's most compelling challenges: the need to organize and make sense of the abundance of information that we can now collect, store, and share without regard for cost or distance. The way we organize, represent, govern, and make sense of this information will shape our ability to achieve public as well as private goals.

The I School educates professionals and scholars to understand the problems and possibilities of information, to develop models of information practice, and to design useful and usable information applications, services, and solutions. This requires insights from diverse fields. Our faculty includes scholars and professionals with deep expertise in information and computer science, social sciences, management, law, design, and policy, as well as related fields.

We offer two professional master's degrees and an academic doctoral degree. The Master of Information Management and Systems (MIMS) degree trains students for careers as information professionals and emphasizes small classes and project-based learning. The Master of Information and Data Science (MIDS) degree is an online program training data science professionals. The PhD program equips scholars to contribute to knowledge and to the policies that influence the organization, use, and sharing of information.

Master of Information Management and Systems

The Master of Information Management and Systems (MIMS) program is a two-year full time program, designed to train students in the skills needed to succeed as information professionals. Such professionals must be familiar with the theory and practice of storing, organizing, retrieving and analyzing information in a variety of settings in business, the public sector, and the academic world. Technical expertise alone is not sufficient

for success; I School graduates will be expected to perform and manage a multiplicity of information related tasks.

Graduates of the MIMS program will be able to:

- Identify and address user and stakeholder information and resource needs in context.
- Make and assess information design decisions iteratively.
- Intentionally organize collections of information and other resources to support human and/or machine-based interactions and services.
- Understand and apply foundational principles and debates of information law, policy, and ethics.
- Analyze complex relationships and practical choices at the intersection of technical design, policy frameworks, and ethics.
- Understand and apply fundamental principles and debates of information economics.
- Understand and apply architectural, computational, and algorithmic thinking and principles of concurrency to the design of information systems.
- Scope, plan and manage open-ended projects, both individually and in teams.
- Present findings and conclusions persuasively.

Such a profession is inherently interdisciplinary, requiring aspects of computer science, cognitive science, psychology and sociology, economics, business, law, library/information studies, and communications.

For information regarding degree requirements, please see the School of Information website (<http://www.ischool.berkeley.edu/programs/mims/degree requirements>).

Master of Information and Data Science

The Master of Information and Data Science (MIDS) program is a part-time, fully online program that trains data-savvy professionals and managers. The MIDS program is designed to train leaders in the growing field of data science.

The program focuses on problem solving, preparing students to creatively apply methods of data collection, analysis, and presentation to solve the world's most challenging problems. Students will bring together a range of methods to define a research question; to gather, store, retrieve, and analyze data; to interpret results; and to convey findings effectively. Using the latest tools and practices, students will identify patterns in and gain insights from complex data sets.

Working with data at scale requires distinctive new skills and tools. The MIDS program is distinguished by its disciplinary breadth; unlike other programs that focus on advanced mathematics and modeling alone, the MIDS degree provides students insights from social science and policy research, as well as statistics, computer science and engineering.

For information regarding degree requirements, please see the program's website (<http://datascience.berkeley.edu/academics/curriculum>).

PhD Program

The doctoral program is a research-oriented program in which the student chooses specific fields of specialization, prepares sufficiently in the literature and the research of those fields to pass a qualifying examination, and completes original research culminating in the

written dissertation. The degree of Doctor of Philosophy is conferred in recognition of a candidate's grasp of a broad field of learning and distinguished accomplishment in that field through contribution of an original piece of research revealing high critical ability and powers of imagination and synthesis.

For information regarding degree requirements, please see School of Information website (<http://www.ischool.berkeley.edu/programs/phd/degree requirements>).

Integrative Biology

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 3060 Valley Life Sciences Building, (510) 642-5024

Chair: John Huelsenbeck, PhD

Department Website: Integrative Biology (<http://ib.berkeley.edu>)

Overview

The Department of Integrative Biology offers a program of instruction that focuses on the integration of structure and function that influences the biology, ecology, and evolution of organisms. It investigates integration at all levels of organization from molecules to the biosphere, and in all branches of the tree of life: plants, animals, fungi, and microbes.

The department draws from many traditional and emerging fields and levels of biological organization in forging new research directions and answering traditional questions in new ways. The faculty has special strengths in the disciplines of functional morphology, organismal physiology, animal behavior, biomechanics, ecology, systematic biology, paleobiology, population genetics, and evolution.

Students who major in integrative biology will gain both a broad and deep knowledge in the biological sciences, which provides an excellent foundation for those interested in the biology of organisms, populations, and communities, particularly students who might wish to pursue graduate studies in any of the subdisciplines listed above or related emerging research areas. It also provides superb training for students interested in health-related professions (medicine, dentistry, veterinary medicine, physical therapy, nursing, pharmacy, optometry, etc.) or allied careers in biology (e.g., psychology, sociobiology, forestry, wildlife conservation, environmental and resource management, law, etc.).

Through laboratory and/or field courses, independent research projects, or involvement in faculty or graduate student research, students will gain an understanding of scientific logic and methods, through experimental or comparative approaches, including the investigation of historical patterns and processes.

Courses for Nonmajors

The department offers a series of courses for students not specializing in integrative biology. These courses provide instruction in the general principles of biology from a variety of viewpoints, ranging from the molecular level through behavior and evolution. Each year, a variety of seminars are available for freshmen (IB 24) and sophomores (IB 39, IB 84) to introduce them to areas of integrative biology.

Major Requirements

Note: All courses must be taken for a letter grade.

Lower Division

The foundation for this major includes a basic one-year course in biology, general chemistry, organic chemistry, physics, and one year of mathematics. Additional coursework in mathematics, statistics, biochemistry, and multiple languages may be helpful for those planning on graduate and/or professional studies.

Required of all students in the major: Biology 1A (3), 1AL (2), 1B (4); Chemistry 1A (3), 1AL (2), 3A (3), 3AL (2), 3B (3), 3BL (2); (3); Mathematics 1A (4) and 1B (4) or 10A (4) and 10B (4); Physics 8A (4), 8B (4).

With approval of an adviser, more advanced courses may be substituted for those listed above.

Upper Division

This curriculum is designed to provide the intellectual tools and techniques necessary to conduct multidisciplinary work in the areas of organismal biology and to prepare students as broad-thinking biologists. No formal specialization is possible as an undergraduate; however, as of fall 2010, students can select courses to reflect interests and areas of focus in one of two "tracks" within the major in order to meet all upper division requirements.

Students must complete at least one course in evolution/genetics, as well as two courses that include laboratory and/or field work to provide experience and methodologies for study of both living and extinct organisms; three or more additional courses from designated requirement lists (totaling at least 24 upper division units) will complete the undergraduate major in integrative biology.

All students will complete one course from a designated list of evolution/genetics courses, and will select one of two tracks:

1. Ecology, Evolution and Organismal Biology
2. Human Biology and Health Science

Within each track, at least three additional Integrative Biology courses, falling under designated categories (Ecology, Behavior, and Diversity or Structure, Function, and Human Health), to be selected in consultation with a department adviser, and at least two courses that include significant laboratory or field biology components will be required.

The minimum total upper division units required to complete the major is 24. Students should plan to take additional upper division courses to reflect areas of interest and intellectual development. In order to meet this minimum, a list of select courses from alternative departments will be provided to allow for some upper division elective coursework. Further, up to three units of upper division, inquiry-based research may be counted toward major completion. Please contact departmental advisers for details.

Note: Students who declared Integrative Biology prior to fall 2010 shall contact the Undergraduate Student Services office in 3060 VSLB for specific questions or concerns regarding major completion.

The department website (<http://ib.berkeley.edu>) presents greater information about planning a major within this field, such as lists of courses applicable to each major requirement and sample semester-

by-semester course schedule plans. Please visit the website (<http://ib.berkeley.edu>) to explore undergraduate requirements and options.

Juniors and seniors are encouraged to pursue independent study research (IB 199 or IB 191) under the sponsorship of a faculty member. Interested students should have completed at least 60 units of credit and be in good academic standing. One can consider possible research opportunities by visiting the webpages (<http://ib.berkeley.edu/research>) of various Department of Integrative Biology faculty, graduate students, and affiliated research centers, museums, and collections.

Note: Transfer students with 56-70 units must complete all lower division requirements before transferring to UC Berkeley.

Honors Program

Students with a minimum UC grade point average (GPA) of 3.3 overall *and* in the major should consider participating in the honors program. They must identify an appropriate faculty sponsor who agrees to advise them on an original research project they wish to do and enroll in two semesters (six units) of the honors thesis course (H196A-196B). These students must present the results of that work in the form of a written report, the honors thesis, and a poster presentation at Cal Day. In order to graduate with honors, students must maintain a minimum 3.3 GPA overall *and* in the major.

Graduate Program in Integrative Biology

Biological phenomena occur at various levels of structural organization, ranging from molecules to organisms, and from populations to the global ecosystem. Integrative Biology takes a whole-organism approach, extending from the genome and proteome through organismal traits (phenotypes), to communities and ecosystems. Through the coordinated study of multiple levels of biological organization over a broad range of spatial and temporal scales, Integrative Biology offers a unique approach to understanding fundamental questions concerning the evolution and maintenance of biological diversity, including organismal form and function, and ecological and ecosystem processes. This multidimensional approach underpins our graduate program, where students combine observational, experimental, and comparative approaches with the development of theory, and apply concepts and techniques from the biological sciences and other disciplines.

Students in the PhD program generally apply to work with one or two faculty members whose research interests match those of the applicant. Some groups in the department employ a system of rotation among several labs. Requirements include passage of a qualifying exam, one year of teaching experience, and an advanced evolution course. The central part of the program is the dissertation, incorporating original research that builds on the student's particular interest and background.

For more information please go to our website. (<http://ib.berkeley.edu>)

Research Facilities

The Botanical Garden, located on 34 acres in Strawberry Canyon, provides opportunities for research with living plants, supplies and teaching material for classes on campus, and serves as an outdoor laboratory for students. Independent student and internship opportunities are available in horticulture and plant conservation. The garden is organized primarily by geographic region: California, South America, Mexico/Central America, South Africa, Australasia, Mediterranean, Eastern North America, and Asia. Specialized collections include succulents and cacti, carnivorous plants, orchids, ferns, roses, tropical

plants, a Chinese medicinal herb garden, and an herb garden. Laboratory and greenhouse facilities are available at the Botanical Garden Plant Conservation Research Center. For further information about events, programs, and opportunities, go to the Botanical Garden website. (<http://botanicalgarden.berkeley.edu>) Inquiries can be addressed to the director by mail at UC Botanical Garden, 200 Centennial Drive #5045, Berkeley, CA 94720-5045; emailed to garden@berkeley.edu, or by calling (510) 643-2755.

The Cancer Research Laboratory (CRL) is a research institute on the Berkeley campus that carries on a research, teaching, and service program designed to foster interdepartmental participation in cancer research. The central research program represents a multidisciplinary approach to an understanding of the mechanism of neoplastic transformation using a variety of systems. Graduate student and postdoctoral research programs are supported in various areas of tumor biology: biochemistry, cell biology, endocrinology, genetics, immunology, molecular biology, and tumor virology. Currently, CRL provides advanced technical resources to cancer and biomedical researchers in the areas of advanced microscopy, flow cytometry, gene targeting/transgenic mouse technology, human stem cell facility, and an infectious disease facility. Instrumentation in the facilities is operated by highly trained staff who offer instruction in the methods and techniques associated with each facility. For more information, go to the CRL website. (<http://biology.berkeley.edu/crl>)

The Center for Interdisciplinary Bio-Inspiration in Education and Research (CIBER) has been established to lead in the development of a new field of Integrative Systems Biomechanics that moves biology toward greater integration with other disciplines such as physics, mathematics and engineering to a degree not seen before. The discipline focuses on the physics of how organisms function and interact with their environment. The goal is to discover basic physical principles that can be applied to a diversity of organisms and unique innovations. The fluid and solid mechanics of organisms are examined using direct experimentation, comparative and phylogenetic approaches and both mathematical and physical modeling. Using this approach, the next generation of scientists and engineers will gain experience in collaboration across disciplines as well as how to extract principles in biology that inspire novel design in engineering. In addition to developing innovative methods of teaching and research, CIBER has established an interdisciplinary teaching laboratory that allows students in undergraduate as well as graduate courses to address challenging problems that will give them a meaningful interdisciplinary learning experience. These facilities are being used in a number of existing and new courses, at both the undergraduate and graduate levels. For more information on CIBER, see the website. (<http://ciber.berkeley.edu>)

The Center for Stable Isotope Biogeochemistry (CSIB), located on campus, is an analytical facility established as a University education, research, training, and service unit. The center provides high precision, state-of-the-art instrumentation for analyzing the stable isotope composition of a diverse array of materials (e.g., plant and animal tissue samples, soils, atmospheric gasses, water, specific compounds, organic matter, etc.), as well as space for purifying, extracting, and preparing sample material for analysis. The center also serves as a focal point for research and training for many of our programs at Berkeley (e.g., in Biology, Ecology, Paleontology, Anthropology, Geography, Chemistry, Hydrology, Atmospheric, and Soil Sciences). The specialized equipment housed in the facility serves a broad range of student, postdoctoral, and faculty needs. This equipment includes several gas phase isotope ratio mass spectrometers (IRMS); these mass spectrometers have the capabilities of analyzing the isotopic composition of hydrogen, carbon,

oxygen, nitrogen, and sulfur in biological and geological samples, gasses (biogenic and atmospheric), and water. In addition to the instrument laboratory, the center houses a fully-equipped sample extraction and preparation laboratory for handling a full range of sample types. For more information, see the CSIB website. (<http://ib.berkeley.edu/groups/biogeochemistry.html>)

The Field Station for Behavioral Research is a research institute that supports behavioral studies on animals under natural and seminatural conditions. Situated on 20 acres of wooded hillside at the top of Strawberry Canyon two miles from the central campus, the field station maintains and observes a variety of animal species. Faculty from several Berkeley departments including Integrative Biology conduct research at the station. Its facilities are available for graduate and postdoctoral research with the approval of the director. People interested in the field station may contact the director via the Department of Integrative Biology.

The Gump South Pacific Research Station, French Polynesia, is located on Moorea (17° 30' S 149° 50' W), one of the Society Islands, 15 km northwest of the main island of Tahiti. Moorea offers diverse habitats ranging from coral reefs, lagoons, coastal beaches, freshwater streams, wetlands, and mountain forests. The Gump Station occupies 14 hectares (35 acres) of land from the shore to 149m (489ft) at the entrance to Cook's Bay, providing excellent access to the ocean, lagoon, and island interior. A range of housing options (shared dormitories, private bungalows) and laboratories allow long- and short-term research and education in a diversity of fields, including marine, freshwater, and terrestrial biology, evolutionary and conservation biology, archaeology, anthropology, ethnobotany, geology, and geomorphology. Facilities include boats and 4WD vehicles. A waterfront marine laboratory contains an open seawater system and equipment for UC Scientific Diving. A large climate controlled research building contains offices, library/conference room, and several laboratories including space for morphological work (high-quality microscopes) and molecular genetic analyses. The Station is connected to the Internet via multiple ADSL lines and has WIFI access in all common areas. For further information, contact Dr. Neil Davies, Executive Director, ndavies@moorea.berkeley.edu. More information can be found on the station website. (<http://moorea.berkeley.edu>)

The Human Evolution Research Center (HERC) is dedicated to the study of human origins and evolution. HERC represents an international focal point for field and laboratory research and education. It is a center for the study of the process and products of human evolution. Research by the HERC includes both field and laboratory investigation. The center's collections and facilities provide support to faculty and students working on important, large-scale investigations. These include The Middle Awash Project and The Revealing Hominid Origins Initiative (RHOI). For more information on HERC and RHOI, see the HERC website (<http://herc.berkeley.edu>) and the RHOI website, (<http://rhoi.berkeley.edu>) respectively.

The Jane Gray Research Greenhouse is operated by the Department of Integrative Biology and comprises approximately 2,400 square feet of state-of-the-art research space, used for projects by faculty and students. The climate management system is computer-controlled and monitors temperature, humidity, light energy, and wind speed and direction. The system's responses to these conditions can be controlled centrally or from a remote location through an on-screen ARGUS interface to gas heaters, evaporative coolers, vents, fans, and sunshades. The facility provides an ideal resource for plant growth investigations that require closely controlled and monitored conditions. For more information, see the Greenhouse website. (<http://ib.berkeley.edu/jgrg/facilities/greenhouse>)

The Museum of Paleontology (UCMP), a research institute for faculty, staff, students, and qualified visiting scholars, has one of the largest collections of fossil protists, invertebrates, plants, and vertebrates in the nation, as well as large collections of modern vertebrate skeletal elements and invertebrates. The collection is worldwide in scope and is especially strong in materials from western North America. Research activities include systematic, paleobiogeographic, paleoecologic, biostratigraphic, evolutionary, and theoretical paleobiologic studies. Field work on all continents by researchers and students associated with the museum continues to sustain substantial collection growth. Special facilities include molecular biology and fossil preparation laboratories, as well as specialized laboratories for microfossils, pollen, and cast production.

UCMP has an active education and outreach program, using the web as its primary venue for sharing science with a broader audience. The UCMP website (<http://www.ucmp.berkeley.edu>) contains a wealth of information on evolution, paleontology, systematics, and associated sciences, as well as access to collections data and specimen images. Requests for use of the collections or facilities should be mailed to the Director, Museum of Paleontology, Valley Life Sciences Building, University of California, Berkeley; Berkeley, CA 94720.

The Museum of Vertebrate Zoology is an Organized Research Unit affiliated with the Department of Integrative Biology and the Berkeley Natural History Museums. It was established in 1908 and has grown to be one of the largest and most important collections of amphibians, reptiles, birds, and mammals in the world. The museum has no public exhibits; it is primarily a research organization and a center for graduate and postdoctoral education. The museum's space in the Valley Life Sciences Building includes all of the collections as well as administrative and research offices for faculty, postdoctoral, and graduate students. In addition, there are laboratories for molecular genetics and biodiversity informatics. Research activities center on problems in evolutionary biology, with emphasis on systematics, ecology, functional and developmental morphology, behavior, population and conservation biology, and biogeography. Integration of field and laboratory methods is encouraged. For more information, write to the Director, Museum of Vertebrate Zoology, UC Berkeley; Berkeley, CA 94720, or, for the Hastings Reservation, to Dr. Mark Stromberg, Carmel Valley, CA 93925. More information can be found on the museum's website. (<http://mvz.berkeley.edu>)

The University and Jepson Herbaria offer a worldwide reference-research collection, laboratories, archive, and library that form a foundation for basic research in systematic botany, ecology, phytogeography, evolution, and comparative genomics. These resources are available not only to faculty, staff, and students but also to visiting scholars and biologists throughout the United States and other countries. Resources include:

1. The collection itself, more than 2.2 million specimens with special strengths in the angiosperm flora of California and elsewhere around the Pacific Rim, as well as in cryptogamic groups including ferns, bryophytes, fungi, and algae.
2. Modern laboratories for all types of plant studies, ranging from morphology/anatomy to molecular systematics.
3. Extensive electronic resources, including an online flora of California, and interface for accessing electronic records from all California herbaria, the world's standard index of algal nomenclature, to the tree of life for green plants.

See the website (<http://ucjeps.berkeley.edu>) at for more information. Inquiries should be addressed to: Director, University and Jepson Herbaria, University of California, Berkeley; Berkeley, CA 94720.

The University of California Natural Reserve System (NRS) was founded in 1965 to establish and maintain significant examples of California's diverse aquatic and terrestrial ecosystems for university-level teaching, research, and public service. The 33 reserves are open to all qualified individuals and institutions for scholarly work in disciplines ranging from geology and environmental sciences to anthropology and art. For more information on the NRS, contact the UC Office of the President at (510) 987-0150 or go to the UC Office of the President website. (<http://nrs.ucop.edu>.) For specific information regarding the four reserves administered by the Berkeley campus, contact faculty reserve manager Mary Power at (510) 643-7776 or mepower@berkeley.edu. The Berkeley campus administers these four reserves:

- **The Angelo Coast Reserve** in Mendocino County is one of the most diverse reserves, with 26 terrestrial and four aquatic habitat types. Located along a belt of highly deformed, well-defined coastal ridges cut by the South Fork of the Eel River, the reserve contains the largest virgin Douglas fir community left in the state, as well as four undisturbed watersheds. It is part of the UNESCO California Coast Ranges Biosphere Reserve. For more information, contact Peter Steel at (707) 984-6653 or psteel@nature.berkeley.edu.
- **The Chickering American River Reserve** in Placer County is located in the sub-alpine headwaters basin of the North Fork of the American River. The reserve has diverse topography, soil, and moisture regimes on sedimentary, igneous, and metamorphic substrates. It supports approximately 1,000 plant species, unusual red fir and mixed-conifer old-growth forest communities, and a variety of large mammals. Long-term research continues on the endangered wolverine. For more information, contact James Kirchner at (510) 643-8559 or kirchner@geomorph.berkeley.edu.
- **The Hans Jenny Pygmy Forest Reserve** in Mendocino County supports elfin forests of endemic pygmy cypress, bishop pine, and unusual evergreen shrub species on highly podsolized, old marine terrace soils. This reserve is adjacent to lands managed by The Nature Conservancy. For more information, contact Ronald G. Amundson at (510) 643-7890 or earthy@nature.berkeley.edu.
- **The Hastings Natural History Reserve** in Monterey County contains a representative sample of California's interior Coast Range ecosystem, with annual and perennial grasslands, oak woodlands, chaparral, and running streams. The reserve has 620 vascular plant species and 166 bird species. While noted for its 50-year research history on vertebrate ecology and oak woodland biology, the reserve is also conducting important research on native grassland restoration. For more information, contact Mark Stromberg at (831) 659-2664 or stromber@berkeley.edu.

Interdisciplinary Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Field Major Office: Undergraduate and Interdisciplinary Studies, 231 Evans Hall, (510) 643-7691

Director: Renate Holub, PhD

Department Website: Interdisciplinary Studies
(<http://www.ls.berkeley.edu/ugis/isf>)

The Interdisciplinary Studies Field (ISF) Major

The Interdisciplinary Studies Field (ISF) major offers students the opportunity to develop an individualized research program. With the help of an ISF faculty adviser, students use courses from the social sciences, the professional schools and colleges or the humanities in order to pursue their research. Typically, students select courses from three disciplines. In addition, the ISF major offers a capstone experience in that all students will research and write a substantive thesis. The research program must meet three criteria:

1. First, it must be interdisciplinary. This means that the research area must integrate approaches from at least three fields or disciplines. The principle of integration can be comparative, transnational, historical, geographic, or thematic.
2. Second, the research area must not replicate an existing major. The purpose of the ISF major is to enable research interests of undergraduates in areas in which no formal program exists.
3. Third, the area of research must be feasible. Each student's proposed research program must be discussed with a faculty adviser to make sure that the range and number of courses required will be available.

The field major is administered by a faculty advisory committee and is one of the programs of the Office of Undergraduate and Interdisciplinary Studies.

Admission to the Major

Students should apply to the major before or during the first semester of their junior year. Students will be considered for the Interdisciplinary Studies Field major on the basis of the appropriateness of their proposed area of research, the quality of their previous work in relevant courses, and their overall promise for interdisciplinary work. Candidates for the major should discuss their individual research proposal with an ISF faculty member before submitting an application. Applications will be accepted throughout the semester.

Major Requirements

Lower Division Requirements

One year (two courses) to fulfill the World Civilizations prerequisite requirement. A description of the types of courses that may be used to fulfill the requirement are listed in the ISF student handbook, which is available on the ISF web page or outside 263 Evans Hall. World Civilizations equivalent courses may be discussed with ISF faculty advisers. The World Civilization requirement must be taken for a letter grade.

Upper Division Requirements

Thirty units distributed among the following:

1. **Area of Research:** A minimum of 20 upper division units (at least six courses) drawn from at least three fields or disciplines. Examples of research areas are available on the ISF website or in the ISF student handbook.
2. **Core Theory and Methodology Courses:** Students in the major must take ISF 100A, Introduction to Social Theory and Cultural Analysis. In addition, students must take one of the following courses: ISF 100B, Introduction to Social Theory and Cultural Analysis; ISF 100C, Word and Image; ISF 100D, Introduction to Technology, Society and Culture; ISF 100E, The Globalization of Rights, Values, and Laws in the 21st Century; or ISF 100F, Theorizing Modern Capitalism: Controversies and Interpretations. In addition, lists of supplemental courses from various departments across campus that may be used to fulfill the second methodology requirement will be available each semester outside 263 Evans Hall.
3. **Thesis Requirement:** ISF 190, Senior Thesis. Research and writing of a senior thesis (30-40 pages) that pertains to the student's area of research.

Honors Program

All honors students enroll in the senior thesis seminar with other majors (ISF 190); there will no longer be a separate Honors Thesis Seminar (ISF H195). Senior Honors Theses that receive honors will be no different in length and baseline requirements than other ISF Senior Theses, although they will inevitably use more primary and secondary sources, employ a more sophisticated methodology, and offer more rigorous and sophisticated interpretations. Students seeking Honors will still need to identify and seek out Senate Faculty members from other departments for advice and to serve as Second Readers. Their grades in ISF 190 will still be constituted by an average of grades assigned by the ISF 190 Instructor and the Second Readers.

Students eligible for honors must still have an overall GPA of at least 3.6, including in ISF courses. But the degree of honors in ISF will no longer be tied to a particular GPA. Instead, students in the Honors Option will be nominated for a degree of honors (Honors, High Honors, Highest Honors) by the ISF instructor, or the Second Reader, or another ladder faculty member.

The assessment of the degree of honors will be made by an ISF Honors Committee consisting of no fewer than two teaching faculty of the ISF Program and two Academic Senate Members under the oversight of the ISF Director. The ISF Honors Committee will use the criteria of scholarly originality, methodological sophistication (including interdisciplinarity), the quality of source interpretation, and excellence in writing and argumentation to adjudicate the degree of honors to be conferred. To allow adequate time for the Honors Committee to assess and review the Senior Honors Theses, students seeking Honors will be required to turn in their final Senior Theses at the beginning of Reading/Review/Recitation Week (in Spring 2014, the due date is May 5, 2014).

International and Area Studies

Graduate Division (<http://grad.berkeley.edu>)
Program Office: 101 Stephens Hall, (510) 642-4466

Chair: Nezar AlSayyad, PhD (Department of Architecture)

Departmental Web Sites: International and Area Studies (<http://iastp.berkeley.edu>)

Overview

The MA degree in International and Area Studies (IAS) is a two-year concurrent Masters program. It is an interdisciplinary program designed to complement the graduate degree work by providing the fundamentals of contemporary international issues and/or detailed knowledge on particular world regions or countries. The MA degree in International and Area Studies provides wide flexibility in crafting an individual interdisciplinary program complementing or enhancing the primary area of graduate study. Students tailor the content of their programs within a defined framework to suit their interests. Specific course work is chosen in consultation with a faculty adviser.

Note: This program is available **only** to students who are currently registered in an UC Berkeley graduate program.

IAS MA Degree Requirements

Students must organize their course work around either a topical or a geographic-area concentration.

- A topic-oriented program concentrates on selected aspects of current international affairs. Course work might combine studies in economics, political science, and history, and could focus on international, transnational, or global issues.
- An area-oriented program focuses either on a major country or region of the world and should have a strong historical or cultural dimension.

All students must demonstrate a strong grounding in economics and social science. Students who have not completed equivalent course work prior to entering the program must take:

- At least one intermediate-level Economics course
- At least two Social Science courses
- At least two Area Studies courses

24 Units of Course Work

A minimum of 24 units of course work, independent of courses taken for the primary degree (MA/MS or Ph.D.), is required. At least twelve of the 24 units must be graduate-level course work (course numbered 200-299). No more than a third of the units (8 maximum) may be taken on an S/U or P/NP grading basis. No courses used toward the student's primary program may be used for the IAS M.A. Lower-division undergraduate coursework may not be used toward this degree.

Foreign Language

Demonstrated proficiency in a modern foreign language relevant to the focus of study, and equivalent to the completion of four college-level semesters (two years) of language study, is required. None of the courses taken to fulfill this requirement may be used toward the 24-unit requirement for the degree. Language courses may be taken on a pass/

not pass basis. However, a maximum of four units of "advanced" level language courses (upper division), if relevant to the focus of the student's program, may count toward the degree.

Capstone - Thesis or Oral Exam

Either a written thesis or a comprehensive oral exam based on the focus of study is required to complete the IAS MA degree. This is in addition to any thesis or exam taken for the student's primary degree. However, students are encouraged to relate the IAS thesis topic to the work done for their primary degree program. Students enrolled in IAS 292 Direct Advanced Research and/or IAS 299 Directed Reading courses to complete their thesis should note that no more than 4 units can be applied toward the 24 minimum units required for the degree.

Advancement to Candidacy

Approval of all course work, completion of the foreign language requirement, and approval of the faculty committee must be granted by the IAS MA Faculty Adviser prior to advancement to candidacy. The candidacy petition must be submitted no later than the fifth week of the semester in which the student intends to complete the degree. If thesis research involves human subjects, a Course Completion Record from the Committee for the Protection of Human Subjects must also be submitted. Final approval of candidacy petitions is granted by the Dean of the Graduate Division.

Admission

The application to this program is made available on this page (http://iastp.berkeley.edu/grad_detail/138) each August. The application is due in mid-December, and applicants are notified of the admissions committee's decisions by late March.

Italian Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 6303 Dwinelle Hall, (510) 642-2704

Department Chair: Albert Russell Ascoli, PhD
Department Website: Italian Studies (<http://italian.berkeley.edu>)

Overview

The undergraduate program in Italian Studies is interdisciplinary in nature, affording students the opportunity to emphasize Italian language, literature, history, cultural studies, and film. Students choose from among departmental course offerings in Italian literature, arts, culture, and history. Upper-division courses with significant Italian content are often taught in other departments and programs in the Divisions of Arts and Humanities and of the Social Sciences, among them History, History of Art, Music, Comparative Literature, Film Studies, and Medieval Studies. See our website or other course listings of the department or program you are interested in for specific information. Such courses may be counted toward the major with approval of the faculty undergraduate adviser and within the specified limitations for course work taken in English. Adviser approval should be sought prior to enrollment.

The graduate program offers in-depth training in the field of Italian Studies, leading to the PhD degree. Beginning with a strong foundation in the critical analysis and historical understanding of Italian literature, the program encourages exploration of a wide range of disciplinary and interdisciplinary areas, including, but not limited to, film studies; comparative literature; literary, rhetorical, and cultural theory; gender studies; history; anthropology; history of art and music; architecture; classics; political science; medieval and early modern studies; Romance languages and literature; and so on.

Major Requirements (52 units)

Lower Division (20 units): Italian Studies 1, 2, 3, and 4, Elementary/Intermediate/Advanced Italian, or their equivalent in linguistic proficiency.

Upper Division (32 units):

- **Language:** Italian Studies 101A and 101B, Advanced Grammar, Reading, and Composition (8 units)
- **Introduction to Italian culture or literature:** Italian Studies 103, History of Italian Culture, or Italian Studies 104, Reading Italian Literature (4 units)
- **Electives:** chosen from Italian literature, cultural studies, history, and film (20 units/5 courses)

Up to 8 units or 2 courses with primary readings and discussion in English may be counted toward the total major unit requirement offered in the Italian Studies department and departments such as History of Art, History, and, when offered, Medieval Studies, Music or Comparative Literature. Courses in other departments may be taken with advance permission of the undergraduate faculty adviser.

Education Abroad: Up to 12 units/3 courses may count toward upper-division requirements. At least 12 units must be taken in residence. All

courses for the major must be taken on a letter-grade basis. A grade-point average of 2.0 must be maintained in the major and overall.

Honors Program

To enter the honors program, in addition to having a minimum overall 3.3 GPA, majors must have completed at least 20 upper division units in the major with a minimum GPA of 3.5. Candidates must enroll in Italian Studies H195 for one semester in their senior year during which they will carry out research and write an honors thesis under the guidance of a faculty member. Students who meet the GPA requirements must first consult with the undergraduate faculty adviser in order to pursue an honors thesis.

Minor Requirements (40 units)

Students in the College of Letters and Science may complete one or more minors of their choice, normally in a field both academically and administratively distinct from their major.

Lower Division Language (20 units): Italian Studies 1, 2, 3, and 4, Elementary/Intermediate/Advanced Italian, or their equivalent in linguistic proficiency.

Upper-Division (20 units):

- **Language:** Italian Studies 101A or 101B (4 units)
- **Intro. to culture or literature:** Italian Studies 103 or 104 (4 units)
- **Electives:** 3 courses in Italian literature, cultural studies, film (12 units)

At least 12 units must be taken in residence. Up to 4 units of coursework with primary readings and discussion in English may be counted toward the minor unit requirement taken either in the Italian Studies department or with courses with Italian cultural content in other departments (e.g., History, History of Art, Music, Comparative Literature) with advance permission of the undergraduate faculty adviser.

Education Abroad units: No more than two courses (8 units) earned through Education Abroad Programs may count toward upper division requirements. All courses for the minor must be taken on a letter-graded basis. A GPA of 2.0 is required in upper division courses work.

Study in Italy

Berkeley offers advanced students the opportunity of studying Italian in Bologna, Florence, Rome, or Milan. The programs feature courses in several aspects of Italian language, culture, and history. The department recognizes many of these courses as satisfying requirements in the Italian Studies curriculum. Students intending to use Study Abroad courses in this way should consult the undergraduate faculty adviser before departure. Details of the programs are available from Berkeley Programs for Study Abroad, 160 Stephens Hall, (510) 642-1356 or on the website (<http://studyabroad.berkeley.edu>). (<http://studyabroad.berkeley.edu>)

Graduate Program

The Department of Italian Studies offers an integrated MA/PhD program, in which the MA constitutes the first phase in a trajectory leading to the PhD. Applications are not accepted for the MA degree alone. Students holding a master's degree or the equivalent in Italian Studies and related fields from other institutions may be admitted directly to the second phase of the program, as described below.

First Phase: Master of Arts in Italian Studies

Requirements

Completion of between 24 and 32 units of coursework, at least half of which must be in graduate seminars. The courses must include Italian Studies 205, 290A, and 290B. One 4-unit seminar course in each of at least three of four historical periods of Italian literature and culture: 13th-14th centuries; 15th-16th centuries; 17th-18th centuries; 19th-21st centuries. (This requirement is subject to waiver based on prior experience in equivalent courses). The exact number of units required for each student will be determined by the graduate adviser in consultation with the Graduate Committee at the time of enrollment, and will be based on a careful evaluation of the student's prior training in the field of Italian Studies. Students are required to demonstrate advanced reading skills in one language other than Italian and English which has a scholarly relevance to the field.

In the second year of this phase (end of semester 3, beginning of semester 4), students take a comprehensive written examination based on a reading list agreed upon by the student and the department. Upon Conferral of the MA degree is based on the written examination, achievement in coursework, and scholarship (attested by seminar papers) and, if applicable, achievement in teaching. Following successful completion of the MA phase of the program students prepare a statement outlining plans for work in the second, doctoral phase of the program and thereby formally requesting permission to proceed. More detailed information is available from the department website.

Second Phase: Doctor of Philosophy in Italian Studies

Requirements

Two to three years of coursework including Italian Studies 282, the exact number of units depending on the extent of the student's preparation. During this phase, students develop special expertise in a primary field in Italian studies, and a secondary field of Italian studies, prepare for an examination in their areas of specialization, and develop a dissertation topic. A provisional prospectus is produced in Italian Studies 282 and submitted for approval. The prospectus tutorial, presentation and approval usually takes place the semester preceding the one in which the QE is taken. The qualifying examination includes both written and oral components based on detailed proposals submitted with bibliography for a primary field and two special topics including the prospectus material which have been approved by the Graduate Adviser. Students must also demonstrate advanced reading ability in at least two languages other than Italian and English. The degree is conferred upon approval of a completed doctoral dissertation. Detailed information is available from the department.

PhD in Romance Languages and Literatures (Emphasis Italian)

PhD in Romance Languages and Literatures with emphasis in Italian is also offered. Students admitted for this degree have a choice of two plans of study.

- In the **Literature track**, students will gain a detailed knowledge of Italian literature. They will also develop a familiarity with two other Romance literatures sufficient to allow them to do the focused comparative work necessary for the preparation of the Qualifying Examination. Moreover, students will develop both historical and practical expertise in Latin and in the three Romance languages.
- In the **Linguistics track**, students will gain in-depth knowledge of the structure and history (internal and external) of Italian. They will also

develop expertise in the linguistics of two other Romance languages and specialize in the area of general or applied linguistics. This, together with some basic training in Latin, will prepare them for the comparative Romance linguistic work that is required for the Qualifying Examination.

For further information on this program, please see the Romance Languages and Literatures (p. 191) page in this bulletin.

Japanese

Please see the East Asian Languages and Cultures Department (p. 86) for program and degree requirements.

Jewish Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Program Office: 4401 Dwinelle Hall, (510) 664-4138

Chair: Jill Stoner, MArch (Department of Architecture)

Program Website: Jewish Studies (<http://jewishstudies.berkeley.edu>)

Undergraduate Program (Minor)

The Undergraduate Minor in Jewish Studies was founded in 2005. The program involves faculty from a large number of disciplines including Arts and Humanities, Social Sciences, and Law, and students may choose from a range of exciting offerings from across the breadth of Jewish Studies. After completing an introductory survey course, participants in the minor may take classes and seminars offered within the Jewish Studies program itself, including language courses in the Near Eastern Studies (Hebrew) and German (Yiddish) Departments, hands on experiential learning through the Magnes Collection for Jewish Art and Life, and relevant courses offered in departments including History, Comparative Literature, Near Eastern Studies, Music, Sociology, and Political Science. The program allows students to work closely with members of the faculty, to be mentored by graduate students, and to participate in the intellectual life of the broader Jewish Studies community on campus.

Graduate Programs

Doctor of Philosophy

The PhD in Jewish Studies at UC Berkeley is a joint-degree program with the Graduate Theological Union (<http://www.gtu.edu>). Though the University has decided not to admit additional students to the program, and to discontinue a formal joint-degree structure, current students in the Joint Degree Program will continue to work with faculty from both institutions.

Designated Emphasis (DE)

This academic year marks Berkeley's inauguration of Designated Emphasis in Jewish Studies. The DE provides curricular and research resources for students who want to concentrate on Jewish Studies within their respective disciplines and have their work formally recognized in their degree designation. Designed to bring together faculty and students

from different departments, the DE is administered by the Graduate Group in Jewish Studies (<http://jewishstudies.berkeley.edu>) and provides a unique context for rigorous cross-disciplinary research. Students applying to the DE must be prepared to integrate high-level research in Jewish Studies into their coursework, qualifying exam, and dissertation.

Requirements for Admission

Students will be required to fill out a form requesting admission, listing their prior preparation in the field, and their projected pathway through the program. In addition, they should submit a brief essay stating interests and reasons for applying, a CV, a writing sample, and a letter of recommendation from a faculty member in the student's home department indicating why and how the student would benefit from the DE in Jewish Studies.

According to the Berkeley requirements for a Designated Emphasis, students must be admitted to the DE prior to taking their Qualifying Exams. But because in this instance the DE is replacing the Joint Degree Program in Jewish Studies, exceptions will be made for exceptionally qualified and motivated students who have already taken qualifying exams, who are working within established departments, and whose work has an emphasis in an area of Jewish Studies. These "grandfathered" exceptions will be made on a case-by-case basis, on the recommendation of the faculty graduate group. In every case, admission to the DE will be determined on the basis of how coherently and logically the student can articulate the value of the DE for her/his larger course of study and career goals, as well as on the quality of the written work.

Normative Time Considerations

Given the flexibility of the program, the completion of the DE will have no impact on Normative Time to degree.

Requirements for Designation

Students admitted to the Designated Emphasis in Jewish Studies must complete the following requirements before applying for their Qualifying Examination:

1. Students will be required to complete the course Jewish Studies DE 290 Individual Studies in the field of Jewish Studies for Graduate Students, which will serve as the integrative course for the program regarding methodology and research skills. This course can be offered by any faculty member of the Graduate Group in the DE in Jewish Studies, and will likely rotate among core faculty. The course topics will thus vary in accordance with the specific expertise of individual faculty member(s). The number of units for this course ranges from 3-8 and is decided on the basis of a mutual agreement between the student and faculty instructor(s) in accordance with the amount of working hours the student intends to dedicate to this course. The course will be a combination of standard seminar format with shared readings and discussion, and individualized research and writing. The goal of this course is thus two-fold: to provide cohort cohesion and intellectual exchange across disciplines, and to provide the necessary intellectual background for top quality scholarship in the field of Jewish Studies. The course will have a strong practical component, including engagement with bibliographical resources and scholarly practices essential to doing work in the field of Jewish Studies. The student will need to write a 5000-word article to complete the course, using a bibliography that includes Jewish Studies materials. The content of the article will be determined on an individual basis with attention to the students' research interests. This course will be offered once each year. The faculty members offering Jewish Studies DE 290 are core members

of the Graduate Group for the Designated Emphasis in Jewish Studies.

2. Students in the DE will also complete three additional course electives related to Jewish Studies and approved by the Graduate Group's Curriculum Committee. These courses will support the interdisciplinary nature of the program with attention to the individual students' research interests. At least one of these courses has to be a graduate seminar. One of the three course electives can be fulfilled by repeating Jewish Studies DE 290 under the condition that the topic of this course changes. Students will be provided a list of potential electives offered by the different departments sponsoring the DE. A student may petition to the Advising Committee to approve a course not on the established list.

Examination

A member of the Graduate Group in Jewish Studies must be a formal member of the PhD Qualifying Examination committee. Under most circumstances, the Graduate Group member in the student's home department will serve in this function. A member of the Graduate Group may also serve as the outside member of the Qualifying Exam committee if not a faculty member of the student's major. A Jewish Studies topic must be included as a subject on the Qualifying Examination. Satisfactory performance on the Qualifying Examination for the PhD will be judged according to the established rules in the student's major program.

Dissertation

A member of the Graduate Group in Jewish Studies must be a formal member of the dissertation committee. The dissertation must relate to Jewish Studies (History, Literature, Culture, Arts).

Joint Medical Program, UCB-UCSF

Please see the Health and Medical Sciences Department (p. 119) for program and degree requirements.

Journalism

Graduate School of Journalism (<http://journalism.berkeley.edu>)

Office: 121 North Gate Hall, (510) 642-3383

Dean: Edward Wasserman, PhD

School Website: Journalism (<http://journalism.berkeley.edu>)

Overview

The goal of the Graduate School of Journalism is to produce professional journalists who move on to positions of leadership and influence in American journalism. The Master of Journalism (MJ) program provides intensive training in journalism skills and a knowledge of the traditions and principles of the field. A professional project is required to complete the two-year program. The program is rooted in the idea that the best possible preparation for careers in journalism is a sound liberal arts education followed by training in journalism at the graduate level. Concurrent degree programs with Law, Asian Studies, International and Area Studies, Latin American Studies, and Public Health are available.

The school offers courses in print, broadcasting, documentary film, radio, television, multimedia, and photojournalism. All students must take a

focused and demanding core course which stresses reporting and writing skills. This is because members of the faculty believe that the best way to train students for careers in journalism is to place them under the supervision and guidance of seasoned journalists in small classes, give them instruction in the skills and attitudes of the craft, and introduce them to intensive practice in reporting, writing, and editing. Professors give exhaustive critiques of students' work. Students are also required to take Journalism Law and Ethics and to complete a summer internship at a media outlet.

Beyond the core course there are courses in specific areas, such as political, business, environmental, community, science, international, and cultural reporting. There are also courses that focus on different techniques, such as investigative reporting and magazine reporting. The curriculum also includes courses in copy-editing and photography and a sequence of courses in television and radio reporting.

Another group of courses is intended to increase understanding and practice of multimedia reporting. A host of webskills and software classes are offered to give student expert level training with these tools.

Candidates for the MJ degree are expected to complete their work for the degree in four semesters. They must complete 36 units in approved upper division and graduate courses, of which at least 24 must be in graduate courses in journalism, and must present an acceptable master's project. Students are encouraged to take courses in disciplines other than journalism.

Applicants for graduate study should hold a bachelor's degree comparable to that given by the University of California. Requirements and procedures are outlined in the brochure Graduate Application for Admission and Fellowships, available at the Office of the Dean of the Graduate Division, and in the *Announcement of the Graduate School of Journalism*. Complete admissions information is available on the Journalism website (<http://journalism.berkeley.edu>).

The Graduate School of Journalism also offers courses for undergraduates designed to give them insight into journalism.

For more information and application requirements, go to the Graduate School of Journalism website (<http://journalism.berkeley.edu>). (<http://journalism.berkeley.edu/admissions/request>)

Degree Requirements for the Master of Journalism Degree

The Master of Journalism (MJ) degree at Berkeley requires the completion of at least 36 semester units of coursework and the submission of a satisfactory Master's project. A minimum of 24 units must be earned from coursework in the Graduate School of Journalism. All students are expected to graduate in four consecutive semesters.

Total units needed to graduate: 36

Required Courses

6 units Journalism 200 Reporting the News (first semester)
 1 unit Journalism 209 Multimedia Bootcamp (first semester)
 3 units Journalism 211 Reporting the News Lab (first semester)
 3 units Journalism 215 Introduction to Multimedia (first semester)
 1 unit Journalism 219 Numeracy (first semester)
 2 units Journalism 298 Public Records (first semester)
 4 units Journalism 282 Introduction to Television (first semester) *
 3 units Journalism 217 Introduction to Visual Journalism (first semester)*
 5 units Journalism 283 Reporting for Television (second semester)**
 3 units Journalism 223 Advanced Visual Journalism (second semester)**

3 units Journalism 255 Law and Ethics
 2 units Journalism 297 Reporting Internship (300 supervised hours)
 2 units Journalism 294 Master's Project Seminar (1 unit in third semester; 1 unit in fourth semester)

* Student must take either J282 Introduction to Television or J217 Introduction to Visual Journalism in their first semester.

** Student must take either J283 Introduction to Television or J223 Advanced Visual Journalism in their second semester.

Additional Requirements

- One advanced reporting course is required for each semester after the first semester.
- Two units from the J297 Reporting Internship can count toward the 36 units requirement. Therefore, 34 of 36 units required for the MJ degree must be from coursework.
- Submission of an approved Master's project with all valid signatures is required by the announced deadline.
- Twelve units per semester are required for all Berkeley graduate students. Maximum units per semester are 16.
- All courses must be taken at Berkeley; credit from other institutions is not transferable.
- Students may take up to four units of J601 Master's Study each semester without approval. Approval is required for more than four units of J601 Master's Study in a semester. J601 Master's Study units do not apply towards the 36 total units requirement.
- Submission of all required Graduate Division paperwork is required by the announced deadline.
- All required classes must be taken for a letter grade except for the J297 Reporting Internship and J219 Numeracy. Only one third of total UC master's credits can be S grades.
- Up to 12 of the required 36 units for the MJ degree can be from other departments at Berkeley. Graduate level courses (numbered 200-299) and upper division undergraduate courses (numbered 100-199) are acceptable.
- Concurrent degree students may have additional or modified requirements and should confirm requirements with a student affairs officer.

For Incoming Year Fall 2013

Landscape Architecture and Environmental Planning

College of Environmental Design (<http://ced.berkeley.edu>)

Department Office: 202 Wurster Hall, (510) 642-4022

Chair: Louise Mzingo, M.L.A

Departmental Web Site: Landscape Architecture and Environmental Planning (<http://laep.ced.berkeley.edu>)

The Profession

The profession of landscape architecture plays an important role in solving environmental problems through design and planning. Professional practice includes design of public spaces for recreation areas, schools, housing, neighborhoods, streets, and cities, planning for conservation of open space and natural amenities, land management and development, and assessment of the impact of projects and proposals on environmental quality and design of such projects to be environmentally compatible.

Landscape design typically involves project programming, site planning of buildings and building complexes, and analysis, planning, and detailed design of public and private exterior spaces and landscapes. It requires an understanding of visual and social factors, plant materials, construction technology, cost, and ecology.

Environmental planning is concerned with the larger context of natural and urban environments including the study of ecology, conservation planning, environmental law, resource development, computer applications, recreation planning, and urban open space and transportation systems. The intent of all the emphases is the creation of delightful landscapes that are ecologically sound and socially informed.

Undergraduate Program

Berkeley's undergraduate curriculum in landscape architecture centers upon creative and ecologically tuned design, and introduces students to the breadth of knowledge common to the profession. This program leads to the Bachelor of Arts (BA) degree in landscape architecture and provides the necessary education for students interested in entry-level professional practice. At the heart of the undergraduate curriculum are three core studios: LD ARCH 101, LD ARCH 102, and LD ARCH 103. The core studios ensure that undergraduate students benefit from the department's full range of interests and expertise.

Accreditation

The BA degree is certified by the State of California and counts as part of the education/experience requirement of the Uniform National Examination (U.N.E.) as well as for the Landscape Architects Registration Examination (L.A.R.E.) for licensure. Please visit the Landscape Architects Technical Committee (<http://www.latc.ca.gov>) and the Council of Landscape Architectural Registration Boards (<https://www.clarb.org>) for more information about licensure in California.

For more complete information, see the department's website (<http://ced.berkeley.edu/academics/landscape-architecture-environmental-planning/programs/bachelor-of-arts-in-landscape-architecture>).

Graduate Programs

The Master of Landscape Architecture Degree

The Master of Landscape Architecture degree is a professional degree accredited by the American Society of Landscape Architects. The program offers advanced work in landscape architecture from the scale of detailed form to that of the regional landscape. A core of courses in the department is required of all students, emphasizing the relationship between the design and the environmental planning aspects of the field. This core group forms the foundation for extended coursework in landscape design, urban and community design, and environmental planning.

Current faculty research and professional involvement include growth impact and land use planning, human factors and design, environmental simulation, landscape visual and scenic assessment, ecological art, ecology and plant succession, hydrology and planning, cultural geography, the educative city, energy conservation in landscape and community design, urban forestry, and community participation in design and planning.

Concurrent Program in Urban Design or Environmental Planning

The Departments of Landscape Architecture and Environmental Planning and City and Regional Planning jointly offer a program of studies in urban design or in environmental planning, leading to both the Master of Landscape Architecture and Master of City Planning degrees. Applicants to the concurrent degree program typically have an undergraduate degree in landscape architecture or architecture. Applicants must be admitted separately by both the Department of Landscape Architecture and Environmental Planning and the Department of City and Regional Planning. More information may be obtained from the Graduate Office in 202 Wurster Hall, or from our website (<http://laep.ced.berkeley.edu>).

Concurrent Degree Program in Architecture and Landscape Architecture

The Departments of Architecture and Landscape Architecture and Environmental Planning have developed a concurrent degree program. This program will lead to two professional degrees: Master of Architecture and Master of Landscape Architecture. This program brings together two closely connected branches of environmental design—the design of sites and the design of buildings. This program is for exceptionally qualified students who have an undergraduate degree in architecture or landscape architecture and who satisfy the admission requirements of the one- or two-year MArch program and/or the two-year MLA program. Applicants to either of the above concurrent degree programs should apply to the Department of Landscape Architecture and Environmental Planning by December 15. Acceptance into the concurrent degree program is limited to outstanding applicants. More information may be obtained from the Graduate Office in 202 Wurster Hall or from our website (<http://laep.ced.berkeley.edu>).

Master of Urban Design

The Master of Urban Design is for exceptionally well-qualified students who have a bachelor's degree in architecture or landscape architecture and a minimum of two years of professional experience *after* completion

of the undergraduate degree. See the Urban Design (p. 212) section of this bulletin for further information.

The PhD Degree in Environmental Planning

The Doctor of Philosophy program in environmental planning is offered for students who wish to pursue advanced scholarly and research work. The program emphasizes the development of theories and methods that underlie the fields of environmental planning or urban design, and the processes of planning and design as they relate to the solution of problems in the natural and urban environment. The PhD degree in environmental planning is appropriate for those seeking careers in research and teaching in environmental planning or urban design or in specialized roles in government or professional consultation.

There are no courses specifically required for the PhD degree. In consultation with their faculty advisers, students formulate a coursework plan best suited to their individual specializations within the field of environmental planning.

PhD requirements are as follows:

1. 32 units of upper division and graduate coursework
2. Two-year academic residency
3. Reading knowledge of a departmentally approved foreign language
4. Successful completion of a qualifying examination
5. A dissertation

Progress toward the degree is evaluated annually by the PhD Committee.

Admission is granted to a small number of individuals each year. Most applicants will have completed a master's degree before entering. Students with only a bachelor's degree should apply to the MLA program first or otherwise complete an appropriate master's degree before applying.

For information about these programs, please consult the Graduate Office, Department of Landscape Architecture and Environmental Planning, 202 Wurster Hall, or the department's website (<http://ced.berkeley.edu/academics/landscape-architecture-environmental-planning/programs>).

Language Proficiency Program

Graduate Division (<http://www.grad.berkeley.edu>)

Program Office: GSI Teaching and Resource Center, 301 Sproul Hall, (510) 642-4456

Program Website: GSI Teaching and Resource Center (<http://gsi.berkeley.edu/lpp/#main>)

Overview

The Graduate Student Instructor (GSI) Center's Language Proficiency Program helps international graduate students establish their linguistic readiness to work as GSIs and assists GSIs in developing their teaching skills once they have begun teaching. We offer language proficiency screening, testing, and courses, and individual consultations.

For further information on courses and other services offered by the Language Proficiency Program, please see the program's website (<http://gsi.berkeley.edu/lpp/#main>), or click on the courses tab above.

Please note that all of the courses listed on the course tab are for graduate students only; graduate standing is required before enrolling in them.

Latin

Please see the Classics Department (p. 72) for program and degree requirements.

Latin American Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Group Major Office: International and Area Studies, 101 Stephens Hall, (510) 642-4466

Program Chair: Estelle Tarica, PhD (Department of Spanish and Portuguese)
Program Website: Latin American Studies (<http://iastp.berkeley.edu>)

Overview

The major in Latin American Studies is designed to provide a balanced curriculum in the history, culture, and society of Latin America for students wishing a broader perspective than is usually available through a department major. From the rich variety of offerings within and across departments, there is a wide range of possibilities to suit the interests of students. The program may be of particular interest to students who:

- Desire a balanced education that focuses on the Latin American cultural regions
- Plan to enter business, government, or international agency service
- Wish to teach social science or language
- Are preparing for graduate and professional schools

Spanish and Portuguese are required for the major. Students must gain an intermediate level of proficiency in one language and an elementary knowledge of the other. In addition, students pursue a multidisciplinary course of study that includes the history and literature of Latin America.

Student Learning Goals

Undergraduates should have the following knowledge and skills when they graduate with a major in Latin American Studies from Berkeley:

- Communicate effectively in a primary foreign language, either Spanish or Portuguese, in written and spoken form
- Communicate at a basic level in a secondary foreign language, either Spanish or Portuguese
- Formulate a well-organized, well-supported argument
- Demonstrate understanding of general research methods
- Analyze and interpret literary texts
- Identify major historical figures, events, and trends in Latin America
- Critically evaluate Latin America's role and position in a global context

- Demonstrate awareness of, and basic knowledge of, the multiplicity of countries and cultures that make up the region
- Apply a minimum of three distinct disciplinary approaches to the study of Latin America
- Demonstrate specialized knowledge about one or more particular sub-areas of Latin American studies, whether regional (e.g. the Caribbean; Central America) or topical (agriculture; gender issues; immigration)
- Understand and critically evaluate the implications of different perspectives on Latin America

Learning Goals Appendix (<http://iastp.berkeley.edu/sites/default/files/LASLearningGoalsAppendix.pdf>)

Major Requirements

Lower Division

Two courses

- LAS 10 (Offered in Fall semester only. You must earn a C or better to declare. This course can only be repeated once.)
- History 8A or 8B

Foreign Language

LAS majors must demonstrate an intermediate level of proficiency in a primary language (either Spanish or Portuguese) and an elementary level of proficiency in the secondary language. Intermediate proficiency is equivalent to four college-level semesters of instruction, and elementary proficiency is equivalent to two college-level semesters of instruction. Equivalency can be achieved through coursework, AP credit, examination and/or study abroad. For more information on how to complete the language requirement, see the LAS Handbook.

Upper Division

Nine courses totaling no less than 30 units:

- **Latin American Literature and Culture:** (2 courses) Students must complete one of two course sequences, depending on the choice of primary language. All courses must be taught in Spanish or Portuguese. See the LAS Handbook for approved courses.
- **Latin American History:** (2 courses) See the LAS Handbook for the list of approved courses.
- **Methodology:** (1 course) See Appendix A in the LAS Handbook for the approved list of courses.
- **Upper Division Electives:** (4 courses) Electives are chosen from at least two disciplines other than literature and history. At least 50% of the course content must be devoted to Latin America. Students may focus all four courses around a central theme (e.g., gender and society, religion and society, popular culture, or development) or a geographical region (e.g., Mexico, Central America, or the Caribbean), although this is not required. See Appendix B in the LAS Handbook for course lists.

How To Declare

Applications are accepted during the fall and spring semesters from the third week of instruction until the last day of instruction (not the last day of finals). Applications are accepted during the summer from the last week in May until the beginning of the fall semester (not the beginning of classes).

To declare, you must:

1. Have completed LAS 10 (You must earn a C or better to declare. This course can only be repeated once.)

2. Have a major and cumulative GPA of 2.0 or higher
3. Not be in your final semester of undergraduate work

Additionally, students are encouraged—but not required—to complete two semesters of Spanish or Portuguese or the equivalent before applying to the major.

To get declared, students must both:

1. Attend a Major Declaration Workshop (check the Teaching Program Calendar for dates); and
2. Meet with an advisor to submit the LAS Application materials.

Bring a completed LAS Application including all materials and transcripts listed below to the Workshop. Application materials may be submitted after attending the Major Declaration Workshop. However, students will not be officially declared until they have both attended a Workshop and submitted all declaration papers.

Honors Program

To be eligible for honors, students must have senior standing and a grade point average (GPA) of 3.6 in the major and 3.5 in all work completed at UC Berkeley. Doing honors includes a year-long course sequence (IAS H102 in the fall and LAS H195 in the spring) in which students learn how to formulate a hypothesis, conduct supporting research, and complete a thesis paper of approximately 75 pages or longer.

After Graduation

The LAS major is designed to provide a broad-based liberal arts background as well as the intellectual skills appropriate for careers in either the public or private sector. Additionally, the major offers an excellent background for students planning postgraduate careers in social science disciplines and professional schools.

This description is for introductory purposes only. Students interested in completing a major or minor in LAS should consult the LAS Handbook.

Latin American Studies Graduate Program

Brief Overview

The MA program is a two-year program that allows students to pursue a diverse curriculum in Latin American Studies spanning a wide range of departments and professional schools, including the schools of Natural Resources, Public Health, Public Policy, Social Welfare, Journalism, Law, Education, and Environmental Design.

Students begin by taking courses that offer a broad overview of the field of Latin American Studies and introduce them to the Latin Americanist research at Berkeley. Students then work closely with individual faculty to define their particular areas of interest and research. Further coursework, research and field work culminate in either a thesis project or comprehensive oral exam.

The MA program provides an opportunity for collective learning and collaboration as students develop research skills and specialized knowledge in the field. Students are encouraged to draw on the considerable resources of the Center for Latin American Studies.

Overview of Requirements

Required Core Courses: 2 courses

1. LAS 200, a 1-unit seminar in which students meet with over a dozen of the Latin American faculty and learn of their research interests and current projects.

2. LAS 250, a 4-unit seminar for new graduate students providing a comprehensive overview of the field of Latin American Studies.

Foreign Language Requirement

- **Primary language (either Spanish or Portuguese):** A high level of proficiency indicated by a strong ability to do research in the language and the ability to speak and write in the language with substantial fluency.
- **Secondary language (either Portuguese or Spanish; other languages can be considered on an exceptional basis):** Completion of advanced level language instruction.

Proficiency in one foreign language (either Spanish or Portuguese) is required for admission; proficiency in two languages is required for graduation.

Methods Requirement

One course appropriate to student's field of study, identified in consultation with faculty adviser.

Electives Requirement

4-6 courses: Courses must be concentrated primarily in two or three disciplines, though a broader range of courses may be taken if appropriate to the student's academic objectives. Courses focus explicitly on Latin America or have a comparative, theoretical, or methodological focus that contributes to the student's work on Latin America.

Capstone Requirement

Thesis or Oral Exam: Either a written thesis or a comprehensive oral exam based on the focus of study is required to complete the LAS MA degree.

- Thesis: an in-depth study of an issue or subject related to Latin America, chosen in consultation with a faculty adviser and two additional faculty members. MA theses generally range in length from 75-150 pages.
- Comprehensive Oral Exam: a 2-3 hour comprehensive exam conducted by three faculty members from at least two different departments. It covers the disciplinary areas in which the student has completed coursework.

How to Apply

The application to the program, along with its instructions, is on the website of the UC Berkeley Graduate Division.

- Application (<https://gradadmit.berkeley.edu/apply/LatAm-MA/start.html>)
- Instructions & Info (<http://grad.berkeley.edu/admissions/index.shtml>)

For questions, please contact our Graduate Student Affairs Officer, Susan Joerling, at joerling@berkeley.edu.

After Graduation

LAS master's graduates move into various careers in non-profits, government, and international firms. Additionally, this program offers excellent preparation for students planning to pursue PhDs and academic careers in social science disciplines and professional schools.

Law

School of Law (<http://www.law.berkeley.edu>)
Office of JD Admissions: 2850 Telegraph Avenue, (510) 642-2274

Dean (on leave): Christopher Edley Jr., JD, MPP
Acting Dean: Gillian Lester, LLB, JSD
School Website: School of Law (<http://www.law.berkeley.edu>)

Programs

The UC Berkeley School of Law offers a broad, three-year curriculum leading to the Juris Doctor (JD) degree. Berkeley Law educates men and women not only for the practice of law, but also for all the varied roles lawyers perform in modern society. The law school provides an intellectually challenging course of study that imparts the theoretical and practical skills necessary for effective, creative, and responsible legal counseling and advocacy. To this end, Berkeley Law's curriculum is continually evolving. It currently includes specialized curricular programs in Business, Law and Economics; Environmental Law; International and Comparative Legal Studies; Law and Technology; and Social Justice and Public Interest.

The school is a member of the Association of American Law Schools and is accredited by the American Bar Association. Its graduates are qualified to become applicants for admission to practice in any state of the United States.

Berkeley Law does not require or even recommend a specific pre-law major. To prepare for law school, students should take courses that help them develop written and oral communication skills; increase analytical and problem-solving skills; obtain broad exposure to the humanities and social sciences in order to understand the social context within which legal problems arise; and acquire a general understanding of economics, because many legal problems relate to the economic functioning of society.

In selecting specific courses, consultation with an undergraduate adviser may be desirable. Berkeley Law seeks a student body with a broad set of interests, backgrounds, life experiences, and perspectives.

The school also offers programs, mainly for foreign-educated attorneys, that lead to the degree of Master of Laws (LLM) or the degree of Doctor of the Science of Law (JSD).

For further information, contact the Berkeley Law JD Admissions Office at (510) 642-2274 or visit the website. (<http://www.law.berkeley.edu/admissions.htm>)

Jurisprudence and Social Policy Program

Berkeley Law is unique among major US law schools in housing its own interdisciplinary graduate program in the social, philosophical, and humanistic study of law, leading to MA and PhD degrees in jurisprudence and social policy (JSP). The JSP Program promotes the study of law and legal institutions through the perspectives of several disciplines, including history, economics, philosophy, sociology, and political science. The first law and society program of its kind in North America, the JSP Program remains the clear leader of a vibrant and growing body of such

programs, because of its deep curricular resources and its scholarly accomplishment.

Members of the Berkeley Law faculty with primary responsibility for the JSP Program are trained in a variety of academic disciplines, and also are affiliated with other Berkeley departments and research centers.

Additional information is available on the JSP website. (<http://www.law.berkeley.edu/jsp.htm>) Applications are available online or by email at jsp@berkeley.edu.

Legal Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 2240 Piedmont Avenue, (510) 642-4038

Department Chair: Calvin Morrill, PhD

Department Website: Legal Studies (<http://legalstudies.berkeley.edu>)

Overview

The Legal Studies major is under the academic supervision of the School of Law faculty.

Major Requirements

Legal Studies is an interdisciplinary, liberal arts major that engages the meanings, values, practices, and institutions of law and legality. The Legal Studies curriculum examines how law shapes and is shaped by political, economic, and cultural forces. The major is designed to stimulate critical understanding of and inquiry about the theoretical frameworks, historical dynamics, and cultural embeddedness of law. The Legal Studies faculty and students grapple with important questions of social policy within the framework of significant concerns in jurisprudence and theories of justice.

These concerns include individual liberty, privacy, and autonomy; political and social equality; the just distribution of resources and opportunities within society; the relationship between citizens and the state; democratic participation and representation; the moral commitments of the community; and the preservation of human dignity. The major's course offerings examine law and legality from both humanist and empirical perspectives. Courses are organized into interdisciplinary topical areas or "neighborhoods" that transcend disciplinary boundaries in the interest of collaborative inquiry.

Lower Division Requirements

One term of coursework is required in each of the following four areas: Statistics, Philosophy, Social/Behavioral Sciences, and History. Students may declare the major after completing coursework from two of the four areas. These courses must be taken for a letter grade; the cumulative grade point average (GPA) must be 2.0 or better. A list of courses offered at UC Berkeley that satisfy these prerequisites is listed on the Legal Studies website. (<http://legalstudies.berkeley.edu>)

Upper Division Requirements

A minimum of 32 upper division units is required for completion of the major. All of these units must be taken for a letter grade and the cumulative GPA must be 2.0 or better.

Core Requirements

Take four courses from the list below, including at least one course designated as Humanities (H) and at least one course designated as Social Sciences (SS). Students are strongly encouraged to take LS 100 early in pursuing the major as it provides a foundation for the Legal Studies curriculum. The four courses taken for core requirements cannot also be counted toward the distribution requirements.

- LS 100: Foundations of Legal Studies (H or SS)
- LS 103: Theories of Law & Society (H or SS)
- LS 107: Theories of Justice (H)
- LS 138: The Supreme Court & Public Policy (SS)
- LS 145: Law & Economics I (SS)
- LS 160: Punishment, Culture & Society (H or SS)
- LS 177: American Legal & Constitutional History (H)
- LS 182: Law, Politics & Society (SS)
- LS 184: Sociology of Law (SS)

Distribution Requirements

Take two courses* in one of the following areas and one course each in two additional areas for a total of four courses.

1. Area I Crime, Law & Social Control
2. Area II Law & Culture
3. Area III Law & Markets
4. Area IV Law, Rights & Social Change
5. Area V Law & Sovereignty

* LS H195B Honors Thesis or LS 199 Independent Study (for four units) may substitute for one of the two courses.

Law-Related Courses

You may use up to two law-related courses from outside the Legal Studies Program to count towards the Distribution Requirements, for a maximum of eight units. This is an option, not a requirement. Outside courses should normally be drawn from the pre-approved list of law-related Berkeley courses, but may be approved from other four-year institutions, or from study abroad programs. If a law-related course you are considering is not on the pre-approved list, you must submit a syllabus and description to the Legal Studies Academic Advisor for approval.

Capstone Experience

Legal Studies students are strongly encouraged to enroll in one Legal Studies seminar course (LS 190), preferably in their senior year, to complete their remaining units. Alternatively, students who meet eligibility requirements are strongly encouraged to enroll in LS H195A & B, the Honors Program, for their Capstone Experience. Students who have a faculty mentor and a desire to do a research project, but do not meet the eligibility requirements for Honors, may enroll in 4 units of LS 199 for their Capstone Experience provided that they meet the eligibility requirements for Independent Study. Details for Independent Study can be found on the Legal Studies website. (<http://legalstudies.berkeley.edu>)

Honors Program

With consent of the major adviser, a student majoring in legal studies with an overall UCB GPA of 3.5 and a GPA of 3.5 in legal studies courses by the end of the spring semester junior year, may be admitted to the Honors Program. The honors student is required to first enroll in LS H195A Honors Seminar during the fall semester, then in LS H195B the

following spring to prepare an honors thesis. Details can be found on the Legal Studies website. (<http://legalstudies.berkeley.edu>)

Please note that only some of the courses listed in the Berkeley Bulletin are offered in any given semester. Consult the online Schedule of Classes (<http://schedule.berkeley.edu>) for up-to-date information on course offerings.

Lesbian, Gay, Bisexual, and Transgender Studies

Please see the Gender and Women's Studies Department (p. 114) for program and degree requirements.

Letters and Science

College of Letters and Science (<http://ls.berkeley.edu>)

Dean's Office: Durant Hall
Undergraduate Advising: 206 Evans Hall,
(510) 642-1483

Executive Dean and Dean, Mathematical and Physical Sciences Division: Mark A. Richards, PhD

Dean, Arts and Humanities Division: Anthony J. Cascardi, PhD

Dean, Biological Sciences Division: G. Steven Martin, PhD

Dean, Social Sciences Division: Carla Hesse, PhD

Dean, Undergraduate Division: Tyler Stovall, PhD

College Website: College of Letters and Science
(<http://ls.berkeley.edu>)

Overview

The College of Letters and Science offers undergraduate students a variety of programs leading to the Bachelor of Arts degree in four academic years of full-time study. The first two years are a time of exploration and experimentation, leading to declaration of a major. In the last two years students acquire and refine special knowledge as they focus on their major programs. The college's departments are devoted to instruction and research in a variety of academic subjects. Each department represents a style of study and communication and refined development of a set of structured ideas. The subjects of the departments overlap and complement one another.

Requirements for Admission in Advanced Standing

Students applying for admission will not be considered if they have completed more than 80 semester (120 quarter) units. The dean of the college makes exceptions to this policy only in unusual circumstances. Applicants with advanced-placement credit may, however, exceed the 80-semester-unit limitation by the amount of their advanced-placement credit and be admissible if they meet all other admission criteria.

Transfer students with 60 or more semester units are expected to have satisfied, before admission to the college, the reading and composition breadth requirement, the foreign language breadth requirement, and

the quantitative reasoning breadth requirement of the college. Students who apply as intercampus transfers and who have completed all the Letters and Science breadth requirements, or the general education requirements, or the equivalent of either, at the University of California campus from which they transfer may, upon petition, be credited with having completed the breadth requirements of the college. Transfer students who apply from community colleges in California have the option of fulfilling lower division breadth requirements by completing the Intersegmental General Education Transfer Curriculum (IGETC) (<http://admission.universityofcalifornia.edu/transfer/requirements/additional-requirements/igetc>). This program specifies a series of subject areas and types of courses that, if completed before transfer, will satisfy the lower division breadth and general education requirements at any general campus of the University of California.

Note: In recent years, certain major programs have turned away qualified applicants because of space limitations. Transfer applicants should be aware that admission to those majors in the college is competitive.

Biological Sciences Majors

Students planning to declare majors in a biological science must in addition have completed the minimum subject preparation in the major with a GPA of 2.0 (C average) or higher. The subject preparation listed below is minimal; transfer students who wish to declare a major in a biological science are urged to consult directly with the department or program in which they are interested to learn of additional requirements or of any restriction placed on entry to the major. The subject preparation for majors in the biological sciences is as follows:

Students who have completed 60 to 70 semester units:

1. General chemistry with laboratory (equivalent to one year of UC Berkeley's inorganic chemistry with laboratory)
2. General biology with laboratory (equivalent to Berkeley's Biology 1A-1B)

Students who have completed 71 to 80 semester units must complete in addition to points 1 and 2 above: Introductory organic chemistry with laboratory (equivalent to Berkeley's organic chemistry with laboratory).

Requirements for the Bachelor of Arts Degree

Students must complete a minimum of 120 semester units, distributed according to regulations that appear in the College of Letters and Science's *Guide to Earning Your Degree*. A 15-unit class schedule per semester is considered to be a normal course load; a class list of fewer than 13 units requires the special permission of the dean. There are also scholarship, minimum-progress, residence, breadth, and major requirements; these are described in the announcement as well. Brief descriptions of the breadth, major, and minor requirements appear below. Major and minor programs are outlined under the department, field, or group headings in this bulletin. In addition, students must satisfy the University requirements in Subject A, American History, and American Institutions, and the Berkeley campus American Cultures requirement.

Breadth Requirements

There are four breadth requirements:

1. **Reading and Composition:** Students must normally complete the first half of the requirement (an "A" course) during the freshman year and the second half of the requirement (a "B" course) during the sophomore year. Students must complete the requirement through

coursework according to the requirements of the semester system, whether the coursework is undertaken at Berkeley or elsewhere.

2. **Quantitative Reasoning:** This requirement may be fulfilled by satisfactory performance in an examination or by successful completion of an acceptable college course. Information about acceptable examinations and acceptable courses is included in the announcement. This requirement, if satisfied by coursework, must be completed without delay.
3. **Foreign Language:** Students who have not satisfied the language requirement at the time of admission must complete it without delay. The requirement may be satisfied by (a) completion of the third year of one foreign language in high school with a minimum grade of C-, (b) by completion of the second semester of a Berkeley course, or its equivalent elsewhere, in one foreign language with a minimum grade of C-, or (c) by demonstration of equivalent knowledge through examination, including the College Entrance Examination Board Achievement Test, the CEEB Advanced Placement Examination (if taken before admission to the college), or an acceptable foreign language placement examination offered by a foreign language department at Berkeley or on another campus of the University of California.
4. **Seven-Course Breadth Requirement:** Students must take one course from each of the following categories, with no more than two courses in the same department:

- One course in Physical Science
- One course in Biological Science
- One course in Arts and Literature
- One course in Historical Studies
- One course in Philosophy and Values
- One course in International Studies or participation in the University of California Education Abroad Program or a recognized equivalent
- One course in Social and Behavioral Sciences

These courses may be taken from the College of Letters and Science and the professional schools and colleges and may be spread over the four years of college attendance. See the College of Letters and Science's *Guide to Earning Your Degree* for details and a list of the approved courses that you may take to fulfill the requirement.

Major Programs

All students must pursue and complete a major program, the object of which is to provide them with a limited experience in specialization. There are more than 60 departmental major programs ranging from the humanities (e.g., art, comparative literature, English, foreign languages, etc.) and the social sciences (e.g., anthropology, economics, geography, psychology, etc.), to the biological sciences (e.g., integrative biology, molecular and cell biology) and the physical sciences (e.g., geology, mathematics, statistics, etc.). In addition, there are group majors in American Studies, Asian Studies, Celtic Studies, Cognitive Science, Development Studies, Dutch Studies, Environmental Sciences, Ethnic Studies, Film, Latin American Studies, Legal Studies, Media Studies, Middle Eastern Studies, Peace and Conflict Studies, Political Economy, Religious Studies, and Social Welfare. There are also field majors in the Physical Sciences and Interdisciplinary Studies. Moreover, students who have completed at least 60 semester units and at least one semester of enrollment at Berkeley, and who have attained a minimum 3.0 Berkeley

and overall GPA may, with the permission of the dean and support and supervision of a college faculty member and a faculty member who acts as second reader of the individual major thesis, pursue an individual major designed to satisfy special academic goals. Thus, the options available to students outside traditional disciplines are many and varied.

For a list of all majors available in the College of Letters and Science, please see the List of Majors Page on the college's website (<http://ls-advise.berkeley.edu/major/majorlist.html>).

Minor Programs

Minor programs are intended as optional programs that will encourage coherence in the work that students undertake outside their major field(s) of study. Students may complete one or more minor programs, normally in a field both academically and administratively distinct from their major. The college has set the following minimum requirements for completion of a minor program:

1. **Course Requirements:** A minimum of five upper division courses, completed on a letter-graded basis, are required for the minor. At least three of the five upper division courses must be completed at Berkeley.
2. **GPA Requirements:** Students must maintain a minimum overall GPA of 2.0 in upper division courses required for the minor program.

Students should consult the department or group in charge of the minor for additional requirements and specific information regarding the minor program in which they are interested. Admission to the minor and certification of completion of the minor are determined by the department or group in charge of the program. When a student completes a minor program, the department or group in charge will notify the Office of the Registrar, so that the completion may be noted on the student's transcript.

Additional minor programs are offered by other schools and colleges on campus. Consult their listings in this bulletin for more information. For a list of minors available in the College of Letters and Science, please see the List of Minors page on the college's website (<http://ls-advise.berkeley.edu/major/minorlist.html>).

Undergraduate Division

The mission of the Undergraduate Division is to develop and administer innovative and interdisciplinary courses and programs in the College of Letters and Science that do not belong to a single department.

- **Undergraduate and Interdisciplinary Studies (UGIS)** (p. 210) administers the field major in interdisciplinary studies (p. 131) and the group majors in American Studies (p. 44), Cognitive Science (p. 73), Media Studies (p. 151), and Religious Studies (p. 189). Minor programs are offered in Creative Writing, Disability Studies, and Religious Studies. UGIS also supports the following majors in International and Area Studies (p. 132) (101 Stephens Hall, (510) 642-4466): Asian Studies (p. 53), Development Studies (p. 81), Latin American Studies (p. 138), Middle Eastern Studies (p. 154), Peace and Conflict Studies (p. 172), and Political Economy (p. 178).

In addition to our interdisciplinary majors, the Undergraduate Division sponsors a wide range of academic programs and services for undergraduates. A world-class research university such as ours offers something special to undergraduates who know how to make the most of it, and the Undergraduate Division is a good starting place for students who seek close intellectual contact with faculty, either in a small seminar

or in a research apprenticeship, for students who would like to apply for a national scholarship, etc. Some of the campuswide programs for undergraduates that are administered by the Undergraduate Division are described below.

- **The College Writing Programs** (p. 75) (112 Wheeler Hall, (510) 642-5570), designed to help undergraduates establish fluency and control over their reading and writing skills, are also part of the Undergraduate Division.
- **The Freshman and Sophomore Seminars** (<http://fss.berkeley.edu>) are also housed in the Undergraduate Division. Seminars are created and taught by faculty members from nearly every campus department. The office posts descriptions of these special course offerings to freshmen in time for Tele-BEARS registration each semester. For more information, please contact Alix Schwartz in 333 Campbell Hall, (510) 642-8378, or go see the Freshman and Sophomore Seminars website (<http://fss.berkeley.edu>).
- **The UC Berkeley Washington Program** (<http://ucdc.berkeley.edu>), also administered by UGIS, allows undergraduates to spend a semester in Washington, DC, combining coursework with internships.
- **The Office of Undergraduate Research (OUR)** (<http://research.berkeley.edu>) seeks to involve undergraduates more deeply in the research life of the University. To this end, OUR coordinates and develops programs and resources that bring undergraduates into the field, laboratories, and archives. This office administers the Undergraduate Research Apprenticeship Program, the Haas Scholars Program, and the Beckman Scholars Program, and maintains a central research opportunities website (<http://research.berkeley.edu>).
- **The Scholarship Connection** (<http://scholarships.berkeley.edu>) coordinates applications for scholarships and awards based on academic achievement and social or political contribution. Campus committees for the Rhodes, Marshall, Truman, and several other distinguished scholarships are housed here. Staff work to identify talented undergraduates and assist them in the application process.

Linguistics

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 1203 Dwinelle Hall #2650, (510) 642-2757

Chair: Andrew Garrett, PhD

Department Website: Linguistics (<http://linguistics.berkeley.edu>)

Overview

Linguistics is the general study of language. It addresses those features that all languages have in common, the ways in which languages may differ from one another, and the ways in which languages change over time. The undergraduate major in Linguistics introduces students to sounds and their patterns (phonetics), word structure (morphology), sentence structure (syntax), meaning (semantics), how languages evolve over time (comparative and historical linguistics), how language is processed in the brain (cognitive science), and how language is used in society (sociolinguistics).

Major Requirements

The major consists of a four-course core (Linguistics 110, 115, 120, and 130), which includes phonetics and phonology, morphology, syntax and semantics, and language history.

Three or four other courses totaling a minimum of 10 additional upper division units are added to the core through consultations between students and major advisers to complete the major's minimum degree requirements. Of these units, five must be selected from upper division and graduate-level offerings within the Department of Linguistics. The remaining five upper division units may be courses from outside the department, but must be *strongly related* to linguistics. A list of pre-approved courses can be found on the Department of Linguistics (<http://linguistics.berkeley.edu>) website (<http://linguistics.berkeley.edu>). (<http://linguistics.berkeley.edu>) Courses not on the pre-approved list *require the prior written consent* of an undergraduate adviser to be counted in fulfillment of Department of Linguistics requirements.

Because the major varies greatly from student to student, each student is encouraged to plan a program of study with an undergraduate adviser and to see the adviser on a regular basis (at least once a semester).

Prerequisites

Linguistics 100 with a minimum grade of C.

Honors Program

With the approval of the major adviser, a student with a grade point average (GPA) of 3.5 or higher, both overall and in the major, may apply for admission to the Honors Program. This consists of 2-4 units of Linguistics H195A/B units per semester for at least two semesters. Under the direction of a faculty member, students carry out an approved program of independent study in which they attain a reasonable mastery of an appropriate linguistic topic. As evidence of this work, students must submit an acceptable thesis summarizing critically the material they have covered and are invited to give a brief synopsis of their research at the undergraduate honors colloquium held in early May each year.

Minor Requirements

Many students not majoring in Linguistics find it useful to take several courses in linguistics during their undergraduate careers to complement their major work. A minor in Linguistics gives students official recognition for having completed a Linguistics sub-specialization.

Prerequisites

Linguistics 100 with minimum grade of C.

Upper Division Requirements

Four courses in linguistics. Two of the four must be from the core list: Linguistics 110, 115, 120, 130. The third must be taken in the department and may but need not be on the core list. The fourth may be taken outside the department as long as it is on a list of pre-approved linguistics electives.

Graduate Programs

The Department of Linguistics takes a broad approach to the study of language. The department covers not only the standard "core" areas of phonetics, phonology, morphology, syntax and semantics, but also historical linguistics, field linguistics and language documentation, cognitive linguistics, psycholinguistics, and language in society. The Graduate Program trains students to do the kind of research that seeks

to discover and provide explanations for general properties of linguistic form, meaning, and usage. The department has a strong commitment to language documentation as well as to cutting edge theoretical training.

Preparation for Graduate Study in Linguistics

Graduate students in Linguistics should have an undergraduate major in Linguistics, or some equivalent acceptable to the department. They should be prepared to pass the required foreign language reading examinations early in their graduate career.

Master's Degree in Linguistics

Students may follow either Plan I or Plan II for the master's degree. Plan I requires 25 units plus a thesis. (No course units are granted for the thesis itself.) Plan II requires 30 units. The vast majority of students follow Plan II. Both plans require one pass a two-hour comprehensive oral examination. Required courses for the linguistics MA are 110, 200, 201A, 211A, 220A, 230, one course from the Structures set [211B, 215, 220B], one course from the Ecologies set [C105, 123, 181, 205, 210, 250A-E, 255], and either the yearlong sequence [240A-B] or one course from the Advanced Analysis set [205, 210, 211B, 215, 220B, 221, 222, 231, 234, 245, 250A-E, 270, 275, 290A R]. Note that the course used to satisfy the Advanced Analysis requirement can not also be used to satisfy the Structures or Ecologies requirement.) Students must satisfy at least one of these two requirements - Field Methods or Advanced Analysis - for the MA degree. Students who pass the MA exam and are recommended to continue into the PhD program are required to satisfy both of these requirements by the end of their third year.

Doctoral Degree in Linguistics

The doctoral program requires an MA in Linguistics from UC Berkeley, and follows the requirements described in the doctoral section of this catalog with some augmentations. For information on the further requirements, go to the Department of Linguistics website. (<http://linguistics.berkeley.edu>)

Linguistic Society of America Summer Institute

In the United States, the principal scholarly organization representing the field of linguistics is the Linguistic Society of America. (<http://www.linguisticsociety.org>) The organization sponsors a six-week summer institute in linguistics every other year, in collaboration with some co-sponsoring university. Both graduate and advanced undergraduate-level students are strongly encouraged to take part in these programs, which—through a wide range of courses, seminars, conferences, workshops, lecture series, and talks—provide exposure to developments in the field and areas of interest that no single university can offer.

Logic and the Methodology of Science

College of Letters and Science (<http://ls.berkeley.edu>)

Group Office: 910 Evans Hall, (510) 642-0665

Group Chair: Sherrilyn Roush, PhD (Department of Philosophy)

Group Website: Logic and the Methodology of Science (<http://logic.berkeley.edu>)

Overview

The Group in Logic and the Methodology of Science offers an interdisciplinary program of study and research leading to the PhD degree. Although the Department of Mathematics and the Department of Philosophy each offers a PhD degree toward which a student may write a dissertation in logic, the interdisciplinary program is designed for students with a broad interest in logic and the methodology of science who wish to explore the subject in both its mathematical and philosophical aspects. Methodology of science is here understood to mean metascience, the study of the methods of the sciences by logical and mathematical means. The program is administered by an interdepartmental group which cooperates closely with the Computer Science Division, the Department of Mathematics and the Department of Philosophy.

Preparation

For admission to the graduate program, students must have completed an undergraduate major in philosophy, or in mathematics, or a joint major in both, including at least one full-year upper division course in logic. In addition, they must have completed at least one upper division course in some science, and at least one full-year upper division course in mathematics (other than logic) if the undergraduate major was philosophy, or in philosophy (other than logic) if the undergraduate major was mathematics. Exceptions to these requirements are permitted only at the discretion of the graduate adviser.

Further information about the program, including a full statement of the requirements for advancement to candidacy, is available online (<http://logic.berkeley.edu>) or from the Group Administrative Office, Group in Logic and the Methodology of Science, 910 Evans Hall, UC Berkeley; Berkeley, CA 94720-3840.

Courses

Courses are chosen with the advice of the graduate adviser from among the offerings of the various departments of the University. In addition to the departments of Computer Science, Mathematics and Philosophy, attention is especially directed to courses in the various science departments, in statistics, and in linguistics.

Logic Colloquium (no credit): Reports on current research and scholarly work by members of the staff, visitors, and graduate students. (F,SP)

Departments with Related Programs

- Mathematics (p. 147)
- Philosophy (p. 174)

- Computer Science (p. 78)

Malay/Indonesian

Please see the South and Southeast Asian Studies Department (p. 202) for program and degree requirements.

Materials Science and Engineering

College of Engineering (<http://coe.berkeley.edu>)

Department Office: 210 Hearst Memorial Mining Building, (510) 642-3801

Chair: Mark D. Asta, PhD

Department Website: Materials Science and Engineering (<http://mse.berkeley.edu>)

Overview

The Department of Materials Science and Engineering (MSE) administers undergraduate and graduate programs in materials science and engineering. In addition, undergraduate students may be admitted to one of five joint major programs.

Materials Science and Engineering encompasses natural and man-made materials—their extraction, synthesis, processing, properties, characterization, and development for technological uses. Advanced engineering activities that depend upon optimized materials include the energy technologies, photovoltaics, batteries, and fuel cells, new medical devices and the healthcare industries, electronics and photonics, transportation, communication, and nanotechnology.

Students in materials science and engineering apply a basic foundation of mathematics, chemistry, physics, and engineering to fields of specialization that include biomaterials; electronic, magnetic, and optical materials; materials for energy technologies; structural materials; chemical and electrochemical materials science and engineering; and computational materials science and engineering. Nanoscale science and engineering plays an important role in all of these specializations.

See the *College of Engineering Announcement: A Guide to Undergraduate and Graduate Study* online (<http://coe.berkeley.edu/students/college-of-engineering-announcement>) for more information.

Biomaterials

Traditionally, biomaterials include synthetic alternatives to the native materials found in the human body. A central limitation in the performance of traditional materials used in the medical device, biotechnological, and pharmaceutical industries is their inability to integrate with biological systems through either a molecular or cellular pathway, which has relegated biomaterials to a passive role dictated by the constituents of a particular environment. The design and synthesis of materials that circumvent their passive behavior in complex mammalian cells is a major focus of the work conducted within the Department of Materials Science and Engineering at UC Berkeley.

Chemical and Electrochemical Materials Science and Engineering

This area integrates the chemical and electrochemical processing of materials and the chemical and electrochemical behavior of materials.

The former includes the scientific and engineering principles used in mineral processing, smelting, leaching and refining materials, along with numerous etching and deposition techniques. The latter includes the environmental degradation of materials, the compatibility of materials with specific environments, and the fundamental science and engineering development of materials used in advanced energy production and storage devices.

Computational Materials Science and Engineering

Computational methods are native to all facets of materials science and engineering. Such methods range from the theoretical prediction of the electronic and structural properties of materials to modeling fluid flow in advanced batteries, or modeling the chemical kinetics and equilibria in a materials processing operation.

Electronic, Magnetic, and Optical Materials

This group of materials is defined by its functionality. Semiconductors, metals, and ceramics are used today to form highly complex systems such as integrated electronic circuits, optoelectronic devices, and magnetic and optical mass storage media. In intimate contact, these materials with precisely controlled properties perform numerous functions, including the acquisition, processing, transmission, storage, and display of information. Materials research in this area combines the fundamental principles of solid state physics and chemistry with many branches of engineering.

Materials for Energy Technologies

Materials play a crucial enabling role in the energy technologies. All facets of energy harvesting, energy conversion, energy storage, energy delivery, and energy conservation are all included in this topic. Specific examples include photovoltaics, nuclear, solar, thermoelectrics, fuel cells, mechanical transducers, batteries, supercapacitors, low loss conductors, low density structural materials for weight savings, and integrated materials systems for automated control of energy utilization.

Nanomaterials

The science of materials at the nanoscale provides a rich scholarly focus at the confluence of basic science (physics, chemistry, biology, and mathematics) and the engineering disciplines. An interdisciplinary focus provides undergraduates with a comprehensive view of the key materials science issues in nanoscience and nanotechnology.

Structural Materials

This area features the relationships among the chemical and physical structure of materials and their properties and performance. Regardless of the material class—metallic, ceramic, polymeric, or composite—an understanding of the structure-property relationships provide a scientific basis for developing engineering materials for advanced applications. Fundamental and applied research in this field responds to an ever-increasing demand for improved or better-characterized materials.

Undergraduate Program

Students must complete a minimum of 120 units, with which they must satisfy the Berkeley and departmental requirements outlined in this bulletin. Full details on these requirements can be found in the *College of Engineering Announcement: A Guide to Undergraduate and Graduate Study* available online. (<http://coe.berkeley.edu/students/college-of-engineering-announcement>)

5 Year BS/MS Program

The five-year combined Bachelor of Science/Master of Science program augments the existing four-year undergraduate program with a fifth year of graduate study that provides a professionally oriented component, preparing students for careers in engineering or engineering management within the business, government, and/or industrial sectors. In this program, students earn a bachelor's degree and subsequently, a Master of Science degree under Plan II (without thesis) of the Academic Senate. This five-year program emphasizes interdisciplinary study through an independent project coupled to coursework. The program is open to undergraduate materials science and engineering majors (both single or joint majors) only.

Graduate Programs

Qualified holders of the bachelor's degree in fields such as materials science and engineering, ceramic engineering, metallurgy, physics, chemistry, and various fields of engineering disciplines can all successfully undertake graduate study in materials science.

A combination of coursework and research normally leads to the MS, MEng, and PhD degrees, qualifying the graduate for a wide range of positions in industry, governmental organizations, or universities that entail research or advanced engineering in the production, development, and use of materials. The coursework includes a core program in materials science and engineering, along with additional courses that provide breadth. MSE students may elect to follow the designated emphasis in nanoscale science and engineering, as described here. (<http://nano.berkeley.edu/educational/DEGradGroup.html>)

Topics for graduate research include studies in biomaterials; electronic, magnetic and optical materials; structural materials; chemical and electrochemical materials science and engineering; and computational materials science and engineering. A wide variety of facilities is available for processing, including thin film deposition by Molecular Beam Epitaxy, Pulsed Laser Deposition, and other physical and chemical deposition techniques. Techniques such as transmission and scanning electron microscopy, surface characterization, optical spectroscopies, electron paramagnetic resonance, electrical transport, microprobe X-ray emission spectroscopy, differential thermal analysis, precision calorimetry, and cryogenic and high temperature mechanical testing are used for fundamental characterization of the structure and properties of materials. Joint facilities in Berkeley's Microfabrication Laboratory, the Integrated Materials Laboratory, and Lawrence Berkeley National Laboratory, including the National Center for Electron Microscopy and the Advanced Light Source, can be used for graduate research.

Mathematics

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 970 Evans Hall, (510) 642-6550

Chair: Arthur E. Ogus, PhD

Department Website: Mathematics (<http://math.berkeley.edu>)

Majors

The department offers undergraduate major programs in mathematics and applied mathematics leading to the BA degree. These programs provide

excellent preparation for advanced degrees in math, physical sciences, economics, and industrial engineering, as well as graduate study in business, education, law, and medicine. They also prepare students for post-baccalaureate positions in business, technology, industry, teaching, government, and finance. The requirements for both majors are summarized below. See the Department of Mathematics website (<http://math.berkeley.edu/programs/undergraduate>) for more information.

Students should contact an undergraduate adviser in 964 or 965 Evans Hall about requirements for admission to the major.

General Major Requirements

Both major programs require a lower-division base of Mathematics 1A-1B, 53, 54, and 55. Courses Math 16A-16B are not an acceptable alternative to Math 1A-1B. Math 1A-1B must be completed with an average grade of C or better; Math 53, 54, and 55 must be completed with minimum grades of C in each. Eight upper-division courses are required for either major. Specific course requirements follow.

Major in Mathematics

1. Four core courses 104, 110, 113 and 185
2. Two semi-electives: select one course from each of two of the following three subject areas: I. Computing (128A); II. Geometry (130, 140, 141, 142, 143); III. Logic and foundations (125A, 135, 136)
3. Two upper division math electives. With the approval of the major adviser, students may count two mathematically theoretical courses in computer science, statistics, physics, astronomy, mathematical economics, or other sciences toward requirements for the major in mathematics.

Major in Mathematics with a Teaching Concentration

The new teaching concentration is designed to increase the number and quality of math teachers. It requires the completion of three new courses, Math 151, 152, and 153, and includes a modification to the typical major course sequence. Please see the Mathematics Department website (<http://math.berkeley.edu>) for more information.

Major in Applied Mathematics

1. 104, 110, 113, 128A, and 185
2. Three additional upper division courses, approved by a major adviser, which form a coherent cluster in some applied area such as actuarial science, classical mechanics, computer science, economics, fluid mechanics, geophysics, mathematical biology, numerical analysis, operations research, probability theory, quantum mechanics, statistics, systems theory. Many other clusters are also possible.

Honors Program

In addition to completing the requirements for the major in mathematics or applied mathematics, students in the honors program must:

1. Earn a GPA of *at least* 3.5 in upper division and graduate courses in the major and *at least* 3.3 in all courses taken at the University
2. Complete either Math 196, in which they will write a senior honors thesis, or pass two graduate mathematics courses with a grade of at least A-
3. Receive the recommendation of the Head Adviser.

Students interested in the honors program should consult with an adviser early in their program, preferably by their junior year.

The Minor Program

Students in the College of Letters and Science may complete one or more minors of their choice, normally in a field both academically and administratively distinct from their major. The minor program in the Department of Mathematics consists of the following coursework:

Prerequisites

Mathematics 1A-1B and 53 and 54 (or their equivalents). These courses must be taken for a letter grade and must be passed with average grades of C or better.

Minor Requirements

Mathematics 104, 110, 113, and 185, plus one additional upper division mathematics course. These five courses must each be taken for a letter grade, and a minimum GPA of 2.0 is required for upper division courses applied to the minor program. At least three of the five courses must be completed at Berkeley. One upper division class from your minor may overlap with your major.

For more information about this program, please contact an undergraduate adviser in 964 or 965 Evans Hall.

Preparation for Graduate Study

Students preparing for the PhD in mathematics are strongly advised to acquire a reading knowledge of one foreign language from among French, German, and Russian. Undergraduate students also often take one or more of the following introductory graduate courses: 202A-202B, 214, 225A-225B, 228A-228B, 250A-250B.

Graduate Programs

The department offers the MA degree in mathematics and PhD degrees in mathematics and applied mathematics. Detailed information concerning admission, graduate student instructorships and fellowships, and degree requirements is given in the *Graduate Announcement of the Department of Mathematics*, which is available online here (<http://math.berkeley.edu/programs/graduate>).

Mechanical Engineering

College of Engineering (<http://coe.berkeley.edu>)

Department Office: 6141 Etcheverry Hall, (510) 642-1338

Chair: David A. Dornfeld, PhD
Department Website: Mechanical Engineering (<http://me.berkeley.edu>)

Overview

Mechanical engineers contribute to society by solving problems in transportation, energy, the environment, and human health. The mechanical engineer needs a thorough preparation in mathematics, physics, chemistry, manufacturing processes, properties of materials, mechanics, fluid mechanics, thermodynamics, as well as intensive design and laboratory experience. The program of study includes basic subjects common to all engineering fields, fundamental subjects important to

all mechanical engineers and specialization in one or more phases of mechanical engineering.

Undergraduate Program

The freshman and much of the sophomore years of the program emphasize mathematics, physics, chemistry, computing, graphics, materials, and statics. Students are introduced to the profession of engineering in their freshman year in Engineering 10 and first exposed to engineering design in their sophomore year in Engineering 28. In their freshman year students are also introduced, in Engineering 7, to solving engineering problems using computers. Part of the sophomore and much of the junior year curricula focus on engineering science. The sophomore and junior year courses Mechanical Engineering 40, C85, 104, 106, 108, and Electrical Engineering and Computer Sciences 100 are engineering science courses covering dynamics, fluid mechanics, strength of materials, and thermodynamics, with elements of design and computing included. They also introduce students to the use of engineering concepts as tools to analyze component and system performance. From this solid foundation, a student synthesizes tools from different engineering sciences and applies them to design problems. This is the rationale for placing much of the design component of the program in the senior year. Specialization may be provided in the choice of technical electives from the subject areas of applied mechanics, automatic controls, electrochemical systems, energy conversion, fluid mechanics, heat transfer, manufacturing systems, materials processing, mechanical design, cryogenics, robotics and automation, bioengineering, and environmental engineering.

