Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Ancient Mesopotamian political, cultural, and economic history from the invention of script to the Persian conquest of Babylon will be presented in survey, and one topic will be selected for in-depth study.

Final exam required.

NE STUD 112 Survey of Ancient Egyptian History 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 18 or equivalent or consent of instructor.

A concise survey of Ancient Egyptian history from Late Predynastic times to the conquest of Alexander the Great.

Students will receive no credit for 112 after taking 101A-101B; 2 units after taking 101A or 101B. Final exam required.

NE STUD 113 Gilgamesh: King, Hero, and God 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The most famous of Babylonian heroes is Gilgamesh, King of Uruk.

The Gilgamesh Epic, recorded on twelve tablets in cuneiform, follows him in his quest for fame and eternal life. In this course, we will read the Gilgamesh Epic as well as several earlier texts around the same character. Moreover, we will read additional ancient texts that elucidate one or another aspect of the Epic. We will follow the traditions around Gilgamesh and see how his fame was used for literary, religious, and political purposes. Finally, we will look at some of the modern Gilgamesh interpretations.

Final exam required.

NE STUD C119/ANTHRO C123F Disciplining Near Eastern**Archaeology: Explorers, Archaeologists, and Tourists in the****Contemporary Middle East 3 Units****Department:** Near Eastern Studies; Anthropology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

This course examines the roles that Near Eastern archaeology plays within the context of recent Middle Eastern history and society, from 1800 to the present day. Topics include the discipline's entanglement with imperialism, nationalism, science, tourism, the antiquities trade, media, and war. Students will examine and discuss ethnographies, technical reports, memoirs, films, and images.

The royal art and architecture of later Mesopotamia will be explored in terms of the social, political, and cultural context of the great empires of Assyria, Babylon, and Persia. The course provides an integrated picture of the arts of Mesopotamia and neighboring regions from 1000-330 BCE with an emphasis on the development of visual narrative, the use of art in the expression of authority and legitimacy, and artistic interconnections between cultures. Collections on campus or in the area will be incorporated whenever possible.

Final exam required.

NE STUD C121A/HISTART C121A Topics in Islamic Art 4 Units**Department:** Near Eastern Studies; History of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

The course will treat in depth topics in Islamic architecture and topics in Islamic art. Subjects addressed may include painting, calligraphy, and book production.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

NE STUD 122 Iranian Archaeology 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 15 is recommended.

A survey of the archaeology of Iran and its neighbors from the Paleolithic Era to the Sasanian period. Students will analyze architecture, artifacts, and written sources, discuss debates, and learn archaeological methods. Final exam required. Formerly known as 122A-122B.

NE STUD 123 Mesopotamian Archaeology 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 15 recommended.

A survey of Mesopotamian archaeology from the Paleolithic Era to 300 BCE investigating the origins of agriculture, urbanism, states, and empires in ancient Iraq, Syria, and Turkey. Students will analyze architecture, artifacts, and written sources, discuss current debates, and learn archaeological research methods.

Final exam required. Formerly known as 123A-123B.

NE STUD 124 Levantine Archaeology 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 15 is recommended.

A survey of Levantine archaeology from the Paleolithic Era to 300 BCE investigating the origins of agriculture, technologies, villages, and states in ancient Israel, Jordan, Lebanon, Palestine, and Syria. Prehistoric, Canaanite, and Israelite societies are emphasized. Students will analyze architecture, artifacts, and written sources, discuss debates, and learn archaeological methods.

Final exam required. Formerly known as 124A-124B.

NE STUD 126 Silk Road Art and Archaeology 3 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The course will outline art and archaeology of the Silk Roads from the 5th century BCE to the 10th century CE. A number of specific sites located along the Silk Roads will be selected and explored in depth, as examples which reveal the manifold cultural currents along the trade routes. Special attention will be paid to the eclecticism in Silk Road cultures brought about by the movement of peoples and merchandise which facilitated the spread and fusion along these trading routes of various ideas, cultural forms, art styles, and religious concepts. The social and political underpinnings of this eclecticism will be examined.

Final exam required.

NE STUD C129/HISTART C140 Minoan and Mycenaean Art 4 Units**Department:** Near Eastern Studies; History of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This course analyzes the art, architecture, and archaeology of prehistoric Greece, concentrating on the Minoan and Mycenaean palatial arts of the Bronze Age (3000-1200 BCE). The evocative yet still enigmatic remains of palaces and funerary complexes, frescoes and vase paintings, and precious worked pieces will be closely examined in terms of their forms and cultural contexts. The place of prehistoric Greece in the international world of the eastern Mediterranean will also be explored.

Final exam required.

NE STUD 132 Biblical Poetry 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

A survey of the poetics and genres of poetry in the Hebrew Bible, focusing on close reading of selected texts. Theoretical issues will include the dynamics of parallelism, metaphor, intertextuality, agency, and gender. Historical issues will include the ancient Near Eastern literary genres and the political and ritual dynamics of the biblical poems. Throughout the course, we will also be reading selected modern poems that respond to biblical poetry. Primary texts will be largely drawn from the books of Psalms, Proverbs, Job, Ecclesiastes, Song of Songs, and the prophets. All texts will be read in translation.

Final exam required.

NE STUD C135/RELIGST C132 Jewish Civilization I: The Biblical Period 4 Units**Department:** Near Eastern Studies; Religious Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This is the first course in a four-course sequence in the history of Jewish culture and civilization. It covers the biblical period and the period up to the destruction of the second temple. This course will explore the current state of our knowledge, including the legacy of ancient Near Eastern myth and religion, the history of Israelite religion, the literary features of biblical narrative, and the Dead Sea Scrolls.

Final exam required.

NE STUD 139 Modern Jewish Literatures 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture per week for 8 weeks.**Prerequisites:** Upper division standing or consent of instructor.

Trends and genres in modern Jewish literatures--translated from Hebrew and Yiddish, with selected texts translated from other Jewish languages like Ladino and Judeo-Arabic. Focus will be on developments in Jewish literary traditions since the enlightenment in the context of tensions between occidental and oriental formations of Jewish culture.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

NE STUD 140 Topics in Islamic Thought and Institutions 3 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Selected topics from Islamic intellectual history.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

NE STUD 143A Islam in Iran 3 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks.

A general survey of the religious history of Iran in the Islamic period, covering the rise and development of religious institutions, the elaboration of the religious sciences, Sufism, and sectarian movements.

Final exam required.

NE STUD 143B Islam in Iran 3 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks.

A general survey of the religious history of Iran in the Islamic period, covering the rise and development of religious institutions, the elaboration of the religious sciences, Sufism, and sectarian movements.

Final exam required.

NE STUD 146 Islam 3 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 8 hours of lecture per week for 6 weeks.

A comprehensive and detailed introduction to the sources, doctrines, practices, and institutions of Islam, together with their historical development and elaboration in a select number of ethnic and geographic environments and an overview of Islam in the world today.

Final exam required.

NE STUD 146A Islam 3 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.

A comprehensive and detailed introduction to the sources, doctrines, practices, and institutions of Islam, together with their historical development and elaboration in a select number of ethnic and geographic environments and an overview of Islam in the world today.

Final exam required.

NE STUD 146B Islam 3 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.

A comprehensive and detailed introduction to the sources, doctrines, practices, and institutions of Islam, together with their historical development and elaboration in a select number of ethnic and geographic environments and an overview of Islam in the world today.

Final exam required.

NE STUD 154 Narratives of Identity in Israeli and Palestinian Fiction 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Term course may be offered:** Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 15 hours of lecture per week for 4 weeks and a number of field trips.

Prerequisites: Consent of instructor.

The dynamics of identity in contemporary Israeli and Palestinian fiction. Since in both literary traditions the quest for identity invariably involves an encounter with the cultural "other," the examination of this phenomenon within a single context can be revealing. We will approach the subject through lectures, discussion, and the viewing of video and film dramatizations of Arabic and Hebrew works that deal with identity, and make use of the class location to significantly enhance learning by visiting Arabic and Hebrew theaters and literary establishments and by meeting and interacting with Israeli and Palestinian writers, critics, and scholars. English is the language of instruction, and the required readings of novels, novellas, short stories, and works of literary and cultural criticism are in English translation. A midterm, final examination, and two short analytical papers are required.

Final exam required.