Because of the widening range of technical problems and the limited amount of specialization available in the undergraduate curriculum, qualified students should consider graduate study to expand their scientific and technological capability. Further details on undergraduate and graduate fields of emphasis in mechanical engineering are available in the College of Engineering Undergraduate Guide. (<http://coe.berkeley.edu/guide>)

Curriculum Overview

Course	Fall	Spring
Freshman Year		
Chemistry 1A and 1AL-General Chemistry or Chemistry 4A-General Chemistry and Quantitative Analysis ⁽¹⁾ (p.))	4	-
E 7-Introduction to Computer Programming for Scientists & Engineers	-	4
Engineering 10-Engineering Design and Analysis ⁽²⁾ (p.)))(6 (p.))	3	-
Mathematics 1A-Calculus	4	-
Mathematics 1B-Calculus	-	4

Physics 7A-Physics for Scientists and Engineers	-	4	ME 102A-Experimentation and Measurement	4	-
Reading and Composition Course from List A ^{(3 (p.))}	4	-	ME 102B-Mechanical Engineering Design	-	3
Reading and Composition Course from List B ^{(3 (p.))}	-	4	ME 107-Mechanical Engineering Laboratory	-	3
Optional Freshman Seminar or E 92 (Survey Course)	1	1	Technical Electives ^{(4 (p.))}	6	6

ME 132-Dynamic Systems and Feedback	-	3			
Technical Electives ^{(4 (p.))}	3	3			
Additional Humanities/Social Science Courses ^{(3 (p.))}	3-4	3-4			
Total	16-17	16-17			
Senior Year					

Notes

¹ Chemistry 4A is for students intending a major in Chemistry or Chemical Engineering.

² If the prerequisites are met, students may take E 7 in Fall and E 10 in Spring. (See E 7 readiness exam online (<http://coe.berkeley.edu/E7>))

³ The Humanities/Social Science (H/SS) requirement includes two approved reading and composition courses and four additional approved courses, with which a number of specific conditions must be satisfied. Reading and Composition "A" and "B" must be completed by no later than the end of the sophomore year. The remaining courses may be taken at any time during the program. See coe.berkeley.edu/hssreq for complete details and a list of approved courses.

⁴ Technical Electives: 18 units of technical electives are required, of which at least 15 must be upper-division mechanical engineering courses. Of these 15 units, 3 units must be a design course selected from the following list:

- E 128*-Advanced Engineering Design Graphics
- ME 101-High Mix/Low Volume Manufacturing
- ME 110-Introduction to Product Development
- ME C117-Structural Aspects of Biomaterials
- ME 119-Introduction to MEMS
- ME 128-Computer-Aided Mechanical Design
- ME 130-Design of Planar Machinery
- ME 135-Design of Microprocessor-Based Mechanical Systems
- ME 146-Energy Conversion Principles
- ME 165-Ocean-Environment Mechanics
- ME C176-Orthopedic Biomechanics

Also, one of the technical elective courses must be taken from the quantitative science list below:

- E 117*-Methods of Engineering Analysis
- E 177*-Advanced Programming with MATLAB
- Math 128A*-Numerical Analysis
- ME 120-Computational Biomechanics Across Multiple Scales
- ME C180-Engineering Analysis Using the Finite Element Method

Any upper division course taught by mechanical engineering faculty may be used as part of the 15 units of upper-division mechanical engineering courses. In addition, any course listed above with an asterisk (*) can count toward the 15 unit upper division ME course requirement.

Students may receive up to three units of technical elective credit for work on a research project in either ME 196 (Undergraduate Research) or ME H194 (Honors Undergraduate Research-restrictions apply).

The other three (3) technical elective units can be chosen from courses in engineering, physical science, mathematics, or statistics. Physical science is defined to include physics, chemistry, biochemistry, chemical engineering, and the biological sciences. Only one lower division course, chosen from the approved list below, can be used to satisfy part of the technical elective requirement. This list consists of the following courses:

Any lower division technical course required by another major in the College of Engineering; Astronomy 7A; Biology 1A, 1B; Chemistry 1B, 3A; Civil Engineering 70; Engineering 45; Molecular and Cell Biology 11, 32 (32L not required); and Statistics 20.

Technical Electives cannot include any course taken on a P/NP basis; courses numbered 24, 39, 84; BioE 100; CS C79, CS 195, CSH195; Engin 125, 130AC, 140; IEOR 190 series; IEOR 191; ME 191AC, 190K, 191K.

⁵ Free electives can be any technical or non-technical course. A course of your interest offered by any department at Cal; there are no restrictions.

⁶ Junior Transfer admits are exempt from completing Engin 10.

* A minimum of 120 units is required for graduation.

Technical Electives

The following groups of elective courses should help undergraduates focus on their specific professional goals. The electives need not be from any single group. For the most current list, please see this webpage.

(<http://me.berkeley.edu/StudentAffairs/Courses/TechnicalElectives.html>)

Biomechanical Engineering:

Biology 1A; EE C145B, C145L C145M; Integrative Biology 131, 132; ME C115, C117, 127, 133, 134, 135, C176, Molecular and Cell Biology*, 130

Combustion:

CE 111; Chem E 140, 141, 142; E 117; ME 140, 151

Computer-Aided Engineering:

E 128, 177; ME 128

Controls:

E 177; EE 120; ME 133, C134, 135, 146, 175, 190L, 190Y.

Energy:

EE 134, 137A, 137B; ME 140, 146

Environmental Engineering:

CE 111, 173, 175; ME 110, 140, 151, 165, 173; NE 162; Suggested non-technical courses: Architecture 100A, 100B, 140; Geography 144

Fluid Mechanics and Aeronautics:

E 117; CE 131; ME 133, C134, 151, 163, 165, 167, 173, 175, 185

General Mechanical Engineering:

E 117, 128; ME 110, 133, C134, 165, 173, 175, 190A

Heat and Mass Transfer:

Chem E 150B, 171; E 117; ME 140, 151

Materials Processing and Manufacturing Management:

E 120; ME 101, 110, 122, 127, 128, 133, C134, 151, 190A

Mechanical Engineering Design:

E 128; ME 110, 118, 119, 127, 128, 130, 133, C134, 135, 151, 165, C176

Mechatronics:

ME 101, 128, 130, 133, C134, 135

Microelectromechanical systems (MEMS):

ME 118, 119, 138

Nuclear Engineering:

ME C134, 151, 173; NE 101, 120, 150; Physics 137A

Ocean Engineering:

ME 101, 127, 128, C134, 164, 165, 167; CE 120, 180

Robotics and Automation:

EE C125; ME 101, 133, C134, 135, 170, 175

Theoretical and Applied Mechanics:

E 117; Mathematics 104; ME 127, 133, C134, 163, 165, 170, 173, 175, C180, 185

* ME students are not required to take Molecular and Cell Biology 32L with Molecular and Cell Biology 32.

The BS program is accredited in mechanical engineering by the Engineering Accreditation Commission of ABET, Inc., 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; (410) 347-7700.

Mechanical Engineering Minor

The department offers a minor in mechanical engineering that is open to all students not majoring in ME who have completed the necessary prerequisites for the minor requirements. Information is available on the department's website (<http://me.berkeley.edu>).

Graduate Programs

Both master's and doctoral programs are available. The student may choose either a scientific emphasis in particular areas or integrated

studies directed to professional objectives. Master of Science and PhD degrees are the relevant degrees for the scientific emphasis, and the MEng and DEng degrees for the professional one. The department also offers a program leading to dual degrees in Master of Science in Engineering and Master of Public Policy. Specialization is offered in the following mechanical engineering disciplines:

1. Controls and dynamics
2. Design
3. Fluids
4. Mechanics
5. Materials
6. Energy science and technology

Specialization is also offered in the following focus areas:

1. Bioengineering
2. Manufacturing
3. Micro-electromechanical systems (MEMS) and nanoengineering
4. mechatronics
5. Energy and environment
6. Ocean engineering

Details on various aspects of graduate study are available here (<http://me.berkeley.edu>) and from the College of Engineering website.

Note: In addition to the courses listed below, the Department of Mechanical Engineering offers the following courses, found in the Engineering section of this Bulletin: 10, Engineering Design and Analysis; 28, Graphic Communication in Engineering; 117, Methods of Engineering Analysis; 128, Advanced Engineering Design Graphics; 177, Advanced Programming with MATLAB; 191, Engineering Ethics; 193, *California Engineer* Staff; 230A, Engineering Analysis; 230B, Engineering Analysis; 231, Mathematical Methods in Engineering; 266A, Finite Difference Methods for Fluid Dynamics; 266B, Spectral Methods for Fluid Dynamics.

Media Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Group Major Office: Division of Undergraduate and Interdisciplinary Studies, 231 Evans Hall, (510) 642-2363

Group Director: Tom Goldstein, PhD (Graduate School of Journalism)

Group Website: Media Studies (<http://ls.berkeley.edu/ugis/mediastudies>)

Media Studies Program

The group major in media studies is administered by the Division of Undergraduate and Interdisciplinary Studies. It applies a range of disciplines in the social sciences and humanities to the understanding of contemporary mass media, their structure, history, content, consequences, and policy implications. The emphasis in the UC Berkeley program is not on media production, but rather on the central role that media play in modern society, with special emphasis on political and cultural life.

Declaring the Major

Students planning to declare a major in media studies are advised to contact the student affairs officer as early as possible in planning their academic programs. Applications are accepted during fall and spring semesters during periods listed on the program's website.

Students who wish to declare the major in Media Studies:

- Must have *completed* at least 30 units of college coursework before applying to the program.
- Must have *completed* at least three of the major prerequisites, including Media Studies 10.
- Must be *currently enrolled in any remaining prerequisite* at the time of application (see list of approved major prerequisites below).
- Must have a minimum grade point average (GPA) of 3.2 in courses *relevant to the major*; this includes the lower division prerequisite courses and the equivalency of transferred coursework, as well as any lower- or upper-division courses already completed for the major.
- Should declare the major no later than the semester in which they complete the 70th unit. (Junior transfer students should contact the major adviser for media studies concerning their eligibility and the equivalency of transferred coursework.)

Students who meet the above criteria are eligible for admission to the major. Students who do not meet the above criteria but wish to declare mass communications should submit a letter of appeal along with a completed application.

Applications and instructions regarding the admission and appeal process may be obtained from the Media Studies Office in 263 Evans Hall.

Major Requirements

Prerequisites: One course from each of the following four groups. *Note:* All prerequisites must be taken for a letter grade.

1. History 7B, 124A, 124B or 131B
2. Political Science 1
3. Anthropology 3, Economics 1, Psychology 1 or 2, Sociology 1 or 3
4. Media Studies 10

Requirements for Graduation

(*Note:* These requirements are in addition to the prerequisites for admission to the major.)

At least 30 upper division units distributed over the following three areas:

- *The following four core courses in media studies:* Media Studies 101, 102, C103 and any one from the following list: Media Studies 104A, 104B, or C104C.
- *One of the following methods courses:* Anthropology 190A; Mass Communications 130; Political Science 3 or 132A-132B; Psychology 101; Sociology 5 or 105.
- *Four courses from the following list:* African American Studies 142A, 142B; American Studies 112A, 112B, C172; Anthropology 138A, 139, 144, 149, 156B, 166; English 173, 176; Film 160; Journalism 180; Linguistics 150; Media Studies 160, 170, 180, 190; Political Science 106A, 111A, 161, 164A; Psychology 124, 160; Sociology 110, 140, 150, 156, 160, 170; UGBA 106, 165.

Note: All requirements for graduation in the major must be taken for a letter grade. Any substitutions must be approved by the major adviser.

Transfer Students

Transfer students may complete Media Studies 10 at Berkeley, but are urged to complete other major prerequisite courses before arriving on campus. New transfers should see the major adviser on arrival in order to have transfer prerequisites approved. Transfers may need assistance in adding Media Studies 10 to their schedules.

Honors Program

To be admitted to the honors program, a student must have attained at least a 3.5 GPA overall in the University and a 3.5 GPA in the major. In order to be granted honors, a student must write a thesis which in the judgment of the thesis director and the adviser is characterized by superior distinction (Media Studies H195).

Medical Anthropology

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 232 Kroeber Hall, (510) 642-3391

Medical Anthropology PhD Program

Office: 232 Kroeber Hall, (510) 642-3391

Program Director: Nancy Scheper-Hughes, PhD
(Department of Anthropology)

Program Website: Medical Anthropology (<http://anthropology.berkeley.edu/content/medical-anthropology>)

Medical Anthropology PhD Program

The Department of Anthropology at Berkeley, and the Graduate Group in Anthropology at the University of California at San Francisco, currently offer a joint PhD in medical anthropology. Students may apply to enter the program through either the Berkeley or the San Francisco campus *but not to both*. The point of entry determines the student's home base during the program. Financial aid, primary advising, and other routine services are provided by the campus through which the student enters the program. All students, however, benefit by taking required coursework on both campuses and by the participation of the faculty on both sides of the program on all qualifying examinations and on the doctoral dissertation committees. The degree is the same and bears the name of both campuses.

Medical anthropology entails the exploration of humans as simultaneously physical and symbolic beings in both contemporary and evolutionary contexts. As such, medical anthropology participates in anthropology as a whole, encompassing theory and practice from sociocultural, psychological, biological, biocultural, symbolic, and linguistic anthropology. It is concerned with questions of both theoretical and applied significance, and with research that is of relevance to the social sciences as well as to medicine and the biological sciences. Courses in bioevolutionary dimensions of disease are accompanied by seminars that explore pain, suffering, madness, and other human afflictions as a social language speaking to the critically sensitive or contradictory aspects of culture and social relations. Anthropological epidemiology asks the questions, "*Who gets sick with what ailments?*" (differential risks, forms of medical knowledge, and medical systems) and "*Why?*" (what social arrangements, cultural features, and biotechno-environmental forces account for these risks). Medical anthropology interprets individuals as

actively constructing their medical realities and not simply adjusting to or coping with them.

Given the broad definition of medical anthropology, the joint graduate program at Berkeley-UCSF is extremely flexible, allowing for the individual needs and interests of each student. During the first year of training, students are required to take core courses in both sociocultural and biological aspects of medical anthropology, taught at both campuses. After the first year and successful completion of the preliminary qualifying examination, medical anthropology students develop a more specialized and individually tailored program under the supervision and guidance of their adviser.

For students entering Berkeley with a BA, the doctoral program is estimated to take between five and six years, as follows: three years of coursework, one to two years of dissertation research, and one to two years of writing the dissertation.

For a complete list of faculty, consult the Medical Anthropology brochure available from the Program Office, 232 Kroeber Hall, Berkeley, CA 94720-3710, or the *Berkeley Bulletin* and UCSF catalogs.

Applications to all graduate programs are considered once each year for admission the following fall semester. The application period opens in early September, and the deadline for receipt of both department and Graduate Division applications is December 15. Applications are screened by the anthropology faculty, and selections are made on the basis of academic excellence, letters of recommendation, GRE scores, relevant experience, and a strong statement of intellectual and professional purpose.

The minimum requirement for admission to the Berkeley doctoral program in anthropology and in medical anthropology is a B.A. The UCSF program in medical anthropology requires a master's degree in anthropology or a related discipline, or a postbaccalaureate professional degree.

Medieval Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Program Office: 7305 Dwinelle Hall, (510) 642-4218

Director: Katherine O'Brien O'Keeffe, PhD

Program Website: Program in Medieval Studies

(<http://medieval.berkeley.edu>)

Overview

The Medieval Studies Program at UC Berkeley is an interdisciplinary group that coordinates and sponsors lectures, events, and visiting professorships, promotes scholarly interests common to medievalists of different academic departments, and communicates information of interest among them. The Committee on Medieval Studies offers a concurrent PhD program in which candidates have both a home department and training in the core disciplines of medieval studies.

Undergraduate Program

The Program in Medieval Studies offers an undergraduate interdisciplinary Minor in Medieval Studies. The Minor has three principal purposes:

1. To give undergraduate students who have an interest in Medieval Studies the benefit of advising about what courses are available in the various departments and how certain courses might fit together into a meaningful sequence or cluster.
2. To enable students to be informed about lectures, colloquia, social events, and conferences of interest to them.
3. To allow those undergraduates who complete substantial work in Medieval Studies to have that fact acknowledged. Should those students wish to pursue further academic work after graduation, their chances of success in the competition for admission to graduate school will be enhanced, not just because of the official notice on their transcript but because they will have gained greater professional competence through informed participation in the Program in Medieval Studies at Berkeley.

Undergraduates who contemplate applying for the Minor should contact the Graduate/Undergraduate Adviser, Professor Daniel Melia, to discuss their interests and needs.

Requirements

Students can receive credit for fulfilling the Minor by completing any five upper-division or graduate courses in Medieval Studies. Please note that the following restrictions apply:

- At least three of the five courses must be taken at Berkeley.
- The courses must be of 3 or 4 units and must be taken for a letter grade, with a minimum GPA of 2.0 in those courses.
- So that cross-disciplinary skills are ensured, only three of the five courses may be taken in a single department. Students should consult with a Letters and Science adviser to ensure that there is no more overlap between the Minor and the Major programs than is permissible. Only one course can be counted toward both the major and the minor degrees.
- The Graduate/Undergraduate Adviser in Medieval Studies must certify that the five courses do qualify as courses in Medieval Studies. This verification should take place early in the student's last term at Berkeley. Previous consultation with the Adviser is strongly recommended.

Concurrent PhD Degree

Graduate students must be accepted for admission to a regular department (e.g., English or History) before applying for a concurrent degree in medieval studies. The degree granted is the concurrent PhD in the departmental discipline and medieval studies (e.g., English and medieval studies, history and medieval studies). The concurrent PhD is designed to preserve an established standard of training in a major subject while broadening the student's experience in other aspects of the field. A candidate for the concurrent PhD is expected to fulfill all the PhD requirements of the major field of study.

In addition, Candidates for this Concurrent Degree Program must fulfill the following requirements:

1. Completion of three courses, which must include: (a) Medieval Studies 200, (b) History 275, or History 280 on a solely medieval topic, and (c) a course from outside the student's home department (a list of such courses is posted on the Medieval Studies website).

2. Advanced competence in Latin, demonstrated either through a special examination administered by the Medieval Studies program or through coursework.
3. Reading proficiency in a medieval form of a modern European language outside the major field of study, either through examination administered by the Medieval Studies program or through coursework (an upper-division or graduate-level literature course; ordinarily drawn from a list posted on the Medieval Studies website).
4. Working proficiency in manuscript studies (paleography, diplomatic, or codicology), as demonstrated through coursework (appropriate upper-division or graduate-level course at Berkeley or appropriate graduate-level course or workshop elsewhere) or through presentation of an extended research paper making substantial and original use of such skills.
5. A field statement of 30-50 pages, to be completed before the Qualifying Examination, which situates the major area of interest in an interdisciplinary setting.
6. A special committee for the PhD qualifying examination. A representation of Medieval Studies must serve on the PhD orals examination committee.
7. Regular participation in the Medieval Studies Colloquium, and one presentation of dissertation/work in progress to that Colloquium.

Curriculum

The program offers some of its own courses. These include Medieval Studies 200, the graduate proseminar; Medieval Studies 150 and 250, two special topics courses, and occasional courses in medieval Latin, paleography, and manuscript studies. In addition, students are urged to consult the medieval offerings in the departments or programs of Art History, Celtic Studies, Classics, Comparative Literature, Dramatic Art, English, French, German, History, Italian Studies, Linguistics, Music, Near Eastern Studies, Philosophy, Religious Studies, Rhetoric, Scandinavian, Slavic, and Spanish and Portuguese, as well as in the School of Law and the Graduate Theological Union. An updated list of such offerings is posted each semester on the Program in Medieval Studies (<http://medieval.berkeley.edu>) website (<http://ls.berkeley.edu/dept/medieval>).

Microbiology

College of Natural Resources,
(<http://www.cnr.berkeley.edu/site>)

Interdepartmental Graduate Group

Office: 111C Koshland Hall, (510) 642-5167

Chair: N. Louise Glass, PhD (Department of Plant and Microbial Biology)

Department Website: Microbiology (<http://pmb.berkeley.edu/ggm>)

Graduate Program in Microbiology

The Graduate Group in Microbiology is composed of 54 faculty from diverse departments, colleges, and schools (Plant and Microbial Biology; Molecular and Cell Biology; Public Health; Civil and Environmental Engineering; Chemical and Biomolecular Engineering; Environmental Science, Policy, and Management; Nutritional Sciences and Toxicology; Optometry; and Integrative Biology) and is administered by the Department of Plant and Microbial Biology. The group awards the PhD degree in Microbiology. Students in the group have access to diverse

disciplines through an integrated program of study that allows each student to pursue specialized interests. Students gain a breadth of understanding of microbiology from the molecular to the cellular levels of organization, as well as the interactions of microbes—beneficial and pathogenic—with other organisms.

The graduate program features an introductory seminar (Faculty Research Review), a two-semester core course, and additional special-topic courses and seminars in areas of faculty specialties. The core course is comprised of six modules, which cover the following topics: microbial genetics, genomics and computational biology, microbial diversity and evolution, cell structure and function, microbial physiology, and microbial ecology.

Faculty in the Graduate Group in Microbiology have research interests in four broad areas: ecology and evolution, genetics and development, physiology and biochemistry, and host-microbe interactions. The research of many faculty spans more than one of these categories. In addition, the research goals vary from addressing fundamental questions in biology to applied studies in the control or use of microbes. Some faculty conduct research on both fundamental and applied topics.

Students admitted to the Graduate Group in Microbiology program are expected to demonstrate academic excellence and potential for independent scientific research and to have satisfied, or satisfy through additional coursework, the curriculum required of an undergraduate major in microbial biology. Students are expected to have a background in chemistry, physics, mathematics, and biology. An admissions committee composed of nine faculty members and one graduate student will review applications and make recommendations to the full faculty on admissions matters. Recommendations for admission will be based on grades in university-level undergraduate and graduate courses, letters of recommendation, written statements of academic and professional goals, and other evidence of academic accomplishment. Scores on standardized tests, such as the Graduate Record Examination, are required of all applicants. Students seeking detailed information about matters such as admission and curriculum should contact the student affairs adviser or the graduate adviser.

Middle Eastern Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Group Major Office: International and Area Studies, 101 Stephens Hall, (510) 642-4466

Chair and Major Adviser: Nezar AlSayyad, PhD
(Department of Architecture and Department of City and Regional Planning)

Co-Chair and Major Adviser: Emily Gottreich, PhD
(Department of History)

Program Website: Middle Eastern Studies (<http://iastp.berkeley.edu/mes>)

Overview

Since 1981, the interdisciplinary major in Middle Eastern Studies (MES) has provided UC Berkeley students with the opportunity to study a region of great historical and cultural importance whose political, economic, and social development is closely linked to that of our own society. The MES

major covers the Arab world, Turkey, Iran, and Israel, intertwining history and culture, geography and ecology, politics and economics, with an emphasis on the modern and contemporary Middle East. Its broad and balanced program of study draws on a wide variety of Middle East-related courses offered by faculty from more than 20 different departments and schools in the University. Students in the MES major also learn at least one of the major Middle Eastern languages of today: Arabic, Hebrew, Persian, or Turkish. MES graduates have gone on to work in industry and government, both in the United States and abroad. About half pursue graduate studies; many then go on to academic or professional careers.

The MES major falls under the academic supervision of the Center for Middle Eastern Studies (CMES). The CMES organizes public lectures, publishes a newsletter, maintains a small library, and promotes scholarship on the Middle East at all levels. Students are encouraged to utilize the Center's many resources. The MES major is administered through the International and Area Studies (IAS) Office. The IAS office provides information on all administrative aspects of the major, including advice on when and how to declare, fulfilling requirements, and timely program completion. Academic advising, including planning a course of study to suit individual needs and interests, identifying a thesis topic and adviser, and career counseling, is offered by the MES Chair and Co-Chair.

The MES major should not be confused with the major in Near Eastern Studies (NES), which emphasizes language and literature and includes the study of the ancient Near East. Students interested in those fields should contact the Department of Near Eastern Studies in 250 Barrows Hall, (510) 642-3757.

The Group Major

Declaring a major in MES follows guidelines established by the College of Letters and Science. Students wishing to declare Middle Eastern studies:

- must have completed or be currently enrolled in one course that meets the MES lower division requirement (NES 10, History 12, MES 10) at UC Berkeley or have completed an equivalent course at another institution. Other courses (listed as having 50% or more Middle East-related content) may be substituted with Chair or Co-Chair approval for the purposes of declaring the major only. The lower division requirement must still be met to declare the major, however, and should be taken no later than the following semester.
- must have completed or be currently enrolled in a modern Middle Eastern language course (Arabic, Hebrew, Persian, or Turkish);
- must have a major and cumulative GPA of 2.0 or higher;
- must have attended a major declaration workshop;
- must not be in their final semester of undergraduate work.

Students are reminded that no coursework for the major may be taken on a passed/not passed basis, and no course may be used to satisfy more than one major requirement.

Applications are available in the IAS office at 101 Stephens Hall. They must be signed by the MES coordinating faculty adviser and returned to the IAS office.

Double Majors

Double majors must be approved by the dean of the College of Letters and Science. No more than two upper division courses may be used to satisfy requirements in both majors.

Courses Outside Letters and Science

No more than three courses outside the College of Letters and Science may be used to fulfill group major requirements.

Study Abroad

The use of coursework taken at institutions outside the United States to fulfill major requirements is restricted to the equivalent of three semester-length upper division courses. Courses taken to fulfill the foreign language requirement for the group major are not included in this restriction. Prior to their departure, students should meet with the MES Chair or Co-Chair to review prospective courses of study.

Transfer Courses

A maximum of three courses taken at other institutions (including those of the Education Abroad Program of the University of California) may be transferred into the major. Relevant courses taken at community colleges can be counted toward the lower division requirement only. Courses from other institutions may be counted toward upper division requirements (regardless of unit value) and must be validated by the Office of Undergraduate Admission and Relations with Schools and approved by the MES Chair or Co-Chair. Courses used to fulfill the foreign language requirement are not included in this restriction.

Lower Division Requirements

- **NES 10, Introduction to the Near East (4 units):** A survey course introducing the fundamentals of Middle Eastern civilization presented in a broad historical framework; or
- **MES 10, Social Issues in Middle Eastern Studies (4 units):** A lower division interdisciplinary course about contemporary social issues relating to the Middle East that treats regional and international questions; or
- **History 12, Introduction to the Middle East (4 units):** A survey of key historical developments from the rise of Islam to the present, including the significance of Islamic civilizations from a world historical perspective, the construction of the modern state system from the late Ottoman era through the period of British and French colonial rule, the newly independent states of the Middle East and the postcolonial period.

Language Requirement

All MES students must be able to demonstrate proficiency equivalent to four college-level semesters in a modern Middle Eastern language: Arabic, Hebrew, Persian, or Turkish. The first semester language course must be completed or be in progress at the time of admission to the major. The remaining three courses may be completed at any time before graduation. The language cannot be started in the senior year and finished in the post-graduation summer.

There are three ways students can fulfill the four-semester language requirement, depending on their background and ability:

1. **Through coursework:** A combination of college, summer program, or college-level study abroad programs could satisfy the language requirement. At a minimum, students must complete the fourth semester of a language with a grade of C- or better. The first, second, and third level of language may be taken on a *passed/not passed* basis; the fourth semester *must* be taken for a letter grade. Language courses need not be taken at Berkeley; courses taken at a community college or any accredited school or university are acceptable. Advanced Placement Language Test scores of 5 complete the requirement. However, transcripts and score

reports must be provided. See the MES coordinating faculty adviser concerning language study abroad.

2. **With a proficiency examination:** Students whose language skills are at a fourth semester or beyond and who do not wish to take language courses can opt to test out of the requirement by requesting a language exam at the time of admission by an appropriate language instructor in the Department of Near Eastern Studies (see language directions in the Department of Near Eastern Studies for certification requirements). Language Certification forms are required, and may be obtained through the IAS office. Students whose exams reveal only partial ability to read, write and converse must take additional language courses to elevate their level, as determined by the examiner. These courses may be in any of the four Middle Eastern languages. Students who are able to show advanced or native ability in one Middle Eastern language are encouraged, but not required, to begin study of a second Middle Eastern language.
3. **Being a non-native English speaker:** Non-native speakers of English may use their native language to satisfy this requirement; however, documentation of fourth-semester ability is still required. Students may take a proficiency test (see above) or, alternatively, provide documentation that they have been educated in their native language at least through high school.

Upper Division Requirements

There are nine required upper division courses, totaling no fewer than 30 units. They consist of three core courses; four thematic and disciplinary concentration courses; a methods course (MES 102); and a senior or honors thesis (MES 190/H195).

Note: With the exception of MES courses, no more than three courses may be taken from the same department.

1. **Core Courses (3 courses):** The core course requirement is intended to provide a broad introduction to the Middle East, encompassing geography and ethnography, history and cultures, and current political, economic and social developments. To satisfy this requirement, students must choose from a list of eligible courses (those indicated as having 50% or more Middle East-related content) in three different departments. A list of currently approved core courses may be found in the MES Handbook.
2. **Disciplinary Concentration Requirement:** In addition to the core courses, MES students must complete a four-course disciplinary concentration requirement in which they pursue advanced study of a selected topic in Middle Eastern studies following a particular disciplinary approach. Topics may focus on a specific region or a thematic problem and may relate to religious and cultural studies, history, contemporary development and social change, urbanization, nation building, and the impact of imperialism and colonialism on the Middle East, among other topics. The concentration must be designed in consultation with the MES Chair or Co-Chair and pre-approved by an MES staff adviser in the IAS office. In order to ensure disciplinary depth, at least two of the four courses taken to fulfill the concentration requirement must be in the same department. The remaining two must be thematically related to the selected topic. Students may choose their concentration courses from the list of core courses above and from any courses indicated as at least 50% Middle East-related content. Students may also petition to count up to two courses listed as having 33% Middle East-related content toward their concentration.
3. **Methods Requirement:** Methods and Scope of Research in MES (MES 102) is offered each fall. It provides an introduction to

interdisciplinary research strategies for the collection, interpretation, and analysis of data in the field of Middle Eastern studies. The semester's reading and assignments are devoted to two parallel activities: identifying and analyzing different scholarly approaches to select topics in MES and preparing a prospectus on individual thesis topics, the writing of which will take place in MES 190 or MES H195 under the supervision of an appropriate faculty thesis adviser.

4. **Senior Thesis (one course), MES 190 (4 units):** The required senior thesis (a research paper of 30-40 pages) gives students the opportunity to integrate their concentration coursework and conduct further advanced research on a topic in Middle Eastern studies. To organize and guide their research and writing, students participate in a tutorial with a relevant faculty adviser or with an advanced scholar approved by the MES Chair or Co-Chair. The senior thesis must be completed within one semester. Students are also required to submit a bound copy of the thesis to the Center for Middle Eastern Studies. MES 190 must be taken for a letter grade.
5. **Senior Honors Program (optional), MES H195 (4 units):** Senior students with a grade point average (GPA) of at least 3.6 in courses for the major and 3.5 in all work completed at Berkeley are eligible to participate in the honors program. The program consists of a two-semester sequence: MES 102 and H195. MES 102 is a research methods course in which students determine a thesis topic, review the relevant secondary literature, identify primary source materials, and prepare a substantive prospectus. The honors thesis, a research paper of approximately 50-75 pages, is completed in MES H195 under the direct supervision of a faculty member appropriate to the student's interest. Students must register for both MES 102 and H195 for a letter grade. The original copy of the honors thesis must be submitted on the date agreed upon between the student and the thesis adviser. A bound copy must also be submitted to the Center for Middle Eastern Studies.
6. **Online Research (one course):** MES 194 (Online Research and Digital Production for Middle Eastern Studies). This workshop is intended for Middle Eastern Studies majors undertaking senior thesis projects. It should be taken in the spring semester, while students are enrolled in MES 190/H195: "Senior Thesis in MES." Students in this workshop will explore online research tools and web-building techniques with an aim to complement their theses with multimedia websites that disseminate their findings and demonstrate their capacity for research to a wider audience.

Note: There is no guarantee that students accepted into the honors program will graduate with honors. Honors recommendations are made after graduation and are based on a number of factors including (but not limited to) major GPA, grades received for MES 102 and H195, and faculty adviser recommendations.

Selecting Courses for the MES Major

There are several rules governing course selection for MES. These rules are designed to preserve the character and coherence of the major. Exceptions are rare and can only be approved by the MES Chair or Co-Chair.

MES majors and minors may use any courses listed as having 50% or more Middle East-related content to fulfill their program requirements. No lower division courses other than NES 10 and History 12 may be counted toward the major or the minor unless by prior approval of the MES Chair or Co-Chair.

MES majors may also petition to use up to two courses listed at 33% toward their concentration. Other upper division courses that do not

appear on the course list may also be included subject to petition if they have some Middle East-related content. Petitions for courses with 33% Middle East-related content, as well as petitions for courses not on the course list, must consist of: the "MES Major Concentration Course Petition and an attached course syllabus with all Middle East-related content highlighted. Petitions must be submitted to the MES Chair or Co-Chair. *Note:* Courses with 33% Middle East-related content cannot be used to fulfill core requirements of the major. MES minors must choose courses listed at 50% or more Middle East-related content to complete minor requirements.

Minor in Middle Eastern Studies

The minor in Middle Eastern studies is designed to introduce students to the study of the modern Middle East, understood as comprising the Arab world, Turkey, Iran, and Israel through social science and humanities courses. (Students interested in emphasizing language, archaeology and/or ancient civilizations should investigate minors in the Department of Near Eastern Studies.) The MES minor is open to all undergraduates with the exception of MES majors. Minor applications must be submitted no later than the last day of instruction of the semester immediately preceding the final semester.

MES Minor Course Requirements

One introductory lower-division course from the following: MES 10, MES 20, NES 10, History 12; and five upper-division Middle East-related courses selected from the list of core courses. Any substitutions must be pre-approved by the MES coordinating faculty adviser.

The five upper division courses must be taken from at least two different departments. The study of modern Middle Eastern languages is encouraged; however, there is no language requirement for the MES minor, nor do language courses count toward the minor. The six courses taken to satisfy the MES minor must total 22 or more units. All courses must be taken for a letter grade. MES 97, 99, 197, and 199 may not be used to fulfill minor requirements. At least three of the upper division minor courses must be completed at Berkeley. (All transfer courses must be approved by the MES Chair or Co-Chair.) Students must achieve a minimum overall GPA of 2.0 in the courses used to satisfy minor requirements. Only one course may be double-counted with a major program. Coursework for the minor must be completed within the 130-unit maximum for graduation.

For further information, see the MES minor information sheet, pre-approved course list, and application available in 101 Stephens Hall.

Military Affairs

Special Studies

Chair, Advisory Committee on ROTC: Philip T. Spieth, PhD (Prof. Emeritus, Department of Environmental Science, Policy, and Management)

Department Websites: Military Affairs (<http://military.berkeley.edu>), **Aerospace Studies (Air Force ROTC)** (<http://airforcerotc.berkeley.edu>), **Military Science (Army ROTC)** (<http://army.berkeley.edu>), **Naval Science (Naval ROTC)** (<http://navyrotc.berkeley.edu>)

Overview

The Military Affairs Program, within the Division of Undergraduate and Interdisciplinary Studies (UGIS), comprises the three distinct military officers' commissioning programs: Air Force Reserved Officers' Training Corps (ROTC), Army ROTC, and Naval ROTC. The purpose of the program is to integrate the educational offerings of the separate military services into the regular University curricula. In performing academic functions, the Military Affairs Unit operates the same as any other program within UGIS. Its military faculty members, though nominated by the three military services, are subject to the same selection process as other UC Berkeley faculty members, and the Academic Senate's Committee on Courses must approve its curriculum. Military Affairs courses are open to all Berkeley students, as well as to students from other East Bay colleges under cross-enrollment agreements or through UC Berkeley Extension.

Students interested in the Military Officers Education Program should go to the website (<http://military.berkeley.edu>) or consult the program advisers in the appropriate unit:

Department of Military Sciences: (510) 643-7682

Department of Naval Sciences: (510) 642-3551

Department of Aerospace Studies: (510) 642-3572

Military Officers' Education Program

Military Science (Army ROTC)

Special Studies

Department Office: 173 Hearst Gymnasium, (510) 643-7682

Department Website: Army ROTC (<http://army.berkeley.edu>)

Overview

The Army Officer Education Program offers a variety of credit courses focused on the study of the military as an institution, adventure training opportunities, and a program of laboratory work in practical military skills. The program provides an opportunity to examine service in the Army while earning a baccalaureate degree. A student who completes the program may earn a commission in the Regular Army, Army Reserve, or National Guard.

Graduate or undergraduate students can complete the Military Science requirements through a four-year, three-year, or two-year program. The four-year and three-year programs involve the basic and advanced courses; the two-year program involves only the advanced course. The Army Reserve Officers' Training Course (ROTC) Basic Course consists of two distinct components, the classroom introduction to the army profession and officership of the Military Science and Leadership (MSL) I year, and the experiential examination of leadership, decision-making, and group process of the MSL-II year. Both Basic Course years are designed to enhance student interest in ROTC and the Army. MSL-I lessons provide an overview of the key subjects of pre-commissioning, which will be treated in much greater depth in the Advanced Course. The MSL-II year places cadets in a wide variety of group exercises designed to emphasize various professional leadership competencies and insights. These events are held both inside the classroom and in the outdoor settings. The instructor, acting as facilitator, helps guide student processing, or after-action reviews, of the events to derive the leadership, group dynamics, and problem-solving lessons that the exercises offer. In addition to military skills, practical "life skills" are emphasized throughout the two years. By the end of the Basic Course, cadets should possess a basic understanding of the unique aspects of the officer corps, individual fitness, and healthy lifestyle. The lessons are designed to maximize

cadet participation, inspire intellectual curiosity, and stimulate self-study. Upon completion of the course, cadets are eligible to enter the advanced course.

The Army ROTC Advanced Course is composed of four advanced courses, Military Science (MS) 131, 132, 141, and 142, and the Leadership Development and Assessment Course (LDAC). The Advanced Course is designed to teach all knowledge, skills, and attitudes for commissioning as a new second lieutenant, and to establish a sound foundation for a career as a commissioned Army officer. The content and methods of the Advanced Course assume no prior cadet experience or other military training. This approach is taken because the Advanced Course comprises the minimum curriculum that an individual must complete in order to be commissioned. Advanced Course lessons are carefully sequenced and linked and are progressive in their treatment of key officer knowledge and competencies. Students are encouraged to synthesize lessons to form broader perspectives, deeper insights, and more robust problem-solving abilities by the use of earlier lessons. The sequencing of lessons is also designed to meet the immediate needs of cadets by addressing topics needed for success in the performance of cadet responsibilities early in the MS 131 term and at the LDAC. Topics are designed to facilitate entry into active military service during the MS 142 term.

The two-year program begins with direct placement in the advanced course. It is available to undergraduate or graduate students, who have completed any of the following: enlisted military service; the Army's Leadership Training Course (LTC), which is a four-week ROTC basic camp at Fort Knox, Kentucky; or three years of Junior ROTC. Students must also be academic juniors or higher with at least two academic years left until completion of their degree when they enter the advanced course.

Financial Assistance and Scholarships

All advanced-course students receive a stipend of \$450 (juniors) or \$500 (seniors) monthly (nontaxable) for up to 10 months a year. Students may compete for two, three, or four-year ROTC scholarships. One need not be enrolled in the program to compete for an ROTC scholarship. A scholarship includes money to cover tuition and fees, which can be used instead toward campus room and board in the amount of the authorized tuition and fees; an annual textbook allowance of \$1200; and a monthly stipend. Advanced-course scholarship students go on to receive a commission and serve as officers in the military for at least eight years, either on active duty or in the Army National Guard or Reserves, or a combination of the two.

Military Science courses are open to all University students. Students from other area institutions may participate in the Army ROTC program through cross-enrollment arrangements or through University Extension.

For more information concerning Army ROTC or the Department of Military Science, contact the staff at Hearst Gymnasium or call (510) 643-7682.

Molecular and Cell Biology

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 497 Life Sciences Addition

Chairs: Richard Harland, PhD and David Raulet, PhD

Department Website: Molecular and Cell Biology (<http://mcb.berkeley.edu>)

Overview

The teaching and research activities of the Department of Molecular and Cell Biology (MCB) concern the molecular structures and processes of cellular life and their roles in the function, reproduction, and development of living organisms. This agenda covers a broad range of specialized disciplines, such as biochemistry, microbiology, biophysics, molecular biology, genetics, genomics, bioinformatics, cell biology, developmental biology, immunology, tumor biology and neurobiology. The types of living organisms from which the departmental faculty draws its working materials are as diverse as its disciplinary specializations, ranging from viruses and microbes through plants, roundworms, annelids, arthropods, and mollusks to fish, amphibia, and mammals. The faculty of the department is organized into five divisions: Biochemistry, Biophysics, and Structural Biology; Cell and Developmental Biology; Genetics, Genomics and Development; Immunology and Pathogenesis; and Neurobiology.

Major Requirements

The undergraduate major in molecular and cell biology is composed of five emphases that encompass the diversity of scientific interests of the department's faculty. Some students will take a curriculum that includes more molecular and structural components and others will have a more cellular and systems orientation, but the perspectives and content of all emphases overlap considerably. Students majoring in any emphasis have been highly successful in entering graduate or medical school and in other science- and health-related careers.

Details on the MCB major, its requirements and policies, as well as resources for students, are available in the MCB Undergraduate Affairs Office, 3060 Valley Life Sciences Building, or see the department's (<http://mcb.berkeley.edu>) website (<http://mcb.berkeley.edu/undergrad>).

Lower Division Requirements:

- *For all but BMB Biological Chemistry:* Math 10A-10B; Chemistry 1A/1AL (or Chemistry 4A), 3A/AL-3B/BL; Biology 1A/1AL-1B; and Physics 8A-8B (or Physics 7A-7B). Total lower division units: 39.
- *For BMB Biological Chemistry:* Math 10A-10B; Chemistry 1A/1AL-1B (or Chemistry 4A-4B), Biology 1A/1AL-1B; and Physics 8A-8B (or Physics 7A-7B). Total lower division units: 33. (*Note:* BMB Biological Chemistry majors must take Chemistry 112A-112B in place of Chemistry 3A/AL-3B/BL.)

Upper Division Requirements:

Biochemistry and Molecular Biology Major (BMB)

- *For Biochemistry and Molecular Biology Track:* MCB C100A, 100B, 110, C110L, 140/C148, BMB elective.

- *For Biological Chemistry Track:* Chemistry 112A-112B, MCB C100A, Chemistry 130B, Chemistry 135, MCB C110L, MCB 130A/140.

Cell & Developmental Biology Major (CDB)

- *For Medical Biology and Physiology Track:* MCB 102, 104, 136, 133L, two CDB elective Bs.
- *For Cell and Systems Biology Track:* MCB 102, 104, 130A, 133L, two elective As.

Genetics, Genomics & Development Major (GG&D)

- *For Genetics, Genomics, and Development Track:* MCB C100A, 110, 140, 140L, GG&D elective A/B, elective B.
- *For Developmental Genetics Track:* MCB 102, 104, 141, 140L, GG&D elective A/B, GG&D elective B.

Immunology & Pathogenesis Major (IM&P)

- *For Immunology and Pathogenesis Track:* MCB C100A, 110, 104/140, 150, 150L, IM&P elective C
- *For Infectious Disease Track:* MCB 102, 104, 150, 150L; IM&P elective A, elective B.

Neurobiology Major

- MCB 102, 104, C160, 160L/163; NEURO elective A/B, elective B.

Honors Program

The MCB honors program offers exceptional senior students recognition for outstanding academic achievement and excellence in research. To graduate with honors in the major, students must:

1. Complete at least two credited semesters of research including four to eight units of MCB H196
2. Have a cumulative Berkeley grade point average (GPA) of at least 3.3 in all work completed at UC Berkeley
3. Have at least a 3.5 GPA in the MCB major requirements, or 3.5 in MCB upper-division courses
4. Present their research in an approved forum, such as an MCB symposium, the Undergraduate Poster Session, or other scientific meeting
5. Write an honors thesis approved by an MCB faculty sponsor

Additional information on the honors program is available in the Undergraduate Affairs Office and on the department's website (<http://mcb.berkeley.edu/undergrad/major/honors-program/honors>).

Graduate Program

The department offers a program of graduate study leading to the PhD in molecular and cell biology. This program provides advanced training in the research methods and concepts of the study of the molecular structures and processes of cellular life. The training is intellectually focused, but at the same time offers unusually wide opportunities for varied disciplinary specialization. Undergraduate preparation for admission to the program should correspond to one of the two plans of the departmental undergraduate major detailed above. All students working for the PhD will be required to serve as a graduate student instructor for two semesters during the first three years.

Students seeking detailed information about such matters as admission, curriculum, and sources of financial support should go to the MCB website (<http://mcb.berkeley.edu/grad>) or contact the department by mail

at Graduate Affairs Office, Department of Molecular and Cell Biology, University of California, Berkeley, 299 Life Sciences Addition #3200, Berkeley, CA 94720-3200. E-mail: mcbgao@berkeley.edu.

Research Facilities

The Cancer Research Laboratory is a research institute on the Berkeley campus that carries on a research, teaching, and service program designed to foster interdepartmental participation in cancer research. Some of the Department of Molecular and Cell Biology faculty are also members of the Cancer Research Laboratory. The central research program represents a multidisciplinary approach to an understanding of the mechanism of neoplastic transformation using a variety of systems. Graduate student and postdoctoral research programs are supported in various areas of tumor biology, biochemistry, cell biology, endocrinology, genetics, immunology, molecular biology, and tumor virology. The Cancer Research Laboratory also operates five research facilities:

1. Flow Cytometry Facility for fluorescence activated cell sorting and analysis
2. Molecular Imaging Facility with two-photon microscopes for image analysis
3. Proteomic Mass Spectrometry Facility
4. Immunology DNA Microarray Consortium
5. Gene Targeting Facility for construction of transgenic and chimeric mice

Instrumentation in the facilities is operated by highly trained staff, and training is offered in methods and techniques associated with each facility. For more information, go to this website (<http://crl.berkeley.edu/?q=crl>). (<http://biology.berkeley.edu/crl>)

The Functional Genomics Laboratory at Berkeley was established to allow Berkeley scientists to exploit profound technological advances in the field of genomics. These advances, which include the sequencing of entire genomes of selected model systems and the ability to survey genome-wide patterns of gene expression, now allow the dissection of biological processes at unprecedented levels of detail. In particular, this research facility provides the infrastructure, technologies, and computational resources for the performance of DNA microarray experiments, which allow the analysis of mRNA expression from tens of thousands of genes at a time. The Functional Genomics Laboratory currently possesses all the equipment necessary for conducting DNA microarray experiments, including thermal cyclers, fluidics robots, microarray printing robots, laser scanning microscopes for microarray scanning, an Affymetrix workstation and scanner, and dedicated computers for data analysis and storage of informatics databases. For more information, go to this website (<http://qb3.berkeley.edu/qb3/fgl>). (<http://microarrays.berkeley.edu>)

The Robert D. Ogg Electron Microscope Laboratory is an instructional and research unit of the College of Letters and Science. It houses equipment for transmission electron microscopy (TEM) and scanning electron microscopy (SEM). The staff is skilled not only in the operation and maintenance of instruments but in standard and most specialized techniques of sample preparation. Qualified undergraduates and graduate students, postdoctoral associates, faculty, and research staff in biological and physical sciences, once trained, may make arrangements for use of the instruments in research. Instruction is provided in the form of both classes and individual training. Training is provided as MCB 481B and/or 481C. Registered students and faculty are not charged for training. Nominal charges are made for use of the laboratory for individual

research work. With permission from the director, non-UC personnel can be accepted for training or laboratory use. Equipment can be used outside normal hours. The laboratory provides demonstrations of the electron microscope and preparative techniques for on-campus classes and can make special arrangements for tour groups. For more information, go to this website (<http://em-lab.berkeley.edu/EML>).

Other specialized research facilities include those for x-ray crystallography, nuclear magnetic resonance studies, large-scale fermentation, tissue culture, and DNA sequencing.

The Berkeley Screening Center is a campus-wide facility enabling Berkeley researchers to perform high-throughput genetic and chemical screens. The BSC provides automation, including automated image-acquisition, microscopy, and high-throughput liquid handling technology; support for screen execution and analysis; bioinformatic tools; and siRNA libraries targeting *Drosophila*, mouse, and human genomes, kinomes, and ubiquitinomes.

Music

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 104 Morrison Hall, (510) 642-2678

Chair: Benjamin Brinner, PhD

Department Website: Music (<http://music.berkeley.edu>)

Overview

The Department of Music fosters the cultivation of music on campus through undergraduate and graduate programs of study, and also public concerts and lectures in Hertz Hall, Morrison Hall, and elsewhere. For undergraduates, the department offers a major in music as well as numerous non-major courses for students with little or no previous experience in music. A minor in music draws on courses for either majors or non-majors, depending on student qualifications. For graduate students the department offers programs leading to the MA/PhD or PhD degrees in musical composition, history and literature, or ethnomusicology.

The department's theory courses provide an introduction to the materials of musical composition through ear training, harmony, counterpoint, and analysis. The history and literature courses present a survey of Western music and detailed study of the chief periods of its development. Courses in ethnomusicology provide study of specific areas of world music, both in survey and in depth, and also provide an introduction to the principles and methods of research. Courses in performance (including orchestra, chorus, and various ensembles) offer the opportunity to perform a varied repertory and are open by audition to all students and auditors.

All students who wish to enroll in performance courses should consult the department website for information on audition appointments (<http://music.berkeley.edu/performance/audition.php>).

Note: Students who plan to major in music or take any of the courses designed primarily for music majors must complete the Music Placement Procedure, which is offered each semester the week before instruction begins. Please see the Music Department website (<http://music.berkeley.edu/academics/undergraduate/placementproc.php>) for details. The examination may be taken on an advisory basis.

Prospective music majors are encouraged to begin the music program early, preferably in their freshman year. Staff advisers as well as all members of the faculty are available to consult with students interested in the music program.

The Center for New Music and Audio Technologies (CNMAT) provides computer music and interdisciplinary research in applications of computer technology to sound.

Major

Goals of the Music Major

- Through the total set of requirements for the major, gain knowledge of music in an integrated way, encompassing historical and cultural studies, musicianship and theory, and performance. This prepares students either to pursue a career in some aspect of music or to include music as an integral part of their lives.
- Cultivate musical competency, including literacy (the use of music notation in reading, performing, composing, analyzing, and hearing music).
- Develop skills of critical thinking and writing about music through courses on past and present musical cultures in European and other heritages.
- Create music through performing and composing/improvising.
- Pursue individual interests by upper division elective course selection, including independent study and honors projects.

Lower Division Requirements

1. Musicianship series (49B, 50, 51)
2. Harmony series (49C, 60, 61)

History and Culture Series

Four courses from 74-77 as follows:

1. 76 (18th and 19th centuries)
2. 74 (topics in musics of the world)
3. 75 (music to 1700) or 77 (20th century)
4. 75, 77, or another section of 74

Majors start their program with Music 49, an introductory course that combines musicianship (49B) and harmony (49C).

Upper Division Requirements

1. One seminar from 170-189
2. A minimum of 21 additional units of music major courses from 130-189 and other upper division music courses with an M suffix. Must include at least three semesters of performance from 140-149 and/or 150A-H (excluding 150C). Please see department for approval.

Performance courses may be taken at any point in the student's career. Students are expected to shape their programs according to their particular interests, using the 21 units of music major electives and, if they wish, additional courses from both within and outside the department. Suggested areas of specialization include composition, musics of the world, western music history, conducting, performance, improvisation, theory and analysis, cognitive science, and music technology. At least

once a semester, students will consult with their advisers to discuss their programs.

Note: All courses taken for the major must be taken for a letter grade and receive a final grade of C- or higher.

Honors Program

The Department of Music offers an individualized program leading to the BA degree with honors. Students with a grade point average (GPA) of 3.3 overall and 3.5 in the major may apply to enroll in the honors program in the last two semesters of their undergraduate study. Under course H195, students undertake a special project exceeding the scope of regular coursework for one or two semesters. Application forms with more detailed criteria for approval can be obtained from the department office and must be submitted by the end of the first week of classes in the semester in which the project is started.

Minor

Lower Division Requirements

1. Musicianship 20A
2. Either Musicianship 20B or Harmony 25A
3. A survey course: 26AC or 27 or 29
4. Music major courses: (1) 49B, Musicianship; and (2) 49C, Harmony—may be substituted if the student has placed into 49B on the department musicianship exam. Course 49C must be taken concurrently with or before 49B. See the department website (<http://music.berkeley.edu>) for details.

Upper Division Requirements

A minimum of five upper division music courses from 100-149 satisfying the following:

1. At least one course must be from the 140 series, Performance Ensembles
2. At least one course must not be from the 140 series
3. Courses that may be repeated for credit may count toward the minor a maximum of three times.

Upper division music major courses 151-189 may be substituted if the student has completed the prerequisites.

Note: All courses taken for the minor must be taken for a letter grade. All courses taken for the minor must be taken for a letter grade and receive a final grade of C- or higher. At least three of the five upper division courses must be completed at Berkeley.

When students have satisfied the requirements, they should file a petition in the Department of Music office for confirmation that they have completed the minor program. They should bring a copy of their unofficial transcript.

Graduate Programs

The Department of Music offers programs leading to the MA/PhD and PhD degrees in composition and musicology, the latter with options in the history and literature of western music and ethnomusicology (not in music education or performance). Applications for admission are considered only once a year for the fall semester; the application deadline is December 1.

Nanoscale Science and Engineering

College of Engineering (<http://coe.berkeley.edu/about>)

Office: 550 Sutardja Dai Hall, (510) 643-6681

Chair: Constance Chang-Hasnain, PhD
(Department of Electrical Engineering and Computer Sciences)

Group Website: Nanoscale Science and Engineering (<http://nano.berkeley.edu>)

Overview

The Graduate Group in Nanoscale Science and Engineering (NSE) administers the Designated Emphasis (DE). Faculty associated with the group come from many engineering and physical science departments and share an interest in the growing body of research surrounding the synthesis, characterization, fabrication, and modeling of nanostructured materials and devices.

Doctoral students in associated departments who wish to pursue an emphasis in nanoscale research can add the Designated Emphasis to their PhD degree goals. The DE curriculum is designed to fulfill one of the required area emphases of the student's PhD program while providing additional opportunities for study and collaboration across the associated disciplines.

Coursework requirements include the core course, two electives, participation in a group seminar, and a nano-related thesis. Students usually apply for the DE during their first or second year of study. For a list of participating programs and courses that are included in the curriculum, please visit the department's website (<http://nano.berkeley.edu/educational/DEGradGroup.html>).

Native American Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Program Office: 506 Barrows Hall, (510) 642-6725

Ethnic Studies Department Chair: Catherine Ceniza Choy, PhD

Program Website: Native American Studies (<http://ethnicstudies.berkeley.edu/programs/nas.php>)

Department Website: Ethnic Studies (<http://ethnicstudies.berkeley.edu>)

Overview

The Native American Studies Program exists to broaden the understanding of students interested in the history, culture, and contemporary situations of Native Americans in the United States.

The curriculum has been structured to provide courses that deal with both historical and cultural analysis of Native American cultures and contemporary legal and social institutions that affect Native American

life. The program not only stresses sound academic preparation in the classroom but also allows students the flexibility to take part in community-oriented education through field work or studies directed toward community situations and problems.

Group Major

The major program in Native American Studies leads to an BA degree. Admission to the program requires written approval from a program academic adviser who will assist in working out an appropriate course of study. Consultation with the adviser for admission into the major should be held no later than the first semester of the junior year. Students will be required to outline their academic and professional goals.

Major Requirements

Lower Division

- Ethnic Studies 10AC and 11AC
- Native American Studies 20A and 20B.

Upper Division

- Ethnic Studies 101A, 101B, 103
- Native American Studies 110
- Completion of three elective courses from Native American Studies 100, 101, 102, 104, 120, 120AC, 145, 149, 150, 151, C152, 158, 175, 176, 177, 178, 178AC, 182, 190
- Native American Studies 197 (4 units total)

Honors Program

The Native American Studies Program provides a program leading to the BA degree with honors. A student must have senior standing; a 3.5 GPA overall; and a 3.5 GPA in the major. To complete the degree with honors the student will be required to complete Native American Studies H195A/B and will be graded according to standards determined by the faculty as being of honors quality.

Minor Requirements

- Native American Studies 110
- Completion of four elective courses from Native American Studies 100, 101, 102, 104, 120, 120AC, 145, 149, 150, 151, C152, 158, 175, 176, 177, 178, 178AC, 182, 190

(<http://cnr.berkeley.edu/site>)

Overview

The College of Natural Resources (CNR) educational programs help our majors become our professional colleagues in fields that range from biotechnology to medicine and public health, environmental economics and ecosystem management. All College of Natural Resources majors are built on a strong foundation in a biological, physical or social science field, and students can earn a BS in one of ten different fields. CNR courses and programs are designed to diffuse, or *extend*, scientific and environmental literacy as broadly as possible on the campus and in the community. The College offers undergraduates a small college environment and close working relationships with faculty mentors and advisers. Those relationships include opportunities for hands on research experience, in the field opportunities, and community service. CNR programs also offer many interdisciplinary approaches to problem solving. College faculty and students work together to understand and evaluate the complex interactions between human and natural systems that will meet fundamental human needs for healthy food, potable water, and sustainable agricultural and energy systems. Our biological science programs span a breadth of topics from the microbes through molecular biology to human and environmental health and safety. The college provides extensive opportunities for service learning, civic engagement, field experiences, and through our alumni-supported Sponsored Projects for Undergraduate Research (SPUR) program, financial support for hands on research experience.

The college has four departments: (1) Agriculture and Resource Economics (ARE) provides a basic foundation in economics and policy analysis, as applied to the conservation and management of natural and environmental resources; (2) Environmental Science, Policy, and Management (ESPM) brings diverse expertise to bear on environmental issues from molecular to global scales; (3) Nutritional Science and Toxicology (NST) focuses on research in nutrient function, metabolism, and molecular toxicology; and (4) Plant and Microbial Biology (PMB) centers on plant biology from the molecular to organismal levels, with a direct connection to plant biotechnology. Each department offers graduate

and undergraduate programs, and the faculty participates in numerous interdisciplinary graduate groups.

Freshman Applicants

Undergraduate admission is directed by the Office of Undergraduate Admissions and is based on campuswide admission criteria. The College of Natural Resources itself does not review the files for freshman admission. Please visit the College of Natural Resources website (<http://cnr.berkeley.edu/site>) to review the majors in the College of Natural Resources to see if one of our programs is right for you. Students are encouraged to apply directly to a major, but the College of Natural Resources' undeclared option may also be selected. Send email to cnrteaching@berkeley.edu if you need further advice or assistance.

Transferring into the College from other Berkeley Colleges and Schools

Current UC Berkeley students in good academic standing are welcome to apply for transfer into a major in the College of Natural Resources at any time during the year. Please visit the college's website (<http://cnr.berkeley.edu/site>) to review the majors in the College of Natural Resources to see if one of our programs is right for you, or send email to cnrteaching@berkeley.edu for more information or referral to the major adviser.

If you decide to transfer into the college, complete a "Petition to Change College or Major" form and, if the undergraduate major adviser requests it, any other relevant information. Forms are available at the Office of Instruction and Student Affairs, 260 Mulford Hall, from the offices of any school or college, and from the Registrar at 120 Sproul Hall. You may also download forms from the CNR website (<http://cnr.berkeley.edu/site>). If you are accepted, you will receive email notification from the College of Natural Resources and will be eligible for transfer immediately.

Transferring into the College of Natural Resources from Off-Campus Schools and Programs

The College of Natural Resources welcomes transfer applicants to each of its undergraduate majors. Priority for admission is given to students with excellent preparation for a major, as transfer students are not admitted into undeclared status.

Prospective transfer applicants should carefully review the requirements for CNR majors online on the College of Natural Resources website (<http://cnr.berkeley.edu/site>), and at [assist.org](http://www.assist.org/web-assist/welcome.html) (<http://www.assist.org/web-assist/welcome.html>). Juniors wishing to transfer into CNR should also contact the adviser for the major in which they are interested to help determine whether they have met the appropriate prerequisite course requirements and to discuss their options. In some majors, IGETC (<http://admission.universityofcalifornia.edu/transfer/requirements/additional-requirements/igetc>) can be used to meet breadth requirements. Send email to cnrteaching@berkeley.edu for referral to a major adviser or for general advice or assistance.

Transfer applicants will be evaluated on the basis of the strength of their academic preparation, including the number of fulfilled requirements for the major to which they have applied, the GPA in the required courses, and their cumulative GPA. Transfer students apply through the campus Office of Undergraduate Admissions. Please see the Office of Undergraduate Admissions website (<http://admissions.berkeley.edu/transferstudents>) for information about how to apply.

Undergraduate Majors

Since its origin as one of the cornerstones of the University of California, the College of Natural Resources has developed multidisciplinary programs that encompass the physical, biological, and social sciences, with a strong commitment to undergraduate teaching. The college is small enough to provide individual focus and attention through faculty advising, small class size, and dedicated faculty. Undergraduate programs include professional programs designed for students with interests in careers like forestry and dietetics. Some majors provide a foundation in sciences that prepares students for graduate and professional work in biology, medicine and other health sciences, economics, or numerous environmental fields. Most are integrative programs that emphasize flexible, innovative approaches. For more information about the majors, contact the Office of Instruction and Student Affairs at 260 Mulford Hall; see the College of Natural Resources website (<http://cnr.berkeley.edu/site>); call (510) 642-0542; or email cnrteaching@berkeley.edu.

Offered by the Department of Agricultural and Resource Economics (p. 43)

- **Environmental Economics and Policy (EEP)** is a fundamental education in economics and statistics, with a focus in mathematics. Students develop a sense of how the choices people make affect the environment, of the conflict between economic development and environmental quality, and how such conflicts can be resolved. This major is also offered through the College of Letters and Science (<http://ls.berkeley.edu>).

Offered by the Department of Environmental Science, Policy, and Management (ESPM) (p. 101)

- **Conservation and Resource Studies (CRS)** is ideal for highly motivated students seeking an individualized program. Students work with faculty to develop unique areas of study focused on environmental problems requiring cross-disciplinary approaches.
- **Environmental Sciences (ES)** provides a broad, comprehensive education in the fundamentals of biology, chemistry, physics, mathematics, and social science. The breadth of this major allows study of the interactions between human activities and biological and physical environments on all scales, from local to global. The major culminates with a senior research project.
- **Forestry and Natural Resources (FNR)** is the result of a merger of the former majors in forestry and in resource management. Specializations in natural science and human dimensions are offered in the study of the ecology and management of forest, woodland, and grassland ecosystems. Emphases in wildlife biology, water policy, fire science, ecosystem restoration, environmental justice, remote sensing and geographical information systems, and rural sociology are available. This major prepares students for graduate school and careers in environmental consulting, public agencies, nonprofit conservation organizations, and private companies, and for professional careers in forestry, wildlife, and range management. Participation in an eight-week summer field program in the northern Sierra Nevada is required.
- **Molecular Environmental Biology (MEB)** introduces students to the organization and function of biological organisms at the molecular, cellular, organismal, and ecological levels, and provides an understanding of the means in which organisms function in their environment. This major is a good choice for pre-med and pre-vet students, for students interested in graduate education in a biological area, as well as students interested in general biology.
- **Society and Environment (S & E)** major introduces students to the main approaches and theory for environmental social sciences,

including how social science tools can be applied to environmental problems, and how social science theories contribute to understanding environmental problems. At the upper division level there are three major areas of concentration. Students are exposed to all three areas and choose to focus in one: U.S. Environmental Policy and Management, Global Environmental Politics, or Environmental Justice and Development.

Offered by the Department of Nutritional Sciences and Toxicology (NST) (p. 170)

- **Nutritional Sciences and Toxicology (NST)** has three areas of specialization: Physiology and Metabolism (Metabolic Biology), Didactic Training Program in Dietetics and Molecular Toxicology. Physiology and Metabolism combines a foundation in natural sciences with advanced coursework in nutrition, the study of nutrient utilization, and food science. Dietetics students at the junior and senior levels take coursework emphasizing nutrition and the application of this knowledge through dietetic practice. Molecular Toxicology focuses on hazardous and beneficial effects on natural and man-made toxic agents. From industrially produced environmental contaminants and designer drugs to naturally occurring herbs and food products, this field of study applies molecular and computational methods so that students better understand how these agents interact with living organisms and what should be done to ensure human health and safety.

Offered by the Department of Plant and Microbial Biology (PMB) (p. 177)

- **Genetics and Plant Biology (GPB)** combines traditional plant sciences—physiology, biology, and anatomy—with newer biological disciplines such as genetics, molecular biology, and biochemistry for understanding the role plants play in the global environment. The major includes the spectrum of cellular and organismal aspects of plants, as well as cellular development, molecular genetics, and agricultural biotechnology.
- **Microbial Biology (MB)** is for students interested in research positions in government, industry, and academia. It is excellent for pre-med and pre-vet students, for students interested in biology in general, for students interested in pursuing postgraduate education in biology, and for students interested in teaching biology at the secondary-school level.

Major Requirements

Detailed course requirements for each major, along with college requirements for the BS degree, are available from the Office of Instruction and Student Affairs, University of California, Berkeley; 260 Mulford Hall #3100, Berkeley, CA 94720-3100. For further information, call the Office of Instruction and Student Affairs at (510) 642-0542, see the CNR website (<http://cnr.berkeley.edu/site>), or email cnrteaching@berkeley.edu.

Minor Programs

The college offers seven minors in Conservation and Resource Studies, Energy and Resources, Environmental Economics and Policy, Forestry, Geographic Information Systems and Technology, Nutritional Sciences, and Toxicology. For information, please see the CNR website (<http://cnr.berkeley.edu/site>).

Undergraduate Advisers

Undergraduate advisers in each major serve as a crucial link between students and the college. Advisers are available throughout the year to assist students in planning a program best suited to their needs and interests. All students must see their adviser at least once each semester for advice in planning their academic programs.

TeleBears Registration

Students must have adviser approval before filing their TeleBears registration lists. The minimum course load is 13 units, and the maximum is 19.5. Students that need to take units outside of the approved course load must meet with the adviser.

Graduate Programs

Academic and professional graduate degree programs available in the College of Natural Resources are listed below. Inquiries regarding details of the various graduate programs may be directed to the appropriate graduate adviser.

Ad Hoc Interdisciplinary Doctoral Program

Administered by the dean of the Graduate Division

Agricultural and Resource Economics

207 Giannini Hall, (510) 642-7238

Head Adviser: Jeremy Magruder, PhD

Environmental Science, Policy, and Management

137 Mulford Hall, (510) 643-2626

Interim Head Adviser: Nicholas Mills, PhD

Forestry (MF)

133 Mulford Hall, (510) 642-6410

Head Adviser: Scott Stephens, PhD

Master of Development Practice

311 Wellman Hall, (510) 642-1585

Executive Director: David Zilberman, PhD

Microbiology

111C Koshland Hall, (510) 642-5167

Head Adviser: Pat Zambryski, PhD

Metabolic Biology

124 Morgan Hall, (510) 643-2863

Head Adviser: Joseph Napoli, PhD

Molecular Toxicology

124 Morgan Hall, (510) 643-2863

Head Adviser: Martyn Smith, PhD

Plant Biology

111E Koshland Hall, (510) 642-5167

Head Adviser: Pat Zambryski, PhD

Range Management (MS)

133 Mulford Hall, (510) 642-6410

Head Adviser: James Bartolome, PhD

Naval Science (Naval ROTC)

Special Studies

**Department Office: 152 Hearst
Gymnasium, (510) 642-3551**

Department Website: Naval ROTC (<http://navyrotc.berkeley.edu>)

Overview

The Department of Naval Science offers several programs of instruction for men and women leading to commissions in the U.S. Navy or U.S. Marine Corps. Naval Science courses are open to all university students or may be taken through UC Berkeley Extension.

Students enrolled in one of the four-year Naval ROTC programs will normally complete the following courses during their first two years as part of their overall academic load: NS 1, 2, 3, and 10.

Navy Option students enrolled in either the four-year or two-year program will normally complete the following courses during their junior and senior years: NS 12A, 12B, 401 and 412. Marine Option students will participate in a Marine seminar and complete the History of Littoral Warfare (MA 154) and Evolution of Warfare (MA 20). All Navy Option scholarship students must complete one year of calculus and one year of calculus-based physics by the end of their sophomore and junior years respectively.

Students are also required to attend weekly professional development laboratories. These three-hour sessions offer the student midshipman an active role in the management and direction of the midshipman battalion and provide time for the midshipmen to explore professional topics. Student midshipmen participate in four-to-six week summer training cruises throughout the world. At sea they apply theoretical aspects of their education and training to the real world environment of a Navy ship. Marine Option midshipmen attend Marine Corps Officer Candidates School in the summer between their junior and senior year.

Currently, there are five programs available:

1. **Naval Reserved Officers' Training Corps (NROTC) Five-Year Scholarship Program:** Nationwide competition is open to physically qualified men and women between the ages of 17 and 21 with waivers available for prior active duty to maximum commissioning year age of 29. U.S. citizenship is required. High school seniors and college freshmen are eligible to apply. Successful applicants receive full payment of tuition, fees, books and \$250-\$400 per month during the school year. Three summer training cruises are required. Upon graduation, the student receives a commission in the Navy or Marine Corps with a four-year active duty obligation. (Obligated service is not incurred until the start of the sophomore year in the five-year scholarship program.) Application deadline is December 1. Apply online here. (<http://www.nrotc.navy.mil>)
2. **Tweeddale Scholarship Program:** This program provides NROTC Navy scholarship benefits specifically for students who are affiliated with an engineering/technical discipline program or who are members of an underrepresented minority group. Applicants cannot have been affiliated with NROTC or any other officer accession program. Students must be currently enrolled and must have completed one college-level mathematics course and one semester/term of college coursework with all course grades of "C" or better. These scholarships can be conditionally granted by the Professor of Naval Science at 152 Hearst Gymnasium following an interview and

screening process. Accepted applicants must meet NROTC physical qualification standards and will be required to take Naval Science courses. For additional details, call (510) 642-3551.

3. **NROTC Four-Year College Program:** Open to physically qualified men and women between the ages of 17 and 23, with the same active duty age waiver possible as above. Participants receive uniforms, Naval Science books, and a \$350 and \$400-per-month stipend in their junior and senior years, respectively. They complete one summer training cruise after their junior year. Upon graduation, the student receives a commission in the Navy or Marine Corps Reserve with a three-year active duty obligation. (Obligated service is not incurred until the start of the junior year in the five-year college program.) Scholarships may be offered to highly qualified college program students.
4. **NROTC Two-Year Scholarship Program:** Nationwide competition open to academically and physically qualified men and women who will be entering their junior year (or their third year in a five-year curriculum). US citizenship is required. One year of calculus is required before entrance into the program. Two-year scholarship students must not reach their 25th birthday before June 30 of the year in which graduation and commissioning are anticipated. Waivers to age 29, however, are possible for prior service. Candidates for the two-year scholarship attend a six-week summer training period at the Naval Science Institute in Newport, Rhode Island, before the start of their junior year. Graduates of the Naval Science Institute will receive full payment of tuition, fees, books, and a \$350 and \$400-per-month stipend during their junior and senior years, respectively. One summer training cruise is required. Upon graduation, the student receives a commission in the Navy or Marine Corps with a five-year active duty obligation. Application deadline is normally March 1 of the sophomore year.
5. **NROTC Two-Year College Program:** Open to physically and academically qualified men and women who will be entering their junior year of undergraduate study (*or their third year in a five-year curriculum*). The age limit is the same as above. US citizenship is required. Candidates attend the Naval Science Institute in Newport, Rhode Island, during the summer before their junior year. Graduates of Naval Science Institute enroll in the NROTC unit as juniors and receive uniforms, Naval Science books, and a \$350 and \$400-per-month stipend in their junior and senior years, respectively. One summer training cruise is required. Upon graduation, the student receives a commission in the Naval or Marine Corps with a five-year active duty obligation. Application deadline is normally March 1 of the sophomore year.

For further information, call (510) 642-3551.

Near Eastern Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 250 Barrows Hall, (510) 642-3757

Chair: Margaret Larkin, PhD

Department Website: Near Eastern Studies (<http://neareastern.berkeley.edu>)

Related Course Descriptions:

Arabic courses (p. 275)

Cuneiform courses (p. 455)

Egyptian courses (p. 540)

Hebrew courses (p. 733)

Iranian courses (p. 860)

Persian courses (p. 1136)

Semitics courses (p. 1311)

Turkish courses (p. 1421)

Overview

Instruction in the Department of Near Eastern Studies is concerned with the languages, literatures, and civilizations of the ancient, medieval, and modern Near East. The department offers specialized training in archaeology, art history, Assyriology, Egyptology, Iranian studies, Judaic and Islamic studies, comparative Semitics, Turkish, Hebrew, Arabic, and Persian. For students in other disciplines, the department provides a wide variety of courses to supplement such related fields as anthropology, linguistics, art history, history, political science, comparative literature, and folklore. Lecture courses offered by the department present a comprehensive body of information on past and present Near Eastern civilizations. Many of the courses taught in the department are restricted to a small number of students and thus afford an opportunity for close interaction with the instructing staff.

For a description of interdisciplinary graduate programs in which the department participates, please see the Graduate Education (<http://catalog.berkeley.edu/education.html>) section of this Bulletin.

Cooperative arrangements between the University and the nearby Graduate Theological Union enable students in the department to use the extensive library holdings of the Union and supplement their programs with selected courses in Palestinian archaeology, Biblical studies, and Semitic epigraphy and philology.

The Majors

Note: NES 10 is required for all majors in the department. All courses used to meet upper division major requirements must be at least three units and taken for a letter grade.

The Major in Near Eastern Languages and Literatures

Major guidelines for each discipline are available in the departmental office. With the consent of the department, portions of the requirements may be fulfilled by related courses in other departments.

- **Arabic, Hebrew, and Persian:** *Required:* the elementary courses in the language, or their equivalents. It is recommended that these be taken beginning in the freshman year.

The major requires NES 10 and 24-28 units in upper division language and literature courses (taught in the language) and upper division NES courses (taught in English).

- **Egyptology:** The major requires NES 10 and 30 units in upper division language and lecture courses.

The Major in Ancient Egyptian and Near Eastern Art and Archaeology

- **Ancient Near Eastern Art and Archaeology:** NES 10 and 15 are required. NES 18, 25 and Anthropology 2 are recommended. Students must complete eight upper division courses from a list of courses in the department office. If, and only if, the courses listed are not available during the students' junior and senior years, the students may select any language or lecture course in the field of ancient Near Eastern Studies with the approval of the undergraduate adviser.
- **Egyptian Art and Archaeology:** This emphasis requires that students take NES 10, 18, 102A-102B, and Egyptian 100A-100B, 101A-101B. NES 15 and Anthropology 2 are highly recommended. In addition, students must take two upper division courses from a list available in the department office. Some background in French, German, and/or Arabic is recommended.

The Major in Near Eastern Civilizations

- **Ancient Near Eastern Civilizations:** This emphasis requires NES 10; one course from NES 15, 18, 25, or 34; and eight upper division courses from a list available in the department office. Up to two courses on the list for Islamic Civilizations may be substituted with the approval of the NES department undergraduate adviser.
- **Islamic Civilizations:** NES 10 is required. NES C26 and C92 are recommended. Students must complete nine upper division courses in the areas of Religion, History and Culture, Arts and Literature, and Near Eastern languages, from a list available in the department office. Up to two courses on the list for Ancient Near Eastern Civilizations may be substituted with the approval of the NES department undergraduate adviser.

Honors Program

With the consent of the undergraduate adviser, a student with an overall grade point average (GPA) of 3.3 or higher and a GPA of 3.51 or higher in courses completed in the major may apply for admission to the honors program. The requirements of this program include the completion of the honors thesis during the student's senior year. For a complete description of the program, please inquire at the department office.

The Minors

In each of the language minor programs, Option A is open to students with little or no background in the language. Option B is for students who have completed the equivalent of two years of university-level coursework in the language. Students may pursue the major in Ancient Near Eastern archaeology and art history and a minor in one of the department's language programs, even though both are administered by the Department of Near Eastern Studies; students may *not* pursue a major in one of the Near Eastern Studies languages and a minor in another. Students may pursue the major in Near Eastern languages and literatures and a minor in Ancient Egyptian and Near Eastern civilizations. For lists of courses which may be taken to fulfill the minor course requirements, please inquire at the department office.

The Minor in Arabic, Option A: *Required courses:* Arabic 20A-20B (in addition to Arabic 1A-1B). *Five upper division courses:* Arabic 100A; two

one-semester literature courses (in Arabic); two one-semester courses in Arabic culture/history.

The Minor in Arabic, Option B: *Required courses:* Seven upper division courses: five one-semester courses in Arabic language or literature (in Arabic); two one-semester courses in Arabic culture/history.

The Minor in Hebrew, Option A: *Required courses:* Hebrew 20A-20B (in addition to Hebrew 1A-1B). *Five upper division courses:* Hebrew 100A-100B, Hebrew 104A-104B; a one-semester course in Hebrew culture/history.

The Minor in Hebrew, Option B: *Required courses:* Seven upper division courses: five one-semester courses in Hebrew language or literature (in Hebrew); two one-semester courses in Hebrew culture/history.

The Minor in Persian, Option A: *Required courses:* Persian 1A-1B. *Five upper division courses:* Persian 100A-100B; Persian 101A-101B; a one-semester course in Persian culture/history.

The Minor in Persian, Option B: *Required courses:* Seven upper division courses: five one-semester courses in Persian literature (in Persian); two one-semester courses in Persian culture/history.

The Minor in Turkish, Option A: *Required courses:* Turkish 1A-1B. *Five upper division courses:* Turkish 100A-100B; Turkish 101A-101B or Turkish 102A-102B; a one-semester course in Turkish culture/history.

The Minor in Turkish, Option B: *Required courses:* Seven upper division courses: five one-semester courses in Turkish literature (in Turkish); two one-semester courses in Turkish culture/history.

The Minor in Ancient Egyptian and Near Eastern Civilizations: *Required courses:* NES 15 or 18, and five semesters of upper division courses chosen from a list available at the department office. NES 25 and 34 are recommended.

Graduate Programs

Graduate programs leading to the MA and PhD degrees are offered in the following languages and literatures: Arabic, Hebrew, and Persian. The same degrees are also offered in the following fields of Near Eastern Studies: archaeology, art history, cuneiform, Biblical and Judaic studies, Old Iranian studies, comparative Semitics, Egyptology, and Islamic studies.

Graduate Degrees

Applicants for graduate study should have fulfilled the equivalent of the departmental requirements for the BA in their proposed area of study. The department encourages its own graduate students to take advantage of courses in other departments which are relevant to their disciplines and fields of study. Upon approval by the graduate adviser, such courses may be recognized as fulfilling portions of the departmental coursework requirements for graduate degrees.

The MA Degree

The MA is obtained according to the Graduate Division's Plan II. A complete description of Graduate Division requirements for this degree is found in the Graduate Education section of this catalog. In addition to the requirements outlined for Plan II, students must pass a reading examination in either French or German (another language may be substituted on approval of the major adviser).

Plan II requires at least 24 units of coursework. For students in the language programs, at least 12 of their 24 units must be in 200-series courses in the major and three semesters of work in a Near Eastern language other than the student's major language. For students in archaeology and art history programs with a Near Eastern emphasis, at least 12 of the 24 units must be in 200-series courses and three semesters must be drawn from NES 220A-220B and 223A-223B. For students in archaeology and art history programs with an Egyptian emphasis, at least 12 of the 24 units must be in 200-series courses, and the required 24 units must include two semesters of work in the ancient Egyptian language beyond the second-year level. The 12 200-series units must be from seminar courses (one 200-level Egyptian language course may count toward the seminar requirement). Two scholarly papers written independently or in connection with coursework will also be required. Written comprehensive examinations are required of all students to test working knowledge of pertinent languages; general knowledge of the history and civilization of area of emphasis; knowledge of other subjects suggested by the student's degree committee.

The PhD Degree

Students must have completed an appropriate MA program to be eligible for the PhD program. Admission to candidacy for the PhD degree depends on successful completion of the following requirements:

1. PhD coursework
2. Reading examinations in French and German (proficiency in a European or other modern language germane to the student's field of emphasis may be substituted on approval of the graduate adviser and the student's advisory committee)
3. Proficiency in one or two Near Eastern languages, as required for the student's field of study (For language majors, proficiency will be tested through the written preliminary examinations, which will cover at least two Near Eastern languages. For Egyptian archaeology and art history majors, proficiency will be tested through a written examination in Egyptian and/or Coptic which must be completed and passed no later than the semester before the student's qualifying examination. Archaeology and art history student's (except those in Egyptian archaeology) who have not completed a minimum of two years of coursework in an ancient or modern Near Eastern language must pass a proficiency examination in an ancient or modern Near Eastern language before taking the preliminary examinations.)
4. Fieldwork (for art history and archaeology majors)
5. Written preliminary examination and the oral qualifying examination
6. A prospectus of the dissertation approved by the student's proposed PhD dissertation committee

After admission to candidacy, the student is to fulfill the requirements for the dissertation as outlined in the Graduate Education (p. 16) section of this Bulletin.

For further information on the graduate programs, please refer to the following page (http://nes.berkeley.edu/graduate_study.html).

Special Programs

The Graduate Program in Ancient History and Mediterranean Archaeology

This program is available to students with backgrounds in ancient history and archaeology. The ancient studies faculty of the Department of Near Eastern Studies are faculty for this program. See the AHMA (p. 45) section in this Bulletin (p. 45) for a full description of this program.

Neuroscience

Interdepartmental Graduate Group
Group Office: 450 Li Ka Shing, (510)
642-8915

Chair: Dan Feldman, PhD (Department of Molecular and Cell Biology)

Group Website: Neuroscience (<http://neuroscience.berkeley.edu/grad>)

Graduate Program

The Neuroscience Graduate Program at UC Berkeley is a unique, diverse PhD training program that offers intensive, integrated training in multiple areas of neuroscience research.

The program involves more than 50 faculty from different campus departments, with expertise ranging from molecular and cellular neuroscience, to developmental neuroscience, systems and computational neuroscience, and human cognitive neuroscience.

We provide a highly interdisciplinary, intellectually dynamic training environment of coursework, research training, and mentoring, within a strong research program that produces fundamental advances in knowledge and cutting-edge techniques.

We welcome highly qualified applicants to join us in better understanding the brain and its functions and disorders.

Faculty in the Neuroscience Graduate Program are involved in three broad research areas: Cellular, Molecular, and Developmental Neuroscience; Systems and Computational Neuroscience; and Cognition, Brain, and Behavior. Individual faculty may be involved in more than one research area.

Applicants to the program should have a bachelor's degree in science from a four-year college and at least one year of laboratory experience. Applicants are required to submit Graduate Record Examination (GRE) General Test scores, and are strongly encouraged to submit one GRE Subject Test score (in biochemistry and cell biology, chemistry, psychology, biology, computer science, or physics).

During the first two years in the program, each student is required to take a minimum of three 3- or 4-unit graduate (200-level) courses chosen from a wide range of specialized graduate courses. Graduate advisers help students tailor their coursework to their individual needs and interests. To ensure breadth in didactic coursework, however, students are required to choose courses that are distributed between at least two subdisciplines of neuroscience (i.e., cell, molecular, and developmental neuroscience; systems and computational neuroscience; and cognition, brain and behavior).

Note: Students, with approval from the graduate adviser, may take courses in other specialized areas important for developing their research foundation, such as biochemistry, genetics, statistics, physics, bioengineering, etc. Independent research in different laboratories starts at the beginning of the first year.

Students are also required to serve as graduate student instructors for at least two semesters during their first three years of study. Graduate students advance to candidacy for the PhD by passing a qualifying

examination at the end of the second year in the program. Students are expected to finish their degree within 5 to 6 years.

For detailed information on the graduate program, visit the website, (<http://neuroscience.berkeley.edu/grad/home>) email tleonard@berkeley.edu, or mail your inquiries to Graduate Student Affairs, Neuroscience Institute, UC Berkeley, 450 Li Ka Shing, Berkeley, CA 94720-3370.

Neuroscience PhD Progress through Degree
(http://neuroscience.berkeley.edu/grad/current/pdf/Progress_through_degree.pdf) (PDF)

The Neuroscience Graduate Program has no designated lecture courses, but various affiliated departments offer a wide range of options. A selection is listed below. (For more details, see individual course descriptions.)

General/Survey Courses: Responsible Conduct of Research (MCB 293C).

Cellular, Molecular, and Developmental Neuroscience Courses: Advanced Cellular and Molecular Neurobiology (MCB 261), Advanced Cell Biology (MCB 230), Advanced Genetics (MCB 240), Biochemistry and Molecular Biology (MCB 200), Advanced Developmental Neurobiology (MCB 263), and Advanced Developmental Biology (MCB 231).

Systems and Computational Neuroscience Courses: Advanced Topics in Systems Neuroscience (MCB 262), Functional Neuroanatomy and Laboratory (IB 245 and IB 245L), Behavioral Neuroscience (Psych 210B), Sensory Systems (Psych 210C), Neuronal Mechanisms of Learning and Memory (Psych 290Z), and Neural Computation (VS 265).

Cognition, Brain, and Behavior Neuroscience Courses: Cognitive Neuroscience (Psych 210A), Learning and Memory (Psych 210D), Thought and Language (Psych 210E), Hormones and Behavior (Psych 211), Functional MRI Methods (Psych 214), Proseminar: Biological, Cognitive, and Language Development (Psych 240A), and Biological and Public Health Aspects of Alzheimer's Disease (PH C217).

Recommended Statistical Methods Courses: Data Analysis (Psych 205), Linear Systems Theory (EECS 221A), Random Processes and Systems (EECS 226A), Information Theory and Coding (EECS 229), Analysis of Time Series (Stat 248), and Statistical Learning Theory (Stat 241A).

Other selected seminar courses include: Graduate Seminar on Specialized Neuroscience Topics (MCB 290 series), Graduate Seminar on Specialized Topics in Biological and Cognitive Psychology (Psych 290 series), and Special Seminars in Vision Science (VS 298 series).

The Neuroscience Graduate Program also sponsors an annual campuswide Neuroscience retreat, weekly seminar series, and a graduate student Neuroscience Journal Club.

New Media

Graduate Division (<http://grad.berkeley.edu>)

**Program Office: 426 Sutardja Dai Hall,
(510) 495-3505**

**Director: Greg Niemeyer, MFA (Department of
Practice of Art)**

**Program Website: Berkeley Center for New Media
(<http://bcnm.berkeley.edu>)**

Overview

The Berkeley Center for New Media (BCNM) is a focal point for research and teaching about new media, led by a highly trans-disciplinary community of 120 affiliated faculty, advisers, and scholars, from 35 UC Berkeley departments, including Architecture, Philosophy, Film Studies, Art History, Performance Studies, and Music; the Schools of Engineering, Information, Journalism, and Law; and the Berkeley Art Museum. BCNM is located at a global center for design and information technology and based in a public research university known for alternative thinking.

Our mission is to critically analyze and help shape developments in new media from cross-disciplinary and global perspectives that emphasize humanities and the public interest.

All media (Latin for "middle elements") facilitate transformation: by definition, media are transformative. From the stone tablet to the printing press to the Internet, media have become increasingly reconfigurable. The value of a medium is often related to its capacity for reconfiguration. To claim a medium as "new" is to posit a meaningful improvement over prior media. Thus new media are highly reconfigurable and doubly transformative: they achieve a transformation of prior modes of transformation.

New media often produce new perceptions, new behaviors, and new insights, yet new media remain deeply rooted in powerful aesthetic, cultural, and political forces. As media transform, they often distort. Sophocles observed, "Nothing vast enters the life of mortals without a curse." BCNM actively engages scholars who critically examine the opportunities and risks associated with new media and who consider how new media can constructively benefit education, political engagement, privacy, and aesthetic experience.

BCNM catalyzes research, educates future leaders, and facilitates public discourse through courses, lectures, symposia, and special events. BCNM has established cross-disciplinary faculty positions and a special program for PhD students. The BCNM supports academic modes of scholarship while encouraging unorthodox artworks, designs, and experiments. By reaching out to students, researchers, industry figures, and the broader public, BCNM stimulates new perspectives on contemporary new media.

Graduate Programs

Designated Emphasis (DE)

BCNM's designated emphasis is for selected students from any Berkeley doctoral program. It provides enhanced skills in analyzing and/or designing future media with an awareness of historical, social, cultural, and other perspectives that might not be visible from any single disciplinary point of view. Students take three core courses—(1) Theory and History of New Media, (2) Questioning New Media, and (3) Methods

of New Media – to fulfill their breadth requirements in the areas of humanities, art/design, and technology. Students must also enroll in two elective courses that significantly deal with new media. Students completing the PhD program receive the designation "in New Media" on their diplomas.

Graduate Certificate

Designed to enhance interdisciplinary graduate studies at UC Berkeley, the Graduate Certificate Program emphasizes critical understanding of the nature and implications of new media, broadly conceived, drawing on theories and methodologies from across the disciplinary spectrum—the arts, the humanities and social sciences, and science and engineering. The Graduate Certificate in New Media provides students with an introduction to the different facets of new media research and an ensuing competitive edge for some of the most desirable jobs in industry and academia. Affiliation with the New Media faculty and student community may enhance opportunities for innovative and collaborative research.

The Graduate Certificate in New Media serves as an adjunct to existing master's degree-granting programs. Upon successful completion of all requirements, you will receive a certificate with the designation: "Graduate Certificate Program in New Media." This designation certifies that you have participated in, and successfully completed, a Certificate Program in New Media in addition to your home department's requirements for the master's degree. The award of the certificate will also be posted to your transcript.

For information regarding curricula and program requirements, please see the program's website (<http://bcnm.berkeley.edu>).

Nuclear Engineering

College of Engineering (<http://coe.berkeley.edu>)

**Department Office: 4153 Etcheverry Hall,
(510) 642-5010**

Chair: Karl van Bibber, PhD

Department Website: Nuclear Engineering (<http://www.nuc.berkeley.edu>)

Overview

Nuclear engineering is concerned with the applications of nuclear reactions and radiation to biomedical devices, energy systems, and environmental concerns and issues. The scope of the field includes the design, analysis, and operation of nuclear reactors and their nuclear fuel cycles, devices for the detection, prevention, and treatment of disease, and systems for the treatment and disposal of high-level radioactive waste. The principles taught in the nuclear engineering courses are applicable both to nuclear fission reactors and to the development of nuclear fusion as an energy source. The nuclear engineering courses deal with the physical principles of nuclear reactions, the interaction of nuclear radiation with matter, the behavior of neutrons in reactor media, the thermal and hydrodynamic principles of heat extraction, the properties of nuclear materials, and operations and processes in nuclear fuel cycles, reactor design, and thermonuclear fusion. These subjects are taught in courses at the undergraduate and graduate levels. Other courses include radiation protection, environmental effects, nuclear safety, risk analysis, high-level radioactive waste disposal, medical imaging, biophysics, and biomedical devices.

See the "College of Engineering Undergraduate Guide" (<http://coe.berkeley.edu/guide>) and our website (<http://www.nuc.berkeley.edu>) for more information.

Undergraduate Program

Undergraduates can major in general nuclear engineering or the nuclear engineering joint major programs. Students can major in the joint major programs beginning in their junior year. The joint major programs are jointly offered through nuclear engineering and the following fields of engineering: mechanical, electrical, materials science, or chemical. Graduate programs leading to the master's and doctoral degrees involve advanced coursework in nuclear engineering and in allied fields and direct participation in research under supervision of the nuclear engineering faculty.

The BS program is accredited in nuclear engineering by the Engineering Accreditation Commission of the ABET, Inc., 111 Market Place, Suite 1050, Baltimore, MD 21202-4012; (410) 347-7700.

Major Requirements

Students must complete a minimum of 120 units, in which they must satisfy the University of California and UC Berkeley campus requirements outlined in this Bulletin. In addition, students must complete the requirements for the College of Engineering and the general nuclear engineering program. Full details on these requirements are found in the "College of Engineering Undergraduate Guide" (<http://coe.berkeley.edu/guide>) and our website (<http://www.nuc.berkeley.edu>) for more information.

Graduate Study

Admission to the graduate program in nuclear engineering is available to qualified individuals who have obtained a bachelor's degree from a recognized institution in one of the fields of engineering or the physical sciences. For all programs, required preparation in undergraduate coursework includes mathematics through partial differential equations and advanced analysis, nuclear reactions, and thermodynamics. Admission is granted on the basis of undergraduate and graduate records (if any), statement of purpose, record of work experience and professional activities, letters of recommendation, and the Graduate Record Examination (GRE) and Test of English as a Foreign Language (TOEFL), if applicable. The graduate program is divisible into 11 areas, each representing an important aspect of nuclear technology: applied nuclear physics; bionuclear and radiological physics; nuclear materials and chemistry; energy and the environment; fission reactor analysis; fusion science and technology; nuclear thermal hydraulics; laser, particle beam, and plasma technologies; fuel cycles and radioactive waste; risk, safety, and systems analysis; and ethics and the impact of technology on society. Coursework and research opportunities are available in each area. A program of study is selected for each individual student. The program is chosen so that qualified students make maximum progress in preparation for the doctoral examinations while gaining valuable experience in engineering research for both the master's (MS or MEng) and doctoral (PhD or DEng) programs. Further information may be obtained from the Department of Nuclear Engineering Graduate Office, 4149 Etcheverry Hall and on our website. (<http://www.nuc.berkeley.edu>)

Note: In addition to the courses listed under the Department of Nuclear Engineering, the department also offers the following courses found in the Engineering (http://sis.berkeley.edu/catalog/gcc_view_req?

[p_dept_cd=ENGIN](#)) section of this Bulletin: Eng 115 (Engineering Thermodynamics) and Eng 117 (Engineering Analysis).

Nutritional Science and Toxicology

College of Natural Resources (<http://cnr.berkeley.edu/site>)

Department Office: 119 Morgan Hall, (510) 642-6490

Chair: Joseph L. Napoli, PhD

Department Website: Nutritional Sciences and Toxicology (<http://nst.berkeley.edu>)

Overview

The research and curriculum of the Department of Nutritional Sciences and Toxicology addresses the experimental biology of nutrients, phytochemicals, and diet-borne toxicants, using the techniques of modern biology and chemical analyses to understand the relationship among diet, the metabolic genome, and optimal health/chronic disease. Our goals are to determine the molecular mechanisms of dietary affects on health, and the contribution of individual genotype to dietary responses and disease risk. This approach of metabolic biology will provide detailed insight into the impact of diet on human health and chronic disease risk. We seek to translate lab and model systems data to human physiology, and to provide outreach through cooperative extension.

Undergraduate Programs

The Department of Nutritional Sciences and Toxicology offers two undergraduate majors, nutritional science and molecular toxicology, leading to the BS degree. Courses that fulfill the lower division prerequisites for junior standing include Biology 1A; Chemistry 1A/1AL, 3A/3AL-3B/3BL; English 1A-1B or equivalent; 14 units of humanities coursework; Mathematics 16A, 16B; Molecular and Cell Biology 32, 32L; Nutritional Science 10; Physics 8A; and Statistics 2.

Nutritional Science Major

The nutritional science major combines a strong foundation in the biological and chemical sciences with a choice of one of two areas of specialization:

1. **Physiology and Metabolism** focuses on the biochemical and physiological study of nutrient use as well as the study of food properties and processing of food materials.
2. **Dietetics** prepares students for careers as registered dietitians (RDs). RDs translate the science of nutrition into practical applications for individuals and groups in clinical, food service, or community settings. Graduates of this program must complete a dietetic internship and pass a national examination to become an RD.

Molecular Toxicology, Emphasis within the Nutritional Science Major

The molecular toxicology emphasis combines a strong foundation in the biological and chemical sciences with a focus on the hazardous and beneficial effects of natural and man-made toxic agents. From industrially produced environmental contaminants and designer drugs to naturally occurring herbs and food products, this field of study applies molecular

and computational methods to give students a better understanding of how these agents interact with living organisms and what should be done to ensure human health and safety.

Honors Program

Students who are interested in the honors program in nutritional science or molecular toxicology should apply during their junior or senior year. Students must have a 3.6 GPA in order to be eligible for the Honors Program. The honors program is individual research, NST H196, for two semesters under the supervision of a faculty member. The supervised independent honors research is specific to aspects of the nutritional sciences and toxicology major, followed by an oral presentation, and written report. Acceptance in the CNR honors program is required through an application process. Please contact the CNR Office of Instruction and Student Affairs in 260 Mulford Hall.

Minors

Students who have pursued basic coursework in biological sciences under other majors may be eligible for one of the two undergraduate minors offered by the Department of Nutritional Science and Toxicology. Both minors require a minimum GPA of 2.5 and the completion of 15 units. The minor in nutritional science requires Nutritional Science 10, 103, 160, and five additional NST upper division units. The minor in toxicology requires Nutritional Science 11, 110, C114, 115, and one or more additional NST upper division course. All courses must be taken on the Berkeley campus for a letter grade. No course substitutions are allowed. Completion of the minor will only be noted in the memorandum section of the student's UC Berkeley transcript *not* on the UC Berkeley diploma. Students who have completed the requirements for the minor should apply for departmental certification during the semester they intend to graduate. Applications are available in the CNR Student Affairs Office, 260 Mulford Hall.

Graduate Programs

The department administers three graduate programs:

1. PhD in Metabolic Biology
2. PhD in Molecular Toxicology
3. MS in Metabolic Biology

The Metabolic Biology program provides interdisciplinary training in the theory and techniques of molecular and biochemical metabolic studies of nutrients and phytochemicals in humans, and in mammals that serve as models for humans. Molecular Toxicology focuses on the adverse effects of chemicals on living organisms and how these effects are modulated by genetic, physiologic, and environmental factors.

For more information on graduate programs, please see the department's website (<http://nst.berkeley.edu/graduate>).