NE STUD 155 Wonder and the Fantastic: The Thousand and One Nights in World Literary Imagination 3 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

After studying the tales themselves and examining their structure and how they fit into the genre of folk literature, we will investigate how the was transmitted, translated, and received in Europe, as a window on 19th-century gender and racial attitudes, especially Western views of the "oriental" other. How the was creatively manipulated by Western writers will be studied, as will the influence of these tales on modern Arabic literature itself. Several examples of how the have been represented in Western films will be considered. All works will be read in English translation.

Final exam required.

NE STUD 160 Religions of Ancient Iran 3 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Principally devoted to Zoroastrianism and Manicheanism but with some attention to Indo-Iranian origins, and relevance of Iranian religion for the history of Hellenistic Gnosticism, Judaism, and Islam.

Final exam required.

NE STUD 162A History of Persian Literature 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 2.5 hours of Lecture and 1 hour of Discussion per week for 8 weeks.

These courses offer a comprehensive introduction to the main currents in Persian literature from the 10th century to the contemporary period.

They introduce students to various genres, period styles, and crucial formal and thematic elements necessary to the understanding of Persian literature. While 162A deals with classical Persian literature, 162B deals with Persian literature since the advent of modernity in Persian-speaking lands, namely the 19th century. Both courses emphasize the impact of social factors, political events, and intellectual currents on Persian literary production. The course is taught in English. Knowledge of Persian is desirable but not required.

Final exam required.

NE STUD 162B History of Persian Literature 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 2.5 hours of Lecture and 1 hour of Discussion per week for 8 weeks.

These courses offer a comprehensive introduction to the main currents in Persian literature from the 10th century to the contemporary period.

They introduce students to various genres, period styles, and crucial formal and thematic elements necessary to the understanding of Persian literature. While 162A deals with classical Persian literature, 162B deals with Persian literature since the advent of modernity in Persian-speaking lands, namely the 19th century. Knowledge of Persian is desirable but not required.

Final exam required.

NE STUD 165 Film and Fiction of Iran 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of lecture/discussion and 2 hours of film screening/discussion per week. 7.5 hours of lecture/discussion and 5 hours of filmscreening/discussion per week for 6 weeks.

Prerequisites: Upper division status.

Introduces students to major themes in modern Iranian literature and cinema. Short story readings and discussions provide an analytical framework of the screening of films covering diverse topics of significance in Iran today. All films have English subtitles; lectures and readings are in English. No prior history of Iranian history or literature is required.

Final exam required. Instructor: Pirnazar

NE STUD 170 Islamic History and Historiography (600-1050) 3 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

The course introduces students to Islamic history and challenges of Islamic historiography from the rise of Islam (ca.600 CE) to the coming of the Seljuks (1050CE). Students will gain an understanding of the religious, social, and political institutions of Islam in their historical contexts. Throughout the course, they will be exposed to various primary and secondary sources that help them develop a sense of how the historical narrative was produced.

Final exam required. Instructor: Ahmed

NE STUD 175 History and Culture of Afghanistan 3 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course will discuss Afghanistan from ancient times to the present, including the emergence of Afghanistan as a modern nation-state and its geo-strategic importance. The Soviet invasion and aftermath will be emphasized, along with issues of state and society, ethnic diversity and tribal structure, challenges of modernization, and nationalism and political identity. The role of religion and mystical orders and the role of art, music, and literature will also be discussed.

Final exam required.

NE STUD 180 The Quran and Its Interpretation 3 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

The course introduces students to Quran and to methods of its interpretation, as adopted in the exegetical (tafsir) literature. In addition to being exposed to secondary academic literature on the Quran and its exegesis, students will be offered a high dose of primary exegetical texts in translation. Passages from a number of periods and denominations will be selected, so that students may develop an appreciation of the interpretive range of a constantly-evolving tradition.

Final exam required. Instructor: Asad Ahmed

Hebrew 4 Units**

Department: Near Eastern Studies

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks.

Topics explore themes and problems in the various fields of Near Eastern studies. They often reflect the research interests of the instructor and supplement regular curricular offerings. Specific descriptions of current offerings in this series are available through the department.

Course may be repeated for credit when topic changes. Final exam required.

**NE STUD 190I Special Topics in Fields of Near Eastern Studies:
Iranian/Persian 4 Units**

Department: Near Eastern Studies

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.

Topics explore themes and problems in the various fields of Near Eastern studies. They often reflect the research interests of the instructor and supplement regular curricular offerings. Specific descriptions of current offerings in this series are available through the department.

Course may be repeated for credit when topic changes. Final exam required.

NE STUD 192A Undergrad Seminar: Problems and Research in Near Eastern Studies: Ancient Near Eastern Studies 2 or 4 Units

Department: Near Eastern Studies

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of seminar plus extensive outside work.

This series is designed to acquaint upper division students with advanced research strategies in specific areas of Near Eastern Studies. The course may reflect current research and interests of the instructors and will introduce students to specialized problems in the field. Two units for presentation; four units for paper and presentation.

Course may be repeated for credit when topic changes. Final exam required.

NE STUD 192B Undergrad Seminar: Problems and Research in Near Eastern Studies: Egyptian Studies 2 or 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of seminar plus ex10sive outside work.

This series is designed to acquaint upper division students with advanced research strategies in specific areas of Near Eastern Studies. The course may reflect current research and interests of the instructors and will introduce students to specialized problems in the field. Two units for presentation; four units for paper and presentation.

Course may be repeated for credit when topic changes. Final exam required.

NE STUD 192C Undergrad Seminar: Problems and Research in Near Eastern Studies: Jewish Studies 2 or 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of seminar plus ex10sive outside work.

This series is designed to acquaint upper division students with advanced research strategies in specific areas of Near Eastern Studies. The course may reflect current research and interests of the instructors and will introduce students to specialized problems in the field. Two units for presentation; four units for paper and presentation.

Course may be repeated for credit when topic changes. Final exam required.

NE STUD 192D Undergrad Seminar: Problems and Research in Near Eastern Studies: Islamic Studies 2 or 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of seminar plus ex10sive outside work.

This series is designed to acquaint upper division students with advanced research strategies in specific areas of Near Eastern Studies. The course may reflect current research and interests of the instructors and will introduce students to specialized problems in the field. Two units for presentation; four units for paper and presentation.

Course may be repeated for credit when topic changes. Final exam required.

NE STUD 192E Undergrad Seminar: Problems and Research in Near Eastern Studies: Arabic 2 or 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of seminar plus ex10sive outside work.

This series is designed to acquaint upper division students with advanced research strategies in specific areas of Near Eastern Studies. The course may reflect current research and interests of the instructors and will introduce students to specialized problems in the field. Two units for presentation; four units for paper and presentation.

Course may be repeated for credit when topic changes. Final exam required.

NE STUD 192F Undergrad Seminar: Problems and Research in Near Eastern Studies: Cuneiform 2 or 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of seminar plus ex10sive outside work.

This series is designed to acquaint upper division students with advanced research strategies in specific areas of Near Eastern Studies. The course may reflect current research and interests of the instructors and will introduce students to specialized problems in the field. Two units for presentation; four units for paper and presentation.

Course may be repeated for credit when topic changes. Final exam required.

NE STUD 192G Undergrad Seminar: Problems and Research in Near Eastern Studies: Egyptian 2 or 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of seminar plus ex10sive outside work.

This series is designed to acquaint upper division students with advanced research strategies in specific areas of Near Eastern Studies. The course may reflect current research and interests of the instructors and will introduce students to specialized problems in the field. Two units for presentation; four units for paper and presentation.

Course may be repeated for credit when topic changes. Final exam required.

NE STUD 192H Undergrad Seminar: Problems and Research in Near Eastern Studies: Hebrew 2 or 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of seminar plus ex10sive outside work.

This series is designed to acquaint upper division students with advanced research strategies in specific areas of Near Eastern Studies. The course may reflect current research and interests of the instructors and will introduce students to specialized problems in the field. Two units for presentation; four units for paper and presentation.

Course may be repeated for credit when topic changes. Final exam required.

NE STUD 192I Undergrad Seminar: Problems and Research in Near Eastern Studies: Iranian/Persian 2 or 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of seminar plus ex10sive outside work.

This series is designed to acquaint upper division students with advanced research strategies in specific areas of Near Eastern Studies. The course may reflect current research and interests of the instructors and will introduce students to specialized problems in the field. Two units for presentation; four units for paper and presentation.

Course may be repeated for credit when topic changes. Final exam required.

NE STUD 192J Undergrad Seminar: Problems and Research in Near Eastern Studies: Semitics 2 or 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of seminar plus ex10sive outside work.