Optometry

School of Optometry (<http://optometry.berkeley.edu>)

Office of the Dean: Minor Hall, (510) 642-3414

Dean: Dennis M. Levi, OD, PhD

Associate Dean for Academic Affairs: Gunilla Haegerström-Portnoy, OD, PhD

Associate Dean for Clinical Affairs: Edward J. Revelli, OD

Associate Dean for Student Affairs and Head Graduate Adviser: Richard C. Van Sluyters, OD, PhD

Assistant Dean for External and Professional Affairs: Lawrence S. Thal, OD, MBA

Director of Residency Programs: Christina S. Wilmer, OD

Residency Supervisor: A. Mika Moy, OD

Chair, Graduate Group in Vision Science: Karsten Gronert, PhD

Department Websites: Optometry (<http://optometry.berkeley.edu>), **Vision Science** (<http://bulletin.berkeley.edu/departmentsandsubjects/optometry/%20http://vision.berkeley.edu>)

Overview

The School of Optometry provides professional training in the art and science of vision care. Drawing upon the principles of anatomy, optics, physiology, and psychology, the four-year professional program leads to the degree of Doctor of Optometry, which qualifies one to take national and state board examinations.

Doctors of Optometry are health care professionals. Optometry is a primary health care profession that encompasses the prevention and remediation of disorders of the vision system through examination, diagnosis, treatment, and/or management of visual efficiency, eye health, and related systemic manifestations. Optometry graduates are able to diagnose patients with ocular disease or systemic diseases with ocular manifestations. Recent changes in optometry laws across the United States have expanded the scope of optometric practice, giving practitioners responsibility for nonsurgical pharmaceutical treatment of eye disorders and diseases.

Doctors of Optometry are educated in the sciences of anatomy, chemistry, physics, mathematics, neurology, bacteriology, microbiology, disease processes and detection, pharmacology, behavioral science, social science, public health, and many other related fields. The school provides four years of comprehensive training in vision care aimed at training primary eye care practitioners. The first year emphasizes advanced study of sciences which form the background of optometry, such as ocular anatomy, medical physiology and biochemistry, ocular pathology, physiology, microbiology and virology, neuroanatomy, the psychology of vision, vision science, geometric optics, ophthalmic optics, pharmacology, and theoretical and practical optics. The second and third years are devoted to the science of optometry and the acquisition of skills in examination procedures. Although clinic participation is involved in all four

years, active responsibility for patient care begins in the spring preceding the third year. The fourth year is devoted to primary care practice of optometry and the detailed study of specialized areas, including contact lenses, binocular and infant vision, vision functions, ocular disease, vision of the elderly, and low vision.

Optometry offers a wide variety of interesting, challenging, and rewarding careers in private practice, in hospitals and other health organizations, and in public service. The education acquired at the School of Optometry provides today's Doctors of Optometry with the knowledge and skill necessary to meet the challenges of providing vision care.

For further information about the School of Optometry, please consult our website. (<http://optometry.berkeley.edu>)

Optometric Residency Program

A one-year Optometric Residency program is available to Doctors of Optometry seeking advanced optometric training. Areas of clinical study include binocular vision, cornea and contact lens, low vision, ocular disease, pediatrics, and primary care.

Successful completion of the program leads to the awarding of the Optometric Residency Certificate.

For further information about the Optometric Residency Program, please contact the Director of Residency Programs at the Tang Eye Center, 2222 Bancroft Way, Berkeley, CA 94720-2020; or send an e-mail to cwilmer@berkeley.edu.

Vision Science Graduate Program (PhD Degree)

The Graduate Program in Vision Science leads to a PhD degree. The program is administered by the Group in Vision Science, representing cross-disciplinary faculty from the School of Optometry and the Departments of Psychology, Computer Science, Molecular and Cell Biology, Neuroscience, and Bioengineering, among others. The faculty is distinguished in their accomplishments and diverse in their areas of expertise. Research facilities available to graduate students in vision science are among the best in the world.

The Graduate Program in Vision Science provides training in a wide variety of topics pertaining to vision. These include the optics of the eye, molecular and cell biology of the eye, anatomy and neurophysiology of the retina and visual pathways, computational vision, clinical aspects of vision, and more. The graduate program is designed to prepare students for academic careers in research and teaching in vision science, optometry, ophthalmology, bioengineering, psychology, biology, and other related disciplines. It also prepares students for research careers in industrial settings in related areas.

Admission to this program requires a bachelor's degree in a relevant discipline (such as biology, computer science, engineering, or psychology) or a doctoral degree in medicine or optometry.

For further details about the requirements for the Vision Science Graduate Program, go to the website . (<http://vision.berkeley.edu>) To contact our admissions office, please e-mail vision@berkeley.edu or write to Graduate Student Affairs Officer, Group in Vision Science, University of California, Berkeley, 380 Minor Hall #2020, Berkeley, CA 94720-2020.

Peace and Conflict Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Group Major Office: International and Area Studies, 101 Stephens Hall, (510) 642-4466

Chair: Khatharya Um, PhD (Department of Ethnic Studies and Department of International and Area Studies)

Department Website: Peace and Conflict Studies (<http://iastp.berkeley.edu/pacs>)

Overview

Peace and Conflict Studies has been an undergraduate major at UC Berkeley since 1985. The founding premise of PACS is that war and other forms of violence, despite their ubiquity, can be mitigated and transformed through the application of knowledge. To this end, the major introduces students to critical analyses of the social, economic, political, and ecological structures of conflict, power, and processes of change. Given the complex and multifaceted nature of violence and its causes, students are expected to approach their studies from a number of interdisciplinary perspectives.

The PACS curriculum is designed to provide students both breadth and depth in their study of peace and conflict. Breadth is accomplished by the survey fields and depth through the area of concentration. PACS majors are encouraged to develop an integrative understanding of peace theory, research, and practice, taking advantage of internship opportunities in both local and global settings

In consultation with an academic adviser, students choose the courses that will fulfill major requirements. All students are required to fulfill a common set of core courses: Introduction, Methodology, Theory, and the Senior Seminar, as well as a Concentration. Areas of concentration include Human Security, Global Governance, Culture and Identity, Human Rights, Conflict Resolution, and Nonviolence.

The Group Major

Declaring a major in peace and conflict studies follows guidelines established by the College of Letters and Science (L&S). Students wishing to declare PACS:

1. Must be currently enrolled in or have completed PACS 10 with a grade of C or better (PACS 10 can be repeated only once in order to obtain a grade of "C" or better; there are no transferable equivalent for PACS 10 from California community colleges)
2. Have a cumulative grade point average (GPA) of 2.0 or higher
3. Must have attended a major declaration workshop
4. Must not be in their final semester of undergraduate work
5. Are encouraged but not required to have completed at least two semesters of college-level foreign language or the equivalent before applying to the major

To declare the major, students must meet with a program adviser in person to submit the PACS application materials.

Students are reminded that: no coursework for the major may be taken on a passed/not passed basis, and no course may be used to satisfy more than one major requirement.

Double Majors

Double majors must be approved by the dean of the College of Letters and Science. No more than two upper division courses may be used to satisfy requirements in both majors.

Courses Outside L&S

No more than three courses outside the College of Letters and Science may be used to fulfill group major requirements.

Study Abroad

The use of coursework taken at institutions outside the United States to fulfill major requirements is restricted to the equivalent of three semester-length upper division courses. Courses taken to fulfill the foreign language requirement for the group major are not included in this restriction.

Transfer Courses

A maximum of three upper division courses taken at other institutions (including those of the UC Education Abroad Program) may be transferred into the major. These courses will be accepted only as three of the required upper division courses (regardless of unit value) and must be validated by the Office of Undergraduate Admissions and approved by a major adviser. Courses used to fulfill lower division requirements or the foreign language requirement are not included in this restriction.

Course Plan

Note: The Course Plan below will be effective through Fall 2014. Beginning Spring 2015, the major requirements for PACS will be changing. The changes are:

1. The total number of required upper division courses will increase from nine to 10 (with a unit limit of 36).
2. PACS 190, Senior Seminar, will become a year-long course sequence for eight units instead of a semester-long course for four units.
3. The two-course survey requirement will be eliminated.
4. The Concentration requirement will increase to six courses instead of four. The Pre-designed Concentration areas will be reduced from six areas of concentration to three areas of concentration, to include Governance and World Order, Human Rights and Human Security, and Conflict Resolution and Peace Building. (The option for a Self-Designed Concentration will continue.)

There is considerable flexibility within PACS for students to construct individual programs unique to their intellectual interests. There is, however, a structure built into the major and specific course requirements that must be met. This structure is designed to provide all PACS students with a common knowledge base and intellectual reference points. Students are strongly recommended to follow the program sequentially, beginning with the lower-division courses, followed by the methodology, survey, and concentration courses.

The program begins with lower division courses centered around PACS 10, Introduction to Peace and Conflict Studies, which provides a basic factual, theoretical, and methodological grounding in peace and conflict studies. Two other lower division courses must be chosen from the list

below. There is also a language proficiency requirement which, depending on one's language skills, could require language courses.

The upper division courses include two core courses, including a senior seminar; three survey courses, a methods course, and four concentration courses. Students may also enroll in the honors program (described above).

Lower Division (three courses)

PACS 10 and two courses from the following list: Anthropology 3, 3AC; Asian Studies 10; Development Studies C10; Economics 1, 2; Geography 4, 10, 20, C32, C55; History 6B, 7B, 8B, 10, 11, 12, 14; International and Area Studies 45; Latin American Studies 10; Middle Eastern Studies 20; Near Eastern Studies C26; Political Science 2; Psychology 1; Sociology 1, 3AC; Undergraduate Business Administration 10.

Foreign Language

All PACS students must be able to demonstrate proficiency in any single modern language (other than English) equivalent to four college-level semesters.

There are three ways students can fulfill the four-semester language requirement, depending on their backgrounds and abilities:

1. **Through Advanced Placement (AP) or International Baccalaureate (IB) test:** An AP score of five or an International Baccalaureate (IB) score of seven will complete this requirement. An AP score of four will place a student into the fourth-semester college level course. A score of three will place a student into the third-semester college level course. Documentation of AP scores must be provided.
2. **Through coursework:** Any combination of college courses, summer programs, or college-level study abroad programs could satisfy the language requirement. At a minimum, students must complete the fourth semester of a language with a grade of C- or better. The first, second, or third levels of language may be taken on a passed/no passed basis; the fourth semester must be taken on a letter grade. Language courses need not be taken at Berkeley; courses taken at a community college or any accredited school or university are acceptable. Advanced Placement Language Test scores of five complete the requirement. However, transcripts and score reports must be provided. See an adviser in the IAS office concerning language study abroad.
3. **With a proficiency exam:** Some, but not all, language departments on campus offer proficiency testing for students with advanced skills in that language. Please note that if a particular language is not taught on the Berkeley campus, then students are not able to test in that language. A student would then need to choose one of the other methods for fulfilling the foreign language requirement.
4. **High school completion in a non-English language:** Students who were educated in a non-English language through the completion of high school or the equivalent may wish to satisfy this requirement with that experience. Students must provide a transcript or diploma proving that they have been educated in this language at least through the completion of high school or the equivalent.

Upper Division

- **Core (two courses):** PACS 100, Peace Theory: Approaches and Analyses, and PACS 190, Senior Seminar. These courses provide the scope of the discipline in historical, theoretical and practical terms.
- **Methods (one course):** The methodology requirement is designed to give each PACS major a set of analytical skills appropriate to the core

focus of their individual program. The methods course can be drawn from any of two broad categories—statistical methods or research design. The selection of the most appropriate class for each student should be undertaken in close consultation with an adviser. The first category focuses on advanced statistical methods and computer-assisted data analysis. A lower division statistics course is strongly recommended as a prerequisite to any of these courses. The second category focuses on research design and field methods. It is oriented to questions of survey design, field analysis, qualitative methods, and approaches to research design. An introductory course in statistics is also recommended as prerequisite to these courses. Lists of approved courses can be obtained from the PACS handbook. (<http://iastp.berkeley.edu/pacs>)

- **Concentration (four courses):** In the concentration, students pursue advanced study on a particular issue or topic in peace studies. Students may choose one of the six topics listed above (not already chosen for the two Survey requirements) as their Concentration. Or they may design their own Concentration topic in consultation with a PACS faculty adviser. See the PACS Handbook for more information.
- **Survey (two courses):** Survey courses are chosen from two of six topics: Conflict Resolution, Culture and Identity, Global Governance, Human Rights, Human Security, and Nonviolence. See the PACS Handbook for course lists.

Honors Program

To graduate with honors from the group major in peace and conflict studies, students must enroll in the two-semester honors seminar, IAS H102 (fall only) and PACS H195 (spring only), and must obtain GPAs of 3.6 in the major and 3.5 in overall university coursework. The honors seminar (PACS H195) is taken in addition to a student's regular coursework for fulfilling requirements for the major and culminates in the writing of a senior thesis. The thesis is read by the PACS H195 instructor and at least one other faculty member who is selected by the student in consultation with the thesis instructor. Eligibility for participating in the Honors Program is determined in the IAS office. *Note:* There is no guarantee that students accepted into the honors program will graduate with honors. Honors recommendations are made after graduation and are based on a number of factors including (but not limited to) major GPA, grades received for IAS H102 and PACS H195, and faculty adviser recommendations.

The Minor

The PACS minor is open to all undergraduates except PACS majors. Applications for the minor and a list of approved courses are available from the IAS office. To apply for the minor, students must have completed at least one PACS course with a grade of B or better and have an overall GPA of 2.0. Completed applications and a Petition for Confirmation of Minor Program must be submitted to the IAS office no later than the last day of instruction of the term immediately preceding your final semester.

To complete the minor, students must take six upper-division courses, three of which must be PACS courses. The remaining three courses must be selected from one (only) of the six PACS Concentration/Survey Areas.

Note: The following college requirements apply to the PACS minor program:

- At least three courses must be completed at Berkeley
- All courses must be taken for a letter grade, PACS 197, 198, and 199 cannot be used to fulfill minor requirements

- A minimum GPA of 2.0 must be achieved in the courses used to satisfy the minor requirements
- And no more than one course can satisfy requirements for both a major and a minor

Persian

Please see the Near Eastern Studies Department (p. 166) for program and degree requirements.

Philosophy

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 314 Moses Hall, (510) 642-2722

Chair: Paolo Mancosu, PhD

Department Website: Philosophy (<http://philosophy.berkeley.edu>)

Major Requirements

Lower Division

12A, 25A and 25B

Upper Division

1. 100
2. One of the following: 104, 105, 107, 115
3. Two courses from the following four groups (no more than one course from any one group):

- Group A: 122
- Group B: 125
- Group C: 131, 132
- Group D: 133, 135

A total of 48 units is required in the major program. Twenty units are required in the upper division in addition to the four required upper division courses. Students must take one course from the 160-178 series and one course from the 160-187 series and three additional upper division courses. Course 101 does not count towards the major.

Students should pass Philosophy 12A before the end of the junior year and should take Philosophy 100 as soon as possible after declaring the major. One of the three additional upper division courses may be taken in another department, provided that the course selected is deemed by the major adviser to be relevant to the major. One course in the major may be taken on a *passed/not passed* basis.

Three additional upper division philosophy courses are required.

Honors Program

With the consent of the major adviser, a student with an overall 3.5 grade point average (GPA) or higher and a GPA of 3.7 or higher in courses in the major may apply for admission to the honors program. This program requires completion of either: Philosophy H196, Senior Colloquium, or a graduate seminar in the Department of Philosophy, admittance to which is contingent upon approval of the instructor in charge. It also requires that

the candidate write an acceptable honors thesis, for which four units of credit will be given under Philosophy H195.

Minor Requirements

- Philosophy 25A or 25B
- One of the following four courses: 104, 105, 107, 115
- One of the following six courses: 122, 125, 131, 132, 133, 135
- Three additional upper division courses in philosophy (excluding Philosophy 101)

A minimum of three of the upper division courses must be taken at Berkeley. All courses taken in the minor must be completed on a letter-graded basis. Students must have an overall GPA of 2.0 in all six courses required for the minor. (A GPA of 2.0 must be maintained within the five upper division courses as well.)

Physical Education

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 200 Hearst Gymnasium, (510) 642-3289

Director: M. Kathryn Scott, MA

Department Website: Physical Education (<http://pe.berkeley.edu>)

Overview

The Physical Education Program is under the jurisdiction of the College of Letters and Science and reports to the college through the Dean of Biological Sciences. The program consists of a wide range of physical activity classes, as well as various lecture/laboratory courses described in the course listings. The physical activity offerings are designed to provide sequenced instruction in such classes as aquatics, combatives, dance, fitness, and sports. Instruction is planned to enable participants to develop and improve performance skills, gain knowledge and concepts relevant to the activity, receive relevant information concerning the health benefits of regular exercise, and attain an appropriate level of fitness. All activity classes are for credit and are open to women and men. Students should consult the Online Schedule of Classes (<http://schedule.berkeley.edu>) for specific information regarding each semester's offerings.

Scientific Diving

The Division of Diving Safety ensures that all underwater diving conducted under the auspices of UC Berkeley is done in accordance with the standards and policies established by the American Academy of Underwater Sciences and the Berkeley campus. The program is administered by the diving safety officer, in association with the Vice Chancellor for Research, Environmental Health and Safety, the Physical Education Program, the College of Natural Resources, and the Richard Gump South Pacific Biological Research Station. A University scientific diver permit is required for anyone diving for science using University equipment, diving from University-owned property, or diving as a student or employee of the University. The Diving Safety Program provides opportunities for students, faculty, and staff to pursue SCUBA certification or a scientific diver permit. There are fees associated with these services.

Further information can be found on the Scuba Diving website. (<http://pe.berkeley.edu/scubadiving>)

Locker Room Regulations and Penalties

A fine is imposed if students fail to comply with the following regulations: (a) clear locker by the specified date; (b) return equipment or clothing on or before the date posted for such return at the end of each semester; (c) overnight use of locker in designated areas.

Fees

A course material fee is assessed from every student enrolled in a physical education activity class. The fees are listed by class in the Online Schedule of Classes (<http://schedule.berkeley.edu>).

For more information on the Physical Education Program, please visit the department homepage. (<http://pe.berkeley.edu>)

Physics

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 366 LeConte Hall, (510) 642-7166

Chair: Frances Hellman, PhD

Department Website: Physics (<http://physics.berkeley.edu>)

Major Requirements

The physics major is designed to give the student a broad and thorough understanding of the fundamentals of physics. The emphasis is, therefore, on this general understanding rather than on specialized skills, although some specialized courses are among the options open to the student. Those considering a physics major are urged to consult a departmental adviser early, in order to discuss the content of the major and also the opportunities after graduation. Recent graduates have entered graduate work in a number of scientific fields, and others have gone on to jobs in academic, industrial, and government laboratories. For information about the major and department, go to the website. (<http://physics.berkeley.edu>)

Lower Division Courses

1. Physics 7A-7B-7C (regular or honors, *although honors is recommended for students with suitable preparation*)
2. Mathematics 1A-1B and 53, 54.
3. Those who have not taken a substantial chemistry course in high school are urged to take a one-year sequence.
4. Those not familiar with a computer programming language are urged to include an introductory course in Computer Science.

Upper Division Courses

Courses 7A-7B-7C (regular or honors) and differential and integral calculus are prerequisite to all upper division courses except Physics 132.

Upper division courses may have scheduled one additional hour to the three hours of lecture. See the Online Schedule of Classes (<http://schedule.berkeley.edu>).

1. Physics 105; 110A; 112; 137A-137B
2. Six units of 111
3. One additional course from the following list chosen with the approval of the major adviser: 110B, 129, 130, 138, 139, 141A-141B, 142, 151, C161 (cross listed with astronomy), 177, C191. These options will give the student an extended introduction to some areas of current research.
4. Physics 110B is strongly recommended for students who plan to continue to graduate school.

Special programs may be worked out in consultation with the adviser. Completion of a physics major program is usually required for admission to graduate work. Additional mathematics from among the courses Mathematics 104, 121A-121B, 185 is recommended. Competence in the use of computers is desirable.

Honors Program

Students with an overall grade point average (GPA) of 3.3 or higher in courses in the major may be admitted to the honors program. A major adviser should be consulted before the student's last year of residence. This program requires completion of the major, at least one semester of Physics H190 and a senior thesis, H195A-H195B.

Biophysics

Students who wish to obtain a broad introduction to the physical sciences and their application to biology are referred to the Department of Physics and the Department of Molecular and Cell Biology. There is no biophysics undergraduate degree major program.

Engineering Physics

The College of Engineering, with the cooperation of the Department of Physics, offers a curriculum in engineering physics leading to the degree of Bachelor of Science. (The Engineering Physics major is open only to students registered in the College of Engineering.)

Minor Requirements

The Department of Physics has adopted a physics minor program. Students in the College of Letters and Science may complete one or more minors of their choice, normally in a field both academically and administratively distinct from their major. The minor will conform to the College of Letters and Science specifications and will consist of the following coursework:

Prerequisites

1. Physics 7A, 7B, 7C (or their equivalent)
2. Math 1A, 1B, 53, 54, (or their equivalent)

These courses must be taken for a letter grade. Physics 7A-7B-7C must each be passed with a letter grade of C or better. The students must achieve a minimum GPA of 2.0 in the seven courses.

Minor Requirements

1. Physics 137A
2. Physics 110A or Physics 105.
3. Three additional upper division physics courses to total at least nine units for an upper division physics unit total of at least 17 units.

The following upper division courses will not count for the minor program: Physics 100, 132, H190, H195A-H195B, 198, or 199. All upper division physics courses must be taken for a letter grade. A minimum of three upper division courses must be completed at Berkeley. An overall minimum GPA of 2.0 is required in upper division courses applied to the minor program.

Students who have completed the requirements for the minor will be required to furnish transcripts (official or unofficial) to the undergraduate adviser (in 368 Le Conte Hall) to show their work and GPA in physics and math. After completing a confirmation of minor program petition (available in 368 Le Conte Hall) the students will be directed to a faculty major adviser who will approve the completion of the minor program.

Students may petition for a minor in physics from the time that the requirements are complete until the student graduates from the College of Letters and Science.

For more information regarding this program, please contact the undergraduate student affairs officer in 368 Le Conte Hall.

Graduate Programs

Graduate work leading to the MA and PhD degrees is offered in the Department of Physics with emphasis placed on the PhD. Please note that the department will not consider applications from students who intend to work toward the MA degree only. In addition to applications and transcripts of undergraduate work, applicants must submit scores of the General and Physics Graduate Record Examinations (GRE), and, if applicable, the Test of English as a Foreign Language (TOEFL). For detailed information concerning the physics graduate program, including admissions, go to the website (<http://physics.berkeley.edu>) (click on "Graduate"), or consult Physics Graduate Student Services at (510) 642-0596.

Research is a major part of the PhD program, and the department offers opportunities in a wide variety of experimental and theoretical fields. Campus research includes atomic physics and spectroscopy, astrophysics, biophysics, cosmic rays, mass spectroscopy, nonlinear optics, condensed matter physics, and statistical mechanics. At the Lawrence Berkeley National Laboratory, extensive opportunities exist for research in astrophysics, elementary particle and nuclear physics, condensed matter physics and materials science, and plasma and nuclear physics. Space physics, interplanetary studies, solar plasma research, physics of the upper atmosphere, and cosmological problems are pursued both in the Physics Department and at the Space Sciences Laboratory.

Course requirements for the PhD include the following: Physics 209, Classical Electromagnetism; 211, Equilibrium Statistical Physics; and 221A-221B, Quantum Mechanics; plus 19 units (five semester courses), approved upper division or graduate elective courses (excluding any upper division courses required for the undergraduate major)—at least 11 units must be in the 200 series courses. Some of the 19 elective units could include courses in mathematics, biophysics, or astrophysics. Consult department postings for elective recommendations. Physics 251, 290, 295, 299, 300, and 602 are excluded from the 19 elective units. Physics 209, 211, and 221A-221B must be completed for letter grades (minimum grade B-). No more than one-third of the 19 elective units may be fulfilled by courses graded *satisfactory*, and then only with approval from the department.

The master's degree is administered according to regulations given in the Graduate Education section of this Bulletin (p. 16). The Department

of Physics requires a comprehensive examination rather than a thesis; passing the preliminary exams constitutes passing the comprehensive exam. The candidate must complete 35 semester units of upper division and graduate work in physics (or related fields) with an average grade of at least a B. Eighteen of these units must be graduate courses in physics. Neither upper division courses included in the departmental (undergraduate) major requirements nor Physics 251, 290, 295, 299, 300, or 602 may be used to satisfy the 35-unit requirement. No more than five units of the master's program may be fulfilled by courses graded *satisfactory*, and then only if approved by the department. MA petitions are due the fifth week of fall and spring semesters.

Plant and Microbial Biology

College of Natural Resources (<http://nature.berkeley.edu/site>)

Department Office: 111 Koshland Hall, (510) 642-9999

Chair: Brian Staskawicz, PhD

Division Chair, Plant Biology: Brian Staskawicz, PhD

Division Chair, Microbial Biology: Thomas Bruns, PhD

Department Website: Plant and Microbial Biology
(<http://plantbio.berkeley.edu>)

Overview

The Department of Plant and Microbial Biology consists of the Division of Plant Biology and the Division of Microbial Biology. Programs at both the undergraduate and graduate levels have been designed to offer students maximum flexibility in defining their own areas of interest. In addition to departmental resources that are available in Koshland Hall, the facilities of the College of Natural Resources Biological Imaging Facility and the United States Department of Agriculture Plant Gene Expression Center are available for the programs of the department.

The Division of Plant Biology

The Division of Plant Biology program emphasizes basic research and its application to plants and promotes the design of plant biotechnologies. With an increasing awareness of environmental problems, global changes, and emerging food needs, plants are a focal point for new research initiatives and educational training programs. Understanding the biology of plants, their development, their responses to the environment, and the impact of human activities on the plant biosphere are many of the challenges that will continue to fuel the expansion of plant biology research well into the 21st century.

The Division of Microbial Biology

The Division of Microbial Biology was established within the department to provide a focus for microbial biology at UC Berkeley. There is a growing awareness that microbes and microbial activities are essential to maintaining a high quality of life for all eukaryotes. Moreover, understanding the microbial world is necessary if we are to comprehend the global ecosystem, evolutionary history, and diversity of life on earth. The 21st century will bring a new understanding of the workings of the global ecosystem and a wealth of new technologies derived from the microbial world. The new microbial biology research programs are designed to meet this challenge.

Undergraduate Program in Genetics and Plant Biology

The department's undergraduate program in genetics and plant biology has been developed as a broadly based program emphasizing the study of plants from the molecular and genetic to organismal levels. Lower division courses are intended to produce a foundation in biological and physical sciences as preparation for advanced study at the upper division level.

The department offers several laboratory classes that focus further on the subject matter and introduce students to the latest techniques in genetics and plant biology. The department offers research opportunities in departmental research laboratories to qualified undergraduate students. These are provided in the form of Honors Research (PMB H196) or Supervised Independent Study and Research (PMB 99 and PMB 199).

Lower Division

1. Biology 1A, 1AL, 1B
2. Chemistry 1A, 1AL, 3A, 3AL, 3B, 3BL
3. Mathematics 16A, 16B, or equivalent year of calculus
4. Physics 8A
5. Statistics 2, 20, 131A, or other approved course
6. 15 units of approved Humanities and Social Sciences electives
7. 8 units of Reading and Composition

Upper Division

1. PMB 101L, C107L, 135, 150, 160
2. Five approved Plant Biology Track Courses totaling at least 15 units

For further details and requirements, please see the Genetics and Plant Biology major requirements checklist, available on the department's website (<http://pmb.berkeley.edu/sites/default/files/users/GPB%20Checklist%20F12.pdf>).

Undergraduate Program in Microbial Biology

Microbial biology is a pivotal field of study because microbes are the dominant life form and represent the overwhelming majority of the biomass on the planet. Microbes have fundamental roles in maintaining the health of the biosphere; they degrade environmental pollutants, they supply essential nutrients and chemicals directly to multicellular organisms, and they engage in numerous beneficial symbioses with higher organisms. By the same token, infectious diseases regulate populations of plants and animals, and outbreaks recur in human societies on a global scale. Microorganisms are the evolutionary precursors of chloroplasts and mitochondria, the energy-producing centers of plants and animals, so even the study of evolutionary biology is not complete without an understanding of microbial biology.

Furthermore, the full diversity of the microbial world is poorly known, because many unique organisms and biochemical processes remain to be discovered. The renewed appreciation of the relevance of microbes to all life means that there is an increasing demand in government and industry for employees with knowledge and skills related to microbial biology. The microbial biology (MB) major is designed for students interested in competing for such positions, for pre-med and pre-vet students, for students interested in biology in general, and for students interested in pursuing postgraduate education in biology.

Lower Division

1. Biology 1A, 1AL, 1B
2. Chemistry 1A, 1AL, 3A, 3AL, 3B, 3BL
3. Mathematics 16A, 16B, or equivalent year of calculus
4. Physics 8A
5. Statistics 2, 20, 131A, or other approved statistics course
6. 15 units of approved Humanities and Social Science electives
7. 8 units of Reading and Composition.

Upper Division

1. Biochemistry (MCB 102, 100A, 100B, or 110)
2. PMB C112
3. PMB C112L
4. PMB C148
5. 2 core electives from pre-approved list
6. 4 courses from Microbial Biology course list

For further details and requirements, please see the Microbial Biology major requirements checklist, available on the department's website (<http://pmb.berkeley.edu/sites/default/files/users/MB%20Checklist%20F12.pdf>).

Graduate Program in Plant Biology

The Graduate Program in Plant Biology is designed to train students in modern research areas of plant biology. Students' courses of study are designed individually, in light of their interests and career goals. The graduate program features an introductory seminar (Faculty Research Review), six five-week core course modules, and additional special topic courses and seminars in areas of faculty specialties. The department has research expertise in the following areas: molecular, cellular, genetic, biochemical, physiological, developmental, and structural biology, and plant-microbe interactions. The core courses cover plant developmental genetics, genomics and computational biology, plant diversity and evolution, plant cell biology, plant biochemistry, and plant systems biology.

Prospective students for the graduate program in plant biology are expected to demonstrate academic excellence and potential for independent scientific research. Students are expected to have a basic background in chemistry, physics, mathematics, and biology equivalent to those in the undergraduate program. An admissions committee composed of five members of the department will review applications and make recommendations to the full department on admissions matters. Recommendations for admission will be based on a demonstration of academic excellence and potential for independent scientific research as shown by grades in university-level undergraduate and graduate courses, letters of recommendation, written statements of academic and professional goals, and other evidence of academic accomplishment. Scores on standardized tests, such as the Graduate Record Examination (GRE), will be required of all applicants. Students seeking detailed information about matters such as admission, curriculum, and courses of financial support should contact the student affairs assistant or the graduate adviser.

Graduate Program in Microbiology

The Department of Plant and Microbial Biology administers the Graduate Group in Microbiology, which awards the PhD degree in Microbiology at Berkeley. A graduate group is an interdepartmental group of faculty

who offer a program in an area that crosses departmental boundaries. The Graduate Group in Microbiology is composed of 52 faculty from diverse departments. The graduate program features an introductory seminar (Faculty Research Review), six five-week core course modules, and additional special-topic courses and seminars in areas of faculty specialties. The core course modules are Microbial Genetics, Genomics and Computational Biology, Microbial Diversity and Evolution, Cell Structure and Function, Microbial Physiology, and Microbial Ecology.

For more information on the Graduate Group in Microbiology, see the full description under "Microbiology (p. 153)" in this *Berkeley Bulletin*.

Political Economy

College of Letters and Science (<http://ls.berkeley.edu>)

Group Major Office, International and Area Studies: 101 Stephens Hall, (510) 642-4466

Chair: Shannon Stimson, PhD (Department of Political Science)

Program Website: Political Economy (<http://iastp.berkeley.edu/pe>)

Program in Political Economy (formerly Program in Political Economy of Industrial Societies)

Political Economy eligibility is changing! New PE eligibility requirements begin in Fall 2014.

All students who declare Political Economy in the Fall 2014 semester (on or after August 21, 2014) must meet the new eligibility requirements, listed below:

- Must have a cumulative UC Berkeley grade point average (GPA) of 2.7 or higher

AND

- Must have completed IAS 45 with a grade of B- or higher on the 1st attempt.

Students who do not earn a B- or higher in IAS 45 in their first attempt will not be eligible to declare the Political Economy major beginning in Fall 2014, regardless of the semester in which IAS 45 was taken.

All other eligibility requirements will remain the same.

Note: applications to declare will not be accepted from August 14, 2014 to September 15, 2014.

Questions? Please come in to the IAS office to speak with an advisor.

Political Economy

Political Economy (PE) examines the relationship between politics and economics in modern societies and focuses on problems of both domestic and international policy. Based on the assumption that political-economic relationships are affected by any number of factors, such as society, culture, geography, and demographics, the curriculum is both multi- and interdisciplinary in scope. The focus of the major is on contemporary issues, although a strong historical perspective is also emphasized. Students may also study planning and problem solving,

environmental issues, resource distribution, and the challenges of institutional adaptation, and changing political systems.

The major is designed to provide a broad-based liberal arts background, as well as the intellectual skills appropriate for careers in either the public or private sector. Additionally, the major offers an excellent background for students planning postgraduate careers in social science disciplines and professional schools.

Some of the questions that the major addresses include:

- The tension between rising consumer demand versus the need to minimize resource depletion and pollution
- The different priorities served by capitalist, and socialist and traditionalist varieties of political economy
- The different priorities served by democratic and authoritarian political systems
- How international interdependence may undermine the efforts of national governments to cope with unemployment, inflation, trade and payment deficits, health, housing, and welfare problems, and other issues associated with industrialized societies
- The importance of organizational structures for policy-making in both the public and private sectors

The Group Major

Declaring a major in PE follows guidelines established by the College of Letters and Science. Students wishing to declare PE:

1. Must have completed IAS 45 with a grade of C or better (IAS 45 may be repeated only once to achieve a grade of C or better), or received a score of 5 on the AP World History exam (DARS report showing AP scores required)
2. Must have completed Econ 1, 2, or C3 (also cross-listed as EEP 1) with a grade of C or better (may be repeated only once to achieve a grade of C or better), or completed the equivalent at another college, or received AP scores of four or five on both the micro-economics and macro-economics exams (DARS report showing AP scores required);
3. Must not be in their final semester of undergraduate work
4. Are encouraged—but not required—to have completed at least two semesters of college-level foreign language or the equivalent
5. Attend a major declaration workshop
6. Meet with an advisor to submit the PE Application materials

Students are reminded that no coursework for the major may be taken on a passed/not passed basis, and no course may be used to satisfy more than one major requirement.

Double Majors

Double majors must be approved by the dean of the College of Letters and Science and cannot use more than two upper division courses to satisfy requirements in both majors.

Courses Outside L&S

No more than three courses outside the College of Letters and Science may be used to fulfill group major requirements.

Study Abroad: The use of coursework taken at institutions outside the United States to fulfill major requirements is restricted to the equivalent of three semester-length upper division courses. Courses taken to fulfill the

foreign language requirement for the group major are not included in this restriction.

Transfer Courses

A maximum of three upper division courses taken at other institutions (including those of the Education Abroad Program of the University of California) may be transferred into the major. These courses will be accepted only as three of the ten required upper division courses (regardless of unit value) and must be validated by the Office of Undergraduate Admissions and approved by an IAS adviser. Courses used to fulfill foreign language and lower division requirements are not included in this restriction but must be approved by an adviser.

Honors Program

To graduate with honors from the group major in PE, students must enroll in the two-semester honors seminar, IAS H102 (fall only) and PE H195 (spring only), and must obtain GPAs of 3.6 in the major and 3.5 in overall university coursework. The honors seminar (PE H195) is taken in addition to a student's regular coursework for fulfilling requirements for the major and culminates in the writing of a senior thesis. To qualify for PE H195, students must be recommended by the IAS H102 instructor. The thesis is read by the PE H195 instructor and at least one other faculty member who is selected by the student in consultation with the thesis instructor. Eligibility for participating in the honors program is determined by the IAS office.

Note: There is no guarantee that students accepted into the honors program will graduate with honors. Honors recommendations are made after graduation and are based on a number of factors including (but not limited to) major GPA, grades received for IAS H102 and PE H195, and faculty adviser recommendations.

Course Plan

There is considerable flexibility within PE for students to construct programs appropriate to their intellectual interests and the global areas they wish to stress in their studies. There are, however, minimal core course requirements that each student must meet. These requirements are designed to provide all PE students with a common background of knowledge and common intellectual reference points.

The program consists of three tiers of coursework and a foreign language requirement:

1. Three lower division courses provide necessary historical, quantitative, and economic skills essential for upper division coursework and for future career and educational options
2. Six upper division core courses provide detailed background for studying modern political economies
3. Four courses provide in-depth study in the student's chosen issue or problem

In addition to the requirements outlined above, all PE majors must demonstrate proficiency in a single modern foreign language, other than English, equivalent to *four* college-level semesters.

Foreign Language Requirement: There are a variety of ways that students can fulfill the four-semester language requirement for PE, depending on their background and ability:

- **Advanced Placement (AP) or International Baccalaureate (IB) test:** An AP score of 5 or an International Baccalaureate (IB) score of 7 (higher level) will complete this requirement. An AP score of four

will place a student into the fourth-semester college level course. A score of three will place a student into the third-semester college level course. Documentation of AP scores must be provided.

- **Through coursework:** A combination of college, summer program, or college-level study abroad programs could satisfy the language requirement. At a minimum, students must complete the fourth semester of a language with a grade of C- or better. The first, second, and third level of language may be taken on a *passed/not passed* basis; the fourth semester *must* be taken for a letter grade. Language courses need not be taken at UC Berkeley; courses taken at a community college or any accredited school or university are acceptable. Transcripts must be provided. A one-semester upper-division course taken abroad in the target language may satisfy the foreign language requirement. See an adviser in the IAS office concerning language study abroad.
- **With a proficiency examination:** Some, but not all, language departments on campus offer proficiency testing for students with advanced skills in that language. Please note that if a particular language is not taught on the Berkeley campus, then students are not able to test in that language. A student would then need to choose one of the other methods for fulfilling the foreign language requirement. Please speak with a PE advisor about proficiency testing.
- **Completion of high school in a non-English language:** Students who were educated in a non-English language through the completion of high school or the equivalent may wish to satisfy this requirement with that experience. Students must provide a transcript or diploma proving that they have been educated in this language at least through the completion of high school or the equivalent.

Lower Division

There are three required courses at the lower division level. Lower division requirements may be satisfied by:

1. Successfully completing the appropriate course or its equivalent;
2. Providing evidence of AP credit; or
3. With prior consent from an IAS adviser, satisfactorily completing an upper division equivalent. Please consult with the IAS office for current information.

Required Courses: Economics 1 or 2 or CS 3, IAS 45, Statistics 2 or 20 or 21.

Upper Division

There are nine required upper division courses spread among three major divisions: conceptual tools, including intermediate economics (*two courses*) and theory (*two courses*); historical context (*one course*); and concentration in the major (*four courses*).

Note: In fulfilling the upper division major requirements, students should keep in mind that no more than three courses outside the College of Letters and Science may be used in their major programs and no course used to complete major requirements may be taken on a *passed/not passed* basis.

I. Conceptual Tools

A. Intermediate Economics (two courses: one macro and one micro):

- **Microeconomics.** Choose one from the following: Econ 100A, 101A, IAS 106, UGBA 101A, EEP 100;
- **Macroeconomics.** Choose one from the following: Econ 100B, 101B, IAS 107, UGBA 101B.

(Students may choose from two different macro/micro series, e.g., IAS 106 Micro and Econ 100B Macro, as long as one micro and one macro course are taken. IAS 106 and 107 do not require a calculus background and are not equivalent to economics courses offered by the Economics Department and the Business School. Anyone intending to take additional upper-division Economics or Business courses should enroll in the appropriate macro and micro economics series.)

B. Theory (two courses: one classical and one modern):

- **Classical Theory (one course):** PE 100, Classical Theories of Political Economy (PE 100 must be taken before PE 101);
- **Modern Theory (one course):** PE 101, Contemporary Theories of Political Economy (Prerequisite: PE 100).

II. Historical Context

Choose one course from the following: CRP 112; Economics 113, 115; History 124A, 124B, 125B, 131B, 158C, 162B; PE 160; Poli Sci 122A; UGBA C172

III. Concentration

Four courses. Important to note: Within the Concentration, only 2 courses may be taken from the same department.

The PE Concentration is the theoretical focal point in the major. It is meant to give students the opportunity to deepen their understanding of political economy around an area of particular interest to them. The Concentration is perhaps the greatest benefit of the Political Economy major because it allows students to apply the theoretical and methodological knowledge they have gained to a topic about which they feel particularly drawn or curious. Students spend four courses focusing on this material, so it is important for students to be thoughtful and develop a topic about which they enjoy learning.

To get started on the Concentration, students should think about an existing or potential issue or question in political economy. Then they should choose four courses that will inform or increase their understanding about that issue. These courses should all relate to the topic as well as to one another. Students are encouraged to be imaginative in defining a Concentration. A Concentration issue is formulated by the student with the assistance of a PE advisor who can help to explain, clarify, or perhaps challenge that issue. Students having a difficult time formulating a Concentration should think about the classes they have taken which they enjoyed the most and consider what topics they learned about in those courses. Also, topics covered in IAS 45, PE 100, and PE 101 are a good place to start.

- Some sample Concentration topics include, but most certainly are not limited to:
- Public Policy & Socioeconomic Inequality in the U.S.
- Political Economy of China
- Environmental Policy in Post-Industrial Societies
- Development and Resource Distribution

Departments and Disciplines to consider when searching for concentration courses:

IAS (which includes courses in AS, DS, IAS, LAS, MES, PACS, and PE) has many course offerings which could fit a variety of concentrations, so students should start within IAS when searching for concentration courses.

In addition to courses offered by IAS, students might consider looking in the following departments or disciplines for classes relevant to their concentration topic:

- Political Science
- Economics
- Sociology
- Geography
- History
- Public Policy
- Environmental Economics and Policy
- Public Health
- Gender & Women's Studies
- Legal Studies
- Environmental Science, Policy, and Management
- Demography
- City and Regional Planning

Note: Courses from the departments and disciplines listed above are not guaranteed approval for a concentration, nor are students limited to the above list – this is just a good starting point.

When choosing Concentration courses, students should be mindful of the following:

- No more than two courses from the same department may count toward the Concentration
- Only courses that are demonstrably relevant to the Concentration topic will be approved. Therefore, it is not advisable for a student to take courses they hope to count for their concentration prior to getting declared. There is no guarantee they will be accepted for the major.
- Up to three courses taken abroad may count, provided they conform to the Concentration topic. A syllabus in English must be provided. (See page 8 of this handbook for more information about using study abroad courses to fulfill major requirements.)
- All courses, including those taken abroad, must be upper-division, 3 units or more, and taken for a letter grade.

Getting a Concentration approved

To have a Concentration approved, students must submit a two-paragraph description of the particular issue they would like to study. Students must also submit a list of their four proposed courses along with a brief explanation (one to two sentences each) of how each course relates to their proposed Concentration. Please use the form provided online. (<http://iastp.berkeley.edu/pe>) Concentration proposals must be submitted in person to a PE advisor along with the complete PE application. Students may be asked to provide syllabi for certain courses.

Please note that if an advisor determines a Concentration proposal needs to be developed further, it will not be submitted for review by the IAS Faculty Committee until revisions have been made. For this reason, it is best not to delay speaking with a PE advisor about Concentration topic ideas. Concentration proposals are reviewed by the IAS Faculty Committee and students are notified by email if their Concentration has been accepted or is being returned for revisions.

Note: Any subsequent changes to already approved Concentration topics and/or courses must be submitted to a PE advisor for review and approval by the IAS Faculty Committee prior to altering the Concentration.

Major Rules:

- No more than three upper-division courses may be taken outside of the College of Letters and Science, including courses taken at other universities, EAP, and Study Abroad.
- With the exception of Economics, no more than 3 upper-division courses may be taken from the same department. A total of four upper-division courses from the Economics Department may count, including intermediate micro and macro.
- Within the Concentration, only two courses may be taken from the same department.
- A cross-listed course will not always count in the department through which a student is enrolled. It will count in what is known to be the originating department of the course. Students who intend to enroll in a cross-listed course and to apply the course toward an upper-division major requirement should see a PE advisor prior to enrolling.
- Courses cannot be double-counted within the major (for example, students may not use 1 course to fulfill both a Concentration course requirement and the Historical Context course requirement).
- All courses in the major must be taken for a letter grade. The one exception is foreign language: only the fourth-semester level class must be taken for a letter grade. The first, second, and third semester language classes may be taken Pass/Not Pass.

Minor in Political Economy

PE offers a Minor in European Studies, which is open to all undergraduates *except* PE majors. Applications for the minor and a list of approved courses are available from the IAS Office. To apply for the minor, students must have completed one course in the minor with a grade of B or better, and must have an overall GPA of 2.0. The completed PE minor application and a "Completion of L&S Minor" form must be submitted to the IAS Office at 101 Stephens Hall no later than the last day of instruction of the semester immediately preceding the student's final semester. The "Completion of L&S Minor" form can be found on the L&S website here (<http://ls-advise.berkeley.edu/fp/00minor.pdf>). (<http://ls-advise.berkeley.edu/fp/00minor.pdf>)

To complete the minor, students must take six upper-division courses, including PE 100 and 101. The remaining four courses must be concentrated in two out of three specified fields (two courses per field):

- Politics
- Business and Economics
- Culture and Society

Note: The following college requirements apply to the PE minor program:

1. At least three of the upper-division courses must be taken at Berkeley
2. All courses satisfying minor requirements must be taken for a letter grade
3. Students must maintain a minimum GPA of 2.0 in all coursework used to satisfy the minor requirements
4. No more than one course may overlap with the student's major program

* contingent on adviser approval of section topic

Political Science

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 210 Barrows Hall, (510) 642-6323

Chair: Eric Schickler, PhD

Department Website: Political Science (<http://www.polisci.berkeley.edu>)

Major Requirements

For freshmen admitted to UC Berkeley in fall 2008 and onward, and junior transfers admitted to Berkeley fall 2009 and onward, the Political Science Major is now comprised of two introductory courses (from Political Science 1, 2, 4, 5), Political Science 3; eight upper division political science courses; and one history course for a total of 12 courses (48 units). Within the major, students are required to take at least one course (lower or upper division) in each of the five primary subfields—American Politics, Comparative Politics, Empirical Theory and Quantitative Methods, Political Theory, International Relations—and must also specialize in one subfield by completing the introductory course and two upper division courses in that subfield. Completion of any two of the introductory courses PS 1, 2, 4, or 5 is required to declare the major.

For freshmen who entered Berkeley prior to fall 2008, and junior transfers admitted prior to fall 2009, please consult the Political Science undergraduate advisers for your respective requirements.

Advanced placement credit does not satisfy any major prerequisites, but students scoring four or five on the American Government Advanced Placement Exam may substitute an upper division American politics course for Political Science 1, before or after declaring the major. This course, however, may not also be used to fulfill an upper division requirement.

A list of approved history courses, specific requirement information, and detailed course descriptions are available on the undergraduate program section of the department's website (<http://polisci.berkeley.edu/undergrad>).

All major requirements must be taken on a letter-grade basis.

To declare the major, students must have completed the minimum eligibility (see above), and must attend a declaration-orientation session. The session schedule is posted on the undergraduate program section of the department website (<http://polisci.berkeley.edu/undergrad>). (<http://polisci.berkeley.edu>) Declarations must be done in person. Transfer students may go to the website (<http://assist.org>) assist.org for a list of California community college courses that satisfy University and major requirements.

Honors Program

Declared political science majors with a 3.5 GPA in the major and a 3.3 GPA overall, who have senior standing and who have completed Political Science 3 and at least two letter-graded upper division political science courses at Berkeley are eligible to apply for the honors program. The honors program consists of a two-semester seminar, H190A and H190B (offered in fall/spring only), and culminates in the writing of an honors thesis. Students must also obtain the sponsorship of a member of the faculty who will guide the research. Applications can be made only online (<http://polisci.berkeley.edu/undergrad/opportunities/honors>); please refer

to the undergraduate program section of the website. Departmental honors are awarded upon completion of the honors seminar with a grade of B+ or better, a minimum GPA of 3.5 in the major, and a 3.3 in overall work at Berkeley.

Additional Information

Please consult the undergraduate advisers in 296 Barrows Hall and/or refer to the undergraduate program section of the department's website (<http://polisci.berkeley.edu/undergrad>).

Graduate Program

Information about the graduate program may be obtained from our website (<http://polisci.berkeley.edu/grad>).

Portuguese

Please see the Spanish and Portuguese Department (p. 204) for program and degree requirements.

Practice of Art

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 345 Kroeber Hall, (510) 642-2582

Chair: Hertha D. Sweet-Wong, PhD

Department Website: Art Practice (<http://art.berkeley.edu>)

Overview

Four goals underlie the teaching in the Department of Art:

1. To advance the body of knowledge of human experience through aesthetic investigation.
2. To help students learn to think visually.
3. To help students understand the strategies that artists have devised to deal with aesthetic problems in both traditional and nontraditional methods of artmaking.
4. To help students develop a creative intelligence through practicing a visual arts discipline.

While the undergraduate major is made up largely of studio courses, it also requires two courses in art history and one course in contemporary global art. An art student should be familiar with ways in which visual ideas have been manifested and developed in the past and how specific notions have affected the perception that human beings from diverse cultures have of themselves and their circumstances.

Work by students is featured in the exhibitions of the Worth Ryder Art Gallery, an adjunct educational facility that is open to the public.

Major Program

To declare the Art Practice major, students must have completed:

- Reading and Composition requirements
- A successful portfolio review

- Two required lower division studio courses (Art 8 and 12) and one lower division Art History course with an overall minimum GPA of 3.3

To complete the major, students must have completed 13 courses (five lower division and eight upper division).

Lower Division

Five courses:

- Art 8 and 12 (required)
- Two lower division elective studio courses selected from the following: Art 13, 14, 16, 21, 23AC, and 26
- One Art History course

Upper Division

Eight courses:

- Art 117 or 118 (required)
- Art 119 and 185 (required)
- Four upper division elective courses in Practice of Art
- One Art History course.

With the consent of the major adviser, a student may be given credit toward the major for up to two art-related courses taken outside the department, e.g., Theater, Dance, and Performance Studies; College of Environmental Design; Film & Media; Center for New Media; etc.

Transfer Students

Prospective art majors should contact the Department of Art Practice regarding their application to the major.

Honors Program

Students with an overall grade point average (GPA) of 3.5 or higher who are in their senior year may, with the permission of a regular faculty member, enroll in the honors program. This is an independent study course, taken for a minimum of one semester and a maximum of two semesters and comprising a minimum of four units and a maximum of eight units. A final grade is given at the completion of the program. Honors courses count toward the art major as they are taken for a letter grade.

Graduate Program

The Department of Art offers a two-year program of study leading to the Master of Fine Art (MFA) degree in the practice of art.

The Bachelor of Arts (BA) or Bachelor of Fine Arts (BFA) in studio art or its equivalent is prerequisite to the MFA degree.

For the MFA, students must complete a total of 64 units that include six graduate seminars, one 20th century art history course, one upper division course and four studio and independent study courses. Students must also produce a comprehensive body of creative work to be exhibited in the final M.F.A. exhibition.

Further information about this program may be obtained from the Practice of Art office, 345 Kroeber Hall.

Psychology

College of Letters and Science (<http://ls.berkeley.edu>)

**Department Office: 3210 Tolman Hall,
(510) 642-5292**

Chair: Richard Ivry, PhD

Department Website: Psychology (<http://ls.berkeley.edu/dept/psychology>)

Overview

Psychology as a scientific discipline aims to describe, understand, and predict the behavior of living organisms. In doing so, psychology embraces the many factors that influence behavior - from sensory experience to complex cognition, from the role of genetics to that of social and cultural environments, from the processes that explain behavior in early childhood to those that operate in older ages, and from normal development to pathological conditions. The Psychology Department at UC Berkeley reflects the diversity of our discipline's mission covering five key areas of research: Behavioral Neuroscience; Change, Plasticity & Development; Clinical Science; Cognition, Brain, & Behavior; and Social-Personality Psychology. Despite the existence of these specialization areas, our program learning goals focus on fostering methodological, statistical and critical thinking skills that are not tied to any one particular content area in psychology but are relevant for all of them.

Most of our program level goals are introduced in Psych 1 (General Psychology), which is the only lower division psychology course that is a prerequisite for the major. These goals are extended and reinforced in a majority of the upper division "core" courses. Our program is designed to ensure that all students gain broad exposure to the field of psychology. In addition, students are encouraged to develop a deeper understanding of at least one major content area in psychology.

1. The Major Program defines basic concepts that characterize psychology as a field of scientific inquiry; and appreciate the various subfields that form the discipline as well as things that differentiate it from other related disciplines. Develop an understanding of the central questions, issues in contemporary psychology.
2. Be familiar with the range of methods used to investigate psychological questions.
3. Develop skills to critically evaluate the presentation of scientific ideas and research in the popular media.
4. Develop competence in reading and evaluating original scientific papers.
5. Become familiar with the basic concepts of statistics and develop skills in evaluating information from a statistical perspective.
6. Develop and articulate, both orally and in written form, a testable hypothesis, or an argument drawing from an existing body of literature.
7. Develop competence in interpreting graphical data to understand what is being compared/manipulated (independent variables) and what is being measured (dependent variables).
8. Be familiar with the history of psychology as a field and different theoretical and empirical frameworks that have defined and shaped the field.

9. Apply a psychological principle to an everyday problem; or take an everyday problem and identify the relevant psychological mechanisms/issues.
10. Develop a deeper understanding of one of the major content areas of psychology (i.e., Social/personality, Developmental, Clinical, Cognitive, Biological).
11. Develop an understanding and an appreciation of how social (e.g., environmental/cultural), and biological (genes, hormones) factors jointly shape human behavior.
12. Develop an awareness of the importance of science to humanity while recognizing its limits (i.e., some scientific knowledge is culture specific and may not applicable to the human condition universally).

Psychology C19 (AP Biology with a score of 4 or 5 will satisfy one of the biological science prerequisites.)

4. Social Science: Two courses from Anthropology 3 or 3AC; Sociology 3 or 3AC; Linguistics 5; Philosophy 3, 4, 5, 12A, or 25B; Political Science 1, 2, or 4. *Note:* Each of the two courses must be from different departments. (AP US Government or AP Comparative Government with a score of four or five will satisfy one of these requirements; the other social science course may not be in Political Science.)
5. Quantitative: One course from Statistics 2, 20, or 21; Math 10A, 10B, 1A, 1B, 54 or 55 (AP Statistics with a score of 4 or 5 will satisfy this prerequisite.)

Note: The Math 10A-B series is highly recommended.

The Major Program

The major serves three purposes:

1. For the liberal arts student, the study of psychology provides an avenue for increased self-understanding and insight into the behavior of others. The objective study of behavior is one of the major themes of intellectual history of the last hundred-plus years.
2. For students preparing for training in such professions as medicine, law, education, and business, psychology provides important basic knowledge and principles.
3. For students who plan on pursuing graduate work in psychology, the undergraduate major seeks to establish a sound foundation of research principles and knowledge of a variety of content areas.

Lower Division Requirements

Admission to the Major

All students who apply to the major and meet the following criteria are guaranteed admission:

1. Complete all seven prerequisite courses.
2. Have a 3.2 grade point average (GPA) in prerequisite courses.
3. Students who entered Berkeley as freshmen are eligible to declare the major at the beginning of their third semester. They must declare the major by the fifth semester or by the accumulation of 80 semester units, whichever comes later. Students who entered Berkeley as a junior transfer must declare the major during their first semester at Berkeley.
4. Submit the application to the department by the posted deadline. *Note:* Please check department website for major application deadline; applications submitted after the deadline but before the end of the semester are considered late and are not guaranteed acceptance.

If any of the above criteria are not met, students may still be admitted to the major; however, admission to the major is not guaranteed. For applicants who are enrolled in prerequisite courses, applications will be processed after final grades are posted.

Prerequisite Courses (seven total courses)

1. Psychology: Psychology 1 (AP Psychology with a score of four or five will satisfy this prerequisite.)
2. Evolution: One course from Molecular and Cell Biology 41 or 41X; Anthropology 1; Integrative Biology 35AC.
3. Biological Science: Two courses from Molecular and Cell Biology 31, 32, 50, 61, 63, 64; Biology 1A, 1B, 11; Integrative Biology 31;

Upper Division Requirements (eight total courses)

Research Design and Methods: Psychology 101. (We strongly recommend that this course be taken as soon as possible once a student is admitted to the major.)

Tier II: a minimum of five courses and at least one in each area

Biological: at least one course from Psychology 110, 114, 125, C127

Cognitive & Development: at least one course from Psychology C120, 140

Social/Personality: at least one course from Psychology 150, 156, 160, C162, 166AC

Clinical: at least one course from Psychology 130, 131

Course Options	Biological	Cognitive & Development	Social/Personality	Clinical
Tier II: Survey Courses	Psych 110 Psych 114 Psych 125 Psych C127	Psych C120 Psych 140	Psych 150 Psych 156 Psych 160 Psych C162 Psych 166AC	Psych 130 Psych 131

Tier III: Additional upper-division Psychology electives

Select any three upper-division psychology courses numbered 104-182, except Psych 139. *Note:* Any excess survey courses can apply toward Tier III electives. Only one seminar (course number ending in "8") can apply toward elective requirements. Psychology 98, 99, 102, H194A-B, H195A-B, 197, 198, and 199 do not count toward the coursework requirement.

Note: All courses (both prerequisites and upper division) must be taken for a letter grade.

Honors Program

Admission to the honors program is limited to Senior Psychology majors who have a 3.5 GPA in the Psychology major and a cumulative GPA of 3.3 by the time of graduation. Students complete Psychology H195A and H195B (Honors Thesis) under the supervision of a Psychology faculty member. Honors students must recruit a sponsor and are encouraged to begin this process well before their senior year. Honors students are encouraged to take Psychology H194A and H194B (Honors Seminar). Evaluation of the thesis is the responsibility of the faculty adviser and the second faculty reader as assigned by the chair of the department. Additional information can be found on the department website. (<http://psychology.berkeley.edu>)

Research Experience

All majors are encouraged to gain hands-on research experience. Research opportunities are listed outside the Student Services Office in Tolman Hall and may also be found through campus organizations such as the Undergraduate Research Apprenticeship Program (URAP). Psychology 99 and 199 provide an opportunity to earn credit for research experience or supervised independent study on Psychology topics under the direction of a Psychology faculty member. The course is not required and must be taken on a passed/no passed basis.

Graduate Study Preparation

The Department of Psychology regards completion of an undergraduate major in psychology or a cognate field as the best preparation for graduate study. In addition to coursework, it is essential that students considering graduate work in psychology become involved in research during their undergraduate studies, and/or following the undergraduate degree. The number of qualified applicants always greatly exceeds the number admitted. Prospective applicants who have little or no background in psychology or research will have to seek such training prior to applying for graduate work.

Admissions

Our graduate program is a full-time day program and has no provision for accepting part-time or terminal MA degree students. Given the competition for admission, we suggest that potential applicants review their background and interests carefully before applying.

The Department invites applications from students who are primarily interested in research. Undergraduate research experience is helpful to have; this includes formal statistics/methods courses and special class projects, independent study projects, and part-time or volunteer work in research. All of our graduate program areas, including Clinical Science, have a strong research emphasis. We believe that competence in research and scholarship are prerequisites for leadership in teaching and public service in psychology.

Financial support is available to all enrolled students, and is guaranteed for the first five years of the program.

Graduate Training Programs

Psychology as a scientific discipline aims to describe, understand, and predict the behavior of living organisms. In doing so, psychology embraces the many factors that influence behavior - from sensory experience to complex cognition, from the role of genetics to that of social and cultural environments, from the processes that explain behavior in early childhood to those that operate in older ages, and from typical development to pathological conditions. The Department of Psychology at Berkeley reflects the diversity of our discipline's mission covering five key areas of research: Behavioral Neuroscience; Change, Plasticity & Development; Clinical Science; Cognition, Brain, & Behavior; and Social-Personality Psychology. Our program learning goals focus on honing methodological, statistical and critical thinking skills relevant to all areas of Psychology research; enabling students with sufficient breadth to retain perspective in the field of psychology and sufficient depth to permit successful independent and significant research.

The major academic objectives of the PhD program are for students to:

- Develop an understanding of the different theoretical and empirical frameworks that have defined and shaped the field

- Develop an understanding of the central questions and issues in contemporary psychology
- Develop expertise in one or more relevant research methodologies
- Build expertise in formulating testable hypotheses and designing appropriate studies
- Hone ability to critically evaluate scientific research
- Develop expertise in statistics and advanced data analytic approaches
- Develop an awareness of the importance of science to humanity while recognizing its limits (i.e., some scientific knowledge is culture specific and may not applicable to the human condition universally)
- Develop competence as a teacher of undergraduates and mentor to graduate students

Public Health

School of Public Health (<http://sph.berkeley.edu>)

Dean's Office: 417 University Hall, (510) 643-8451

Dean: Stefano Bertozzi, MD, PhD

School Website: School of Public Health (<http://sph.berkeley.edu>)

Undergraduate Program

The School of Public Health offers an undergraduate major through the College of Letters and Science (<http://ls.berkeley.edu>). The goal of the major is to provide students with an interdisciplinary understanding of epidemiology, biostatistics, environmental health, health behavior, and health policy. These areas of emphasis range across the spectrum of natural science to social science. Students in the program will develop and apply knowledge from multiple disciplines for the promotion and protection of the health of the human population, giving due consideration to principles of human rights and cultural perspectives that abound in a multicultural country and world.

Lower Division Requirements

- **Biological Science Requirement:** Biology 1B (required before declaration: minimum letter grade, B-); Biology 1A or two courses from the following: Molecular and Cell Biology 11, 32, 41, 50, 55, or 61; Nutritional Sciences 10
- **Mathematics Requirement:** Two courses from the following (or equivalent): Mathematics 32, 16A, 16B, or H16B, 10A, 10B, 1A, 1B or H1B
- **Social Sciences Requirement:** Three courses, drawn from at least two of the following groups: Psychology 1 or 2; Sociology 1, 3, 3AC, or 5; Economics 1, 2, or 3; Anthropology 3, 3AC, or 12AC; Political Science 2 or 4
- **Recommended:** Public Health 14

Upper Division Requirements

- Public Health 142, 150A, and two from the following: 150B, 150D, 150E, 162A
- Twelve units of elective courses are required. Students who plan to continue to graduate school are strongly advised to concentrate elective units in only one or two areas of study. Most other courses in

public health, including graduate level classes (but excluding the decal and group study courses), can also meet elective requirements.

- **Biostatistics:** DEMOG 110: Introduction to Population Analysis (3), MATH 53: Multivariable Calculus (4), MATH 54: Linear Algebra and Differential Equations (4), PH 143: Introduction to Methods in Computational Biology (4), PH 145: Statistical Analysis of Continuous-Outcome Data (4), STAT 134: Concepts of Probability (3), STAT 135: Concepts of Statistics (4), STAT 150: Stochastic Processes (3), STAT 151AB: Linear Modeling: Theory and Application (8), STAT 152: Introduction to Time Series (4)
- **Infectious Diseases:** ESPM 145: Arthropod-borne Zoonotic Diseases (2), ESPM 146: Medical/Veterinary Entomology (3), IB 131: General Anatomy (3), IB 132: Survey of Human Physiology (3), IB 137: General Endocrinology (4), MCB 102: Principles of Biochemistry and Molecular Biology (4), MCB 114: Introduction to Comparative Virology (4), MCB 130: Cell Biology (4), MCB 140: General genetics (4) or MCB 142: Survey of General Genetics (4), MCB 142: Survey of General Genetics (4), MCB 150: Molecular Immunology (4), MCB 160: Introduction to Neurobiology (4), PMB 110: Biology of Fungi (4)
- **Epidemiology:** CHEM 112A, B: Organic Chemistry (10), DEMOG 110: Introduction to Population Analysis (3), GEOG 130: Food and the Environment (4), IB 131: General Human Anatomy (3), IB 132: Survey of Human Physiology (3), IB 140: Biology and Sociobiology of Human Reproduction (4), MCB 140: General Genetics (4), MCB 152: The Immune System (4), PH 112: Global Health: A Multidisciplinary Examination (4)
- **Environmental Health Sciences:** CE 108: Air Pollution Emission and Controls (3), CE 109: Indoor Air Quality (3), CE 110: Water Pollution Control and Treatment (3), CE 111: Environmental Engineering (3), CE 113N: Ecological Engineering for Water Quality Improvement (3), CE 114: Environmental Microbiology (3), CHEM 112A, B : Organic Chemistry (10), ECON C102/EEP C102: Natural Resource Economics (4), EEP 131: Globalization and the Natural Environment (4), EEP 152: Advanced Topics in Development and International Trade (3), EEP 153: Population, Environment, and Development (3), EEP 161: Advanced Topics in Environmental and Resource Economics (4), EEP C151/ ECON C171: Economic Development (4), EEP C181/ ECON C181: International Trade (4), ENR 102: Quantitative Aspects of Global Environmental Problems (4), ERG 100: Energy and Society (4), ERG 102: Quantitative Aspects of Global Environment Problems (4), ERG 130: Analysis of Environmental Data (3), ESPM 155: Sociology and Political Ecology of Agro-Food Systems (4), ESPM 167: Environmental Health and Development (4), ESPM 168: Political Ecology (3), ESPM 169: International Environmental Politics (4), GEOG 123: Postcolonial Geographies (4), GEOG 130: Food and the Environment (4), GEOG 138: Global Environmental Politics (4), HIST 120AC: Environmental and Cultural History of America (4), IAS C175/EEP C175: The Economics of Climate Change, ISF 100D: Introduction to Technology, Society, and Culture (4), NUTRISCI 166: Nutrition in the Community (3), PHC 172: Pharmacology and Toxicology (3), SOC 121: Innovation and Entrepreneurship: Social and Cultural Context (4), SOC 166: Society and Technology (4)
- **Health Policy & Management:** CY PLAN 112A: The Idea of Planning (3), CY PLAN 120: Community Planning and Public Policy for Disability (3), ECON 157: Health Economics (3), ESPM 102D: Resource and Environmental Policy (4), LS 103: Theories of Law

and Society (4), LS 107: Theories of Justice (4), LS 165: Drug, Tobacco and Alcohol Policy (cross-listed with PP 162C) (3), LS 168: Sex, Reproduction and the Law (4), MASS COMM 102: The Effects of Mass Media (4), PH 116: Social, Political and Ethical Issues in Health and Medicine (2), PH 126: Health Economics and Public Policy (3), PH 180: Topics in Human Sexuality (2), PH 181 Population and Poverty (2-3), PH 183 History of Medicine and Public Health (3), PP 101: Introduction to Public Policy Analysis (4), PP 117AC: Race, Ethnicity and Public Policy (4), PP 156: Program and Policy Design (4), PP 179: Public Budgeting (4), PS 103: Congress (4), PS 150: The American Legal System (3), PS 171: California Politics (4), SW 112: Social Welfare Policy (3)

- **Community Health & Human Development:** AAADS 143: Asian American Health (3), CHICANO 176: Chicanos and Health Care (3), NUTRISCI 166: Nutrition in the Community (3), PH 103: Drugs, Health, and Society (2), PH 104 A/B: Health Promotion in a College Setting (2/2), PH 105: Policy, Planning and Evaluation of Health Promotion in a College Setting (3), PH 113: Campus/Community Health Impact Program (3), PH 114: Issues in Personal and Community Health Promotion (3), PH 14: Introduction to Public Health (4), PH107: Violence, Social Justice, and Public Health (2), PHC129: Aging and the Human Brain (3), PHC155: Sociology of Illness (3)

For more information, please visit the undergraduate page at the School of Public Health website (<http://sph.berkeley.edu/undergraduate-major/about-major/>).

Graduate Programs

The mission of the School of Public Health is to develop and apply knowledge from multiple disciplines for the promotion and protection of the health of the human population, giving due consideration to principles of human rights and cultural perspectives that abound in our multicultural country and world. The school carries out this mission with programs of teaching, research, and service. These programs, grounded in an understanding of the theory and mechanisms of the basic sciences, are integrated through a focus on communities that reach from the neighborhoods surrounding the campus to international settings.

Promotion and protection of the health of human populations require a scientific understanding of epidemiology, biostatistics, and the biological, physical, environmental, social, behavioral, informational, and administrative and policy sciences. In the School of Public Health, these and other disciplines focus on health problems of particular populations, selected diseases or disabilities, and issues associated with the application of resources to public health systems. SPH faculty, support resources, and curricula focus on both the fundamental disciplines and their applications to particular problems. Within the University and wider community, faculty strive to advance the understanding of the fundamental disciplines, apply them to problems faced by human populations, and provide the interdisciplinary context in which future public health practitioners and scholars may develop needed skills and capacities.

The program of study leading to the professional MPH degree is based on a series of foundation courses. In addition, MPH students concentrate in one of the following areas: Biostatistics, Environmental Health Sciences, Epidemiology, Epidemiology/Biostatistics, Health and Social Behavior, Health Policy and Management, Health Services and Policy Analysis, Infectious Diseases and Vaccinology, Interdisciplinary, Maternal and Child

Health, and Public Health Nutrition. The Doctor of Public Health (DrPH) (<http://sph.berkeley.edu/areas-study/doctor-public-health>) curriculum is based on a comprehensive body of knowledge in the field of public health and its related disciplines, and the investigation of significant problems in public health practice.

Programs of study leading to the following academic degrees are administered by groups of faculty from the School of Public Health and other departments:

- **Biostatistics** (<http://sph.berkeley.edu/areas-study/biostatistics>): MPH, MA, PhD
- **Environmental Health Sciences** (<http://sph.berkeley.edu/areas-study/environmental-health-sciences>): 2-year MPH, 11-month MPH, MS, MS in Global Health and Environment, PhD, MCP/MPH, Occupational and Environmental Medicine Residency Program (with UCSF)
- **Epidemiology** (<http://sph.berkeley.edu/areas-study/epidemiology>): 11-month MPH, MS, PhD
- **Epidemiology/Biostatistics** (<http://sph.berkeley.edu/areas-study/epidemiologybiostatistics>): 2-year MPH, MCP/MPH, MSW/MPH, MBA/MPH, MPP/MPH, MJ/MPH
- **Health and Social Behavior** (<http://sph.berkeley.edu/areas-study/health-social-behavior>): 2-year MPH, MSW/MPH, MCP/MPH
- **Health Policy and Management** (<http://sph.berkeley.edu/areas-study/health-policy-management>): 11-month MPH, 2-year MPH, MPP/MPH, MBA/MPH, MCP/MPH
- **Health Services and Policy Analysis** (<http://sph.berkeley.edu/areas-study/health-services-policy-analysis>): PhD
- **Infectious Diseases and Vaccinology** (<http://sph.berkeley.edu/areas-study/infectious-diseases-vaccinology>): 2-year MPH, PhD in Infectious Diseases and Immunity
- **Interdisciplinary** (<http://sph.berkeley.edu/areas-study/interdisciplinary>): MPH
- **Maternal and Child Health** (<http://sph.berkeley.edu/areas-study/maternal-child-health>): 2-year MPH, 11-month MPH, MSW/MPH
- **Public Health Nutrition** (<http://sph.berkeley.edu/areas-study/public-health-nutrition>): MPH

Applications for admission to the School of Public Health are accepted for the fall semester only, because of the sequencing of courses. To apply for graduate study, you must complete the UC Berkeley Graduate Application for Admission & Fellowships (<http://www.grad.berkeley.edu/admissions/index.shtml>) as well as the SOPHAS application (<http://www.sophas.org>) (the centralized application service for public health). Both applications must be electronically submitted online by December 1. Application instructions are available on the School of Public Health's website (<http://sph.berkeley.edu>).

Public Policy

Richard and Rhoda Goldman School of Public Policy (<http://gspp.berkeley.edu>)
Office: 2607 Hearst Avenue, (510) 642-4670

Dean: Henry E. Brady, PhD

School Website: Richard and Goldman School of Public Policy (<http://gspp.berkeley.edu>)

Overview

The Goldman School of Public Policy (GSPP) is one the nation's premier graduate institutions for education and research on the most pressing contemporary policy problems in American society and throughout the world. GSPP is an eclectic community of students, faculty, staff and visitors, all committed to the highest standards of policy analysis, intellectual rigor, and energetic policy debate.

GSPP was one of the first institutions in the United States established for the analysis and development of public policy. For almost four decades, it has been a leader in the teaching of methods of policy analysis using microeconomic, statistical, political, management, legal and information technology skills to help solve real-world problems.

The School is consciously multidisciplinary in its outlook and orientation. Its faculty is drawn from economics, political science, law, social psychology, demography, architecture, physics, and engineering. In addition, students can study with leading scholars in a variety of other disciplines and fields throughout the Berkeley campus.

Great emphasis is placed on team projects, on sharpening oral and written communication skills, and on creative thinking. Students have opportunities to work on policy problems for real clients and also to address scholarly and methodological issues in depth. The result is an exceptional learning experience, both inside and outside the classroom.

Our graduates have risen to leadership positions as policymakers, analysts, and managers at all levels of government, in the non-profit sector, in private institutions and in international organizations.

Undergraduate Courses

The undergraduate courses in public policy deal with the substance of public policy, how it is made, how its effects can be gauged, and what the purposes of policy should be. The courses consider both the policy process and particular policy issues. By examining different policy problems in their political and social contexts, students gain a greater sensitivity to the forces which shape and carry out public policies and to the impact of social, political, economic, and legal power.

Courses are designed for students in diverse disciplines and professional schools. There are no prerequisites for enrollment in the undergraduate courses unless specifically noted otherwise in the course descriptions. The training provided by the courses is useful to those interested in combining the substantive perspectives of the social sciences with the immediacy of contemporary problems; to those considering professional study; and to the informed and politically aware citizen.

Undergraduate Minor in Public Policy

The undergraduate minor in public policy introduces students from other departments and colleges to the field and practice of policy analysis. The

minimum requirements are five courses in public policy, at least three of which must be upper division. All classes must be taken at the School of Public Policy or from the approved list of courses outside of the School.

PP 101 is required of all students in the minor. Students must achieve at least a C average (2.0) in the five courses. When students complete the minor, the school notifies the Office of the Registrar. Completion of the minor will be noted on the students' transcripts of Berkeley work.

Graduate Programs

Graduate Courses

Through an examination of domestic and international policy areas, graduate courses enable students to conduct systematic work in the design and assessment of public policies. Among the skills emphasized are those facilitating the application of political, organizational, economic, quantitative, and legal analysis to the full range of the policy process—from policy initiation through policy adoption, implementation, and evaluation. By developing these skills, students should find their strengthened analytical capabilities of direct use when applied to their own field of concentration.

Master in Public Policy

The MPP degree is earned in a two-year, full-time program consisting of a core curriculum, a policy internship in the summer after completion of the first year, a second-year policy analysis project, and elective courses chosen from those available on the campus and at GSPP. The program emphasizes practical and applied dimensions of policy-making and implementation, encouraging students to develop skills in:

- Defining policy issues to make them more intelligible to officials in the public, private or non-profit sector;
- Providing a broader perspective for assessing policy alternatives;
- Examining techniques for developing policy options and evaluating their social consequences; and
- Developing strategies for the successful implementation of public policies once they have been adopted.

Given the relatively small class size, the School's approach to teaching emphasizes teamwork, cooperation, and interaction among students and with the faculty. Students work, either as individuals or in small groups, on real policy problems for real clients under close faculty supervision.

Coordinated Degree Programs with Other Berkeley Colleges and Schools

The MPP may be earned in combination with an advanced degree from only the following Berkeley schools and colleges under a coordinated program:

- MPP/JD with the UC Berkeley School of Law;
- MPP/MPH in health policy and administration with the School of Public Health;
- MPP/MA in international and area studies with the College of Letters and Science; or
- MPP/MS with the College of Engineering

PhD in Public Policy

GSPP offers a doctoral degree program for students who seek careers in policy research with universities or research institutes. Usually only three or four PhD applicants are admitted each year, including those admitted from the School's MPP students. Non-GSPP applicants who seek a

policy research career and have completed graduate work in public policy comparable to our MPP are also eligible for admission consideration.

The PhD program emphasizes the generation of knowledge, theories, methodologies, and applications appropriate to the advancement of public policy analysis and management. Doctoral students pursue highly individualized programs of study and typically work closely with school faculty members who share the student's subject matter interest.

Further Information

Brochures and information on admissions procedures and student financial assistance are available from the Goldman School of Public Policy, University of California, Berkeley, 2607 Hearst Avenue #7320, Berkeley, CA 94720-7320.

Punjabi

Please see the South and Southeast Asian Studies Department (p. 202) for program and degree requirements.

Range Management

College of Natural Resources,
(<http://www.cnr.berkeley.edu/site>)
Interdepartmental Graduate Group
Office: 133 Mulford Hall, (510) 642-6410

Chair: James Bartolome, PhD
Program Website: Range Management
(http://espm.berkeley.edu/gradprograms/grad_programs_msr.php)

Overview

The graduate program in range management is administered by an interdepartmental group of faculty members from the Department of Environmental Science, Policy, and Management (ESPM) and related departments at UC Berkeley. The program prepares students with a bachelor's degree in resource management or related disciplines to pursue advanced work. Graduate study leads to a Master of Science degree that serves as the basis for a professional career in rangeland management. Fields of specialization include grassland, savanna, and shrubland ecology, rangeland rehabilitation, wetland ecology, and rangeland policy.

Excellent laboratory and field facilities are available for student research. These include several experimental range properties and large wildland ranges easily accessible from Berkeley. The faculty is actively engaged in both theoretical and practical research.

Doctoral work in range management may be pursued as part of the PhD program in ESPM.

Religious Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Group Major Office: Division of Undergraduate and Interdisciplinary Studies, 231 Evans Hall, (510) 642-0108

Group Director: Charles Hirschkind, PhD (Department of Anthropology)

Group Website: Religious Studies (<http://ugis.ls.berkeley.edu/religiousstudies>)

Group Major

The religious studies major provides opportunities for securing a broad background in the liberal arts while at the same time allowing for a focus on a thematic concern or a particular religious tradition. It views religion from a global perspective and combines aspects of the humanities and the social sciences.

The major is open to anyone interested in the symbolic and mythic dimensions of world cultures, the ethical aspects of human societies, and existential issues. It is *not* restricted to those who have a religious background or are pursuing a religious vocation. Members of the major will be challenged to view religion multiculturally and from critical as well as appreciative perspectives.

Graduates in the program have gone on to careers in law, journalism, medicine, international business, counseling, and religious vocations. Others have entered graduate schools in history, sociology, anthropology, international policy, and religious studies.

The program requires both a general understanding of the study of religion as well as a particular emphasis on one specific tradition or thematic concern. The general requirement involves courses that present the methodological approaches to the study of religion such as sociology of religion and psychology of religion and courses that examine thematic issues and cross-cultural phenomena such as myth, ritual, transformative experience, and comparative ethics. The religious traditions that may be included as major fields of emphasis or as supplementary courses include the Jewish, Islamic, Christian, Hindu, and Buddhist traditions, as well as the religious cultures of China, Japan, Africa, and Native American communities.

Most of the courses available for the program are religion-related courses taught within such departments as history, sociology, and near eastern studies. As a supplement to these courses, the program offers a small number of courses sponsored by religious studies, including thematic topics of religion and the introductory courses (one of which surveys the world's religious traditions, and the other of which introduces the study of religious phenomena thematically).

The group major in religious studies is administered through the Division of Undergraduate and Interdisciplinary Studies. Students are referred to that office for all administrative matters.

Lower Division Requirements

Religious Studies 90A-90B, Introductory Topics in Religious Studies (4;4), to be taken before selecting a field of emphasis.

Upper Division Requirements

1. Two methodological courses from the following: Anthropology 158 (Religion and Anthropology), Geography 107 (Geography of Religions), Sociology 112 (Sociology of Religion), Religious Studies 190 (Topics in the Study of Religion) when topic is methodological.
2. Two thematic courses from the following: Classics 178 (Mythology) or Comparative Literature 165 (Myth and Literature), Religious Studies 115 (Mysticism) or Comparative Literature 125 (The Mystical Tradition in Literature), Religious Studies 190 (Topics in the Study of Religion) when topic is thematic.
3. Three courses in one of the fields of emphasis (see below).
4. Additional religion courses to make a total of at least 30 upper division units. The selection of these courses must be approved in writing by a major adviser (see the religious studies student affairs officer at the beginning of each semester for a current list of courses on topics in religion).

Fields of Emphasis

The field may be any cross-cultural theme (such as the study of ritual, myth, or ethics) in which three courses are available, a cultural period (such as the religious interaction of medieval Europe or modern Asia), or the study of a single religious tradition (such as Christianity or Buddhism). Courses available in religious traditions include the following:

- **Buddhism:** East Asian Languages (Chinese) 120, 122, 130. Additional courses: East Asian Languages (Chinese) 140. South Asian 127, 140. Recommended: Students intending to do graduate work in Buddhism should study Tibetan, Chinese, Sanskrit, Tamil, or Hindi.
- **Hinduism:** South Asian 121, 127, 140, 141, 155. Additional courses: History of Art 136A-136B-136C. Recommended: Students intending to do graduate work in Hinduism should study Sanskrit.
- **Judaism:** Near Eastern Studies 131, 132, 133, 134, 137. Additional courses: (Hebrew) 101A-101B, (Hebrew) 102A-102B, (Hebrew) 103A-103B, Near Eastern Studies 130A-130B, Religious Studies 120A. Recommended: Students intending to do graduate work in Judaism should study Hebrew.
- **Islam:** Near Eastern Studies 140, 141, 142, 143A-143B, 144. Additional courses: History 109A, Near Eastern Studies 121A-121B, (Arabic) 209A-209B. Recommended: Students intending to do graduate work in Islam should study Arabic.
- **Christianity:** Religious Studies 120A, or History 185A, Religious Studies 120B or History 156A, History 185B or 156A, Religious Studies 115. Additional courses: Classics (Greek) 105, English 107, English 110A-110B, History 108, Italian 109A-109B, Italian 130, Near Eastern Studies 131, 132, 134, Philosophy 182, 184, Religious Studies 190 (when topic is Christian). Recommended: Students intending to do graduate work in Christianity should study Latin, Greek, or German.

Honors Program

Students may elect to attempt graduation with honors if they have done well in both general university work and the major courses at the beginning of their senior year. Required are upper division work in a language relevant to the student's academic program (with consent of adviser) and the submission of a bachelor's thesis as a culmination of one or two semesters of the sequence, Religious Studies H195A-H195B. The thesis must be approved by both the adviser and the student's thesis director, if these are different.

Minor

Students in the College of Letters and Science may complete one or more minors of their choice, normally in a field both academically and administratively distinct from their major. Students wishing to receive a minor in religious studies should register in the group major office and work out a plan of study with an adviser. Students must take Religious Studies 90A and 90B and five upper division courses chosen from an approved list on file in the group major office. All courses must be completed on a letter-grade basis. A minimum of three of the five upper division courses must be completed at Berkeley, and a minimum overall GPA of 2.0 is required.

Rhetoric

College of Letters and Science (<http://ls.berkeley.edu>)

**Department Office: 7408 Dwinelle Hall,
(510) 642-1415**

Chair: Marianne Constable, PhD

Department Website: Rhetoric (<http://rhetoric.berkeley.edu>)

Overview

Rhetoric majors are trained in the history of rhetorical theory and practice, grounded in argumentation and in the analysis of the symbolic and institutional dimensions of discourse. The department offers both a pragmatic understanding of the elements of rhetorical analysis—with special attention to logic, style, tropes, figures, images—and a thorough grounding in the historical development of these elements in rhetorical theory. The combination allows students to make a disciplined grasp of the contemporary character of rhetoric and language. Through its emphasis on the history and theory of rhetoric, the department provides an understanding of the format of contemporary theories of interpretation as well as an opportunity, within this framework, to explore the role of persuasion in pragmatic and aesthetic contexts.

Note: The major is not intended to provide skills-based training in oral argument or communication.

Major Requirements

Undergraduates may concentrate in one of the following areas: history and theory of rhetoric, public discourse, and narrative and image.

Majors must complete the following course requirements:

1. Rhetoric 10 and 20 in the lower division
2. Rhetoric 103A and 103B in the upper division
3. Five additional upper division courses in Rhetoric (three in the specified area of concentration and one in each of the other areas).
4. Additionally, majors are required to take one course outside the department related to the specified area of concentration in the major.

Students must complete Rhetoric 10 or 20 with letter grades of C or better before declaring the major. These courses are prerequisite to all upper division courses unless otherwise specified. Lower division requirements should be completed by the start of the junior year. Rhetoric 103A and 103B should be completed in sequence during the junior year; senior year is recommended for coursework in the specified area of concentration.

However, concurrent enrollment in 103A and 103B and other upper division courses in rhetoric is permitted.

A C average in all upper division rhetoric courses and the designated course outside the major is required to finish the major program successfully. No course taken for a passed/not passed grade will be allowed toward credit for the major.

History and Theory of Rhetoric

This area focuses upon understanding the development of rhetorical theory and practice from its genesis in the classical period to its situation in the present. Students will consider how the discipline of rhetoric has both shaped and itself been shaped by social, political, technological, and intellectual developments over the course of two millennia. Individual courses will enable close study of the process of rhetoric's influence and adaptation, both in theory and in practice, in specific contexts throughout its history. Courses in this area include 104, 105T, 106, 107, 108, 109, 110, 112, 114, 116, 117, 118, 189.*

Public Discourse

This area focuses upon understanding rhetoric in its symbolic and institutional dimensions, with special emphasis on legal and political forums. Students consider the discourse of law, politics, and society both in theory and in practice, in an attempt to understand the rhetorical nature of political judgment, action, justice, and legitimacy. Individual courses will enable close study of specific problems, concerns, vocabularies, modes of interpretation, and strategies of argumentation arising in public forums of the past and present. Courses in this area include: 150, 151, 152, 152AC, 153, 155, 156, 157A-157B, 158, 159A-159B, 160, 162AC, 164, 165, 166, 167, 168, 170, 171, 172, 176, 182, 189 (if course topic is appropriate).

Narrative and the Image

This area focuses upon understanding the function of rhetoric in literary, cinematic, and visual texts, with emphasis on the role of figure and image in the representation of reality. Students consider the production and reception of narrative "literature"—oral, epic, folktale, lyric poem, novel, etc. and film—in an attempt to understand the boundaries of the aesthetic text as a rhetorical analysis of particular literary and visual genres arising in a variety of cultures and historical epochs. Courses in this area include: 121, 122, 123, 124, 127, 128T, 129, 129AC, 130, 131T, 132T, 133T, 134, 135T, 189 (if course topic is appropriate).

Declaring the Major

Declare rhetoric after completing Rhetoric 10 or 20 with letter grades of C or better. Obtain a "Petition to Declare the Major" form and the rhetoric major application from the undergraduate assistant in 7406 Dwinelle Hall. Present a copy of your transcript along with your petition and application to the undergraduate assistant for an approval signature and a brief orientation.

Passed or Not Passed

No course taken on a passed/not passed basis may be used to satisfy a requirement for the major or minor.

Honors Program

Seniors must complete Rhetoric 10, 20, 103A, and 103B and maintain a minimum 3.7 grade point average (GPA) in rhetoric and a 3.5 overall Berkeley GPA to undertake the two-semester honors thesis series, Rhetoric H190A-H190B. Students work under the supervision of a selected rhetoric faculty member. Four units of credit (2 units each semester) for the H190A-H190B sequence may be applied toward graduation as upper division units and fulfillment of one major upper

division course. Honors candidates who complete the 4-unit course with a letter-grade of A- or better and maintain the required GPAs will receive a BA with honors in the major.

Seniors eligible to enroll in the honors program must begin arrangements with the faculty member who is willing to direct their honors thesis in the semester before they enroll in H190A. See the undergraduate assistant for honors information and an application. Warning: Graduating honors candidates who complete the major requirements but take an incomplete in the H190A-H190B series must drop themselves from the degree list or honors will not appear on their official transcripts or diplomas.

Minor Requirements

The goal of the minor program in rhetoric is to introduce students to the methodological procedures and interdisciplinary approach of a field that examines all disciplines from the outside and poses such questions as: how is philosophy (or law, or politics, etc.) constituted as a field? What kinds of discourses are considered legitimate within this field? And what kinds of knowledge are produced and institutionalized as a result? To this end, minors are required to take Rhetoric 10, 20, 103A, and 103B. This combination provides an overview of philosophical discourse; literary and cultural discourse; theoretical inquiry into law, polity, and society; rhetoric and theory of film, as well as experience in a diachronic overview of the evolution of these fields. Three further upper division electives from courses numbered between 104- 182 and 189 are left to the discretion of the minor student. All courses used for the minor must be taken for a letter grade.

Graduate Program

The Department of Rhetoric offers an interdisciplinary PhD program focusing on the study of rhetorical theory and the interaction of the historical concerns of rhetoric with contemporary critical theory across a broad spectrum of disciplines. Crucial to the department's approach is an investigation into the rhetorical constitution of the arguments of such fields as law, politics, literature, film, and philosophy. The interests of faculty and graduate students thus range throughout these fields and are informed by a critical interest in the rhetoric of disciplines. During their first two years, graduate students explore major areas in the history and theory of rhetoric and pursue a variety of special topics in seminars. Beginning in their fourth semester, they concentrate in greater depth on preparation for their doctoral qualifying examinations and dissertation research. Six semester courses are required, of which at least five must be graduate courses in rhetoric. They must include Rhetoric 200 (The Origins of the Rhetorical Tradition), 205 (Modern Rhetorical Theory), and a seminar offered in the department whose focus is on rhetorical matters before 1800. Because of the department's commitment to interdisciplinary research, graduate students are encouraged at every stage of their careers to work with faculty in other departments. Please check with the department for a more detailed description.

Romance Languages and Literatures

College of Letters and Science (<http://ls.berkeley.edu>)

Graduate Office: 5309 Dwinelle Hall, (510) 642-8037

Program Director: Steven Botterill, PhD
(Department of Italian Studies)

Department Website: Romance Languages and Literatures (<http://romancelangs.berkeley.edu>)

PhD Program

The PhD in Romance Languages and Literatures is a doctorate in three Romance languages and literatures (French, Italian, and Spanish, including Spanish-American), prepared with emphasis in the literature or in the linguistics or philological history of one of the three. The program is intended to afford students the opportunity to undertake more detailed comparative studies among the Romance languages and their literary cultures than is normally the case in any single department's program. It is founded upon the belief that a truly comprehensive understanding of any of the major Romance languages and its literature must be nourished by a substantial degree of familiarity with all of them.

Students choose from among three plans whose prerequisites vary slightly. Plans I and II require a BA degree with studies in Spanish, Italian, or French, approximately equivalent to the undergraduate major at UC Berkeley (30 upper division semester units). Plan III requires either a BA degree with studies in Spanish, Italian, or French, as for Plans I and II, or a BA in linguistics with expertise in at least two major Romance languages.

Students are admitted for one of the three plans and present a combination of courses and personal study to satisfy the requirements of the particular plan chosen, developed in consultation with a graduate adviser and designed to prepare the students for the qualifying examination. Students designate one Romance field (choosing from among French, Italian, or Spanish and Spanish-American) as their emphasis; the remaining two languages and literatures are designated "collaterals." Applications for admission should be submitted to the department of the language and literature of major emphasis.

- **Plan I** requires a detailed knowledge of the major literature, knowledge of the first collateral literature as prescribed in a supplied reading list of 15 items, and knowledge of the master works of the second collateral as prescribed in a reading list of 10 items. In addition, familiarity with the linguistic history of the Romance languages, with emphasis on the major language, is required.
- **Plan II** requires a detailed knowledge of the major literature and a detailed command of one broad, integrated field (period, movement, or genre) in both of the collateral literatures, to be chosen by the student in consultation with a graduate adviser and in accordance with the student's special area of interest in the major literature. Individually tailored reading lists for both the collateral literatures (15 and 10 items, respectively) are to be developed by the student, as advised and approved by a faculty member of the department concerned. Familiarity with the linguistic history of the Romance languages, with emphasis on the major language, is also required.

- **Plan III** requires an in-depth knowledge of the structure and history (internal and external) of the major language, and an in-depth knowledge of either the history or the structure, depending on whether the student's preferred orientation is diachronic or synchronic, of the Romance language designated as first collateral.

Students are given three options with respect to the second collateral:

1. Familiarity with the history and structure of the third language.
2. Familiarity with the history and structure of a related Romance language (Catalan, Galician, Occitan, Portuguese, Rumanian, or Romance-based creoles).
3. Broadly defined field of linguistics (phonology, morphology, syntax, semantics, pragmatics, sociolinguistics), philology (textual criticism, medieval literature), or the application of linguistics to literature, the field to be chosen by the student in consultation with a graduate adviser.

Students will develop an individually tailored reading list for the option they choose, in consultation with and approved by an appropriate faculty member. The course entitled Linguistic History of Romance Languages, taken as either French C202, Italian C201, or Spanish C202, is also required.

In all plans, work beyond the requirements may be added in other Romance fields (such as Catalan, Portuguese, Occitan, or Rumanian).

General Requirements for all plans include fluency in the major language and reading knowledge of the collateral languages as well as Latin. Students must show a reading knowledge of any one of the languages by passing a written examination that the Department of Spanish and Portuguese coordinates for the program. For the remaining two, students may demonstrate reading knowledge by written examination; by holding a graduate student instructorship in the language in question; by passing, with a grade of B or better, an upper division or a graduate-level course in the literature of those languages; or, in the case of Latin, by passing Latin 1 and 2. A reading knowledge of German is also recommended.

Students in all three plans must also demonstrate knowledge of the linguistic history of the Romance languages. Students in Plans I and II are offered the option of satisfying this requirement either by passing, with a grade of B or better, the graduate course entitled Linguistic History of Romance Languages (French C202; Italian C201, or Spanish C202), or by examination during the qualifying examination. Study is guided, in the second case, by a standard reading list. The course is a required part of the program for students in Plan III.

Students in all plans take a qualifying examination. The qualifying examination committee is composed of a minimum of five members: three representing the main field of focus, a designated "outside" member from the student's first collateral, and one additional member representing the second collateral. This examination is oral and normally three hours long.

Once students successfully complete the qualifying examination, they will arrange with a faculty member to direct the dissertation and they will propose the remaining members of the dissertation committee together. The dissertation is expected to embody the results of original research on a subject chosen in consultation with the director.

The normative time allowance for completing the doctoral program is six years.

Graduate Courses

Students in the Romance Languages and Literatures degree program draw upon the full range of courses offered by the Departments of French, Italian Studies, and Spanish and Portuguese. Please refer to departmental listings in this bulletin.

Sanskrit

Please see the South and Southeast Asian Studies Department (p. 202) for program and degree requirements.

Scandinavian

College of Letters and Science (<http://ls.berkeley.edu>)

**Department Office: 6303 Dwinelle Hall,
(510) 642-4484**

Chair: Mark Sandberg, PhD

Department Website: Scandinavian (<http://scandinavian.berkeley.edu>)

Overview

The Department of Scandinavian offers undergraduate and graduate instruction in the languages, cultures, and literatures of northern Europe. Languages taught are Danish, Finnish, Norwegian, Swedish, and Old Norse-Icelandic. Lower division Reading and Composition courses based on Scandinavian materials are also offered. Lower and upper division lecture courses, all based on readings in English and open to those without a knowledge of Nordic languages, cover a wide variety of topics. The undergraduate major involves a program integrating the study of Danish, Finnish, Norwegian, or Swedish language with important aspects of Scandinavian culture and literature, and an undergraduate minor is also available. The graduate program leads to the PhD.

The department also administers the program in Celtic Studies (p. 65).

The Major

The major emphasizes one of four Scandinavian languages (Danish, Finnish, Norwegian, or Swedish), but in their coursework students explore all phases of Scandinavian literature and cultural history from the medieval to the modern across national boundaries. The major affords students the opportunity to pursue interdisciplinary interests through Scandinavian departmental courses and through double majors with other fields. Several of the areas in which Scandinavia has made a major contribution to Western culture are history, drama, medieval literature, folklore, architecture, public policy, linguistics, international studies, peace studies, political science, film, economics, and environmental studies. Students should consult with the undergraduate faculty adviser early on for advising and course planning to assist in achieving their goals.

Total units for the major: 46.

Lower Division Requirements (8 units)

Two courses taken from the following course sequences: Scandinavian 1A-1B (Swedish), 2A-2B (Finnish), 3A-3B (Norwegian), or 4A-4B (Danish), or their equivalents.

Upper Division Requirements (38 units)

Nine upper division courses taken from the following:

1. Two courses of one advanced language course sequence: Scandinavian 100A-100B (equivalent of intermediate/advanced Danish, Norwegian, or Swedish, 4 units each), or Scandinavian 102A-102B (equivalent of intermediate/advanced Finnish, 4 units each).
2. Two history courses from the following (8 units): Scandinavian 123 (4), 127 (4), or 128 (4).
3. Five courses in literature, culture, or folklore chosen from the following (20 units): Scandinavian 106, C107, C108, C114, 115, 116, 117, 123, 125, 127, 128, 132, 140A, 140B, 150, C160, 165, 170, or 180 (4 units each). Note: The undergraduate faculty adviser may approve substitutions for relevant courses taken in other departments or colleges or from the Education Abroad Program. Since Scandinavian 140A-140B is not offered consistently, the upper division courses listed under history, literature, culture, or folklore can be used as substitutes by permission of the undergraduate faculty adviser.
4. Two courses of Scandinavian 149, Major Research (1 unit each): In addition to the nine upper division courses above, students must also take two 1-unit courses of Scandinavian 149, Major Research, in conjunction with any of the upper division courses listed under literature, history, culture, or folklore. These 149 research courses must be taken by permission of the relevant instructor and the undergraduate faculty adviser.

Current majors will also want to consult the link on our website detailing upcoming courses (<http://scandinavian.berkeley.edu/courses/courses.html>).

Honors Program

Students must complete with distinction the courses required for the major as well as two semesters of Scandinavian 145, the Senior Seminar. A thesis is also required.