This series is designed to acquaint upper division students with advanced research strategies in specific areas of Near Eastern Studies. The course may reflect current research and interests of the instructors and will introduce students to specialized problems in the field. Two units for presentation; four units for paper and presentation.

Course may be repeated for credit when topic changes. Final exam required.

NE STUD 192K Undergrad Seminar: Problems and Research in Near Eastern Studies: Turkish 2 or 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of seminar plus ex10sive outside work.

This series is designed to acquaint upper division students with advanced research strategies in specific areas of Near Eastern Studies. The course may reflect current research and interests of the instructors and will introduce students to specialized problems in the field. Two units for presentation; four units for paper and presentation.

Course may be repeated for credit when topic changes. Final exam required.

NE STUD 193 Near Eastern Archaeological Field School 6 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Forty hours of Fieldwork, 5 hours of Laboratory, and 2 hours of Lecture per week for 6 weeks.**Prerequisites:** No prerequisites but courses in archaeology or Middle/ Near Eastern studies are recommended.

This course teaches archaeological field methods through hands-on instruction. Students work with the project staff and receive exposure to techniques like excavation, survey, illustration, photography, and artifact processing. Students also learn local archaeology and history through weekly lectures and field trips.

Final exam not required.

NE STUD H195 Senior Honors 2 - 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks.**Prerequisites:** Limited to senior honors candidates.

Directed study centered upon preparation of an honors thesis.

Course may be repeated for a maximum of 4 units. Final exam not required.

NE STUD 198 Directed Group Study for Upper Division Students 1 - 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Variable meetings.

Instruction in areas not covered by regularly scheduled courses:

Phoenician, Cypriote, Syrian Archaeology.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

NE STUD 199 Supervised Independent Study and Research 1 - 4 Units**Department:** Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.

Hours and format: Zero hours of Independent study per week for 15 weeks. 1.5 to 7.5 hours of Independent study per week for 8 weeks. 2.5 to 10 hours of Independent study per week for 6 weeks.

Enrollment is restricted by regulations shown in the.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

NE STUD 200 Graduate Proseminar 1 Unit**Department:** Near Eastern Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 2 hour of Seminar per week for 15 weeks.

Introduction to the academic profession of Near Eastern studies. This course will survey the various disciplines and subfields contained under this rubric, including their developmental histories, methodologies, and primary and secondary data sources. Enrollment in this course is required of all graduate students during their first year of study.

Final exam not required.

NE STUD 202 Fields, Methods and Current Trends in Ancient Egyptian and Near Eastern Studies 2 - 4 Units**Department:** Near Eastern Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

An introduction to the diversity of fields and disciplines that comprise ancient Egyptian and Near Eastern studies, including current and traditional methods and trends. Designed for candidates for higher degrees in Near Eastern Studies and related programs.

Final exam not required.

NE STUD 205 Using Cuneiform Texts in Research 3 Units**Department:** Near Eastern Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Basic knowledge (at least one year) of a cuneiform language.

This seminar is meant for graduate students who wish to use cuneiform texts (in original or in translation) for their research. The most general question that we will ask is: how does a text produce meaningful information? The seminar is organized around three tasks: evaluation of secondary literature, methodological reflection on the use of texts, and using cuneiform texts in a scholarly paper.

Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam not required.

NE STUD C220/HISTART C220 Seminar in Near Eastern Art 2 or 4 Units**Department:** Near Eastern Studies; History of Art**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Seminar on critical aspects of Near Eastern art requiring intensive study and presentation of a research paper. Topics vary from semester to semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

NE STUD 223 Seminar in Near Eastern Archaeology 2 or 4 Units**Department:** Near Eastern Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Seminar on critical aspects of Near Eastern archaeology requiring intensive study and presentation of a research paper and oral report. Topics vary from semester to semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as 223A-223B.

NE STUD 290A Special Studies: Near Eastern Studies 1 - 5 Units**Department:** Near Eastern Studies**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Variable.**Prerequisites:** Consent of instructor.

Students may enroll in more than one section of 290, but the total number of units of Special Study in any one semester may not exceed 12. Final exam not required.

NE STUD 290B Special Studies: Arabic 1 - 5 Units**Department:** Near Eastern Studies**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Variable.**Prerequisites:** Consent of instructor.

Students may enroll in more than one section of 290, but the total number of units of Special Study in any one semester may not exceed 12.

Final exam not required.

NE STUD 290C Special Studies: Cuneiform 1 - 5 Units**Department:** Near Eastern Studies**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Variable.**Prerequisites:** Consent of instructor.

Students may enroll in more than one section of 290, but the total number of units of Special Study in any one semester may not exceed 12.

Final exam not required.

NE STUD 290D Special Studies: Egyptian 1 - 5 Units**Department:** Near Eastern Studies**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Variable.**Prerequisites:** Consent of instructor.

Students may enroll in more than one section of 290, but the total number of units of Special Study in any one semester may not exceed 12.

Final exam not required.

NE STUD 290E Special Studies: Hebrew 1 - 5 Units**Department:** Near Eastern Studies**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Variable.**Prerequisites:** Consent of instructor.

Students may enroll in more than one section of 290, but the total number of units of Special Study in any one semester may not exceed 12.

Final exam not required.

NE STUD 290F Special Studies: Iranian 1 - 5 Units**Department:** Near Eastern Studies**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Variable.**Prerequisites:** Consent of instructor.

Students may enroll in more than one section of 290, but the total number of units of Special Study in any one semester may not exceed 12.

Final exam not required.

NE STUD 290G Special Studies: Semitics 1 - 5 Units**Department:** Near Eastern Studies**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Variable.**Prerequisites:** Consent of instructor.

Students may enroll in more than one section of 290, but the total number of units of Special Study in any one semester may not exceed 12.

Final exam not required.

NE STUD 290H Special Studies: Turkish 1 - 5 Units**Department:** Near Eastern Studies**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Variable.**Prerequisites:** Consent of instructor.

Students may enroll in more than one section of 290, but the total number of units of Special Study in any one semester may not exceed 12.

Final exam not required.

NE STUD 291 Dissertation Writing Workshop 4 Units**Department:** Near Eastern Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of workshop per week, plus 1.5 hours of writing group every other week.**Prerequisites:** Advancement to candidacy, limited to students engaged in research for and writing of the doctoral dissertation.

A faculty member will oversee the group, offering guidance and making sure guidelines are followed. Students will manage the group's day-to-day operations. At least one week before each meeting a student will pre-circulate a draft of a chapter. During the meeting, students will give feedback on the draft. This feedback will be used to revise the chapter, which will be due at the end of the semester. The workshop is open to graduate students from other departments who are writing on topics associated with Near Eastern Studies.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

NE STUD 292 Museum Internship 4 Units**Department:** Near Eastern Studies**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 10 to 15 hours per week of curatorial work.

Jointly supervised by a professional staff of a participating museum and a faculty member in the Art and Archaeology division of the Department of Near Eastern Studies.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

NE STUD N295 Supervised Field Research in Archaeology 2 - 8 Units**Department:** Near Eastern Studies**Course level:** Graduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Variable.

Full time participation in an archaeological excavation or exploratory survey, preceded by three hours of seminar per week for one half of one semester, at the discretion of the instructor. Students will participate in all aspects of the operation and will be responsible for preparing a written report on some specific part of the work. Geographical areas and sites to be determined each year. Students taking the seminar only will receive 2 units only.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

NE STUD 296 Topics in Egyptian Art and Archaeology 2 or 4 Units**Department:** Near Eastern Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** 102A-102B or 106A-106B or consent of instructor.

Changing topics involving ancient Egyptian art and archaeology. Focus may be regional, chronological, methodological, and/or thematic.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

NE STUD 297 Topics in Ancient Ceramics of Egypt and the Levant 2 or 4 Units**Department:** Near Eastern Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 3 hours of seminar and 1 hour of museum/practicum work per week.**Prerequisites:** 102AB, 124AB or the equivalent; Consent of instructor.

Changing topics in the study of ancient ceramics, stressing the relationship between pottery on the one hand, and archaeological practice and research in Egypt and/or the Levant on the other hand. Emphasis is placed on the relationship between pottery and broader issues involving the history and culture of these regions. Where appropriate, extensive use is made of slides and "hands-on" experience with available ceramic collections (e.g., Hearst Museum collection.).

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

NE STUD 298 Seminar 1 - 4 Units**Department:** Near Eastern Studies**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hour of Seminar per week for 15 weeks. 2.5 to 7.5 hours of Seminar per week for 8 weeks.**Prerequisites:** Consent of instructor.