The Minor

Total units for the minor: 20.

Required Courses

Five upper division courses chosen in consultation with the undergraduate faculty adviser.

1. Minimum of one course in Scandinavian history: Scandinavian 123, 127, or 128.
2. Four electives.

Competency in a Scandinavian language is *not* required to take our upper division courses, which are usually taught in translation. Students interested in learning a Scandinavian language, however, may count both 100A and 100B (the second year courses in Danish, Norwegian, or Swedish) or 102A and 102B (second year courses in Finnish) toward the five course requirement.

Note: Students with credit from Education Abroad courses should consult with the undergraduate faculty adviser for help in determining requirement equivalencies.

Education Abroad Program

The University of California offers students the opportunity of studying abroad in Sweden (Lund University) and Denmark (University of Copenhagen). These programs feature language study with courses in culture, history, literature, architecture, and other areas within the humanities and social sciences. Many of the courses may be applied toward language courses and upper division credit in the major or minor. Students must consult with the undergraduate faculty adviser for approval before they leave. Details for programs are available from Berkeley Programs for Study Abroad (<http://studyabroad.berkeley.edu>), 160 Stephens Hall, (510) 642-1356.

Graduate Program

The graduate program in Scandinavian is designed for future scholars and teachers in the fields of Scandinavian language, literature, and cultural history. The Department's strengths lie in the areas of the modern literatures and film (Danish, Norwegian, and Swedish), and in Old Norse, folklore, and intellectual and cultural history. The Department is willing to consider applications from students with special interests in areas such as Scandinavian film, art and history. Prospective applicants interested in such areas may consult the graduate adviser or other faculty members and should detail their interests when applying for admission in their Statement of Purpose.

Preparation

Prospective graduate students should have a strong knowledge of one Scandinavian language, a good reading ability in at least one other Scandinavian language, and knowledge of the broad outline of Scandinavian literary, cultural, and intellectual history. The BA in Scandinavian, or its equivalent, is ordinarily prerequisite to admission. Students with less preparation may be admitted under the stipulation that deficiencies be corrected.

Master of Arts

Please note that the department does not accept applications for the MA as an ultimate degree goal. An MA examination is administered and degree conferred subject to satisfactory performance as a first step in the PhD program. The curriculum for the MA is intended to give broad coverage of a major field (e.g. Danish literature, Old Norse) and less extensive coverage of a second field (e.g. Danish novel, Romanticism, saga).

General Requirements: 24 units in Scandinavian, including at least 12 graduate units. Courses from other departments may be accepted with the consent of the graduate adviser. An examination will test the student's knowledge of both the major and the minor fields with emphasis upon the literature in the major language.

The PhD in Scandinavian

General Requirements: An MA in Scandinavian or equivalent preparation is prerequisite. Students must complete two semesters of work in Old Norse and submit three field papers as examples of their scholarly ability. There are no other specific requirements as to graduate coursework at this level, but students should enroll in units according to Graduate Division guidelines, keeping in mind that continued seminar work will benefit them in taking their PhD qualifying examinations. Seminar courses will also help students establish the skills necessary to write a dissertation and publish scholarly work, while forging collegial relationships with graduate student colleagues and faculty. Students will present three subjects at their qualifying examinations, a major and two minors. A reading knowledge of two foreign languages, generally

German and French (German and Latin for students majoring in Medieval literature) must be demonstrated before the student attempts the Qualifying Examination. Upon passing the qualifying examination the student is advanced to PhD candidacy and begins dissertation research.

Science and Mathematics Education

Graduate School of Education (<http://www-gse.berkeley.edu>)

Group Office: 4533 Tolman Hall, (510) 642-4207

Overview

The Group in Science and Mathematics Education offers a graduate program designed to allow students to combine advanced training in one of the natural sciences, computer science/engineering, or mathematics with the pursuit of central interests in the area of education. Students enrolled in the program will be expected to attain in their chosen scientific discipline a degree of competence comparable to that of a departmental PhD candidate in that discipline. Their thesis research will consist of a project dealing with the development of improved educational approaches research on new instructional models or basic research on learning or cognition in mathematics and science. Upon satisfactory completion of their studies and thesis work, students will obtain the degree of PhD in science and mathematics education.

Admission Requirements

To enter the program, students must have an excellent academic record with a bachelor's or, preferably, a master's degree in a natural science, mathematics, or engineering/computer science. Experience teaching, developing instructional materials, or doing educational or psychological research in these areas will also be favorably considered. Knowledge of psychology, cognitive science, education, or statistics is helpful but not required.

More detailed information about the program and its requirements can be obtained from the group office.

Science and Technology Studies

Interdepartmental Graduate Group
Program Office: 542 Stephens Hall, (510) 642-4581

Program Director: David Winickoff, JD
(Department of Environmental Science, Policy, and Management)

Program Website: Center for Science, Technology, Medicine, and Society (<http://cstms.berkeley.edu>)

Overview

The Center for Science, Technology, Medicine, & Society (CSTMS) at UC Berkeley promotes rigorous interdisciplinary research based on the conviction that the pressing problems of our time are simultaneously scientific and social, technological and political, ethical and economic.

As a laboratory for the 21st century university, CSTMS conducts cross-disciplinary research, teaching, and outreach on the histories and implications of scientific research, biomedicine, and new technologies.

The Center's core mission is to:

- catalyze cross-disciplinary research on knowledge production and technological change in the past, present, and future;
- train new generations of undergraduates and graduate students in multiple literacies; and,
- generate broader impact with rapid response forums and major public events on the pressing issues of our time.

CSTMS convenes students and faculty in the social sciences and humanities, the professional and medical schools, engineering, and the natural sciences to advance collaborative accounts of our complex world. We provide a space and dialogue on the implications of new technologies, from geo-engineering to synthetic biology. We provide support for faculty and graduate students seeking extramural grants, and we seek to integrate leading academic research in science and technology studies with the work of policy makers, communities, and non-governmental organizations. We also promote the study of the interface of medicine, the humanities, and the qualitative social sciences. Through all of these activities, the Center seeks to place Berkeley at the leading edge of global science studies by foregrounding research and training on the transnational dynamics of knowledge production, technological innovation, and inequalities.

Graduate Programs

Designated Emphasis (DE)

The Designated Emphasis (DE) in Science and Technology Studies (STS) is a new program of training in the social studies of science, technology, and medicine for Berkeley and UCSF PhD students from any home department. Students who are accepted into the program, and who complete its requirements, will be in a strong position to excel within STS-related fields.

Students in this program receive a rigorous grounding in the studies of knowledge production and technological change. The program also facilitates a deeper involvement with the lively interdisciplinary research community at Berkeley dedicated to understanding the dynamic relations among science, technology, and social and political formations.

Upon completion of all requirements and the dissertation, your transcript and diploma will read "PhD in [Home Department] with Designated Emphasis in STS."

Course Requirements

The DE in STS requires students to complete two core courses as well as three 'breadth' or elective courses during their PhD work, in addition to any requirements of home departments. We do not expect you to have completed all of these courses before you apply for the DE; you may take some of them as schedules and space permit.

Core Course Requirements

The following courses are required:

- **STS 200: Science and Technology Studies: Theories and Methods.** Usually offered in Fall term. This course provides a strong foundation in the interdisciplinary field of STS, with a focus on major theoretical trajectories, research methodologies, and new directions in the field.

- **STS 250: Research Seminar.** Usually offered in Spring term. This seminar is for students within the DE who have completed their Qualifying Exams and have advanced to candidacy. Students in the seminar will develop their research and writing projects in the context of interdisciplinary collaboration and dialogue.

Elective Requirements

Students are also required to take three elective courses that place a critical engagement with science, technology and/or medicine at their core. To foster interdisciplinarity, no more than two of these electives can be taken from the student's home department. As a package, the three elective courses are expected to enhance the student's capacity to understand and analyze how science and technology operate through and within ethical, historical, social or cultural formations.

The following is an indicative list of elective courses, by department:

- **Anthropology:** ANTHRO 210, Current Topics in Bioanthropology; ANTHRO 219, Topics in Medical Anthropology; ANTHRO 250G, Biopolitics, Biomedicine, Bioethics; ANTHRO 250X, Thinking with the Copy; ANTHRO 250X, Special Topics: Life and Life Science; ANTHRO 250X, Special topics: Anthropology of the Contemporary; ANTHRO 280C, South Asia: "Hope and Futurity"
- **City and Regional Planning:** CY PLAN 254, Sustainable Communities; CY PLAN 256, Healthy Cities; CY PLAN 282, Planning and Governing
- **English:** ENG 203, Graduate Readings: On Life
- **Energy and Resources Group:** ENE, RES 275, Water and Development
- **Environmental Science, Policy, and Management:** ESPM 256, Science, Technology, and the Politics of Nature; ESPM 260, Governance of Global Production; ESPM 261, Sustainability and Society; ESPM 263, Indigenous, Feminist, and Postcolonial Approaches to Science, Technology, and Environment; ESPM C255, Seminar in Sociology of Forest and Wildland Resources
- **Geography:** GEOG 203, Nature and Culture: Social Theory, Social Practice, and the Environment
- **Gender and Women's Studies:** GWS 232, Transnational Feminist Approaches to Knowledge Production; GWS 237, Transnational Science, Technology, and New Media; GWS 238, Feminist Bio-Politics
- **History:** HISTORY 275S, Introduction to the History of Science; HISTORY 280S, Drugs in World History; HISTORY 280S, Science and Late-Modern Empires; HISTORY 290, Historical Colloquium
- **Information:** INFO 203, Social and Organizational Issues of Information; INFO 205, Information Law and Policy; INFO 212, Information in Society; INFO C283, Information and Communications Technology for Development; INFO 290A, Information Technology and Identity: The Future of Storytelling
- **Public Health:** PB HLTH 213A, Family Planning, Population Change, and Health; PB HLTH 222A, Health Care Technology Policy; PB HLTH 230, Advanced Health Politics
- **Public Policy:** PUB POL 282, Environment and Technology from the Policy and Business Perspective; PUB POL 284, Energy and Society
- **Rhetoric:** RHETORIC 104, The Unconscious in Modern Culture

Research and Committee Requirements

Your PhD Qualifying Exam Committee must include at least one member of the DE Affiliated Faculty (<http://cstms.berkeley.edu/teaching/de-in-sts/#Faculty>) who will evaluate your knowledge related to the Designated Emphasis. Your PhD dissertation topic must be related to Science and

Technology Studies, and your PhD Dissertation Committee must include at least one member of the DE Affiliated Faculty who can evaluate it from that perspective.

You are also encouraged, though not required, to be an active member of the STS Working Group (<http://cstms.berkeley.edu/working-groups/sts-working-group>).

Impact on Normative Time to Completion

Due to the interdisciplinary nature of training and research in the Designated Emphasis in STS, and depending on your background, completion of the DE could add time to your total program. Please note that no additional time can be added to your home department's established normative "time to degree" to compensate for this.

How to Apply

Applications are due November 1st each year. Interested students should apply at least 3 months before their PhD qualifying exams.

The program is open to all UC Berkeley PhD students in good standing with research interests related to the humanistic and social studies of science and technology, broadly conceived. Students may come from any discipline in the humanities, the social sciences, engineering, the natural and physical sciences, and professional schools across campus.

Applicants will be selected on the basis of their academic qualifications, the appropriateness of their interests to the program's teaching resources, and the enrollment capacity of the required courses.

The student must submit an application containing the following:

1. One-page letter of intent summarizing research interests, educational or employment background, and any related coursework in areas related to Science and Technology Studies
2. Petition for Admission to the Designated Emphasis in Science and Technology Studies (download it here (<http://cstms.berkeley.edu/wp-content/uploads/2011/10/Petition-for-Admission-DE-in-STS-Fall2013.doc>))
3. Graduate Petition for Change of Major or Degree Goal (to indicate your interest in adding the Designated Emphasis) (get it here (<http://registrar.berkeley.edu/GeneralInfo/electforms.html>))
4. A list of courses the student would use to satisfy the elective requirement (Optional but encouraged).
5. A writing sample (eg, a paper you have written for a UC graduate course) that is indicative of your research interests.

In addition, applicants should ask for a Letter of Recommendation from a member of the Science and Technology Studies Affiliated Faculty group.

Applications should be sent as a single email, with a single PDF attachment with all required materials (#1-5) to the address below. Applicants should ask the Affiliated Faculty member to send his or her recommendation directly to Prof. Winickoff, preferably by email:

Professor David Winickoff (winickoff@berkeley.edu, CCing cstms@berkeley.edu)

Director, Designated Emphasis in Science and Technology Studies
CSTMS

543 Stephens Hall, UC Berkeley

Semitics

Please see the Near Eastern Studies Department (p. 166) for program and degree requirements.

Slavic Languages and Literatures

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 6303 Dwinelle Hall, (510) 642-2979

Chair: Irina Paperno, PhD

Department Website: Slavic Languages and Literatures (<http://slavic.berkeley.edu>)

Related Course Descriptions:

East European Studies (p. 488)

Eurasian Studies (p. 637)

Overview

The Department of Slavic Languages and Literatures provides instruction in the languages and cultures of Russian and other Slavic peoples—Czech, Polish, and Bosnian, Croatian, Serbian (BCS)—as well as some of the non-Slavic peoples of Eastern Europe (Hungarian) and Eurasia (Armenian). In addition to language and literature, our department teaches different aspects of Slavic cultures, including film, drama, visual arts, popular culture, critical theory, religious thought and cultural history.

Majors

The department offers three different major tracks. The **major track in Russian/East European/Eurasian Cultures** offers an interdisciplinary "area studies" approach. For this major track, two years of study (or the equivalent) in Russian or another language are required. The **major track in Russian Language and Literature** focuses specifically on Russian language and literature. It requires three years of language coursework (or the equivalent). The **major tracks in other Slavic languages and literatures** allow students to focus intensively on Czech, Polish, or BCS (Bosnian, Croatian, Serbian).

Major Track in Russian/East European/Eurasian Cultures (50-52 units)

This major track integrates the study of languages and cultures of a large area: Russia, East Central Europe, Southeastern Europe and Eurasia. Students design their own programs by selecting courses offered by the Slavic department and other departments such as History, Political Economy, Geography, Political Science, Peace and Conflict Studies, Anthropology, and others. While all majors in this track will gain some knowledge of the whole area, the program also allows each student to (1) emphasize a specific cultural region, (2) to compare different regions, and/or (3) to define a particular field of study. Students are advised to see the major adviser in advance to prepare an individualized study list plan.

Requirements

Lower Division (21-24 units)

- Four semesters of one language of the area (18 to 20 units) or the equivalent, as determined by examination. Russian and East European heritage speakers: See the department website (<http://www.ls.berkeley.edu/dept/slavic>) for language placement approval instructions.

www.ls.berkeley.edu/dept/slavic) for language placement approval instructions. The department highly recommends additional exposure to language, through coursework, intensive summer language programs, or the UC Education Abroad Program. Languages regularly offered by this department that can be used for the major are Russian, Polish, Czech, BCS (Bosnian, Croatian, Serbian), Hungarian, and Armenian.

- One lower division course in the Slavic department: Slavic 50, Introduction to Russian, East European and Eurasian Cultures. In rare instances, and with permission of the major adviser, it may be possible to substitute another lower division course in the department relevant to the major, e.g., Slavic, 39, 45, 46.

Upper Division (28 units)

REQUIREMENT FOR NEW MAJORS DECLARING SPRING 2014

ONWARD: Slavic 100 (Seminar: Russian, East European, and Eurasian Cultures for 4 units) offered each Fall beginning Fall 2014.

- One cultural topics course: Slavic 148, Topics in Russian Cultural History, or Slavic 158, Topics in East European and Eurasian Cultural History.
- One relevant course in the Department of History, e.g., History 171A, 171B, or 171C (History of Russia); 172 (Russian Intellectual History); 173 or 174A (History of Eastern Europe, History of Poland-Lithuania); 177A or B (History of Armenia).
- Four courses chosen from the upper division offerings of the Slavic department, and the following courses from outside departments: Geography 55C; Political Science 129B, 129C, 141A, 141C; Sociology 181. With permission of the major adviser, students may utilize relevant courses from the following departments: Anthropology, Political Economy, Comparative Literature, Economics, Journalism, Legal Studies, Peace and Conflict Studies, Theater, Dance, and Performance Studies.

Variations: With permission of the major adviser, up to two upper-division language courses (taken in addition to the initial four semesters of the same language) may be counted among these four electives. Similarly, up to two lower- or upper-division language courses in another language relevant to the program of study may be counted.

Major Track in Russian Language and Literature (53-56 units)

This major track integrates the study of Russian language, literature, and culture. Students will learn what defines Russia's unique place in civilization, both in earlier times and in today's world. Students are advised to see the major adviser in advance to prepare an individualized study plan. Students may declare the major after completion of Slavic 2 and either Slavic 45 or 46.

Lower Division (26 units)

- The first four semesters of Russian (Slavic 1, 2, 3, 4) or the equivalent. Russian heritage speakers: See the department website (<http://www.ls.berkeley.edu/dept/slavic>) for language placement approval instructions.
- A two-semester survey of nineteenth- and twentieth-century Russian literature (Slavic 45 and 46).

Upper Division (27-30 units)

REQUIREMENT FOR NEW MAJORS DECLARING SPRING 2014

ONWARD: Slavic 100 (Seminar: Russian, East European, and Eurasian Cultures for 4 units) offered each Fall beginning Fall 2014.

- Advanced Russian language (Slavic 103A, 103B) and Russian conversation (Slavic 120A or 120B).
- One literature course with readings in Russian (Slavic 180**, 181, 182 or 188).
- One Russian literature class in English translation (Slavic 131, 132, 133, 134A, B, C, D, E, F, G, or N).
- One course in culture selected from the following: Russian culture (Slavic 130, 131, 140, 148, 190), or the literatures of other Slavic peoples (Slavic 150, 160, 170), folklore (Slavic 147A or 147B), linguistics (Slavic C137), or film (Slavic 138).
- One upper division elective course (3 or 4 units) in Russian language, literature, or culture selected from the courses listed above. Relevant courses from other programs—for example, History—may be substituted with the permission of the major adviser.

**Infrequently offered

Major Track in Czech, Polish, or BCS (Bosnian, Croatian, Serbian) Language and Literature (53-56 units)

With advance consultation, students may pursue a major track in Czech, Polish, or BCS (Bosnian, Croatian, Serbian). Advance consultation with the major adviser is critical, since not all required courses are offered each year.

Lower Division (26 units)

- Slavic 1 and 2 (2 semesters of elementary Russian), 10 units
- Two lower-division courses in literature and culture chosen from Slavic 36, 39, 45, 46 or 50 (6 units)
- Two lower-division course in the target language [Slavic 25A-25B (Polish), 26A-26B (Czech), 27A-27B (BCS: Bosnian, Croatian, Serbian)], 10 units.

Upper-division (27-30 units)

- **FOR NEW MAJORS DECLARING SPRING 2014 ONWARD:** Slavic 100 (Seminar: Russian, East European, and Eurasian Cultures for 4 units), offered each Fall beginning Fall 2014.
- 8 units of intermediate language: Slavic 115A-115B (Polish), 116A-116B (Czech), or 117A-117B (BCS).
- 3 units of a survey course in the relevant literature (Slavic 150, 160, or 170; or with the appropriate content and permission of the major adviser, Slavic 158).
- 7 units of two additional courses in the relevant literature in the original (Slavic 151-152, 161-162, or 171-172).
- A plan of study, designed in advance in consultation with the major adviser, consisting of two relevant electives (3-4 units each) in Russian or European literature and history.

Honors Program

Slavic majors with a minimum GPA of 3.3 overall and in courses for the major are invited to consult with members of the faculty and the major adviser in the spring of their junior year about the honors program and a thesis topic. Requirements for the honors program in Slavic include: (1) an additional upper division Slavic course chosen by the student, and (2) an honors thesis course (H195). In the honors thesis course, normally taken during the fall semester of the senior year, the student will write a thesis under the direction of a member of the faculty (the thesis director). In order to enroll in H195, students must file an application with

the department (available from the Undergraduate Student Services Adviser). This application includes a preliminary statement of the thesis topic and the names and signatures of the honors committee—the faculty director and one additional faculty member, who also read the completed thesis—and the department chair.

Minors

The department offers a range of minors in Russian and other Slavic languages, literatures, and cultures. Students normally discuss the possibility of doing a minor with the faculty or staff major adviser well before graduation, although the "Completion of L&S Minor" form is completed with the major adviser in the student's final semester. Courses used to satisfy major and minor requirements must be taken for a letter grade.

Minor Tracks

The department offers minors in (a) Russian language, (b) Russian literature (requiring no knowledge of Russian), (c) Russian language, literature, and culture, and (d) Slavic languages/literatures with an emphasis in either Czech, Polish, or BCS (Bosnian, Croatian, Serbian) language and literature.

Requirements

The basic course requirement for each of the minors is five upper division courses, all completed for a letter grade. Three of them must be completed at Berkeley. The minor is in a field academically distinct from the student's major. An overall GPA of 2.0 in upper division courses applied to the minor program is required. Students must see the major adviser early on to formulate a study list plan leading to the completion of a minor. The minor paperwork ("Completion of L&S Minor" form) is completed with the major adviser in the student's final semester at Berkeley.

Restrictions to Minor Tracks: (1) Russian native speakers may choose only the minor in Russian literature; (2) Russian heritage speakers may choose any minor except the minor in Russian language; and (3) native or heritage speakers of an East European language may choose any minor that does not utilize their native/heritage language. Note: Native or heritage proficiency is determined by the major adviser in consultation with the relevant faculty language coordinator. Final approval for a minor rests with the major adviser.

Minor in Russian Language, Literature and Culture

- Prerequisites: Four semesters of elementary and intermediate Russian (Slavic 1, 2, 3, and 4, or equivalent). Russian heritage speakers: See the department website (<http://www.ls.berkeley.edu/dept/slavic>) for language placement approval instructions.
- Five upper division courses (3 or 4 units each) in Russian language and Russian or other Slavic literatures and cultures. Students may choose courses in any combination, in consultation with the major adviser. A course from another related program (for example, Comparative Literature) may be substituted with approval of the major adviser.

Total lower division units: 20

Total upper division units: 15-20

Minor in Russian Language

- Prerequisites: Four semesters of elementary/intermediate Russian (Slavic 1, 2, 3, and 4, or equivalent).
- Four semesters of advanced Russian (Slavic 103A-103B, plus two courses chosen from Slavic 104A*, 104B*, 180**, 181, 182, 188); advanced Russian conversation (Slavic 120A or 120B).

Total lower division units: 20

Total upper division units: 16-20

*Courses not currently offered

**Infrequently offered

Minor in Russian Literature

- Prerequisites: Surveys of Russian literature (Slavic 45, 46).
- One course on the culture of Russia or other Slavic nations (chosen from Slavic 130, 138, 140, 147A, 147B, 148, 150, 160, 170).
- Four courses in Russian literature (chosen from Slavic 132, 133, 134A-134B-134C-134D-134E-134F-134G-134N, 136, 140, 180**, 181, 182, 188).

Total lower division units: 6

Total upper division units: 19-20

**Infrequently offered.

Minor in Czech, Polish, or BCS (Bosnian, Croatian, Serbian) Language and Literature

- Prerequisites: Appropriate first-year language sequence (Slavic 25A-25B, 26A-26B, or 27A-27B) or equivalent. Note: Native and heritage speakers of an East European language may choose any minor that does not utilize their native language. See the department website (<http://www.ls.berkeley.edu/dept/slavic>) for language placement approval instructions.
- Two advanced language courses in the target language: Slavic 115A-115B (Polish), 116A-116B (Czech), 117A-117B (BCS).
- One course in the relevant literature survey (Slavic 150, 160, or 170).
- Two courses in the relevant literature (Slavic 151 and 152 or 161 and 162 or 171 and 172) or substitutes approved by the major adviser.

Total lower division units: 10

Total upper division units: 17-18

Education Abroad

The Slavic department actively encourages students to participate in study abroad programs in Russia and other Slavic countries. Through the UC Education Abroad Program, students may spend a fall semester in St. Petersburg, which provides intensive work on Russian language, literature, and culture. There is also a program sometimes offered in Budapest featuring Central European studies. Other institutions also offer programs in Russia and other Slavic lands, both during the school year and summer. Please consult with the major adviser for information about these programs.

The Slavic National Honor Society and Department Events

The Berkeley Chapter of Dobro Slovo, the National Slavic Honor Society, is part of a nationwide honor society that recognizes outstanding

achievement in Slavic studies. Students who meet the grade point average and academic requirements are invited by the faculty undergraduate adviser to join during the spring semester of their senior year.

Our campus hosts many Slavic-related lectures, concerts, films, conferences, and other events. A weekly Russian conversation hour is one of the Slavic department's most lively institutions. The Polish Circle and Czech Circle meet regularly for discussions and social events. Film showings—of classic and contemporary films from Russia and other countries—are periodically organized by graduate students.

Graduate Programs**Admission to Graduate Study**

The Department offers a synthetic approach to the study of language, literature, and culture. The most common career choice of our graduates is teaching at the college level, although some also pursue careers in writing, publishing, public and government service, and other fields in the humanities. Applicants must have completed an undergraduate major program in Slavic languages and literatures or received equivalent training. Prospective and current students are encouraged to acquire a background in other related fields—for those in literary studies, European languages and literatures (especially French, German, and English), literary theory, Russian and Western European intellectual history are useful; for those in linguistics, preparation in French, German, Greek or Latin, and/or in general and comparative linguistics is desirable.

We select our graduate students on the basis of prior academic achievement and promise of success in scholarship and teaching. Students admitted to the PhD program with an MA in Slavic or a related field from another institution are required to pass a screening (permission-to-proceed) examination. Students who have earned the MA degree from this department may receive permission to proceed to the PhD program following successful performance on the MA comprehensive examinations and demonstrated aptitude for advanced work. The department does not accept applications for a terminal MA program of study.

Students are admitted to the PhD or MA/PhD program with a focus in Russian, Polish, Czech, Bulgarian, and BCS (Bosnian, Croatian, Serbian) each with an emphasis in literature or linguistics. The department will not consider applications for an M.A. only. Detailed descriptions of requirements are available from the department website (<http://ls.berkeley.edu/dept/slavic>). Described below are programs focusing on Russian literature and on linguistics. Students who choose other Slavic literatures as their major field are offered individual programs of study.

MA Coursework**Russian Literature Program**

- Required skills and methods courses: Proseminar in literary scholarship, Old Church Slavic, Russian stylistics, descriptive grammar, proficiency maintenance
- Selected courses in history and theory of literature to be chosen from offerings that include Eighteenth-Century Literature, Slavic Literary Theory, Sentimentalism and Romanticism, Realism, Modernism, Poetry, and Contemporary Literature
- Graduate research seminars (topics vary): at least one is required.

Instruction in Polish, Czech, BCS (Bosnian, Croatian, Serbian), and Bulgarian is offered to both MA and PhD students.

Linguistics Program

- Required skills and methods courses: Proseminar in linguistics scholarship, Old Church Slavic, three semesters of a second Slavic language; and in the major language, stylistics, descriptive grammar, proficiency maintenance
- Additional courses: Historical Grammar of Slavic Languages, Medieval Orthodox Slavic Texts, and, in the major language, stylistics,
- One period or genre literature course.

All candidates for the MA must demonstrate advanced proficiency in their major language, pass the department's reading examination, and pass two written and one oral comprehensive MA examinations. They must pass a reading examination of French or German or, for Literature majors, take two semesters of instruction in a second Slavic language.

PhD Requirements

Literature

The PhD program in Russian literature consists of:

- Additional coursework in literary history (including the Medieval and early Modern periods) and theory; and participation in research seminars and independent research. In addition, students develop knowledge of a second Slavic language and literature (Polish, Czech, BCS [Bosnian, Croatian, Serbian], Bulgarian), film, visual arts, music, comparative literature, minor field (e.g., film, Russian or East European history, Eurasian studies, etc.).
- An extended written research project under faculty supervision and evaluation on a topic relative to the student's field of study and interests.
- Written and oral PhD examinations.
- A dissertation.

Linguistics

The PhD program in Slavic linguistics consists of:

- Required coursework in a set of core courses covering comparative Slavic linguistics, advanced structure of Slavic languages, history of Slavic literary languages, and two semesters of a third Slavic language.
- Additional courses and seminars in two of three fields of specialization—grammatical analysis and theory, structural and cultural history of a major language, and comparative philology.
- An extended written research project under faculty supervision and evaluation.
- Written and oral PhD examinations.
- A dissertation.

All candidates for the PhD must pass a written and oral examination in their major Slavic language and demonstrate reading knowledge of at least two languages other than their major language (to be selected from French, German, and a second Slavic language).

Instruction in language-teaching methodology is provided for graduate student instructors and prospective teachers of Russian, Polish, Czech, and BCS (Bosnian, Croatian, Serbian). Internships (Slavic 310) are available in the teaching of literature or Slavic linguistics.

Social Welfare

School of Social Welfare (<http://socialwelfare.berkeley.edu>)

School of Social Welfare Office: 120 Haviland Hall, (510) 642-4341

Dean: Jeffrey Edleson, PhD

School Website: Social Welfare (<http://socialwelfare.berkeley.edu>)

Undergraduate Program, College of Letters and Science

Under the jurisdiction of the College of Letters and Science, the School of Social Welfare administers the Undergraduate Group Major in Social Welfare leading to the BA degree. This liberal arts major, with a focus on the social sciences and core social welfare courses, introduces students to problems, policies, and methods in the social welfare field and allows students to test their career interest in social work before employment or graduate professional education. It also serves as a flexible pre-professional major for various other fields.

Social Welfare is an impacted major, which means that there is more demand than can be accommodated. Students should declare the major as soon as they have completed the required prerequisites. Students should begin the sequence of four required social welfare courses with 110, continuing thereafter with 112, 114, and 116.

Major Requirements

Lower Division

- **Required:** Introduction to Psychology, Introduction to Sociology, Introduction to Statistics, and Completion of the Letters and Science Reading and Composition requirement
- **Recommended but not required for the major:** Introduction to Anthropology, Introduction to Economics, or Introduction to Political Science

Upper Division

- A minimum of 29 upper division units taken for a letter grade, including Social Welfare 110, 112, 114, and 116
- A minimum of five approved social science electives

For a list of approved electives and further information on the major, contact the Social Welfare Undergraduate Office, 129 Haviland Hall, (510) 642-4407.

Honors Program

The honors program in social welfare provides an opportunity for qualified undergraduates to investigate thoroughly an area of interest, to work closely with a faculty member, and to produce a paper of some magnitude. Students who meet the eligibility requirements (a 3.5 GPA overall and in the major, and completion of Social Welfare 110 and 112) may enroll in H195 in their senior year. The fall H195 (one unit) is a two-hour biweekly seminar addressing topic identification, library research, and the preparation of an annotated bibliography and essay prospectus. The spring H195 (three units) is an individual tutorial in which students prepare the honors essay under the supervision of their faculty essay advisers.

Graduate Programs

The School of Social Welfare is a graduate professional school dedicated to educating social workers and social welfare scholars for a range of leadership, research, teaching, and advanced practice roles in the profession. Our educational emphasis is on preparing students for professional responsibility in the field of social welfare and the institutional systems that comprise it, particularly public social services and publicly supported voluntary social services. Masters-level professional education at Berkeley is characterized by a spirit of critical inquiry and an emphasis on the use of tested knowledge and theory in developing and applying intervention methods. Classroom preparation focuses on knowledge of individual and family development, ethnocultural factors, policies, and institutional systems governing services and research strategies for program development.

Master of Social Welfare (MSW)

A two-year full-time program of study for the Master of Social Welfare (MSW) degree prepares students for advanced practice in social work. Classroom and field courses are designed to teach professionals to use tested knowledge and skill and research methods in their practice. Applicants for admission must have strong academic preparation in the liberal arts and sciences, including coursework in the social and behavioral sciences. In addition, introductory coursework in social welfare and social work, research methods, and quantitative reasoning is given special attention. Knowledge of the social welfare field and professional commitment to social work are also evaluated. Such knowledge and commitment are usually demonstrated in part by successful paid employment related to social welfare. Paid experience, however, is not a requirement for admission; those who demonstrate sufficient knowledge and commitment through voluntary experience may also qualify.

The MSW program is fully accredited by the Council on Social Work Education (<http://www.cswe.org>).

Combined Program, Master-Doctoral Studies

Also offered is a combined program of master-doctoral studies that begins in the first graduate year and leads to both the Master of Social Welfare and the PhD in Social Welfare degrees. Applicants must show evidence of their ability to complete doctoral study successfully and must have undergraduate preparation sufficient for the MSW program.

Special Programs

The School sponsors several special programs: the MSW/MPH dual and concurrent degree programs, the Social Welfare/International and Area Studies dual degree program, the Social Welfare/Law concurrent degree program, the Pupil Personnel Services Credential program, and the Title IV-E Child Welfare Training Program.

The PhD in Social Welfare

The PhD in Social Welfare prepares students for careers in teaching, research, policy development and analysis, and administration in the field of social welfare and the profession of social work. It is open to applicants who hold a master's degree in social work or social welfare or have comparable preparation in a closely related field and who show evidence of intellectual and other qualifications essential to successful doctoral study.

Applications

Applications for admission to any of these programs should be submitted as early as possible beginning in September and no later than December

1 for the PhD, MSW/PhD, and MSW/MPH, and January 5 for the MSW for admission in the following academic year. Admission to the school is contingent on admission to graduate standing. For more information, see the Graduate Division website. (<http://grad.berkeley.edu/admissions/index.shtml>)

Consult our website (<http://socialwelfare.berkeley.edu>) or contact the School's admissions office for more information.

Sociology

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 410 Barrows Hall, (510) 642-4766

Chair: Raka Ray, PhD

Department Website: Sociology (<http://sociology.berkeley.edu>)

Overview

The Department of Sociology is a product of the depth and breadth of its faculty, in particular their varying fields of interests and methodological styles, as well as the high caliber and diversity of the students we attract. The department offers intellectual scope and theoretical strength. Current faculty are carrying out scholarly inquiries and empirical studies in the following fields, among others: social inequalities, race and ethnic relations, gender, education, political sociology, development and globalization, economy and society, organizations and work, sociology of culture, social networks, religion, social psychology, historical and comparative studies, demography, urban sociology, poverty, welfare states, and social theory. Lower division courses are offered to introduce students to the field of sociology and provide critical tools in evaluating research studies in the field. Sociology survey courses provide further overview and introduction to various substantive areas within sociology. The department offers a wide variety of more specialized upper division courses, as well as seminars that focus on advanced topics and research in the field.

Students intending to major in sociology are advised to prepare themselves by taking background work in such other areas as history, philosophy, cultural anthropology, psychology, economics, and political science.

Students who plan to go on to graduate work in sociology or other related disciplines and professions or who plan to participate in the senior honors seminar are strongly urged to take advanced sociological methods: Sociology 105, 106, or 107A-107B.

Major Requirements

Students in the College of Letters and Science may complete a major in sociology, by completing all 12 major requirements listed below with at least a 2.0 major grade point average (GPA).

Lower Division Prerequisites

Sociology 1, Sociology 5, as well as a course in either statistics or logic. Students who have received credit for more than two upper division sociology courses before taking an introductory sociology course must substitute another survey course for Sociology 1. Students may declare as soon as they have enrolled in their last prerequisite. At least one

sociology course must be completed at the time of declaration. Students are required to have a 2.0 GPA both cumulative and in the major to be eligible to declare the major, and to maintain academic good standing in the major.

Upper Division Course Requirements

Theory Requirement: Two courses in sociological theory:

- Sociology 101 and 102
- Sociological Theory I and Sociological Theory II (formerly Sociology 101A and 101B)

Survey Requirement: Sociology majors are required to take two courses from the following list of sociology "survey" courses, each from a different substantive area in sociology. Students may take these courses under the new or old number, if there is a change in spring 2010:

- 110 Organizations and Social Institutions
- 120 (formerly 143) Economy and Society
- 130 or 130AC Social Inequalities
- 140 Politics and Social Change
- 150, 150A Social Psychology, or L&S C180V
- 160 Sociology of Culture
- 180C, 180E, 180I, or 180P (formerly 122, 122A) Comparative Perspectives and Area Studies in Sociology

Additional courses in each of these areas are grouped together under similar numbers to the applicable survey course, e.g. other courses in organizations and social institutions will be in the 110 numbers—111, 112, etc. Students are strongly advised to take the survey course for that substantive area before other courses in that area, though this is not a requirement. The survey course serves as a foundation for all other courses in that substantive area.

Sociology Electives: Four additional upper division sociology courses, not already used for other sociology major requirements, or graduate sociology courses (subject to instructor approval). Courses taken from the survey course list in excess of the two required, or additional upper division seminar courses, will count as electives.

Capstone Seminar/Research: One seminar course that will serve as the capstone experience in sociology: 190, H190B, 190AC, 107B, and possibly other advanced sociology courses (see an undergraduate adviser).

Note: Sociology 5, 101, and 102 must be completed with at least a C-grade.

Honors Program

Majors who enter their senior year with a 3.3 GPA overall and a 3.5 GPA in the major may apply to the honors program, after conferring with a major adviser. Students will be required to submit an acceptable thesis proposal as part of their application and are encouraged to take advanced methods courses, such as Sociology 105, 106, and 107A-107B during their junior year in preparation for conducting research for their honors thesis. Students earn honors by maintaining the minimum GPA for honors and by successfully completing Sociology H190A-190B, Senior Honors Thesis and Seminar.

Graduate Program

Information about the graduate program and admissions may be obtained from the Department of Sociology website (<http://sociology.berkeley.edu>) or from the graduate office at 422 Barrows Hall, (510) 642-1445. Applications are accepted for the fall semester only; the deadline is December 13.

Courses

For more detailed information about courses, course descriptions are available on the Department of Sociology (<http://sociology.berkeley.edu>) website (<http://sociology.berkeley.edu>) several months before the beginning of each semester.

Sociology and Demography

College of Letters and Science (<http://ls.berkeley.edu>)

**Group Office: 2232 Piedmont Avenue,
(510) 642-9800**

Chair: Joshua R. Goldstein, PhD (Department of Demography)

Group Website: Sociology and Demography
(<http://www.demog.berkeley.edu/students/socdemog.shtml>)

Overview

The Graduate Group in Sociology and Demography (GGSD) is an interdisciplinary training program in the social sciences designed for students with broad intellectual interests. Drawing on Berkeley's Department of Sociology and Department of Demography, the Group offers students a rigorous and rewarding intellectual experience.

The Group, founded in 2001, sponsors a single degree program leading to a PhD in sociology and demography. The GGSD helps foster an active intellectual exchange between graduate students and faculty in the two disciplines. In addition, faculty and students associated with the Group often maintain close ties with other disciplines both inside and outside the social sciences (for example, economics, anthropology, statistics, public health, biology, and medicine).

The specific emphasis of this academic program is the intersection of the fields of sociology and demography. Potential areas of study include, but are not limited to, population history, social stratification, inequality, race, ethnicity, causes and consequences of population growth, the demographic transition, population-environment interactions, economic development, immigration, globalization, gender, family, kinship, child welfare, sexuality, intergenerational relations, aging, mortality, health care, disability, fertility, family planning, and birth control.

Students in the GGSD typically earn both an MA in sociology and an MA in demography en route to the PhD in sociology and demography. Students already enrolled in another graduate program at Berkeley who wish to earn a PhD in sociology and demography may apply by requesting a change of major. Students not already enrolled at Berkeley who wish to enter the PhD program should complete the required application and submit it to the student affairs officer in the Department of Demography's main office. The general deadlines for application specified by the

Graduate Division apply, as do the general requirements of the Academic Senate and the Graduate Division for PhD degree programs.

Program Requirements

PhD degree requirements include approximately 43 units of coursework drawn primarily from the departments of demography and sociology, plus electives from other departments (specific degree requirements are available from the graduate adviser); an MA research paper in sociology; a preliminary examination in demographic methods and substance; a foreign language examination; an oral qualifying examination covering four fields of study (sociological theory, general demography, and two specialized fields); and a PhD dissertation. For details, consult the website (<http://www.demog.berkeley.edu/students/socdemog.shtml>), contact the Graduate Student Services Adviser.

South Asian

Please see the South and Southeast Asian Studies Department (p. 202) for program and degree requirements.

South and Southeast Asian Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 7233 Dwinelle Hall, (510) 642-4564

Chair: Jeffrey Hadler, PhD

Department Website: South and Southeast Asian Studies (<http://sseas.berkeley.edu>)

Related Course Descriptions:

South and Southeast Asian Studies courses (p. 1367)

South Asian courses (p. 1363)

Southeast Asian courses (p. 1376)

Bengali courses (p. 312)

Filipino courses (p. 660)

Hindi-Urdu courses (p. 738)

Khmer courses (p. 889)

Malay/Indonesian courses (p. 936)

Punjabi courses (p. 1286)

Sanskrit courses (p. 1301)

Tamil courses (p. 1400)

Telugu courses (p. 1401)

Thai courses (p. 1402)

Vietnamese courses (p. 1444)

Overview

The Department of South and Southeast Asian Studies offers programs of both undergraduate and graduate instruction in the languages and cultures of South and Southeast Asia. It offers opportunities to explore the rich cultural, social, and religious histories as well as the living contemporary cultures of these areas. The curriculum covers the classical literary canon, religious literature, folk and popular works, oral traditions

and performance media (including recitation, musical and dramatic performance, dance, media, and film), and modern literatures of the colonial and post-colonial period. Students are encouraged to take advantage of the extensive opportunities for interdisciplinary linkages by pursuing courses offered by the South and Southeast Asia faculty in other departments at UC Berkeley. Students are also encouraged to pursue courses and independent readings that will acquaint them with pertinent methods in the various disciplines such as contemporary literary theory, ethnographic theory, historiography, and cultural studies. Appropriate comparative work on Asian and non-Asian cultures is encouraged as well.

Major Requirements

The two tracks in the South and Southeast Asian studies major are flexible, interdisciplinary programs offering opportunities for both wide, comparative study of South and Southeast Asian cultures and greater concentration on a particular area of interest and geographical focus.

With the guidance of the faculty and staff advisers, students might choose to pursue, for example, intense study of a language and its literature or broader inquiries into such subjects as the religions of traditional and modern South and Southeast Asia. Students may include in their major programs suitable courses from other departments.

South and Southeast Asian Civilizations

Students pursuing this track must complete one lower-division sequence on either the civilization and culture of South Asia (SA 1A, 1B or SA 5A, 5B) or the civilization of Southeast Asia (SEA 10A, 10B).

Students must also complete a minimum of nine additional courses concerning South or Southeast Asia, at least eight of which must be upper-division and at least four of which must be taken in the department.

In consultation with the adviser, students will choose an area of interest (religion or art history or literature, for example). At least two courses of the nine described above should cover this area of interest. At least three courses in the area of interest are recommended.

South and Southeast Asian Languages and Literatures

Students choosing this track must complete one lower division sequence on either the civilization and culture of South Asia (SA 5A, 5B) or the civilization of Southeast Asia (SEA 10A, 10B) and four semesters of language work (in one of the following languages: Hindi, Urdu, Bengali, Indonesian, Khmer, Panjabi, Sanskrit, Tagalog, Tamil, Telugu, Thai, and Vietnamese).

Students may establish first-year language proficiency through examinations administered by the department although passing an examination will not carry credit.

Students must also complete a minimum of four upper division courses concerning South or Southeast Asia, at least half of which must be taken in the department.

Note: Students who are considering graduate-level study of South or Southeast Asia are strongly advised to choose the Language and Literatures emphasis. This would provide the minimum level of language preparation required for most graduate programs.

For Both Tracks

The major consists of 42-44 units (normally between 10 and 12 courses).

The undergraduate staff adviser must approve all courses taken outside the department that students intend to use for credit, including courses

taken in study abroad programs. The undergraduate faculty adviser must approve any proposed academic waivers or substitutions. Among the upper division courses, it is highly recommended that students include one seminar (SSEAS 190 or an equivalent) that requires significant research and writing on South or Southeast Asia.

Honors Program

To be eligible for admission to the honors program, students must attain a 3.5 grade point average (GPA) or higher in courses completed in the major, and a 3.3 GPA in all courses completed in the University. An honors thesis is required. Students who wish to participate must choose a thesis topic in consultation with their major adviser and apply for admission to the program through the departmental office no later than the first week of spring semester of the senior year.

Minor Requirements

The minimum requirements for the completion of a minor program are five upper division courses, of which a minimum of three must be completed in the department. All courses in the minor program must be completed on a letter-graded basis. An overall GPA of 2.0 is required in courses used for the minor program.

Graduate Programs

The MA/PhD Program

This program offers emphases in the following languages and literatures: Hindi, Indonesian, Khmer, Sanskrit, Tamil, and Urdu. Literature is understood in the widest sense to include not only creative writing and cultural expression in the various genres but also sources concerning religion, philosophy, history, and the fine and performing arts. The analysis of cultural expression is also understood to include attention to social, anthropological, economic, and political contexts.

Prerequisites

The prerequisites for admission to the MA/PhD Program are a minimum of two years of academic study in the language of emphasis or the equivalent, and eight undergraduate or graduate courses dealing with South or Southeast Asia or the equivalent. Candidates with insufficient preparation are advised to apply to the MA program (see below). At the conclusion of the MA degree, students will be informed as to whether they are eligible for admission to the PhD program.

Degree Requirements

The general requirements for the degree are a minimum of 10 courses undertaken in graduate status at Berkeley (including at least four graduate seminars in the language of emphasis and the methods seminar); a historical knowledge of the area of emphasis; completion of an MA thesis (also required of transfer students holding the MA who have not completed equivalent work); and competence in one or more appropriate secondary languages.

PhD candidates will complete an oral qualifying examination in three approved fields (the field of emphasis, a secondary field within the department, and a cognate field); submit a dissertation prospectus; advance to PhD candidacy; and complete the dissertation under Plan B (see Index for Graduate Education). The Sanskrit emphasis also requires completion of a written competency examination in Sanskrit and one course in linguistics. Students in the joint MA/PhD program will acquire the MA degree upon completion of 20 units of coursework in graduate status at Berkeley (including two graduate seminars in the language of emphasis and the methods seminar); demonstration of advanced

competence in the language of emphasis; demonstration of historical knowledge; advancement to MA candidacy; and completion of thesis. They will acquire the PhD degree upon completion of the remaining requirements. A thesis topic should be identified during the second semester of the program or, at the latest, by the beginning of the third semester, under the University's Plan I (see Graduate Education). The MA thesis in South and Southeast studies is expected to run between 25 and 50 double-spaced, typewritten pages, excluding footnotes and bibliography. Upon completion of the MA requirements, students will be reviewed by the faculty to determine whether they are making satisfactory progress and should continue in the program.

Students should carefully plan their courses so as to be ready, normally after six semesters, to concentrate on reading for their PhD oral qualifying examinations (which should be taken in the seventh or eighth semester). Students may enroll in courses beyond the 10-course minimum and may audit courses with the permission of instructors. Students may use a limited number of lower division and independent studies courses to satisfy the program requirements. The academic advisers must approve the choice of courses during the registration period each semester. Students must take required courses for letter grades and maintain an overall grade-point average of 3.0 (B).

Foreign Languages

Language requirements in the South and Southeast Asian studies program are based on the individual student's fields of specialization and research needs. The program's main requirement is advanced proficiency in the student's language of emphasis. To develop command of a range of linguistic skills in support of the student's research agenda, additional work is required in one or more secondary languages. The secondary language(s) may be South or Southeast Asian, European, or other, subject to the approval of the student's academic adviser and the head graduate adviser. All students with an emphasis in Sanskrit are required to attain reading ability in a second South Asian or other related language (such as Latin, Greek, Old Iranian) and a reading knowledge of two languages of scholarship in the field, normally French and German. Sanskrit students are also strongly advised to complete a graduate course in each of the following: Vedic, Middle Indic, and Vyākaraṇa. Old Iranian and a course in Indo-European linguistics are also highly recommended.

Qualifying Examination

Students are eligible to take the PhD oral qualifying examination after they have completed their coursework, foreign language(s) requirements, and MA thesis. The qualifying examination will take place after the completion of these requirements (which should normally take eight semesters). The PhD oral qualifying examination is based on prepared bibliographies in the chosen three fields of specialization. These bibliographies are to be designed by the student in consultation with one or more faculty members in each given area. The formation of the dissertation committee will take place as described in the University's Plan B. The completed dissertation must be read and approved by all three members of the student's dissertation committee. The committee may, at its discretion, require a final oral defense, to which other members of the faculty and students of the department may be invited.

The MA Program

This program is offered for students seeking a terminal MA degree or for students with limited backgrounds who are preparing for more advanced work. Emphases in the program include the languages and literatures of Hindi, Khmer, Indonesian, Sanskrit, Tamil, and Urdu. The prerequisites for admission to the MA program are two years of study in the language

of emphasis or the equivalent and five undergraduate courses concerning South and Southeast Asia or the equivalent.

Requirements

The requirements for the master's degree are a minimum of 20 units of coursework in graduate status at Berkeley, including at least two graduate seminars in the language of emphasis, a historical knowledge of the area of emphasis, completion of a master's thesis, advanced competence in the language of emphasis, and advancement to MA candidacy. The Sanskrit emphasis also requires completion of a written competency examination in Sanskrit, one course in linguistics, and reading knowledge of one additional language of scholarship in the field, normally French or German. Reading ability in a second South Asian or other related foreign language (such as Latin, Greek, Old Iranian) is strongly recommended. Students are expected to complete the requirements within two years. For more detailed information about the PhD consult the department website (<http://sseas.berkeley.edu/programs/graduate>).

Southeast Asian

Please see the South and Southeast Asian Studies Department (p. 202) for program and degree requirements.

Spanish and Portuguese

College of Letters and Science (<http://ls.berkeley.edu>)

**Department Office: 5319 Dwinelle Hall,
(510) 642-0471**

Chair: Ignacio E. Navarrete, PhD

Department Website: Spanish and Portuguese
(<http://spanish-portuguese.berkeley.edu>)

Related Course Descriptions:

Catalan courses (p. 332)

Portuguese courses (p. 1209)

Overview

The sequence of undergraduate and graduate programs for the Department of Spanish and Portuguese is designed to gain competence in written and spoken Spanish or Portuguese through the structure and history of one or both of these languages, as well as gain a critical understanding of the development and achievements of their literatures in the Old World and in the New through advanced study and independent research. The department's policy is to maintain a balanced strength between language and literature and between Iberian and Latin American facets of a unified field.

The Majors

Option A: Spanish and Spanish American

Lower Division

Spanish 1, 2, 3, 4, (or their equivalents) and 25.

Upper Division

A minimum of 10 upper division courses totaling at least 30 units in the department, including Spanish 102A and 135W; two courses in Spanish literature, one in Medieval or Golden Age and one in Modern; two courses in Spanish-American literature; one course in Spanish

linguistics or theoretical approaches to literature; three upper division elective courses in Catalan, Portuguese, or Spanish (but *excluding* Catalan 101, Portuguese 101A-101B and 102. In addition, students are required to complete two courses (upper or lower division) from outside the department, specifically related to the major.

Option B: Luso-Brazilian

Lower Division

Portuguese 11 and 12 or Portuguese 101 and 102 (or their equivalents). Students transferring from other institutions with advanced standing and intending to enroll in the program must present evidence (by examination or otherwise) that their preparation includes the equivalents of Portuguese 11 and 12 or Portuguese 101 and 102.

Upper Division

A minimum of 10 upper division courses totaling at least 30 units in the department, including Portuguese 103; Portuguese 104 and one other course in Brazilian literature; Portuguese 107A or 107B and one other course in Portuguese literature; one course in Portuguese linguistics or theoretical approaches to literature; and four upper division electives from the offerings of the department, two of which may be in a related field of Spanish or Spanish-American literature, linguistics, or culture. In addition, students are required to complete two courses (upper or lower division) from outside the department, specifically related to the major.

Option C: Iberian or Latin-American

Lower Division

Spanish 1, 2, 3, 4 (or their equivalents) and 25.

Plan 1: Iberian

Upper Division

A minimum of 10 upper division courses totaling at least 30 units in the department, including Spanish 102A and 135W; Catalan 101 or Portuguese 101; one course from the literature of Spain, and one course from the literatures of Portugal or Catalonia; five other courses in Spanish, Portuguese, or Catalan language, literature, linguistics, or culture, from the offerings of the department. In addition, students are required to complete two courses (upper or lower division) from outside the department, specifically related to the major.

Plan 2: Latin American

Upper Division

A minimum of 10 upper division courses totaling at least 30 units in the department, including Spanish 102A and 135W; Portuguese 101; one course from the literature of Spanish America; one course from the literature of Brazil; five other courses in Spanish/Portuguese language or linguistics, or in Brazilian or Spanish-American literature or culture, from the offerings of the department. In addition, students are required to complete two courses (upper or lower division) from outside the department, specifically related to the major.

If the student from previous training has the equivalent of Portuguese 101, Portuguese 102, or Catalan 101, any or all of these courses may be excused and replaced by further electives as appropriate.

Option D: Hispanic Languages and Bilingual Issues

Lower Division

Spanish 1, 2, 3, 4 (or their equivalents) and 25.

The Minors

General Requirements

Courses must be completed on a letter-grade basis; a minimum grade point average (GPA) of 2.0 in the courses of the minor; a minimum of three of the courses to be completed at UC Berkeley; no more than one of the courses may also be used for a major program of another department or group; courses in English translation and Spanish 197 may not be offered in satisfaction of the elective portions of the minor programs.

The Minor in Spanish Language and Literatures

Prerequisites: Spanish 1, 2, 3, 4 (or their equivalents) and 25.

Requirements: Five upper division courses in Spanish/Spanish American language, linguistics, literature, or culture, selected from the offerings of the department.

Minor in Spanish Linguistics

Prerequisites: Spanish 1, 2, 3, 4 (or their equivalents) and 25.

Requirements: Spanish 100 (Introduction to Spanish Linguistics) and Four other upper division Spanish linguistics classes, from among Spanish 161, 162, 163, 164, 165AC, 166, and 179.

Graduate Programs

Students are admitted for post-baccalaureate work leading to the PhD degree. The Department of Spanish and Portuguese administers two doctoral programs: Romance Languages and Literatures and Hispanic Languages and Literatures.

PhD in Romance Languages and Literatures (Emphasis Spanish)

Students admitted for this degree have a choice of two plans of study:

1. **In the literature track**, students will gain a detailed knowledge of Spanish literature. They will also develop a familiarity with two other Romance literatures sufficient to allow them to do the focused comparative work necessary for the preparation of the Qualifying Examination. Moreover, students will develop both historical and practical expertise in both Latin and in the three Romance languages.
2. **In the linguistics track**, students will gain in-depth knowledge of the structure and history (internal and external) of Spanish. They will also develop expertise in the linguistics of two other Romance languages and specialize in an area of general or applied linguistics. This, together with some basic training in Latin, will prepare them for the comparative Romance linguistic work that is required for the Qualifying Examination.

For more information, please see the Romance Languages and Literatures (p. 191) section of this bulletin.

PhD in Hispanic Languages and Literatures

For further information regarding the PhD in Hispanic Languages and Literatures, please see the department's website (<http://spanish-portuguese.berkeley.edu>).

Statistics

College of Letters and Science (<http://ls.berkeley.edu>)

Department Office: 367 Evans Hall, (510) 642-2781

Chair: Philip Stark, PhD

Department Website: Statistics (<http://www.stat.berkeley.edu>)

Overview

The Department of Statistics grants BA, MA, and PhD degrees in Statistics. The undergraduate and graduate programs allow students to participate in a field that is growing in breadth of application and importance. Understanding the natural and human worlds in the "information age" increasingly requires statistical reasoning and methods, and stochastic models are essential components of research and applications across a vast spectrum of fields. The Department of Statistics provides students with world-class resources for study and research, including access to the extensive computational facilities maintained by the Statistical Computing Facility.

Service Courses

The department offers a variety of introductory service courses differing both in mathematical level and in topics emphasized. Statistics 2 requires only high school mathematics; 20 and 21 require some calculus; 20 is for all students; 21 is intended for business or economics majors, although both majors accept 20 as a prerequisite. Statistics 131A emphasizes methods used in social and life sciences. Statistics 133 is an introduction to software and data structures for organizing, analyzing, and visualizing data. Statistics 134 is a thorough beginning probability course. Statistics 135 covers statistical concepts that are central in engineering and science. Statistics 200A and 200B are graduate-level versions of 134 and 135, respectively.

Major Requirements

Prerequisites

In March 2013, the Statistics Department implemented a change in its prerequisites for the undergraduate major.

New prerequisites apply to all students who **did not** finish the lower division math prerequisites by the end of Spring 2013.

1. Students must earn a minimum 3.2 grade point average (GPA) in and no lower than a C in:

- Math 1A Calculus
- Math 1B Calculus II
- Math 53 Multivariable Calculus
- Math 54 Linear Algebra and Differential Equations

2. Students must also earn a B- in either Stat 134 or Stat 135, with no more than one course repeated between Stat 134 and Stat 135.

Former prerequisites apply to students who finished the following math courses with at least a C or better by the end of Spring 2013.

A letter grade of a C or better must be earned for EACH prerequisite:

- Math 1A Calculus
- Math 1B Calculus II
- Math 53 Multivariable Calculus
- Math 54 Linear Algebra and Differential Equations

These students will be "grandfathered" into the major and are strongly encouraged to submit their applications as soon as possible.

Upper Division

Three core statistics courses:

- Stat 133 Concepts in Computing with Data
- Stat 134 Concepts of Probability (other non-Statistics UC Berkeley courses, such as IEOR 172 cannot be used to fulfill this requirement)
- Stat 135 Concepts of Statistics

Three statistics electives (at least one course must have a lab). Choose from:

- Stat 150 Stochastic Processes
- Stat 151A or 151B (lab) Linear Modelling: Theory and Applications
- Stat 152 (lab) Sampling Surveys
- Stat 153 (lab) Introduction to Time Series
- Stat 154 (lab) Modern Statistical Prediction and Machine Learning
- Stat 155 Game Theory
- Stat 157 Seminar on Topics in Probability and Statistics
- Stat 158 (lab) The Design and Analysis of Experiments

Three applied cluster courses (at least three units).

Three upper division courses will be selected, in conjunction with advice from the undergraduate faculty adviser, from a field in which statistics is applied. Possible fields include CS, Demography, IEOR, Business Administration, Economics, and a combination of Business Administration and Economics. See approved cluster courses (<http://statistics.berkeley.edu/programs/undergrad/approved-cluster-courses>) for a comprehensive list.

Teaching Option

Students interested in teaching statistics and mathematics in middle or high school should take the following courses:

- All lower division courses required for the statistics major
- Statistics 133
- Statistics 134
- Statistics 135
- Two courses from Statistics 150, 151A, 151B, 152, 153, 154, 155, 157, or 158 including at least one course with a laboratory
- Four Math courses: Mathematics 110, Mathematics 113, Mathematics 151, and either Mathematics 152 or Mathematics 153 are required.

If you are interested in teaching, consider the Cal Teach Program (<http://calteach.berkeley.edu>).

Minor Requirements

The minor is for students who want to study a significant amount of Statistics and Probability at the upper division level. It will provide them

with formal recognition for their effort on their transcript, but not on their diploma.

The minor has the same lower division prerequisites as the major (a total of four courses): Mathematics 1A, 1B, 53 and 54.

The required upper division courses (total of five courses) will be: Statistics 150, 151A, 151B, 152, 153, 154, 155, 157, and 158 including at least one course with a laboratory (exactly as in the major)

Minimum overall grade point average of 2.0 required in upper-division courses used for the minor.

Overlap between Major and Minor: Maximum of one upper division course.

How to Obtain the Minor in Statistics

You may obtain the minor once you have completed both the lower division prerequisites and the five upper division requirements. You will need to meet with the undergraduate faculty adviser. Consult the department website (<http://statistics.berkeley.edu/programs/undergrad/minor>) for more information.

The Graduate Program

The department offers the MA and PhD degrees. For detailed information concerning the requirements for these degrees, including admissions, go to the website. (<http://www.stat.berkeley.edu>) The standard PhD program in statistics provides a broad background in probability theory and in applied and theoretical statistics. Additionally, building on the interdisciplinary strengths of the department, there are three specialized "Designated Emphasis" (DE) tracks:

- The DE in computational science and engineering
- The DE in computational and genomic biology
- The DE in communication, computation, and statistics

Working toward a PhD with a DE is similar to having a minor in a related discipline. In addition, the department, in conjunction with the School of Public Health, offers degrees in biostatistics through the Graduate Group in Biostatistics. There are two biostatistics graduate programs: MA and PhD. These programs are appropriate for students who have either a strong mathematical and statistical background with an interest in biomedical sciences, or degrees in the biological sciences with a major interest in mathematics and statistics. For further information, see the Biostatistics (http://sis.berkeley.edu/catalog/gcc_view_req?p_dept_cd=BIOSTAT) website. For course listings in Biostatistics, see the Public Health (http://sis.berkeley.edu/catalog/gcc_view_req?p_dept_cd=PB+HLTH) website.

The MA program includes both students who are admitted directly into the department and students obtaining advanced degrees in other departments at Berkeley. Coursework is typically tailored to individual interests, and credit toward the degree can be earned by related coursework in other departments.

Consulting Service

The Department of Statistics operates a consulting service in which advanced graduate students, under faculty supervision, are available as consultants during specified hours. The service is associated with the course Statistics 272, which may be taken for credit. Consulting is free to members of the campus community. Statistical advice can be sought at

any stage of the research process. Those seeking statistical advice are encouraged to contact consultants early in the research process. Refer to the Department of Statistics website (<http://www.stat.berkeley.edu>) to find out which faculty member is currently coordinating this service.

The Statistical Computing Facility

The Statistical Computing Facility (SCF) is a unit of the Department of Statistics. Its mission is to provide the undergraduate students, graduate students, postdocs, and faculty in the Statistics Department at Berkeley with state-of-the-art computing resources, services, and technical knowledge, supporting them in carrying out cutting-edge research activities, innovative instructional programs, and efficient day-to-day computing activities. The SCF also supports the students and faculty of the Econometrics Laboratory of the Department of Economics.

Sustainable Environmental Design

College of Environmental Design (<http://ced.berkeley.edu>)

**Department Office: 250 Wurster Hall,
phone: (510) 642-4943**

**Major Chair: Associate Professor Kristina Hill,
PhD**

**Program Website: Sustainable Environmental
Design** (<http://ced.berkeley.edu/academics/bachelor-of-arts-in-sustainable-environmental-design>)

Related Course Descriptions:

Architecture courses (p. 278)

City and Regional Planning courses (p. 374)

Environmental Design courses (p. 618)

Landscape Architecture courses (p. 896)

Overview

The sustainable environmental design major recognizes that the emergent, multidisciplinary field of sustainability science is growing rapidly. As the world population urbanizes, the planning and design of resilient, resource-efficient, healthy and socially just cities and metropolitan regions is profoundly important. The College of Environmental Design, with its long-standing expertise in sustainable urbanism and design, is an ideal setting for an undergraduate major in sustainable environmental design, with a focus on the built environment.

The major offers students a critical understanding of the sustainability challenges facing urban regions in California and around the globe, and equips them with the technical, analytic and design tools key to devising creative solutions. Graduates have many career paths and fields of graduate study open to them. Students who complete this major will:

- Understand the application of physical, biological and social science in the design of sustainable cities and metropolitan regions.
- Understand sustainable urban technologies and design strategies.
- Comprehend issues of equity and social justice as they relate to sustainable cities and regions.

- Evaluate and monitor the present state and future potential of built environments in terms of sustainability.
- Comprehend the implications of policy and institutions and their potential to shape future sustainable cities and regions.=

Features of the major include:

- The gateway course, LD ARCH 12, Environmental Design for Sustainable Development, which introduces students to the scientific basis of sustainability as explored through the study of energy, water, food, natural resources and the built environment, with a focus on the application of this knowledge to sustainable development strategies.
- A critical approaches course, ENV DES 102 Critical Debates in Sustainable Urbanism. The course challenges students to think critically about the idea of sustainability, develop critiques of current sustainable urbanism/design practice, and envision the institutional and behavioral changes required for a more sustainable future.
- A methods/technology course, LD ARCH/GEOG C188 Geographic Information Systems. GIS has become a basic tool for a wide range of analytic tasks across all environmental design fields. The course addresses both GIS theory and applications, offering a dynamic analytical framework for gathering, integrating, interpreting and manipulating temporal and spatial data.
- A set of upper division courses, on energy and environment; deep green design; the nature of cities; planning for sustainability; ecological analysis; and sustainable cities and landscapes.
- A series of area requirements allowing students to specialize in a variety of aspects of sustainability, such as economics, business, and policy; society, culture, and ethics; resources and environmental management; design and technology.
- A capstone workshop course, ENV DES 106 Sustainable Environmental Design Workshop. Linking sustainability science and technology with urban form and social dynamics, the workshop requires independent and collaborative research, with an external 'client' organization, to offer innovative strategies for sustainable environmental design.

For more information see the department website. (<http://ced.berkeley.edu/academics/bachelor-of-arts-in-sustainable-environmental-design>)

Theater, Dance, and Performance Studies

College of Letters and Science (<http://ls.berkeley.edu>)

**Department Office: Hearst Field Annex,
(510) 664-9012**

Chair: Catherine Cole, PhD

**Department Website: Theater, Dance, and
Performance Studies** (<http://tdps.berkeley.edu>)

Overview

The Department of Theater, Dance, and Performance Studies (TDPS) teaches performance as a mode of critical inquiry, creative expression, and public engagement. Through performance training and research, we create liberal arts graduates with expanded analytical, technical, and imaginative capacities. As a public institution, we make diversity and inclusion a key part of our teaching, art making, and public programming.

Located within the College of Letters and Science at one of the world's great universities, the faculty, staff, and students in TDPS—and in the allied PhD in Performance Studies—pursue a wide spectrum of research and production activities.

We see performance as an interdisciplinary form, exploring verbal, visual, spatial, and embodied registers of experience.

We see performance as a transnational cultural form, exploring the politics and poetics of social life in all parts of the world.

We see performance as a public forum for contemporary ideas, allowing us to test and debate the central concerns of our time in a space that is at once critical, emotional, and collective.

The faculty is nationally and internationally known both for its scholarly research and for its artistic work in design, directing, choreography, acting, and experimental performance.

Our curriculum ranges from the classics to the contemporary; it cuts across theatrical, dance, and visual art forms; it spans all corners of the globe, using the site of performance to deepen UC Berkeley's critical education in the humanities.

Indeed, at a time when scholars and educators call for more cross-disciplinary intellectual collaboration and project-based learning in higher education, we take pride in our daily commitment to collaboration and to the kind of rigorously critical, team-based projects we develop with our students, staff, and faculty both in the classroom and in our production season.

Undergraduate majors and minors are well-prepared for the future, both as artists and as engaged citizens of the world.

The flexibility and integration of our major programs in Theater and Performance Studies and in Dance and Performance Studies makes our majors excellent candidates for a variety of professions in the social, corporate, legal, and arts sectors, as well for admission to graduate programs in the arts and in professional schools.

We are proud of the ways our graduates have used their critical and expressive skills toward successful careers as professional artists

in dance, theatre, and experimental performance as well as in law, advertising, human resources, publishing, radio, technology, social work, and in all aspects of profit and nonprofit administration. Through the course of their studies, students pursue intensive work in acting, design, directing, technical production, dance technique, and choreography.

At the same time, they take critical and cultural studies courses that set the literary, historical, political, theoretical, and aesthetic concerns of performance in dialogue with other disciplines in the arts, humanities, and the social sciences.

All professors teach at all levels, and students have an ample opportunity to study with important scholars and practitioners in theater, dance, and performance studies. Separate undergraduate degree programs are offered in Theater and Performance Studies and Dance and Performance Studies; while all students fulfill general requirements in theater or dance and performance studies, they are encouraged to specialize in one of several areas.

All students at Berkeley are required to fulfill an extensive range of requirements outside the major, and students majoring in Theater or Dance and Performance Studies are encouraged to fulfill these requirements in complementary offerings in dramatic literature, culture and performance, in the visual arts and music in a wide range of departments in the Division of Arts and Humanities and in the College of Letters and Science generally.

The department offers both a Mainstage and a Workshop season of performances of classic, modern, and original works along with the annual concert of the Berkeley Dance Project.

Auditions are open to all students, staff, and faculty on campus, and students receive course credit for successfully completing a production.

Most entry-level performance courses (acting, directing, dance technique, playwriting, choreography, design) are open to all Berkeley students.

Advanced students can also receive course credit for internships and apprenticeships and can propose Honors Projects (in both critical writing and performance) for their final year.

The faculty, staff, and students welcome you to our diverse and energetic department.

In the Department of Theater, Dance and Performance Studies, you will find small class sizes, inspiring faculty, engaged staff, talented colleague students, and multiple opportunities to pursue your artistic and intellectual creative in ways that are both challenging and fulfilling.

We are very much looking forward to working with you.

Major Requirements

The department offers majors in both Theater and Performance Studies and Dance and Performance Studies. Students are encouraged to pursue their particular interests in the disciplines of design, theatrical performance, performance studies (the literature, history, cultures, and theory of performance), directing, playwriting, dance, choreography, and technical production. All majors begin with a core of both practical and critical work; students then select an area or areas of concentration and shape their programs in consultation with the undergraduate academic adviser. Senior majors may undertake critical or performance projects or both as the culmination of their studies.

It is expected that students will maintain a 2.0 grade point average (GPA) in the upper division coursework in the major. All letter-graded courses for the major must be taken for a letter grade. A maximum of eight units of equivalent coursework transfer into the major from EAP or other 4-year colleges as electives upon departmental approval. See the online TDPS Undergraduate Handbook for more information.

Theater and Performance Studies

Declare the major after passing two of the four prerequisite courses:

- One Theater course: 10 (or acting technique at any level) or 60; and
- One Performance Studies course: 26 or 25AC or 52AC.

Students should choose, in consultation with student academic adviser, an area of concentration from the upper division courses in the department. More specific information on the major is available in the departmental office and online.

Required Lower Division

10, 25AC or 52AC, 26, and 60

Required Upper Division

At least 24 total units of upper division courses in TDPS, including:

- **Performance Studies:** Three courses from the areas listed below, each course from a different area:
 1. Performance Theory: 119
 2. Performance and History: 125
 3. Performance Literature: 126 or 113A
 4. Performance and Culture: 121 or 122.
- **Technical Theater:** One course from each of the following technical areas:
 1. Production or Design: 172, 173A, 173B, 174A, 174B, 175A, 175B, or 177
 2. Theater Practicum: 167 or 168 (course determined by the crew or shop work done in your 60 course).
- **Electives:** Choose upper division electives to focus your major to your area or areas of interest— approve with the undergraduate academic adviser.

Dance and Performance Studies

Declare the major after passing two of the four prerequisite courses:

- One Modern Dance Technique course: 40 (or technique at any level) or 60; and
- One Performance Studies course: 26 or 52AC or 25AC.

Required Lower Division

40, 26, 52AC or 25AC, and 60

Required Upper Division

At least 24 total units of upper division courses in the Department of Theater, Dance, and Performance Studies, including:

- **Performance Studies:** Three courses from the areas listed below, each course from a different area:
 1. Performance Theory: 119
 2. Performance and History: 125

3. Performance Literature: 126 or 113A
4. Performance and Culture: 121 or 122.

- **Technique:** After declaring the major, students are required to take a technique course each semester: 40, 141, 142, or 143.
- **Choreography:** two courses from the list below, one course from each area:

1. Preparing to Choreograph: 144 or 114
2. Choreography: 146A or 146B.

- **Technical Theater:** One course from each of the following technical areas:

1. Production or Design: 172, 173A, 173B, 174A, 174B, 175A, 175B, or 177
2. Theater Practicum: 167 or 168 (course determined by the crew or shop work done in your 60 course)

- **Electives:** Choose upper division electives to focus your major to your area of interest— approve with the undergraduate academic adviser.

Honors Program

Majors in TDPS with an overall GPA of 3.3 in the University and in the major may, with the approval of the department, apply for admission to the honors program. Students should apply through the undergraduate academic adviser no later than the 13th week of the spring semester of their junior year. If you wish to have your honors project culminate in a stage production, apply by February of the spring semester of your junior year. Students accepted in the Honors Program will include in their programs: H195A, an intensive, critical study of problems of dramatic literature, performance studies, acting, playwriting, directing, dance, choreography, or design; and H195B, development of studies begun in H195A, either as a stage production or a written thesis.

Minor Requirements

The department offers minors in both Theater and Performance Studies and Dance and Performance Studies. Students should choose, in consultation with the undergraduate academic adviser, an area or areas of concentration in theater or dance and performance studies. Sample minor programs of study are available in the department office. Students may declare the minor after enrolling in at least one course in the department. A transferred course or course from another department brought into a minor must be adviser-approved.

Students must maintain a minimum GPA of 2.0 in the upper division units for the minor. All courses for the minor must be taken for a letter grade. A course with the identical course number may only be counted twice toward the minor and only two courses may be repeated in this way. See the website (<http://tdps.berkeley.edu>) and the on-line TDPS Undergraduate Handbook for more information.

Theater and Performance Studies Minor

Lower Division

One course chosen from 10, 25AC, 26, 52AC, or 60. (Theater 10 may be replaced by 11 or 110A if you audition in at that level.)

Upper Division

Five upper division courses are required. Three courses must be taken in the department, and one of those is required.

- **Required:** One upper division Performance Studies course: 119, 121, 122, 125, 126, or 113A.
- **Electives:** Choose four or more electives to build a focus in your minor.

Dance and Performance Studies Minor

Lower Division

One course: 25AC, 26, 40, 52AC, or 60.

Upper Division

Five upper division courses are required. Three required courses must be taken in the department, unless a technique exception is selected (see below).

Required

- One upper division Performance Studies course: 119, 121, 122, 125, 126, or 113A
- One Modern Dance Technique course: 141, 142, or 143 is required (unless 40 is chosen to fulfill this requirement and a fifth upper division course is chosen)
- One Choreography course: 114, 144, 146A, or 146B (1 or 3 units)

Notes: 146A/146B for 3 units as a choreographer has a prerequisite of 114 or 144, taken in advance or concurrently with this course. 146A/146B for 1 unit as a dancer is also available.

Electives: Choose two or more electives to build a focus in your minor.

Graduate Program

The PhD in Performance Studies provides an interdisciplinary and individually crafted curriculum directed toward advanced studies in the literatures, performances, cultural contexts, and theories of theater, dance, and other performance forms throughout the world. The PhD program is administered by an interdisciplinary graduate group composed of faculty from a wide range of related departments. Students in the PhD program in performance studies conduct research in a diverse array of interdisciplinary methodologies and topics.

Tibetan

Please see the East Asian Languages and Cultures Department (p. 86) for program and degree requirements.

Turkish

Please see the Near Eastern Studies Department (p. 166) for program and degree requirements.

Undergraduate and Interdisciplinary Studies

College of Letters and Science (<http://ls.berkeley.edu>)

Office: 231 Evans Hall, (510) 642-0108

Dean: Tyler Stovall, PhD

Department Website: Undergraduate and Interdisciplinary Studies (<http://ls.berkeley.edu/about-college/l-s-divisions/undergraduate-division/ugis>)

Overview

Undergraduate and Interdisciplinary Studies (UGIS) in the Undergraduate Division of the College of Letters and Science serves as a center for innovations in undergraduate education that extend beyond traditional departmental boundaries. Our major and minor programs attract undergraduates who wish to explore the most intellectually engaging and promising interdisciplinary fields under the direction of scholars who are pioneers in charting these new areas and methods of inquiry. UGIS has been, and continues to be, an incubator for new ideas, including experimental programs and courses, as well as curricula designed to promote the ideals of a liberal arts education. We are especially dedicated to creating programs such as the Freshman and Sophomore Seminar Program and the Undergraduate Research Program that nurture productive intellectual relationships between faculty members and students.

Field Major

Interdisciplinary Studies

The ISF major affords undergraduates a thoroughly interdisciplinary framework for their studies. The program allows students to establish individualized areas of concentration using courses in the humanities, the social sciences, and/or the professional schools and colleges.

Group Majors

American Studies

This group major offers students the opportunity to study American society using a broad range of methods drawn from a variety of disciplines in the College of Letters and Science and the professional schools and colleges. American Studies courses will attempt to take into account how the cultures of America have been continually reshaped by movements of people, commerce, and ideas crossing borders. The major draws on faculty resources and research in literature, history, economics, architecture, material culture, media studies, ethnic studies, and urban and regional studies.

Cognitive Science

This group major is the cross-disciplinary study of the structure and processes of human cognition and their computational simulation or modeling. This interdisciplinary program has been designed to give students an understanding of questions dealing with human cognition, such as concept formation, visual perception, the acquisition and processing of natural language, and human reasoning and problem solving. The program draws on relevant courses found within the fields of biology, computer science, education, linguistics, neuroscience,

philosophy, and psychology, as well as specially designed lower and upper division courses in cognitive science.

International and Area Studies

The International and Area Studies office (101 Stephens Hall, (510) 642-4466) administers group majors in Asian Studies, Development Studies, Latin American Studies, Middle Eastern Studies, Peace and Conflict Studies (PACS), and Political Economy. For information about those group majors, see the individual program listing.

Media Studies

The major applies a range of disciplines in the social sciences and humanities to the understanding of contemporary mass media and their structure, history, content, consequences, and policy implications.

Religious Studies

The major provides opportunities for securing a broad background in the liberal arts while at the same time allowing for a focus on a thematic concern or a particular religious tradition. The major views religion from a global perspective and combines aspects of the humanities and social sciences. A Religious Studies minor is also available.

Minor Programs

Applied Language Studies Minor

Sometimes called Applied Linguistics, the field of Applied Language Studies is devoted to the study of particular domains of language learning and use, such as foreign language learning and teaching, bi- and multi-lingualism, translation and interpretation, communication in professional contexts, or intercultural communication.

Creative Writing Minor

Students earn a minor in Creative Writing by completing three upper division creative writing courses and two upper division literature courses. Students may choose among a wide variety of courses from numerous departments. The Creative Writing minor is housed in the Office of Undergraduate and Interdisciplinary Studies, 231 Evans Hall. A student handbook outlining minor requirements in detail is available at the minor office. For more information, call (510) 642-2363 or visit the website. (<http://learning.berkeley.edu/creative>)

Disability Studies Minor

The Disability Studies minor explores how to best meet the challenges and alleviate the problems of those with impairments or disabilities, with emphasis on the role of those affected in defining problems and evaluating solutions. The minor requirements consist of two core courses and three approved upper division electives chosen from a wide variety of courses from numerous departments. The Disability Studies minor is housed in the Office of Undergraduate and Interdisciplinary Studies, 231 Evans Hall. A student handbook outlining minor requirements in detail is available at the minor office. For more information, call (510) 643-7691 or visit the website. (<http://ls.berkeley.edu/ugis/ds>)

Human Rights Interdisciplinary Minor

This minor offers a teaching program specifically focused on human rights but open to myriad disciplinary approaches and welcomes students from many corners of campus. It allows students to shape their education around coursework that investigates the legal, political, historical, economic, social, psychological, and representational dynamics of human rights. Helping undergraduates explore issues via multiple forms of thought and media of expression—through literature as well as politics,

journalism as well as law, film as well as anthropology—the IHR minor emphasizes the many different intellectual spaces in which human rights questions are currently being posed. For more information, call (510) 643-7691 or visit the website. (<http://hri.ugis.berkeley.edu>)

Other Programs

In addition to the majors listed above, the Office of Undergraduate and Interdisciplinary Studies oversees a suite of academic enrichment programs:

The Big Ideas Courses, launched in 2012, brings together two or more faculty members from different disciplines to co-teach innovative breadth courses. Big Ideas Courses take up key intellectual and societal challenges that cannot be adequately addressed by the perspective or methodology of one discipline alone. For more information, call (510) 642-8378 or visit the website. (<http://bigideascourses.berkeley.edu>)

The College Writing Programs (112 Wheeler Hall, (510) 642-5570), designed to help undergraduates establish fluency and control over their reading and writing skills, is also in the Office of Undergraduate and Interdisciplinary Studies.

Freshman and Sophomore Seminars arose from the conviction that early intellectual contact with faculty members would greatly enhance the undergraduate experience at Berkeley. Professors from nearly every campus department join together each semester to offer an impressive array of seminars. The courses numbered 24 (and in some cases 90) bear one unit of credit; they are limited to 15 students, and freshmen are given priority for enrollment. The courses numbered 84 bear one or two units of credit; they are limited to 15 sophomores. The courses numbered 39A-39Z are limited to 25 freshmen and sophomores. Seminars, which emphasize interaction and discussion, provide a counterpoint to the learning experience in Berkeley's large lecture halls. These seminars also offer lower division students an unprecedented opportunity to explore a wide range of majors and even fields of study usually reserved for graduate students. As you browse through this *Bulletin*, you will find lower division seminars sponsored by Letters and Science departments as well as by the professional schools and colleges.

Descriptions of all the seminars scheduled for the upcoming semester can be found in time for Tele-BEARS registration on the program's website (<http://fss.berkeley.edu>) that also contains other useful information and features for undergraduates. For additional information regarding the Freshman and Sophomore Seminars, contact the program office at 231 Evans Hall, (510) 642-8378.

Letters and Science Discovery Courses: Students in the College of Letters and Science are asked to fulfill seven breadth requirements. The Letters and Science Discovery Courses are exemplary breadth courses, designed to engage and broaden the minds of non-experts. Taught by some of the most distinguished faculty members on campus, the L&S Discovery Courses are guaranteed to deliver a high-quality educational experience. For more information, including the current list of courses and the breadth requirements they fulfill, visit the website. (<http://lsdiscovery.berkeley.edu>)

On the Same Page is a campus-wide book-in-common program, designed to welcome new freshmen and transfer students into the intellectual dialogue that characterizes the Berkeley campus. Each year all of the faculty and all new students receive a book (or film or other study object) that provides the focus for discussions, courses, events and

activities in the fall term. For more information, call (510) 642-8378 or visit the website. (<http://onthesamepage.berkeley.edu>)

Scholarship Connection is Berkeley's clearinghouse for information on scholarships that are funded by sources outside the University. Enrolled Berkeley students may search for awards on Scholarship Connection's online database. (<http://scholarships.berkeley.edu>) In addition to providing information on many externally-funded awards, Scholarship Connection also administers the campus recruitment and selection for several highly competitive awards, such as the Rhodes, Marshall, Merage, and Truman Scholarships. Scholarship Connection offers workshops and individual advising to help applicants prepare competitive applications for these prestigious awards. For more information, visit the website (<http://scholarships.berkeley.edu>) or contact Scholarship Connection at 5 Durant Hall, scholarships@learning.berkeley.edu, or (510) 643-6929.

The UC Berkeley Washington Program allows undergraduates to spend a semester in Washington, D.C. Students in the program combine coursework with field research in an internship that reflects each student's particular area of interest. For more information, call (510) 642-9102, M24 Wheeler Hall, or visit the website. (<http://learning.berkeley.edu/ucdc>)

The Office of Undergraduate Research (OUR) seeks to involve undergraduates more deeply in the research life of the University. To this end, OUR coordinates and develops programs and resources that bring undergraduates into the field, laboratories, and archives. Whether assisting faculty with research or pursuing their own research under faculty supervision, Berkeley students can experience what it means to be a part of cutting-edge research at a world-class research university. For information on the great variety of undergraduate research opportunities at Berkeley, visit the Research@Berkeley website (<http://research.berkeley.edu>) or email research@learning.berkeley.edu.

The Undergraduate Research Apprentice Program (URAP) is the ideal place for students to begin to put their classroom learning to use. As research apprentices, students gain skills and perspectives as they assist faculty with research. More than 1,400 students participate in this program each year, working with faculty from nearly every department and college. For a current list of faculty projects, visit the URAP website (<http://research.berkeley.edu/urap>).

When students are ready to embark on research of their own design, the Summer Undergraduate Research Fellowship and the Haas Scholars Program offer fellowships that allow students to pursue sophisticated research. For information about these and other programs, visit the website. (<http://research.berkeley.edu>)

The Office of Undergraduate Research is located in 5 Durant Hall, (510) 643-5376.

Urban Design

College of Environmental Design (<http://ced.berkeley.edu>)

Office: 202 Wurster Hall, (510) 642-2965

Program Co-Chairs: Peter C. Bosselman, MArch, MUD; Renée Chow, MArch; Elizabeth Deakin, JD; Elizabeth McDonald, PhD

Program Web Site: Urban Design (<http://mud.ced.berkeley.edu>)

Program Overview

The Program in the Design of Urban Places, leading to the Master of Urban Design degree, is a unique, interdisciplinary program of advanced study in which exceptional architects and landscape architects holding professional degrees partake of an intense, focused learning experience. They share working methods, acquire additional skills, and explore new avenues of development under the supervision of an interdisciplinary group of faculty members in the College of Environmental Design drawn from the Departments of Architecture, Landscape Architecture and Environmental Planning, and City and Regional Planning.

The program addresses the need for professionals who are specifically concerned with the design of varied urban areas open to public use. The activities of urban design are diverse in both type and scale. Urban designers may be concerned with settlement patterns in urbanizing areas, the restructuring of inner cities, and the design of streets and open spaces, buildings, and landscape patterns that establish neighborhoods and provide the settings for public life. They may shape the form and space of specific places such as civic or shopping centers, or they may design citywide systems such as streets, lighting, signing, greenways, or bicycle and pedestrian ways. They may work on infill in older towns and cities, or they may prepare plans, guidelines, or standards to manage extensive new development at the metropolitan growth edge.

The need for urban designers is as urgent today as in any period of recent history. Worldwide, the cities of both developing and developed countries are struggling with problems of managing rapid growth. Urban design professionals are as necessary in cities of developing countries where infrastructure and land use patterns are being established as in developed cities, where historical continuity and the reuse of existing sites are major issues.

Urban places are shaped by many forces acting over long spans of time. The design of good places—places that are configured so that they will sustain reasonable patterns of development, provide valuable opportunities for public and private involvement, and nurture citizenship—requires many skills. Their design requires consideration of current users, as well as unknown future users. Ecological, cultural, social, political, technical, and financial issues must be addressed.

Today as more and more land is developed in patterns that are dehumanizing and wasteful, our core cities continue to decline. Repair of the country's urban infrastructure is an increasingly important priority. Under these circumstances designers are needed who are able to work effectively in teams across a range of scales and with a well-developed understanding of urban places and the interdependencies of the fabric of buildings, landscapes, public ways, and the social interactions that shape them. Professionals are in demand who can deal creatively with urban design problems both within existing towns and cities and at the

growth edge of the metropolis. Older inner city districts require rethinking and adaptation to new uses and to new groups of users. At the same time, cities are expanding at an unprecedented pace into open land. New models for dealing with peripheral growth are desperately needed that are socially informed and ecologically sensitive.

Information on the program and degree requirements is available from the Graduate Office in 202 Wurster Hall, (510) 642-2965, or on the program's website (<http://ced.berkeley.edu/academics/urban-design/master-of-urban-design>).

For information on courses specifically designed for the Master of Urban Design Program, please see the descriptions for ENV DES 201, ENV DES 251, and ENV DES 252 on the program's website (<http://ced.berkeley.edu/academics/urban-design/master-of-urban-design>).

Urban design also may be pursued as a concentration in the master's degree programs in the Departments of Architecture, Landscape Architecture and Environmental Planning, and City and Regional Planning. A concurrent degree in urban design offering both the MLA and MCP is offered in Landscape Architecture and City and Regional Planning, and a concurrent degree in urban design offering both the MArch and MCP is offered in architecture and city and regional planning. Please refer to these departments for further information.

City and Regional Planning courses (p. 374)

The Profession

City and regional planners seek to make a difference in the future. The profession of city planning was born in the 19th century to deal with the problems of fast-growing industrial cities. Since then, city planning has expanded to include social reform, physical planning and urban design, housing and community development, transportation and infrastructure systems, urban and regional economic development, the natural and metropolitan environment, historic preservation, sustainable development, geographic information systems, comparative urban development, urban management, and of course, land use planning. Graduates of city planning programs work in city, metropolitan, and state planning offices; for private, nonprofit, and community developers; for environmental organizations; in consulting firms and research institutions; in international development agencies; and for many public and private enterprises. All are dedicated to using their personal and professional skills and abilities to produce better, more livable, and more equitable communities.

Undergraduate Program

The study of cities is a vital part of a liberal arts curriculum. During this moment of global change, such forms of knowledge are of critical importance. The world is more urban than in any other era in human history, and with this rapid urbanization has come the crucial role of cities as sites of economic development, crucibles of civic citizenship, and spaces of cultural imagination.

The urban studies major is housed in the Department of City and Regional Planning in the College of Environmental Design. The major seeks to introduce students to the following bodies of knowledge:

- Historical and contemporary analysis of American and global urbanization, urbanism, urban societies, and urban political economies.
- Conceptual tools, analytical methods, and theoretical frameworks to understand urban environments, such as economic analysis, social science theory, and visualization technologies.
- Forms, functions, and practices of urban planning and design, metropolitan governance, and social movements and social justice, including issues such as transportation planning, community development, and housing.
- Ways of providing more humane, equitable, environmentally sensitive, and efficient settlements and to lead change for better urban futures.

The major trains undergraduates for a variety of future careers and fields of graduate study that are related to urban studies and planning. These include practice-oriented fields such as urban planning, law, nonprofit management, and public policy as well as research-oriented fields such as geography, sociology, and anthropology. Above all, the intent of the major is to produce urban citizens and global leaders.

For more information, see the program's website (<http://ced.berkeley.edu/academics/city-regional-planning/programs/bachelor-of-arts-in-urban-studies>).

Vietnamese

Please see the South and Southeast Asian Studies Department (p. 202) for program and degree requirements.

Vision Science

Please see the School of Optometry (p. 171) for program and degree requirements.

Visual Studies

Please see the Architecture Department (p. 50) for program and degree requirements.

Yiddish

Please see the German Department (p. 117) for program and degree requirements.

Course Number Guide

For an explanation of the prefixes, suffixes, and course numbering system used in Berkeley's course listings (p. 215), please see the guide provided below.

Prefixes to Course Numbers

C = Course is cross-listed with another department
H = Honors course
N = Summer-only course not equivalent to a regular session course with the same number
R = Satisfies Reading and Composition (R & C) requirement
W = Offered fully or predominantly online

Suffixes to Course Numbers

AC = Satisfies American Cultures requirement

Key to Course Numbers

1-99 = Lower division (undergraduate) courses
100-199 = Upper division (undergraduate) courses
200-299 = Graduate courses
300-399 = Professional courses for teachers and prospective teachers
400-499 = Other professional courses (acceptable toward academic degrees only within limitations prescribed by a college, school, or the Graduate Division)
601 = Special study for graduate students in preparation for master's examination
602 = Special study for graduate students in preparation for doctoral qualifying examination

Courses numbered 24, 39, & 84

Freshman and Sophomore Seminars

For further information, please see the Freshman and Sophomore Seminars section (p. 12) of this bulletin or the Freshman and Sophomore Seminars at Berkeley website (<http://fss.berkeley.edu>).

Courses numbered 98

Directed group study by lower division students

Effective Fall, 1983, you may use no more than 16 semester units of courses numbered 98, 99, 197, 198, and 199 to meet requirements for the bachelor's degree. Exceptions to this rule may be granted by the dean of your college or school. You may aggregate no more than 4 units of credit for courses numbered 98, 99, 198, and 199 for a single semester. Each section of a 98 course must receive approval by the chair of the department, based upon a written proposal submitted by the instructor who is to supervise the course. Only a grade of *passed/not passed* is to be assigned. The dean of your college or school may authorize exceptions to these limitations.

Courses numbered 99

Supervised independent study by academically superior, lower division students

Effective Fall, 1983, you may use no more than 16 semester units of courses numbered 98, 99, 197, 198, and 199 to meet requirements for the bachelor's degree. Exceptions to this rule may be granted by the dean of your college or school. You may aggregate no more than 4 units of credit for courses numbered 98, 99, 198, and 199 for a single semester.

You must have a 3.3 GPA and prior consent of the instructor who is to supervise the study, and you must submit a written proposal to the chair of the department for approval. Only a grade of *passed/not passed* is to be assigned. The dean of your college or school may authorize exceptions to these limitations.

Courses numbered 197

Filed study (upper division)

Effective Fall, 1983, you may use no more than 16 semester units of courses numbered 98, 99, 197, 198, and 199 to meet requirements for the bachelor's degree. Exceptions to this rule may be granted by the dean of your college or school. Courses with this number are restricted to *passed/not passed* grading. To take them you must have completed 60 units of undergraduate study and be in good academic standing (2.00 GPA or better). Exceptions to these rules may be granted by the dean of your college or school.

Courses numbered 198

Directed group study (upper division)

Effective Fall, 1983, you may use no more than 16 semester units of courses numbered 98, 99, 197, 198, and 199 to meet requirements for the bachelor's degree. Exceptions to this rule may be granted by the dean of your college or school. You may aggregate no more than 4 units of credit for courses numbered 98, 99, 198, and 199 for a single semester. Each section of a 198 course must receive approval by the chair of the department, based upon a written proposal submitted by the instructor who is to supervise the course. To enroll in 198 courses, you must have completed at least 60 units of undergraduate study and be in good academic standing (2.00 GPA or better). Only a grade of *passed/not passed* is to be assigned. The dean of your college or school may authorize exceptions to these limitations.

Courses numbered 199

Supervised independent study (upper division)

Effective Fall, 1983, you may use no more than 16 semester units of courses numbered 98, 99, 197, 198, and 199 to meet requirements for the bachelor's degree. Exceptions to this rule may be granted by the dean of your college or school. You may aggregate no more than 4 units of credit for courses numbered 98, 99, 198, and 199 for a single semester. You must have prior approval of your major adviser, the instructor who is to supervise the study, and the chair of the department. Approval must be based on a written proposal that you submit to the chair. To enroll in 199 courses, you must have completed at least 60 units of undergraduate study and must be in good academic standing (2.00 GPA or better). Only a grade of *passed/not passed* will be assigned. The dean of your college or school may authorize exceptions to these limitations.

Courses

The course catalog below includes all courses currently approved to be taught at UC Berkeley.

Please Note: Only a subset of courses that appear are offered each semester. To see a list of course offerings for a current or future term, please see the Schedule of Classes. (<http://schedule.berkeley.edu>)

- Aerospace Studies (AEROSPC) (p. 216)
- African American Studies (AFRICAM) (p. 217)
- Agricultural and Environ Chemistry (AGR CHM) (p. 234)
- Agricultural and Resource Economics (A,RESEC) (p. 234)
- American Studies (AMERSTD) (p. 238)
- Ancient History and Med. Arch. (AHMA) (p. 255)
- Anthropology (ANTHRO) (p. 255)
- Applied Science and Technology (AST) (p. 274)
- Arabic (ARABIC) (p. 275)
- Architecture (ARCH) (p. 278)
- Asian American Studies (ASAMST) (p. 298)
- Asian Studies (ASIANST) (p. 305)
- Astronomy (ASTRON) (p. 306)
- Bengali (BANGLA) (p. 312)

Aerospace Studies (AEROSPC)

AEROSPC 1A Foundations of the U.S. Air Force 1 Unit

Department: Aerospace Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1.5 hours of lecture/discussion per week.

Introductory survey of the U.S. Air Force. Explores evolutionary factors affecting the nature and control of the military. Examines current U.S. defense needs and the Air Force in terms of theory, function, mission, and organization. Major commands are examined individually. Examines the history and structure of the U.S. Air Force, the Air Force's capabilities, career opportunities, benefits, Air Force installations, and communications skills. Additionally, AFROTC cadets must attend weekly Leadership Lab. Leadership Lab is a weekly laboratory that touches on the topics of Air Force customs and courtesies, health and physical fitness, and drills and ceremonies.

Final exam required. Formerly known as 1. Instructor: Stone

AEROSPC 1B Foundations of the U.S. Air Force 1 Unit

Department: Aerospace Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1.5 hours of lecture/discussion per week.

A survey course designed to introduce cadets to the U.S. Air Force and the Air Force Reserve Officer Training Corps (AFROTC). Featured topics include Air Force core values, leadership, team building, diversity, and communication skills. Additionally, AFROTC cadets must attend weekly Leadership Lab. Leadership Lab is a weekly laboratory that touches on the topics of Air Force customs and courtesies, health and physical fitness, and drills and ceremonies.

Final exam required. Instructor: Stone

AEROSPC 2A The Evolution of U.S. Air Force Air and Space Power 1 Unit**Department:** Aerospace Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture per week for 15 weeks.

This course is designed to examine the general aspects of air and space power through a historical perspective. Utilizing this perspective, the course covers a time period from the first balloons and dirigibles to the space-age global positioning systems of the Persian Gulf War. Historical examples are provided to extrapolate the development of Air Force capabilities (competencies) and missions (functions) to demonstrate the evolution of what has become today's air and space power.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Formerly known as 2.

AEROSPC 2B The Evolution of U.S. Air Force Air and Space Power 1 Unit**Department:** Aerospace Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture per week for 15 weeks.

This course is designed to examine the general aspects of air and space power through a historical perspective. It examines several fundamental truths associated with war in the third dimension; e.g., principles of war and tenets of air and space power. As a whole, this course provides students with a knowledge level understanding for the element and employment of air and space power, from an institutional, doctrinal, and historical perspective.

Final exam required.

AEROSPC 100 Leadership Laboratory 0 Units**Department:** Aerospace Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** Consent of instructor.

Training session supports cadet classroom training. It consists of basic military knowledge and practical command and staff leadership experiences in preparation for active duty as military officers. This course focuses on the leadership experiences of senior cadets and provides training in basic military knowledge and skills to younger cadets. The main focus of this training is on proper uniform wear, grooming and appearance requirements, physical fitness, knowledge of the various military customs and courtesies, as well as a working knowledge of military drill and ceremony. This course is totally cadet-centered to maximize the leadership experience and prepare cadets to make an easy transition to their active duty assignments.

For Air Force cadets only. Final exam not required.

AEROSPC 135A Air Force Leadership Studies 3 Units**Department:** Aerospace Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of lecture/discussion per week.**Prerequisites:** 135A is a prerequisite to 135B or consent of instructor.

This course is a study of leadership, management fundamentals, professional knowledge, and communication skills required of an Air Force junior officer. Lecture, text, case studies, and class discussion will be used to examine all aspects of leadership including counseling, mentoring, empowering, problem solving, accountability and authority. Students will develop upon basic written and oral communications skills primarily through written assignments and oral presentations.

Final exam required. Instructor: Gully

AEROSPC 135B Air Force Leadership Studies 3 Units**Department:** Aerospace Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of lecture/discussion per week.**Prerequisites:** 135A or consent of instructor.

This course is a study of leadership, management fundamentals, professional knowledge, and communication skills required of an Air Force junior officer. Lecture, text, case studies, and class discussion will be used to examine all aspects of leadership including counseling, mentoring, empowering, problem solving, accountability and authority. Students will develop upon basic written and oral communications skills primarily through written assignments and oral presentations.

Final exam required. Instructor: Gully

African American Studies (AFRICAM)

AFRICAM R1A Freshman Composition 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

Prerequisites: UC Entry Level Writing Requirement.

Training in expository, argumentative, and other styles of writing. The assignments will focus on themes and issues in African American life and culture. Satisfies the first half of the Reading and Composition requirement.

Satisfies the first half of the Reading and Composition requirement. Final exam not required. Formerly known as 1A.

AFRICAM R1AN Reading and Composition 3 Units**Department:** African American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

To provide Summer Bridge students with training in expository, argumentative, and other styles of writing. The assignments will focus on themes and issues in African American life and culture. Satisfies the first half of the Reading and Composition requirement.

Satisfies the first half of the Reading and Composition requirement

Final exam required. Formerly known as 1AN.

AFRICAM R1B Freshman Composition 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.**Prerequisites:** UC Entry Level Writing Requirement and 1A.

Continued training in expository and argumentative writing, with more emphasis on literary interpretation. Satisfies the second half of the Reading and Composition requirement.

Satisfies the second half of the Reading and Composition requirement

Final exam not required. Formerly known as 1B.

AFRICAM 4A Africa: History and Culture 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Emphasis on pre-colonial social, cultural, political, and economic structures; introduction to art, literature, oral traditions, and belief systems. Final exam required. Instructor: Nwokeji

AFRICAM 4B Africa: History and Culture 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 10 hours of lecture/discussion per week for 6 weeks. Emphasis on social, political, and economic change in 20th century Africa; with further emphasis upon the roles of modernization, urbanization, and the emergence of contemporary African states.

Final exam required. Instructor: Nwokeji

AFRICAM N4A Africa: History and Culture 3 Units**Department:** African American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 8 weeks. 7 hours of Lecture per week for 6 weeks.

Emphasis on pre-colonial social, cultural, political, and economic structures; introduction to art, literature, oral traditions, and belief systems. Off-campus course in Zimbabwe. Final exam required. Instructor: Mandaza

AFRICAM 5A African American Life and Culture in the United States 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 10 hours of Lecture per week for 6 weeks.

A study of the genesis, development, and scope of African American culture, approached through an examination of selected art forms, historical themes, and intellectual currents.

Final exam required. Instructor: Allen

AFRICAM 5B African American Life and Culture in the United States 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

Emphasis on the social experience of African Americans. An interdisciplinary approach designed to help students understand the forces and ideas that are influencing the individual and collective African American experience.

Final exam required.

AFRICAM 7A Elementary Wolof 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Recitation and 1 hour of Laboratory per week for 15 weeks.

This course introduces students to speaking, listening, reading, and writing in Wolof. Instruction is mixed English and Wolof. Emphasis is placed on developing student ability to create and to communicate with basic Wolof structures and vocabulary in culturally and socially appropriate context. Speaking and listening abilities are developed through oral exercises, class discussions, and recordings available from Berkeley Language Center. Final exam required. Formerly known as C7A/Linguistics C7A. Instructor: Sow

AFRICAM 7B Elementary Wolof 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 1 hour of recitation, 1 hour of lab.**Prerequisites:** C7A.

This course introduces students to speaking, listening, reading, and writing in Wolof. Instruction is mixed English and Wolof. Emphasis is placed on developing student ability to create and to communicate with basic Wolof structures and vocabulary in a culturally and socially appropriate context. Speaking and listening abilities are developed through oral exercises, class discussions, and recordings available from the Berkeley Language Center. Reading and writing are developed through in-class exercises, independent reading projects, and compositions. For students with no college level Wolof completed with passing grade; this course is not open to native heritage speakers of Wolof.

Final exam required. Formerly known as C7B/Linguistics C7B. Instructor: Sow

AFRICAM 8A Intermediate Wolof 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Recitation and 1 hour of Laboratory per week for 15 weeks.

This course reviews and expands students' knowledge of fundamental structures from Elementary Wolof and appropriate cultural contexts of these structures in oral and written communication. More grammar and vocabulary in a culturally and socially appropriate context is developed. Speaking ability is expanded through oral exercises, individual reports, class discussions, and recordings available at the Berkeley Language Center. Writing and reading are expanded through compositions, written exercises, and independent reading projects with texts available through Berkeley's African Library Collection and supplemented by instructor's materials.

Final exam required. Formerly known as C8A/Linguistics C8A. Instructor: Sow

AFRICAM 8B Intermediate Wolof 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Recitation and 1 hour of Laboratory per week for 15 weeks.**Prerequisites:** C8A.

This course reviews and expands students' knowledge of fundamental structures from Elementary Wolof, and appropriate cultural contexts of these structures in oral and written communication. More grammar and vocabulary in a culturally and socially appropriate context is developed. Speaking ability is expanded through oral exercises, individual reports, class discussions, and recordings available at the Berkeley Language Center. Writing and reading are expanded through compositions, written exercises, and independent reading projects with texts available through Berkeley's African Library Collection and supplemented by the instructor's materials.

Final exam required. Formerly known as C8B/Linguistics C8B. Instructor: Sow

AFRICAM 9A Advanced Wolof 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 1 hours of recitation, 1 hour of lab.

This course reviews and expands students' knowledge from Intermediate Wolof. Oral and written communication will be presented in appropriate cultural contexts. Developing oral language skills will be strongly emphasized as part of this course and will be expanded through individual presentations, class discussions, and recordings available at the Berkeley Language Center. Writing, grammar, vocabulary, and reading are expanded through compositions, written exercises, and independent reading projects with texts available through Berkeley's African Library Collection and supplemented by the instructor's materials.

Final exam required. Formerly known as C9A/Linguistics C9A. Instructor: Sow

AFRICAM 9B Advanced Wolof 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 1 hour of recitation, 1 hour of lab.**Prerequisites:** C9A.

This course reviews and expands students' knowledge from Intermediate Wolof. Oral and written communication will be presented in appropriate cultural contexts. Developing oral language skills will be strongly emphasized as part of this course and will be expanded through individual presentations, class discussions, and recordings available at the Berkeley Language Center. Students will receive no credit for C11B after taking Linguistics 1B. Final exam required. Formerly known as C11B/Linguistics C1B. Instructor: Mchombo

AFRICAM 12 Intensive Elementary Swahili 8 Units**Department:** African American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours of lecture and 5 hours of laboratory per week for 8 weeks.

This will be an intensive introduction of the Swahili language to beginners specifically designed for second language Swahili learners. The course is equivalent to two semesters of studying Swahili, with a full academic year credit. In order to attain the necessary proficiency (1-1+, using Interagency Round Table (ILR) scale) by the end of 8 weeks, students will need to commit themselves to use the Swahili language at all times outside class. The primary focus is to develop speaking, listening, reading and writing skills with special emphasis on developing communicative language skills.

Final exam required. Instructor: Kyeu

AFRICAM 13A Elementary Zulu 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.

This course introduces students to speaking, listening, reading, and writing in Zulu. Instruction is mixed English and Zulu. Emphasis is placed on developing student ability to create and to communicate with basic Zulu structures and vocabulary in a culturally and socially appropriate context. Speaking and listening abilities are developed through oral exercises, class discussions, and recordings available from Berkeley Language Center. Reading and writing are developed through in-class exercise, independent reading projects, and compositions. This course not open to native or heritage speakers of Zulu.

Final exam required. Formerly known as C13A/Linguistics C3A. Instructor: Sibanda

AFRICAM 13B Elementary Zulu 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.**Prerequisites:** C13A.

This course introduces students to speaking, listening, reading, and writing in Zulu. Instruction is mixed English and Zulu. Emphasis is placed on developing student ability to create and to communicate with basic Zulu structures and vocabulary in a culturally and socially appropriate context. Speaking and listening abilities are developed through oral exercises, class discussions, and recordings available from Berkeley Language Center. Reading and writing are developed through in-class exercises, independent reading projects, and compositions. This course not open to native or heritage speakers of Zulu.

Final exam required. Formerly known as C13B/Linguistics C3B. Instructor: Sibanda

AFRICAM 14A Intermediate Zulu 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.

This course reviews and expands students' knowledge of fundamental structures from Elementary Zulu. Oral and written communication is emphasized. More grammar and vocabulary in a culturally and socially appropriate context is developed. Speaking ability is expanded through oral exercises, individual reports, class discussions, and recordings available at the Berkeley Language Center. Writing and reading are expanded through compositions, written exercises, and independent reading projects with texts available through Berkeley's African Library Collection and supplemented by instructor's materials.

Final exam required. Formerly known as C14A/Linguistics C4A. Instructor: Sibanda

AFRICAM 14B Intermediate Zulu 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.

This course reviews and expands students' knowledge of fundamental structures from Elementary Zulu. Oral and written communication is emphasized. More grammar and vocabulary in a culturally and socially appropriate context is developed. Speaking ability is expanded through oral exercises, individual reports, class discussions, and recordings available at the Berkeley Language Center. Writing and reading are expanded through compositions, written exercises, and independent reading projects with texts available through Berkeley's African Library Collection and supplemented by instructor's materials.

Final exam required. Formerly known as C14B/Linguistics C4B. Instructor: Sibanda

AFRICAM 15A Advanced Swahili 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Recitation and 1 hour of Laboratory per week for 15 weeks.

This course reviews and expands students' knowledge from Intermediate Swahili. Oral and written communication will be presented in appropriate cultural contexts. Developing oral language skills will be strongly emphasized as part of this course and will be expanded through individual presentations, class discussions, and recordings available at the Berkeley Language Center. Writing, grammar, vocabulary and reading are expanded through compositions, written exercises, and independent reading projects with texts available through Berkeley's African Library Collection and supplemented by instructor's materials.

Final exam required. Formerly known as C15A/Linguistics C15A.

Instructor: Mchombo

AFRICAM 15B Advanced Swahili 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Recitation and 1 hour of Laboratory per week for 15 weeks.**Prerequisites:** Elementary Swahili C1A-C1B; Intermediate Swahili C10A-C10B; Advanced Swahili C15A.

This course reviews and expands students' knowledge from Intermediate Swahili. Developing oral language skills will be strongly emphasized as part of this course and will be expanded through individual presentations, class discussions, and recordings available at the Berkeley Language Center. Writing, grammar, vocabulary, and reading are expanded through compositions, research projects with texts available through Berkeley's African Library Collection, and supplemented by instructor's materials.

Final exam required. Formerly known as C15B/Linguistics C15B.

Instructor: Mchombo

AFRICAM 19A Advanced Zulu 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.

This course reviews and expands students' knowledge from Intermediate Zulu. Oral and written communication will be presented in appropriate cultural contexts. Developing oral language skills will be strongly emphasized as part of this course and will be expanded through individual presentations, class discussions, and recordings available at the Berkeley Language Center. Writing, grammar, vocabulary, and reading are expanded through compositions, written exercises, and independent reading projects with texts available through Berkeley's African Library Collection and supplemented by instructor's materials.

Final exam required. Formerly known as C19A/Linguistics C19A.

Instructor: Sibanda

AFRICAM 19B Advanced Zulu 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.**Prerequisites:** C19A.

This course reviews and expands students' knowledge from Intermediate Zulu. Oral and written communication will be presented in appropriate cultural contexts. Final exam required. Formerly known as C19B/Linguistics C19B.

Instructor: Sibanda

AFRICAM 24 Freshman Seminars 1 Unit**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of Seminar per week for 15 weeks.

The Berkeley Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Berkeley Seminars are offered in all campus departments, and topics vary from department to department and semester to semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

AFRICAM 27AC Lives of Struggle: Minorities in a Majority Culture 3 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.

The purpose of this course is to examine the many forms that the struggle of minorities can assume. The focus is on individual struggle and its outcome as reported and perceived by the individuals themselves. Members of three minority aggregates are considered: African Americans, Asian Americans (so called), and Chicano/Latino Americans. The choice of these three has to do with the different histories of members of these aggregates. Such differences have produced somewhat different approaches to struggle.

Satisfies the American Cultures requirement

Final exam required. Instructor: Hintzen

AFRICAM 28AC Globalization and Minority American Communities 3 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

An examination of the movement of individuals, ideas, ideologies, and institutions between minority American communities in the U.S. (African Americans, Asians, Chicanos) and their cultures of origin, in the 19th and 20th centuries. The course will utilize the concepts of "migration," "diaspora," "otherness," "multiculturalism," and "global village" and will draw largely on social science perspectives.

Satisfies the American Cultures requirement

Final exam required. Instructor: Small

Final exam required.

AFRICAM 107 Race and Public Policy 3 Units

Department: African American Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

This course examines the formation and implementation of public policies directly relevant to the black community. While the policies analyzed differ from year to year, basic public policy methodology will be introduced each year.

Final exam required. Instructor: Henry

AFRICAM 109 Black and Male in American Life 3 Units

Department: African American Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Upper division status.

The course examines ways gender and race constructions shape the lives of African American males. Developmental in design, we examine black males in the context of childhood, adolescence, gender relations and family, and the world of work.

Final exam required.

AFRICAM 111 Race, Class, and Gender in the United States 3 Units

Department: African American Studies

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks.

Prerequisites: Reading and composition requirement.

Emphasis on social history and comparative analysis of race, class, and gender relations in American society. Examines both similarities and differences, and highlights gender politics.

Final exam required.

AFRICAM W111 Race, Class, and Gender 3 Units

Department: African American Studies

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 6 hours of Web-based lecture per week for 8 weeks. This is an online course.

A focus on patterns of globalization, migration, and race/ethnic relations with regard to African Americans, Mexican Americans, and Asian Americans in the 1890s and 1990s. Key aspects like economics, politics, gender, and culture are examined. This course is web-based.

Final exam required. Formerly known as N111. Instructor: Small

AFRICAM 112A Political and Economic Development in the Third World 4 Units

Department: African American Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 4 hours of Lecture per week for 15 weeks.

An examination of the structural and actual manifestations of Third World underdevelopment and the broad spectrum of theoretical positions put forward to explain it. Underdevelopment will be viewed from both the international and intranational perspective.

Final exam required. Instructor: Hintzen

AFRICAM 112B Political and Economic Development in the Third World 4 Units

Department: African American Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

A critical appraisal of the theoretically based policies employed by Third World nations in their attempts at transition to modernized developed socio-political and economic systems and an examination of the international and intranational impediments to Third World development. The focus will be on actual examples that represent the diversity of developing countries.

Final exam required. Instructor: Hintzen

AFRICAM 114 Linguistic Structure of Bantu Languages 3 Units

Department: African American Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Equivalent of Linguistics 5 (Language and Linguistics) or consent of instructor.

The objective of this course is to examine the major syntactic structures of Bantu languages with comments on the contributions made by African linguistics to general linguistics. Chichewa, also known as Chinyanja, a language spoken in east, central, and southern Africa, as well as Swahili, the major language of East Africa, and Ndebele or Zulu, languages of southern Africa, will constitute the main case studies. Data from those and other languages will be brought in to illustrate relevant aspects of Bantu linguistic structure.

Final exam required. Instructor: Mchombo

AFRICAM 115 Language and Social Issues in Africa 3 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 14 hours of Lecture per week for 3 weeks.

This is an upper division course dealing with the relevance of language to social issues in African societies. It will focus on political developments in Africa and the use of language in fostering national identity; attaining cultural emancipation; and as a tool of oppression, of maintenance of social relations, and of addressing issues of education and childhood development, etc. The course will examine such issues as the roots of national language policies as influenced by Africa's reaction to colonialism; the role of western languages in African society and the attitudes towards African languages and cultures; the challenges of nation-building in modern African states; the use of African languages in government, education, and technology; the role of language in dealing with the HIV/AIDS pandemic, and other health issues; minority languages, endangered languages, and language preservation; cultural responses to migration and African diaspora: the use of African languages in the age of globalization and information technology.

Final exam required. Instructor: Mchombo

AFRICAM 116 Slavery and African American Life Before 1865 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This course will examine the origins of the African slave trade, and explore political, economic, demographic and cultural factors shaping African American life and culture prior to 1865.

Final exam required. Instructor: Taylor

AFRICAM 117 African Americans in the Industrial Age, 1865-1970 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

With emphasis given to the organization of labor after slavery, this course will explore the history of African American cultural, institutions and protest traditions from the Civil War to the Civil Rights Movement.

Final exam required. Instructor: Taylor

AFRICAM 118 The Slave Trade and Culture in the Modern Atlantic World 3 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The course explores the role of the transatlantic slave trade in the evolution of the Atlantic world, comprising four continents: Africa, Europe, and North and South America. Although the course will deal with various aspects of the slave trade, it will emphasize cultural themes. The discovery of fresh data and the application of more sophisticated techniques have in recent years combined with a growing willingness of specialists to speak to a wider audience and to wider social implications. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Instructor: Nwokeji

AFRICAM 119 Selected Topics in the Sociohistorical Development of the Black World 1 - 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hours of lecture per week per unit. 2.5 to 10 hours of lecture per week per unit for 6 weeks. 15 hours of lecture per week for 3 weeks.**Prerequisites:** Determined by offering.

Topics will vary each semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

AFRICAM 121 Black Political Life in the United States 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 5B or 116 and 117 or History 125A-125B.

Analysis of the theoretical and historical development of African Americans' political forms and expression. Examination of local, state, and federal political processes and activities, and the development of black political ideologies, organizations, and movements.

Final exam required. Instructor: Henry

AFRICAM 122 African American Families in American Society 3 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 5B or introductory course in sociology.

Examines the historical roles and functions of families in the development of black people in America from slavery to the present.

Final exam required.

AFRICAM 123 Social and Political Thought in the Diaspora 3 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

An examination of social and political thought of Africans traveling across the Diaspora, with particular focus on the 19th and 20th centuries.

Final exam required. Instructor: Small

AFRICAM W124 The Philosophy of Martin Luther King 3 Units**Department:** African American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of web-based lecture/discussion per week.

This is an online course.

Using the thought and actions of Martin Luther King, this course examines the major events of the Civil Rights Movement. Reading includes original works by King as well as secondary sources with a special emphasis on African American religion, nonviolence, and integration. This course is web-based.

Final exam required. Formerly known as N124. Instructor: Henry

AFRICAM 125 History of the Civil Rights Movement 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 10 hours of Lecture per week for 6 weeks.The objective of this course is to examine the modern civil rights movement. As understood traditionally, this period began with the United States Supreme Court decision of May 17, 1954, *Brown vs. Board of Education*, until the passage of the Voting Rights Act of 1965. This course will seek to place this movement in the context of global developments and in the context of the broad sweep of United States history. Assigned readings consist of historical texts and autobiographies. Lectures will place the readings in context, discussing the material and its significance in the overall history and culture of African Americans. Visual and musical media will augment the class lectures.

Final exam required. Instructor: Taylor

AFRICAM 131 Caribbean Societies and Cultures 3 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Comparative study of Spanish, Dutch, English, and French-speaking Caribbean societies. Analysis of Caribbean social structure including the development of the plantation system, urban dynamics, ethnic politics, family structures, and ecology of African Caribbean religions.

Final exam required. Instructor: Laguerre

AFRICAM N131 Caribbean Societies and Cultures 3 Units**Department:** African American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 12.5 hours of Lecture per week for 6 weeks. 19 hours of Lecture per week for 4 weeks.

This course will combine a broad overview of the Caribbean with a focus on specific issues that are central to the field of Caribbean studies. One of its aims is to introduce Caribbean social structure and expressive culture.

This will be supplemented with specific discussions of the plantation system as a social structure, ethnic politics, the debate around Caribbean social stratification (class and status), forms of expressive culture, and the Caribbean political economy.

Final exam required.

AFRICAM C133A/EDUC C181 Race, Identity, and Culture in Urban Schools 3 Units**Department:** African American Studies; Education**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of seminar/discussion per week.

This course will focus on understanding urban schools as a part of a broader system of social stratification and the process by which students in urban schools come to a sense of themselves as students, as members of cultural and racial groups, and as young people in America. Topics include racial identity; race/ethnicity in schools; urban neighborhood contexts; and schooling in the juvenile justice system. Students will also integrate course readings with their own first-hand experience working in one of several off-campus sites. This course has a mandatory community engagement component for which students will earn 1 unit of field study (197) credit.

Final exam not required. Instructor: Suad-Bakari

AFRICAM 134 Information Technology and Society 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course assesses the role of information technology in the digitalization of society by focusing on the deployment of e-government, e-commerce, e-learning, the digital city, telecommuting, virtual communities, Internet time, the virtual office, and the geography of cyberspace. Course will also discuss the role of information technology in the governance and economic development of society.

Final exam required. Instructor: Laguerre

AFRICAM C134/AMERSTD C134 Information Technology and Society 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course assesses the role of information technology in the digitalization of society by focusing on the deployment of e-government, e-commerce, e-learning, the digital city, telecommuting, virtual communities, internet time, the virtual office, and the geography of cyber space.

The course will also discuss the role of information technology in the governance and economic development of society.

Final exam required. Instructor: Laguerre

AFRICAM 137 Multicultural Communities 3 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Examination of theoretical issues in urban anthropology and sociology pertaining to the United States as a multicultural society. Comparative analysis of the ecology and social structure of African American, Native American, Asian American, Mexican American and Afro-Caribbean urban communities with special emphasis on social class, ethnicity, and culture. Final exam required. Instructor: Laguerre

AFRICAM 138 Black Nationalism 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks.**Prerequisites:** 5B.

Examines the concept of black nationalism and its historical and intellectual development. Special attention will be given to the role of African American religion and the attempt to develop "black socialism." Final exam required. Instructor: Henry

AFRICAM 139 Selected Topics of African American Social Organization and Institutions 1 - 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2.5 to 10 hours of lecture per week per unit for 6 weeks. 1 to 4 hours of lecture per week per unit.**Prerequisites:** Determined by offering.

Topics will vary each semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

AFRICAM C139/PSYCH C102 Psychology and African-Descent People 3 Units**Department:** African American Studies; Psychology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 8 hours of lecture per week for 4 weeks.

The course will provide a deconstruction of the use of Euro-American psychological research and theory pertaining to African-descent people and will present an African-centered theoretical perspective for understanding identity construction among selected populations within the African diaspora. Readings, lectures, and class discussions will facilitate increases in students' ability to conceptualize important issues and concerns as researchable questions and develop appropriate methodologies for conducting research.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Instructor: Mitchell

AFRICAM 140 Special Topics in Cultural Studies 1 - 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hour of Lecture per week for 15 weeks. 2.5 to 10 hours of Lecture per week for 8 weeks.**Prerequisites:** Determined by offering.

Topics will vary each semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

AFRICAM 142A Third World Cinema 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture, plus 2 hours of viewing/discussion per week.**Prerequisites:** Reading and composition requirement.

Examines through lectures and a selection of films, the development and achievements of Third World motion picture artistry. Social, political, and cultural themes are discussed, with particular emphasis given to major works from Asia, Africa, and Latin America. Other newly developed film sources from abroad are presented for critical assessment. Final exam required.

AFRICAM 142AC Race and American Film 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 2 hours of viewing/discussion per week.**Prerequisites:** Reading and composition requirement satisfied.

This course uses film to investigate the central role of race in American culture and history. Using films as the primary texts, the course will explore the relationship between these films and the social and political contexts from which they emerged. Looking at both mainstream and independent cinema, the course will chart the continuities and varieties of representations and negotiations of "race." The course spans the 20th century, covering (among other topics) Jim Crow in silent film, Hollywood westerns and melodramas, borderland crime dramas, documentary film, and experimental cinema. This class will concentrate on the history of African Americans in film, but we will also watch movies that consider how the overlapping histories of whiteness and ethnicity, American Indians, Asian Americans, Mexican Americans, the "Third World" and "multiculturalism" have been represented in film. Themes covered include representing race and nation; the borderlands; passing and miscegenation; the intersections of race, gender, and sexuality. Satisfies the American Cultures requirement. Final exam required. Instructor: Raiford

AFRICAM C143A/THEATER C183A Performance: An African American Perspective 3 Units**Department:** African American Studies; Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1A or consent of instructor.

Introduction to the Research-to-Performance Method, African American aesthetics and dramatic performance techniques. Course will survey wide range of writings on performance and investigate applications through exercises and improvisations. Students will also assist in information gathering for works in progress. Final exam required.

AFRICAM C143B/THEATER C183B Research-to-Performance Laboratory 3 Units**Department:** African American Studies; Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 143A or consent of instructor.

Development of scholarly material for theatrical presentation and enhancement of dramatic performance techniques through discussions, improvisations and readings of work conceived by the class and/or writers in other African American Studies courses. All source material will be based on the research of scholars in the field of African American Studies. Final exam required.

AFRICAM C143C/THEATER C183C Black Theatre Workshop 3 Units**Department:** African American Studies; Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 143A or equivalent or consent of instructor.

Study and production of a play by an African American writer. The play will be studied within its social and historical context. Students will be introduced to the various aspects of theatre production. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

AFRICAM 144 Introduction to Cultural Studies: Black Visual Culture 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Reading and composition requirement.

This course examines theories of culture and contemporary issues in popular culture. The course focuses on the instrumentality of culture as a vehicle of domination and resistance. The goal of the course is to provide the student with a critical vocabulary for cultural analysis. Key issues to be examined are ideology, hegemony, articulation, race and gender formation. Students must have a willingness to engage new and difficult ideas.

Final exam required. Instructor: Raiford

AFRICAM 150B African American Literature 1920 to Present 3 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.

Survey of African American literature from the Harlem Renaissance to the present. A close analysis of major writers, premises.

Final exam not required. Instructor: Scott

AFRICAM N150B Survey of African American Literary Forms and Styles 1920 to 1980 3 Units**Department:** African American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours of lecture per week for 4 weeks.

To survey major trends in poetry, fiction, and the essay form in African American literature from the 1920s to 1980s, both in terms of socio-political and literary content. As well as a study of major African Americans of the 20th century.

Final exam not required. Instructor: Christian

AFRICAM C151B/THEATER C131B Contemporary African American Drama 4 Units

Department: African American Studies; Theater, Dance, and Performance St

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 4 hours of Lecture per week for 15 weeks.

Prerequisites: 151A or consent of instructor.

Survey of contemporary plays by African American writers and the portrayal of the black experience in American theatre. Emphasis on predominant themes, structural tendencies, socio-historical context. Final exam required.

AFRICAM 152F Neo-Slave Narratives 3 Units

Department: African American Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

This course explores African American fiction written during the 1970s and 1980s that attempt to re-present the ur-text of African American literature--and/or to represent for contemporary readers the lives of African slaves in the United States. In what ways do these authors imagine the experience and effects of slavery from their vantage point a century after emancipation, and with the Civil Rights and Black Power Movements shaping the context of their writing?.

Final exam required. Instructors: Scott, D.

AFRICAM 153C Novels of Toni Morrison 3 Units

Department: African American Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Satisfaction of the Reading and Composition requirement.

We will closely read seven of Nobel Laureate Toni Morrison's novels, as well as a short story and some of her essays, considering the works in relation to: her interest in creating what she calls "village literature" and in writing literature that does "trope work" that intervenes in American representations of blackness and racial identity; her contributions to the renaissance of black women's writing (and African American literature in general) in the 1980s and 1990s.

Final exam required. Instructors: Scott, D.

AFRICAM 155 Literature of the Caribbean: Significant Themes 4 Units

Department: African American Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Reading and composition requirement.

An introduction to representative works, themes, and discourses in Caribbean literatures--produced by authors from the Anglophone, Creolophone, Francophone, and Hispanophone areas within Plantation America. Includes examinations of indigenous folkways and nation languages as sources for a re-examination of Caribbean culture and literary history.

Final exam required. Instructor: Clark

AFRICAM 156AC Poetry for the People: Introduction to the Art of Poetry 4 Units

Department: African American Studies

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 10 hours of lecture/discussion per week for 6 weeks.

A large lecture/discussion class which introduces students to poetry as culture, history, criticism, politics, and practice. Focusing comparatively on poetry from three American racial/ethnic groups, this course requires students to learn both the technical structure of various forms of poetry as well as the world views which inform specific poetic traditions. The groups and traditions vary from semester to semester. This course satisfies the Arts and Literature breadth requirement.

Satisfies the American Cultures requirement

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

AFRICAM 158A Poetry for the People: The Writing and Teaching of Poetry 4 Units

Department: African American Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 4 hours of seminar per week, plus community workshop teaching.

Prerequisites: 156AC plus consent of instructor.

The focus of this course is on the writing of poetry, and students undertake an intensive study of both the techniques of poetry and the social and cultural context of specific poetic traditions. Students must "imitate" the poems they study, write critical papers comparing poetic traditions, and complete an original manuscript of new poems. In addition, they must produce an on-campus poetry reading and are required to teach for five to seven weeks at one of the assigned Poetry for the People venues. This course satisfies the Arts and Literature breadth requirement. Satisfies the American Cultures requirement. Final exam not required.

AFRICAM 158B Poetry for the People: Practicum 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of seminar, plus peer teaching and performance.**Prerequisites:** 158A.

A teaching practicum, with the regular and active supervision of the instructor, for students who completed 156AC during the previous year and 158A in the previous fall. They serve as student teacher poets for 156AC. The focus of 158B is on the teaching of poetry. Each student poet is responsible for a group of seven to ten students, and, under the direct supervision of the instructor, helps the students in his/her group learn to read, criticize, and produce poetry.

Satisfies the American Cultures requirement

Final exam not required.

AFRICAM 159 Special Topics in African American Literature 1 - 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hours of lecture per week per unit. 2.5 to 10 hours of lecture per week per unit for 6 weeks.**Prerequisites:** Reading and composition requirement, plus those set by instructor.

Special topics in African American literature.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

AFRICAM 173AC/RELIGST 173AC Gandhi and the Civil Rights Movement in America 3 Units**Department:** African American Studies; Religious Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course surveys the impact of Gandhi's philosophy of nonviolence and justice in American Civil Rights struggles. Through narratives, images from African American, itinerant Gandhian, and ethnic critics of race practice in American culture, we examine how Gandhian satyagraha shaped emergent civil resistance movements, as also the global appeal to nonviolent democracy. ACES component comprises internship with civil liberties partners that monitor local implementations of human rights treaties.

Satisfies the American Cultures requirement

Final exam required. Instructor: Bilimoria

AFRICAM C178/DUTCH C178/SPANISH C178 Cultural Studies 4 Units**Department:** African American Studies; Dutch; Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.

Although the Caribbean has been recognized in recent years as being one of the most compelling areas in regard to questions of interculturality, hybridity, and miscegenation, the Dutch-speaking part of it has somehow been neglected. This course intends to give an opportunity to those who do not necessarily have a command of Dutch language, but wish to complete their knowledge of Latin-American and Caribbean history, culture, and literature.

Final exam required.

AFRICAM 190AC Advanced Seminar in African Diaspora Studies 3 - 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 to 10 hours of Lecture per week for 6 weeks.

For a four-unit course, an extra assignment/research component will be added to the course to increase contact hours with students. Possible components include additional readings, outside of class research projects and other projects which the instructor feels will add to the value of course. Topics to be announced at the beginning of each semester. Satisfies the American Cultures requirement. Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

AFRICAM H195A Senior Honors Thesis 3 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: Regular individual meetings with faculty sponsor.**Prerequisites:** Senior standing and 3.5 GPA overall and in major.

The student will complete a primary research and writing project based on study of an advanced topic with faculty sponsor. Fulfills department thesis requirement. Application and details at departmental adviser's office. Students must enroll for both semesters of the sequence.

Final exam not required.

AFRICAM H195B Senior Honors Thesis 3 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part two of a year long series course. Upon completion, the final grade will be applied to both parts of the series.**Hours and format:** Regular individual meetings with faculty sponsor.**Prerequisites:** Senior standing and 3.5 GPA overall and in major.

The student will complete a primary research and writing project based on study of an advanced topic with faculty sponsor. Fulfills department thesis requirement. Application and details at departmental adviser's office. Students must enroll for both semesters of the sequence.

Final exam not required.

AFRICAM 197 Field Study in African American Life 1 - 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Zero hours of Fieldwork per week for 15 weeks. 1 to 4 hour of Fieldwork per week for 8 weeks. 1 to 4 hour of Fieldwork per week for 6 weeks.

Supervised field work in off-campus organizations. Regular individual meetings with faculty sponsor and written reports required. Independent study form available in department office.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

AFRICAM 198 Directed Group Studies for Undergraduates 1 - 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Directed group study per week for 15 weeks. 1 to 4 hour of Directed group study per week for 8 weeks. 1 to 4 hour of Directed group study per week for 6 weeks.

Supervised research on a specific topic.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

AFRICAM 199 Supervised Independent Study and Research 1 - 4 Units**Department:** African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks. 1.5 to 6 hours of Independent study per week for 10 weeks. 1.5 to 7.5 hours of Independent study per week for 8 weeks. 2.5 to 10 hours of Independent study per week for 6 weeks.

Forms for independent study are available in the department office.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

AFRICAM 201A Interdisciplinary Research Methods 4 Units**Department:** African American Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This seminar will provide a detailed introduction and working knowledge of the various methodological techniques appropriate for interdisciplinary research on the African Diaspora.

Final exam not required.

AFRICAM 201B Qualitative Research Methods for African American Studies 4 Units**Department:** African American Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Seminar per week for 15 weeks.

A review of competing epistemologies in qualitative research of African Americans.

Final exam not required. Instructor: Small

AFRICAM 201D Theories of the African Diaspora 4 Units**Department:** African American Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course is intended to provide students with an initial background for the composition of the position paper discussing the concept and study of African Diaspora necessary for passing department qualifying exams. It will introduce some of the theoretical frameworks for, and approaches to, scholarship concerning the African Diaspora.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Scott

AFRICAM 240 Special Topics in Cultural Studies of the Diaspora 1 - 4 Units**Department:** African American Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 to 4 hour of Lecture per week for 15 weeks.

One hour of lecture per week per unit. Topics will vary from term to term depending on student demand and faculty availability.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

AFRICAM 241 Special Topics in Development Studies of the Diaspora 1 - 4 Units**Department:** African American Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hour of Lecture per week for 15 weeks.

One hour of lecture per week per unit. Topics will vary from term to term depending on student demand and faculty availability.

Final exam not required.

AFRICAM 242 Special Topics in African Linguistics 4 Units**Department:** African American Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Topics will vary to suit student demand or interest. The seminar will require solid grounding in linguistic theory.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Mchombo

AFRICAM 250 Black Intellectuals: Social and Cultural Roles 4 Units**Department:** African American Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

The course will examine the development of an intellectual group in African American life from the 18th century to the present. Implicit in the examination is consideration of the social and cultural roles, writers, scholars, artists, and other thinkers have played in American and African American culture.

Final exam not required.

AFRICAM 256B Diaspora, Citizenship, and Transnationality 4 Units**Department:** African American Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This seminar analyzes the social construction and reproduction of diasporic communities in the U.S., Canada, and Europe. It examines the relations of the diaspora to the homeland in the context of the globalization process. The role of transnational migration and deterritorialization in the production of bipolar, fragmented, and multiple identities will be analyzed. Postnational models of citizenship--differentiated, transnational, and multicultural--will be assessed in light of poststructuralist theories.

Final exam not required. Instructor: Laguerre

AFRICAM 257A Identity Politics in the Caribbean and Africa 4 Units**Department:** African American Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

An exhaustive examination of the conditions under which identity constructs (race, ethnicity, nation, religion, language, region, etc.) come to occupy the symbolic center in the organization of mass political movements in non-industrialized Third World societies. The course will be comparative in scope using case histories from Africa and the Caribbean. It will focus on the relationship between the "politics of identity," national economic decision making, and the distribution of economic, social, cultural, and symbolic capital.

Final exam not required. Instructor: Hintzen

AFRICAM 257B Power, Domination, and Ideology 4 Units**Department:** African American Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This course will focus on theories and realities of power, domination, and ideology as they pertain to issues of identity in the post-World War II political economies of Africa and the African diaspora.

Final exam not required. Instructor: Hintzen

AFRICAM 262 Black Feminist Criticism 4 Units**Department:** African American Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This course will focus on the development of a black feminist criticism(s). We will be specifically concerned with the writings of significant black women critics of the 19th and 20th centuries who have used intersections of class, race, and gender to analyze major issues of their time.

Final exam not required.

AFRICAM C265/EDUC C265C Research Advances in Race, Diversity, and Educational Policy 3 Units**Department:** African American Studies; Education**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This introductory graduate seminar will engage the research literature on race, diversity, and educational policy to provide a foundation for examining contemporary issues in American public schooling. We will examine research on race, culture, and learning alongside more policy driven research on school structures, governance, finance, politics, and policy. In doing so, we will blend micro level examinations of teaching and learning with macro level considerations of politics and policy.

Final exam not required. Instructors: Nasir, Perry, Scott, J.

AFRICAM C286/EDUC C286 The Education of African-American Students 3 Units**Department:** African American Studies; Education**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This seminar will examine a wide range of perspectives on the education of African American children and adolescents in the United States. Readings will support students in understanding some of the key issues and tensions in African American education and school achievement, including the roles that culture, identity, parents, families, and communities play in the education and schooling of African American students; systemic issues in educational improvement and the perpetuation of "achievement gaps"; and language and power.

Final exam not required. Instructor: Suad-Bakari

AFRICAM 296 Directed Dissertation Research 1 - 13 Units**Department:** African American Studies**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 8 hour of Independent study per week for 15 weeks. 2.5 to 20 hours of Independent study per week for 6 weeks.**Prerequisites:** Advancement to Ph.D. candidacy.

Open to qualified students who have been advanced to candidacy for the Ph.D. degree and are directly engaged in doctoral dissertation research. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

AFRICAM 298 Master's Examination Preparation Course 4 Units**Department:** African American Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Seminar per week for 15 weeks.

This class is designed to prepare second year graduate students for the spring Master's Examination in African Diaspora Studies. Basing our syllabus upon the established reading list, we will meet weekly to discuss individual texts, methods of interpreting and critiquing works across disciplines, strategies for reading, studying, and ultimately taking the exam itself.

Final exam not required.

AFRICAM 299 Individual Study or Research 1 - 4 Units**Department:** African American Studies**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Forty-5 hours of work per unit per term.**Prerequisites:** Consent of instructor.

Individual study or research program to be worked out with sponsoring faculty before approval by department chair. Regular meetings arranged with faculty sponsor.

Final exam not required.

AFRICAM C375/ETH GRP C375 Critical Pedagogy: Instructor Training 4 Units**Department:** African American Studies; Ethnic Studies Graduate Group**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of seminar and 2 hours of practicum per week.

The seminar provides a systemic approach to theories and practices of critical pedagogy at the university level. Examines the arts of teaching and learning and current disciplinary and cross-disciplinary issues in African/diaspora and Ethnic Studies. Participation two hours per week as practicum in 39, "Introduction to the University: African American Perspectives" is mandatory. The course is required for students expecting to serve as graduate student instructors in the department.

Final exam not required. Instructors: Clark, Wong

AFRICAM 602 Individual Study for Doctoral Students 2 - 12 Units**Department:** African American Studies**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Individual conferences.**Prerequisites:** 201A-201B.

Individual study, in consultation with group faculty, to prepare students for the doctoral oral examinations. A student will be permitted to accumulate a maximum of 8 units toward examination preparation. Units earned in this course may not be used to meet academic residence or unit requirements for the master's or doctoral degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Agricultural and Environ Chemistry (AGR CHM)

AGR CHM 299 Research in Agricultural and Environmental Chemistry 1 - 12 Units**Department:** Agricultural and Environ Chemistry**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Approximately 4 hours of research per week per unit.**Prerequisites:** Graduate standing and consent of instructor.

Research in agricultural and environmental chemistry.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Agricultural and Resource Economics (A,RESEC)

A,RESEC 201 Production, Industrial Organization, and Regulation in Agriculture 4 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Economics 201A or equivalent or consent of instructor.

Basic concepts of micro and welfare economics: partial and general equilibrium. Industrial organization: monopolistic competition, vertical integration, price discrimination, and economics of information with applications to food retailing, cooperatives, fishing, and energy.

Final exam required.

A,RESEC 202 Issues and Concepts in Agricultural Economics 4 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Economics 201A-201B or consent of instructor.

History, institutions, and policies affecting agriculture markets and environmental quality. Producer behavior over time and under uncertainty. Asset fixity and agricultural supply models.

Final exam required.

A,RESEC 210 Probability and Statistics 3 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

This is an introduction to probability theory and statistical inference. It is primarily intended to prepare students for the graduate econometrics courses 212 and 213. The emphasis of the course is on the principles of statistical reasoning. Probability theory will be discussed mainly as a background for statistical theory and specific models will, for the most part, be considered only to illustrate the general statistical theory as it is developed.

Final exam required.

A,RESEC 211 Mathematical Methods for Agricultural and Resource Economists 4 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Consent of instructor.

The goal of this course is to provide entering graduate students with the basic skills required to perform effectively in the graduate program and as professional economists. The lectures place heavy emphasis on intuition, graphical representations, and conceptual understanding. Weekly problem sets provide the opportunity to master mechanical skills and computational techniques. Topics covered include real analysis, linear algebra, multivariable calculus, theory of static constrained optimization, and comparative statics.

Final exam required.

A,RESEC 212 Econometrics: Multiple Equation Estimation 4 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 211 or consent of instructor.

Introduction to the estimation and testing of economic models. Includes analysis of the general linear model, asymptotic theory, instrumental variable, and the generalized method of moments. In addition, a survey of time series, analysis, limited dependent variables.

Final exam required.

A,RESEC 213 Applied Econometrics 4 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 3 hours of computer laboratory per week.**Prerequisites:** 211 and 212 or equivalent or consent of instructor.

Standard and advanced econometric techniques are applied to topics in agriculture and resource economics. Techniques include limited dependent variables, time series analysis, and nonparametric analysis. Students will use computers to conduct statistical analyses.

Final exam required.

A,RESEC 214 New Econometric and Statistical Techniques 4 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 3 hours of computer lab per week.**Prerequisites:** 211, 213 or equivalent or consent of instructor.

Theory and application of new and emerging approaches to estimation and inference. Bayesian, maximum entropy, and other new applications to economic problems will be emphasized. Students will use computers to conduct statistical analyses.

Final exam not required.

A,RESEC 219A Econometric Project Workshop 2 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** 210, 211, and 212 or consent of instructor.

Techniques for preparing econometric studies, including finding data sources, the reporting of results, and standards for placing research questions with existent literature. With faculty guidance, students prepare approved econometric projects, present projects to the class, provide comments on other student projects, and revise projects in response to faculty and student comments.

Final exam not required. Instructors: Auffhammer, Sadoulet

A,RESEC 219B Econometric Project Workshop 2 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** 210, 211, and 212 or consent of instructor.

Techniques for preparing econometric studies, including finding data sources, the reporting of results, and standards for placing research questions with existent literature. With faculty guidance, students prepare approved econometric projects, present projects to the class, provide comments on other student projects, and revise projects in response to faculty and student comments.

Final exam not required. Instructors: Auffhammer, Sadoulet

A,RESEC 232 Empirical International Trade and Investment 2 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture per week for 8 weeks.**Prerequisites:** Consent of instructor.

Empirical aspects on international trade, foreign investment, and the environment. Issues related to testing various trade models. Topics include: testing trade models (HO, Ricardo, Specific Sector); gravity models; linkages between openness and growth; trade orientation and firm performance; pattern of trade; trade and the environment; labor markets and trade. New topics in international trade with empirical applications, such as trade models with heterogeneous firms, outsourcing and foreign investment.

Final exam not required.

A,RESEC 241 Economics and Policy of Production, Technology and Risk in Agricultural and Natural Resources 3 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 201 and 202, or Economics 201A-201B, or consent of instructor.

This course covers alternative models of production, resource and environmental risk management; family production function; adoption and diffusion; innovation and intellectual property rights; agricultural and environmental policies and their impact on production and the environment; water resources; pest control; biotechnology; and optimal control over space and time.

Final exam required.

A,RESEC 242 Quantitative Policy Analysis 3 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 211 or consent of instructor.

Production versus predatory government behavior, rent seeking, social waste, and their trade-offs with the provision of growth-promoting public goods. Three failure types are distinguished: market, government, and organizational. The roles of public versus special interests are modeled to determine degree and extent of organizational failures in collective group behavior. Alternative frameworks are used to evaluate various types of policy reform.

Final exam not required.

A,RESEC 249 Agricultural, Food, and Resource Policy Workshop 1 Unit**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Presentation and criticism of ongoing research by faculty, staff and students. Not necessarily offered every semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

A,RESEC C251/ECON C270A Microeconomics of Development 3 Units**Department:** Agricultural and Resource Economics and Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

Theoretical and empirical analyses of poverty and inequality, household and community behavior, and contract and institutions in the context of developing countries.

Final exam not required.

A,RESEC C253/PUB POL C253 International Economic Development Policy 3 Units**Department:** Agricultural and Resource Economics and Policy; Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course emphasizes the development and application of policy solutions to developing-world problems related to poverty, macroeconomic policy, and environmental sustainability. Methods of statistical, economic, and policy analysis are applied to a series of case studies. The course is designed to develop practical professional skills for application in the international arena.

Final exam not required.

A,RESEC 259 Rural Economic Development Workshop 1 Unit**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Presentation and criticism of ongoing research by faculty, staff and students. Not necessarily offered every semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

A,RESEC 261 Environmental and Resource Economics 3 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Ph.D.-level economic theory or consent of instructor.

Theory of renewable and nonrenewable natural resource use, with applications to forests, fisheries, energy, and climate change. Resources, growth, and sustainability. Economic theory of environmental policy. Externality; the Coasian critique; tax incidence and anomalies; indirect taxes; the double dividend; environmental standards; environmental regulation; impact of uncertainty on taxes and standards; mechanism design; monitoring, penalties, and regulatory strategy; emissions markets. Final exam not required.

A,RESEC 262 Non-market Valuation 3 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Ph.D.-level economic theory or consent of instructor.

The economic concept of value; historical evolution of market and non-market valuation; revealed preference methods: single site demand, multi-site demand, corner solution models, and valuation of quality changes; averting behavior; the hedonic method; contingent valuation; other stated preference methods: ranking, choice, conjoint analysis; the value of life and safety; sampling and questionnaire design for valuation surveys. Final exam not required.

A,RESEC 263 Dynamic Methods in Environmental and Resource Economics 3 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Ph.D.-level economic theory or consent of instructor.

This course studies methods of analysis and optimal control of dynamic systems, emphasizing applications in environmental and natural resource economics. Continuous-time deterministic models are studied using phase plane analysis, the calculus of variations, the Maximum Principle, and dynamic programming. Numerical methods are applied to discrete time stochastic and deterministic dynamic models.

Final exam not required.

A,RESEC 264 Empirical Energy and Environmental Economics 3 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 212 and 213; or equivalent.

This course is designed to help prepare graduate students to conduct empirical research in energy and environmental economics. The course has two broad objectives. The first is to develop an in-depth understanding of specific empirical methods and research designs that are routinely used in the field of energy and environmental economics. The second is to familiarize students with some of the economic theories and institutions that are most relevant to empirical work in this area. Final exam not required. Instructor: Fowle

A,RESEC 269 Natural Resource Economics Workshop 1 Unit**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Presentation and criticism of ongoing research by faculty, staff, and students. Not necessarily offered every semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

A,RESEC 298 Special Study for Graduate Students 1 - 6 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual study.**Prerequisites:** Consent of instructor.

All properly qualified graduate students who wish to pursue a special field of study may do so if their proposed program of study is acceptable to the member here of the staff with whom they work.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

A,RESEC 299 Individual Research 1 - 12 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Approximately 4 hours of research per week per unit.**Prerequisites:** Graduate standing and consent of instructor.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

A,RESEC 375 Professional Preparation: Teaching of Environmental Economics and Policy 1 - 6 Units**Department:** Agricultural and Resource Economics**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 4 hours of work per week per unit.**Prerequisites:** Graduate standing, appointment as a graduate student instructor, or consent of instructor.

Discussion, problem review and development, guidance of discussion classes, course development, supervised practice teaching.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Agriculture and Resource Economics 300.

A,RESEC 400 Professional Training in Research Methodology 1 - 6 Units**Department:** Agricultural and Resource Economics**Course level:** Other professional**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Individual research.**Prerequisites:** Graduate student researcher appointment.

Individual training for graduate students in planning and performing research under the supervision of a faculty adviser, intended to provide academic credit for the experience obtained while holding a research assistantship.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

A,RESEC 602 Individual Study for Doctoral Students 1 - 12 Units**Department:** Agricultural and Resource Economics**Course level:** Graduate examination preparation**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Individual study.

Individual study in consultation with the major field adviser, intended to provide an opportunity for qualified students to prepare themselves for the various examinations required for candidates of the Ph.D. May not be used for unit or residence requirements for the doctoral degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

American Studies (AMERSTD)

AMERSTD 10 Introduction to American Studies 4 Units**Department:** American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of lecture and zero to 1 hour of discussion per week.

American culture and cultural change, with attention to the multicultural basis of American society and emphasis on the need for multiple methods of analysis. The course will consistently draw on the arts, material culture, and various fields affecting cultural production and meaning.

Those areas include literature, film, history, architecture, history of art, religion, music, engineering, environmental studies, anthropology, politics, economics, law, and medicine. This course may include discussion sections depending on available funding. Some versions of this course need four in-class contact hours because of the extensive use of media. Final exam required. Formerly known as Undergraduate Interdisciplinary Studies 10.

AMERSTD 10AC Introduction to American Studies 4 Units**Department:** American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

American culture and cultural change, with attention to the multicultural basis of American society and emphasis on the need for multiple methods of analysis. The course will consistently draw on the arts, material culture, and various fields affecting cultural production and meaning. Those areas include literature, film, history, architecture, history of art, religion, music, engineering, environmental studies, anthropology, politics, economics, law, and medicine.

Satisfies the American Cultures requirement

Students will receive no credit for 10AC after taking 10 or Undergraduate and Interdisciplinary Studies 10. Final exam required.

AMERSTD C10/L & S C40T Introduction to American Studies:**Hollywood: the Place, the Industry, the Fantasy 4 Units****Department:** American Studies; Letters and Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This course will introduce students to the interdisciplinary field of American Studies, taking the "Hollywood Dream Factory" as the central theme. Focusing on both parts of that phrase, the course will proceed along a double path. We will examine the historical and geographical development of the motion picture industry from the rise of the studio system to the "new" entertainment economy of the 1980's and we will examine ways Hollywood is represented in literature and film.

Final exam required. Instructor: Moran

AMERSTD 24 Freshman Seminar 1 Unit**Department:** American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Seminar per week for 15 weeks.

The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments, and topics vary from department to department and semester to semester. Enrollment limited to 15 freshmen.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

AMERSTD 98 Directed Group Study 1 - 4 Units**Department:** American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Group meetings to be arranged.**Prerequisites:** Open only to freshmen and sophomores. Consent of instructor.

Written proposal must be approved by sponsoring faculty. Seminars for the group study of selected topics, which will vary from year to year.

Topics may be initiated by students.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

AMERSTD 99 Supervised Independent Study and Research 1 - 4 Units**Department:** American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Independent study per week for 15 weeks.**Prerequisites:** Restricted to freshmen and sophomores; consent of instructor.

Independent study and research by arrangement with faculty.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

AMERSTD 101 Examining U.S. Cultures in Time 4 Units**Department:** American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.

This course examines how U.S. cultures are constructed, reinforced, and changed, and how those cultures act simultaneously at a given time. To help students develop skills in cultural analysis, lectures will contrast various methods and perspectives as they apply to the study of a particular year or decade. Topics will vary from semester to semester. This course may include discussion sections depending on available funding. Some versions of this course need four in-class contact hours because of the extensive use of media.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

AMERSTD 101AC Examining U.S. Cultures in Time 4 Units**Department:** American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

This course examines how U.S. cultures are constructed, reinforced, and changed, and how those cultures act simultaneously at a given time. To help students develop skills in cultural analysis, lectures will contrast various methods and perspectives as they apply to the study of a particular year or decade. Topics will vary from semester to semester.

Satisfies the American Cultures requirement

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

AMERSTD 102 Examining U.S. Cultures in Place 4 Units**Department:** American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.

This course examines how U.S. cultures are constructed, reinforced, and changed--particularly in reference to place and material culture. Qualitative and quantitative methods of analysis drawn from several disciplines will help students develop skills in cultural interpretation. Case studies may focus on a neighborhood, a city, or a region. Topics will vary from semester to semester. This course may include discussion sections depending on available funding. Some versions of this course need four in-class contact hours because of the extensive use of media. Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

AMERSTD 110 Special Topics in American Studies 3 or 4 Units**Department:** American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Lecture per week for 15 weeks. 6 to 8 hours of Lecture per week for 8 weeks. 7.5 to 10 hours of Lecture per week for 6 weeks.

This course is designed primarily to allow faculty to develop focused interdisciplinary courses which address specific issues, themes, or problems in American society. Topics vary from semester to semester. Students should consult the department's webpage for current offerings before the start of the semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

AMERSTD H110 Honors Seminar: Special Topics in American Studies 3 Units**Department:** American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Seminar per week for 15 weeks. 6 to 8 hours of Seminar per week for 8 weeks. 7.5 to 10 hours of Seminar per week for 6 weeks.**Prerequisites:** Consent of instructor may be required.

This course is designed to introduce honors students (those who have achieved a minimum overall GPA of 3.3) to the history and theory of American studies as an interdisciplinary field and to explore current themes, debates, and research problems in American studies.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

AMERSTD C111A/ARCH C174 Architecture in Depression and War 4 Units**Department:** American Studies; Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture and Zero to 2.5 hours of Discussion per week for 6 weeks.

The Great Depression and World War II are arguably the two most influential events for the development of the built environment in the 20th century. Not only did they alter the socio-economic and political landscape on which architecture and urban planning depend, but they also led to technological innovations and vital debates about the built environment. This course examines the 1930's and 1940's topically, studying the work of the New Deal, corporate responses to the Depression and war, the important connections between architecture and advertising, the role of the Museum of Modern Art in the promotion of Modernism, the concept of the ideal house, and key texts, theories, and projects from the period. Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required. Instructor: Shanken

AMERSTD C111E/ENGLISH C136 Topics in American Studies 4 Units**Department:** American Studies; English**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

A course on the intellectual, cultural, historical, and social backgrounds to American literature. Topics will vary from semester to semester. Students should consult the department's "Announcement of Classes" for current offerings well before the start of the semester.

Course may be repeated for credit with different topic and consent of instructor. Course may be repeated for credit when topic changes. Final exam required.

AMERSTD C112A/ENV DES C169A/GEOG C160A American Cultural Landscapes, 1600 to 1900 4 Units**Department:** American Studies; Environmental Design; Geography**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Introduces ways of seeing and interpreting American histories and cultures, as revealed in everyday built surroundings-- houses, highways, farms, factories, stores, recreation areas, small towns, city districts, and regions. Encourages students to read landscapes as records of past and present social relations and to speculate for themselves about cultural meaning.

Final exam required. Instructor: Groth

AMERSTD C112B/ENV DES C169B/GEOG C160B American Cultural Landscapes, 1900 to Present 4 Units**Department:** American Studies; Environmental Design; Geography**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Final exam required. Instructor: Groth

AMERSTD C112F/ESPM C191/HISTART C189/UGIS C136 The American Forest: Its Ecology, History, and Representation 4 Units**Department:** American Studies; Environ Sci, Policy, and Management; History of Art; Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

The American forest will be examined in terms of its ecology, history, and representations in paintings, photographs, and literary essays. This examination seeks to understand the American forest in its scientific and economic parameters, as well as the historic, social, and ideological dimensions which have contributed to the evolution of our present attitudes toward the forest.

Final exam required. Instructors: Lovell, McBride

AMERSTD C115/FILM C115 The American Detective in Fiction, Film, and Television 4 Units**Department:** American Studies; Film and Media**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7.5 hours of Lecture per week for 8 weeks.

This course considers how the American detective is represented in fiction, film, and popular culture. We will examine how representations of the American detective are affected by diverse historical and socio-cultural factors, including the ideology of American individualism, paradigms of investigation and ordered knowledge, and competing discourses of race, class, gender, and sexual orientation. After a brief consideration of early American detectives and detectives in the classic American hardboiled tradition, we will focus on many detectives from traditionally understudied groups, including female detectives, African American detectives, Chicana detectives, Asian American detectives, Native American detectives, and gay and lesbian detectives. This course may be used as an elective in the American Studies major.

Final exam required. Instructor: Dresner

AMERSTD C117/ISF C117/MASSCOM C117 American Television 4 Units**Department:** American Studies; Interdisciplinary Studies Field Maj; Mass Communications**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture per week for 8 weeks.

This course offers an interdisciplinary survey of various theoretical and methodological approaches to the social, cultural and political dimensions of American television. Selected readings and viewings will be used to examine the production, reception, and content of television programming. The focus for summer 1994 will be "prime time after 1980," including such shows as HILL STREET BLUES, DALLAS, THE COSBY SHOW, STAR TREK; THE NEXT GENERATION, and TWIN PEAKS. This course satisfies part of the core requirement for the Interdisciplinary Studies Field major, and may be used as an elective in both the American Studies major and the Mass Communications major.

Course may be repeated if focus is different. Course may be repeated for credit when topic changes. Final exam required.

AMERSTD 118AC/ISF 118AC/MASSCOM 118AC American Popular Culture 4 Units**Department:** American Studies; Interdisciplinary Studies Field Maj; Mass Communications**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7.5 hours of Lecture per week for 6 weeks.

An interdisciplinary approach to American popular culture, focusing on the social, economic, commercial, political, and historical construction of popular culture and American identities. This course will satisfy part of the core requirement for the American Studies major.

Satisfies the American Cultures requirement

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

AMERSTD C118/ISF C118/MEDIAST C118 American Popular Culture 4 Units**Department:** American Studies; Interdisciplinary Studies Field Maj; Media Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7.5 hours of Lecture per week for 6 weeks.

An interdisciplinary approach to American popular culture, focusing on the social, economic, commercial, political, and historical construction of popular culture and American identities. This course will satisfy part of the core requirement for the American Studies major.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

AMERSTD C120/ISF C120 Immigration and American Culture 4 Units**Department:** American Studies; Interdisciplinary Studies Field Maj**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Fifty-2 hours of lecture and 8 hours of field trips, to be offered during 6- or 8 week session.

In this course, we will discuss the "immigrant" as both the subject and the object of representation in U.S. literature and culture. We will discuss the works of Jewish American, Asian American, and Chicano authors, and examine the effects of such factors as country of origin, gender, race/ethnicity, social class, and religion on the construction of "American identity." This course may be used as an elective in the American studies major or may be used to fulfill the 100A or 100B requirement in the interdisciplinary studies field major.

Satisfies the American Cultures requirement

Final exam required. Instructor: Camargo

AMERSTD 121 Photography in America 4 Units**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Fifty-2 hours of lecture and 8 hours of field trips, to be offered during 6- or 8-week sessions.

The topic of this course is the history of photography in the United States, from the introduction of the medium in 1839 to the present decade. We will consider the medium chronologically as well as thematically, focusing on the following kinds of issues: the photograph as document and as fine art, the "language" and intentionality of photography, work and image in photographically illustrated media, the social role of the photograph, photography and gender. This course may be used as an elective in the American studies major.

Final exam required. Instructor: Graham

AMERSTD C125/ISF C125/MEDIAST C125 American Media and Global Politics 3 Units**Department:** American Studies; Interdisciplinary Studies Field Maj; Media Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

Public opinion about world events is largely shaped today by the mass media. How accurate is such coverage in the light of historical analysis? To what extent do systemic sources of bias or distortion affect our understanding of history? To approach these questions, we will analyze the role of the media in several specific case studies.

Final exam required.

AMERSTD 130Y Tribal Sovereignty 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course will explore the unique legal status of Indian tribes and reservation lands in the United States, including analyses of treaties, the trust relationship, and the evolution of federal Indian law and policy. Students will examine the impact of such economic development ventures as mineral resource extraction and gaming on tribal sovereignty and culture. The rights of Indian individuals and groups to exercise freedom of religion will be analyzed in the context of sacred lands, repatriation of skeletal remains, and the use of peyote as sacrament.

Final exam required. Instructor: Biestman

AMERSTD 131Y Native American Indian Literatures 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course considers several novels, short stories, and autobiographical essays by contemporary Native American Indians. A general historical context will be provided with an introduction to trickster stories and oral performance in translation. The lectures and discussions will focus on the comparative themes of tribal experiences in diverse tribal cultures with a critical review of the traces of traditional oral narratives in contemporary fiction. Comparative worldviews, landscapes, and the identities of authors and characters will be considered in the course.

Final exam required. Instructor: Vizenor

AMERSTD C132B/HISTORY C132B Intellectual History of the United States since 1865 4 Units**Department:** American Studies; History**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

In this course we will be discussing key developments in U.S. thought since the middle of the nineteenth century, roughly beginning with the reception of Darwin. The broader story told in the class weaves together in the history of science and engineering, the arts and popular culture, philosophy, and education. Our goal is to trace how ideas, whether they are dominant, challenging, or look back, have affected the ways in which Americans live together. We will look at how intellectual life has empowered and expanded the capacity of Americans to understand their world and achieve goals more effectively. We will also consider how intellectual theories have contributed to inequality and injustice. Students will receive no credit for C132B after taking 132B. Final exam required.

AMERSTD 132Y Native American Indian Autobiographies 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course considers several autobiographies written by Native American Indians. The lectures, discussions, and required books focus on various cultural themes and theories of autobiography; a comparative review of diverse tribal experiences and narratives. Theories of cultural simulations and literary forms of representation in autobiographical literature will receive general attention in the course. Students will be required to participate in class discussions and complete two hours review papers and a final examination.

Final exam required. Instructor: Vizenor

AMERSTD 133Y Native America Today 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course focuses on the history and culture of American Indians in the past hundred years and, in particular, the strategies that have enabled them to survive as tribes and individuals. The course will begin with an overview of Native American history and a review of anthropological perspectives on cultural change. This will be followed by an exploration of the issues of identity and tradition in various facets of contemporary Native life, including cultural revival movements, the role of women, people of mixed descent, and contemporary art and literature. An emphasis on participation and small group discussions, and exposure to a wide variety of written and visual materials will give students a chance to develop insights and skills for responding to cultural diversity.

Final exam required. Instructor: Roscoe

AMERSTD C134/AFRICAM C134 Information Technology and Society 4 Units**Department:** American Studies; African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course assesses the role of information technology in the digitalization of society by focusing on the deployment of e-government, e-commerce, e-learning, the digital city, telecommuting, virtual communities, internet time, the virtual office, and the geography of cyber space.

The course will also discuss the role of information technology in the governance and economic development of society.

Final exam required. Instructor: Laguerre

AMERSTD 134Y American Painting at the Fine Arts Museums of San Francisco 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of lecture per week plus field trips for 3 weeks. 5 hours of lecture per week plus field trips for 3 weeks.

This course proposes to use the extraordinary local collections, particularly of the Mr. and Mrs. John D. Rockefeller 3rd collection of American art, to introduce students to the tradition of painting in America and to the types of intellectual problems with which current scholars of this are are engaged. All sessions will take place in the galleries in front of the paintings at the deYoung Museum in Golden Gate Park in San Francisco. Topics will include 17th and 18th century painting, 19th century genre painting, folk painting, landscape painting, still life, and 20th century painting.

Final exam required. Instructor: Lowell

AMERSTD 135Y The Beats in San Francisco 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course will briefly review some of the major works by those poets and writers of the "Beat Generation" most closely connected with San Francisco and the Bay Area, and also some of the works by "East Coast Beats" where it is directly relevant either to the San Francisco Bay Area or to an understanding of the phenomenon of the Beat Generation itself. The poets and writers covered will include Allen Ginsberg, Jack Kerouac, Gary Snyder, Lawrence Ferlinghetti, Philip Whalen, and Michael McClure. We will pay some close attention to the interplay of Beat Generation writing with music, painting, film, and popular culture. Audio and video tapes of some of the principals will be available for viewing and listening.

Final exam required. Instructor: Loewinshon

AMERSTD 136Y A Sense of Place: Four American Worlds 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course invites students to consider the implications of "place" in American writing. That is "place" as not simply literal topography or locale but geography of mind, a myth, a body of association, and legend. To which end we shall be discussing four key modern American works, two novels, a book of poetry, and a story-cycle.

Final exam required. Instructor: Lee

AMERSTD 137Y Changing Media in American Society 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

American news and entertainment reach people around the globe. This course is an opportunity for critical study of these institutions on their home ground, using the resources of the Graduate School of Journalism. The course mixes the perspective of an American historian and a veteran reporter. We draw on our broadcasting and computer facilities to allow new comers to see how American journalists shape the flow of information. We focus on the way this profession is building new audiences and losing others. The goal of this course is to bring outsiders into the debate that now rages about the accomplishment and purpose of American media.

Final exam required. Instructors: Goldstein, Leonard

AMERSTD 138Y Advertising and the Culture of Consumption: Gender and Race in Commercial Representations of the Self 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course will offer several perspectives on the role advertising has played in determining various expressions of American self-identity, with special emphasis on analyzing corporate representations of the self presented of--and directed to-- African Americans and Native Americans in the late 19th and early 20th centuries. The course will complicate commercial representations of African Americans and Native Americans by comparing and contrasting these corporately manufactured identities with individualized voices of racial photography, painting, and music of the period. The lectures and discussions will constitute a subtext throughout the course.

Final exam required. Instructor: McQuade

AMERSTD 139AC/HISTORY C139C Civil Rights and Social Movements in U.S. History 4 Units**Department:** American Studies; History**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 5.5 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 7.5 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

Beginning with the onset of World War II, America experienced not a singular, unitary Civil Rights Movement -- as is typically portrayed in standard textbook accounts and the collective memory -- but rather a variety of contemporaneous civil rights and their related social movements. This course explores the history, presenting a top-down (political and legal history), bottom-up (social and cultural history), and comparative (by race and ethnicity as well as region) view of America's struggles for racial equality from roughly World War II until the present. Satisfies the American Cultures requirement

Final exam required.

AMERSTD 139Y The Western Film 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of lecture plus 3 hours of viewing time per week for the 5 hours of lecture plus 3 hours of viewing time per week for 3 weeks. see weeks.

This is a course on the western in American film and literature. We will watch six classic western films, including the and and we will read several important pieces of western literature. We will discuss such issues as the myth of the frontier, the meaning of western landscapes, the American debate about law and order, masculinity, and the nature of cowboy life, etc.

Final exam required. Instructor: Hutson

AMERSTD 140Y American Film Noir 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of lecture plus 3 hours of viewing time per week for the 5 hours of lecture plus 3 hours of viewing time per week for 3 weeks. see weeks.

Film Noir is considered a distinctively American Film genre. A selective survey, this course will sample the gangster picture and the pre-noir hard boiled detective film, and then study some prime post World War II examples of film noir proper. Noir themes include a pervasive cultural corruption, the femme fatale, mysteriously disabled and doomed protagonists, the dark city, etc.

Final exam required. Instructor: Griffin

AMERSTD 141Y San Francisco and the Bay Area: The View from the Street 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of lecture per week for 3 weeks plus field trips. 5 hours of lecture per week for 3 weeks plus field trips.

This is an urban field geography course which will provide a basic overview of Bay Area geography and history. The course will consist of half day field trips to San Francisco and Oakland. We will observe buildings, landmarks, streetscapes, signs, people on the street, etc. in order to understand the forces at work in creating a city. We will cover a broad spectrum of issues, including employment, property development, political power, race, social movements, class structure, popular entertainment.

Final exam required. Instructor: Walker

AMERSTD 142Y Community Development in the Bay Area 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of lecture per week for 3 weeks plus field trips. 5 hours of lecture per week for 3 weeks plus field trips.

This course will provide students with opportunities to discuss and observe in action the most recent theories and practices pertaining to community development in the urban United States. Readings and discussion will be rooted in field trips and interviews with community activists, executive staff and nonprofits, professional planners and designers in the Bay Area. Students will have opportunities to take their own field trips and conduct interviews based on their own interests.

Final exam required. Instructor: Morris

AMERSTD C152/NATAMST C152 Native American Literature 4 Units**Department:** American Studies; Native American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 151 is recommended but not required.

An analysis of the written and oral tradition developed by Native Americans. Emphasis will be placed on a multifaceted approach (aesthetic, linguistic, psychological, historical, and cultural) in examining American Indian literature.

Final exam required.

AMERSTD C168/NATAMST C166 Native American Novelists 1 Unit**Department:** American Studies; Native American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

Native American Indian literature is a distinctive collection of fiction, poetry, autobiographical narratives, and oral stories in translation.

This course will provide a general literary and historical context of this distinctive literature, consider narrative subjects and themes, and focus on critical readings of contemporary novels by Native American Indian authors.

Final exam required. Instructor: Vizenor

AMERSTD C171/LD ARCH C171 The American Designed Landscape Since 1850 3 Units**Department:** American Studies; Landscape Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course surveys the history of American landscape architecture since 1850 in four realms: 1) urban open spaces--that is squares, plazas, parks, and recreation systems; 2) urban and suburban design; 3) regional and environmental planning; 4) gardens. The course will review the cultural and social contexts which have shaped and informed landscape architecture in the United States since the advent of the public parks movement, as well as, the aesthetic precepts, environmental concerns, horticultural practices, and technological innovations of American landscapes. Students will complete a midterm, final, and a research assignment.

Final exam required. Instructor: Mozingo

AMERSTD C172/UGBA C172 History of American Business 3 Units**Department:** American Studies; Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course will examine selected aspects of the history of American business. Included will be discussions of the evolution of the large corporation, the development of modern managerial techniques, and the changing relationship of business, government, and labor.

Final exam required. Instructor: Rosen

AMERSTD 178AC Race and Ethnicity in American Culture: Film, Music, and Advertising 3 Units**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours of lecture/discussion per week for 3 weeks.

This course will examine the politics of racial representation and expression in popular music as well as film and advertising. This course combines 180C, 184I, and 188F.

Satisfies the American Cultures requirement

Students will receive no credit for 178AC after taking 179AC, 180C, 184I, and 188F. Final exam required.

AMERSTD 179AC Representing Race and Ethnicity in American Culture 3 Units**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours of Lecture and 1 hour of Discussion per week for 3 weeks.

This course offers students a unified course experience that examines the politics of visual representation and ways of "seeing" race and ethnicity in the U.S. in a comparative way. This course satisfies the American Cultures requirement by combining the following 1-unit courses: American Studies 180C - The Politics of Advertising in the United States: Race, Ethnicity, and Representation; American Studies 181B - Writing Narratives of Race and Gender: Photography and Art; and American Studies 184I - Race and American Film.

Satisfies the American Cultures requirement

Students will receive no credit or partial credit for 179AC after taking 180C, 181B, or 184I. Final exam required.

AMERSTD 180A Advertising America 1 - 2 Units**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 to 10 hours of lecture per week for 3 weeks.

This course will discuss contemporary advertising as a commercial practice, as social ideology, and as art/collectibles. Looking at both print and television advertising, we will examine how ads code meaning, how they address audiences, and how they represent identity and construct social norms.

Final exam required. Formerly known as 126.

AMERSTD 180B Advertising and the Culture of Consumption:**Gender and Race in Commercial Representations of the Self 1 Unit****Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course will offer several perspectives on the role advertising has played in determining various expressions of American self-identity, with special emphasis on analyzing corporate representations of the self presented of--and directed to--African Americans and Native Americans in the late 19th and early 20th centuries. The course will complicate commercial representations of African Americans and Native Americans by comparing and contrasting these corporately manufactured identities with individualized voices of racial photography, painting, and music of the period. The lectures and discussions will be designed to build comparatively and incrementally. Gender issues will constitute a subtext throughout the course.

Final exam required. Formerly known as 138.

AMERSTD 180C The Politics of Advertising in the United States: Race, Ethnicity and Representation 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course will address the birth of advertising culture in the U.S., focusing on the specific ways that early advertising used images of Natives to connect products to values associated with nature, authenticity, and masculinity. We will then talk about the use of plantations and African Americans to both sell products and re-imagine the U.S. as a nation. Finally, we will look at the "Golden Age" of advertising (1950-1980) to talk about the way that middle class Euro-American values came to define the American Dream.

Final exam required.

AMERSTD 181A American Painting at the Fine Arts Museums of San Francisco 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of lecture per week, plus field trips.

This course proposes to use the extraordinary local collections, particularly of the Mr. and Mrs. John D. Rockefeller 3rd collection of American art, to introduce students to the tradition of painting in America and to the types of intellectual problems with which current scholars of this art are engaged. All sessions will take place in the galleries in front of the paintings at the deYoung Museum in Golden Gate Park in San Francisco. Topics will include 17th- and 18th-century painting, 19th-century genre painting, folk painting, landscape painting, still life, and 20th-century painting.

Final exam required. Formerly known as 134.

AMERSTD 181B Visual Culture in American Society: Photography and Art 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course aims to uncover the long history between race, gender, nation, and the visual. Our particular concern is how visual culture produces meanings about African American, Native American, and women's bodies. What do visual narratives tell us about national identity? Through the specific lenses of visual art and photography, we will ask how do racial bodies become gendered bodies? How have racial meanings and the visual modalities employed to express them changed over time?.

Final exam required.

AMERSTD 182A American Journeys 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course examines the nature, function and status in contemporary American culture of a central metaphor and belief in American experience: human life as a journey to the west, to the east, or to nowhere. We will study the nature and extent of this motif in recent American culture (including its expression in literature, music, and popular idioms) as well as situate our discussions within the context of historical expressions of the American journey as cyclical, eschatological, or as a journey to oblivion. Drawing on selections from, among others, Walt Whitman, Josiah Royce, James Baldwin, Jack Kerouac, and Maya Angelou, we will discuss the notion of journey in terms of possibility, nostalgia, nectar, cynicism, self-deception, and disappointment. Students will be encouraged to consider--and write about--their own relation to this expressive tradition in American cultural history.

Final exam required. Formerly known as 125.

AMERSTD 182B Chinatown in History and in American Imagination 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

Chinatown occupies a permanent space in major North American cities. This space occupies a special place in the imagination of white U.S. and Canadian settlers, inspiring curiosity and fear and provoking missionary zeal and racial antagonism. Chinatown has emerged variously as an exotic Oriental city, guided ghetto, slum, and metaphor for intrigue and corruption. We will explore the images and realities of Chinatown in history and in American imagination (represented by literature and films).

Final exam required. Formerly known as 156.

AMERSTD 182C Community Development in the Bay Area 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 5 hours of lecture per week plus field trips for 3 weeks. 5 hours of lecture per week plus field trips for 3 weeks. 5 hours of lecture per week plus field trips for 3 weeks. 5 hours of lecture per week plus field trips for 3 weeks.

This course will provide students with opportunities to discuss and observe in action the most recent theories and practices pertaining to community development in the urban United States. Readings and discussion will be rooted in field trips and interviews with community activists, executive staff and nonprofits, professional planners and designers in the Bay Area. Students will have opportunities to take their own field trips and conduct interviews based on their own interests.

Final exam required. Formerly known as 142.

AMERSTD 182D Island of History: Angel Island, California 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of lecture per week plus field trips for 3 weeks. 5 hours of lecture per week plus field trips for 3 weeks. 5 hours of lecture per week plus field trips for 3 weeks. 5 hours of lecture per week plus field trips for 3 weeks.

This course will explore the history of California in terms of Angel Island in San Francisco Bay. The island will be the central reference point and illustration for many of the changes that have taken place in the demographics, environment, and politics of California. Beginning with the earliest inhabitants, students will follow the fortunes and misfortunes of the diverse peoples who have come to call themselves Californians. The course will examine specifically the culture and lifestyle of the Coast Miwok Indians, the period of Spanish colonial and Mission administrations, and the later displacement of Spanish-speaking Californios by Anglos as California became a state of the U.S. Students will also consider the impact of national affairs on the island and California as it became in turn a military base and recruitment center for the Civil War and Indian campaigns and then an immigration station. It was as an immigration station that Angel Island had the most profound effect on individual lives and for which the island is now known. Finally, students will focus on Chinese exclusion and immigration.

Final exam required. Formerly known as 158.

AMERSTD 182E San Francisco and the Bay Area: The View from the Street 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of lecture per week plus field trips for 3 weeks. 5 hours of lecture per week plus field trips for 3 weeks. 5 hours of lecture per week plus field trips for 3 weeks. 5 hours of lecture per week plus field trips for 3 weeks.

This is an urban field geography course which will provide a basic overview of Bay Area geography and history. The course will consist of half day field trips to San Francisco and Oakland. We will observe buildings, landmarks, streetscapes, signs, people on the street, etc. in order to understand the forces at work in creating a city. We will cover a broad spectrum of issues, including employment, property development, political power, race, social movements, class structure, popular entertainment.

Final exam required. Formerly known as 141.

AMERSTD 182F San Francisco Chinatown 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of lecture per week plus a field trip for 3 weeks. 5 hours of lecture per week plus a field trip for 3 weeks. 5 hours of lecture per week plus a field trip for 3 weeks. 5 hours of lecture per week plus a field trip for 3 weeks.

San Francisco Chinatown: Oriental city? Gilded ghetto? Or just Old Gold Mountain and home base to its Chinese American residents? This course aims to go against and beyond the gilded facade and exotic mystery of San Francisco's leading tourist attraction by taking an inside look at the history and culture of a complex community constantly in flux. We will review the socioeconomic and political conditions that shaped the formation and development of San Francisco's Chinatown and the lives of its people from the community's beginnings in the 1850's to the present day. In the process, we will also examine how distinct social institutions and Chinatown culture developed in response to life in America, particularly to immigration policies, the anti-Chinese movement, acculturation and assimilation forces, new gender roles and relationships, and U.S.-China politics. There will be an opportunity to learn about San Francisco Chinatown first-hand as the instructor, who is a native of that community, will take the class on a field trip.

Final exam required. Formerly known as 159.

AMERSTD 182G Alcatraz: Conquest, Containment, and Contestation 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

Against the backcloth of Alcatraz, we will explore historical and contemporary iterations of power brought to life by questions of memory, punishment, and liberation.

Final exam required.

AMERSTD 183A American Autobiographies 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course will examine samples from several autobiographical "traditions." We will also consider a number of questions about the nature of autobiography, about the act of "writing oneself." We will devote the largest part of the course to a close reading of two major American autobiographies, at least one of which will be from the second half of the 20th century. Students in the course will write weekly and be given the opportunity to experiment with beginning to create their own autobiographies.

Final exam required. Formerly known as 148.

AMERSTD 183B The Beats in San Francisco 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course will briefly review some of the major works by those poets and writers of the "Beat Generation" most closely connected with San Francisco and the Bay Area, and also some of the works by "East Coast Beats" where it is directly relevant either to the San Francisco Bay Area or to an understanding of the phenomenon of the Beat Generation itself. The poets and writers covered will include Allen Ginsberg, Jack Kerouac, Gary Snyder, Lawrence Ferlinghetti, Philip Whalen, and Michael McClure. We will pay some close attention to the interplay of Beat Generation writing with music, painting, film, and popular culture. Audio and video tapes of some of the principals will be available for viewing and listening. Final exam required. Formerly known as 135.

AMERSTD 183C The Fiction of F. Scott Fitzgerald 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

We will read and to discover Fitzgerald's key obsessions, elations, and stylistic strategies. We will then inch through what there is of , to speculate what he might have done had he lived to complete it. At the end of the course, each student will write a scene that fills in part of the unfinished section of , accompanied by a five-page essay explaining how that scene is informed by the semester's reading.

Final exam required. Formerly known as 150.

AMERSTD 183D Three African American Classics 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course will give close attention to three works which have been essential to the making of an African American literary tradition: Frederick Douglass's (1845), Zora Neale Hurston's (1937), and Alice Walker's (1982). It would help if students also read Richard Wright's story (1945). In addition to attending to the literary-cultural context of these works, we will explore other writing by these authors and develop comparisons with other African American literature.

Final exam required. Formerly known as 149.

AMERSTD 183E The Woman's Frontier 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

Westward expansion and the frontier experience have long assumed a mythical status as formative events in the annals of American culture, providing Americans with a collective cultural history and space for fantasy. Within this story there has been little room for women: westward expansion has been encoded as a male activity, and the American West has served a proving ground for the definition of American manhood. However, recent research on frontier women's history has shown that white and non-white women were present on all frontiers and in all phases of American expansion to the West. Moreover, white, literate women wrote copiously in, on, and about western frontiers--in letters and diaries, travel and settlement narratives, reminiscences and autobiographies, poems, stories, and novels. Reading from a diversity of women's texts, we will explore gender together with race and class in order to understand the women's frontier. This course will roughly follow a chronological line from the 1830s into the first decades of the 20th century.

Final exam required.

AMERSTD 184A African Americans and the Media 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

Examines the role of U.S. media in constructing racial stereotypes, identities, and understandings of African Americans. Students will examine media coverage of the Rodney King incident, the Clarence Thomas-Anita Hill hearings, the O.J. Simpson trial, and the Million Man March. Visual representations from "Birth of a Nation" to "Amos 'n Andy" to "The Cosby Show" will be critiqued; black publications and independent black filmmakers will be examined. The goal of the course is to give students a critical understanding of how the media support or challenge social constructions of race in the United States.

Final exam required. Formerly known as 166.

AMERSTD 184B American Film Noir 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

Film Noir is considered a distinctly American Film genre. A selective survey, this course will sample the gangster picture and the pre-noir hard boiled detective film, and then study some prime post World War II examples of film noir proper. Noir themes include: a pervasive cultural corruption, the femme fatale, mysteriously disabled and doomed protagonists, the dark city, etc.

Final exam required. Formerly known as 140.

AMERSTD 184C Asians and the Cinema 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

From to An introduction to the intersection of image and identity in the depiction of, and by, Asian Americans in film and video. This course seeks to contextualize the independent Asian American media arts field in relation to the mainstream commercial film industry and within the social, political, and cultural movements of the 20th century, providing critical tools for the understanding of ethnicity in American film. Lectures, readings, and discussion will be supplemented by guided screenings of diverse films and videotapes: narrative, documentary, and experimental. Film and video titles include: and .

Final exam required. Formerly known as 124.

AMERSTD 184D The Celluloid Sixties 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 3 hours of plenary session per week for 3 weeks.

This course interweaves an analysis of mainstream Hollywood films with significant political, social, and cultural issues of the 1960's. Among the topics considered are the civil rights movement and racial identity; sex and gender relationships; youth culture and the generation gap; the Vietnam war and anti-war protest. Lectures, discussions, and screenings will focus on relevant films, such as and Reading assignments will be compiled in a course reader. For background, students may read Edward P. Morgan, .

Final exam required. Formerly known as 153.

AMERSTD 184E Changing Media in American Society 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

American news and entertainment reach people around the globe. This course is an opportunity for critical study of these institutions on their home ground, using the resources of the Graduate School of Journalism. The course mixes the perspective of an American historian and a veteran reporter. We draw on our broadcasting and computer facilities to allow newcomers to see how American journalists shape the flow of information. We focus on the way this profession is building new audiences and losing others. The goal of this course is to bring outsiders into the debate that now rages about the accomplishment and purpose of American media. Final exam required. Formerly known as 137.

AMERSTD 184F Murder and the Media 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

We will investigate why the U.S. media are fascinated with murder. Covering a range of topics from "going postal" and women who murder their children, this course will consider the way murder serves as social commentary and ironic entertainment in the mass media. If the murderer has become America's favorite anti-hero, then what does that say about Americans? Answering this question will be the primary goal of the class. Readings in a course reader. For background, students may read and watch the movie.

Final exam required. Formerly known as 165.

AMERSTD 184G Nature and the Media 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course explores representations of nature, crossing media boundaries to examine nature writing, TV, film, and advertising. We will discuss the characteristics and constraints of these various media constructions of nature, paying attention in particular to the ways in which all representations of nature serve as reflections of human culture. Considerations of gender, politics, and economics will be included in our analysis of media texts.

Final exam required. Formerly known as 163.

AMERSTD 184H The Western Film 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This is a course on the western in American film and literature. We will watch six classic western films, including the and and we will read several important pieces of western literature. We will discuss such issues as the myth of the frontier, the meaning of western landscapes, the American debate about law and order, masculinity, and the nature of cowboy life, etc.

Final exam required. Formerly known as 139.

AMERSTD 184I Race and American Film 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course uses film to investigate the central role of race in American culture and history from the late 1800s to the present. We will consider the ways in which film has represented the history of race and racial formations in the U.S. Other topics include the histories of whiteness and ethnicity, representations of race and nation, blackface minstrelsy in the movies, westerns and representations of American Indians on film, borderlands and immigration, and the intersections of race, gender, and sexuality.

Final exam required.

AMERSTD 185A American Studies on the Internet 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

Students in this course will learn skills for doing research on the Internet, with particular emphasis on resources available through the World Wide Web. Taught in a computer lab and taking a broadly international approach to "American Studies," the course will provide hands-on experience with locating, searching and evaluating information for specific research projects. Students will collaborate on compiling an annotated index of online American Studies resources. NOTE: Students enrolling in this class should have a basic working knowledge of how to use both e-mail and a Web browser such as Netscape; students without this experience will be at a serious disadvantage. The course is also intended for individuals with a serious interest in American Studies. Due to the nature of the class, there is no required reading, but a list of recommended books and articles will be made available. The final exam will require each student to research a topic in American Studies, selected by the instructor, and report on his or her findings with a set of "bookmarks" (Internet addresses) and a brief summary of what was found. The exam will be conducted in class and turned in on floppy disk. Final exam required. Formerly known as 128.

AMERSTD 186A Indians of California 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course will examine and survey the culture and history of the Indians of California. The first half will focus on the unique culture, art, economy, cosmology, and spirituality of the California Indians. The reaction response and resistance of the tribes of California to a succession of invasions will be analyzed, with an emphasis on Indian perceptions of these events. The course will end with a look at contemporary survival of tribes and the renaissance of their traditions.

Final exam required. Formerly known as 143.

AMERSTD 186B Native American Autobiographies 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course considers several autobiographies written by Native Americans. The lectures, discussions, and required books focus on various cultural themes and theories of autobiography; a comparative review of diverse tribal experiences and narratives. Theories of cultural simulations and literary forms of representation in autobiographical literature will receive general attention in the course. Students will be required to participate in class discussions and complete two short review papers and a final examination.

Final exam required. Formerly known as 132.

AMERSTD 186C Native American Literature 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course is designed to acquaint the student with contemporary literary and cultural issues in Native America. Our discussions will focus on the Native American novel as an opportunity for self-representation and cultural resistance. We will read three of the most influential writers in Native America: N. Scott Momaday, Leslie Marmon Silko, and Gerald Vizenor.

Final exam required. Formerly known as 154.

AMERSTD C186E/NATAMST C169 Native American Philosophies 1 Unit**Department:** American Studies; Native American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course is a comparative discussion of Native American Indian philosophies, distinctive worldviews, and interpretations of sacred and secular ceremonies and stories. The Ghost Dance and other revitalization movements will be studied.

Final exam required. Instructor: Vizenor

AMERSTD C186H/NATAMST C168 Museums and Sacred Sites 1 Unit**Department:** American Studies; Native American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course considers the experiences, interpretations, and protections of Native American Indian cultural resources in museums and sacred sites. Creation stories, sacred geography, and ceremonies will be compared.

Final exam required. Instructor: Biestman

AMERSTD C186I/NATAMST C171 Native American Poetry 1 Unit**Department:** American Studies; Native American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course will give an in-depth analysis to a selection of contemporary Native American Indian poetry. The issues of voice, cultural traditions, and sense of place, memory, imagery, and humor will be the focus of lectures. Final exam required. Instructor: Lee

AMERSTD C186J/NATAMST C174 Imagining the Other 1 Unit**Department:** American Studies; Native American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

European images of the exotic existed long before 1492. After Columbus, they were applied to people of the Americas who were thus turned into objects of fear and desire. While these images were modified over the centuries, basic elements of positive, and negative stereotyping connected with notions of race, gender, and environmental conditioning have persisted to the present day. This class will study a selection of European and North American literary texts from the late 18th century to the present, focusing on the discourse of culture, alterity, and identity as well as, on such aspects as the Romantic idealization of "natural man," savagism, natural nobility, communicational boundaries, and forms of cultural hybridity. Final exam required.

AMERSTD 186D Native American Novelists 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

Native American literature is a distinctive collection of fiction, poetry, autobiography, and oral narratives in translation. This course will provide a general historical context of native literature and consider three important novels: by N. Scott Momaday, by Leslie Silko, and by James Welch. Students may read the critical anthology by Gerald Vizenor in preparation for the course.

Final exam required. Formerly known as 168.

AMERSTD 186E Native American Philosophies 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

A comparative study of Native American philosophies. The interpretations of distinctive worldviews in native communities, cultural contact, and concepts of nature and wilderness. A comparative consideration of subsistence and land use by natives and colonists. The course will also consider origin stories, comparative religions, vision quests, shamanism, and various healing practices. The Ghost Dance and other revitalization movements will be briefly discussed. The lecture approach will be textual and comparative, with some attention to the problems of translation and the representations of native experiences. Students should read by Carl Hammerschlag in preparation for the course. Final exam required. Formerly known as 155.

AMERSTD 186F Native America Today 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course focuses on the history and culture of American Indians in the past hundred years and, in particular, the strategies that have enabled them to survive as tribes and individuals. The course will begin with an overview of Native American history and a review of anthropological perspectives on cultural change. This will be followed by an exploration of the issues of identity and tradition in various facets of contemporary Native life, including cultural revival movements, the role of women, people of mixed descent, and contemporary art and literature. An emphasis on participation and small group discussions, and exposure to a wide variety of written and visual materials will give students a chance to develop insights and skills for responding to cultural diversity. Final exam required. Formerly known as 133.

AMERSTD 186G Tribal Sovereignty 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course will explore the unique legal status of Indian tribes and reservation lands in the United States, including analyses of treaties, the trust relationship, and the evolution of federal Indian law and policy. Students will examine the impact of such economic development ventures as mineral resource extraction and gaming on tribal sovereignty and culture. The rights of Indian individuals and groups to exercise freedom of religion will be analyzed in the context of sacred lands, repatriation of skeletal remains, and the use of peyote as sacrament.

Final exam required. Formerly known as 130.

AMERSTD 187A California Contemporary Immigration 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course identifies issues and patterns of contemporary immigration related to California's social, demographic, and economic structure. It will provide a framework of migration theories and U.S. immigration admission and restriction policies, then will examine resettlement patterns, economic strategies in the marketplace, and the reconstruction of self within diverse social networks. Finally, we will discuss emerging restrictive state and federal immigrant legislation. The approach will be comparative, integrative, and global-historical.

Final exam required. Formerly known as 151.

AMERSTD 187B European Images of America 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course examines European images of America in the areas of political theory, social theory, literature, music, philosophy, pop culture, and art. European intellectuals and artists have been drawn to American culture since the inception of the Republic. This course will indicate contradictions and ambiguities in that attraction. Critiques are displaced by admiration for a dynamic and multicultural society and vice versa. This course will examine the powerful dialectical links which have been obtained between European and American intellectual and cultural life.

Final exam required. Formerly known as 167.

AMERSTD 187C In Search of America 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

American society is fragmented, divided, and often polarized. Race, class, and at times culture serve as boundaries which separate and reinforce distinctions, creating many different Americas within the U.S. How one sees America tends to be intimately related to the environment in which one lives, the social status and class one occupies, and the historical experience of the individual or the group with which one identifies. Yet, there are also forces which bind Americans together and which have produced a culture that transcends various forms of difference to create a common American identity. This course will explore the nature of those forces that divide and unite the peoples of the U.S. Through literature, film, and social science, we will attempt to identify the ingredients of the glue that holds this society together and gives the concept of America meaning.

Final exam required. Formerly known as 144.

AMERSTD 187D Narratives of Justice 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 3 hours of plenary session per week for 3 weeks.

Law is commonly viewed as the human reflection of natural law, as what police and judges do, or as a form of politics. This course will explore law as a narrative form. The murder trial of the Native American Whitehawk, the American legal response to racial discrimination, and the recent murder trial of O.J. Simpson will illustrate this method of analysis. While the student will be exposed to a wide spectrum of American legal thought, no legal knowledge or training is required.

Final exam required. Formerly known as 160.

AMERSTD 188A Caribbean Arts and Cultures: The Carnival 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

The Caribbean is a region rich in traditions of performance and music.

This course will consider one of the most popular celebrations, the carnival, focusing on the Trinidad Carnival, calypso, and the Mardi Gras celebrations of New Orleans. Students will consider how the carnival has been sustained and reinvented over the centuries by its participants and the role of carnival in subverting or reinforcing identities and relationships of power.

Final exam required. Formerly known as 147.

AMERSTD 188B Walt Disney's America 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

In this course, we will look at the way American society has been both reflected and constructed in the animated films of Walt Disney. We will talk about individual Disney texts as expressions of specific historical moments and as fantasies about more general cultural anxieties.

Final exam required. Formerly known as 146.

AMERSTD 188C Food Culture in America 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

In the course we will explore the social history, political economy and "aesthetics" of eating in America. We will discuss the foods Americans consume, how and when they eat, and how they communicate about food. We will also consider the specific food culture of Berkeley, and explore the rise of the so-called Berkeley "gourmet ghetto".

Final exam required. Formerly known as 123.

AMERSTD 188D San Francisco Detectives 1 - 2 Units**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 to 10 hours of Lecture per week for 3 weeks.

In this course, we will consider various theories of detective narratives, discuss the origins of the genre, and focus specifically on the meaning of San Francisco as the scene of the crime. Students will read and works by San Francisco writers Marcia Muller and Stephen Greenleaf. We will also study five detective films: and.

Final exam required. Formerly known as 164.

AMERSTD 188E Sports: A Lens on American Culture 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course explores the nature and motives of societal structures and practices to illuminate the intersections and reciprocal influences of society and sports. The central framework of this course draws on Bourdieu's notion that the "space of sports...is inserted into a universe of practices and consumptions themselves structured and constituted as a system." This framework underlies our exploration of the ways that the playing field has been socially constructed and bounded as specific kinds of de-realized, ritualized, specular, performance spaces.

Final exam required. Formerly known as 122.

AMERSTD 188F American Popular Music 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of lecture per week for 3 weeks.

This course will examine the politics of racial representation and expression in American popular music. Topics will include blackface minstrelsy, jazz and the blues, and contemporary music such as reggae, salsa, and rap.

Students will receive no credit for 188F after taking 178AC. Final exam required.

AMERSTD 188G American Popular Culture: Shopping and American Consumerism 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

In this course, we will discuss the meaning of shopping in American culture by analyzing films and popular literature as well as theories about consumerism.

Final exam required.

AMERSTD 188H Contemporary Asian American Culture 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course explores changing representations of Asian Americans in film within the historical context of immigration, community formation, racism, and Asian American political activism. We will begin with a brief overview of persistent cinematic stereotypes of Chinese Americans as "perpetual foreigners" and transition to the creation of a panethnic Asian American activist movement in the late 60s. Finally, we will examine the impact of globalization on cinematic representations of Asian Americans.

Final exam required.

AMERSTD 188I American Indians and Pop Culture 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course examines the ways in which American Indians draw upon specific aesthetics to produce culture and political critique through pop culture, as well as the ways in which popular culture constructs "Indianness" as a form of protest or expression of social power.

Final exam required.

AMERSTD 188J Comic Book Nation: Comic Books, Superheroes, and American Popular Culture 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

This course will introduce students to the history, aesthetics, and mythology of the American comic book from the Great Depression to the present. Over the course of three weeks, this class will consider the invention of the superhero in the Depression and WWII era, its evolution in the atomic age, the new reluctant heroes of the 1960s, and the postmodern anti-hero, through to their current manifestations. Other topics include the emergence of the graphic novel in the 1980s.

Final exam required.

AMERSTD 188K American Horrors: Monsters in U.S. Cinema and Literature 1 Unit**Department:** American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

Film scholar Frank McConell wrote, "Each era chooses the monster it deserves and projects," which is to say that sources of fright are not universal but contingent, culturally and temporally specific. This course will study the changing face of horror in the U.S., from the nineteenth century to the present. Students will begin with Freud's theory of the uncanny - a model which will inform our examinations of various monsters depicted in literature, cinema, television, graphic fiction, and music.

Final exam required.

AMERSTD 189 Research and Writing in American Studies 1 - 3 Units**Department:** American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 3 hour of Seminar per week for 15 weeks.**Prerequisites:** Intended for American studies majors.

This course is designed to encourage research skills, critical thinking, and effective writing. An intensive reading and research seminar, the course will assist students in the development of skills fundamental to advanced research in the humanities, social sciences, and cultural studies. In addition to examining some topics in current American studies scholarship, students will conduct semester-long research projects. The effort entails identification of research topics, cultivation of interdisciplinary methodologies, compilation of annotated bibliographies, and completion of a literature review, which may serve as the first portion of the American studies senior thesis. The course is strongly recommended for those who have been out of touch with the conventions of academic research and writing or who might wish to pursue a graduate degree in the future. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

AMERSTD 190 Senior Thesis 4 Units**Department:** American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual meeting with thesis adviser.

All American Studies majors must satisfy the senior thesis requirement. Three options are available: AS 190-Senior Thesis, AS 191-Senior Seminar, or students may (with prior Faculty Advisor approval) enroll in an upper division seminar appropriate to their concentration for which they write a substantial research paper. Students planning to enroll in AS 190 must complete the "Thesis Proposal/Adviser Agreement" (available in the departmental office) prior to the semester in which the thesis is written. Final exam not required.

AMERSTD 191 Senior Seminar 4 Units**Department:** American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Seminar per week for 15 weeks.**Prerequisites:** Declared majors with senior standing.

Students will meet in seminar and will be required to write individual research papers based on the general themes or issues of the seminar. The particular themes/issues will be outlined on the American Studies Course List provided each semester by the American Studies office. Final exam not required.

AMERSTD H195 Honors Thesis 4 Units**Department:** American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Prerequisites: Senior-standing major in American studies; completion of 101 and 102, 3.51 overall GPA, and 3.65 GPA for classes in the major. This is a required course for students wishing to graduate with honors in American studies. Entails writing a bachelor's thesis pertaining to the student's individual area of concentration within the American studies major. The completed thesis will be read by the thesis supervisor and one other faculty member.

Final exam not required.

AMERSTD 198 Directed Group Study for Advanced Undergraduates 1 - 4 Units**Department:** American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Directed group study per week for 15 weeks.**Prerequisites:** Regulations set by College of Letters and Science.

Seminars for the group study of selected topics not covered by regularly scheduled courses. Topics will vary from semester to semester. Students must have completed 60 units in order to be eligible to enroll.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

AMERSTD 199 Supervised Independent Study and Research for Upper Division Majors 1 - 4 Units**Department:** American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** individual conferences

Directed individual study on special topics approved by an American studies faculty member. Enrollment restrictions apply; see the Introduction to Courses and Curricula section of this catalog.

Course may be repeated for credit as texts vary. Course may be repeated for credit when topic changes. Final exam not required.

AMERSTD 300 Teaching Interdisciplinary American Studies 2 Units**Department:** American Studies**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

This course will introduce graduate students to a number of techniques and theories used in teaching at the university level. In particular, it will focus on the challenges of teaching interdisciplinary American studies courses that rely on a range of materials and methodological approaches drawn from multiple disciplines and that address students who come from a variety of disciplinary backgrounds.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Ancient History and Med. Arch. (AHMA)

AHMA 210 Ancient History and Mediterranean Archaeology Interdisciplinary Seminar 2 or 4 Units

Department: Ancient History and Med. Arch.

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Seminar per week for 15 weeks.

Prerequisites: Graduate standing.

Team-taught by faculty from two different departments. The purpose is not only to expose students to a discipline other than their own, but to engage them directly in the application of that discipline to their own research interests. The topic and instructors will vary from year to year.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

AHMA 299 Special Study 1 - 4 Units

Department: Ancient History and Med. Arch.

Course level: Graduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 4 hours of independent study per week per unit, including consultation. 7.5 to thirty hours of independent study per week, including consultation.

Prerequisites: Graduate standing or consent of instructor.

Topics and instructors will vary from year to year. Special individual study for qualified graduate students. Individual study and research, including archaeological fieldwork or laboratory projects, in consultation with instructor on subject matter not covered in scheduled course offerings. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Anthropology (ANTHRO)

ANTHRO 1 Introduction to Biological Anthropology 4 Units

Department: Anthropology

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

An introduction to human evolution. Physical and behavioral adaptations of humans and their prehistoric and living relatives. Issues in evolutionary theory, molecular evolution, primate behavior, interpretation of fossils.

Prehistoric activities, racial differences, genetic components of behavior are defined and evaluated.

Students will receive no credit for Anthropology 1 after taking Anthropology N1, XAnthropology 1. Final exam required.

ANTHRO N1 Introduction to Physical Anthropology 4 Units

Department: Anthropology

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 5.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

An introduction to human evolution. Physical and behavioral adaptations of humans and their prehistoric and living relatives. Issues in evolutionary theory, molecular evolution, primate behavior, interpretation of fossils. Prehistoric activities, racial differences, genetic components of behavior are defined and evaluated.

Final exam required.

ANTHRO 2 Introduction to Archaeology 4 Units

Department: Anthropology

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

Prehistory and cultural growth.

Students will receive no credit for Anthropology 2 after taking Anthropology 2AC, XAnthropology 2AC but may remove a deficient grade. Final exam required.

ANTHRO 2AC Introduction to Archaeology 4 Units

Department: Anthropology

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

Prehistory and cultural growth. Introduction to the methods, goals, and theoretical concepts of archaeology with attention to the impact archaeology has had on the construction of the histories of diverse communities - Native Americans, Hispanics, and Euro-Americans. It fulfills the requirements for 2.

Satisfies the American Cultures requirement

Students will receive no credit for Anthropology 2AC after taking Anthropology 2, XAnthropology 2AC but may remove a deficient grade. Final exam required.

ANTHRO 3 Introduction to Social and Cultural Anthropology 4 Units

Department: Anthropology

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

The structure and dynamics of human culture and social institutions.

Students will receive no credit for 3 after taking 3AC; deficient grade in 3 may be removed by taking 3AC. Final exam required.

ANTHRO 3AC Introduction to Social/Cultural Anthropology (American Cultures) 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

The structure and dynamics of human cultures and social institutions from a comparative perspective with special attention to American cultures and their roots. Case studies will illustrate the principles presented in the course. It fulfills the requirements for 3.

Satisfies the American Cultures requirement

Students will receive no credit for 3AC after taking 3; deficient grade in 3AC may be removed by taking 3. Final exam required.

ANTHRO N3 Introduction to Social and Cultural Anthropology 4 Units**Department:** Anthropology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5.5 hours of Lecture and 1.5 hours of Discussion per week for 6 weeks.

The structure and dynamics of human culture and social institutions. Final exam required.

ANTHRO R5B Reading and Composition in Anthropology 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

Reading and composition courses based on the anthropological literature. These courses provide an introduction to issues distinctive of anthropological texts and introduce students to distinctive forms of anthropological writing, such as ethnography and anthropological prehistory. Readings will be chosen from a variety of texts by authors whose works span the discipline, from bioanthropology to archaeology and sociocultural anthropology. Satisfies the second half of the Reading and Composition requirement.

Satisfies the second half of the Reading and Composition requirement. Final exam not required.

ANTHRO 24 Freshman Seminar 1 Unit**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 15 hours of seminar per semester.

The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments, and topics may vary from department to department and semester to semester. Enrollment limited to 15 freshmen.

Course may be repeated for credit with different topic and different instructor. Course may be repeated for credit when topic changes. Final exam required.

ANTHRO 84 Sophomore Seminar 1 or 2 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of seminar per week per unit for 15 weeks. 1 and 1 half hours of seminar per week per unit for 10 weeks. 2 hours of seminar per week per unit for 8 weeks. 3 hours of seminar per week per unit for 5 weeks.**Prerequisites:** At discretion of instructor.

Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

ANTHRO 98 Directed Group Study 1 - 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 to 12 hours of group study (or tutorial or fieldwork) per week.

Prerequisites: Consent of instructor; freshmen or sophomore status. Organized group study on topics selected by lower division students under the sponsorship and direction of a member of the Anthropology Department's faculty.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

ANTHRO 99 Supervised Independent Study and Research 1 - 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 to 12 hours of tutorial (or fieldwork) per week.

Prerequisites: Consent of instructor; freshmen and sophomores only. Individual research by lower division students.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

ANTHRO C100/INTEGBI C185L Human Paleontology 5 Units**Department:** Anthropology; Integrative Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring. Offered alternate years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** Anthropology 1, Biology 1A-1B.

Origin and relationships of the extinct forms of mankind.

Final exam required. Instructor: White

ANTHRO C103/INTEGBI C142L Introduction to Human Osteology 6 Units**Department:** Anthropology; Integrative Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring. Offered alternate years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture and 14 hours of Laboratory per week for 15 weeks.**Prerequisites:** Anthropology 1, Biology 1B.

An intensive study of the human skeleton, reconstruction of individual and population characteristics, emphasizing methodology and analysis of human populations from archaeological and paleontological contexts, taphonomy, and paleopathology.

Final exam required. Instructor: White

ANTHRO 105 Primate Evolution 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 1 recommended.

A consideration of the major groups of primates with an emphasis on the evolution of behavior.

Final exam required.

ANTHRO 106 Primate Behavior 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.**Prerequisites:** 1 or Integrative Biology 32 recommended.

Humans, apes, and selected monkeys are the primates of concern, and among this array patterns and degrees of social behavior vary greatly. Lectures present a general introduction to behavior and its ecological context, the interaction of biology and behavior from an evolutionary perspective, and an examination of the roots of modern human behavior. Final exam required.

ANTHRO N106 Primate Social Behavior 3 Units**Department:** Anthropology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture and 1 hour of Discussion per week for 6 weeks.**Prerequisites:** 1 is recommended.

Humans, apes, and selected monkeys are the primates of concern, and among the array of primates, patterns and degrees of social behavior vary greatly. Lectures present a general introduction to behavior and its ecological context, the integration of biology and behavior from an evolutionary perspective, and examination of the roots of modern human behavior.

Final exam required.

ANTHRO 107 Evolution of the Human Brain 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Upper division undergraduate standing and Anthropology 1 or equivalent or consent of instructor.

Introduction to comparative vertebrate brain anatomy, neural development, and sensory-motor functions that are relevant to the study of human brain evolution and the evolution of uniquely human mental and behavioral capacities. Emphasis is on understanding the processes of evolution that are responsible for species differences in brain structure and function. Special attention will be given to animal communication, vocalization, neurolinguistics, and theories of language evolution.

Final exam required. Instructor: Deacon

ANTHRO 111 Evolution of Human Behavior 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.

This course will ask to what extent human behavior in its various individual, group, social, and cultural dimensions can be understood using the relatively small number of basic principles provided by evolutionary biological considerations.

Final exam required.

ANTHRO 112 Special Topics in Biological Anthropology 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week and 1 or more hours of laboratory may be required based on topic.**Prerequisites:** Anthropology 1 recommended.

Varying topics covering current discoveries, research, theories, fieldwork, etc., in biological anthropology. Topics vary with instructor.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

ANTHRO 114 History of Anthropological Thought 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

This course will present a history of anthropological thought from the mid-19th century to the present, and will draw upon the major subdisciplines of anthropology. It will focus both upon the integration of the anthropological subdisciplines and upon the relationships between these and other disciplines outside anthropology.

Final exam required. Formerly known as 114A.

ANTHRO 115 Introduction to Medical Anthropology 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks. 15 hours of Lecture and 5 hours of Discussion per week for 3 weeks.

Cultural, psychological, and biological aspects of the definitions, causes, symptoms, and treatment of illness. Comparative study of medical systems, practitioners, and patients.

Final exam required.

ANTHRO 119 Special Topics in Medical Anthropology 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** Upper division status and consent of instructor.

Special topics in cultural, biomedical and applied approaches to medical anthropology.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

ANTHRO 121AC American Material Culture 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 2 or consent of instructor.

Patterns in material culture as it reflects behavioral and psychological aspects of American culture since the 17th century. Topics include architecture, domestic artifacts, mortuary art, foodways, and trash disposal.

Satisfies the American Cultures requirement

Students will receive no credit for 121AC after taking 121A. Final exam not required.

ANTHRO 121B Historical Archaeology: Theoretical Approaches in American Historical Archaeology 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 2 or consent of instructor.

This course will provide a background in the theoretical and methodological development of American historical archaeology, with particular emphasis on the ways in which archaeologists have approached the integration of archaeological, documentary, oral historical and ethnohistoric data. Emphasis on continuing theoretical developments in the discipline. Politics of historical archaeology, and ways in which historical archaeologists and other public historians make the past relevant to the present.

Course may be repeated for credit when topic changes. Final exam required.

ANTHRO 121C Historical Archaeology: Historical Artifact Identification and Analysis 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture, 3 hours of scheduled laboratory, and 3 to 6 hours of unscheduled laboratory per week.**Prerequisites:** 121A, 121AC, or 121B recommended and consent of instructor.

Learn to work with historical artifacts from the stage of recovery through the stages of analysis and interpretation. The focus is on the analysis of materials (i.e., ceramic, glass, metal, bone, shell artifacts) recovered from historic sites. Skills acquired include how to identify, date, record, illustrate, photograph, catalog, and interpret historical archaeological materials through a combination of lectures, lab exercises, and a research paper.

Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 122A Archaeology of the Americas: Archaeology of North America 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 2

. Prehistory of North American Indians; prehistoric culture areas; relations with historic Indians.

Final exam required.

ANTHRO 122C Archaeology of the Americas: Archaeology of Central America 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 2

A survey of what archaeology can tell us about the pre-Columbian cultures of Central America: the Olmec, Maya, Aztec, and their neighbors. Final exam required.

ANTHRO 122E Archaeology of the Americas: Andean Archaeology: People of the Andes 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 2

This course covers the archaeology and history of the indigenous societies of the Andean region of South America. The lectures and readings emphasize major political, economic, social, and symbolic processes in the development of the Andean civilizations. Particular attention is paid to the development of the early states along the coast of Peru. The development of major centers in the highlands, and the relationship between the political, economic, and religious systems of the later empires and earlier political structures and social processes, are also emphasized.

Final exam required.

ANTHRO 122F Archaeology of the Americas: California Archaeology 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 2

Prehistory of California Indians; selected archaeological sites and current issues in interpretations.

Final exam required.

ANTHRO 123A Old World Cultures: Stone Age Archaeology 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 2

Overview of stone age cultures and development. Selected topics or geographic areas of paleolithic research.

Final exam required.

ANTHRO 123B Old World Cultures: Archaeology of Africa 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 4.5 hours of Lecture per week for 10 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 2

This course provides an overview of the archaeological history of the African continent. Through case studies, it will explore Africa beginning with human evolution and cultural development to later colonial encounters and their impacts. It will also examine how groups and governments have used the past in politics, and the roles heritage plays in contemporary African Societies.

Final exam required.

ANTHRO C123F/NE STUD C119 Disciplining Near Eastern Archaeology: Explorers, Archaeologists, and Tourists in the Contemporary Middle East 3 Units**Department:** Anthropology; Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

This course examines the roles that Near Eastern archaeology plays within the context of recent Middle Eastern history and society, from 1800 to the present day. Topics include the discipline's entanglement with imperialism, nationalism, science, tourism, the antiquities trade, media, and war. Students will examine and discuss ethnographies, technical reports, memoirs, films, and images.

Final exam not required. Instructor: Porter

ANTHRO 124A Pacific Cultures: Archaeology of the South Pacific 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 2

Selected topics and research problems in the archaeology of the southern Pacific from prehistory through to the establishment of complex chiefdoms in many locales. Stress on current issues and interpretations.

Final exam required.

ANTHRO 124AC Hawaiian Ethnohistory 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 3 or equivalent or consent of instructor.

Developmental foundations of the 20th-century multicultural society of Hawaii, during the period 1778-1900, explored through an explicitly anthropological perspective. The following ethnic groups are emphasized: Native Hawaiians, British-American whites, Chinese, and Japanese.

Satisfies the American Cultures requirement

Final exam required.

ANTHRO C124C/INTEGBI C187 Human Biogeography of the Pacific 3 Units**Department:** Anthropology; Integrative Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Biology 1B strongly recommended, or evidence the student has mastered an equivalent set of basic concepts in evolution and ecology.

This course examines the history of human dispersal across Oceania from the perspectives of biogeography and evolutionary ecology. *H. sapiens* faced problems of dispersal, colonization, and extinction, and adapted in a variety of ways to the diversity of insular ecosystems. A dual evolutionary model takes into account cultural evolution and transmission, as well as biological evolution of human populations. This course also explores the impacts of human populations on isolated and fragile insular ecosystems, and the reciprocal effects of anthropogenic change on human cultures.

Final exam required. Instructor: Kirch

ANTHRO C125A/JAPAN C175 Archaeology of East Asia 4 Units**Department:** Anthropology; Japanese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Prehistoric and protohistoric archaeology in China, Japan, and Korea.

Final exam required.

ANTHRO C125B/JAPAN C176 Archaeology and Japanese Identities 4 Units**Department:** Anthropology; Japanese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Course explores stereotypical images of traditional Japanese culture and people through archaeological analysis. Particular emphasis will be placed on changing lifeways of past residents of the Japanese islands, including commoners, samurai, and nobles. Consideration will be given to the implications of these archaeological studies for our understanding of Japanese identities.

Final exam required.

ANTHRO 127A Bioarchaeology: Introduction to Skeletal Biology and Bioarchaeology 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 4 hours of Laboratory per week for 15 weeks. 3.5 hours of Lecture and 7.5 hours of Laboratory per week for 8 weeks. 5 hours of Lecture and 10 hours of Laboratory per week for 6 weeks.**Prerequisites:** 1, Biology 1B.

An introduction to skeletal biology and anatomy to understand how skeletal remains can be used in reconstructing patterns of adaptation and biocultural evolution in past populations, emphasizing a problem-based approach to bioarchaeological questions.

Students will receive no credit for 127A after taking either C103 or Integrative Biology C142. Final exam not required.

ANTHRO 127B Bioarchaeology: Reconstruction of Life in Bioarchaeology 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 4 hours of Laboratory per week for 15 weeks.**Prerequisites:** 127A or C103/Integrative Biology C142L is required.

This course deals with the skeletal biology of past populations, covering both the theoretical approaches and critical analysis of methods used in the study of skeletal and dental remains, and is considered the continuing course for those that have already taken introduction to skeletal biology, 127A.

Final exam required.

ANTHRO 128 Special Topics in Archaeology 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 2

Current topics in method and theory of archaeological research, varying with instructor.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

ANTHRO 128A Special Topics in Archaeology/Area 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 4.5 hours of Lecture per week for 10 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 2 recommended.

Special topics in archaeology which meet the area requirement for the anthropology major.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 128M Special Topics in Archaeology/Method 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 2 recommended.

Special topics in archaeology which meet the method requirement for the anthropology major.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 129A Topical Areas in Archaeology: Prehistoric Art 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 2. (2 or 3 for 129A.)

Draws on study of art in non-literate societies and on archaeology to explore a range of prehistoric arts in cultural contexts; e.g., rock art; Ice Age Arts; prehistoric ceramics. Uses illustrative materials from the Hearst Museum.

Final exam required.

ANTHRO 129C Topical Areas in Archaeology: Archaeology of Hunter-Gatherers 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 2. (2 or 3 for 129A.)

Course will provide an overview of hunter-gatherer archaeology, focusing on the history of hunter-gatherer archaeology in North America and Britain; long-term changes in hunter-gatherer subsistence, settlement, mortuary/ceremonial practices and crafts/trade; social archaeology of hunter-gatherers including studies of gender, cognition, and cultural landscapes; and discussions of the relevance of hunter-gatherer studies in the context of world archaeology.

Final exam required.

ANTHRO C129D/INTEGBI C155 Holocene Paleoecology: How Humans Changed the Earth 3 Units**Department:** Anthropology; Integrative Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Since the end of the Pleistocene and especially with the development of agriculturally based societies humans have had cumulative and often irreversible impacts on natural landscapes and biotic resources worldwide. Thus "global change" and the biodiversity crisis are not exclusively developments of the industrial and post-industrial world. This course uses a multi-disciplinary approach, drawing upon methods and data from archaeology, palynology, geomorphology, paleontology, and historical ecology to unravel the broad trends of human ecodynamics over the past 10,000 years.

Final exam required. Instructor: Kirch

ANTHRO C129F/L & S C140U The Archaeology of Health and Disease 4 Units**Department:** Anthropology; Letters and Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.

This course explores how archaeologists and bioarchaeologists study human families' and communities' conceptualizations and experiences of health and health care cross-culturally and through time. Students will be exposed to case studies drawing upon skeletal and material cultural evidence.

Final exam required.

ANTHRO 129E Topical Areas in Archaeology: Household Archaeology 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 2. (2 or 3 for 129A.)

This class explores the questions: why study the archaeology of households? How do we define households and how can we identify and study them archaeologically? What research questions, strategies, and methodologies does the archaeological investigation of households entail? How does the study of households contribute to multiscale approaches for understanding social organization? Why is this important? What are the causes and effects of changing scales of analysis?

Final exam required.

ANTHRO 132A Analysis of Archaeological Materials: Analysis of Archaeological Ceramics 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks. 6 hours of Lecture and 6 hours of Laboratory per week for 8 weeks. 8 hours of Lecture and 8 hours of Laboratory per week for 6 weeks.**Prerequisites:** 2 or consent of instructor.

Discussion of and laboratory instruction in methods of analysis of ceramics used by archaeologists to establish a time scale, to document interconnections between different areas, sites, or groups of people, to suggest what activities were carried out at particular sites, and to understand the organization of ceramic production itself.

Final exam required.

ANTHRO 134 Analysis of the Archaeological Record 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks. 6 hours of Lecture and 5.5 hours of Laboratory per week for 8 weeks. 7.5 hours of Lecture and 7.5 hours of Laboratory per week for 6 weeks.**Prerequisites:** 2 or consent of instructor.

Guidance in the preparation of excavated materials for publication, including sampling and analysis strategy, drawing, photography and write-up.

Course may be repeated for credit when topic changes. Final exam required.

ANTHRO 134A Field Course in Archaeological Methods 6 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Forty hours of field work per week for 4 weeks.**Prerequisites:** 2 or consent of instructor.

Practical experience in the field study of archaeological sites and materials. Coverage may include reconnaissance, mapping, recording, and excavation.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as 133 and N133.

ANTHRO 134B Archaeological Laboratory Practicum 1 - 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture and 2 to 11 hours of Laboratory per week for 15 weeks. 1.5 hours of Lecture and 3.5 to 20.5 hours of Laboratory per week for 8 weeks. 2.5 hours of Lecture and 5 to 20-7.5 hours of Laboratory per week for 6 weeks.**Prerequisites:** Consent of instructor.

This is a practical laboratory analysis course that offers a team of students the opportunity to work closely with faculty on an aspect of their laboratory research in archaeological physical or natural sciences, or archaeological material analysis. May be taken concurrently with other laboratory courses or as the logical follow-up to a field school. Projects will vary by course. Course may be repeated for credit when topic changes. Final exam required.

ANTHRO 135 Paleoethnobotany: Archaeological Methods and Laboratory Techniques 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks. 6 hours of Lecture and 5.5 hours of Laboratory per week for 8 weeks. 7.5 hours of Lecture and 7.5 hours of Laboratory per week for 6 weeks.**Prerequisites:** 2 and consent of instructor.

An introduction to the basic approaches and techniques in archaeobotanical analysis. A series of different data types and their unique approaches will be discussed, including phytoliths, pollen, and DNA, with an emphasis on macrofloral remains. Laboratory study will include the major classes of plant remains likely to be encountered in archaeological sites. Discussion will emphasize the use of plant remains to answer archaeological questions, rather than study the plant remains for their own sake. Microscope work and computing will be included. Final exam required.

ANTHRO 136A Museum Exhibit Curation and Design 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 4 hours of Studio per week for 15 weeks. 6 hours of Lecture and 7.5 hours of Studio per week for 8 weeks. 8 hours of Lecture and 10 hours of Studio per week for 6 weeks. A practical introduction to contemporary museum approaches to exhibition design, with particular application to the design of exhibits that present cultural heritage in anthropology, art, and natural history museums. Both the theory of museum exhibit design and practice will be covered, including critiques of representation; issues of cultural heritage; conversation, education, and installation standards; and incorporation of interactivity, including through digital media.

Final exam required.

ANTHRO 136C Multimedia Authoring Part 1 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture and 4 hours of Laboratory per week for 15 weeks. 1.5 hours of Lecture and 7.5 hours of Laboratory per week for 8 weeks. 2.5 hours of Lecture and 10 hours of Laboratory per week for 6 weeks.

This course is the first part in a two-part series of courses that coach students in research and presentation of archaeological information through nonlinear multimedia authoring. The content of the course varies and may focus on an area or a topic depending on instructor. Students experience the first stage of multimedia authoring process: research, planning, and design. The focus is on content development and evaluation of digital research sources, with an introduction to software skills and practice. Final exam required.

ANTHRO C136K/L & S C180W Who Owns the Past? Cultural Heritage in a Digital Age 4 Units**Department:** Anthropology; Letters and Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

A cross-disciplinary exploration of cultural heritage on a global and local scale through discussion, debate, in-class activities, and team-based research projects that draw attention to the impacts of digital technology. Themes include the creation and management of heritage sites; the ethics of archaeologists as stewards of heritage; listening to multiple voices of interest groups; destruction and looting; and the preservation, conservation, and public presentation of heritage. Final exam not required.

ANTHRO 136E Digital Documentation and Representation of Cultural Heritage 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2.5 hours of lecture and 10 hours of laboratory per week for 6 weeks. Forty hours of lecture/laboratory per week for 3 weeks. A practical, hands-on overview of cutting-edge digital technology that is being used and developed for the documentation of archaeological sites. This course outlines a digital documentation strategy for collecting, processing, and integrating digital data from a variety of different media into a dataset that holistically describes place, including landscape, architecture, and other cultural artifacts. Final exam not required.

ANTHRO 136H Public Anthropology: Archaeology After-School Program 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** 2 or consent of instructor.

An opportunity to work with sixth-graders in exploring the worlds of archaeology, history, and computer-based technologies. Meets the method requirement for the anthropology major. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as 128M.

ANTHRO 136I Public Anthropology: Archaeology and the Media 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture and 4 hours of Laboratory per week for 15 weeks. 2.5 hours of Lecture and 10 hours of Laboratory per week for 6 weeks.**Prerequisites:** 2

Focus on the use of digital media to create narrative about the practice and products of archaeology. Students build a critical awareness of the way digital media are used by archaeologists, journalists, film and TV producers, and others. Students will experience the introductory stage of the digital media authoring process. Final exam required.

ANTHRO 136J Public Anthropology: Archaeology and the Media Method 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture and 4 hours of Laboratory per week for 15 weeks.**Prerequisites:** 136I.

Focus on the use of digital media to create narratives about the practice and products of archaeology. Students work in teams to produce short videos (digital narrative or digital stories) from their own research. Students share equally the responsibilities of research and writing, directing, camera, sound recording, and editing. This course satisfies the method requirement for the anthropology major. Final exam required.

ANTHRO 137 Energy, Culture and Social Organization 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course will consider the human dimensions of particular energy production and consumption patterns. It will examine the influence of culture and social organization on energy use, energy policy, and quality of life issues in both the domestic and international setting. Specific treatment will be given to mind-sets, ideas of progress, cultural variation in time perspectives and resource use, equity issues, and the role of power holders in energy related questions.

Final exam required.

ANTHRO 138A History and Theory of Ethnographic Film 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.**Prerequisites:** 3 or 114.

The course will trace the development of ethnographic film from its beginnings at the turn of the century to the present. In addition to looking at seminal works in the field, more recent and innovative productions will be viewed and analyzed. Topics of interest include the role of visual media in ethnography, ethics in filmmaking, and the problematic relationship between seeing and believing. Requirements include film critiques, a film proposal, and a final exam.

Final exam required.

ANTHRO 138B Field Production of Ethnographic Film 5 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks. 6 hours of Lecture and 5.5 hours of Laboratory per week for 8 weeks. 7.5 hours of Lecture and 7.5 hours of Laboratory per week for 6 weeks.**Prerequisites:** 138A.

This course is devoted to training students in methods of ethnographic field film production. Based on the previous coursework in Anthro 138A, students will work toward the production of an ethnographic video from elected project proposals. In addition to weekly discussions of student projects, guest consultants and lecturers will lend their expertise on aspects of production as well as editing.

Final exam required.

ANTHRO 139 Controlling Processes 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** Those with at least one social science course will be more familiar with the subject matter.

This course will discuss key theoretical concepts related to power and control and examine indirect mechanisms and processes by which direct control becomes hidden, voluntary, and unconscious in industrialized societies. Readings will cover language, law, politics, religion, medicine, sex, and gender.

Final exam required.

ANTHRO 140 The Anthropology of Food 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 10 weeks. 10 hours of Lecture per week for 6 weeks.**Prerequisites:** 3 or equivalent or consent of instructor.

This course examines the place of food in society and includes discussions of identity, taste, taboos, ritual, traditions, nationalism, health, alcohol use, civilizing society, globalism, and the global politics of food.

Final exam required.

ANTHRO 141 Comparative Society 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.**Prerequisites:** 3 or consent of instructor.

Theories of social structure, functional interrelationships of social institutions. Primary emphasis on non-Western societies.

Final exam required.

ANTHRO 142 Kinship and Family 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 3

Comparative study of the family and kinship systems in non-state and state societies.

Final exam required.

ANTHRO C146/ART C179 Mobile City Chronicles: Gaming with New Technologies of Detection and Security 5 Units**Department:** Anthropology; Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Studio per week for 15 weeks.

This course studies the city through cases of 19th and 21st century urban detection, including detective fiction, epidemiology, urban planning, surveillance, ethnography, and related technologies. Students develop and playtest cellphone games that in turn require players to investigate cities. This "gaming the city" uses smart phones not only to read existing databases but also to write to them, producing new urban practice and knowledge. The course is organized as a research and game lab. Final exam not required.

ANTHRO C147B/LGBT C147B Sexuality, Culture, and Colonialism 4 Units**Department:** Anthropology; Lesbian Gay Bisexual Transgender St**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 3 or Sociology 3.

An introduction to social theory and ethnographic methodology in the cross-cultural study of sexuality, particularly sexual orientation and gender identity. The course will stress the relationships between culture, international and local political economy, and the representation and experience of what we will provisionally call homosexual and transgendered desires or identities. Final exam required.

ANTHRO 148 Anthropology of the Environment 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 3 or consent of instructor.

Surveys anthropological perspectives on the environment and examines differing cultural constructions of nature. Coverage includes theory, method, and case materials extending from third world agrarian contexts to urban North America. Topics may include cultural ecology, political ecology, cultural politics of nature, and environmental imaginaries. Final exam required.

ANTHRO 149 Psychological Anthropology 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 2.5 to 1.5 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.**Prerequisites:** 3 or consent of instructor.

In the contemporary world, different systems of knowledge, philosophies, and techniques of the self, understandings of normality and pathology, illness and healing, are increasingly engaged in a dialogue with each other in the lives, on the bodies, and in the imagination of people. The terms of this dialogue are often unequal and painful, yet they are also productive of new subjectivities and new voices. It is the task of a renewed psychological anthropology to study and reflect on these processes. Topics to be covered in this class include new forms of the subject and ethics at the intersection of psychical/psychiatric, political, and religious processes and discourses; ethno-psychiatry, psychoanalysis, the psychology of colonization and racism; anthropological approaches to possession and altered states, emotion, culture, and the imagination, madness and mental illness. The specific stress will be on the stakes of anthropology of the psyche today, for an understanding of power and subjugation, delusion and the imagination, violence, and the possibility of new forms of life. Final exam not required.

ANTHRO 150 Utopia: Art and Power in Modern Times 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks.

Modern times have been dominated by utopian visions of how to achieve a happy future society. Artists in competing social systems played a central role in the development of these visions. But artistic experiments were filled with paradoxes, contributing to the creation not only of the most liberating and progressive ideals and values but also to the most oppressive regimes and ideologies. The course questions: what is art, what can it achieve and destroy, what is beauty, artistic freedom, and the relationship between aesthetics, ethics, and power?. Final exam required.

ANTHRO 155 Modernity 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.

This upper division course presents episodes in the understanding of anthropos (man, humanity, civilization, etc.) in its modern figuration. The course will juxtapose the conceptual repertoire of key thinkers about modernity, and will examine episodes in the history of the arts and/or sciences. Final exam required.

ANTHRO 156 Anthropology of the Contemporary 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.

This course is an introduction to the conceptual field of "the contemporary," a stylization of both old and new elements that stands in contrast to "modernity", and "post modernity", and which opens up inquiries into the actual state of things, particularly for anthropology. Anthropology 155, while not required, is highly recommended as a prerequisite.

Final exam required.

ANTHRO 156B Culture and Power 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.

The course examines how representations are situated within fields of power and, in turn, how political considerations are translated into cultural forms. Topics include: philosophy and history of social science, power/knowledge, the social, difference and power, social science and ethics. Final exam not required.

ANTHRO 157 Anthropology of Law 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 3 or consent of instructor.

Comparative survey of the ethnography of law; methods and concepts relevant to the comparative analysis of the forms and functions of law. Final exam required.

ANTHRO 158 Religion and Anthropology 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 3 or consent of instructor.

A consideration of the interplay between religious beliefs and institutions and other aspects of culture.

Final exam required.

ANTHRO 160AC Forms of Folklore 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 4.5 hours of Lecture and 1.5 hours of Discussion per week for 10 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.**Prerequisites:** Upper division standing.

A world-wide survey of the major and minor forms of folklore with special emphasis upon proverbs, riddles, superstitions, games, songs, and narratives.

Satisfies the American Cultures requirement

Final exam required.

ANTHRO 161 Narrative Folklore 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The study of folktales, myths, legends, and other forms of verbal art; methods and theories of folklore.

Final exam required.

ANTHRO 162 Topics in Folklore 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.

Special topics in folklore or ethno-musicology.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

ANTHRO N162 Introduction to Arabic Folklore 4 Units**Department:** Anthropology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture per week for 8 weeks.

This course is concerned with the principal genres of Arabic folklore and the oral tradition in Arab culture. The reading material is in English and will be supplemented by slide presentations, a museum exhibit, and films.

Final exam required.

ANTHRO 166 Language, Culture, and Society 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 3 or consent of instructor.

This course examines the complex relationships between language, culture, and society. The materials in the course draw on the fields of linguistic anthropology, linguistics, sociolinguistics, philosophy of language, discourse analysis, and literary criticism to explore theories about how language is shaped by, and in turn shapes, our understandings about the world, social relations, identities, power, aesthetics, etc. Final exam not required.

ANTHRO 169A Data Analysis and Computational Methods 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 2 or consent of instructor.

This course capitalizes on a successful approach of using definitional formulas to emphasize concepts of statistics, rather than rote memorization in both qualitative and quantitative anthropology. This conceptual approach constantly reminds the students of the logic behind what they are learning. Procedures are taught verbally, numerically, and visually, to reach students with different learning styles. Final exam not required.

ANTHRO 169B Research Theory and Methods in Socio-Cultural Anthropology 5 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.**Prerequisites:** 3

Introduction to research problems and research design techniques. Will involve local field research on the collection, analysis, and presentation of data. This course requires 15 hours of work per week including class time, outside work and preparation. One section meeting per week will be required.

Final exam not required.

ANTHRO 169C Research Theory and Methods in Linguistic Anthropology 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Upper division undergraduate standing.

This course provides an introduction to selected theories and methods in Linguistic Anthropology, with a focus on topics of relevance to ethnographic fieldwork. Readings and lectures are organized into three modules: Linguistic categories and their consequences for thought, the effects of social context on meaning, and the empirical basis of research on language.

Final exam not required. Instructor: Hanks

ANTHRO 170 China 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.

Chinese culture and society with an emphasis on the village level.

Final exam required.

ANTHRO 171 Japan 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks. Ethnological treatment of historic and modern Japanese culture, covering history, art and religion; family, kinship and community organization; political, economic and occupational patterns; cultural psychology and social problems in modern Japan. The approach utilizes both sociological and psycho-cultural forms of analysis.

Final exam required.

ANTHRO 172AC Special Topics in American Cultures 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks. Various topics which meet the American cultures requirement, taught by members of the Social/Cultural faculty. See the Schedule of Classes for each semester, and the department's Internal Catalog for course title, description, instructor name, and specific format.

Satisfies the American Cultures requirement

Course may be repeated for credit with different instructor. Course may be repeated for credit when topic changes. Final exam required.

ANTHRO 174AC California Historical Anthropology 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

Combining historical archaeology, ethnohistory, and ethnography, this course will take account of ethnic groups and their interaction in early colonial California; Native Americans; mission, presidio, pueblo, and rancho communities of Spanish/Mexican California; Russian frontier society at Fort Ross; and American expansion into California, especially the Gold Rush. The course will also examine how the colonial past affects ethnic relations and cultural identity among contemporary California Indians.

Satisfies the American Cultures requirement

Final exam required.

ANTHRO 179 Ethnography of the Maya 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 3 recommended.

An introduction to the anthropological study of Maya people in Southern Mexico, Guatemala, and Belize. The course focuses on certain parts of the Maya region, emphasizing selected themes and problems. We will explore regional history through the development of Maya studies and the historical transformations of Maya societies. These themes will be traced through studies of the Classic Maya, the Spanish conquest and colonization, indigenous resistance and rebellion, and recent pan-Maya activism.

Students will receive no credit for 179 after taking 188 spring or fall 2001. Final exam required.

ANTHRO 180 European Society 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks. Representative groups in historical and modern perspective. Rural-urban relationships and the dynamics of change.

Final exam required.

ANTHRO 181 Themes in the Anthropology of the Middle East and Islam 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of lecture and zero to 1 hours of discussion per week. 6 hours of lecture and zero to 2 hours of discussion per week for 8 weeks. 8 hours of lecture and zero to 2 hours of discussion per week for 6 weeks. 15 hours of lecture and zero to 5 hours of discussion per week for 3 weeks.

Prerequisites: Anthropology 3 recommended.

Cultures of the contemporary Near East, with special emphasis upon Arab populations.

final paper Instructor: Pandolfo

ANTHRO 183 Topics in the Anthropological Study of Africa 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 3 and/or 114.

The course will focus on African societies and cultures, as well as on issues relating to the history of Africanist anthropology. Images and constructs of Africa or Africans will thus be contextualized in relation to prevailing anthropological theories at different times, and in different regions of the continent.

Final exam not required.

ANTHRO 189 Special Topics in Social/Cultural Anthropology 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks. 15 hours of Lecture per week for 3 weeks.

Prerequisites: 3 or consent of instructor.

Various topics covering current research theory, method; issues of social and cultural concern; culture change, conflict, and adaptation. May combine more than one subdiscipline of Anthropology.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

ANTHRO 189A Special Topics in Cultural Anthropology/Area 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.

Prerequisites: 3 recommended.

Special topics in cultural anthropology which meet the area requirement for the major.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

ANTHRO H195A Senior Honors 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Tutorial per week for 15 weeks. 5.5 hours of Tutorial per week for 8 weeks. 7.5 hours of Tutorial per week for 6 weeks.**Prerequisites:** Open only to honors students.

Systematic readings in history and modern theory, collection and analysis of research materials, and the preparation of an honors thesis. Group or individual tutorials.

Final exam not required.

ANTHRO H195B Senior Honors 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part two of a year long series course. Upon completion, the final grade will be applied to both parts of the series.**Hours and format:** 3 hours of Tutorial per week for 15 weeks. 5.5 hours of Tutorial per week for 8 weeks. 7.5 hours of Tutorial per week for 6 weeks.**Prerequisites:** Open only to honors students.

Systematic readings in history and modern theory, collection and analysis of research materials, and the preparation of an honors thesis. Group or individual tutorials.

Final exam not required.

ANTHRO 196 Undergraduate Seminar 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks. 3.5 hours of Seminar per week for 8 weeks. 5 hours of Seminar per week for 6 weeks.**Prerequisites:** Consent of instructor.

Seminar for the advanced study of the subject matter of a previously given upper division course, emphasizing reading and discussion.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

ANTHRO 197 Fieldwork 1 - 12 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 to thirty-6 hours of tutorial or fieldwork per week.**Prerequisites:** Upper-division status; consent of instructor.

Individual field experience sponsored by a faculty member; written reports required.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

ANTHRO 198 Directed Group Study 1 - 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 6 hours of directed group study per week for 10 weeks. 2 to 7 hours of directed group study per week for 8 weeks. 2 to 10 hours of directed group study per week for 6 weeks.**Prerequisites:** 60 units; good academic standing.

Undergraduate research by small groups.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

ANTHRO 199 Supervised Independent Study 1 - 4 Units**Department:** Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 3 hour of Independent study per week for 15 weeks. 1.5 to 6 hours of Independent study per week for 10 weeks.**Prerequisites:** Consent of instructor.

Supervised independent study and research.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

ANTHRO 210 Special Topics in Physical Anthropology 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 217 Discourse and of the Body 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This course juxtaposes discourse analysis and approaches to health and biomedicine, querying how ideologies of language and communication provide implicit foundations for work on health, disease, medicine, and the body and how biopolitical discourses and practices inform constructions of discourse.

Course may be repeated for credit when topic changes. Final exam not required. Instructor: Briggs

ANTHRO 219 Topics in Medical Anthropology 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Comparative study of mental illness and socially generated disease: psychiatric treatment, practitioners, and institutions.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 221 Pre-Columbian Central America 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 226 Archaeology of the Pacific 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Subject matter will vary; current issues and debates in the archaeology of the Pacific, e.g., trade, exchange, colonization, maritime adaptations, etc. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 227 Historical Archaeology Research 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate standing with some background in archaeology, or undergraduates who have taken 2, or consent of instructor.

Historical archaeology seminar. Subject matter will vary from year to year. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 228 Method 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Various topics and issues in the methods of archaeological analysis and interpretation: style, ceramics, architectural analysis, lithic analysis, archaeozoology, etc.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 229A Archaeological Research Strategies 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Required for all first and second year graduate students in archaeology.

Three hours of seminar discussion of major issues in the history and theory of archaeological research and practice (229A), and of the research strategies and design for various kinds of archaeological problems (229B). To be offered alternate semesters.

Final exam not required.

ANTHRO 229B Archaeological Research Strategies 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Required for all first and second year graduate students in archaeology.

Three hours of seminar discussion of major issues in the history and theory of archaeological research and practice (229A), and of the research strategies and design for various kinds of archaeological problems (229B). To be offered alternate semesters.

Final exam not required.

ANTHRO 229C Writing the Field in Archaeology 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

This seminar is intended to guide students in the definition of a field within archaeology, from initial conceptualization to writing of a field statement, dissertation chapter, or review article.

Final exam not required.

ANTHRO 230 Special Topics in Archaeology 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 231 Advanced Topics in Bioarchaeology 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

This advanced seminar course explores how we reconstruct past lifeways from archaeological skeletal remains. It deals with the skeletal biology of past populations, covering both the theoretical approaches and methods used in the analysis of skeletal and dental remains.

Final exam not required. Instructor: Agarwal

ANTHRO 235 Special Topics in Museum Anthropology 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Contemporary issues in museum studies from an anthropological perspective.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 240A Fundamentals of Anthropological Theory 5 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 4 to 6 hours of Seminar per week for 15 weeks.

Prerequisites: Enrollment is strictly limited to and required of all anthropology and medical anthropology graduate students who have not been advanced to candidacy.

Anthropological theory and practice--following the rest of the world--have been undergoing important restructuring in the past decade. The course is organized to reflect this fact. We will begin by looking at recent debates about the nature and purpose of anthropology. This will provide a starting point for reading a series of classic ethnographies in new ways as well as examining some dimensions of the current research agenda in cultural anthropology.

Final exam not required. Instructor: Required of all graduate students in social/cultural anthropology.

ANTHRO 240B Fundamentals of Anthropological Theory 5 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This course provides a strong foundation for graduate work in STS, a multidisciplinary field with a signature capacity to rethink the relationship among science, technology, and political and social life. From climate change to population genomics, access to medicines and the impact of new media, the problems of our time are simultaneously scientific and social, technological and political, ethical and economic.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO C261/FOLKLOR C261 Theories of Narrative 4 Units**Department:** Anthropology; Folklore**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks. 7.5 hours of Lecture per week for 8 weeks. 10 hours of Lecture per week for 6 weeks.

This course examines a broad range of theories that elucidate the formal, structural, and contextual properties of narratives in relation to gestures, the body, and emotion; imagination and fantasy; memory and the senses; space and time. It focuses on narratives at work, on the move, in action as they emerge from the matrix of the everyday preeminently, storytelling in conversation--as key to folk genres--the folktale, the legend, the epic, the myth.

Final exam not required.

**ANTHRO C262A/FOLKLOR C262A Theories of Traditionality and
Modernity 4 Units****Department:** Anthropology; Folklore**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

This seminar explores the emergence of notions of tradition and modernity and their reproduction in Eurocentric epistemologies and political formations. It uses work by such authors as Anderson, Butler, Chakrabarty, Clifford, Derrida, Foucault, Latour, Mignolo, Pateman, and Poovey to critically reread foundational works published between the 17th century and the present--along with philosophical texts with which they are in dialogue--in terms of how they are imbricated within and help produce traditionalities and modernities.

Course may be repeated for credit with different topic and different instructor. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO C262B/FOLKLOR C262B Theories of Traditionality and Modernity 4 Units**Department:** Anthropology; Folklore**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This seminar explores the emergence of notions of tradition and modernity and their reproduction in Eurocentric epistemologies and political formations. Course may be repeated for credit with different topic and different instructor. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 270A Seminars in Linguistic Anthropology: Semantics 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 270B Seminars in Linguistic Anthropology: Fundamentals of Language in Context 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Intensive introduction to the study of language as a cultural system and speech as socially embedded communicative practice. This is the core course for students wishing to take further coursework in linguistic anthropology.

Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO C273/ESPM C273/HISTORY C251/STS C250 Science and Technology Studies Research Seminar 3 Units**Department:** Anthropology; Environ Sci, Policy, and Management; History; Science and Technology Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This course will cover methods and approaches for students considering professionalizing in the field of STS, including a chance for students to workshop written work.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 280B Seminars in Area Studies: Africa 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Courses will vary from year to year. See Departmental Internal Catalogue for detailed descriptions of course offerings for each semester.

Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 280C Seminars in Area Studies: South Asia 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Courses will vary from year to year. See Departmental Internal Catalogue for detailed descriptions of course offerings for each semester.

Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 280D Seminars in Area Studies: China 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Courses will vary from year to year. See Departmental Internal Catalogue for detailed descriptions of course offerings for each semester.

Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 280X Seminars in Area Studies: Special Topics in Area Studies 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Courses will vary from year to year. See Departmental Internal Catalogue for detailed descriptions of course offerings for each semester.

Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 290 Survey of Anthropological Research 1 Unit**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Lecture per week for 8 weeks.

Required each term of all registered graduate students prior to their advancement to Ph.D. candidacy.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 296A Supervised Research 2 - 12 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Variable units for field research per week.**Prerequisites:** Consent of instructor.

Practice in original field research under staff supervision. One unit of credit for every four hours of work in the field.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 296B Supervised Research 4 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of consultation per week.**Prerequisites:** Consent of instructor.

Analysis and write-up of field materials.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO N296A Supervised Research 1 - 6 Units**Department:** Anthropology**Course level:** Graduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Variable units for field research per week.**Prerequisites:** Consent of instructor.

Practice in original field research under staff supervision. One unit of credit for every four hours of work in the field.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 298 Directed Reading 1 - 8 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 8 hours of conference per week.**Prerequisites:** Consent of instructor.

Individual conferences intended to provide directed reading in subject matter not covered by available seminar offerings.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 299 Directed Research 1 - 12 Units**Department:** Anthropology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 to 8 hours of conference per week.**Prerequisites:** Consent of instructor.

Individual conferences to provide supervision in the preparation of an original research paper or dissertation.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ANTHRO 301 Professional Training: Teaching 1 - 6 Units**Department:** Anthropology**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar and 8 hours of Lecture per week for 15 weeks.

Group consultation with instructor. Supervised training with instructor on teaching undergraduates.

Course may be repeated for a maximum of 12 units. Course may be repeated for a maximum of 12 units. Final exam not required.

ANTHRO 375 Graduate Pedagogy Seminar 3 Units**Department:** Anthropology**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Training in both the logistics and the pedagogical issues of undergraduate teaching.

Final exam not required. Formerly known as Anthropology 300. Instructor: Agrawal

ANTHRO 602 Individual Study for Doctoral Students 1 - 12 Units**Department:** Anthropology**Course level:** Graduate examination preparation**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 8 hours of consultation per week.

In preparation for Ph.D. examinations. Individual study in consultation with adviser. Intended to provide an opportunity for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D. May not be used for unit or residence requirements for the degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Applied Science and Technology (AST)

AST C210/EL ENG C213 Soft X-rays and Extreme Ultraviolet Radiation 3 Units**Department:** Applied Science and Technology; Electrical Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Physics 110, 137, and Mathematics 53, 54 or equivalent.

This course will explore modern developments in the physics and applications of soft x-rays. It begins with a review of electromagnetic radiation at short wavelengths including dipole radiation, scattering and refractive index, using a semi-classical atomic model. Subject matter will include the generation of x-rays with laboratory tubes, synchrotron radiation, laser-plasma sources, x-ray lasers, and black body radiation. Concepts of spatial and temporal coherence will be discussed.

Final exam not required. Formerly known as EI Engineering 290G.

AST C225/MAT SCI C225 Thin-Film Science and Technology 3 Units

Department: Applied Science and Technology; Materials Science and Engineering

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Graduate standing in engineering, physics, chemistry, or chemical engineering.

Thin-film nucleation and growth, microstructural evolution and reactions. Comparison of thin-film deposition techniques. Characterization techniques. Processing of thin films by ion implantation and rapid annealing. Processing-microstructure-property-performance relationships in the context of applications in information storage, ICs, micro-electromechanical systems and optoelectronics.

Final exam not required. Instructor: Wu

AST C239/EL ENG C239 Partially Ionized Plasmas 3 Units

Department: Applied Science and Technology; Electrical Engineering

Course level: Graduate

Terms course may be offered: Fall and spring. Offered alternate years.

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: Forty-5 hours of lecture per term.

Prerequisites: An upper division course in electromagnetics or fluid dynamics.

Introduction to partially ionized, chemically reactive plasmas, including collisional processes, diffusion, sources, sheaths, boundaries, and diagnostics. DC, RF, and microwave discharges. Applications to plasma-assisted materials processing and to plasma wall interactions.

Final exam required. Formerly known as 239.

AST C295R/CHM ENG C295R Applied Spectroscopy 3 Units

Department: Applied Science and Technology; Chemical Biomolecular Engineering

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Graduate standing in engineering, physics, chemistry, or chemical engineering; courses: quantum mechanics, linear vector space theory.

After a brief review of quantum mechanics and semi-classical theories for the interaction of radiation with matter, this course will survey the various spectroscopies associated with the electromagnetic spectrum, from gamma rays to radio waves. Special emphasis is placed on application to research problems in applied and engineering sciences. Graduate researchers interested in systematic in situ process characterization, analysis, or discovery are best served by this course.

Final exam not required. Instructor: Reimer

AST 299 Individual Study or Research 1 - 12 Units

Department: Applied Science and Technology

Course level: Graduate

Terms course may be offered: Fall, spring and summer

Grading: Offered for satisfactory/unsatisfactory grade only.

Hours and format: 1 to 12 hour of Independent study per week for 15 weeks. 1 to 12 hour of Independent study per week for 8 weeks. 5 to 6ty hours of Independent study per week for 3 weeks.

Prerequisites: Consent of instructor; graduate standing.

Investigations of advanced problems in applied science and technology.

Sponsored by Engineering Interdisciplinary Studies Center.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Arabic (ARABIC)

ARABIC 1A Elementary Arabic 5 Units

Department: Arabic

Course level: Undergraduate

Terms course may be offered: Fall and spring. Sequence begins (F).

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 5 hours of Recitation per week for 15 weeks.

Prerequisites: 1A is a prerequisite to 1B.

This course emphasizes the functional usage of Arabic in the four language skills: listening, speaking, reading, and writing. Authentic audio, video, and reading materials are presented from the beginning, and students are encouraged to be creative with the language in and out of class.

Final exam required.

ARABIC 1B Elementary Arabic 5 Units

Department: Arabic

Course level: Undergraduate

Terms course may be offered: Fall and spring. Sequence begins (F).

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 5 hours of Recitation per week for 15 weeks.

Prerequisites: 1A is a prerequisite to 1B.

This course emphasizes the functional usage of Arabic in the four language skills: listening, speaking, reading, and writing. Authentic audio, video, and reading materials are presented from the beginning, and students are encouraged to be creative with the language in and out of class.

Formerly Arabic 2AB. Final exam required.

ARABIC 11 Arabic for Reading Knowledge 4 Units

Department: Arabic

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 10 hours of Lecture per week for 6 weeks.

The course is designed to guide students through Arabic grammar with a systematic treatment of the subject and the use of classical Arabic texts.

Final exam required. Instructor: Bazian

ARABIC 15 Spoken Arabic 6 Units**Department:** Arabic**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 12 hours of Lecture per week for 8 weeks.

Practice in speaking an Arabic dialect.

Final exam required.

ARABIC 15B Spoken Arabic 3 Units**Department:** Arabic**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 15A.

Practice in speaking an Arabic dialect.

Course may be repeated for credit if different dialect is offered. Course

may be repeated for credit when topic changes. Final exam required.

Formerly known as 101B.

ARABIC 20A Intermediate Arabic 5 Units**Department:** Arabic**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 5 hours of Recitation per week for 15 weeks.**Prerequisites:** 1B or equivalent; 20A is a prerequisite to 20B.

This course is proficiency oriented. Authentic reading in modern standard and classical Arabic and the understanding and application of grammatical and stylistic rules are emphasized. Students deliver oral presentations and write academic papers in Arabic.

Final exam required.

ARABIC 20B Intermediate Arabic 5 Units**Department:** Arabic**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 5 hours of Recitation per week for 15 weeks.**Prerequisites:** 20A.

This course is proficiency oriented. Authentic reading in modern standard and classical Arabic and the understanding and application of grammatical and stylistic rules are emphasized. Students deliver oral presentations and write academic papers in Arabic.

Final exam required.

ARABIC 30 Intermediate Arabic 10 Units**Department:** Arabic**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 20 hours of Lecture per week for 8 weeks.**Prerequisites:** One year of college level Arabic.

This course is equivalent to a full year of intermediate level Arabic. It will deepen skills in speaking, comprehending, reading, and writing Modern Standard Arabic.

Students will receive no credit for 30 after taking 20A-20B. Final exam required.

ARABIC 50 Advanced Arabic 10 Units**Department:** Arabic**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 20 hours of Lecture per week for 8 weeks.**Prerequisites:** Two years of college level Arabic.

This course will include grammatical and stylistic analysis of Arabic texts from both the classical and the modern periods. Class will be conducted entirely in Arabic.

Students will receive no credit for 50 after taking 100A-100B. Final exam required.

ARABIC 100A Advanced Arabic 3 Units**Department:** Arabic**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 100A is prerequisite for 100B. 20B.

Intensive reading and analysis of texts of different genres. Guest lectures, films, documentaries, oral presentations, research papers. Formal and informal styles of writing and correspondence. Extensive vocabulary building.

Final exam required.

ARABIC 100B Advanced Arabic 3 Units**Department:** Arabic**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 100A.

Intensive reading and analysis of texts of different genres. Guest lectures, films, documentaries, oral presentations, research papers. Formal and informal styles of writing and correspondence. Extensive vocabulary building.

Final exam required.

ARABIC 104B Classical Arabic Prose 3 Units**Department:** Arabic**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 20B or equivalent.

This course is designed for students who wish to concentrate on Arabic of the classical periods of Arab and Islamic civilization. Reading and analysis of literary texts of various genres, including essays, biography, and travel literature.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

ARABIC 105B Classical Arabic Poetry 3 Units**Department:** Arabic**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Arabic 20B or equivalent.

Readings and analysis of poetry from the pre-Islamic through the classical periods.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

ARABIC 107 Arabic Historical and Geographical Texts 3 Units**Department:** Arabic**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 20B or equivalent.

Readings from the classical historians and geographers and from contemporary scholarship. Development of historiography.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

ARABIC 108 Islamic Religious and Philosophical Texts in Arabic 3 Units**Department:** Arabic**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 20B or equivalent.

Readings in the basic texts of Islam (Qur'an, Huran, Hadith, Sira, commentary) and in theological, mystical, and philosophical texts.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

ARABIC 111A Survey of Arabic Literature (in Arabic) 3 Units**Department:** Arabic**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 100A.

This course is designed primarily for majors and prospective majors in Arabic studies. The Classical Periods: A literary-historical survey of Arabic literature from pre-Islamic times to the middle of the thirteenth century, with emphasis on the more important achievements of major Arab authors.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

ARABIC 111B Survey of Arabic Literature (in Arabic) 3 Units**Department:** Arabic**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 100A.

This course is designed primarily for majors and prospective majors in Arabic studies. The Post-Abbasid and Modern Periods: A literary-historical survey of Arabic literature from the middle of the thirteenth century to the present.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

ARABIC H195 Senior Honors 2 - 4 Units**Department:** Arabic**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks.**Prerequisites:** Limited to senior honors candidates.

Directed study centered upon preparation of an honors thesis.

Course may be repeated for a maximum of 4 units. Final exam not required.

ARABIC 198 Directed Group Study for Upper Division Students 1 - 4 Units**Department:** Arabic**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Directed group study per week for 15 weeks. 2 to 8 hours of Directed group study per week for 8 weeks.

Instruction in areas not covered by regularly scheduled courses.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ARABIC 199 Supervised Independent Study and Research 1 - 4 Units**Department:** Arabic**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks. 1 to 4 hour of Independent study per week for 8 weeks. 1 to 4 hour of Independent study per week for 6 weeks.

Enrollment restrictions apply; see the Introduction to Courses and Curricula section of this catalog.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ARABIC 200 Arabic Grammatical Tradition 3 Units**Department:** Arabic**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 105 or the equivalent.

Study of selected grammatical phenomena of Arabic based on readings from the classical Arabic grammarians, on the modern study of linguistics in the Arab world, and on the Western grammatical tradition.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

ARABIC 202 History of Arabic 3 Units**Department:** Arabic**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 20B or its equivalent with consent of instructor.

The history of Arabic from its Semitic antecedents through the formation of the modern dialects.

Course may be repeated for credit when topics vary. Course may be repeated for credit when topic changes. Final exam not required.

ARABIC 212 Topics in Modern Arabic Literature: Poetry 3 Units**Department:** Arabic**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 109

Intensive study of modern poetry in relation to the cultural tradition.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ARABIC 220 Seminar in Classical Arabic Literature 3 Units**Department:** Arabic**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** 20B or its equivalent and consent of instructor.

A close reading and careful literary analysis of significant authors and specific topics in Classical Arabic prose or poetry or both.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

ARABIC 245 Seminar: Modernist Arabic Poetics 3 Units**Department:** Arabic**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

This course examines the origins, status, and function of literary theory in the making of modern Arabic literature. Questions of cultural influence, literary genres, forms, modes, and techniques of representation are all central to the interests of this course.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

ARABIC 298 Seminar 1 - 4 Units**Department:** Arabic**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Zero hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Special topics in Arabic. Topics vary and are announced at the beginning of each semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Architecture (ARCH)

ARCH 24 Freshman Seminars 1 Unit**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of Seminar per week for 15 weeks.

The Berkeley Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Berkeley Seminars are offered in all campus departments, and topics vary from department to department and semester to semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

ARCH 39A Freshman/Sophomore Seminar 2 - 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam not required.

Course may be repeated for credit when topic changes. Final exam required.

ARCH 39J Freshman/Sophomore Seminar 2 - 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required.

ARCH 39K Freshman/Sophomore Seminar 2 - 4 Units**Department:** Architecture**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required.

ARCH 39L Freshman/Sophomore Seminar 2 - 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required.

ARCH 39M Freshman/Sophomore Seminar 2 - 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required.

ARCH 39N Freshman/Sophomore Seminar 2 - 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required.

ARCH 39O Freshman/Sophomore Seminar 2 - 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required.

ARCH 39P Freshman/Sophomore Seminar 2 - 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required.

ARCH 39Q Freshman/Sophomore Seminar 2 - 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Seminar format.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required.

ARCH 84 Sophomore Seminar 1 or 2 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.

Hours and format: 1 hour of seminar per week per unit for 15 weeks. 1 and 1 half hours of seminar per week per unit for 10 weeks. 2 hours of seminar per week per unit for 8 weeks. 3 hours of seminar per week per unit for 5 weeks.

Prerequisites: At discretion of instructor.

Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

ARCH 98 Special Group Study 1 - 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.

Hours and format: 1 to 4 hour of Directed group study per week for 15 weeks.

This is a special topics course intended to fulfill the individual interests of students, and provide a vehicle for professors to instruct students based on new and innovative developments in the field of architecture.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

ARCH 100A Fundamentals of Architectural Design 6 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 2 hours of lecture, 6 hours of studio, and 2 hours of computer graphics laboratory per week. 4 hours of lecture, 12 hours of studio, and 3 hours of computer graphics laboratory per week for 8 weeks. 5 hours of lecture, 12.5 hours of studio, and 5 hours of computer graphics laboratory per week for 6 weeks.

Prerequisites: ED 11A-11B. Must be taken in sequence.

Introductory courses in the design of buildings. Problems emphasize conceptual strategies of form and space, site relationships and social, technological and environmental determinants. 100A focuses on the conceptual design process.

Final exam not required.

ARCH 100B Fundamentals of Architectural Design 6 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 2 hours of lecture, 6 hours of studio, and 2 hours of computer graphics laboratory per week. 3.5 hours of lecture, 5 hours of studio, and 3.5 hours of computer graphics laboratory per week for 8 weeks and 5 hours of lecture, 12.5 hours of studio, and 5 hours of computer graphics laboratory per week for 6 weeks.

Prerequisites: ED 11A-11B. Must be taken in sequence.

Introductory courses in the design of buildings. Problems emphasize conceptual strategies of form and space, site relationships and social, technological and environmental determinants. 100B stresses tectonics, materials, and energy considerations. Studio work is supplemented by lectures, discussions, readings and field trips.

Final exam not required.

ARCH 100C Architectural Design III 5 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 8 hours of Studio per week for 15 weeks.

This is a studio course in architectural design. Students work on individual and group design projects that build on topics from Architecture 100B with additional integration of conditions pertinent to architectural production that may include architectural precedents, context, landscape and urban issues, envelope, performance, structure, and tectonics in the design of buildings.

Final exam not required.

ARCH 100D Architectural Design IV 5 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 8 hours of Studio per week for 15 weeks.

Students work on individual and/or group design projects that build on topics from previous studios with additional integration of conditions pertinent to architectural production that may include architectural precedents, context, landscape and urban issues, envelope, structure, and tectonics in the design of buildings. It may also include relevant and pertinent social, cultural, and technological issues facing architecture and design.

Final exam not required.

ARCH 101 Case Studies in Architecture 5 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Forty-5 hours of lecture/seminar and 75 hours of studio/tutorial per semester.**Prerequisites:** 100A-100B.

Problems in the design of buildings of intermediate complexity. Each section deals with a selected topic and concentrates on developing conceptual strategies in the analysis and design of buildings: internal spatial relationships, material, form, tectonics, social and environmental considerations and built landscapes. Studio work is supplemented by lectures, discussions, readings, and field trips.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

ARCH 102A Capstone Project Preparation Seminar 3 Units**Department:** Architecture**Course level:** Undergraduate**Term course may be offered:** Fall**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Prerequisites:** Architecture 100A, Architecture 100B.

This course is a course in architectural research methods with an emphasis on collaborative work. Students will work on individual facets of a collective topic of critical importance to the contemporary discipline of architecture within areas of faculty expertise. These include: architectural history and theory, structures, materials and methods of construction, building performance, energy and environment, and social factors and human behavior in architecture and the environment. The goal of Capstone Preparation is to develop a coherent research proposal that will be used as a topic for the Capstone Project course taken the following semester.

Course Objectives: Ability to communicate research findings through oral, written and graphic modes of presentation to a variety of audiences. ^Comprehension of the ethics and professional responsibilities of research and how they relate to the discipline of architecture. ^Develop a research proposal of scholarly significance, identifying and effectively communicating the information sources, skill sets, and research process required to pursue the project. ^Formulate clear and precise questions, interpret information using abstract ideas, consider culturally diverse points of view, and reach well-reasoned conclusions. ^Gather, record, evaluate and apply information relevant to a research problem. ^Identify and critically assess the knowledge base and body of literature relevant to a specific research project. ^Understand the role of applied research in environmental design and its impact on human conditions, behavior and impact on the environment. ^Work with others to coordinate individual research ventures addressing a larger collective topic, and to learn to work in a supervised collaborative team.

A thesis proposal of no less than twenty-five pages.

ARCH 102B Architecture Capstone Project 5 Units**Department:** Architecture**Course level:** Undergraduate**Term course may be offered:** Spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Prerequisites:** Architecture 102A

Through individual and collective efforts, students will address topics selected in the previous semester under the guidance of faculty mentors. Topics in the field which may serve as a basis for capstone projects include: the history and theory of architecture; structures; the materials and methods of construction; building performance; energy and the environment; and social factors and human behavior. This course is aimed at students who wish to strengthen their understanding of the research methods used by the discipline of architecture and related disciplines (e.g., engineering or history), and is not solely design oriented.

Course Objectives: Communicate complex research questions, ideas and findings clearly, both orally and in writing, to a broad community.

^Demonstrate a critical understanding of how resources, including literature and data, are used in critical study and how these resources can be assessed for their validity and reliability. ^Demonstrate analytic skills. Understand the nature of research questions in the field, and how to choose appropriate architectural research methods given time, cost and skill constraints. ^Demonstrate critical thinking. Analyze, compare and critique information gathered. Organize a coherent argument. Derive objective conclusions based on the information and inquiry. ^Learn how to work in a supervised, collaborative research team, drawing on the diverse skills and knowledge of peers and faculty mentors. ^Understand the ethics and professional responsibilities of research and how this relates to the discipline of architecture.

students will collectively pursue a research or creative question developed during ARCH 102A, applying methods determined during the Fall semester, and resulting in findings that emerge from the research, to be presented to an audience including but not limited to the professional community. This final project is worth 50% of the overall grade. Conventional approaches include written theses and data analysis, but capstone projects may also result in built work, prototypes, patent applications, the development of a new software, design proposals, community service projects or professional leadership efforts.

ARCH 105 Deep Green Design 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Prerequisites:** Completion of a minimum of one design studio, two studios preferred.

This course explores the issues and practices of green architectural design through critical readings of seminal and current texts, lectures, films, field trips and projects that use both design and analysis as means of inquiry. The course examines varied approaches to sustainable design including using nature and wilderness as models, biophilia, biomimicry, material sources and reuse, accounting systems such as LEED, Zero Net Carbon and the 2030 Challenge, and the Living Building Challenge. Final Project Instructor: Ubbelohde

ARCH 107 Introduction to the Practice of Architecture 3 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Introduction to the business of architecture including client, developer and contractor relations, design proposals, competitions, and other marketing approaches as well as ethical issues of professional practice.

Final exam required. Formerly known as 120.

ARCH 108 Architectural Internship 5 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/seminar per week for 15 weeks and an additional 16 hours of internship per week for 10 of those weeks.**Prerequisites:** 100B or consent of instructor.

An intensive and structured exposure to the professional practice, using the resources of practicing architects' offices as the "laboratory." The seminar discussion focus on understanding how design happens, how projects are managed and how buildings are constructed.

Final exam not required. Formerly known as 128. Instructor: Comerio

ARCH 110AC The Social and Cultural Basis of Design 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/forum and 1.5 hours of discussion per week.

This course focuses on the significance of the physical environment for citizens and future design professionals. This course is an introduction to the field of human-environment studies, taught from an American Cultures perspective. Its objectives include: 1) being able to use the concepts in person-environment relations, 2) understanding how these concepts vary by subculture, primarily Anglo-, Hispanic-, and Chinese-American, 3) learning to use the methodological skills needed to conduct architectural programming and evaluation research, 4) thinking critically about the values embedded in design and the consequences for people, their behavior, and feelings.

Satisfies the American Cultures requirement

Final exam required. Instructor: Cranz

ARCH 111 Housing: An International Survey 3 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Introduction to international housing from the Architectural and City Planning perspective. Housing issues (social, cultural, and policy) ranging from micro-scale (house) to macro-scale (city) presented with a comparison of housing situations in developed and developing countries. Final exam required.

ARCH 119 Special Topics in the Social and Cultural Basis of Design 1 - 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of seminar per unit per week for 8 weeks. 15 hours of seminar/lecture per unit per semester.**Prerequisites:** Consent of instructor.

Selected topics in the social and cultural basis of design. For current offerings, see departmental website.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

ARCH 122 Principles of Computer Aided Architectural Design 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 1.5 hours of supervised laboratory sessions per week. 6 hours of lecture and 2 hours of supervised laboratory session per week for 8 weeks.

This course introduces students to Architecture's New Media; why and how computers are being used in architecture, and what are their current and expected impacts on the discipline and practice of architecture. Topics include presentation and re-presentation (including sketching, drafting, modeling, animating, and rendering); generating design solutions (including generative systems, expert systems, genetic algorithms, and neural networks); evaluation and prediction (using examples from structures, energy, acoustics, and human factors); and the future uses of computers in architectural design (including such topics as construction automation, smart buildings, and virtual environments). The laboratories introduce students to REVIT, a state-of-the-art architectural software, including drafting, modeling, rendering, and for building information modeling. This course is co-listed with 222.

Final exam required. Formerly known as 132.

ARCH 123 2-D Computer Technology 2 Units**Department:** Architecture**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of supervised laboratory per week. 3.5 hours of supervised laboratory per week for 8 weeks. 5 hours of supervised laboratory per week for 6 weeks.

The course provides students with practical hands-on experience in using professional architectural drafting software (e.g., Autocad). The course covers the process of creating, manipulating, and communicating through digital drawings.

Final exam required. Formerly known as 133A.

ARCH 124A 3-D Computer Technology 2 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 2 hours of supervised laboratory per week. 3.5 hours of supervised laboratory per week for 8 weeks. 5 hours of supervised laboratory per week for 6 weeks.

The course provides students with practical hands-on experience in using professional architectural modeling software (e.g., 3DStudioMax, Maya, Rhino, etc.). The course covers the process of creating, manipulating, and communicating through digital architectural models.

Final exam required. Formerly known as 133B.

ARCH 124B 3-D Computer Technology 2 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 2 hours of supervised laboratory per week. 3.5 hours of supervised laboratory per week for 8 weeks. 5 hours of supervised laboratory per week for 6 weeks.

The course provides students with practical hands-on experience in using professional architectural modeling software (e.g., 3DStudioMax, Maya, Rhino, etc.). The course covers the process of creating, manipulating, and communicating through digital architectural models.

Final exam required. Formerly known as 133B.

ARCH 127 Workshop in Designing Virtual Places 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of seminar and 1.5 hours of supervised laboratory sessions per week.

This course introduces students to designing web-accessible, Multi User, Virtual Environments (MUVEs), inhabited through avatars. Such worlds are used in video games and web-based applications, and are assuming their role as alternative 'places' to physical spaces, where people shop, learn, are entertained, and socialize. Virtual worlds are designed according to the same principles that guide the design of physical spaces, with allowances made for the absence of gravity and other laws of nature. The course combines concepts from architecture, film studies, and video game design. It uses a game engine software and a modeling software to build, test, and deploy virtual worlds.

Final exam not required.

ARCH 130 Introduction to Architectural Design Theory and Criticism 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Open to upper division undergraduates.

This class introduces students to the history and practice of design theory from the late 19th century to the present, with emphasis on developments of the last four decades. Readings and lectures explore specific constellations of theory and practice in relation to changing social and historical conditions. The course follows the rise of modernist design thinking, with particular emphasis on the growing influence of technical rationality across multiple fields in the post World War II period. Systematic approaches based in cybernetics and operations research (amongst others) are examined in the context of wider attempts to develop a science of design. Challenges to modernist design thinking, through advocacy planning and community-based design, the influence of social movements and countercultures, and parallel developments in postmodernism within and beyond architecture, provide the critical background for consideration of recent approaches to design theory, including those informed by developments in digital media and technology, environmental and ecological concerns, questions surrounding the globalization of architectural production, and the development of new materials.

Final exam required. Formerly known as 130A. Instructor: Crysler

ARCH 136 The Literature of Space 3 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

The concept of space as it is applied to the fields of architecture, geography and urbanism can be understood as a barometer of the condition that we call "modernity." This course explores connections between the larger cultural frameworks of the past century, and the idea of space as it has been perceived, conceived and lived during this period. Readings include essays from the disciplines of philosophy, geography, architecture, landscape, and urbanism, and short works of fiction that illustrate and elucidate the spatial concepts. The readings are grouped according to themes that form the foundation for weekly seminar discussions. Chronological and thematic readings reveal the force of history upon the conceptualization of space, and its contradictions.

Final exam required. Instructor: Stoner

ARCH 139X Special Topics: Design Theories and Methods 1 - 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours lecture/seminar per unit per semester.**Prerequisites:** 130

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

ARCH 140 Energy and Environment 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 3 hours of discussion/laboratory per week.**Prerequisites:** Physics or equivalent, or consent of instructor.

This course provides undergraduates and graduates with an introduction to issues of physical building performance including building thermodynamics, daylighting, and solar control. The course presents the fundamentals of building science while recognizing the evolving nature of building technologies, energy efficiency, ecology, and responsible design. The course begins with a detailed explication of the thermal properties of materials, heat transfer through building assemblies, balance point temperature, solar geometry, and shading analysis. Students apply these principles later in the course to a design project. The latter part of the course also provides a survey of broader building science topics including mechanical system design, microclimate, and current developments in energy-efficient design.

Final exam required. Instructors: Benton, Brager

ARCH 142 Sustainability Colloquium 1 or 2 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1.5 hours of Seminar per week for 15 weeks.

Presentations on a variety of topics related to sustainability, offering perspectives from leading practitioners: architectural designers, city planners, consultants, engineers, and researchers. Students can enroll for one unit (required attendance plus reading) or two units (with additional writing assignments).

Final exam required. Instructor: Brager

ARCH 144 Introduction to Acoustics 1 Unit**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 hours of lecture/discussion per week for 5 weeks.

This course focuses on what architects need to know about acoustics.

The first part deals with the fundamentals of acoustics including how sound levels are described and measured, and human response to sound. The course then covers building acoustics, mechanical equipment noise and vibration control, office acoustics, design of sound amplification systems, and environmental acoustics.

Final exam required. Instructor: Salter

ARCH 150 Introduction to Structures 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Forty-5 hours of lecture and thirty hours of discussion per semester.**Prerequisites:** Physics 8A.

Study of forces, materials, and structural significance in the design of buildings. Emphasis on understanding the structural behavior of real building systems.

Final exam required. Instructor: Black

ARCH 154 Design and Computer Analysis of Structure 3 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Thirty hours of lecture and 45 hours of laboratory per semester.**Prerequisites:** 150

Design and analysis of whole structural building systems with the aid of finite element analytical methods. Advanced structural concepts explored in a laboratory environment.

Final exam required. Instructor: Black

ARCH 155 Structure, Construction, and Space 3 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours lecture/seminar per week.**Prerequisites:** 150

In profound buildings, the structural system, construction materials, and architectural form work together to create an integrated work of art. Current practice segregates these three areas by assigning separate and rigid roles to 1) an engineer, 2) a contractor, and 3) an architect. The goal of this class is to blur these traditional boundaries and erase the intellectual cleft though hands-on experience. Students are given weekly assignments which focus on one or more of the three areas. They may be asked to analyze a structure, to construct something from actual materials, or research a case study and present it to the class. Each assignment is geared to help students integrate construction and structural issues into their architectural design, so that they can maintain control of the entire design process.

Final exam not required. Instructor: Black

ARCH 160 Introduction to Construction 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.

This introduction to the materials and processes of construction takes architecture from design to realization. The course will cover four material groups commonly used in two areas of the building assembly (structure and envelope): wood, concrete, steel, and glass. You will understand choices available and how materials are conventionally used. By observing construction, you'll see how our decisions affect the size of materials, connections, and where they are assembled. Architects must understand not only conventions, but also the potential in materials, so we will also study unusual and new developments.

Final exam required. Instructor: Black

ARCH 169 Special Topics in Construction Materials 1 - 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/seminar per unit per week for 8 weeks. 15 hours of lecture/seminar per unit per semester.**Prerequisites:** 160 and consent of instructor.

For current offerings, see department website.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Formerly known as 169X.

ARCH 170A An Historical Survey of Architecture and Urbanism 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Forty-5 hours of lecture and 15 hours of seminar/discussion per semester.

The first part of this sequence studies the ancient and medieval periods; the second part studies the period since 1400; the aim is to look at architecture and urbanism in their social and historical context. Final exam required.

ARCH 170B An Historical Survey of Architecture and Urbanism 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Forty-5 hours of lecture and 15 hours of seminar/discussion per semester.

The first part of this sequence studies the ancient and medieval periods; the second part studies the period since 1400; the aim is to look at architecture and urbanism in their social and historical context. Final exam required.

ARCH 173 Case Studies in Modern Architecture 3 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 170A-170B and consent of instructor.

This course examines developments in design, theory, graphic representation, construction technology, and interior programming through case studies of individual buildings. Our survey technique will be highly focused rather than panoptic. Each lecture will delve deeply into one or two buildings to examine program, spatial organization, graphic representation, critical building details, construction technology, and the relationship of the case study building with regard to other contemporary structures and the architect's overall body of work. From this nucleus, we will spiral outward to consider how the case study is embedded within a constellation of social and economic factors crucial to its design and physical realization. This survey of "modernism's built discourses" provides multiple perspectives on the variety of architectural propositions advanced to express the nature of modernity as a way of life. Final exam required. Formerly known as 173A.

ARCH C174/AMERSTD C111A Architecture in Depression and War 4 Units**Department:** Architecture; American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture and Zero to 2.5 hours of Discussion per week for 6 weeks.

The Great Depression and World War II are arguably the two most influential events for the development of the built environment in the 20th century. Not only did they alter the socio-economic and political landscape on which architecture and urban planning depend, but they also led to technological innovations and vital debates about the built environment. This course examines the 1930's and 1940's topically, studying the work of the New Deal, corporate responses to the Depression and war, the important connections between architecture and advertising, the role of the Museum of Modern Art in the promotion of Modernism, the concept of the ideal house, and key tests, theories, and projects from the period.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required. Instructor: Shanken

ARCH 175 Introduction to Architectural Theory 1945-Present 3 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Open to upper division undergraduates and graduate students.

This seminar provides an introduction to architectural theory since 1945, with emphasis on developments over the last three decades. Class readings and discussions explore the post-World War II crisis within modernism, postmodernism within and beyond architectural culture, and more recent developments around issues such as rapid urbanization, sustainability, the politics of cultural identity, and globalization. Transformations in architectural theory are examined in relation to historical forces such as the economy, the growth and transformation of cities, and the changing relationship between design professions and disciplines. The influences of digital media, new materials and production techniques on architectural education and practice are explored and the implications for architectural theory assessed. Key issues are anchored in case studies of buildings, urban spaces, and the institutions and agents of architectural culture.

Final exam not required. Instructor: Cryslar

ARCH 176 American Architecture 3 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

The first half of this course surveys American architecture from Colonial times to contemporary trends. Stylistic and spatial analysis is linked with the socioeconomic, political, and environmental influences on architecture, issues on originality, American exceptionalism, the influence from abroad, regionalism, and the role of technology. The second half delves more deeply into the history of specific building types--house, church, museum, library--grafting the earlier themes onto a history of modern institutions as they took shape in the United States.

Final exam not required. Instructor: Shanken

ARCH 178 Visionary Architecture 3 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This course explores architectural visions as historical windows, examining them from a number of angles. Using a variety of case studies drawn from different media (architectural theory, film, advertisements, architectural projects, and so on) and periods (turn of the century, the Modern Movement, Depression, World War II, 1960's, etc.) it provides a sampling of possibilities and models for the final student project, an in-depth, original research paper. Several themes thread their way through the course, including the role of the "unbuilt" in architectural practice; the uses of the future in the construction of national and personal identities, cultural narratives, and modern mythologies; and the importance of the future as cliché, and the role of play in cultural production.

Final exam not required. Instructor: Shanken

ARCH 179 Special Topics in the History of Architecture 1 - 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours of lecture/seminar per unit per semester.**Prerequisites:** 170A-170B and consent of instructor.

Special topics in Architectural History. For current section offerings, see departmental announcement.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

ARCH 180AC/ETH STD 181AC/LEGALST 185AC Prison 4 Units**Department:** Architecture; Ethnic Studies; Legal Studies**Course level:** Undergraduate**Term course may be offered:** Spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Taking a broad interdisciplinary approach, this course embraces the longue duree of critical prison studies, questioning the shadows of normality that cloak mass incarceration both across the globe and, more particularly, in the contemporary United States. This course thus explores a series of visceral, unsettling juxtapositions: "freedom" and "slavery"; "citizenship" and "subjugation"; "marginalization" and "inclusion", in each case explicating the ways that story making, political demagoguery, and racial, class, and sexual inequalities have wrought an untenable social condition.

Satisfies the American Cultures requirement

Final exam required. Instructors: Hilden, Simon, Stoner, Robinson

ARCH 198 Special Group Study 1 - 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Directed group study per week for 15 weeks. 1.5 to 7.5 hours of Directed group study per week for 8 weeks. Studies developed to meet needs.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

ARCH 199 Supervised Independent Study and Research 1 - 4 Units**Department:** Architecture**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Independent study per week for 15 weeks. 2 to 7.5 hours of Independent study per week for 8 weeks. 2.5 to 10 hours of Independent study per week for 6 weeks.

Enrollment is restricted by regulations in the General Catalog. Studies developed to meet individual needs.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ARCH 200A Introduction to Architecture Studio 1 5 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 4 hours of lecture/seminar, 8 hours of studio, and 4 hours of laboratory per week.

Introductory course in architectural design and theories for graduate students. Problems emphasize the major format, spatial, material, tectonic, social, technological, and environmental determinants of building form. Studio work is supplemented by lectures, discussions, readings, and field trips.

Final exam not required.

ARCH 200B Introduction to Architecture Studio 2 5 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 4 hours of lecture/seminar, 8 hours of studio, and 4 hours of laboratory per week.

Introductory course in architectural design and theories for graduate students. Problems emphasize the major format, spatial, material, tectonic, social, technological, and environmental determinants of building form. Studio work is supplemented by lectures, discussions, readings, and field trips.

Final exam not required.

ARCH 200C Representational Practice in Architectural Design 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This course will address three distinct levels of representational practice in architectural design: 1) cultivate an understanding of the foundational discourse and diversity of approaches to architectural representation; 2) develop a fluency in the canonical methods found in architectural practice; 3) encourage the development of a personal relationship to forms of modeling and formats of drawing.

200C must be taken in conjunction with 200A. Final exam required.

Instructor: Steinfeld

ARCH 201 Architecture & Urbanism Design Studio 5 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of studio and 2 hours of lecture per week. 9 hours of studio and 5 hours of lecture per week for 8 weeks. 13 hours of studio and 7 hours of lecture per week for 6 weeks.**Prerequisites:** 100A-100B or 200A-200B.

The design of buildings or communities of advanced complexity. Each section deals with a specific topic such as housing, public and institutional buildings, and local or international community development. Studio work is supplemented by lectures, discussions, readings, and field trips.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ARCH 203 Final Project Preparation Seminar: Thesis 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate standing.

Specific research topics organized to prepare students for their final project studio or thesis.

Students may take 203/204 or 203/205 to complete the studio requirements. Final exam not required. Formerly known as 209D.

ARCH 203A Final Research Seminar 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate standing.

Specific research topics organized to prepare students for their final project studio or thesis.

Students may take 203/204 or 203/205 to complete the studio requirements. Final exam not required. Formerly known as 203.

ARCH 204 Final Project Studio: Studio Thesis Option 5 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 8 hours of Studio per week for 15 weeks.

Focused design research as the capstone project for graduate students. Final exam not required. Formerly known as 202A.

ARCH 204A Final Thesis Seminar 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Focused design research as the capstone project for graduate students. Final exam not required. Formerly known as Architecture 204.

ARCH 204B Thesis Studio 5 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 8 hours of Studio per week for 15 weeks.

Focused design research as the capstone project for graduate students. Final exam not required. Formerly known as 204.

ARCH 205 Final Project Studio: Independent Thesis Option 5 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 8 hours of Studio per week for 15 weeks.

Prerequisites: Consent of Chair of Graduate Advisors during fall semester.

Final exam not required. Formerly known as 202B.

ARCH 205A Studio One, Fall 5 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 8 hours of Studio per week for 15 weeks.

Prerequisites: Consent of Chair or graduate advisors during fall semester.

This course is a one-year, post-professional design studio intended for those students who have a professional architecture degree and wish to explore current design issues in a stimulating, rigorous, and highly experimental studio setting.

Final exam not required. Formerly known as 205.

ARCH 205B Studio One, Spring 5 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 8 hours of Studio per week for 15 weeks.**Prerequisites:** Consent of chair or graduate advisors.

This course is the second semester of a one-year, post-professional studio intended for those students who have a professional architecture degree and wish to explore current design issues in a stimulating, rigorous, and highly experimental studio setting.

Final exam not required. Formerly known as 205.

ARCH 207A Architecture Lectures Colloquium 1 Unit**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of Lecture per week for 15 weeks.

This course accompanies the required introductory design studio in the three-year option of the Master of Architecture program. It is the first in a series of three one-unit colloquia, scheduled consecutively for the first three semesters of the program. Students will attend all Wednesday evening lectures of the College of Environmental Design lecture series. Every third week, they will meet with the instructor for a one-hour discussion.

Final exam not required.

ARCH 207B Architecture Research Colloquium 1 Unit**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of Lecture per week for 15 weeks.**Prerequisites:** Co-requisite with Architecture 200B.

This course accompanies the second semester of the required introductory design studio in the three-year option of the Master of Architecture program. It is the second in a series of three one-unit colloquia, scheduled consecutively for the first three semesters of the program. For a one-hour session each week, faculty in the department of architecture and other departments of the College of Environmental Design will present lectures on their research and design practice. Final exam required.

ARCH 207C Professional Practice Colloquium 1 Unit**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of Lecture per week for 15 weeks.

This course accompanies the required comprehensive design studio in the three-year option of the Master of Architecture program. It is the third in a series of three one-unit colloquia, scheduled consecutively for the first three semesters of the program.

Final exam not required.

ARCH 207D The Cultures of Practice 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** 201

The nature of architectural practice, how it has evolved and how it is changing in today's world is the theme of the class. The course considers how diverse cultures--both anthropological and professional--contribute to practice, and how the culture of practice evolves. The class has three five-week modules, devoted to the following themes: traditions of practice, research in the culture of the profession, and innovations in practice.

Final exam not required. Instructors: Comerio, Cranz

ARCH 209A Seminar in Architectural Theory 1 - 4 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Zero hours of Seminar per week for 15 weeks.

Final exam not required.

ARCH 209C Current Issues in Architecture 1 - 4 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of seminar per unit per week for 8 weeks.

Final exam not required. Formerly known as 209D.

ARCH 209X Special Topics: Architectural Design 1 - 4 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Zero hours of Seminar per week for 15 weeks.

Final exam not required.

ARCH 211 Theory and Methods in the Social and Cultural Basis of Design 3 - 4 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of seminar per week plus individual advising.**Prerequisites:** 110 or consent of instructor.

Explores a variety of theories which explain and document the relationship between humans and the environment they build; outlines the research methods appropriate to each theory.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Cranz

ARCH 212 Body-Conscious Design: Shoes, Chairs, Rooms, and Beyond 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This seminar prepares students to evaluate and design environments from the point of view of how they interact with the human body. Tools and clothing modify that interaction. Semi-fixed features of the near environment, especially furniture, may have greater impact on physical well being and social-psychological comfort than fixed features like walls, openings, and volume. Today, designers can help redefine and legitimize new attitudes toward supporting the human body by, for example, designing for a wide range of postural alternatives and possibly designing new kinds of furniture. At the urban design scale, the senses of proprioception and kinesthetics can be used to shape architecture and landscape architecture. This course covers these topics with special emphasis on chair design and evaluation. The public health implications of a new attitude toward posture and back support are explored. The course heightens students' consciousness of their own and others' physical perceptions through weekly experiential exercises. Students produce three design exercises: shoe, chair, and a room interior. Final exam not required. Instructor: Cranz

ARCH 215 Landscape, Architecture, Infrastructure, and Urbanism 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This seminar aims to explore how the physical and conceptual understanding of landscape can enrich current forms of architectural and urban design practice. At the junction of landform, infrastructure, urban design, and architecture lies a rich field of possibilities that is increasingly superseding the narrower field of each of the disciplines by themselves. In the past century, contemporary culture and technology—automobiles, televisions, cell phones, and the internet have socially, culturally, environmentally, and physically reshaped the urban fabric, calling into question the very definition of urbanity. The course will explore the implications for public space in an era of increased security and risk mitigation and how designers may direct the various invisible forces which give form to the world around us.

Final exam not required. Instructor: Davids

ARCH 216 The Sociology of Taste in Environmental Design 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** 110, or consent of instructor.

Taste is at work in the way we display our things as much as in the qualities of things themselves. A performance-oriented model of taste observes that objects fall into two broad categories: pragmatic (that support behavior) and symbolic (that identify a person). People visually organize these two categories of objects using both explicit and subconscious aesthetic rules to produce visually unified displays. Depending on how it is used, how it is placed in relation to other things, an object's meaning can vary. The display of taste is where objects take on—and shed—meanings, depending on how they are combined with one another. This seminar reviews the extensive body of 20th-century theory and empirical research on taste and considers the implications of theories about taste for design creation, design education, and for client-professional relations.

Final exam not required. Instructor: Cranz

ARCH 217 Social Aspects of Housing Design: Mid-Rise Urbanism 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

The course explores strategies to bring coherence and continuity back to the city focusing on mid-rise, higher density urbanism and the potential and difficulties of this scale of urban fabric to contribute to the form of cities, without losing the potential of choice and diversity. The seminars are organized in case studies revolving around four cities: Amsterdam, Barcelona, Beijing, and New York. Design exercises parallel the case studies as a way to test and challenge the potentials of mid-rise urbanism.

Final exam not required. Instructor: Chow

ARCH 218 Housing, Urbanization, and Urbanism: Design, Planning, and Policy Issues in Developing Countries 4 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1.5 hours of Lecture and 1.5 hours of Seminar per week for 15 weeks.

This seminar is concerned with the study of housing, urbanization, and urbanism in developing countries, studying not only the physical landscapes of settlements, but also the social, economic, political, and cultural dimensions. This course's focus will be on housing, its lens will be their processes of urbanization, and its intent will be to investigate the space for action by the professionals of the "urban" in the arena of housing. While the emphasis of the course will be on the diverse trajectories of developing countries, "First World" experiences will also be used to illuminate the specific transnational connections and their use in the making of housing theory and policy. The seminar complements the series of lectures offered in 111 and City Planning 111.

Final exam not required. Instructor: AlSayyad

ARCH 219A Design and Housing in the Developing World 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Zero hours of Seminar per week for 15 weeks.

Final exam not required.

ARCH 221 Graduate Seminar in Digital Design Theories and Methods 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This seminar is intended to help graduate students develop a coherent research agenda in the area of digital design theories and methods. In addition, it is intended to serve as a forum for the exchange of ideas (e.g., work in progress, potential directions for research, etc.) in the area of shared interest. The course provides students with a set of questions as guides, readings, and guest lectures.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as 235.

ARCH 222 Principles of Computer Aided Architectural Design 4 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of lecture and 2 hours of supervised laboratory session per week for 8 weeks.**Prerequisites:** Consent of instructor.

This course introduces students to Architecture's New Media; why and how computers are being used in architecture and what are their current and expected impacts on the discipline and practice of architecture. Topics include presentation and re-presentation (including sketching, drafting, modeling, animating, and rendering); generating design solutions (generative systems, expert systems, genetic algorithms, and neural networks); evaluation and prediction (using examples from structures, energy, acoustics, and human factors); and the future uses of computers in architectural design (including such topics as construction automation, smart buildings, and virtual environments). The laboratories introduce students to a REVIT, a state-of-the-art architectural software, including drafting, modeling, rendering, and building information modeling. This course is co-listed with 122. Graduate students will have a discussion section instead of the laboratory that 122 students undertake. Final exam required.

ARCH 226 Collaboration by Digital Design 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered alternate years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This project-based seminar studies the problem of multi-disciplinary and cross-cultural collaboration in the building industry. It employs two complementary approaches: 1) a theoretical approach, which examines the nature of collaboration in general and in architecture in particular, looks at the methods that have been used to foster and support it, and interrogates their advantages and shortcomings; and 2) a practical approach, which use a web-based multi-person design 'game' that allow students to play different roles (architect, clients, engineer, builder, etc.) while collaborating in the design of a building. Final exam not required.

ARCH 227 Workshop in Designing Virtual Places 4 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of seminar and 1 and 1 half hours of supervised laboratory sessions per week.

This course introduces students to designing web-accessible, Multi User, Virtual Environments (MUVES), inhabited through avatars. Such worlds are used in video games and web-based applications, and are assuming their role as alternative 'places' to physical spaces, where people shop, learn, are entertained, and socialize. Virtual worlds are designed according to the same principles that guide the design of physical spaces, with allowances made for the absence of gravity and other laws of nature. The course combines concepts from architecture, film studies, and video game design. It uses a game engine software and a modeling software to build, test, and deploy virtual worlds. Final exam not required.

ARCH 229A Introduction to Construction Law 1 - 4 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hour of Seminar per week for 15 weeks.

Final exam not required. Formerly known as 229F.

ARCH 230 Advanced Architectural Design Theory and Criticism 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Forty-5 hours of lecture/seminar per semester.**Prerequisites:** 130A or consent of instructor.

Seminar in the analysis and discussion of contemporary and historical issues in architectural design theory and criticism.

Final exam not required.

ARCH 231 Research Methods in Architectural Design Theory and Criticism 2 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Thirty hours of lecture/seminar per semester.

Seminar in methods and use of research in contemporary and historical architectural design theory and criticism. Required for doctoral students in this study area.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ARCH 233 Architectures of Globalization: Contested Spaces of Global Culture 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** This course is open to all graduate students and upper division undergraduates.

This seminar examines the relationship between architecture and the processes associated with globalization. The social and spatial changes connected to the global economic restructuring of the last four decades are explored in relation to distinctive national conditions and their connection to historical forces such as colonization and imperialism. Theoretical arguments about international urban political economy, uneven development, deindustrialization and the growth of tourism and service industries, are grounded in specific urban and architectural contexts. Case studies explore issues such as urban entrepreneurialism and the branding of cities and nation-states; heritage practices and the postcolonial politics of place; border cities, and the urbanism of transnational production; cities, terrorism and the global architecture of security; critical regionalism, localism and other responses to debates on place and placelessness. Readings and class discussions examine course themes in a comparative framework and consider their implications for architectural design, education and professional practice.

Final exam not required. Instructor: Cryslar

ARCH 236 The Literature of Space 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

The concept of space as it is applied to the fields of architecture, geography, and urbanism can be understood as a barometer of the condition that we call "modernity." This course explores connections between the larger cultural frameworks of the past century, and the idea of space as it has been perceived, conceived, and lived during this period. Readings include key essays from the disciplines of philosophy, geography, architecture, landscape, and urbanism, and short works of fiction that illustrate and elucidate the spatial concepts. The readings are grouped according to themes that form the foundation for weekly seminar discussions. Chronological and thematic readings reveal the force of history upon the conceptualization of space, and its contradictions. Final exam not required. Instructor: Stoner

ARCH 237 Utterior Speculation: Monographs and Manifestos 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

An examination and analysis of architectural manifestos and monographs from the first half of the 20th century to today. The class analyzes the possibilities and limits of grounding a discourse in practice as well as theory. The seminar complements thesis preparation or can serve as an introduction to critical thinking in architecture.

Final exam not required. Instructor: Fernau

ARCH 238 The Dialectic of Poetics and Technology 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This seminar examines the relationship between technology and design philosophy in the work of architects through analysis of individual buildings within the context of the complete oeuvre and an examination of the architect's writings and lectures. The seminar poses the following questions: What is the role of technology in the design philosophy of the architect and how is this theoretical position established in the architect's writings, lectures, interviews? How is this position revealed through the work moves to the developing world? How is this position negotiated in the design and construction of an individual building? Is this a successful strategy for achieving technical performance? Is this a successful strategy for achieving a coherent theoretical statement? A series of lectures explores these questions in relation to the architect and a set of required readings introduces the work of the architect and explores the relationship between technology and design philosophy. Students choose one building to investigate in parallel with the methods and issues discussed in class. These studies are presented in class as completed and assembled for submission as a final project.

Final exam not required. Formerly known as 209A. Instructor: Ubbelohde

ARCH 239A Design and Computers 1 - 4 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Zero hours of Seminar per week for 15 weeks.

Final exam required.

ARCH 239X Special Topics: Design Theories and Methods 1 - 4 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Zero hours of Seminar per week for 15 weeks.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

ARCH 240 Advanced Study of Energy and Environment 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/seminar per week.**Prerequisites:** 140 or consent of instructor.

Minimizing energy use is a cornerstone of designing and operating sustainable buildings, and attention to energy issues can often lead to greatly improved indoor environmental quality. For designers, using computer-based energy analysis tools are important not only to qualify for sustainability ratings and meet energy codes, but also to develop intuition about what makes buildings perform well. This course will present quantitative and qualitative methods for assessing energy performance during design of both residential and commercial buildings. Students will get hands-on experience with state-of-the-art software -- ranging from simple to complex -- to assess the performance of building components and whole-building designs. Final exam not required.

ARCH 241 Research Methods in Building Sciences 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Required for doctoral students in the area of environmental physics. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Brager

ARCH 242 Sustainability Colloquium 1 or 2 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 15 hours lecture/seminar per unit per semester.

Presentations on a variety of topics related to sustainability, offering perspectives from leading practitioners: architectural designers, city planners, consultants, engineers, and researchers. Students can enroll for one unit (required attendance plus reading) or two units (with additional assignments).

Final exam not required. Instructor: Brager

ARCH 243 Natural Cooling: Sustainable Design for a Warming Planet 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/seminar per week.**Prerequisites:** 140 or consent of instructor.

Course focuses on zero- and no-energy climate responsive cooling strategies for both residential and commercial scale buildings. The course reviews designs and technologies that include low- and high-tech solutions, dynamic high performance facades, natural ventilation, and a range of other innovative cooling strategies. The course also explores the relationship between building design and operation, energy use, and climate change.

Final exam not required. Instructor: Brager

ARCH 244 The Secret Life of Buildings 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This exploratory seminar addresses a secret life of buildings related to physical performance. Students examine architectural, lighting, and mechanical systems in existing buildings with attention to energy use, occupant well-being, and architectural spacemaking. The seminar applies a collection of measurement techniques, often involving novel approaches, to reveal operating patterns in the complex environment of contemporary buildings. The personal experience students gain in performing the evaluations contributes to the students' experiential base at a formative time. Analysis of data collected in the field and the comparison of these data to values given by simulation tools provides a foundation for understanding the more abstract tools and standards used by designers in practice. The juxtaposition of design intention and post-occupancy performance can be a powerful learning experience now, as well as preparation for evaluating building performance in the future.

Final exam not required. Instructor: Benton

ARCH 245 Daylighting 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** 140 or consent of instructor.

This seminar introduces theories, technologies, design strategies and analytical methods of architectural daylighting, including issues of visual experience, integration with electrical lighting and energy use. The course provides foundation for intelligent daylighting design by developing frameworks for thinking about design, performance and tools. The work examines two archetypal daylighting conditions: a toplighted (roof-lighted) space and a side-lighted (window-lit) space with range of methods including readings, on-site observation and measurement, case studies, design exercises and analysis through models and simulation. This is a graduate seminar: attendance, pin-ups, readings and engaged participation are required each week.

Final exam not required. Instructor: Ubbelohde

ARCH 253 Seismic Design and Construction 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/seminar per week.**Prerequisites:** 150

Contemporary design and construction techniques for improving the performance of new and existing buildings in earthquakes. Topics will include 1) basic principles of seismic design and building performance, 2) retrofit of existing buildings and evaluation techniques, 3) design and planning for disaster recovery and rebuilding. The course will use Bay Area and campus buildings as case studies.

Final exam not required. Instructor: Comerio

ARCH 255 Structure, Construction, and Space 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/seminar per week.**Prerequisites:** 150

In profound buildings, the structural system, construction materials, and architectural form work together to create an integrated work of art. Current practice segregates these three areas by assigning separate and rigid roles to 1) an engineer, 2) a contractor, and 3) an architect. The goal of this class is to blur these traditional boundaries and erase the intellectual cleft through hands-on experience. Students are given weekly assignments which focus on one or more of the three areas. They may be asked to analyze a structure, to construct something from actual materials or research a case study and present it to the class. Each assignment is geared to help students integrate construction and structural issues into their architectural design so that they can maintain control of the entire design process.

Final exam not required. Instructor: Black

ARCH 256 Structural Design in the Studio 1 - 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** 150 or equivalent.

Teaching structures to architecture students on their own turf: in a design studio. The course is organized around weekly desk reviews and assignments for students enrolled in a 201 design studio or thesis. The reviews and assignments focus on the structural issues of the students' projects. A central goal of the course is to help students understand structural issues as they relate to design and to help them become comfortable with structural concepts so that they can begin to integrate the structure and architecture. The course can be taken for 1 unit, 2 units, or 3 units depending on the amount of time a student wishes to commit to it. A final report showing the evolution of each student's project with clear reference to how structural understanding influenced design decisions is required of all students regardless of units taken. Enrollment strictly limited to 10 students.

Final exam not required. Instructor: Black

ARCH 259X Special Topics: Building Structures 1 - 4 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hour of Lecture per week for 15 weeks.

Special topics such as experimental structures and architectural preservation.

Course may be repeated for credit when topic changes. Final exam not required.

ARCH 260 Introduction to Construction, Graduate Level 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

This course addresses the methods and materials of construction. While students will not be experts at the end of the semester, the course should give students the confidence to feel comfortable on a construction site or when designing a small building for a studio. The course will focus on four major territories: structural materials, building envelope, built elements such as stairs and cabinets, and costs, labor conditions, conventional practices, and the regulatory environments that control design.

Final exam not required. Instructor: Buntrock

ARCH 262 Architecture in Detail 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This seminar will reevaluate the material nature of buildings by studying and understanding construction details and the new technologies that are revolutionizing design construction and labor relations in architecture.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Davids

ARCH 264 Off-Site Fabrication: Opportunities and Evils 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** 160, 260 or consent of instructor.

This seminar looks at the implications of off-site fabrication in architecture: consistent, protected environments; worker efficiency and safety; coordination of trades; cheaper, semi-skilled labor; construction periods shortened; and completion dates more predictable. Off-site fabrication can allow for increased refinement and trial assemblies. However, it may also create monotonous sameness when the processes and results are not considered with care.

Final exam not required. Instructor: Buntrock

ARCH 265 Japanese Craft and Construction 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 150, 160, or consent of instructor.

The class addresses the role craft and construction play in Japanese architecture and applies these lessons to the evaluation of an exemplary recent building having unusual technical features. Buildings are expressions of theoretic and technical intent and a response to cultural and economic forces; Japanese architecture is regarded as particularly innovative. In studying a system where there is an emphasis on collaboration, students also see the values of North American systems of architectural production.

Final exam not required. Instructor: Buntrock

ARCH 269X Special topics: Construction and Materials 1 - 4 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours of lecture/seminar per unit per semester.**Prerequisites:** Consent of instructor.

Selected topics such as construction management implementation and geological hazards to construction. For current section offerings see department web site.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

ARCH 270 History of Modern Architecture 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course examines developments in design, theory, graphic representation, construction technology, and interior programming through case studies of individual buildings. Each lecture will delve deeply into one or sometimes two buildings to examine program, spatial organization, critical building details, and the relationship of the case study building with regard to other parallel works and the architect's overall body of work.

Final exam required. Instructor: Castillo

ARCH 271 Methods in Historical Research and Criticism in Architecture 4 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6ty hours of lecture/seminar per semester.**Prerequisites:** Doctoral candidate or consent of instructor.

Final exam not required.

ARCH 273 Case Studies in Modern Architecture 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 170A-170B and consent of instructor.

This course examines developments in design, theory, graphic representation, construction technology, and interior programming through case studies of individual buildings. Our survey technique will be highly focused rather than panoptic. Each lecture will delve deeply into one or two buildings to examine program, spatial organization, graphic representation, critical building details, construction technology, and the relationship of the case study building with regard to other contemporary structures and the "architect's overall body of work". From this nucleus, we will spiral outward to consider how the case study is embedded within a constellation of social and economic factors crucial to its design and physical realization. This survey of "modernism's built discourses" provides multiple perspectives on the variety of architectural propositions advanced to express the nature of modernity as a way of life. Final exam required.

ARCH 275 Introduction to Architectural Theory 1945 - Present 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** The course is open to upper division undergraduates and graduate students.

This seminar provides an introduction to architectural theory since 1945, with emphasis on developments over the last three decades. Class readings, and discussions explore the post-World War II crisis within modernism, postmodernism within and beyond architectural culture, and more recent developments around issues such as rapid urbanization, sustainability, the politics of cultural identity and globalization. Transformations in architectural theory are examined in relation to historical forces such as the economy, the growth and transformation of cities, and the changing relationship between design professions and disciplines. The influences of digital media, new materials and production techniques on architectural education and practice are explored and the implications for architectural theory assessed. Key issues are anchored in case studies of buildings, urban spaces, and the institutions and agents or architectural culture. Final exam not required. Instructor: Crysler

ARCH 276 Spaces of Recreation and Leisure, 1850-2000 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered alternate years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

A reading and research seminar surveying the building types, social relations, and cultural ideas of recreation in the American city, including the tensions between home, public, and commercial leisure settings. Final exam not required. Instructor: Groth

ARCH 278 Visionary Architecture 3 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** 170A-170B and consent of instructor.

This course explores architectural visions as historical windows, examining them from a number of angles. Using a variety of cases studies drawn from different media (architectural theory, film, advertisements, architectural projects, and so on) and periods (turn of the century, the Modern Movement, Depression, World War II, 1860's, etc.) It provides a sampling of possibilities and models for the final student project, an in-depth, original research paper. Several themes thread their way through the course, including the role of the "unbuilt" in architectural history and architectural practice; the uses of the future in the construction of national and personal identities, cultural narratives, and modern mythologies; the importance of the future as cliché, and the role of play in cultural production.

Final exam not required. Instructor: Shanken

ARCH 279D History of Housing 1 - 4 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Zero hours of Seminar per week for 15 weeks.

Final exam not required.

ARCH 281 Methods of Inquiry in Architectural Research 4 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of lecture/discussion per week.**Prerequisites:** M.S. or Ph.D. standing or consent of instructor.

This is the introductory course in methods of inquiry in architecture research to be required of all entering Ph.D. students in all areas of the program. The purpose is to train students in predissertation and prethesis research strategies, expose them to variety of inquiry methods including the value of scholarly research, the nature of evidence, critical reading as content analysis and writing, presenting and illustrating scholarship in the various disciplines of architecture.

Final exam not required.

ARCH 298 Special Group Study 1 - 4 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 8 hours of work per week per unit for 8 weeks.

Special group studies on topics to be introduced by instructor or students. Course may be repeated for a maximum of 4 units. May be repeated for credit up to unit limitation. Final exam not required.

ARCH 299 Individual Study and Research for Master's and Doctoral Students 1 - 12 Units**Department:** Architecture**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 8 hours of work per week per unit for 8 weeks.

Individual studies including reading and individual research under the supervision of a faculty adviser and designed to reinforce the student's background in areas related to the proposed degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ARCH 375 Seminar in the Teaching of Architecture 2 Units**Department:** Architecture**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.

Hours and format: 4 hours of seminar per week, including short lectures, meetings with the developer and owner of the land, studies and discussions of precedents, and reviews of student work with other members of the faculty and visitors.

This class is intended for first-time graduate student instructors, especially those working in studio and lab settings. The class covers a range of issues that normally come up when teaching, offers suggestions regarding how to work well with other graduate student instructors and faculty, and how to manage a graduate student instructor's role as both student and teacher. The greatest benefit of this class comes from the opportunity to explore important topics together. Using a relatively light, but provocative set of readings, the seminar will explore the issues raised each week.

There will be one assignment intended to help students explore their own expectations as educators.

Final exam not required. Formerly known as Architecture 300.

ARCH 602 Individual Study for Doctoral Students 1 - 8 Units**Department:** Architecture**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 8 hours of work per unit per week for 8 weeks.

Individual study in consultation with the major field adviser, intended to provide an opportunity for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D. This course may not be used for units or residence requirements for the doctoral degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Asian American Studies (ASAMST)

ASAMST R2A Reading and Composition 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Prerequisites: 1, UC Entry Level Writing Requirement or equivalent.

Through the study of the literary, political, social and psychological dimensions of representative works of Asian American literature, this course introduces students to close textual analysis, fosters critical judgment, and reinforces academic writing skills. Satisfies the first half of the Reading and Composition requirement.

Satisfies the first half of the Reading and Composition requirement

Final exam not required. Formerly known as 2A.

ASAMST R2B Reading and Composition 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Prerequisites: 2A, English 1A or equivalent.

This course examines literary works by Asian American, African American, Chicano, and Native American writers in their political and social contexts, focusing on similarities and differences between the experiences of ethnic minorities in the U.S. Emphasis is on literary interpretation and sustained analytical writing. Satisfies the second half of the Reading and Composition requirement.

Satisfies the second half of the Reading and Composition requirement

Final exam not required. Formerly known as 2B.

ASAMST 20A Introduction to the History of Asians in the United States 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 10 hours of Lecture per week for 6 weeks.

Introductory comparative analysis of the Asian American experience from 1848 to present. Topics include an analysis of the Asian American perspective; cultural roots; immigration and settlement patterns; labor, legal, political, and social history.

Students will receive no credit for Asian American Studies 20A after taking XAsian American Studies 20A but may remove a deficient grade.

Final exam required.

ASAMST 20B Introduction to the Contemporary Issues in the Asian American Communities 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

An introduction to Asian American communities and the social, economic, and political issues they confront. The diverse range of communities, both suburban and urban, will be surveyed and situated within a domestic and global context.

Final exam required.

ASAMST 20C Cultural Politics and Practices in Asian American Communities 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Analysis of social, intellectual, and artistic currents in Asian American communities. Focus will be on social practices, popular culture, the arts and expression (e.g. language and literature), and the historical and political contexts in which they are produced and consumed.

Final exam required.

ASAMST 97 Field Studies in Asian American Communities 1 - 3 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 hours of fieldwork per week per unit. 3 hours of fieldwork per week per unit. 1.5 hours of fieldwork per week per unit for 10 weeks. 6 hours of fieldwork per week per unit for 8 weeks. 1.5 hours of fieldwork per week per unit for 10 weeks. 6 hours of fieldwork per week per unit for 8 weeks.**Prerequisites:** Restricted to freshmen and sophomores; consent of instructor.

University organized and supervised field program involving experiences in schools, school-related activities, community and community-related activities.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ASAMST 98 Supervised Group Study 1 - 3 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 hours of work per week per unit.**Prerequisites:** Restricted to freshmen and sophomores; consent of instructor.

Group study of selected topics which will vary from semester to semester. Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

ASAMST 99 Supervised Independent Study and Research 1 - 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 hours of independent study per week per unit.**Prerequisites:** Consent of instructor; limited to freshman and sophomores. Consent of instructor.

Individual research on a topic which leads to the writing of a major paper. Regular meetings with faculty sponsor.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

ASAMST 121 Chinese American History 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 20A or equivalent.

Chinese American history, 1848 to present. Topics include influence of traditional values, Eastern and Western; patterns of immigration and settlement; labor history; the influence of public policy, foreign and domestic, on the Chinese individual and community.

Final exam required.

ASAMST 122 Japanese American History 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 20A or equivalent.

This course will be presented as a proseminar with selected topics in order to give students an opportunity to participate in the dynamics of the study of Japanese American history. Topics include immigration, anti-Japanese racism, labor, concentration camps, agriculture, art and literature, and personality and culture.

Final exam required.

ASAMST 123 Korean American History 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture and Zero to 2.5 hours of Discussion per week for 6 weeks.**Prerequisites:** 20A or equivalent.

Koreans in America from 1876 to the present. Topics include comparative immigration and settlement patterns; labor and socio-economic life; political activities; community organization; and issues related to the contemporary population influx.

Final exam required.

ASAMST 124 Filipino American History 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and Zero to 2 hours of Discussion per week for 8 weeks. 7.5 hours of Lecture and Zero to 2.5 hours of Discussion per week for 6 weeks.**Prerequisites:** 20A or equivalent.

Topics include consequences of the Spanish-American War on Filipino emigration; conditions in Hawaii and California and the need for Filipino labor; community development; changing relations between the U.S. and the Philippines; effects of the independence movement and World War II on Filipino Americans; and contemporary issues.

Final exam required.

ASAMST 125 Contemporary Issues of Southeast Asian Refugees in the U.S 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 20A or equivalent.

This course will introduce students to the sociocultural, economic, educational, and political issues facing Southeast Asian refugees in the U.S. While the course focus is on the Asian American experience, references will be made to the pre-migration experiences and histories of the Southeast Asian refugee groups. The processes and problems in the formulation of refugee programs and services in the U.S. also will be addressed in their implications for refugee resettlement and adaptation experience. Emphasis will be placed on comparative analyses of the Southeast Asian refugee communities.

Final exam required.

ASAMST 126 Southeast Asian Migration and Community Formation 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 20A or equivalent.

This course will examine Southeast Asian migration and resettlement in the U.S. in the context of the United States involvement in Vietnam, Laos, and Cambodia during the Vietnam War. It will also address the post-war "legacies" and their impact on the societies and politics of the three countries as well as neighboring states in the region. Asylum politics and refugee camp experiences will be addressed in the discussion of the formation of U.S. resettlement policies and of the adaptation of Southeast Asian refugees.

Final exam required.

ASAMST 127 South Asian American Historical and Contemporary Issues 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 20A or equivalent.

Examines immigration and social history of South Asian Americans from the early 20th century to present. Development of South Asian American communities within the social, political and economic contexts of South Asia and the U.S.

Course may be repeated for credit when topic changes. Final exam required.

ASAMST 128AC Muslims in America 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and zero to 1 hour of discussion per week.

The course traces Islam's journey in America. It will deal with the emergence of identifiable Muslim communities throughout the U.S. and focus on patterns of migration, the ethnic makeup of such communities, gender dynamics, political identity, and cases of conversion to Islam.

The course will spend considerable time on the African American, Indo-Pakistani, and Arab American Muslim communities since they constitute the largest groupings. It also examines in depth the emergence of national, regional, and local Muslim institutions, patterns of development pursued by a number of them, and levels of cooperation or antagonism. The course seeks an examination of gender relations and dynamics across the various Muslim groupings, and the internal and external factors that contribute to real and imagined crisis. The course seeks to conduct and document the growth and expansion of mosques, schools, and community centers in the greater Bay Area. Finally, no class on Islam in America would be complete without a critical examination of the impacts of 9/11 on Muslim communities, the erosion of civil rights, and the ongoing war on terrorism.

Satisfies the American Cultures requirement

Final exam required.

ASAMST 131 Asian Diaspora(s) from an Asian American Perspective 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture and Zero to 2.5 hours of Discussion per week for 8 weeks.

Analyzes the global presence of an Asian group with a significant U.S. population: migration/settlement history, transnational economic/political/cultural interactions between diasporic communities and with land of origin, impact on Asian American community/identity formation. Instructor selects group(s).

Final exam required.

ASAMST 132 Islamophobia and Constructing Otherness 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks.

This course will examine and attempt to understand Islamophobia, as the most recently articulated principle of otherness and its implications domestically and globally. The course will also closely examine the ideological and epistemological frameworks employed in discourses of otherness, and the complex social, political, economic, gender-based, and religious forces entangled in its historical and modern reproduction.

Final exam required.

ASAMST 132AC Islamophobia and Constructing Otherness 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks.

This course will examine and attempt to understand Islamophobia, as the most recently articulated principle of otherness and its implications domestically and globally. The course will also closely examine the ideological and epistemological frameworks employed in discourses of otherness, and the complex social, political, economic, gender-based, and religious forces entangled in its historical and modern reproduction.

Satisfies the American Cultures requirement

Final exam required.

ASAMST 138 Topics in Asian Popular Culture 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture and Zero to 2.5 hours of Discussion per week for 6 weeks.

Topics in Asian popular culture. Analysis of historical and contemporary issues addressed in popular media in Asia, such as 1990s Hong Kong cinema, fifth generation Chinese films, films of China and Taiwan, Japanese and Korean anime, South Asian and Bollywood cinema, and South Korean film and television drama. Course topics will vary with the expertise of the particular instructor.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

ASAMST 141 Law in the Asian American Community 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture and Zero to 2.5 hours of Discussion per week for 6 weeks.**Prerequisites:** 20A or 20B.

Course will examine the nature, structure, and operation of selected legal institutions as they affect Asian American communities and will attempt to analyze the roles and effects of law, class, and race in American society. May be taken with 197.

Final exam required.

ASAMST 143 Asian American Health 3 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks. 7.5 hours of Seminar per week for 6 weeks.

This course examines the state of Asian American health, the historical, structural, and cultural contexts of diverse Asian American communities, and the role of race, ethnicity, and socioeconomic status in the production of unequal outcomes between Asian Americans and other racial/ethnic groups as well as across different Asian American subgroups.

Final exam not required.

ASAMST 144 Religions of Asian America 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture and Zero to 2.5 hours of Discussion per week for 6 weeks.

This course will examine how Asian American communities engage religion and how, in turn, they are shaped by the different facets of religious life. Religion is examined in the form of major traditions- Buddhism, Islam, Hinduism, Sikhism, Christianity- and readings will introduce students to key concepts, practices, and institutions which help to define these trajectories.

Final exam required.

ASAMST 145 Politics, Public Policy, and Asian American Communities 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 20A or 20B.

An examination of the purpose, power, and function of the executive, legislative and judicial branches of the federal government and their relationship to the Asian American community. The course presents a range of contemporary issues to illustrate how government institutions and the Asian community define issues and respond to political challenges.

Final exam required.

ASAMST 146 Asian Americans and Education 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and zero to 1 hour of discussion per week.

This course examines the historical and contemporary issues which shape the educational experiences of Asian Americans. Critical issues such as bilingual education, university admissions, and the education of Asian immigrants as well as theoretical models of Asian American academic success will be explored and critically analyzed.

Final exam required.

ASAMST 150 Gender and Generation in Asian American Families 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks. 5.5 hours of Lecture and 1.5 hours of Discussion per week for 6 weeks.**Prerequisites:** 20A or 20B.

The influence of cultural legacy, ethnic background, immigration history, community structure, class and economic status, and racism on gender and generational relations in the Asian American family.

Final exam required.

ASAMST 151 Asian American Women: Theory and Experience 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and Zero to 2 hours of Discussion per week for 8 weeks.**Prerequisites:** 20A or 20B.

Examines the historical and contemporary experiences of Asian American women in relation to work, sexuality, intellectual and artistic activity, and family and community life as well as the development of Asian American feminist thought and its relation to cultural nationalism.

Final exam required.

ASAMST 165 Research Methodologies in Asian American Communities 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 20A or 20B.

Approaches to research in the Asian American community with emphasis on the San Francisco Bay Area. Problems of research design, measurement, and data collection, processing, and analysis will be considered.

Final exam required.

ASAMST 171 Asian Americans in Film and Video 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.**Prerequisites:** Consent of instructor.

Introduces students to films and videos by and about Asian Americans; presents an overview of the development of the Asian American media arts field in relation to current cultural theories and American film history and theory.

Final exam required.

ASAMST 172 Asian American Literature 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks. 5.5 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 7.5 hours of Lecture and Zero to 2.5 hours of Discussion per week for 6 weeks.

Introduces students to representative works of Asian American literature by writers from the major ethnic subgroups; examines the works in their sociohistorical context; analyzes thematic and formal elements intertextually to form a coherent understanding of the Asian American literary tradition.

Course may be repeated for credit with different topic. Course may be repeated for credit when topic changes. Final exam required.

ASAMST 173 Creative Writing 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks. 8 hours of Seminar per week for 6 weeks.**Prerequisites:** Consent of instructor.

Instruction and practice in forms and techniques of prose, verse, drama or other writing as an expression of Asian American experiences and a contribution to evolving Asian American culture; may focus on specific genres or tasks depending on instructor.

Final exam required.

ASAMST 175 Contemporary Narratives on the Philippines and the United States 3 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture and Zero to 1 hour of Discussion per week for 6 weeks.

The course will examine the various strategies of (re-)narrating colonial/neocolonial history in three genres: literature (novels, short fiction, poetry), essays, and films from the Philippines and the United States. Notions such as imperialism, nation, narration, history, nationalism, memory, ethnicity, language, power, gender, and subject formation will be discussed.

Final exam required.

ASAMST 176 Genre in Asian American Literature 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** Consent of instructor.

Investigates specific genres in Asian American literature (e.g., autobiography, biography, drama, etc.) in terms of formal characteristics, innovations, comparisons of works from various subgroups in relation to counterparts in dominant Anglo-American tradition.

Final exam required.

ASAMST 177 Asian American Art: Remapping Modernity: Art and Artists in the 20th Century 3 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Seminar in contemporary Asian American visual art, with focus on the politics of production and reception. Works by such artists as Y. David Chung, Hung Liu, Yong Soon Min, Long Nguyen, and Manuel Ocampo will be studied.

Final exam required.

ASAMST 181 Chinese American Literature 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Consent of instructor.

Analyzes literary representations of contemporary and/or historical experiences of Chinese Americans; genre, formal, and stylistic features; definition of cultural identity and development of literary tradition. Primarily English-language works, some translations from Chinese.

Final exam required.

ASAMST 183 Korean American Literature 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and Zero to 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Consent of instructor.

Critical readings of major Korean American literary work, including autobiography and personal memoir, autobiographical fiction, poetry, short stories and novel, with attention to conditions surrounding the production and consumption of these writings.

Final exam required.

ASAMST 190 Seminar on Advanced Topics in Asian American Studies 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks. 7.5 hours of Seminar per week for 6 weeks.**Prerequisites:** Consent of instructor.

Advanced seminar in Asian American Studies with topics to be announced at the beginning of each semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

ASAMST 190AC Seminar on Advanced Topics in Asian American Studies 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks. 7.5 hours of Seminar per week for 6 weeks.**Prerequisites:** Consent of instructor.

Advanced seminar in Asian American Studies with topics to be announced at the beginning of each semester.

Satisfies the American Cultures requirement

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

ASAMST 195 Senior Thesis 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Independent study.**Prerequisites:** Consent of instructor.

Writing of a thesis under the direction of member(s) of the faculty.

Final exam required.

ASAMST H195A Senior Honors Thesis for Asian American and Asian Diaspora Studies Majors 3 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Seminar and individual meetings with faculty adviser.**Prerequisites:** Senior standing. Approval of Faculty Advisor, 3.5 GPA on all University work, and a 3.5 GPA in courses in the major.

Course for senior Asian American and Asian Diaspora Studies majors designed to support and guide the writing of a senior honors thesis. For senior Asian American and Asian Diaspora Studies majors who have been approved for the honors program.

Final exam not required. Formerly known as H195.

ASAMST H195B Senior Honors Thesis for Asian American and Asian Diaspora Studies Majors 3 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part two of a year long series course. Upon completion, the final grade will be applied to both parts of the series.**Hours and format:** 3 hours of Independent study per week for 15 weeks.**Prerequisites:** Senior standing. Approval of Faculty Advisor, 3.5 GPA on all University work, and a 3.5 GPA in courses in the major.

Course for senior Asian American and Asian Diaspora Studies majors designed to support and guide the writing of a senior honors thesis. For senior Asian American and Asian Diaspora Studies majors who have been approved for the honors program.

Final exam not required. Formerly known as H195.

ASAMST 197 Field Study in Asian American Communities 1 - 3 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1.5 hours of fieldwork per week per unit for 10 weeks. 3 hours of fieldwork per week per unit.**Prerequisites:** Consent of instructor.

University organized and supervised field program involving experiences in schools, school-related activities, community, and community-related activities.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

ASAMST 198 Supervised Group Study 1 - 3 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 hours of work per week per unit.**Prerequisites:** Consent of instructor.

Group study of selected topics which will vary from semester to semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

ASAMST 199 Supervised Independent Study and Research 1 - 4 Units**Department:** Asian American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 hours of work per week per unit.**Prerequisites:** Consent of instructor.

Individual research on a topic which leads to the writing of a major paper.

Regular meetings with faculty sponsor.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

Asian Studies (ASIANST)

ASIANST 10 Introduction to Asia 4 Units

Department: Asian Studies

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

This course is designed to interest students in Asian cultures early in their undergraduate studies. Topics such as trade, social and political formations, religions, food, and expressive culture that have been important in history as well as in contemporary times in East, South, and Southeast Asia will serve as unifying themes. Comparative thinking across regions of Asia and the perspectives of multiple disciplines will be brought to bear on the themes.

Final exam required. Formerly known as 10A-10B.

ASIANST 98 Directed Group Study 1 - 4 Units

Department: Asian Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

Hours and format: Group meetings to be arranged.

Prerequisites: Consent of Instructor required.

Group discussion, research and reporting on selected topics.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

ASIANST 150 Special Topics 4 Units

Department: Asian Studies

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.

Prerequisites: Consent of instructor.

Advanced research in current issues or regions of Asian studies. The course will focus on specific areas or topics with appropriate comparative material included. Topics change each semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

ASIANST H195A Senior Honors 3 Units

Department: Asian Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: Individual study supervised by 2 faculty members.

Prerequisites: Open to seniors in the group major in Asian Studies whose GPA is 3.5 or higher in all university work and 3.6 or higher in the major.

Supervised readings or field research on a significant problem in Asian Studies, collection and analysis of research materials, and the preparation of an honors dissertation in close consultation with two members of the faculty.

Final exam not required.

ASIANST H195B Senior Honors 3 Units

Department: Asian Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part two of a year long series course. Upon completion, the final grade will be applied to both parts of the series.

Hours and format: Individual study supervised by 2 faculty members.

Prerequisites: Open to seniors in the group major in Asian Studies whose GPA is 3.5 or higher in all university work and 3.6 or higher in the major.

Supervised readings or field research on a significant problem in Asian Studies, collection and analysis of research materials, and the preparation of an honors dissertation in close consultation with two members of the faculty.

Final exam not required.

ASIANST 197 Field Studies 2 - 4 Units

Department: Asian Studies

Course level: Undergraduate

Term course may be offered: Summer

Grading: Offered for pass/not pass grade only.

Hours and format: Internship with off-campus organizations. Internship with off-campus organizations.

Prerequisites: Upper division standing and consent of instructor.

Supervised experience relevant to specific aspects of Asian studies in off-campus locations. Regular individual meetings with faculty sponsor and written reports required.

Course may be repeated for credit if field study is distinct from previous.

Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

ASIANST 198 Directed Group Study 1 - 4 Units

Department: Asian Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

Hours and format: Group meetings to be arranged.

Prerequisites: Upper division standing and consent of instructor.

Directed group study of special topics approved by the chair of the Group in Asian Studies.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

ASIANST 199 Independent Study 1 - 4 Units**Department:** Asian Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Individual meetings to be arranged.**Prerequisites:** Written proposal must be approved by faculty adviser.

Directed individual study on topics approved by the chair of the Group in Asian Studies.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

ASIANST 201 Asian Studies Proseminar 1 Unit**Department:** Asian Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 15 hours of seminar per semester.**Prerequisites:** Consent of instructor.

This course is required of all first-year graduate students and supervised by a regular faculty member. The seminar will familiarize students with faculty, their Asian interests, research methods, and the courses they teach. It consists of presentations by faculty on their past, present, and future research.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ASIANST 298 Directed Group Study 2 - 6 Units**Department:** Asian Studies**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Group meetings to be arranged.

Group study of selected topics that vary from term to term.

Course may be repeated for credit when topic changes. Final exam not required.

ASIANST 299 Independent Study 1 - 7 Units**Department:** Asian Studies**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Individual conferences to be arranged.**Prerequisites:** Consent of instructor.

Directed reading in subject matter not covered in scheduled seminar offerings.

Course may be repeated for credit when topic changes. Final exam not required.

Astronomy (ASTRON)

ASTRON 3 Introduction to Modern Cosmology 2 Units**Department:** Astronomy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

Description of research and results in modern extragalactic astronomy and cosmology. We read the stories of discoveries of the principles of our Universe. Simple algebra is used.

Final exam required. Instructors: Bloom, Davis, Ma

ASTRON 7A Introduction to Astrophysics 4 Units**Department:** Astronomy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.**Prerequisites:** Physics 7A-7B (7B can be concurrent), or consent of the instructor.

This is the first part of an overview of astrophysics, with an emphasis on the way in which physics is applied to astronomy. This course deals with the solar system and stars, while 7B covers galaxies and cosmology. Solar system topics include orbital mechanics, geology of terrestrial planets, planetary atmospheres, and the formation of the solar system. The study of stars will treat determination of observations, properties and stellar structure, and evolution. The physics in this course includes mechanics and gravitation; kinetic theory of gases; properties of radiation and radiative energy transport; quantum mechanics of photons, atoms, and electrons; and magnetic fields.

Students will receive 2 units of credit for 7A after taking 10; 6 units of credit for both 7A-7B after taking 10. Final exam required. Instructors: Chiang, Marcy, Quataert

ASTRON 7B Introduction to Astrophysics 4 Units**Department:** Astronomy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.**Prerequisites:** Physics 7A-7B (7B can be concurrent) or consent of the instructor.

This is the second part of an overview of astrophysics, which begins with 7A. This course covers the Milky Way galaxy, star formation and the interstellar medium, galaxies, black holes, quasars, dark matter, the expansion of the universe and its large-scale structure, and cosmology and the Big Bang. The physics in this course includes that used in 7A (mechanics and gravitation; kinetic theory of gases; properties of radiation and radiative energy transport; quantum mechanics of photons, atoms, and electrons; and magnetic fields) and adds the special and general theories of relativity.

Students will receive 2 units of credit for 7B after taking 10; 6 units of credit for both 7A-7B after taking 10. Final exam required. Instructors: Bloom, Chiang, Marcy, Quataert

ASTRON 10 Introduction to General Astronomy 4 Units**Department:** Astronomy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

A description of modern astronomy with emphasis on the structure and evolution of stars, galaxies, and the Universe. Additional topics optionally discussed include quasars, pulsars, black holes, and extraterrestrial communication, etc. Individual instructor's synopses available from the department.

Students will receive no credit for Astronomy 10 after taking Astronomy 7A or 7B, XAstronomy 10. Students can remove a deficient grade in XAstronomy 10 by taking Astronomy 10, Letter and Science C70U or Astronomy C10. Final exam required. Instructors: Basri, Blitz, Bloom, Davis

ASTRON C10/L & S C70U Introduction to General Astronomy 4 Units**Department:** Astronomy; Letters and Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

A description of modern astronomy with emphasis on the structure and evolution of stars, galaxies, and the Universe. Additional topics optionally discussed include quasars, pulsars, black holes, and extraterrestrial communication, etc. Individual instructor's synopses available from the department.

Students will receive no credit for 10 after taking 7A or 7B. Final exam required. Instructor: Filippenko

ASTRON N10 Introduction to General Astronomy 3 Units**Department:** Astronomy**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture per week for 8 weeks.

Prerequisites: High school algebra will be presumed but used sparingly. The nature and evolution of the universe: history of astronomical knowledge; overall structure of the universe; galaxies, radio galaxies, peculiar galaxies, and quasars; structure and evolution of stars; exploding stars, pulsars, and black holes; exploration of the solar system; the search for extraterrestrial life.

Students will receive no credit for 10 after taking 7. Final exam required.

ASTRON C12/EPS C12/L & S C70T The Planets 3 Units**Department:** Astronomy; Earth and Planetary Science; Letters and Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.

A tour of the mysteries and inner workings of our solar system. What are planets made of? Why do they orbit the sun the way they do? How do planets form, and what are they made of? Why do some bizarre moons have oceans, volcanoes, and ice floes? What makes the Earth hospitable for life? Is the Earth a common type of planet or some cosmic quirk? This course will introduce basic physics, chemistry, and math to understand planets, moons, rings, comets, asteroids, atmospheres, and oceans. Understanding other worlds will help us save our own planet and help us understand our place in the universe.

Final exam required.

ASTRON W12/EPS W12 The Planets 3 Units**Department:** Astronomy; Earth and Planetary Science**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Web-based lecture per week for 8 weeks. This is an online course.

A tour of the mysteries and inner workings of our solar system. What are planets made of? Why do they orbit the sun the way they do? How do planets form, and what are they made of? Why do some bizarre moons have oceans, volcanoes, and ice floes? What makes the Earth hospitable for life? Is the Earth a common type of planet or some cosmic quirk? This course will introduce basic physics, chemistry, and math to understand planets, moons, rings, comets, asteroids, atmospheres, and oceans. Understanding other worlds will help us save our own planet and help us understand our place in the universe. This course is web-based.

Final exam required. Instructors: Marcy, Militzer

ASTRON C13/INTEGBI C13 Origins: from the Big Bang to the Emergence of Humans 4 Units**Department:** Astronomy; Integrative Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks.

This course will cover our modern scientific understanding of origins, from the Big Bang to the formation of planets like Earth, evolution by natural selection, the genetic basis of evolution, and the emergence of humans. These ideas are of great intrinsic scientific importance and also have far reaching implications for other aspects of people's lives (e.g., philosophical, religious, and political). A major theme will be the scientific method and how we know what we know.

Final exam required. Instructors: Marshall, Quataert

ASTRON 24 Freshman Seminars 1 Unit**Department:** Astronomy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of Seminar per week for 15 weeks.

The Berkeley Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Berkeley Seminars are offered in all campus departments, and topics vary from department to department and semester to semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

ASTRON 39 Seminar 1.5 Unit**Department:** Astronomy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

A small-size undergraduate seminar exploring one astronomical topic in depth. Students are responsible for much of the presentation.

Final exam required. Instructors: Basri, Filippenko, Davis

ASTRON 84 Sophomore Seminar 1 or 2 Units**Department:** Astronomy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.

Hours and format: 1 hour of seminar per week per unit for 15 weeks. 1 and 1 half hours of seminar per week per unit for 10 weeks. 2 hours of seminar per week per unit for 8 weeks. 3 hours of seminar per week per unit for 5 weeks.

Prerequisites: At discretion of instructor.

Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

ASTRON 98 Directed Group Study 1 - 4 Units**Department:** Astronomy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Directed group study per week for 15 weeks.**Prerequisites:** Restricted to freshmen and sophomores; consent of instructor.

Topics will vary with instructor.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

ASTRON 99 Directed Study in Astronomy 1 - 3 Units**Department:** Astronomy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 3 hour of Independent study per week for 15 weeks. 2.5 to 7.5 hours of Independent study per week for 6 weeks.**Prerequisites:** 7A-B, 10 and consent of instructor.

Supervised observational studies or directed reading for lower division students.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ASTRON 120 Optical and Infrared Astronomy Laboratory 4 Units**Department:** Astronomy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture and 4 hours of Laboratory per week for 15 weeks.**Prerequisites:** 7A-7B; Mathematics 53, 54; Physics 7A-7B-7C (7C may be taken concurrently).

This course requires four to six experiments such as the following: accurate position and brightness measurements of stars; laboratory exploration of the characteristics of two-dimensional charge-coupled devices (CCDs) and infrared detectors; measurement of the distance, reddening, and age of a star cluster; measurement of the Stokes parameters and linear polarization of diffuse synchrotron and reflection nebulae; measurement of the period and pulse shape of the Crab pulsar using Fourier techniques. Professional telescopes will be used such as those at Leuschner Observatory and Lick Observatory. There is an emphasis on error analysis, software development in the IDL language, and high-quality written reports.

Students will receive no credit for 120 after taking 120A or 122. Final exam required. Formerly known as 120A. Instructors: Bower, Marcy

ASTRON 121 Radio Astronomy Laboratory 4 Units**Department:** Astronomy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Discussion and 1 hour of Lecture per week for 15 weeks.**Prerequisites:** 7A-7B; Mathematics 53, 54; Physics 7A-7B-7C; Physics 110B recommended.

Several basic laboratory experiments that concentrate on microwave electronics and techniques; construction of receiving, observing, and data analysis systems for two radioastronomical telescopes, a single-dish 21-cm line system and a 12-GHz interferometer; use of these telescopes for astronomical observing projects including structure of the Milky Way galaxy, precise position measurement of several radio sources, and measurement of the radio brightness distributions of the sun and moon with high angular resolution. There is a heavy emphasis on digital data acquisition, software development in the IDL language, and high-quality written reports.

Final exam required. Formerly known as 120B. Instructors: Bower, Heiles

ASTRON 160 Stellar Physics 4 Units**Department:** Astronomy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Senior standing in astronomy/physics or consent of instructor. Physics 112 (may be taken concurrently) and either Physics 110A-110B or Physics 137A-137B.

Topics covered include some, but not necessarily all, of the following.

Observational constraints on the properties and evolution of stars.

Theory of stellar structure and evolution. Stellar atmospheres and stellar spectroscopy. Stellar nucleosynthesis. Supernovae. Degeneracy of matter and structure of collapsed stars. Elements of gas dynamics, accretion onto compact objects, and x-ray sources. Dynamics and evolution of close binary systems. Stellar pulsation.

Final exam required. Formerly known as C160A and Physics C160A.

Instructors: Filippenko, Quataert, Stahler

ASTRON C161/PHYSICS C161 Relativistic Astrophysics and Cosmology 4 Units**Department:** Astronomy; Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 110A-110B; 112 (may be taken concurrently).

Elements of general relativity. Physics of pulsars, cosmic rays, black holes. The cosmological distance scale, elementary cosmological models, properties of galaxies and quasars. The mass density and age of the universe. Evidence for dark matter and dark energy and concepts of the early universe and of galaxy formation. Reflections on astrophysics as a probe of the extrema of physics.

Final exam required. Formerly known as C160B and Physics C160B.

Instructors: Boggs, Davis, Holzapfel, A. Lee, Ma, Quataert

ASTRON C162/EPS C162 Planetary Astrophysics 4 Units**Department:** Astronomy; Earth and Planetary Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Mathematics 53, 54; Physics 7A-7B-7C.

Physics of planetary systems, both solar and extra-solar. Star and planet formation, radioactive dating, small-body dynamics and interaction of radiation with matter, tides, planetary interiors, atmospheres, and magnetospheres. High-quality oral presentations may be required in addition to problem sets and a final exam.

Final exam required. Formerly known as C149. Instructors: Chiang, de Pater, Marcy

ASTRON H195 Special Study for Honors Candidates 2 - 4 Units**Department:** Astronomy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 to 4 hours of Independent study per week for 15 weeks.

Individual project of research or study.

Final exam not required.

ASTRON 198 Directed Group Study 1 - 4 Units**Department:** Astronomy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Directed group study per week for 15 weeks.

Topics will vary with instructor.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

ASTRON 199 Supervised Independent Study and Research 1 - 4 Units**Department:** Astronomy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Independent study.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

ASTRON 201 Radiation Processes in Astronomy 4 Units**Department:** Astronomy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Physics 105, 110A; 110B concurrently; open to advanced undergraduates with GPA of 3.70.

An introduction to the basic physics of astronomy and astrophysics at the graduate level. Principles of energy transfer by radiation. Elements of classical and quantum theory of photon emission; bremsstrahlung, cyclotron and synchrotron radiation. Compton scattering, atomic, molecular and nuclear electromagnetic transitions. Collisional excitation of atoms, molecules and nuclei.

Final exam required. Instructors: Chiang, Quataert

ASTRON C202/PHYSICS C202 Astrophysical Fluid Dynamics 4 Units**Department:** Astronomy; Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Principles of gas dynamics, self-gravitating fluids, magnetohydrodynamics and elementary kinetic theory. Aspects of convection, fluid oscillations, linear instabilities, spiral density waves, shock waves, turbulence, accretion disks, stellar winds, and jets.

Final exam not required. Instructors: Chiang, Kasen, Ma, Quataert, White

ASTRON 203 Astrophysical Techniques 3 Units**Department:** Astronomy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week and frequent laboratory work plus observatory visits.**Prerequisites:** 201 and 290A; 290B must be taken concurrently.

Introduction to the flow of astronomical signals through telescope optics and into detectors; subsequent calibration, deconvolution of instrumental artifacts, and analysis. A broad wavelength approach is maintained with focus on shared fundamental concepts. Students "adopt a wavelength band" for assignments and presentations. Analysis and simulation of astronomical signals, noise, and errors.

Final exam not required. Instructors: Backer, Basri, Blitz, Graham, Marcy, Welch

ASTRON 204 Numerical Techniques in Astronomy 3 Units**Department:** Astronomy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Mathematics 54.

Methods of data analysis, model fitting, and data display, all oriented towards the detailed analysis of astronomical observation data and/or numerical results from simulations. Specific topics include probability density functions, error propagation, maximum likelihood, least squares, data and function fitting, Fourier transforms, wavelets, principal components analysis, color images. The software language used is the Interactive Data Language (IDL).

Final exam not required. Instructor: Heiles

ASTRON C207/PHYSICS C207 Radiation Processes in Astronomy 4 Units**Department:** Astronomy; Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Physics 105, 110A; 110B concurrently; open to advanced undergraduates with GPA of 3.70.

An introduction to the basic physics of astronomy and astrophysics at the graduate level. Principles of energy transfer by radiation. Elements of classical and quantum theory of photon emission; bremsstrahlung, cyclotron and synchrotron radiation. Compton scattering, atomic, molecular and nuclear electromagnetic transitions. Collisional excitation of atoms, molecules and nuclei.

Final exam required. Instructors: Bower, Chiang, Kasen, Quataert

ASTRON 216 Interstellar Matter 3 Units**Department:** Astronomy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 201

A survey of the observational data and theoretical ideas on the interstellar medium, with emphasis on the inferred physical conditions.

Final exam not required. Instructors: Blitz, Heiles, Glassgold, Graham

ASTRON 218 Stellar Dynamics and Galactic Structure 3 Units**Department:** Astronomy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

A basic course. Structure and kinematics of the galaxy; stellar population concepts; dynamics of stellar systems with and without encounters.

Final exam not required. Instructors: Blitz, Davis, Graham

ASTRON C228/PHYSICS C228 Extragalactic Astronomy and Cosmology 3 Units**Department:** Astronomy; Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

A survey of physical cosmology - the study of the origin, evolution, and fate of the universe. Topics include the Friedmann-Robertson-Walker model, thermal history and big bang nucleosynthesis, evidence and nature of dark matter and dark energy, the formation and growth of galaxies and large scale structure, the anisotropy of the cosmic microwave radiation, inflation in the early universe, tests of cosmological models, and current research areas. The course complements the material of Astronomy 218.

Final exam not required. Instructors: Davis, Holzapfel, Lee, Ma, Seljak, White

ASTRON C249/EPS C249 Solar System Astrophysics 3 Units**Department:** Astronomy; Earth and Planetary Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 149, 169, C160A or consent of instructor.

The physical foundations of planetary sciences. Topics include planetary interiors and surfaces, planetary atmospheres and magnetospheres, and smaller bodies in our solar system. The physical processes at work are developed in some detail, and an evolutionary picture for our solar system, and each class of objects, is developed. Some discussion of other (potential) planetary systems is also included.

Final exam not required. Instructors: Chiang, de Pater

ASTRON 250 Special Topics in Astrophysics 3 Units**Department:** Astronomy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

Topics will vary from semester to semester. See department for announcements.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ASTRON 252 Stellar Structure and Evolution 3 Units**Department:** Astronomy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Physics 110A-110B, 112, 137A-137B.

Equations of stellar structure, radiative transfer and convection, thermonuclear reactions and stellar energy generations; stellar models, degenerate configurations, evolutionary sequences, supernovae, neutron stars, black holes, nucleosynthesis.

Final exam required. Formerly known as C252 and Physics C252.

Instructors: Filippenko, Marcy

ASTRON C254/PHYSICS C254 High Energy Astrophysics 3 Units**Department:** Astronomy; Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 201 or consent of instructor. 202 recommended.

Basic physics of high energy radiation processes in an astrophysics environment. Cosmic ray production and propagation. Applications selected from pulsars, x-ray sources, supernovae, interstellar medium, extragalactic radio sources, quasars, and big-bang cosmologies.

Final exam not required. Instructors: Boggs, Quataert

ASTRON 255 Computational Methods in Theoretical Astrophysics 3 Units**Department:** Astronomy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

A broad in-depth survey of state-of-the-art numerical approaches to astrophysical self-gravitational gas dynamics with application to large scale simulation of coupled non-linear astrophysical flows. Finite-difference approaches for Lagrangian and Eulerian astrophysical hydrodynamics and coupled radiation-hydrodynamics. N-body gravitation techniques including direct N-body, P-M, P3M, and hierarchical Tree. Particle gas dynamics methods such as smooth particle hydrodynamics (SPH), adaptive SPH and unification of SPH, and gravity tree hierarchies (TREE-SPH). Advanced techniques such as higher order Godunov finite difference methods with adaptive mesh refinement (AMR). Applications of these approaches in three broad areas: cosmology, high energy astrophysics, and star formation and the interstellar medium.

Final exam not required. Instructor: Klein

ASTRON C285/PHYSICS C285 Theoretical Astrophysics Seminar 1 Unit**Department:** Astronomy; Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of Lecture per week for 15 weeks.

The study of theoretical astrophysics.

Final exam not required. Instructor: Quataert

ASTRON 290A Introduction to Current Research 1 Unit**Department:** Astronomy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

Survey of research currently being performed in the Department or the University.

Final exam not required. Instructor: de Pater

ASTRON 290B Introduction to Current Research 1 Unit**Department:** Astronomy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

Continuation of 290A. Study of a research topic with an individual staff member.

Final exam not required. Instructor: de Pater

ASTRON C290C/PHYSICS C290C Cosmology 2 Units**Department:** Astronomy; Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructors: White, Cohn

ASTRON 292 Seminar 1 - 2 Units**Department:** Astronomy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

In addition to the weekly colloquium, the Department offers seminars in advanced topics, several of which are announced at the beginning of each semester. A maximum of 5 units may be taken per semester with a limitation of 2 in any one section.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ASTRON C292/EPS C292 Planetary Science Seminar 1 Unit**Department:** Astronomy; Earth and Planetary Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Participants will be required to give at least 1 30-minute presentation, either on their own research or on recent results from the literature

The departments of Astronomy and Earth and Planetary Science offer a joint research seminar in advanced topics in planetary science, featuring speakers drawn from graduate students, postdoctoral researchers, faculty, and visiting scholars. Topics will span planetary interiors; surface morphology; atmospheres; dynamics; planet formation; and astrobiology. Speakers will vary from semester to semester. Meetings will be held once a week for 1 hour each, and the schedule of speakers will be determined on the first day of class. To pass the class, participants will be required to give a 30-minute presentation, either on their own research or on recent results from the literature.

Course may be repeated for credit when topic changes. Final exam not required.

ASTRON 298 Directed Group Study 1 - 4 Units**Department:** Astronomy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Tutorial.

Tutorial for groups of two or three students.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ASTRON 299 Advanced Study and Research 2 - 12 Units**Department:** Astronomy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 to 12 hours of Independent study per week for 15 weeks.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ASTRON 301 Undergraduate Astronomy Instruction 1 - 2 Units**Department:** Astronomy**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of Lecture and 3 to 6 hours of Laboratory per week for 15 weeks.

Prerequisites: An elementary astronomy course and consent of instructor.

Open to a limited number of highly qualified undergraduate students interested in astronomy teaching at the college level. Students will participate in a seminar on educational methods and engage in tutorial or laboratory teaching under supervision of a faculty member.

Course may be repeated for a maximum of 4 units. Course may be repeated for a maximum of 4 units. Final exam not required.

ASTRON 375 Instruction Techniques in General Astronomy 2 - 6 Units**Department:** Astronomy**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

Discussion and practice of teaching techniques as applied to astronomy.

Open to graduate students who are presently teaching assistants or associates. Two units for course plus one section; three units for two discussion sections.

Final exam not required. Formerly known as Astronomy 300.

ASTRON 602 Individual Study for Doctoral Students 1 - 8 Units**Department:** Astronomy**Course level:** Graduate examination preparation**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 8 hour of Independent study per week for 15 weeks.

Individual study in consultation with the major field adviser, intended to provide an opportunity for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D. (and other doctoral degrees). May not be used for unit or residence requirement for the doctoral degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Bengali (BANGLA)

BANGLA 1A Introductory Bengali 5 Units**Department:** Bengali**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 1.5 hours of lecture and 2.5 hours of reading/writing per week.**Prerequisites:** 1A is prerequisite to 1B, or consent of instructor.

Students will be expected to acquire knowledge of the basic grammar of Bengali, such that they learn to read simple graded texts and to speak at the "low intermediate" level by the end of the year.

Final exam required.

BANGLA 1B Introductory Bengali 5 Units**Department:** Bengali**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 1.5 hours of lecture and 2.5 hours of reading/writing per week.**Prerequisites:** 1A is prerequisite to 1B, or consent of instructor.

Students will be expected to acquire knowledge of the basic grammar of Bengali, such that they learn to read simple graded texts and to speak at the "low intermediate" level by the end of the year.

Final exam required.

BANGLA 101A Intermediate Bengali 5 Units**Department:** Bengali**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 5 hours of Session per week for 15 weeks. 7.5 hours of Session per week for 10 weeks.**Prerequisites:** 1B is prerequisite to 101A; 101A is prerequisite to 101B; or consent of instructor.

Students are expected to be able to read, with the aid of a dictionary, modern Bengali literature, and speak at a "high-intermediate" level by the end of the year. There will be viewing of Bengali videos at a mutually agreed upon time and in class from time to time.

Final exam required.

BANGLA 101B Intermediate Bengali 5 Units**Department:** Bengali**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 5 hours of Session per week for 15 weeks. 7.5 hours of Session per week for 10 weeks.**Prerequisites:** 101A or consent of instructor.

Students are expected to be able to read, with the aid of a dictionary, modern Bengali literature, and speak at a "high-intermediate" level by the end of the year. There will be viewing of Bengali videos at a mutually agreed upon time and in class from time to time.

Final exam required.

Bibliography (BIBLIOG)

BIBLIOG 1 Information Resource: Effectively Utilizing the Berkeley Campus libraries and Beyond 1 Unit**Department:** Bibliography**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 1-hour lectures per week.

In this course, you will learn how to exploit the resources of one of the richest information treasure in the world. Upon completion of the course, you will: understand how the complex UC Berkeley and University of California libraries are configured and how their collections are interrelated: learn how to create a search strategy that can be used to conduct research in any field: learn to take best advantage of the online public catalogs, Gladis and Melvyl to uncover a wealth of information: use both print resources and electronic sources, such as the Internet, to find materials in the Berkeley Libraries and beyond: Be a confident, critical researcher.

Final exam required.

Bioengineering (BIO ENG)

BIO ENG 10 Introduction to Biomedicine for Engineers 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This course is intended for lower division students interested in acquiring a foundation in biomedicine with topics ranging from evolutionary biology to human physiology. The emphasis is on the integration of engineering applications to biology and health. The goal is for undergraduate engineering students to gain sufficient biology and human physiology fundamentals so that they are better prepared to study specialized topics, e.g., biomechanics, imaging, computational biology, tissue engineering, biomonitoring, drug development, robotics, and other topics covered by upper division and graduate courses in UC Berkeley departments of Molecular and Cell Biology, Integrative Biology, Bioengineering, Electrical Engineering and Computer Science, Mechanical Engineering, and courses in the UC San Francisco Division of Bioengineering. The specific lecture topics and exercises will include the key aspects of genomics and proteomics as well as topics on plant and animal evolution, stem cell biomedicine, and tissue regeneration and replacement. Medical physiology topics include relevant engineering aspects of human brain, heart, musculoskeletal, and other systems.

Final exam required. Instructors: Conboy, Kumar

BIO ENG 22 Biotechnology 3 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 22L (must be taken concurrently).

This course is intended to introduce students to a variety of fields that fall under the biotechnology umbrella. In general, these fields include medical, microbial, agricultural, animal, and forensic biotechnology. Students in this course will learn the types of biotechnology projects currently being worked on, as well as the techniques and assays used within these projects.

Final exam required. Instructors: L. Lee, Dueck

BIO ENG 22L Biotechnology Laboratory 2 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Laboratory per week for 15 weeks.**Prerequisites:** 22 (must be taken concurrently).

This course is intended to introduce students to a variety of laboratory techniques that are used in current day biotechnology projects. During this course, students will get hands-on molecular and cellular biotechnology experience working with E. coli, Yeast, Human and Mouse Cell Lines, DNA, RNA, and proteins. This is a bioengineering course; the focus of these exercises will be on the critical understanding of biological, biochemical, or physical mechanisms, and theories of different experimental methods, techniques, and instrumentation used. Second, students leaving this class should understand how to address a critical biological question and design experiments in a quantitative manner. Final exam required. Instructors: L. Lee, Dueck

BIO ENG 24 Aspects of Bioengineering 1 Unit**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of Seminar per week for 15 weeks.

This introductory seminar is designed to give freshmen and sophomores a glimpse of a broad selection of bioengineering research that is currently underway at Berkeley and UCSF. Students will become familiar with bioengineering applications in the various concentration areas and see how engineering principles can be applied to biological and medical problems.

Course may be repeated for credit when topic changes. Final exam not required.

BIO ENG 25 Careers in Biotechnology 1 Unit**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of Seminar per week for 15 weeks.

This introductory seminar is designed to give freshmen and sophomores an opportunity to explore specialties related to engineering in the pharmaceutical/biotech field. A series of one-hour seminars will be presented by industry professionals, professors, and researchers. Topics may include biotechnology and pharmaceutical manufacturing; process and control engineering; drug inspection process; research and development; compliance and validation; construction process for a GMP facility; project management; and engineered solutions to environmental challenges. This course is of interest to students in all areas of engineering and biology, including industrial engineering and manufacturing, chemical engineering, and bioengineering. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

BIO ENG 84 Sophomore Seminar 1 or 2 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.

Hours and format: 1 hour of seminar per week per unit for 15 weeks. 1 and 1 half hours of seminar per week per unit for 10 weeks. 2 hours of seminar per week per unit for 8 weeks. 3 hours of seminar per week per unit for 5 weeks.

Prerequisites: At discretion of instructor.

Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

BIO ENG 98 Supervised Independent Group Studies 1 - 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Group study meetings.**Prerequisites:** Consent of instructor.

Organized group study on various topics under the sponsorship of a member of the Bioengineering faculty.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula a section of this catalog. Final exam not required.

BIO ENG 99 Supervised Independent Study and Research 1 - 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.

Hours and format: 1 to 4 hour of Independent study per week for 15 weeks. 1.5 to 6 hours of Independent study per week for 10 weeks. 1.5 to 7.5 hours of Independent study per week for 8 weeks.

Prerequisites: Freshman or sophomore standing and consent of instructor.

Supervised independent study for lower division students.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

BIO ENG 100 Ethics in Science and Engineering 3 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 4.5 hours of Lecture per week for 10 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

The goal of this semester course is to present the issues of professional conduct in the practice of engineering, research, publication, public and private disclosures, and in managing professional and financial conflicts. The method is through historical didactic presentations, case studies, presentations of methods for problem solving in ethical matters, and classroom debates on contemporary ethical issues. The faculty will be drawn from national experts and faculty from religious studies, journalism, and law from the UC Berkeley campus.

Final exam required. Instructor: Head-Gordon

BIO ENG 101 Instrumentation in Biology and Medicine 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 3 hours of discussion/computer laboratory per week.**Prerequisites:** Electrical Engineering 100, Mathematics 53, 54, Physics 7A-7B, or consent of instructor.

This course teaches the fundamental principles underlying modern sensing and control instrumentation used in biology and medicine.

The course takes an integrative analytic and hands-on approach to measurement theory and practice by presenting and analyzing example instruments currently used for biology and medical research, including EEG, ECG, pulsed oximeters, Complete Blood Count (CBC), etc.

Final exam required. Instructor: Conolly

BIO ENG 102 Biomechanics 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 3 hours of computer laboratory per week.**Prerequisites:** Math 53, 54; Physics 7A.

This course introduces, develops, and applies scaling laws and the methods of continuum mechanics to tissue-level biomechanical phenomena. It is intended for upper level undergraduate students who have been exposed to vectors and tensors, differential equations, and undergraduate courses in either fluids or transport, and molecular biology. Topics include biosolid and biofluid mechanics; elastic (time-independent), viscoelastic, and poroelastic (time-dependent) behavior of tissues; continuum and microstructural models; constitutive laws; material properties of tissues; experimental methods--macroscopic rheology.

Final exam required. Instructor: Mofrad

BIO ENG 104 Biological Transport Phenomena 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** Mathematics 53, 54, and Physics 7A.

The transport of mass, momentum, and energy are critical to the function of living systems and the design of medical devices. Biological transport phenomena are present at a wide range of length scales: molecular, cellular, organ (whole and by functional unit), and organism. This course develops and applies scaling laws and the methods of continuum mechanics to biological transport phenomena over a range of length and time scales. The course is intended for undergraduate students who have taken a course in differential equations and an introductory course in physics. Students should be familiar with basic biology; an understanding of physiology is useful, but not assumed.

Final exam required. Instructor: Johnson

BIO ENG 110 Biomedical Physiology for Engineers 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 10, Biology 1A; Math 54 (may be taken concurrently).

This course introduces students to the physiology of human organ systems, with an emphasis on quantitative problem solving, engineering-style modeling, and applications to clinical medicine. The course will begin with a review of basic principles of cellular physiology, including membrane transport and electrophysiology, and then take a system-by-system approach to the physiology of various organ systems, including the cardiovascular, pulmonary, renal, and endocrine systems. Throughout, the course will feature extensive discussions of clinical conditions associated with dysfunction in specific physiological processes as well as the role of medical devices and prostheses. This course is geared towards upper-division bioengineering students who wish to solidify their foundation in physiology, especially in preparation for a career in clinical medicine or the biomedical device industry.

Final exam required. Instructor: Kumar

BIO ENG 111 Functional Biomaterials Development and Characterization 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Chemistry 1A or 4A, Biology 1A and 1AL, Molecular and Cell Biology C100A/Chemistry C130 or Molecular Cell Biology 102.

This course is intended for upper level engineering undergraduate students interested in the development of novel functional proteins and peptide motifs and characterization of their physical and biological properties using various instrumentation tools in quantitative manners.

Final exam required. Instructor: SW Lee

BIO ENG 112 Molecular Cell Biomechanics 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Mathematics 54, Physics 7A, 102, or consent of instructors.

This course develops and applies scaling laws and the methods of continuum and statistical mechanics to biomechanical phenomena over a range of length scales, from molecular to cellular levels. It is intended for senior undergraduate students who have been exposed to differential equations, mechanics, and certain aspects of modern biology.

Final exam required. Instructor: Mofrad

BIO ENG C112/MEC ENG C115 Molecular Cell Biomechanics 4 Units**Department:** Bioengineering; Mechanical Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.

This course applies methods of statistical continuum mechanics to subcellar biomechanical phenomena ranging from nanoscale (molecular) to microscale (whole cell and cell population) biological processes at the interface of mechanics, biology, and chemistry.

Final exam not required. Instructor: Mofrad

BIO ENG 113 Stem Cells and Technologies 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 10 and Biology 1A, or consent of instructor.

This course will teach the main concepts and current views on key attributes of embryonic stem cells (ESC), will introduce theory of their function in embryonic development, methods of ESC derivation, propagation, and characterization, and will discuss currently developing stem cell technologies.

Final exam required. Instructor: Conboy

BIO ENG 115 Cell Biology for Engineers 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 6 hours of Laboratory per week for 15 weeks. 3 hours of Lecture and 9 hours of Laboratory per week for 10 weeks. 3.5 hours of Lecture and 11 hours of Laboratory per week for 8 weeks. 5 hours of Lecture and 15 hours of Laboratory per week for 6 weeks.**Prerequisites:** Chemistry C130/Molecular Cell Biology C100A or equivalent recommended.

The structural and functional characteristics of tissues are altered by cells in response to culture conditions, loading, injury, and various other factors. A contemporary understanding of the form, function, and longevity of tissues includes knowledge of tissue microstructure, composition of matrix, and cell function. Students will be introduced to molecular biology techniques as applied to cells and tissues including immunofluorescence, image analysis, protein quantification, gene expression, and cell culture.

Final exam required. Instructor: Johnson

BIO ENG 116 Cell and Tissue Engineering 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 102 and Chemistry C130/Molecular and Cell Biology C100A or equivalent recommended, or consent of instructor.

The goal of tissue engineering is to fabricate substitutes to restore tissue structure and functions. Understanding cell function in response to environmental cues will help us to establish design criteria and develop engineering tools for tissue fabrication. This course will introduce the basic concepts and approaches in the field, and train students to design and engineer biological substitutes. Lectures will be based on the textbook, the reference books and recent literature. Discussion sections will include the discussion of current literature and issues related to course content, homework, exams, and projects. Homework includes quantitative analysis, essay questions, and literature research. There will be a midterm exam, final exam, and a design project (presentation and paper). The final project will be a group project (three to four students) or independent project (required for graduate students). The topic will be chosen by each group and approved by instructor/GSIs.

Final exam required. Instructor: Li

BIO ENG C117/MEC ENG C117 Structural Aspects of Biomaterials 4 Units**Department:** Bioengineering; Mechanical Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** Biology 1A, Engineering 45, Civil and Environmental Engineering 130 or 130N or Bioengineering 102, and Engineering 190.

This course covers the structure and mechanical functions of load bearing tissues and their replacements. Natural and synthetic load-bearing biomaterials for clinical applications are reviewed. Biocompatibility of biomaterials and host response to structural implants are examined. Quantitative treatment of biomechanical issues and constitutive relationships of tissues are covered in order to design biomaterial replacements for structural function. Material selection for load bearing applications including reconstructive surgery, orthopedics, dentistry, and cardiology are addressed. Mechanical design for longevity including topics of fatigue, wear, and fracture are reviewed. Case studies that examine failures of devices are presented. This course includes a teaching/design laboratory component that involves design analysis of medical devices and outreach teaching to the public community. Several problem-based projects are utilized throughout the semester for design analysis. In addition to technical content, this course involves rigorous technical writing assignments, oral communication skill development and teamwork. Final exam not required. Instructor: Pruitt

BIO ENG C118/MAT SCI C118 Biological Performance of Materials 4 Units**Department:** Bioengineering; Materials Science and Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Molecular and Cell Biology 102, 130 (recommended), and Engineering 45, 115 or equivalent.

This course is intended to give students the opportunity to expand their knowledge of topics related to biomedical materials selection and design. Structure-property relationships of biomedical materials and their interaction with biological systems will be addressed. Applications of the concepts developed include blood-materials compatibility, biomimetic materials, hard and soft tissue-materials interactions, drug delivery, tissue engineering, and biotechnology.

Final exam required. Instructor: Healy

BIO ENG C119/MEC ENG C176 Orthopedic Biomechanics 4 Units**Department:** Bioengineering; Mechanical Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 1 hour of discussion/computer workshop per week.**Prerequisites:** Civil and Environmental Engineering 130 or 130N.

Statics, dynamics, optimization theory, composite beam theory, beam-on-elastic foundation theory, Hertz contact theory, and materials behavior. Forces and moments acting on human joints; composition and mechanical behavior of orthopedic biomaterials; design/analysis of artificial joint, spine, and fracture fixation prostheses; musculoskeletal tissues including bone, cartilage, tendon, ligament, and muscle; osteoporosis and fracture-risk predication of bones; and bone adaptation. MATLAB-based project to integrate the course material.

Final exam required. Instructor: Keaveny

BIO ENG 121 BioMEMS and Medical Devices 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 4.5 hours of Lecture per week for 10 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** Chemistry 3A; Physics 7A and 7B.

Biophysical and chemical principles of biomedical devices, bionanotechnology, bionanophotonics, and biomedical microelectromechanical systems (BioMEMS). Topics include basics of nano- and microfabrication, soft-lithography, DNA arrays, protein arrays, electrokinetics, electrochemical, transducers, microfluidic devices, biosensor, point of care diagnostics, lab-on-a-chip, drug delivery microsystems, clinical lab-on-a-chip, advanced biomolecular probes, etc. Final exam required. Instructor: L. Lee

BIO ENG 121L BioMEMS and BioNanotechnology Laboratory 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Laboratory and 2 hours of Lecture per week for 15 weeks.**Prerequisites:** 102 or 104; 22/22L or Molecular and Cell Biology C100A/ Chemistry C130 or equivalent.

Students will become familiar with BioMEMS and Lab-on-a-Chip research. Students will design and fabricate their own novel micro- or nano-scale device to address a specific problem in biotechnology using the latest micro- and nano-technological tools and fabrication techniques. This will involve an intensive primary literature review, experimental design, and quantitative data analysis. Results will be presented during class presentations and at a final poster symposium.

Students will receive no credit for 121L after taking 221L. Final exam required. Instructors: L. Lee, Dueck

BIO ENG C125/EL ENG C125 Introduction to Robotics 4 Units**Department:** Bioengineering; Electrical Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture, 1 hour of Discussion, and 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** 120 or equivalent, consent of instructor.

An introduction to the kinematics, dynamics, and control of robot manipulators, robotic vision, and sensing. The course covers forward and inverse kinematics of serial chain manipulators, the manipulator Jacobian, force relations, dynamics, and control. It presents elementary principles on proximity, tactile, and force sensing, vision sensors, camera calibration, stereo construction, and motion detection. The course concludes with current applications of robotics in active perception, medical robotics, and other areas.

Final exam required. Instructor: Bajcsy

BIO ENG 131 Introduction to Computational Molecular and Cell Biology 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Mathematics 53 and Biology 1A (may be taken concurrently).

Topics include computational approaches and techniques to gene structure and genome annotation, sequence alignment using dynamic programming, protein domain analysis, RNA folding and structure prediction, RNA sequence design for synthetic biology, genetic and biochemical pathways and networks, UNIX and scripting languages, basic probability and information theory. Various "case studies" in these areas are reviewed; web-based computational biology tools will be used by students and programming projects will be given. Computational biology research connections to biotechnology will be explored.

Students will receive no credit for 131 after taking 231. Final exam required. Instructor: Holmes

BIO ENG 132 Genetic Devices 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: Engineering 7 or Computer Science 61A, Mathematics 54, Chemistry 3A, and Chemistry C130/Molecular and Cell Biology C100A. This senior-level course is a comprehensive survey of genetic devices. These DNA-based constructs are comprised of multiple "parts" that together encode a higher-level biological behavior and perform useful human-defined functions. Such constructs are the engineering target for most projects in synthetic biology. Included within this class of constructs are genetic circuits, sensors, biosynthetic pathways, and microbiological functions.

Students will receive no credit for 132 after taking 232. Final exam required. Instructor: Anderson

BIO ENG 135 Frontiers in Microbial Systems Biology 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Upper division standing with background in differential equations and probability. Coursework in molecular and cell biology or biochemistry recommended.

This course is aimed at graduate and advanced undergraduate students from the (bio) engineering and chemo-physical sciences interested in a research-oriented introduction to current topics in systems biology. Focusing mainly on two well studied microbiological model systems--the chemotaxis network and Lambda bacteriophage infection--the class systematically introduces key concepts and techniques for biological network deduction, modelling, analysis, evolution, and synthetic network design. Students analyze the impact of approaches from the quantitative sciences--such as deterministic modelling, stochastic processes, statistics, non-linear dynamics, control theory, information theory, graph theory, etc.--on understanding biological processes, including (stochastic) gene regulation, signalling, network evolution, and synthetic network design. The course aims to identify unsolved problems and discusses possible novel approaches while encouraging students to develop ideas to explore new directions in their own research.

Students will receive no credit for 135 after taking 235. Final exam required. Instructors: Arkin, Bischofs-Pfeifer, Wolf

BIO ENG C136L/EL ENG C145O/INTEGBI C135L Laboratory in the Mechanics of Organisms 3 Units**Department:** Bioengineering; Electrical Engineering; Integrative Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of laboratory and 1 hour of discussion per week, plus 1 field trip.**Prerequisites:** Integrative Biology 135 or consent of instructor; for Electrical Engineering and Computer Science students, Electrical Engineering 105, 120 or Computer Science 184.

Introduction to laboratory and field study of the biomechanics of animals and plants using fundamental biomechanical techniques and equipment. Course has a series of rotations involving students in experiments demonstrating how solid and fluid mechanics can be used to discover the way in which diverse organisms move and interact with their physical environment. The laboratories emphasize sampling methodology, experimental design, and statistical interpretation of results. Latter third of course devoted to independent research projects. Written reports and class presentation of project results are required.

Students will receive no credit for C135L after taking 135L. Final exam required. Formerly known as Integrative Biology 135L.

BIO ENG 140L Synthetic Biology Laboratory 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 6 hours of Laboratory per week for 15 weeks.**Prerequisites:** Molecular biology, basic chemistry and biochemistry, and differential equations; or consent of instructor.

This laboratory course is designed as an introduction to research in synthetic biology, a ground-up approach to genetic engineering with applications in bioenergy, healthcare, materials science, and chemical production. In this course, we will design and execute a real research project. Each student will be responsible for designing and constructing components for the group project and then performing experiments to analyze the system. In addition to laboratory work, we will have lectures on methods and design concepts in synthetic biology including an introduction to Biobricks, gene synthesis, computer modeling, directed evolution, practical molecular biology, and biochemistry.

Final exam required. Instructor: Anderson

BIO ENG 143 Computational Methods in Biology 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture, 2 hours of Laboratory, and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Math 53 and Math 54; programming experience preferred but not required.

An introduction to biophysical simulation methods and algorithms, including molecular dynamics, Monte Carlo, mathematical optimization, and "non-algorithmic" computation such as neural networks. Various case studies in applying these areas in the areas of protein folding, protein structure prediction, drug docking, and enzymatics will be covered. Core Specialization: Core B (Informatics and Genomics); Core D (Computational Biology); BioE Content: Biological.

Final exam required. Instructor: Head-Gordon

BIO ENG C144/PLANTBI C144 Introduction to Protein Informatics 4 Units**Department:** Bioengineering; Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This course will introduce students to the fundamentals of molecular biology, and to the bioinformatics tools and databases used for the prediction of protein function and structure. It is designed to impart both a theoretical understanding of popular computational methods, as well as some experience with protein sequence analysis methods applied to real data. This class includes no programming, and no programming background is required.

Final exam required. Instructor: Sjolander

BIO ENG C144L/PLANTBI C144L Protein Informatics Laboratory 2 Units**Department:** Bioengineering; Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Laboratory per week for 15 weeks.

This course is intended to introduce students to a variety of bioinformatics techniques that are used to predict protein function and structure. It is designed to be taken concurrently with C144 (which provides the theoretical foundations for the methods used in the laboratory class), although students can petition to take this laboratory course separately. No programming is performed in this class, and no prior programming experience is required.

Final exam required. Instructor: Sjolander

BIO ENG C145L/EL ENG C145L Introductory Electronic Transducers Laboratory 3 Units**Department:** Bioengineering; Electrical Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.

Laboratory exercises exploring a variety of electronic transducers for measuring physical quantities such as temperature, force, displacement, sound, light, ionic potential; the use of circuits for low-level differential amplification and analog signal processing; and the use of microcomputers for digital sampling and display. Lectures cover principles explored in the laboratory exercises; construction, response and signal to noise of electronic transducers and actuators; and design of circuits for sensing and controlling physical quantities.

Final exam required. Instructor: Derenzo

BIO ENG C145M/EL ENG C145M Introductory Microcomputer Interfacing Laboratory 3 Units**Department:** Bioengineering; Electrical Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** 40, CompSci 61B or a working knowledge of ANSI C programming or consent of instructor.

Laboratory exercises constructing basic interfacing circuits and writing 20-100 line C programs for data acquisition, storage, analysis, display, and control. Use of the IBM PC with microprogrammable digital counter/timer, parallel I/O port. Circuit components include anti-aliasing filters, the S/H amplifier, A/D and D/A converters. Exercises include effects of aliasing in periodic sampling, fast Fourier transforms of basic waveforms, the use of the Hanning filter for leakage reduction, Fourier analysis of the human voice, digital filters, and control using Fourier deconvolution.

Lectures cover principles explored in the lab exercises and design of microcomputer-based systems for data acquisitions, analysis and control. Final exam required. Instructor: Derenzo

BIO ENG 147 Principles of Synthetic Biology 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Math 53 and 54; Molecular and Cell Biology C100A/ Chemistry C130; or consent of instructor.

The field of synthetic biology is quickly emerging as potentially one of the most important and profound ways by which we can understand and manipulate our physical world for desired purposes. In this course, the field and its natural scientific and engineering basis are introduced. Relevant topics in cellular and molecular biology and biophysics, dynamical and engineering systems, and design and operation of natural and synthetic circuits are covered in a concise manner that then allows the student to begin to design new biology-based systems. Students will receive no credit for 147 after taking 247. Final exam required. Instructor: Arkin

BIO ENG 148 Bioenergy and Sustainable Chemical Synthesis: Metabolic Engineering and Synthetic Biology Approaches 3 Units**Department:** Bioengineering**Course level:** Undergraduate**Term course may be offered:** Spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.**Prerequisites:** Chemistry 3A and Molecular and Cell Biology C100A/ Chemistry C130A or equivalent.

This course will cover metabolic engineering and the various synthetic biology approaches for optimizing pathway performance. Use of metabolic engineering to produce biofuels and general "green technology" will be emphasized since these aims are currently pushing these fields. The course is meant to be a practical guide for metabolic engineering and the related advances in synthetic biology as well the related industrial research and opportunities.

Course Objectives: (1) Learn the common engineered metabolic pathways for biofuel biosynthesis
 (2) analytical methods
 (3) synthetic biology approaches
 (4) Industry technologies and opportunities

Student Learning Outcomes: Students will learn (1) the common pathways used for biofuel synthesis and framework for the biosynthesis of specialty chemicals, (2) analytical methods for quantitative measurements of metabolic pathways, (3) synthetic biology approaches for increasing overall pathway performance, and how to (4) utilize available online resources for culling information from large data sources. Final exam required. Instructor: Dueber

BIO ENG 150 Introduction of Bionanoscience and Bionanotechnology 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Biology 1A and Chemistry 1A.

This course is intended for the bioengineering or engineering undergraduate students interested in acquiring a background in recent development of bio-nanomaterials and bio-nanotechnology. The emphasis of the class is to understand the properties of biological basis building blocks, their assembly principles in nature, and their application to build functional materials and devices. The goal is for the bioengineering students to gain sufficient chemical and physical aspects of biological materials through the case study of spider webs, silks, sea shells, diatoms, bones, and teeth, as well as recently developed self-assembled nanostructures inspired by nature. The course covers the structures and properties of amino acids, DNAs, sugars, lipids, and their natural and artificial assembly structures. It also covers nanoscale inorganic materials used to develop nano medicines, bio-imaging, bio-sensors, bioelectronics, and machinery. Final exam required. Instructor: S. W. Lee

BIO ENG 151 Micro/Nanofluidics for Bioengineering and Lab-On-A-Chip 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Chemistry 3B, Physics 7B, Bioengineering 102 or Mechanical Engineering 106 or consent of instructor.

Introduction and in-depth treatment of theory relevant to fluid flow in microfluidic and nanofluidic systems supplemented by critical assessment of recent applications drawn from the literature. Topics include low Reynolds Number flow, mass transport including diffusion phenomena, and emphasis on electrokinetic systems and bioanalytical applications of said phenomena.

Students will receive no credit for 151 after taking 251. Final exam required. Instructor: Herr

BIO ENG 163 Principles of Molecular and Cellular Biophotonics 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 102 or consent of instructor, Chemistry 3A, and Physics 7B.

This course provides undergraduate and graduate bioengineering students with an opportunity to increase their knowledge of topics in the emerging field of biophotonics with an emphasis on fluorescence spectroscopy, biosensors and devices for optical imaging and detection of biomolecules. This course will cover the photophysics and photochemistry of organic molecules, the design and characterization of biosensors and their applications within diverse environments.

Final exam not required. Instructor: Marriott

BIO ENG 163L Molecular and Cellular Biophotonics Laboratory 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Laboratory and 2 hours of Discussion per week for 15 weeks.**Prerequisites:** Bioengineering 163L; experience in a research lab and consent of instructor.

This course provides undergraduate and graduate bioengineering students with an opportunity to acquire essential experimental skills in fluorescence spectroscopy and the design, evaluation, and optimization of optical biosensors for quantitative measurements of proteins and their targets. Groups of students will be responsible for the research, design, and development of a biosensor or diagnostic device for the detection, diagnosis, and monitoring of a specific biomarker(s).

Students will receive no credit for Bioengineering 163L after taking Bioengineering 263L. Final exam required. Instructor: Marriott

BIO ENG 164 Optics and Microscopy 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Physics 7A-7B or 8A-8B or equivalent introductory physics course.

This course teaches fundamental principles of optics and examines contemporary methods of optical microscopy for cells and molecules. Students will learn how to design simple optical systems, calculate system performance, and apply imaging techniques including transmission, reflection, phase, and fluorescence microscopy to investigate biological samples. The capabilities of optical microscopy will be compared with complementary techniques including electron microscopy, coherence tomography, and atomic force microscopy. Students will also be responsible for researching their final project outside of class and presenting a specific application of modern microscopy to biological research as part of an end-of-semester project.

Final exam required. Instructor: Fletcher

BIO ENG C165/EL ENG C145B Medical Imaging Signals and Systems 4 Units**Department:** Bioengineering; Electrical Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Electrical Engineering 120; basic programming ability in C or FORTRAN.

Biomedical imaging is a clinically important application of engineering, applied mathematics, physics, and medicine. In this course, we apply linear systems theory and basic physics to analyze X-ray imaging, computerized tomography, nuclear medicine, and MRI. We cover the basic physics and instrumentation that characterizes medical image as an ideal perfect-resolution image blurred by an impulse response. This material could prepare the student for a career in designing new medical imaging systems that reliably detect small tumors or infarcts.

Final exam required. Instructor: Conolly

BIO ENG 168L Practical Light Microscopy 3 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.

This laboratory course is designed for students interested in obtaining practical hands-on training in optical imaging and instrumentation. Using a combination of lenses, cameras, and data acquisition equipment, students will construct simple light microscopes that introduce basic concepts and limitations important in biomedical optical imaging. Topics include compound microscopes, Kohler illumination, Rayleigh two-point resolution, image contrast including dark-field and fluorescence microscopy, and specialized techniques such as fluorescence recovery after photobleaching (FRAP). Intended for students in both engineering and the sciences, this course will emphasize applied aspects of optical imaging and provide a base of practical skill and reference material that students can leverage in their own research or in industry.

Final exam required. Instructor: Fletcher

BIO ENG C181/CHEM C138/CHM ENG C195A/PLANTBI C124 The Berkeley Lectures on Energy: Energy from Biomass 3 Units**Department:** Bioengineering; Chemical Biomolecular Engineering; Chemistry; Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Chemistry 1B or Chemistry 4B, Mathematics 1B, Biology 1A.

After an introduction to the different aspects of our global energy consumption, the course will focus on the role of biomass. The course will illustrate how the global scale of energy guides the biomass research. Emphasis will be placed on the integration of the biological aspects (crop selection, harvesting, storage and distribution, and chemical composition of biomass) with the chemical aspects to convert biomass to energy. The course aims to engage students in state-of-the-art research.

Repeatable when topic changes with consent of instructor. Final exam required. Instructors: Bell, Blanch, Clark, Smit, C. Somerville

BIO ENG 190D Advanced Topics in Bioengineering: Advanced Topics in Computational Bioengineering 1 - 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1 to 4 hour of Lecture per week for 15 weeks. 1.5 to 6 hours of Lecture per week for 10 weeks. 1.5 to 7.5 hours of Lecture per week for 8 weeks. 2.5 to 10 hours of Lecture per week for 6 weeks. These courses cover current topics of research interest in bioengineering. The course content may vary from semester to semester. Course may be repeated for credit when topic changes. Final exam required.

BIO ENG 190H Advanced Topics in Bioengineering: Advanced Topics in Biomedical Systems Engineering 1 - 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.

Hours and format: 1 to 4 hour of Lecture per week for 15 weeks. 1.5 to 6 hours of Lecture per week for 10 weeks. 1.5 to 7.5 hours of Lecture per week for 8 weeks. 2.5 to 10 hours of Lecture per week for 6 weeks. These courses cover current topics of research interest in bioengineering. The course content may vary from semester to semester. Course may be repeated for credit when topic changes. Final exam required.

BIO ENG 192 Senior Design Projects 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Lecture and 2 hours of Discussion per week for 15 weeks.

Prerequisites: Senior standing.

This semester-long course introduces students to bioengineering project-based learning in small teams, with a strong emphasis on need-based solutions for real medical and research problems through prototype solution selection, design, and testing. The course is designed to provide a "capstone" design experience for bioengineering seniors. The course is structured around didactic lectures, and a textbook, from which assigned readings will be drawn, and supplemented by additional handouts, readings, and lecture material. Where appropriate, the syllabus includes guest lectures from clinicians and practicing engineers from academia and industry. The course includes active learning through organized activities, during which teams will participate in exercises meant to reinforce lecture material through direct application to the team design project. Final exam not required. Instructor: Herr

BIO ENG H194 Honors Undergraduate Research 3 or 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Variable format.**Prerequisites:** Upper division technical GPA 3.3 or higher and consent of instructor and adviser.

Supervised research. Students who have completed 3 or more upper division courses may pursue original research under the direction of one of the members of the staff. May be taken a second time for credit only. A final report or presentation is required. A maximum of 4 units of this course may be used to fulfill the research or technical elective requirement or in the Bioengineering program.

Course may be repeated for a maximum of 8 units. Course may be repeated for a maximum of 8 units. Final exam not required.

BIO ENG 196 Undergraduate Design Research 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual research.**Prerequisites:** Junior or senior status, consent of instructor and faculty adviser.

Supervised research. This course will satisfy the Senior Bioengineering Design project requirement. Students with junior or senior status may pursue research under the direction of one of the members of the staff. May be taken a second time for credit only. A final report or presentation is required.

Course may be repeated for credit once. Course may be repeated for a maximum of 8 units. Final exam required.

BIO ENG 198 Directed Group Study for Advanced Undergraduates 1 - 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.

Hours and format: 1 to 4 hour of Directed group study per week for 15 weeks. 1.5 to 7.5 hours of Directed group study per week for 8 weeks. 2.5 to 10 hours of Directed group study per week for 6 weeks.

Prerequisites: Upper division standing and good academic standing. (2.0 grade point average and above)

Group study of a selected topic or topics in bioengineering, usually relating to new developments.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

BIO ENG 199 Supervised Independent Study 1 - 4 Units**Department:** Bioengineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks. 1.5 to 6 hours of Independent study per week for 10 weeks. 1.5 to 7.5 hours of Independent study per week for 8 weeks. 2.5 to 10 hours of Independent study per week for 6 weeks.

Supervised independent study.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

BIO ENG 200 The Graduate Group Introductory Seminar 1 Unit**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of Seminar per week for 15 weeks.**Prerequisites:** Enrollment in PhD Program in Bioengineering or consent of instructor.

An introduction to research in bioengineering including specific case studies and organization of this rapidly expanding and diverse field. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

BIO ENG C209/MEC ENG C210 Advanced Orthopedic Biomechanics 4 Units**Department:** Bioengineering; Mechanical Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Prerequisites:** ME C85/CE C30 or Bio Eng 102; concurrent enrollment OK. Proficiency in MatLab or equivalent. Prior knowledge of biology or anatomy is not assumed.

Students will learn the application of engineering concepts including statics, dynamics, optimization theory, composite beam theory, beam-on-elastic foundation theory, Hertz contact theory, and materials behavior. Topics will include forces and moments acting on human joints; composition and mechanical behavior of orthopedic biomaterials; design/analysis of artificial joint, spine, and fracture fixation prostheses; musculoskeletal tissues including bone, cartilage, tendon, ligament, and muscle; osteoporosis and fracture-risk predication of bones; and bone adaptation. Students will be challenged in a MATLAB-based project to integrate the course material in an attempt to gain insight into contemporary design/analysis/problems.

Course Objectives: The purpose of this course is twofold:

- to learn the fundamental concepts of orthopaedic biomechanics;
- to enhance skills in mechanical engineering and bioengineering by analyzing the mechanical behavior of various complex biomedical problems.

Student Learning Outcomes: Working knowledge of various engineering concepts such as composite beam theory, beam-on-elastic-foundation theory, Hertz contact theory and MATLAB-based optimization design analysis. Understanding of basic concepts in orthopaedic biomechanics and the ability to apply the appropriate engineering concepts to solve realistic biomechanical problems, knowing clearly the assumptions involved.

Students will not receive credit for this course if they have taken ME C176/Bio E C119. Final exam required. Instructors: O'Connell, Keaveny

BIO ENG 211 Cell and Tissue Mechanotransduction 3 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Undergraduate cell biology or consent of instructor.

This course will focus on biophysical and bioengineering aspects of mechanotransduction, the process through which living cells sense and respond to their mechanical environment. Students will learn how mechanical inputs to cells influence both subcellular biochemistry and whole-cell behavior. They will also study newly-engineered technologies for force manipulation and measurement in living cells, and synthetic strategies to control the mechanics and chemistry of the extracellular matrix. Finally, students will learn about the role of mechanotransduction in selected human organ systems and how these mechanisms may go awry in the setting of the disease. Instruction will feature lectures, discussions, analysis of relevant research papers, assembly of a literature review and a research proposal, and an oral presentation. Final exam not required. Instructor: Kumar

BIO ENG C212/MEC ENG C212 Heat and Mass Transport in Biomedical Engineering 3 Units**Department:** Bioengineering; Mechanical Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 106 and 109 (106 and 109 may be taken concurrently).

Fundamental processes of heat and mass transport in biological systems; organic molecules, cells, biological organs, whole animals. Derivation of mathematical models and discussion of experimental procedures. Applications to biomedical engineering.

Final exam not required. Formerly known as Mechanical Engineering 212.

BIO ENG C213/MEC ENG C213 Fluid Mechanics of Biological Systems 3 Units**Department:** Bioengineering; Mechanical Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 106 or equivalent; 265A or consent of instructor.

Fluid mechanical aspects of various physiological systems, the circulatory, respiratory, and renal systems. Motion in large and small blood vessels. Pulsatile and peristaltic flows. Other biofluidmechanical flows: the ear, eye, etc. Instrumentation for fluid measurements in biological systems and for medical diagnosis and applications. Artificial devices for replacement of organs and/or functions, e.g. blood oxygenators, kidney dialysis machines, artificial hearts/circulatory assist devices.

Final exam required. Instructors: Berger, Liepmann

BIO ENG C214/MEC ENG C214 Advanced Tissue Mechanics 3 Units**Department:** Bioengineering; Mechanical Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 102A, 176, 185; graduate standing or consent of instructor.

The goal of this course is to provide a foundation for characterizing and understanding the mechanical behavior of load-bearing tissues. A variety of mechanics topics will be introduced, including anisotropic elasticity and failure, cellular solid theory, biphasic theory, and quasi-linear viscoelasticity (QLV) theory. Building from this theoretical basis, we will explore the constitutive behavior of a wide variety of biological tissues. After taking this course, students should have sufficient background to independently study the mechanical behavior of most biological tissues. Formal discussion section will include a seminar series with external speakers.

Final exam not required.

BIO ENG C215/MEC ENG C216 Mechanobiology of the Cell: Dynamics of the Cytoskeleton and Nucleus 3 Units**Department:** Bioengineering; Mechanical Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Open to bioengineering graduate students or consent of instructor.

This course develops and applies scaling laws and the methods of continuum and statistical mechanics to understand micro- and nano-scale mechanobiological phenomena involved in the living cell with particular attention the nucleus and the cytoskeleton as well as the interactions of the cell with the extracellular matrix and how these interactions may cause changes in cell architecture and biology, consequently leading to functional adaptation or pathological conditions.

Final exam not required. Instructor: Mofrad

BIO ENG C216/MAT SCI C216 Macromolecular Science in Biotechnology and Medicine 4 Units**Department:** Bioengineering; Materials Science and Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Bioengineering 115 or equivalent; open to seniors with consent of instructor.

Overview of the problems associated with the selection and function of polymers used in biotechnology and medicine. Principles of polymer science, polymer synthesis, and structure-property-performance relationships of polymers. Particular emphasis is placed on the performance of polymers in biological environments. Interactions between macromolecular and biological systems for therapy and diagnosis. Specific applications will include drug delivery, gene therapy, tissue engineering, and surface engineering.

Final exam not required. Instructor: Healy

BIO ENG C217/INTEGBI C217/MEC ENG C217 Biomimetic Engineering -- Engineering from Biology 3 Units**Department:** Bioengineering; Integrative Biology; Mechanical Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing in engineering or consent of instructor.

Study of nature's solutions to specific problems with the aim of determining appropriate engineering analogs. Morphology, scaling, and design in organisms applied to engineering structures. Mechanical principles in nature and their application to engineering devices. Mechanical behavior of biological materials as governed by underlying microstructure, with the potential for synthesis into engineered materials. Trade-offs between redundancy and efficiency. Students will work in teams on projects where they will take examples of designs, concepts, and models from biology and determine their potential in specific engineering applications.

Final exam not required. Instructor: Dharan

BIO ENG C218/MCELLBI C237 Stem Cells and Directed Organogenesis 3 Units**Department:** Bioengineering; Molecular and Cell Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/laboratory per week.

This course will provide an overview of basic and applied embryonic stem cell (ESC) biology. Topics will include early embryonic development, ESC laboratory methods, biomaterials for directed differentiation and other stem cell manipulations, and clinical uses of stem cells.

Final exam not required. Instructor: Conboy

BIO ENG C219/CHM ENG C270 Protein Engineering 3 Units**Department:** Bioengineering; Chemical Biomolecular Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

An in-depth study of the current methods used to design and engineer proteins. Emphasis on how strategies can be applied in the laboratory. Relevant case studies presented to illustrate method variations and applications. Intended for graduate students.

Final exam not required. Instructor: Tullman-Ercek

BIO ENG 220L Cells and Biomaterials Laboratory 4 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 6 hours of Laboratory per week for 15 weeks.**Prerequisites:** Cell and tissue engineering; upper division cell biology course or consent of instructor.

The objective of this course is to teach graduate students the essential laboratory techniques in the design and characterization and analysis of cells and biomaterials. The course will cover basics on synthetic biomaterials and native matrix, cellular responses to biomaterials, three-dimensional culture, and tissue engineering. The course includes a lecture and a laboratory section each week. There will be a midterm exam, final exam, and a tissue engineering group project.

Final exam required. Instructor: Li

BIO ENG 221 Advanced BioMEMS and Bionanotechnology 4 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 4.5 hours of Lecture per week for 10 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** Chemistry 3A, Physics 7A and 7B, Electrical Engineering 143 or equivalent.

Biophysical and chemical principles of biomedical devices, bionanotechnology, bionanophotonics, and biomedical microelectromechanical systems (BioMEMS). Topics include basics of nano- & microfabrication, soft-lithography, DNA arrays, protein arrays, electrokinetics, electrochemical transducers, microfluidic devices, biosensor, point of care diagnostics, lab-on-a-chip, drug delivery microsystems, clinical lab-on-a-chip, advanced biomolecular probes, biomolecular spectroscopy, and etc.

Students will receive no credit for 221 after taking 121. Course may be repeated for credit when topic changes. Final exam required. Instructor: L. Lee

BIO ENG 221L BioMEMS and BioNanotechnology Laboratory 4 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Laboratory and 2 hours of Lecture per week for 15 weeks.**Prerequisites:** 102 or 104; 22/22L or Molecular and Cell Biology C100A/ Chemistry C130 or equivalent.

Students will become familiar with BioMEMS and Lab-on-a-Chip research. Students will design and fabricate their own novel micro- or nano-scale device to address a specific problem in biotechnology using the latest micro- and nano-technological tools and fabrication techniques. This will involve an intensive primary literature review, experimental design, and quantitative data analysis. Results will be presented during class presentations and at a final poster symposium.

Final exam not required. Instructors: Dueck, L. Lee

BIO ENG C222/MEC ENG C215 Advanced Structural Aspects of Biomaterials 4 Units**Department:** Bioengineering; Mechanical Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

This course covers the structure and mechanical functions of load bearing tissues and their replacements. Biocompatibility of biomaterials and host response to structural implants are examined. Quantitative treatment of biomechanical issues and constitutive relationships of materials are covered in order to design implants for structural function. Material selection for load bearing applications including reconstructive surgery, orthopedics, dentistry, and cardiology are addressed. Final exam not required.

BIO ENG C223/MEC ENG C223 Polymer Engineering 3 Units**Department:** Bioengineering; Mechanical Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Civil Engineering 130, Engineering 45.

A survey of the structure and mechanical properties of advanced engineering polymers. Topics include rubber elasticity, viscoelasticity, mechanical properties, yielding, deformation, and fracture mechanisms of various classes of polymers. The course will discuss degradation schemes of polymers and long-term performance issues. The class will include polymer applications in bioengineering and medicine. Final exam required.

BIO ENG 231 Introduction to Computational Molecular and Cellular Biology 4 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Topics include computational approaches and techniques to gene structure and genome annotation, sequence alignment using dynamic programming, protein domain analysis, RNA folding and structure prediction, RNA sequence design for synthetic biology, genetic and biochemical pathways and networks, UNIX and scripting languages, basic probability and information theory. Various "case studies" in these areas are reviewed and web-based computational biology tools will be used by students and programming projects will be given.

Students will receive no credit for 231 after taking 131. Final exam required. Instructor: Holmes

BIO ENG 232 Genetic Devices 4 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: Engineering 7 or Computer Science 61A, Mathematics 54, Chemistry 3A, and Chemistry C130/Molecular and Cell Biology C100A. This graduate-level course is a comprehensive survey of genetic devices. These DNA-based constructs are comprised of multiple "parts" that together encode a higher-level biological behavior and perform useful human-defined functions. Such constructs are the engineering target for most projects in synthetic biology. Included within this class of constructs are genetic circuits, sensors, biosynthetic pathways, and microbiological functions.

Students will receive no credit for 232 after taking 132. Final exam not required. Instructor: Anderson

BIO ENG 235 Frontiers in Microbial Systems Biology 4 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: Designed for graduates with background in differential equations and probability. Course work in molecular cell biology or biochemistry helpful.

This course is aimed at graduate and advanced undergraduate students from the (bio) engineering and chemo-physical sciences interested in a research-oriented introduction to current topics in systems biology. Focusing mainly on two well studied microbiological model systems--the chemotaxis network and Lambda bacteriophage infection--the class systematically introduces key concepts and techniques for biological network deduction, modelling, analysis, evolution and synthetic network design. Students analyze the impact of approaches from the quantitative sciences--such as deterministic modelling, stochastic processes, statistics, non-linear dynamics, control theory, information theory, graph theory, etc.--on understanding biological processes, including (stochastic) gene regulation, signalling, network evolution, and synthetic network design. The course aims identify unsolved problems and discusses possible novel approaches while encouraging students to develop ideas to explore new directions in their own research.

Final exam not required. Instructors: Arkin, Bischofs-Pfeifer, Wolf

BIO ENG 241 Probabilistic Modeling in Computational Biology 4 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.

Prerequisites: Mathematics 53 and 54 or equivalent; Molecular and Cell Biology C100A/C102 or equivalent; programming class or consent of instructor.

This course reviews the statistical and algorithmic foundations of bioinformatics viewed through the lens of paleogenetics, the science of "Jurassic Park", i.e., the reconstruction of ancient genes and genomes by reverse Bayesian inference under various stochastic models of molecular evolution. Such methods, first proposed in the 1960s by Linus Pauling (and others), are now in reach of practical experimentation due to the falling cost of DNA synthesis technology. Applications of these methods are granting insight into the origin of life and of the human species, and may be powerful tools of synthetic biology. Lectures will review the theoretical content; homework and laboratory exercises will involve writing and applying programs for computational reconstruction of ancient protein and DNA sequences and other measurably evolving entities, both biological (e.g., gene families) and otherwise (e.g., natural language). Final exam not required. Instructor: Holmes

BIO ENG 243 Computational Methods in Biology 4 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture, 2 hours of Laboratory, and 1 hour of Discussion per week for 15 weeks.

Prerequisites: Mathematics 53 and 54; programming experience preferred but not required.

An introduction to biophysical simulation methods and algorithms, including molecular dynamics, Monte Carlo, mathematical optimization, and "non-algorithmic" computation such as neural networks. Various case studies in applying these areas in the areas of protein folding, protein structure prediction, drug docking, and enzymatics will be covered. Core Specialization: Core B (Informatics and Genomics); Core D (Computational Biology); Bioengineering Content: Biological. Students will receive no credit for 243 after taking 143. Final exam not required. Instructor: Head-Gordon

BIO ENG C244/PLANTBI C244 Introduction to Protein Informatics 4 Units**Department:** Bioengineering; Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This course will introduce students to the fundamentals of molecular biology, and to the bioinformatics tools and databases used for the prediction of protein function and structure. It is designed to impart both a theoretical understanding of popular computational methods, as well as some experience with protein sequence analysis methods applied to real data. This class includes no programming, and no programming background required.

Final exam not required. Instructor: Sjolander

BIO ENG C244L/PLANTBI C244L Protein Informatics Laboratory 2 Units**Department:** Bioengineering; Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Laboratory per week for 15 weeks.

This course is intended to introduce students to a variety of bioinformatics techniques that are used to predict protein function and structure. It is designed to be taken concurrently with C244 (which provides the theoretical foundations for the methods used in the laboratory class), although students can petition to take this laboratory course separately. No programming is performed in this class, and no prior programming experience is required.

Final exam not required. Instructor: Sjolander

BIO ENG C246/PLANTBI C246 Topics in Computational Biology and Genomics 4 Units**Department:** Bioengineering; Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture, 1.5 hours of paper review, and discussion per week.

Prerequisites: Bioengineering 142, Computer Science 61A, or equivalent ability to write programs in Java, Perl, C, or C++; Molecular and Cell Biology 100, 102 or equivalent; or consent of instructor.

Instruction and discussion of topics in genomics and computational biology. Working from evolutionary concepts, the course will cover principles and application of molecular sequence comparison, genome sequencing and functional annotation, and phylogenetic analysis.

Final exam required. Instructors: Brenner, Eisen

BIO ENG 247 Principles of Synthetic Biology 4 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: Math 53 and 54; Molecular and Cell Biology C100A/ Chemistry C130; or consent of instructor.

The field of synthetic biology is quickly emerging as potentially one of the most important and profound ways by which we can understand and manipulate our physical world for desired purposes. In this course, the field and its natural scientific and engineering basis are introduced. Relevant topics in cellular and molecular biology and biophysics, dynamical and engineering systems, and design and operation of natural and synthetic circuits are covered in a concise manner that then allows the student to begin to design new biology-based systems.

Students will receive no credit for 247 after taking 147. Final exam required. Instructor: Arkin

BIO ENG 248 Bioenergy and Sustainable Chemical Synthesis: Metabolic Engineering and Synthetic Biology Approaches 3 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Prerequisites: Chemistry 3A and Molecular and Cell Biology C100A/ Chemistry C130A or equivalent.

This course will cover metabolic engineering and the various synthetic biology approaches for optimizing pathway performance. Use of metabolic engineering to produce biofuels and general "green technology" will be emphasized since these aims are currently pushing these fields. The course is meant to be a practical guide for metabolic engineering and the related advances in synthetic biology as well the related industrial research and opportunities.

Final exam not required. Instructor: Dueber

BIO ENG 251 Micro/Nanofluidics for Bioengineering and Lab-On-A-Chip 4 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: Chemistry 3B, Physics 7B, Bioengineering 102, or Mechanical Engineering 106 or consent of instructor.

Introduction and in-depth treatment of theory relevant to fluid flow in microfluidic and nanofluidic systems supplemented by critical assessment of recent applications drawn from the literature. Topics include low Reynolds Number flow, mass transport including diffusion phenomena, and emphasis on electrokinetic systems and bioanalytical applications of said phenomena.

Students will receive no credit for 251 after taking 151. Final exam required. Instructor: Herr

BIO ENG 263 Principles of Molecular and Cellular Biophotonics 4 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 102 or consent of instructor, and Chemistry 3A and Physics 7B.

Topics in the emerging field of biophotonics with an emphasis on fluorescence spectroscopy, biosensors, and devices for optical imaging and detection of biomolecules. The course will cover the photophysics and photochemistry of organic molecules, the design and characterization of biosensors, and their applications within diverse environments, ranging from the detection of single molecules in vitro and in cells to studies of detection, diagnosis, and monitoring of specific health conditions and disease.

Students will receive no credit for 263 after taking 163. Final exam required. Instructor: Marriott

BIO ENG 263L Molecular and Cellular Biophotonics Laboratory 4 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Laboratory and 2 hours of Discussion per week for 15 weeks.**Prerequisites:** 263; experience in a research lab and consent of instructor.

This course provides undergraduate and graduate bioengineering students with an opportunity to acquire essential experimental skills in fluorescence spectroscopy and the design, evaluation, and optimization of optical biosensors for quantitative measurements of proteins and their targets. Groups of students will be responsible for the research, design, and development of a biosensor or diagnostic device for the detection, diagnosis, and monitoring of a specific biomarker(s).

Students will receive no credit for 263L after taking 163L. Final exam not required. Instructor: Marriott

BIO ENG C265/EL ENG C225E Principles of Magnetic Resonance Imaging 4 Units**Department:** Bioengineering; Electrical Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 3 hours of laboratory and 1 hour of discussion per week.**Prerequisites:** Either Electrical Engineering 120 or Bioengineering C165/ Electrical Engineering C145B or consent of instructor.

Fundamentals of MRI including signal-to-noise ratio, resolution, and contrast as dictated by physics, pulse sequences, and instrumentation. Image reconstruction via 2D FFT methods. Fast imaging reconstruction via convolution-back projection and gridding methods and FFTs. Hardware for modern MRI scanners including main field, gradient fields, RF coils, and shim supplies. Software for MRI including imaging methods such as 2D FT, RARE, SSFP, spiral and echo planar imaging methods.

Course Objectives: Graduate level understanding of physics, hardware, and systems engineering description of image formation, and image reconstruction in MRI. Experience in Imaging with different MR Imaging systems. This course should enable students to begin graduate level research at Berkeley (Neuroscience labs, EECS and Bioengineering), LBNL or at UCSF (Radiology and Bioengineering) at an advanced level and make research-level contribution

Students will receive no credit for Bioengineering C265/EI Engineering C225E after taking EI Engineering 265. Final exam not required.

Instructors: Lustig, Conolly

BIO ENG C279/PB HLTH C269C Occupational Biomechanics 4 Units**Department:** Bioengineering; Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/fieldwork per week.

Overview of ergonomics and occupational biomechanics. Course covers pathophysiology and risk factors of upper extremity and back loading at work, measurement of force and posture, models for risk assessment, anthropometry applied to task and workstation design, tool design, and structure of successful ergonomics programs. Students will conduct a detailed job analysis and design a workplace intervention.

Final exam required. Instructor: Rempel

BIO ENG 280 Ethical and Social Issues in Translational Medicine 1 Unit**Department:** Bioengineering**Course level:** Graduate**Term course may be offered:** Fall**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Prerequisites:** Open only to students in the Masters of Translational Medicine Graduate program.

This class is designed to introduce MTM students to their professional responsibilities

as engineers and translational scientists. By the end of it, students will have

experience communicating their ideas appropriately and effectively to their peers,

their superiors, and those whom they manage or mentor. We will also discuss

methods for having a successful graduate school experience - choosing and working

on a project and preparing to meet post-graduate goals. Finally, some of the ethical

challenges likely to be met by a working bioengineer will be explored.

While this syllabus is meant to be an accurate description of the course and its content,

it may be modified at the instructor's discretion.

Course Objectives: Objectives

? Communications skills and best practices

? Research ethics in translational medicine

? Professional development for MTM graduate students

Student Learning Outcomes: MTM students will become aware of ethical issues commonly confronted in

translational medicine and learn how to evaluate and act accordingly.

They will also

leave capable of independently considering new ethical issues that arise during their

careers.

Final exam not required. Instructors: Johnson, Terry

BIO ENG C280/MAT SCI C261/NSE C201/PHYSICS C201 Introduction to Nano-Science and Engineering 3 Units**Department:** Bioengineering; Materials Science and Engineering;

Nanoscale Science and Engineering; Physics

Course level: Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Major in physical science such as chemistry, physics, etc., or engineering; consent of advisor or instructor.

A three-module introduction to the fundamental topics of Nano-Science and Engineering (NSE) theory and research within chemistry, physics, biology, and engineering. This course includes quantum and solid-state physics; chemical synthesis, growth fabrication, and characterization techniques; structures and properties of semiconductors, polymer, and biomedical materials on nanoscales; and devices based on nanostructures. Students must take this course to satisfy the NSE Designated Emphasis core requirement.

Course may be repeated for credit when topic changes. Final exam not required. Instructors: Gronsky, S.W. Lee, Wu

BIO ENG C281/CHEM C238/CHM ENG C295A/PLANTBI C224 The Berkeley Lectures on Energy: Energy from Biomass 3 Units**Department:** Bioengineering; Chemical Biomolecular Engineering; Chemistry; Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Biology 1A; Chemistry 1B or 4B, Mathematics 1B.

After an introduction to the different aspects of our global energy consumption, the course will focus on the role of biomass. The course will illustrate how the global scale of energy guides the biomass research. Emphasis will be places on the integration of the biological aspects (crop selection, harvesting, storage, and distribution, and chemical composition of biomass) with the chemical aspects to convert biomass to energy. The course aims to engage students in state-of-art research.

Repeatable when topic changes with consent of instructor. Final exam not required. Instructors: Bell, Blanch, Clark, Smit, C. Somerville

BIO ENG 290A Advanced Topics in Bioengineering: Advanced Topics in Biomechanics and Tissue Engineering 1 - 3 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 3 hour of Lecture per week for 15 weeks.

This course covers current topics of research interest in bioengineering.

The course content may vary from semester to semester.

Course may be repeated for credit when topic changes. One hour of lecture per week per unit. Final exam not required.

BIO ENG C290D/MEC ENG C290X Advanced Technical Communication: Proposals, Patents, and Presentations 3 Units**Department:** Bioengineering; Mechanical Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course will help the advanced Ph.D. student further develop critically important technical communication traits via a series of lectures, interactive workshops, and student projects that will address the structure and creation of effective research papers, technical reports, patents, proposals, business plans, and oral presentations. One key concept will be the emphasis on focus and clarity--achieved through critical thinking regarding objectives and context. Examples will be drawn primarily from health care and bioengineering multidisciplinary applications.

Final exam not required. Instructors: Keaveny, Pruitt

BIO ENG 290D Advanced Topics in Bioengineering: Advanced Topics in Computational Bioengineering 1 - 3 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 3 hour of Lecture per week for 15 weeks.

This course covers current topics of research interest in bioengineering.

The course content may vary from semester to semester.

Course may be repeated for credit when topic changes. One hour of lecture per week per unit. Final exam not required.

BIO ENG 290H Advanced Topics in Bioengineering: Advanced Topics in Biomedical Systems Engineering 1 - 3 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 3 hour of Lecture per week for 15 weeks.

This course covers current topics of research interest in bioengineering.

The course content may vary from semester to semester.

Course may be repeated for credit when topic changes. One hour of lecture per week per unit. Final exam not required.

BIO ENG 290I Advanced Topics in Bioengineering: Advanced Topics in Special Topics in Bioengineering 1 - 3 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 3 hour of Lecture per week for 15 weeks. 1.5 to 4.5 hours of Lecture per week for 10 weeks. 1.5 to 5.5 hours of Lecture per week for 8 weeks. 2.5 to 7.5 hours of Lecture per week for 6 weeks. This course covers current topics of research interest in bioengineering. The course content may vary from semester to semester.

Course may be repeated for credit when topic changes. One hour of lecture per week per unit. Final exam not required.

BIO ENG 296 MTM Capstone Project 3 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Prerequisites:** Graduate status in the MTM program

Members of the MTM Program Committee will help design several capstone projects in collaboration with clinical, academic, and/or industry partners, aiming to incorporate emerging technologies, industry requirements, and the potential for significant economic or social impact with regard to medicine and health care. All projects will be designed and vetted by the MTM Program Committee and in consultation with the MTM Advisory Board. For each selected project, an Academic Senate member from the Department of Bioengineering or BTS will serve as research adviser.

Course Objectives: The objective of the one year professional MTM program is to develop engineering leaders who can synthesize the technical, environmental, economic, and social issues involved in the design and operation of complex engineering devices, systems, and organizations. Students will develop and demonstrate this skill at synthesis through the capstone project.

Student Learning Outcomes: Projects will provide practical instruction and experience in solving real problems in translational medicine, and it is anticipated that some will lead to innovations with commercial potential. This experience, undertaken by each student as a member of a team and marked by extensive interaction with faculty, peers, and industry partners, enables the student to integrate the leadership and technical dimensions of the professional MTM curriculum.

Course may be repeated for credit when topic changes. Final exam not required. Instructors: Li, Song

BIO ENG 298 Group Studies, Seminars, or Group Research 1 - 8 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 8 hour of Directed group study per week for 15 weeks.

Advanced studies in various subjects through special seminars on topics to be selected each year. Informal group studies of special problems, group participation in comprehensive design problems, or group research on complete problems for analysis and experimentation.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

BIO ENG 299 Individual Study or Research 1 - 12 Units**Department:** Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks.**Prerequisites:** Graduate standing.

Investigations of advanced problems in bioengineering.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

BIO ENG N299 Individual Study or Research 1 - 6 Units**Department:** Bioengineering**Course level:** Graduate**Term course may be offered:** Summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 6 hours of work per week per unit for 8 weeks. 8 hours of work per week per unit for 6 weeks.**Prerequisites:** Graduate standing.

Investigations of advanced problems in bioengineering.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

BIO ENG 301 Teaching Techniques for Bioengineering 1 Unit**Department:** Bioengineering**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of Seminar per week for 15 weeks.**Prerequisites:** Graduate standing.

Weekly seminars and discussions of effective teaching techniques. Use of educational objectives, alternative forms of instruction, and special techniques for teaching key concepts and techniques in bioengineering. Course is intended to orient new graduate student instructors to teaching in the Bioengineering department at Berkeley.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Johnson

Biology (BIOLOGY)

BIOLOGY 1A General Biology Lecture 3 Units

Department: Biology

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 8 weeks.

Prerequisites: Chemistry 1A and 1AL or equivalent with grade of C- or higher, or a 4 or 5 score on the Chemistry AP test; Chemistry 3A or 112A recommended; Biology 1AL must be taken concurrently (unless exempt by major).

General introduction to cell structure and function, molecular and organismal genetics, animal development, form and function. Intended for biological sciences majors, but open to all qualified students.

1B may be taken before 1A. Final exam required.

BIOLOGY 1AL General Biology Laboratory 2 Units

Department: Biology

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1.5 hours of Lecture and 3 hours of Laboratory per week for 15 weeks. 3 hours of Lecture and 6 hours of Laboratory per week for 8 weeks.

Prerequisites: 1A must be taken concurrently.

Laboratory that accompanies 1A lecture course. Intended for biological science majors, but open to all qualified students.

Final exam not required.

BIOLOGY 1B General Biology 4 Units

Department: Biology

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture, 3 hours of Laboratory, and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture, 6 hours of Laboratory, and 2 hours of Discussion per week for 8 weeks.

General introduction to plant development, form, and function; population genetics, ecology, and evolution. Intended for students majoring in the biological sciences, but open to all qualified students. Students must take both Biology 1A and 1B to complete the sequence. Sponsored by Integrative Biology.

Final exam required.

BIOLOGY 11 Introduction to the Science of Living Organisms 3 Units

Department: Biology

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: For students not majoring in a biological science and for non-science majors.

Principles of biological organization and function using examples from plant and animal kingdoms. Similar in scope to Biology 1 except that knowledge of physical sciences is neither required nor assumed. Sponsored by Plant and Microbial Biology.

Students will receive no credit for 11 after receiving credit for both Integrative Biology 15 and 30. Final exam required. Instructors: Jones, Quail

BIOLOGY 11L Laboratory for Biology 11 2 Units

Department: Biology

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Laboratory and 1 hour of Discussion per week for 15 weeks.

Prerequisites: Must be taken concurrently with Biology 11.

Laboratory designed to accompany Biology 11, Introduction to the Science of Living Organisms. Weekly laboratory exercises and one field trip to the UC Berkeley Botanical Garden.

Final exam required. Instructors: Jones, Quail

Biophysics (BIOPHY)

BIOPHY H196 Honors Research in Biophysics 4 Units

Department: Biophysics

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

Hours and format: 4 hours of Independent study per week for 15 weeks.

Prerequisites: Upper division standing; minimum GPA 3.2; consent of instructor.

Supervised independent honors research on topics specific to biophysics, followed by brief written report and presentation at year-end student research colloquium.

Course may be repeated for a maximum of 12 units. Course may be repeated for a maximum of 12 units. Final exam not required.

BIOPHY 292 Research 3 - 12 Units

Department: Biophysics

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Offered for satisfactory/unsatisfactory grade only.

Hours and format: Laboratory research, conference.

Prerequisites: Consent of instructor.

Individual research under the supervision of a faculty member.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

BIOPHY 293A Research Seminar: Faculty Evening Research Presentations (FERPS) and Student Evening Research Presentations (SERPS) 2 Units

Department: Biophysics

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Offered for satisfactory/unsatisfactory grade only. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 2 hours of Seminar per week for 15 weeks.

Prerequisites: 292

Seminar on presentation and evaluation of results in area of student's individual research interests.

Final exam not required.

BIOPHY 293B Research Seminar: Faculty Evening Research Presentations (FERPS) and Student Evening Research Presentations (SERPS) 2 Units

Department: Biophysics

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Offered for satisfactory/unsatisfactory grade only. This is part two of a year long series course. Upon completion, the final grade will be applied to both parts of the series.

Hours and format: 2 hours of Seminar per week for 15 weeks.

Prerequisites: 293A, and 292.

Seminar on presentation and evaluation of results in area of student's individual research interests.

Final exam not required.

Catalan (CATALAN)

CATALAN 101 Catalan for Advanced Students 3 Units

Department: Catalan

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Credit for 16-20 units or equivalent of another Romance language, or consent of instructor.

An intensive course for students with no previous study of Catalan.

Final exam required.

Celtic Studies (CELTIC)

CELTIC R1A Voices of the Celtic World 4 Units

Department: Celtic Studies

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks. 10 hours of Lecture per week for 6 weeks.

Prerequisites: UC Entry Level Writing Requirement or equivalent; R1A or equivalent is prerequisite to R1B.

Reading and composition course based on works of Celtic writers both in English and in translations from Celtic languages. In addition to training in textual analysis and descriptive and argumentative writing, the courses will discuss the notion of Celtic "voices": distinctive modes of cultural expression chosen by important authors from a Celtic milieu. Readings will be chosen from a variety of modern Irish, Welsh, highland Scots, and Breton writers. R1A satisfies the first half of the Reading and Composition requirement, and R1B satisfies the second half.

Satisfies the first half of the Reading and Composition requirement

Final exam not required. Formerly known as 1A-1B.

CELTIC R1B Voices of the Celtic World 4 Units

Department: Celtic Studies

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks. 10 hours of Lecture per week for 6 weeks.

Prerequisites: R1A or equivalent.

Reading and composition course based on works of Celtic writers both in English and in translations from Celtic languages. In addition to training in textual analysis and descriptive and argumentative writing, the courses will discuss the notion of Celtic "voices": distinctive modes of cultural expression chosen by important authors from a Celtic milieu. Readings will be chosen from a variety of modern Irish, Welsh, highland Scots, and Breton writers. R1A satisfies the first half of the Reading and Composition requirement, and R1B satisfies the second half.

Satisfies the second half of the Reading and Composition requirement

Final exam not required. Formerly known as 1B.

CELTIC 10 Intensive Modern Irish 8 Units

Department: Celtic Studies

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 15 hours of Lecture and 5 hours of Laboratory per week for 8 weeks.

The course provides the equivalent of two semesters of Irish (Gaelic).

It emphasizes communication on everyday topics and the reading of 20th-century texts in Irish. Instruction includes grammar, drills, language laboratory.

Final exam required. Instructor: Nugent

CELTIC 15 Elementary Modern Irish 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of language instruction and 1 hour of laboratory per week.

A beginning course in Modern Irish. Students will be learning the basics of Irish grammar, and developing ability to understand, speak, read and write the language.

Final exam required.

CELTIC S15F Modern Irish Language: Field Study Intensive 2 Units**Department:** Celtic Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 hour am in10sive, 3 hour pm in10sive Irish language spoken every day for 2 weeks.**Prerequisites:** 5A and 5B.

Students will be required to speak the native traditional Irish language exclusively while living in the University College, Cork's Hostel for a two week period. Daily instruction includes required reading material, a written journal, and tutorial sessions. This course is optional; not required.

Final exam not required. Instructor: O'Hehir

CELTIC 16 Introduction to Modern Welsh 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of language instruction and 1 hour of laboratory per week.

Introduction to modern Welsh conversation and grammar. Emphasis in the first-semester class is on pronunciation, mastering consonant mutations, using several tenses (present, perfect, imperfect, past), and the acquisition of basic vocabulary and idiom. Simple written materials based on traditional Welsh stories will supplement classroom oral-aural work.

Final exam required. Instructors: Klar, Rejhon

CELTIC 70 The World of the Celts 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks. An overview of the history of Celtic-speaking peoples from Indo-European times, including linguistic/archaeological evidence for the emergence of the Celtic language group in 1st millennium B.C. Europe. Celtic religion and comparative Indo-European mythology. Discussion of the validity of classical reports of the Celtic culture. Celtic tribal migrations in the historical period; the foundation of Brittany. The decline and suppression of modern Celtic languages; Celts in the New World.

Final exam required. Instructor: Melia

CELTIC 85 Intermediate Modern Irish 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours language instruction and 1 hour of laboratory per week.**Prerequisites:** 15; or 5 and 75.

The second semester of Modern Irish. Continuing instruction in speaking, comprehension, reading and writing skills. By the end of this semester, students will have become acquainted with all of the central grammatical constructions of Irish, and will be ready to begin reading accessible Irish prose.

Final exam required.

CELTIC 86 Intermediate Modern Welsh 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of language instruction and 1 hour of laboratory per week.**Prerequisites:** 16; or 6 and 76 or consent of instructor.

Continuation of Celtic Studies 16, emphasizing progress in conversation, grammar, and idiom. Using tenses previously learned, students will learn how to ask and answer many types of questions and will learn conjugated prepositions and idiomatic uses of prepositions. Future and conditional tenses and simple relative clauses will be introduced. Level-appropriate written materials will supplement class work, and students will begin learning about Welsh culture as they learn the language.

Final exam required. Formerly known as 6B. Instructors: Klar, Rejhon

CELTIC 98 Directed Group Study 1 - 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Hours to be arranged.**Prerequisites:** Freshman or sophomore standing.

Group study of selected topics not covered by regularly scheduled courses.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CELTIC 99 Supervised Independent Study and Research 1 - 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Individual conferences.**Prerequisites:** Freshman and Sophomore standing and consent of instructor.

Directed individual study on special topics approved by Celtic Studies. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CELTIC 105A Old and Middle Irish 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 5 and 75 or consent of instructor.

A detailed introduction to the orthography, phonology and grammar of Old Irish designed to provide the student with the subsequent capacity to read with comprehension and to translate (with the aid of dictionary or glossary) any edited text in Old Irish or Middle Irish. Final exam required.

CELTIC 119A Welsh and Arthurian Literature of the Middle Ages 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

A selective study of major surviving works of Welsh prose and poetry of the Middle Ages, with special attention to the development of the legendary history of King Arthur in Europe. All work will be read in English, but course will be coordinated with 106A-106B for those who wish to do some of the readings in Welsh.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

CELTIC 119B Welsh and Arthurian Literature of the Middle Ages 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

A selective study of major surviving works of Welsh prose and poetry of the Middle Ages, with special attention to the development of the legendary history of King Arthur in Europe. All work will be read in English, but course will be coordinated with 106A-106B for those who wish to do some of the readings in Welsh.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

CELTIC 125 Irish Literature in Translation 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

A selective study of key themes in modern Irish literature. Texts will include novels, short stories, and poetry and will concentrate on translations of works originally written in Irish. All work will be read in English, but the course will be coordinated with 75 or 115A-115B for those who wish to do some of the reading in Irish.

Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam required. Formerly known as 125A-125B.

CELTIC 128 Medieval Celtic Culture 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

A study of medieval Celtic culture, its society, laws, religion, history, and the daily life of the Celtic peoples, as they are reflected in a selection of texts ranging from medieval literary works to legal texts and historical chronicles. All works will be read in English translation.

Final exam required. Instructor: Rejohn

CELTIC 129 Aspects of Modern Celtic Cultures and Folklore 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

A comparative introduction to modern Celtic cultures: principally Irish, Welsh, Scottish Gaelic and Breton. The development of the distinctive cultures of the Celtic "nations without states" from 1500 to the present; an examination of the role of minority cultures and minority languages in larger political cultural entities. Theme topics will vary, but will include folklore, nationalism and linguistic history from time to time.

Course may be repeated for credit as topic varies. Course may be repeated for a maximum of 6 units. Final exam required.

CELTIC 138 Irish Literature 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Gaelic literature 700-1800 (in translation). Study of the prose sagas, cycles, satire, classical lyric poetry, and bardic poetry, developing the mythological and traditional background of modern Irish literature. Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam required.

CELTIC 139 Irish Literature 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Irish literature 1800 to the present.

Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam required.

CELTIC 144A Modern Welsh Level 3 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** 16 and 86 or consent of instructor.

This course continues the Celtic Studies 16-86 sequence. Advanced grammatical concepts are introduced and vocabulary building (especially idioms) is emphasized. Students read materials such as magazines, newspapers, catalogues, and popular novels. Regular language laboratory attendance is required.

Final exam required.

CELTIC 144B Modern Welsh Level 4 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** 144A or consent of instructor.

This course continues the Celtic Studies 16-86-144A sequence. Emphasis is on mastering the fine details of Welsh grammar (including prepositional idioms), accent reduction, and acquiring conversational ease. Dialect information is introduced. Supplementary reading will introduce students to the standard literary languages; brief compositional exercises will be based on this material.

Final exam required.

CELTIC 145A Intermediate Irish Language 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.**Prerequisites:** Two semesters Irish language or consent of instructor.

The third level course in modern spoken Irish designed for students who have completed two semesters of formal instruction. Continued stress on vocabulary building and reading of texts with intensive conversation drills to activate the learned vocabulary. Idiomatic usage will be reinforced in both oral and written exercises. Class activities will include conversation and discussion of assigned texts in Irish.

Final exam required.

CELTIC 145B Modern Irish Level Four 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** 145A or consent of instructor.

The fourth semester of Modern Irish. Readings in Irish literature will be a major focus of the curriculum, but will also be accompanied by advanced grammatical instruction and conversational practice.

Final exam required.

CELTIC 146A Medieval Welsh Language and Literature 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Selected works of medieval Welsh prose and poetry are read in Middle Welsh. Grammar instruction and in-class translations accompany lectures on important themes in medieval Welsh literature.

Final exam required. Instructors: Klar, Rejhon

CELTIC 146B Medieval Welsh Language and Literature 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 106A or consent of instructor.

A selection of medieval Welsh prose and poetry is read in Middle Welsh in conjunction with lectures on key themes in medieval Welsh literature and tradition.

Final exam required. Instructors: Klar, Rejhon

CELTIC 161 Celtic Linguistics 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.**Prerequisites:** Prior acquaintance with at least one Celtic language, consent of instructor.

Topics in the linguistics of the Celtic languages. Likely subject matters include synchronic structure of a Celtic language or languages, history of the Celtic language family, philology and paleography of older Celtic texts, sociolinguistics of the modern Celtic languages, linguistic characteristics of Celtic poetic, and oral traditional literature.

Final exam required. Formerly known as 145.

CELTIC C168/RELIGST C109 Celtic Mythology and Oral Tradition 4 Units**Department:** Celtic Studies; Religious Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The course will introduce students to the pre-Christian beliefs of the Celtic and Indo-European worlds, to the historical narratives in which such beliefs are embedded, and to the methodology of investigating ancient and medieval belief systems.

Final exam required.

CELTIC 170 Topics in Celtic Studies 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** Completion of reading and composition 1A-1B or equivalents; consent of instructor.

Topics in this course will be offerings on areas of Celtic language and culture which are not covered in other Celtic studies courses. Topics might include (but would not be limited to) the Celtic romantic tradition, the Celt in films, Celtic art, nationalist politics in Celtic regions, and current trends in Celtic research.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

CELTIC N170 Topics in Celtic Studies 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture and 3 hours of Laboratory per week for 6 weeks.**Prerequisites:** Completion of reading and composition 1A-1B or equivalents; consent of instructor.

Topics in this course will be offerings on areas of Celtic language and culture which are not covered in other Celtic studies courses. Topics might include (but would not be limited to) the Celtic romantic tradition, the Celt in films, Celtic art, nationalist politics in Celtic regions, and current trends in Celtic research.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

CELTIC 171 Celtic Romanticism 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

From the Classical age to the 21st century, Celts have fascinated people. This course explores the different ways in which Celtic peoples have been perceived by outsiders, and the ways in which Celts have presented themselves to the world. The recurring themes of freedom and independence, as well as the warrior and druid types, are stressed. The course also explores the ways in which the Romantic idealizations of Celts have been appropriated by native nationalist political movements and by European imperialist ventures. All readings in English.

Final exam required. Instructor: Klar

CELTIC 173 Celtic Christianity 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course considers the evidence for the presence of early Christian believers in the so-called "Celtic" areas of western Europe. Students will examine how the Celtic peoples received Christianity in the context of native (pagan) religion; they will look specifically at how the Roman Church doctrine influenced the doctrinal stands of the early Celtic church(es), and vice versa, with particular attention to the Pelagian controversy, the date of Easter, the monastic tonsure, and the use of penitentials. The period covered is approximately 70 CE to 800 CE.

Final exam required. Instructor: Klar

CELTIC H195A Honors Course 3 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Independent study.**Prerequisites:** Open only to honors seniors in the group major in Celtic Studies.

Course may take one or two semesters at the option of the instructor and student with credit to be earned upon completion of a successful thesis. Successful completion of the course will normally, but not necessarily, mean the awarding of honors.

Final exam not required.

CELTIC H195B Honors Course 3 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part two of a year long series course. Upon completion, the final grade will be applied to both parts of the series.**Hours and format:** Independent study.**Prerequisites:** Open only to honors seniors in the group major in Celtic Studies.

Course may take one or two semesters at the option of the instructor and student with credit to be earned upon completion of a successful thesis. Successful completion of the course will normally, but not necessarily, mean the awarding of honors.

Final exam not required.

CELTIC 198 Directed Group Study 1 - 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Group conferences.**Prerequisites:** 60 units and in good academic standing.

Directed group study on special topics approved by Celtic Studies.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CELTIC 199 Supervised Independent Study and Research 1 - 4 Units**Department:** Celtic Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Individual conferences.**Prerequisites:** 60 units and in good academic standing.

Directed individual study on special topics approved by Celtic Studies.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Chemical & Biomolecular Engineering (CHM ENG)

CHM ENG 24 Freshman Seminars 1 Unit**Department:** Chemical & Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of Seminar per week for 15 weeks.

The Berkeley Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Berkeley Seminars are offered in all campus departments, and topics vary from department to department and semester to semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

CHM ENG 40 Introduction to Chemical Engineering Design 2 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hours of lecture and 1 hour of discussion per week.**Prerequisites:** Mathematics 1A, which may be taken concurrently.

Design and analysis of processes involving chemical change. Strategies for design, such as creative thinking and (re)definition of the design goal. Methods for analyzing designs, such as mathematical modeling, empirical analysis by graphics, and dynamic scaling by dimensional analysis. Design choices in light of process efficiency, product quality, economics, safety, and environmental issues.

Final exam required.

CHM ENG 84 Sophomore Seminar 1 or 2 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.

Hours and format: 1 hour of seminar per week per unit for 15 weeks. 1 and 1 half hours of seminar per week per unit for 10 weeks. 2 hours of seminar per week per unit for 8 weeks. 3 hours of seminar per week per unit for 5 weeks.

Prerequisites: At discretion of instructor.

Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

CHM ENG 90 Science and Engineering of Sustainable Energy 3 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Chemistry 1A or 4A.

An introduction is given to the science and technologies of producing electricity and transportation fuels from renewable energy resources (biomass, geothermal, solar, wind, and wave). Students will be introduced to quantitative calculations and comparisons of energy technologies together with the economic and political factors affecting the transition from nonrenewable to sustainable energy resources. Mass and energy balances are used to analyze the conversion of energy resources.

Final exam required. Instructors: Bell, Segalman

CHM ENG 98 Directed Group Studies for Lower Division Undergraduates 1 - 3 Units

Department: Chemical & Biomolecular Engineering

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

Hours and format: 1 hour of work per week per unit.

Prerequisites: Consent of instructor.

Supervised research on a specific topic.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

CHM ENG 140 Introduction to Chemical Process Analysis 4 Units

Department: Chemical & Biomolecular Engineering

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: Chemistry 4B or 1B with a grade of C- or better; and Physics 7B (may be taken concurrently).

Material and energy balances applied to chemical process systems.

Determination of thermodynamic properties needed for such calculations.

Sources of data. Calculation procedures.

Final exam required.

CHM ENG 141 Chemical Engineering Thermodynamics 4 Units

Department: Chemical & Biomolecular Engineering

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: 140 with a grade of C- or higher; Engineering 7, which may be taken concurrently.

Thermodynamic behavior of pure substances and mixtures. Properties of solutions, phase equilibria. Thermodynamic cycles. Chemical equilibria for homogeneous and heterogeneous systems.

Final exam required.

CHM ENG 142 Chemical Kinetics and Reaction Engineering 4 Units

Department: Chemical & Biomolecular Engineering

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: 141 with a grade of C- or higher; 150B, which may be taken concurrently.

Analysis and prediction of rates of chemical conversion in flow and nonflow processes involving homogeneous and heterogeneous systems. Final exam required.

CHM ENG 150A Transport Processes 4 Units

Department: Chemical & Biomolecular Engineering

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: 140 with a grade of C- or higher; Math 54, which may be taken concurrently.

Principles of fluid mechanics and heat transfer with application to chemical processes. Laminar and turbulent flow in pipes and around submerged objects. Flow measurement. Heat conduction and convection; heat transfer coefficients.

Final exam required.

CHM ENG 150B Transport and Separation Processes 4 Units

Department: Chemical & Biomolecular Engineering

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: Chemical and Biomolecular Engineering 141 with a grade of C- or higher; Chemical and Biomolecular Engineering 150A with a grade of C- or higher; Engineering 7.

Principles of mass transfer with application to chemical processes.

Diffusion and convection. Simultaneous heat and mass transfer; mass transfer coefficients. Design of staged and continuous separations processes.

Final exam required.

CHM ENG 154 Chemical Engineering Laboratory 4 Units

Department: Chemical & Biomolecular Engineering

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1 hour of Lecture and 8 hours of Laboratory per week for 15 weeks.

Prerequisites: Chemical and Biomolecular Engineering 141, 142, 150B, and 185.

Experiments in physical measurements, fluid mechanics, heat and mass transfer, kinetics, and separation processes. Emphasis on investigation of basic relationships important in engineering. Experimental design, analysis of results, and preparation of engineering reports are stressed. Final exam required.

CHM ENG 160 Chemical Process Design 4 Units

Department: Chemical & Biomolecular Engineering

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of lecture and 3 hours of laboratory and 1 hour of discussion per week.

Prerequisites: Chemical and Biomolecular Engineering 142, 150B, and 154

Design principles of chemical process equipment. Design of integrated chemical processes with emphasis upon economic considerations.

Final exam required.

CHM ENG 162 Dynamics and Control of Chemical Processes 4 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 1 hour of computer laboratory per week.**Prerequisites:** Chemical and Biomolecular Engineering 142 and 150B; Mathematics 53 and 54.

Analysis of the dynamic behavior of chemical processes and methods and theory of their control. Implementation of computer control systems on process simulations.

Final exam required.

CHM ENG 170A Biochemical Engineering 3 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.**Prerequisites:** Chemical and Biomolecular Engineering 142, 150B, or consent of instructor; Biology 1A.

This course intends to introduce chemical engineers to the basic concepts of biochemical engineering. The course focuses on the use of chemical engineering skills and principles in the analysis and design of biologically-based processes. The main emphasis will be on biochemical kinetics, heat and mass transfer, thermodynamics, and transport phenomena as they apply to enzyme catalysis, microbial growth and metabolism, fermentation and bioreactor design, product recovery and downstream processing. Fundamental topics in biological sciences will be introduced as necessary throughout the course.

Final exam required. Instructor: Clark

CHM ENG 170B Biochemical Engineering 3 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 170A: Chemistry 135 or Molecular and Cell Biology 102, which may be taken concurrently.

The second of a two-semester sequence intended to introduce chemical engineers to the basic concepts of biochemical engineering. The course focuses on the use of chemical engineering skills and principles in the analysis and design of biologically-based processes. The emphasis will be on biochemical kinetics, protein engineering, cell growth and metabolism, bioreactor design, downstream processing, pharmacokinetics, drug delivery, and ethics.

Final exam required. Formerly known as 170. Instructor: Clark

CHM ENG C170L/CHEM C170L Biochemical Engineering Laboratory 3 Units**Department:** Chemical Engineering; Chemical Biomolecular Engineering; Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Laboratory and 1 hour of Lecture per week for 15 weeks.**Prerequisites:** Chemical Engineering 170A (may be taken concurrently) or consent of instructor.

Laboratory techniques for the cultivation of microorganisms in batch and continuous reactions. Enzymatic conversion processes. Recovery of biological products.

Final exam required.

CHM ENG 171 Transport Phenomena 3 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 150B.

Study of momentum, energy, and mass transfer in laminar and turbulent flow.

Final exam required.

CHM ENG 176 Principles of Electrochemical Processes 3 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Chemical and Biomolecular Engineering 141, 142, and 150B.

Principles and application of electrochemical equilibria, kinetics, and transport processes. Technical electrolysis and electrochemical energy conversion.

Final exam required.

CHM ENG C178/CHEM C178 Polymer Science and Technology 3 Units**Department:** Chemical Engineering; Chemical Biomolecular Engineering; Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/laboratory per week.**Prerequisites:** Junior standing.

An interdisciplinary course on the synthesis, characterization, and properties of polymer materials. Emphasis on the molecular origin of properties of polymeric materials and technological applications. Topics include single molecule properties, polymer mixtures and solutions, melts, glasses, elastomers, and crystals. Experiments in polymer synthesis, characterization, and physical properties.

Final exam required. Instructor: Segalman

CHM ENG 179 Process Technology of Solid-State Materials Devices 3 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/laboratory per week.**Prerequisites:** Engineering 45; one course in electronic circuits recommended; senior standing.

Chemical processing and properties of solid-state materials. Crystal growth and purification. Thin film technology. Application of chemical processing to the manufacture of semiconductors and solid-state devices. Final exam required.

CHM ENG 180 Chemical Engineering Economics 3 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.**Prerequisites:** Chemical and Biomolecular Engineering 142 and 150B, both of which may be taken concurrently. Consent of instructor.

Optimal design of chemical processes and unit operations, emphasizing the interactions between technical and economic considerations. Analysis of process risks. Chemical and biomolecular process design in the presence of uncertainties. Interest rate determinants and their effects on chemical process feasibility and choices. Relationships between structure and behavior of firms in the chemical processing industries. Multivariable input-output analyses.

Final exam required.

CHM ENG 185 Technical Communication for Chemical Engineers 3 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 140; English R1A or equivalent; consent of instructor.

Development of technical writing and oral presentation skills in formats commonly used by chemical engineers.

Course may be repeated for credit when topic changes. Final exam not required.

CHM ENG H194 Research for Advanced Undergraduates 2 - 4 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences.**Prerequisites:** Minimum GPA of 3.4 overall at Berkeley and consent of instructor.

Original research under direction of one of the members of the staff.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHM ENG 195 Special Topics 2 - 4 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences.**Prerequisites:** Consent of instructor.

Lectures and/or tutorial instruction on special topics.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

CHM ENG C195A/BIO ENG C181/CHEM C138/PLANTBI C124 The Berkeley Lectures on Energy: Energy from Biomass 3 Units**Department:** Chemical Engineering; Bioengineering; Chemical Biomolecular Engineering; Chemistry; Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Chemistry 1B or Chemistry 4B, Mathematics 1B, Biology 1A.

After an introduction to the different aspects of our global energy consumption, the course will focus on the role of biomass. The course will illustrate how the global scale of energy guides the biomass research. Emphasis will be placed on the integration of the biological aspects (crop selection, harvesting, storage and distribution, and chemical composition of biomass) with the chemical aspects to convert biomass to energy. The course aims to engage students in state-of-the-art research. Repeatable when topic changes with consent of instructor. Final exam required. Instructors: Bell, Blanch, Clark, Smit, C. Somerville

CHM ENG 196 Special Laboratory Study 2 - 4 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences.**Prerequisites:** Consent of instructor.

Special laboratory or computational work under direction of one of the members of the staff.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHM ENG 197 Field Study in Chemical Engineering 1 - 4 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 hours of field work per week per unit.**Prerequisites:** Upper division standing and consent of instructor.

Supervised experience in off-campus organizations relevant to specific aspects and applications of chemical engineering. Written report required at the end of the term. Course does not satisfy unit or residence requirements for the bachelor's degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Strauss

CHM ENG 198 Directed Group Study for Undergraduates 1 - 3 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of lecture per week per unit.**Prerequisites:** Completion of 60 units of undergraduate study and in good academic standing.

Supervised research on a specific topic. Enrollment is restricted; see Introduction to Courses and Curricula section in the General Catalog. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHM ENG 199 Supervised Independent Study and Research 1 - 4 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Independent study per week for 15 weeks. 1.5 to 6 hours of Independent study per week for 10 weeks. 1.5 to 7.5 hours of Independent study per week for 8 weeks. 2.5 to 10 hours of Independent study per week for 6 weeks.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHM ENG 230 Mathematical Methods in Chemical Engineering 3 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Math 53 and 54 or equivalent; open to seniors with consent of instructor.

Mathematical formulation and solution of problems drawn from the fields of heat and mass transfer, fluid mechanics, thermodynamics, and reaction kinetics employing ordinary and partial differential equations, variational calculus, and Fourier methods.

Final exam required.

CHM ENG 240 Thermodynamics for Chemical Product and Process Design 3 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Math 53 and 54 or equivalent; 141 or equivalent; open to seniors with consent of instructor.

Topics covered include molecular thermodynamics of pure substances and mixtures, interfacial thermodynamics, statistical mechanics, and computer simulations.

Final exam required.

CHM ENG 244 Kinetics and Reaction Engineering 3 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 142 or equivalent; open to seniors with consent of instructor.

Molecular processes in chemical systems, kinetics and catalysis. Interaction of mass and heat transfer in chemical processes. Performance of systems with chemical reactors.

Final exam required.

CHM ENG 245 Catalysis 3 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 244 or Chemistry 223, or consent of instructor.

Adsorption and kinetics of surface reactions; catalyst preparation and characterization; poisoning, selectivity, and empirical activity patterns in catalysis; surface chemistry, catalytic mechanisms and modern experimental techniques in catalytic research; descriptive examples of industrial catalytic systems.

Final exam required.

CHM ENG 246 Principles of Electrochemical Engineering 3 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

Electrode processes in electrolysis and in galvanic cells. Charge and mass transfer in ionic media. Criteria of scale-up.

Final exam required.

CHM ENG 248 Applied Surface and Colloid Chemistry 3 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

Principles of surface and colloid chemistry with current applications; surface thermodynamics, wetting, adsorption from solution, disperse systems, association colloids, interacting electrical double layers and colloid stability, kinetics of coagulation, and electrokinetics.

Final exam required.

CHM ENG 250 Transport Processes 3 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Chemical & Biomolecular Engineering 150A, 150B; Mathematics 53 and 54, or equivalent; open to seniors with consent of instructor.

Basic differential relations of mass, momentum, and energy including creeping, laminar, and turbulent flow, boundary layers, convective-diffusion in heat and mass transfer, and simultaneous multicomponent mass and energy transport. Analytic mathematical solution of the equations of change using classical techniques including: separation of variables, similarity solutions, and Laplace and Fourier transforms. Final exam required.

CHM ENG 256 Advanced Transport Phenomena 3 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 230

Formulation and rigorous analysis of the laws governing the transport of momentum, heat, and mass, with special emphasis on chemical engineering applications. Detailed investigation of laminar flows complemented by treatments of turbulent flow systems and hydrodynamic stability.

Final exam required.

CHM ENG C268/MEC ENG C268 Physicochemical Hydrodynamics 3 Units**Department:** Chemical Engineering; Chemical Biomolecular Engineering; Mechanical Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** A first graduate course in fluid mechanics such as 260A-260B.

An introduction to the hydrodynamics of capillarity and wetting. Balance laws and short-range forces. Dimensionless numbers, scaling and lubrication approximation. Rayleigh instability. Marangoni effect. The moving contact line. Wetting and short-range forces. The dynamic contact angle. Dewetting. Coating flows. Effect of surfactants and electric fields. Wetting of rough or porous surfaces. Contact angles for evaporating systems.

Final exam not required. Instructor: Morris

CHM ENG C270/BIO ENG C219 Protein Engineering 3 Units**Department:** Chemical Engineering; Bioengineering; Chemical Biomolecular Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

An in-depth study of the current methods used to design and engineer proteins. Emphasis on how strategies can be applied in the laboratory. Relevant case studies presented to illustrate method variations and applications. Intended for graduate students.

Final exam not required. Instructor: Tullman-Ercek

CHM ENG 274 Biomolecular Engineering 3 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

Fundamentals in biomolecular engineering. Structures, dynamics, and functions of biomolecules. Molecular tools in biotechnology. Metabolic and signaling networks in cellular engineering. Synthetic biology and biomedical engineering applications.

Final exam not required.

CHM ENG 295B Special Topics in Chemical Engineering: Electrochemical, Hydrodynamic, and Interfacial Phenomena 2 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Open to properly qualified graduate students.

Current and advanced study in chemical engineering, primarily for advanced graduate students.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHM ENG C295A/BIO ENG C281/CHEM C238/PLANTBI C224 The Berkeley Lectures on Energy: Energy from Biomass 3 Units**Department:** Chemical Engineering; Bioengineering; Chemical Biomolecular Engineering; Chemistry; Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Biology 1A; Chemistry 1B or 4B, Mathematics 1B.

After an introduction to the different aspects of our global energy consumption, the course will focus on the role of biomass. The course will illustrate how the global scale of energy guides the biomass research. Emphasis will be placed on the integration of the biological aspects (crop selection, harvesting, storage, and distribution, and chemical composition of biomass) with the chemical aspects to convert biomass to energy. The course aims to engage students in state-of-art research.

Repeatable when topic changes with consent of instructor. Final exam not required. Instructors: Bell, Blanch, Clark, Smit, C. Somerville

CHM ENG C295R/AST C295R Applied Spectroscopy 3 Units

Department: Chemical Engineering; Applied Science and Technology; Chemical Biomolecular Engineering

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Graduate standing in engineering, physics, chemistry, or chemical engineering; courses: quantum mechanics, linear vector space theory.

After a brief review of quantum mechanics and semi-classical theories for the interaction of radiation with matter, this course will survey the various spectroscopies associated with the electromagnetic spectrum, from gamma rays to radio waves. Special emphasis is placed on application to research problems in applied and engineering sciences. Graduate researchers interested in systematic in situ process characterization, analysis, or discovery are best served by this course.

Final exam not required. Instructor: Reimer

CHM ENG C295Z/CHEM C236/EPS C295Z Energy Solutions: Carbon Capture and Sequestration 3 Units

Department: Chemical Engineering; Chemical Biomolecular Engineering; Chemistry; Earth and Planetary Science

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Chemistry 4B or 1B, Mathematics 1B, and Physics 7B, or equivalents.

After a brief overview of the chemistry of carbon dioxide in the land, ocean, and atmosphere, the course will survey the capture and sequestration of CO₂ from anthropogenic sources. Emphasis will be placed on the integration of materials synthesis and unit operation design, including the chemistry and engineering aspects of sequestration. The course primarily addresses scientific and engineering challenges and aims to engage students in state-of-the-art research in global energy challenges.

Final exam not required. Instructors: Bourg, DePaolo, Long, Reimer, Smit

CHM ENG 295K Design of Functional Interfaces 3 Units

Department: Chemical & Biomolecular Engineering

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Graduate standing.

This course introduces students to the concepts and techniques involved in the design and physical characterization of advanced functional materials consisting of well-defined interfaces. Throughout the course, principles of supramolecular chemistry on solid surfaces are applied to functional systems. Materials with different connectivity and structure at the active site are compared for development of understanding. Specific topics include catalysis, separations, encapsulation, and biomedicine.

Final exam not required. Instructor: Katz

CHM ENG 295N Polymer Physics 3 Units

Department: Chemical & Biomolecular Engineering

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: 230 and 240.

This course, which is based on Gert Strobl's book addresses the origin of some of the important physical properties of polymer liquids and solids. This includes phase transitions, crystallization, morphology of multiphase polymer systems, mechanical properties, response to mechanical and electric fields, and fracture. When possible, we will develop quantitative molecular models that predict macroscopic behavior. The course will address experimental data obtained by microscopy, light and neutron scattering, rheology, and dielectric relaxation. Final exam not required.

CHM ENG 295P Special Topics in Chemical Engineering:**Introduction to New Product Development 3 Units**

Department: Chemical & Biomolecular Engineering

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Graduate standing or consent of instructor.

This course is part of the product development initiative sponsored by the department of chemical engineering. It focuses on real-life practices and challenges of translating scientific discovery into commercial products. Its scope is limited in most circumstances to situations where some knowledge of chemical engineering, chemistry, and related disciplines might prove to be particularly useful. The course primarily uses case studies of real-world new product development situations to simulate the managerial and technical challenges that will confront students in the field. We will cover a wide range of topics including basic financial, strategic and intellectual property concepts for products, managing risk and uncertainty, the effective new product development team, the evolving role of corporate R&D, the new venture product company and the ethics of post-launch product management.

Final exam not required. Instructor: Alexander

CHM ENG 295Q Special Topics in Chemical Engineering: Advanced Topics in New Product Development 3 Units

Department: Chemical & Biomolecular Engineering

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Graduate standing or consent of instructor. 295P recommended.

This course is a part of the product development initiative sponsored by the department of chemical engineering. The course builds on the coverage in 295P of real-life practices of translating scientific discovery into commercial products. We will cover a wide range of advanced product development concepts including technology road maps, decision analysis, six sigma, product portfolio optimization, and best practices for field project management.

Final exam not required. Instructor: Alexander

CHM ENG 296 Special Study for Graduate Students in Chemical Engineering 1 - 6 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Individual conferences.**Prerequisites:** Consent of instructor.

Special laboratory and theoretical studies.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHM ENG 298 Seminar in Chemical Engineering 1 Unit**Department:** Chemical & Biomolecular Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Open to properly qualified graduate students with consent of instructor.

Lectures, reports, and discussions on current research in chemical engineering. Sections are operated independently and directed toward different topics.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHM ENG 299 Research in Chemical Engineering 1 - 12 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences.**Prerequisites:** Consent of instructor.

Research.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHM ENG 300 Professional Preparation: Supervised Teaching of Chemical Engineering 2 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Individual conferences and participation in teaching activities.**Prerequisites:** Graduate standing, appointment as a Graduate Student Instructor, or consent of instructor.

Discussion, problem review and development, guidance of large scale laboratory experiments, course development, supervised practice teaching.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHM ENG 375 Professional Preparation: Supervised Teaching of Chemical Engineering 2 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Zero hours of independent study per week.**Prerequisites:** Graduate standing, appointment as a Graduate Student Instructor, or consent of instructor.

Discussion, problem review and development, guidance of large scale laboratory experiments, course development, supervised practice teaching.

Course may be repeated for credit when topic changes. Final exam not required.

CHM ENG 602 Individual Studies for Graduate Students 1 - 8 Units**Department:** Chemical & Biomolecular Engineering**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Individual conferences.**Prerequisites:** Graduate standing in Ph.D. program.

Individual study in consultation with the major field adviser for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Course does not satisfy unit or residence requirements for doctoral degree. Final exam not required.

Chemistry (CHEM)

CHEM 1A General Chemistry 3 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 8 weeks.**Prerequisites:** High school chemistry recommended.

Stoichiometry of chemical reactions, quantum mechanical description of atoms, the elements and periodic table, chemical bonding, real and ideal gases, thermochemistry, introduction to thermodynamics and equilibrium, acid-base and solubility equilibria, introduction to oxidation-reduction reactions, introduction to chemical kinetics.

Students will receive no credit for 1A after taking 4A. Final exam required.

CHEM 1AL General Chemistry Laboratory 1 Unit**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture and 3 hours of Laboratory per week for 15 weeks. 1 hour of Lecture and 6 hours of Laboratory per week for 8 weeks.**Prerequisites:** 1A (may be taken concurrently).

An experimental approach to chemical sciences with emphasis on developing fundamental, reproducible laboratory technique and a goal of understanding and achieving precision and accuracy in laboratory experiments. Proper use of laboratory equipment and standard wet chemical methods are practiced. Areas of investigations include chemical equilibria, spectroscopy, nanotechnology, green chemistry, and thermochemistry. Concurrent enrollment in 1A is recommended. Students will receive no credit for 1AL after taking 4A. Final exam not required.

CHEM 1B General Chemistry 4 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 4 hours of Laboratory per week for 15 weeks. 6 hours of Lecture and 8 hours of Laboratory per week for 8 weeks.**Prerequisites:** 1A and 1AL or equivalent, or a score of 3, 4, or 5 on the Chemistry AP test.

Introduction to chemical kinetics, electrochemistry, properties of the states of matter, binary mixtures, thermodynamic efficiency and the direction of chemical change, quantum mechanical description of bonding introduction to spectroscopy. Special topics: Research topics in modern chemistry and biochemistry, chemical engineering.

Students will receive no credit for 1B after taking 4B. Final exam required.

CHEM W1A General Chemistry 3 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Web-based lecture and 1 hour of Web-based discussion per week for 15 weeks. 6 hours of Web-based lecture and 2 hours of Web-based discussion per week for 8 weeks. This is an online course.**Prerequisites:** High school chemistry is recommended.

Stoichiometry of chemical reactions, quantum mechanical description of atoms, the elements and periodic table, chemical bonding, real and ideal gases, thermochemistry, introduction to thermodynamics and equilibrium, acid-base and solubility equilibria, introduction to oxidation-reduction reactions, introduction to chemical kinetics. This course is web-based. Students will receive no credit for W1A after taking 1A or 4A. A deficiency in 1A may be removed by taking W1A. Final exam required.

CHEM 3A Chemical Structure and Reactivity 3 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks.**Prerequisites:** 1A with a grade of C- or higher, or a score of 4 or 5 on the Chemistry AP test.

Introduction to organic chemical structures, bonding, and chemical reactivity. The organic chemistry of alkanes, alkyl halides, alcohols, alkenes, alkynes, and organometallics.

112A will restrict credit if completed before 3A. Final exam required.

CHEM 3AL Organic Chemistry Laboratory 2 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture and 4 hours of Laboratory per week for 15 weeks. 2 hours of Lecture and 8 hours of Laboratory per week for 8 weeks.**Prerequisites:** 1A and 1AL or equivalent with a grade of C- or higher, or a score of 4 or 5 on Chemistry AP test; 3A (may be taken concurrently).

Introduction to the theory and practice of methods used in the organic chemistry laboratory. An emphasis is placed on the separation and purification of organic compounds. Techniques covered will include extraction, distillation, sublimation, recrystallization, and chromatography. Detailed discussions and applications of infrared and nuclear magnetic resonance spectroscopy will be included.

Students will receive no credit for 3AL after taking 112A. Final exam not required.

CHEM 3B Chemical Structure and Reactivity 3 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks.**Prerequisites:** 3A with a grade of C- or higher.

Conjugation, aromatic chemistry, carbonyl compounds, carbohydrates, amines, carboxylic acids, amino acids, peptides, proteins, and nucleic acid chemistry. Ultraviolet spectroscopy and mass spectrometry will be introduced.

Students will receive no credit for 3B after taking 112B. Final exam required.

CHEM 3BL Organic Chemistry Laboratory 2 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture and 4 hours of Laboratory per week for 15 weeks. 2 hours of Lecture and 8 hours of Laboratory per week for 8 weeks.**Prerequisites:** 3AL; 3B (may be taken concurrently).

The synthesis and purification of organic compounds will be explored. Natural product chemistry will be introduced. Advanced spectroscopic methods including infrared, ultraviolet, and nuclear magnetic resonance spectroscopy and mass spectrometry will be used to analyze products prepared and/or isolated. Qualitative analysis of organic compounds will be covered.

Students will receive no credit for 3BL after taking 112B. Final exam not required.

CHEM N3AL Organic Chemistry Laboratory 2 Units**Department:** Chemistry**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Web-based lecture and 8 hours of Laboratory per week for 8 weeks. This is an online course.**Prerequisites:** 3A may be taken concurrently, or after passing 3A with a grade of C- or better.

Introduction to the theory and practice of methods used in the organic chemistry laboratory. An emphasis is placed on the separation and purification of organic compounds. Techniques covered will include extraction, distillation, sublimation, recrystallization, and chromatography. Detailed discussions and applications of infrared and nuclear magnetic resonance spectroscopy will be included.

Students will receive no credit for N3AL after taking 112A. Final exam not required. Instructor: Pedersen

CHEM 4A General Chemistry and Quantitative Analysis 4 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring. 4A: (F); 4B: (SP)**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 4 hours of Laboratory per week for 15 weeks.**Prerequisites:** High school chemistry; calculus (may be taken concurrently); high school physics is recommended.

This series is intended for majors in physical and biological sciences and in engineering. It presents the foundation principles of chemistry, including stoichiometry, ideal and real gases, acid-base and solubility equilibria, oxidation-reduction reactions, thermochemistry, entropy, nuclear chemistry and radioactivity, the atoms and elements, the periodic table, quantum theory, chemical bonding, molecular structure, chemical kinetics, and descriptive chemistry. Examples and applications will be drawn from diverse areas of special interest such as atmospheric, environmental, materials, polymer and computational chemistry, and biochemistry. Laboratory emphasizes quantitative work. Equivalent to 1A-1B plus 15 as prerequisite for further courses in chemistry.

Students will receive one unit of credit for 4A after taking 1A. Students will receive three units of credit for 4A after taking 1AL. Final exam required.

CHEM 4B General Chemistry and Quantitative Analysis 4 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 4 hours of Laboratory per week for 15 weeks.**Prerequisites:** High school chemistry; calculus (may be taken concurrently); high school physics is recommended.

This series is intended for majors in physical and biological sciences and in engineering. It presents the foundation principles of chemistry, including stoichiometry, ideal and real gases, acid-base and solubility equilibria, oxidation-reduction reactions, thermochemistry, entropy, nuclear chemistry and radioactivity, the atoms and elements, the periodic table, quantum theory, chemical bonding, molecular structure, chemical kinetics, and descriptive chemistry. Examples and applications will be drawn from diverse areas of special interest such as atmospheric, environmental, materials, polymer and computational chemistry, and biochemistry. Laboratory emphasizes quantitative work. Equivalent to 1A-1B plus 15 as prerequisite for further courses in chemistry.

Students will receive two units of credit for 4B after taking 1B; 1 unit after taking 15. Final exam required. Instructors: C. Harris, Mathies

CHEM 15 Analytical and Bioanalytical Chemistry 3 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 4 hours of Laboratory per week for 15 weeks.**Prerequisites:** 1A and 1AL or equivalent.

An introduction to analytical and bioanalytical chemistry including background in statistical analysis of data, acid-base equilibria, electroanalytical potentiometry, spectrometric, and chromatographic methods of analysis and some advanced topics in bioanalytical chemistry such as micro-fluidics, bioassay techniques, and enzymatic biosensors. Students will receive 2 units credit for 15 after taking 4B. Final exam required.

CHEM 24 Freshman Seminar 1 Unit**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of Seminar per week for 15 weeks.

The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments, and topics may vary from department to department and semester to semester. Enrollment limited to 15 freshmen.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

CHEM 49 Supplementary Work in Lower Division Chemistry 1 - 4 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Meetings to be arranged. Meetings to be arranged. Students with partial credit in lower division chemistry courses may, with consent of instructor, complete the credit under this heading. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.**CHEM 96 Introduction to Research and Study in the College of Chemistry 1 Unit****Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of Seminar per week for 15 weeks.**Prerequisites:** Freshman standing in the College of Chemistry, or consent of instructor.

Introduces freshmen to research activities and programs of study in the College of Chemistry. Includes lectures by faculty, an introduction to college library and computer facilities, the opportunity to meet alumni and advanced undergraduates in an informal atmosphere, and discussion of college and campus resources.

Students will receive no credit for Chemistry 96 after taking Chemistry C96 or Chemical and Biomolecular Engineering C96. Final exam required.

CHEM 98 Supervised Group Study 1 - 4 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of work per week per unit.**Prerequisites:** Consent of instructor.

Group study of selected topics.

Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

CHEM 98W Directed Group Study 1 Unit**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of Directed group study per week for 15 weeks.

Topics vary with instructor. Enrollment restrictions apply.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

CHEM 100 Communicating Chemistry 2 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Fieldwork per week for 15 weeks.

For undergraduate and graduate students interested in improving their ability to communicate their scientific knowledge by teaching chemistry in elementary schools. The course will combine instruction in inquiry-based chemistry teaching methods and learning pedagogy with 10 weeks of supervised teaching experience in a local school classroom. Thus, students will practice communicating scientific knowledge and receive mentoring on how to improve their presentations. Approximately three hours per week, including time spent in school classrooms. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Formerly known as 20.

CHEM 103 Inorganic Chemistry in Living Systems 3 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1B or 4B.

The basic principles of metal ions and coordination chemistry applied to the study of biological systems. Final exam required.

CHEM 104A Advanced Inorganic Chemistry 3 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks.**Prerequisites:** 1B, 4B, or 3A; 104A is prerequisite to 104B.

The chemistry of metals and nonmetals including the application of physical chemical principles.

104A: No restrictions; 104B: Students will receive two units of credit after taking 103. Final exam required.

CHEM 104B Advanced Inorganic Chemistry 3 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks.**Prerequisites:** 104A or consent of instructor.

The chemistry of metals and nonmetals including the application of physical chemical principles.

Students will receive two units of credit for 104B taking 103. Final exam required.

CHEM 105 Instrumental Methods in Analytical Chemistry 4 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 8 hours of Laboratory per week for 15 weeks.

Prerequisites: 4B; or 1B and 15; or 1B and a UC GPA of 3.3 or higher. Principles, instrumentation and analytical applications of atomic spectroscopies, mass spectrometry, separations, electrochemistry and micro-characterization. Discussion of instrument design and capabilities as well as real-world problem solving with an emphasis on bioanalytical, environmental, and forensic applications. Hands-on laboratory work using modern instrumentation, emphasizing independent projects involving real-life samples and problem solving. Final exam required.

CHEM 108 Inorganic Synthesis and Reactions 4 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 8 hours of Laboratory per week for 15 weeks.

Prerequisites: 4B or 15; 104B with grade of C- or higher, or 103. The preparation of inorganic compounds using vacuum line, air- and moisture-exclusion, electrochemical, high-pressure, and other synthetic techniques. Kinetic and mechanistic studies of inorganic compounds. Final exam required.

CHEM C110L/MCELLBI C110L General Biochemistry and Molecular Biology Laboratory 4 Units**Department:** Chemistry; Molecular and Cell Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 6 to 8 hours of Laboratory per week for 15 weeks.

Prerequisites: 110 (may be taken concurrently). Experimental techniques of biochemistry and molecular biology, designed to accompany the lectures in Molecular and Cell Biology 100B and 110. Final exam not required.

CHEM 112A Organic Chemistry 5 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of lecture, 1 hour of laboratory discussion, and 5 hours of laboratory per week.

Prerequisites: 112A: 1B or 4B with grade of C- or higher; 112B: 112A with grade of C- or higher. For students majoring in chemistry or a closely related field such as chemical engineering or molecular and cell biology. A study of all aspects of fundamental organic chemistry, including nomenclature, chemical and physical properties, reactions and syntheses of the major classes of organic compounds. The study includes theoretical aspects, reaction mechanisms, multistep syntheses, and the chemistry of polycyclic and heterocyclic compounds. This course is more extensive and intensive than 3A-3B and includes a greater emphasis on reaction mechanisms and multistep syntheses. 112A (F); 112B (SP). Students will receive no credit for 112A after taking both 3A and 3AL; two units of credit after taking 3A (lecture only). Final exam required.

CHEM 112B Organic Chemistry 5 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of lecture, 1 hour of laboratory discussion, and 5 hours of laboratory per week.

Prerequisites: 112A: 1B or 4B with grade of C- or higher. 112B: 112A with grade of C- or higher. For students majoring in chemistry or a closely related field such as chemical engineering or molecular and cell biology. A study of all aspects of fundamental organic chemistry, including nomenclature, chemical and physical properties, reactions and syntheses of the major classes of organic compounds. The study includes theoretical aspects, reaction mechanisms, multistep syntheses, and the chemistry of polycyclic and heterocyclic compounds. This course is more extensive and intensive than 3A-3B and includes a greater emphasis on reaction mechanisms and multistep syntheses. 112A (F); 112B (SP). Students will receive no credit for 112B after taking both 3B and 3BL; 2 units of credit for 112B after taking 3B (lecture only). Final exam required. Instructors: Hawkins, Schultz, Streitwieser

CHEM 113 Advanced Mechanistic Organic Chemistry 3 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 3B or 112B with a minimum grade of B- or consent of instructor.

Advanced topics in mechanistic and physical organic chemistry typically including kinetics, reactive intermediates, substitution reactions, linear free energy relationships, orbital interactions and orbital symmetry control of reactions, isotope effects, and photochemistry. Final exam required.

CHEM 114 Advanced Synthetic Organic Chemistry 3 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 3B or 112B with a minimum grade of B- or consent of instructor.

Advanced topics in synthetic organic chemistry with a focus on selectivity. Topics include reductions, oxidations, enolate chemistry and the aldol reaction, reactions of non-stabilized anions, olefination reactions, pericyclic reactions and application to the synthesis of complex structures. Final exam required.

CHEM 115 Organic Chemistry--Advanced Laboratory Methods 4 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture and 11 hours of Laboratory per week for 15 weeks. 2 hours of Lecture and 20 hours of Laboratory per week for 8 weeks.**Prerequisites:** 112B with a grade of C- or higher.

Advanced synthetic methods, chemical and spectroscopic structural methods, designed as a preparation for experimental research. Final exam not required.

CHEM 120A Physical Chemistry 3 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 4B or equivalent; Physics 7B or 8B; Mathematics 53; Mathematics 54 or consent of instructor.

Kinetic, potential, and total energy of particles and forces between them; principles of quantum theory, including one-electron and many-electron atoms and its applications to chemical bonding, intermolecular interactions, and elementary spectroscopy.

Students will receive two units of credit for 120A after taking 130B. Final exam required.

CHEM 120B Physical Chemistry 3 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 4B or equivalent; Mathematics 53; Mathematics 54 (may be taken concurrently); Physics 7B or 8B.

Statistical mechanics, thermodynamics, equilibrium and applications to chemical systems: states of matter, solutions and solvation, chemical kinetics, molecular dynamics, and molecular transport.

Final exam required.

CHEM 122 Quantum Mechanics and Spectroscopy 3 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 120A.

Postulates and methods of quantum mechanics and group theory applied to molecular structure and spectra.

Final exam required.

CHEM 125 Physical Chemistry Laboratory 3 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture and 5 hours of Laboratory per week for 15 weeks.**Prerequisites:** Two of the following: 120A, 120B, C130, or 130B with grades of C- or higher (one of which may be taken concurrently).

Experiments in thermodynamics, kinetics, molecular structure, and general physical chemistry.

Students will receive 1 unit of credit for 125 after taking C182 or Earth and Planetary Science C182. Consent of instructor is required to enroll in 125 after completing C182 or EPS C182. Final exam required.

CHEM 130B Biophysical Chemistry 3 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** C130 or Molecular and Cell Biology C100A, or consent of instructor.

The weekly one-hour discussion is for problem solving and the application of calculus in physical chemistry. Molecular structure, intermolecular forces and interactions, biomolecular spectroscopy, high-resolution structure determinations.

Students will receive two units of credit for 130B after taking 120A. Final exam required.

CHEM C130/MCELLBI C100A Biophysical Chemistry: Physical Principles and the Molecules of Life 4 Units**Department:** Chemistry; Molecular and Cell Biology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 5.5 hours of Lecture and 2 hours of Discussion per week for 8 weeks.**Prerequisites:** Chemistry 3A or 112A, Mathematics 1A, Biology 1A and 1AL; Chemistry 3B or 112B recommended.

Thermodynamic and kinetic concepts applied to understanding the chemistry and structure of biomolecules (proteins, DNA, and RNA). Molecular distributions, reaction kinetics, enzyme kinetics. Bioenergetics, energy transduction, and motor proteins. Electrochemical potential, membranes, and ion channels.

Final exam required.

CHEM 135 Chemical Biology 3 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 3B or 112B; Biology 1A; or consent of instructor.

One-semester introduction to biochemistry, aimed toward chemistry and chemical biology majors.

Students will receive no credit for 135 after taking Molecular and Cell Biology 100B or 102. Final exam required.

CHEM C138/BIO ENG C181/CHM ENG C195A/PLANTBI C124 The Berkeley Lectures on Energy: Energy from Biomass 3 Units**Department:** Chemistry; Bioengineering; Chemical Biomolecular Engineering; Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Chemistry 1B or Chemistry 4B, Mathematics 1B, Biology 1A.

After an introduction to the different aspects of our global energy consumption, the course will focus on the role of biomass. The course will illustrate how the global scale of energy guides the biomass research. Emphasis will be placed on the integration of the biological aspects (crop selection, harvesting, storage and distribution, and chemical composition of biomass) with the chemical aspects to convert biomass to energy. The course aims to engage students in state-of-the-art research. Repeatable when topic changes with consent of instructor. Final exam required. Instructors: Bell, Blanch, Clark, Smit, C. Somerville

CHEM 143 Nuclear Chemistry 2 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Physics 7B or equivalent.

Radioactivity, fission, nuclear models and reactions, nuclear processes in nature. Computer methods will be introduced.

Final exam required.

CHEM 146 Chemical Methods in Nuclear Technology 3 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1.5 hours of Lecture and 4.5 hours of Laboratory per week for 15 weeks.**Prerequisites:** 4B or 15; 143 is recommended.

Experimental illustrations of the interrelation between chemical and nuclear science and technology; fission process, chemistry of fission fragments, chemical effects of nuclear transformation; application of radioactivity to study of chemical problems; neutron activation analysis. Final exam required.

CHEM 149 Supplementary Work in Upper Division Chemistry 1 - 4 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Meetings to be arranged. Meetings to be arranged.

Students with partial credit in upper division chemistry courses may, with consent of instructor, complete the credit under this heading.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

CHEM C150/MAT SCI C150 Introduction to Materials Chemistry 3 Units**Department:** Chemistry; Materials Science and Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 104A; 104B is recommended.

The application of basic chemical principles to problems in materials discovery, design, and characterization will be discussed. Topics covered will include inorganic solids, nanoscale materials, polymers, and biological materials, with specific focus on the ways in which atomic-level interactions dictate the bulk properties of matter.

Final exam required.

CHEM C170L/CHM ENG C170L Biochemical Engineering Laboratory 3 Units**Department:** Chemistry; Chemical Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Laboratory and 1 hour of Lecture per week for 15 weeks.**Prerequisites:** Chemical Engineering 170A (may be taken concurrently) or consent of instructor.

Laboratory techniques for the cultivation of microorganisms in batch and continuous reactions. Enzymatic conversion processes. Recovery of biological products.

Final exam required.

CHEM C178/CHM ENG C178 Polymer Science and Technology 3 Units**Department:** Chemistry; Chemical Biomolecular Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/laboratory per week.**Prerequisites:** Junior standing.

An interdisciplinary course on the synthesis, characterization, and properties of polymer materials. Emphasis on the molecular origin of properties of polymeric materials and technological applications. Topics include single molecule properties, polymer mixtures and solutions, melts, glasses, elastomers, and crystals. Experiments in polymer synthesis, characterization, and physical properties.

Final exam required. Instructor: Segalman

CHEM C182/EPS C182 Atmospheric Chemistry and Physics Laboratory 3 Units

Department: Chemistry; Earth and Planetary Science

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1 hour of Lecture and 5 hours of Laboratory per week for 15 weeks.

Prerequisites: College-level calculus, chemistry, and physics, or consent of instructor.

Fluid dynamics, radiative transfer, and the kinetics, spectroscopy, and measurement of atmospherically relevant species are explored through laboratory experiments, numerical simulations, and field observations. Students will receive 1 unit of credit for C182 after taking 125. Final exam required.

CHEM C191/COMPSCI C191/PHYSICS C191 Quantum Information Science and Technology 3 Units

Department: Chemistry; Computer Science; Physics

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of lecture/discussion per week.

This multidisciplinary course provides an introduction to fundamental conceptual aspects of quantum mechanics from a computational and informational theoretic perspective, as well as physical implementations and technological applications of quantum information science. Basic sections of quantum algorithms, complexity, and cryptography, will be touched upon, as well as pertinent physical realizations from nanoscale science and engineering.

Final exam required. Instructors: Crommie, Vazirani, Whaley

CHEM 192 Individual Study for Advanced Undergraduates 1 - 3 Units

Department: Chemistry

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: Individual conferences.

Prerequisites: Consent of instructor and adviser.

All properly qualified students who wish to pursue a problem of their own choice, through reading or nonlaboratory study, may do so if their proposed project is acceptable to the member of the staff with whom they wish to work.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHEM H194 Research for Advanced Undergraduates 2 - 4 Units

Department: Chemistry

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: Minimum of 3 hours of work per week per unit of credit.

Prerequisites: Minimum GPA of 3.4 overall at Berkeley and consent of instructor and adviser.

Students may pursue original research under the direction of one of the members of the staff.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHEM 195 Special Topics 3 Units

Department: Chemistry

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 4.5 hours of lecture per week for 10 weeks. During summer, lectures may consist of workshops, fieldtrips, discussion, and/or student presentations.

Prerequisites: Consent of instructor.

Special topics will be offered from time to time. Examples are: photochemical air pollution, computers in chemistry.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

CHEM 196 Special Laboratory Study 2 - 4 Units

Department: Chemistry

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: Laboratory.

Prerequisites: Consent of instructor and adviser.

Special laboratory work for advanced undergraduates.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHEM 197 Field Study in Chemistry 1 - 4 Units

Department: Chemistry

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Offered for pass/not pass grade only.

Hours and format: 6 hours of fieldwork per week per unit for 8 weeks. 3 hours of fieldwork per week per unit.

Prerequisites: Upper division standing and consent of instructor.

Supervised experience in off-campus organizations relevant to specific aspects and applications of chemistry. Written report required at the end of the term. Course does not satisfy unit or residence requirements for the bachelor's degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

CHEM 198 Directed Group Study 1 - 4 Units

Department: Chemistry

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

Hours and format: 1 hour of lecture per week per unit.

Prerequisites: Completion of 60 units of undergraduate study and in good standing.

Group study of selected topics.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

CHEM 199 Supervised Independent Study and Research 1 - 4 Units**Department:** Chemistry**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Nonlaboratory study only.

Enrollment is restricted by regulations listed in the .

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHEM 200 Chemistry Fundamentals 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** Graduate standing or consent of instructor.

Review of bonding, structure, stereochemistry, conformation, thermodynamics and kinetics, and arrow-pushing formalisms.

Final exam not required.

CHEM 201 Fundamentals of Inorganic Chemistry 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** Graduate standing or consent of instructor.

Review of bonding, structure, MO theory, thermodynamics, and kinetics. Final exam not required.

CHEM 208 Structure Analysis by X-Ray Diffraction 4 Units**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 8 hours of Laboratory per week for 15 weeks.**Prerequisites:** Consent of instructor.

The theory and practice of modern, single-crystal X-ray diffraction. Groups of four students determine the crystal and molecular structure of newly synthesized materials from the College of Chemistry. The laboratory work involves the mounting of crystals and initial evaluation by X-ray diffraction film techniques, the collection of intensity data by automated diffractometer procedures, and structure analysis and refinement. Final exam not required.

CHEM 214 Heterocyclic Chemistry 3 Units**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.**Prerequisites:** Graduate student standing or consent of instructor. A year of organic chemistry with a grade of B- or better is required for undergraduate enrollment.

Advanced topics in organic chemistry with a focus on the reactivity and synthesis of aromatic heterocycles. Classic and modern methods for the synthesis of indoles, pyridines, furans, pyrroles, and quinolines will be covered, as well as complex, multi-heteroatom ring systems. Applications to medicinal and bioorganic chemistry will be included where appropriate. Final exam required. Instructor: Maimone

CHEM 220A Thermodynamics and Statistical Mechanics 3 Units**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 120B.

A rigorous presentation of classical thermodynamics followed by an introduction to statistical mechanics with the application to real systems. Final exam required.

CHEM 220B Statistical Mechanics 3 Units**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 220A.

Principles of statistical mechanics and applications to complex systems. Final exam not required.

CHEM 221A Advanced Quantum Mechanics 3 Units**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 120B and 122 or equivalent.

Introduction, one dimensional problems, matrix mechanics, approximation methods.

Final exam required.

CHEM 221B Advanced Quantum Mechanics 3 Units**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 221A.

Time dependence, interaction of matter with radiation, scattering theory. Molecular and many-body quantum mechanics.

Final exam required.

CHEM 222 Spectroscopy 3 Units**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

This course presents a survey of experimental and theoretical methods of spectroscopy, and group theory as used in modern chemical research. The course topics include experimental methods, classical and quantum descriptions of the interaction of radiation and matter. Qualitative and quantitative aspects of the subject are illustrated with examples including application of linear and nonlinear spectroscopies to the study of molecular structure and dynamics and to quantitative analysis. This course is offered jointly with 122.

Final exam not required.

CHEM 223A Chemical Kinetics 3 Units**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 220A (may be taken concurrently).

Deduction of mechanisms of complex reactions. Collision and transition state theory. Potential energy surfaces. Unimolecular reaction rate theory. Molecular beam scattering studies.

Final exam not required.

CHEM C230/MCELLBI C214 Protein Chemistry, Enzymology, and Bio-organic Chemistry 2 Units**Department:** Chemistry; Molecular and Cell Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** At the instructor's discretion, this course may be taught over a 10 week period with 3 hours of lecture per week or over a 15 week period with 2 hours of lecture per week.**Prerequisites:** Graduate standing or consent of instructor.

The topics covered will be chosen from the following: protein structure; protein-protein interactions; enzyme kinetics and mechanism; enzyme design. Intended for graduate students in chemistry, biochemistry, and molecular and cell biology.

Final exam not required.

CHEM C234/ESPM C234/PB HLTH C234 Green Chemistry: An Interdisciplinary Approach to Sustainability 3 Units**Department:** Chemistry; Environ Sci, Policy, and Management; Public Health**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 20 hours of Lecture per week for 6 weeks.

Prerequisites: One year of chemistry, including a semester of organic chemistry, or consent of instructors based on previous experience. Meeting the challenge of global sustainability will require interdisciplinary approaches to research and education, as well as the integration of this new knowledge into society, policymaking, and business. Green Chemistry is an intellectual framework created to meet these challenges and guide technological development. It encourages the design and production of safer and more sustainable chemicals and products. Final exam not required. Instructors: Arnold, Bergman, Guth, Iles, Kokai, Mulvihill, Schwarzman, Wilson

CHEM C236/CHM ENG C295Z/EPS C295Z Energy Solutions: Carbon Capture and Sequestration 3 Units**Department:** Chemistry; Chemical Biomolecular Engineering; Earth and Planetary Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Chemistry 4B or 1B, Mathematics 1B, and Physics 7B, or equivalents.

After a brief overview of the chemistry of carbon dioxide in the land, ocean, and atmosphere, the course will survey the capture and sequestration of CO₂ from anthropogenic sources. Emphasis will be placed on the integration of materials synthesis and unit operation design, including the chemistry and engineering aspects of sequestration. The course primarily addresses scientific and engineering challenges and aims to engage students in state-of-the-art research in global energy challenges.

Final exam not required. Instructors: Bourg, DePaolo, Long, Reimer, Smit

CHEM C238/BIO ENG C281/CHM ENG C295A/PLANTBI C224 The Berkeley Lectures on Energy: Energy from Biomass 3 Units**Department:** Chemistry; Bioengineering; Chemical Biomolecular Engineering; Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Biology 1A; Chemistry 1B or 4B, Mathematics 1B.

After an introduction to the different aspects of our global energy consumption, the course will focus on the role of biomass. The course will illustrate how the global scale of energy guides the biomass research. Emphasis will be places on the integration of the biological aspects (crop selection, harvesting, storage, and distribution, and chemical composition of biomass) with the chemical aspects to convert biomass to energy. The course aims to engage students in state-of-art research.

Repeatable when topic changes with consent of instructor. Final exam not required. Instructors: Bell, Blanch, Clark, Smit, C. Somerville

CHEM 243 Advanced Nuclear Structure and Reactions 3 Units**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 143 or equivalent and introductory quantum mechanics. Selected topics on nuclear structure and nuclear reactions. Final exam not required.**CHEM 250A Introduction to Bonding Theory 1 Unit****Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** 200 or 201 or consent of instructor and background in the use of matrices and linear algebra.

An introduction to group theory, symmetry, and representations as applied to chemical bonding.

Final exam not required.

CHEM 250B Inorganic Spectroscopy 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** 250A or consent of instructor.

The theory of vibrational analysis and spectroscopy as applied to inorganic compounds.

Final exam not required.

CHEM 251A Coordination Chemistry I 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** 250A or consent of instructor.

Structure and bonding, synthesis, and reactions of the d-transition metals and their compounds.

Final exam not required.

CHEM 251B Coordination Chemistry II 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** 251A or consent of instructor.

Synthesis, structure analysis, and reactivity patterns in terms of symmetry orbitals.

Final exam not required.

CHEM 252A Organometallic Chemistry I 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** 200 or 201 or consent of instructor.

An introduction to organometallics, focusing on structure, bonding, and reactivity.

Final exam not required.

CHEM 252B Organometallic Chemistry II 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** 252A or consent of instructor.

Applications of organometallic compounds in synthesis with an emphasis on catalysis.

Final exam not required.

CHEM 253A Materials Chemistry I 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** 200 or 201, and 250A, or consent of instructor.

Introduction to the descriptive crystal chemistry and electronic band structures of extended solids.

Final exam not required.

CHEM 253B Materials Chemistry II 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** 253A or consent of instructor.

General solid state synthesis and characterization techniques as well as a survey of important physical phenomena including optical, electrical, and magnetic properties.

Final exam not required.

CHEM 253C Materials Chemistry III 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 5 weeks.**Prerequisites:** 253A or consent of instructor.

Introduction to surface catalysis, organic solids, and nanoscience.

Thermodynamics and kinetics of solid state diffusion and reaction will be covered.

Final exam not required. Instructors: Somorjai, Yang

CHEM 254 Bioinorganic Chemistry 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.

A survey of the roles of metals in biology, taught as a tutorial involving class presentations.

Final exam not required.

CHEM 260 Reaction Mechanisms 2 Units**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and in-class discussion and problem solving for 10 weeks, and 1 week of computer laboratory.**Prerequisites:** 200 or consent of instructor.

Advanced methods for studying organic reaction mechanisms. Topics include kinetic isotope effects, behavior of reactive intermediates, chain reactions, concerted reactions, molecular orbital theory and aromaticity, solvent and substituent effects, linear free energy relationships, photochemistry.

Final exam not required. Formerly known as 260A-260B.

CHEM 261A Organic Reactions I 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** 200 or 201 or consent of instructor.

Features of the reactions that comprise the vocabulary of synthetic organic chemistry.

Final exam not required.

CHEM 261B Organic Reaction II 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** 261A or consent of instructor.

More reactions that are useful to the practice of synthetic organic chemistry.

Final exam not required.

CHEM 261C Organic Reactions III 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** 261B or consent of instructor.

This course will consider further reactions with an emphasis on pericyclic reactions such as cycloadditions, electrocyclizations, and sigmatropic rearrangements.

Final exam not required.

CHEM 262 Metals in Organic Synthesis 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** 261B or consent of instructor.

Transition metal-mediated reactions occupy a central role in asymmetric catalysis and the synthesis of complex molecules. This course will describe the general principles of transition metal reactivity, coordination chemistry, and stereoselection. This module will also emphasize useful methods for the analysis of these reactions.

Final exam not required.

CHEM 263A Synthetic Design I 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** 262 or consent of instructor.

This course will describe the application of modern reactions to the total synthesis of complex target molecules. Natural products, such as alkaloids, terpenes, or polypropionates, as well as theoretically interesting "non-natural" molecules will be covered.

Final exam not required.

CHEM 263B Synthetic Design II 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** 263A or consent of instructor.

The principles of retrosynthetic analysis will be laid down and the chemistry of protecting groups will be discussed. Special attention will be given to the automated synthesis of biopolymers such as carbohydrates, peptides, and proteins, as well as nucleic acids.

Final exam not required.

CHEM 265 Nuclear Magnetic Resonance Theory and Application 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** 200 or 201 or consent of instructor.

The theory behind practical nuclear magnetic resonance spectroscopy and a survey of its applications to chemical research.

Final exam not required.

CHEM 268 Mass Spectrometry 2 Units**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 10 weeks.**Prerequisites:** Graduate standing or consent of instructor.

Principles, instrumentation, and application in mass spectrometry, including ionization methods, mass analyzers, spectral interpretation, multidimensional methods (GC/MS, HPLC/MS, MS/MS), with emphasis on small organic molecules and bioanalytical applications (proteins, peptides, nucleic acids, carbohydrates, noncovalent complexes); this will include the opportunity to be trained and checked out on several open-access mass spectrometers.

Students will receive 1 unit of credit for 268 after taking 266. Final exam not required.

CHEM 270A Advanced Biophysical Chemistry I 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** 200 or consent of instructor.

Underlying principles and applications of methods for biophysical analysis of biological macromolecules.

Final exam not required.

CHEM 270B Advanced Biophysical Chemistry II 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 7.5 weeks.**Prerequisites:** 270A or consent of instructor.

More applications of methods for biophysical analysis of biological macromolecules.

Final exam not required.

CHEM C271A/MCELLBI C212A Chemical Biology I - Structure, Synthesis and Function of Biomolecules 1 Unit**Department:** Chemistry; Molecular and Cell Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 5 weeks.

This course will present the structure of proteins, nucleic acids, and oligosaccharides from the perspective of organic chemistry. Modern methods for the synthesis and purification of these molecules will also be presented.

Final exam not required.

CHEM C271B/MCELLBI C212B Chemical Biology II - Enzyme Reaction Mechanisms 1 Unit**Department:** Chemistry; Molecular and Cell Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 5 weeks.

This course will focus on the principles of enzyme catalysis. The course will begin with an introduction of the general concepts of enzyme catalysis which will be followed by detailed examples that will examine the chemistry behind the reactions and the three-dimensional structures that carry out the transformations.

Final exam not required.

CHEM C271C/MCELLBI C212C Chemical Biology III - Contemporary Topics in Chemical Biology 1 Unit**Department:** Chemistry; Molecular and Cell Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 5 weeks.

This course will build on the principles discussed in Chemical Biology I and II. The focus will consist of case studies where rigorous chemical approaches have been brought to bear on biological questions.

Potential subject areas will include signal transduction, photosynthesis, immunology, virology, and cancer. For each topic, the appropriate bioanalytical techniques will be emphasized.

Final exam not required.

CHEM 272A Bio X-Ray I 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** 270A-270B or consent of instructor.

Theory and application of X-ray crystallography to biomacromolecules.

Final exam not required.

CHEM 273A Bio NMR I 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 7.5 weeks.**Prerequisites:** 270A-270B or consent of instructor.

Fundamentals of multidimensional NMR spectroscopy (including use of the density matrix for analysis of spin response to pulse sequences) and applications of multidimensional NMR in probing structure, interactions, and dynamics of biological molecules will be described.

Final exam not required.

CHEM 273B Bio NMR II 1 Unit**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 7.5 weeks.**Prerequisites:** 273A.

Triple resonance methods for determination of protein and nucleic acid resonance assignments, and for generation of structural restraints (distances, angles, H-bonds, etc.). Methods for calculating biomolecular structures from NMR data and the quality of such structures will be discussed.

Final exam not required.

CHEM 295 Special Topics 1 - 3 Units**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 3 hour of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

Lecture series on topics of current interest. Recently offered topics: Natural products synthesis, molecular dynamics, statistical mechanics, molecular spectroscopy, structural biophysics, organic polymers, electronic structure of molecules and bio-organic chemistry.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHEM 298 Seminars for Graduate Students 1 - 3 Units**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Seminars.**Prerequisites:** Graduate standing.

In addition to the weekly Graduate Research Conference and weekly seminars on topics of interest in biophysical, organic, physical, nuclear, and inorganic chemistry, there are group seminars on specific fields of research. Seminars will be announced at the beginning of each semester. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHEM 299 Research for Graduate Students 1 - 9 Units**Department:** Chemistry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Laboratory.**Prerequisites:** Graduate standing.

The facilities of the laboratory are available at all times to graduate students pursuing original investigations toward an advanced degree at this University. Such work is ordinarily in collaboration with a member of the staff.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHEM 300 Professional Preparation: Supervised Teaching of Chemistry 2 Units**Department:** Chemistry**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate standing and appointment as a graduate student instructor.

Discussion, curriculum development, class observation, and practice teaching in chemistry.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHEM 301 Pre-High School Chemistry Classroom Immersion 1 Unit**Department:** Chemistry**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of lecture per week (average).**Prerequisites:** Graduate standing.

Provides training and opportunity for graduate students to make presentations in local public schools. Training ensures that presenters are aware of scientific information mandated by the State of California for particular grade levels, and that presentations are intellectually stimulating, relevant to the classroom students' interests, and age-appropriate. Time commitment an average of two to three hours/week, but actual time spent is concentrated during preparation and classroom delivery of presentations, which are coordinated between teachers' needs and volunteers' availability.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Bergman

CHEM 301A Undergraduate Lab Instruction 2 Units**Department:** Chemistry**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of Lecture and 4 hours of Tutorial per week for 15 weeks.**Prerequisites:** Junior standing or consent of instructor; 1A, 1AL, and 1B with grades of B- or higher.

Tutoring of students in 1AL and 1B laboratory. Students attend one hour of the regular GSI preparatory meeting and hold one office hour per week to answer questions about laboratory assignments.

Course may be repeated once for credit. Course may be repeated for a maximum of 4 units. Final exam not required.

CHEM 301B Undergraduate Chemistry Instruction 2 Units**Department:** Chemistry**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of lecture and 5 hours of tutoring per week.**Prerequisites:** Sophomore standing; 1A, 1AL, and 1B with grades of B- or higher.

Tutoring of students in 1A-1B. Students attend a weekly meeting on tutoring methods at the Student Learning Center and attend 1A-1B lectures.

Course may be repeated once for credit. Course may be repeated for a maximum of 4 units. Final exam not required. Formerly known as 301.

CHEM 301C Chemistry 3 Lab Assistant 2 Units**Department:** Chemistry**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of preparation meeting, 4 hours of instruction in the laboratory, and 1 hour of laboratory experiment preparation.**Prerequisites:** Sophomore standing and consent of instructor; 3B and 3BL with grades of B or higher.

Undergraduate organic lab assistants help in the teaching of the 3AL and 3BL. Each week students attend a laboratory preparation meeting for one hour, assist in the laboratory section for four hours, and help in the development of experiments for one hour.

Course may be repeated once for credit. Course may be repeated for a maximum of 4 units. Final exam not required.

CHEM 301D Undergraduate Chemistry Course Instruction 1 - 2 Units**Department:** Chemistry**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Weekly meeting with instructor of tutored course and 2 to 4 hours of tutoring.**Prerequisites:** Junior standing or consent of instructor; completion of tutored course with a grade of B- or better.

Tutoring of students enrolled in an undergraduate chemistry course.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHEM 301T Undergraduate Preparation for Teaching or Instruction in Teaching 2 Units**Department:** Chemistry**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 or 3 hours of lecture and 1 hour of teacher training per week.**Prerequisites:** Junior standing, overall GPA 3.1, and consent of instructor.

Course may be repeated for a maximum of 8 units. Course may be repeated for a maximum of 8 units. Final exam not required.

CHEM 301W Supervised Instruction of Chemistry Scholars 2 Units**Department:** Chemistry**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of lecture and 3 or 4 hours of tutoring per week.**Prerequisites:** Sophomore standing and consent of instructor.

Tutoring of students in the College of Chemistry Scholars Program who are enrolled in general or organic chemistry. Students attend a weekly meeting with instructors.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHEM 375 Professional Preparation: Supervised Teaching of Chemistry 2 Units**Department:** Chemistry**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate standing and appointment as a graduate student instructor.

Discussion, curriculum development, class observation, and practice teaching in chemistry.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

CHEM 602 Individual Study for Doctoral Students 1 - 8 Units**Department:** Chemistry**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 8 hour of Independent study per week for 15 weeks. 1.5 to 15 hours of Independent study per week for 8 weeks.

Individual study in consultation with the major field adviser, intended to provide an opportunity for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D. degree. May not be used for unit or residence requirements for the doctoral degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Chicano Studies (CHICANO)

CHICANO 1AX Reading and Composition 3 Units**Department:** Chicano Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture per week for 6 weeks.

To acquaint Summer Bridge students with methods of expository discourse through the reading of Chicano literature. An introduction to writing, beginning with sentence structure, with an emphasis on unity, coherence, and overall organizational of a full composition.

Final exam required. Instructor: Reid-Gomez

CHICANO R1A Reading and Composition 4 Units**Department:** Chicano Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.**Prerequisites:** Satisfaction of the University of California Entry Level Writing Requirement.

Course will acquaint students with methods of expository discourse through the reading of Chicano/a literature. An introduction to writing, beginning with sentence structure, with an emphasis on unity, coherence, and overall organization of a full composition. Satisfies the first half of the Reading and Composition Requirement.

Satisfies the first half of the Reading and Composition requirement
Final exam not required.**CHICANO R1AN Reading and Composition 3 Units****Department:** Chicano Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

Course will acquaint students with methods of expository discourse through the reading of Chicano literature. An introduction to writing, beginning with sentence structure, with an emphasis on unity, coherence, and overall organization of a full composition. Satisfies the first half of the Reading and Composition requirement.

Satisfies the first half of the Reading and Composition requirement
Final exam not required. Formerly known as 1AN.**CHICANO R1B Reading and Composition 4 Units****Department:** Chicano Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.**Prerequisites:** Satisfaction of the University of California Entry Level Writing Requirement and the first half of the Reading and Composition requirement.

This course examines literary works by Chicano/a writers in their political and social contexts. Emphasis is on literary interpretation and sustained analytical writing. The course aims to develop students' fluency in writing longer and more complex papers, with specific attention to the development of their research skills and their ability to incorporate source material effectively. Satisfies the second half of the Reading and Composition Requirement.

Satisfies the second half of the Reading and Composition requirement
Final exam not required.**CHICANO 5 Intensive Elementary Spanish Language and Latin American Culture 5 Units****Department:** Chicano Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 20 hours of lecture per week for 4 weeks.**Prerequisites:** Spanish 1 or two years of high school Spanish.

Continuation of Spanish 1 in the area of grammar. Special emphasis on increasing vocabulary and developing functional fluency in understanding, speaking, reading, and writing Spanish. Focus on conversational practice of everyday situations, supplemented by language laboratory work. Further study and discussion of different aspects of Latin American culture.

Final exam required. Formerly known as C5. Instructor: Parra

CHICANO 10 Intensive Intermediate Spanish Language and Mexican Culture 5 Units**Department:** Chicano Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 19 hours of lecture per week for 4 weeks.**Prerequisites:** 6B or three semesters of Spanish or consent of instructor. 6B or three semesters of Spanish or consent of instructor.

An intensive Spanish language immersion course in Mexico with a review and enrichment of grammar and vocabulary, and practice in composition. This course will also present an overview of Mexican culture including historical, geographical, and economic aspects, as well as literature, art, music, and folklore, with special focus on family life and direct social contact. Particular emphasis will be placed on the period from independence to the present.

Final exam not required. Formerly known as C10. Instructor: Parra

CHICANO 20 Introduction to Chicano Culture 4 Units**Department:** Chicano Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks. An introduction to the cultural life of Chicanos with its regional differences. Key themes are the symbols and cultural norms created by the historical interaction between Chicanos and American society as expressed in literature, art, music, and folklore. Attention will also be given to change and continuity in Chicano cultural norms on the basis of historical events. Final exam required.

CHICANO 24 Freshman Seminar 1 Unit**Department:** Chicano Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of Seminar per week for 15 weeks.

The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Freshman seminars are offered in all campus departments, and topics vary from department to department and semester to semester. Enrollment limited to 15 freshmen.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

CHICANO 39A Freshman/Sophomore Seminar 1.5 - 4 Units**Department:** Chicano Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required.

CHICANO 40 Introduction to Chicano Literature in English 4 Units**Department:** Chicano Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

The course will introduce students to modern Chicano literature written in English, and will provide necessary background for understanding more specialized courses in the area.

Final exam required. Instructor: Perez

CHICANO 50 Introduction to Chicano History 4 Units**Department:** Chicano Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

A general overview of the Chicano historical experience in the U.S.

Final exam required. Instructor: Saragoza

CHICANO 70 Latino Politics 4 Units**Department:** Chicano Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

A critical analysis of the Latino political experience in the United States.

The course compares and contrasts the ideologies, political organizations, and political leadership in the Mexican American, Cuban American, Puerto Rican, and Central American communities. The contemporary issues confronting Latinos are critically examined.

Final exam required.

CHICANO 97 Field Study in Chicano Studies 1 - 3 Units**Department:** Chicano Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1.5 hours of fieldwork per week per unit for 10 weeks. 3 hours of fieldwork per week per unit.**Prerequisites:** Open to freshmen and sophomores only. Consent of instructor.

Supervised independent field experience in the community relevant to specific aspects of Chicano studies.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

CHICANO 98 Supervised Group Study 1 - 3 Units**Department:** Chicano Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 hours of work per week per unit.**Prerequisites:** Consent of instructor. Open to freshmen and sophomores only.

Group study of selected topics which will vary from semester to semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.