Special topics in Near Eastern Studies. Topics vary and are announced at the beginning of each semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

NE STUD 299 Dissertation Research and Writing 3 - 12 Units**Department:** Near Eastern Studies**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences.**Prerequisites:** Advancement to candidacy, limited to students engaged in research for and writing of the doctoral dissertation.

All students advanced to candidacy must enroll in 299 every semester in which they are registered. When in residence, students are required to meet with their primary dissertation advisor at least twice a semester. Students not in residence should communicate either by phone or email with their advisor at least twice a semester. Semester grade will be based on written work turned in to the instructor to consist of at least one draft chapter of the dissertation or the equivalent.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

NE STUD 375 Teaching Modern Near Eastern Languages in College:**Seminar in Language Pedagogy 3 Units****Department:** Near Eastern Studies**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 3 hours of seminar per week.**Prerequisites:** Graduate Standing.

This course is an introductory course that surveys theories of learning and approaches to the teaching of foreign languages in college. Theories will be analyzed and students encouraged to test those theories against their own experiences as students and teachers. This course is designed for new Graduate Student Instructors of Hebrew, Arabic, Persian and Turkish. This course includes classroom observations and reflective teaching.

Course Objectives: 1. a theoretical background in the process of foreign language learning and teaching pedagogy ^2. a space to discuss and test these theories and develop their own teaching philosophy^3. a place for current GSIs to discuss questions and issues that arise during their teaching^4. practical experience in creating lesson plans, material adaptation and development, and assessment^5. the opportunity to reflect on their own teaching and get feedback^6. to explore issues particular to teaching all (or any) of the modern Near Eastern languages

Student Learning Outcomes: Students gain sufficient theoretical and practical background to prepare them for teaching language courses in NES.

Final exam not required. Instructor: Variable

NE STUD 601 Individual Studies for Master's Students 1 - 8 Units**Department:** Near Eastern Studies**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks. 1.5 to 15 hours of Independent study per week for 8 weeks.

Individual study for the comprehensive or language requirements in consultation with the graduate adviser. Units may not be used to meet either unit or residence requirements for a master's degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

NE STUD 602 Individual Study for Doctoral Students 1 - 8 Units**Department:** Near Eastern Studies**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks. 1.5 to 15 hours of Independent study per week for 8 weeks.

Individual study in consultation with the major field adviser, intended to provide an opportunity for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D. May not be used for unit or residence requirements for the doctoral degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Neuroscience (NEUROSC)

NEUROSC C129/PB HLTH C129 The Aging Human Brain 3 Units**Department:** Neuroscience; Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring. Offered odd-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

The course will survey the field of the human brain, with introductory lectures on the concepts of aging, and brief surveys of normal neuroanatomy, neurophysiology, neurochemistry, and neuropsychology as well as methods such as imaging, epidemiology, and pathology. The neurobiological changes associated with aging will be covered from the same perspectives: neuropsychology, anatomy, biochemistry, and physiology. Major neurological diseases of aging including Alzheimer's and Parkinson's disease will be covered, as will compensatory mechanisms, neuroendocrine changes with aging, depression and aging, epidemiology of aging, and risk factors for decline.

Final exam required. Instructor: Jagust

NEUROSC C160/MCELLBI C160 Introduction to Neurobiology 4 Units**Department:** Neuroscience; Molecular and Cell Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 102 or 100, Biology 1A and 1AL, Physics 8A-8B.

An introductory course designed to provide a general understanding of the nervous system including how it functions, how it develops, and how it changes with learning and memory. Analysis from the level of molecules to cells to simple circuits to complex networks to higher brain functions.

Final exam required.

NEUROSC C217D/PB HLTH C217D Biological and Public Health Aspects of Alzheimer's Disease 3 Units**Department:** Neuroscience; Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of seminar/discussion per week.**Prerequisites:** Graduate standing or consent of instructor.

This course will survey the field of Alzheimer's disease (AD) from a biological and public health perspective by reading original research papers in the fields of medicine, neuroscience, and epidemiology. The course will begin with a historical survey of the concept of AD, followed by a description of clinical and neuropathological features. Subsequent classes will cover the genetics and molecular biology of the disease, as well as biomarkers, epidemiology, risk factors, treatment, development of new diagnostic approaches, and ethical issues. The course will also serve as a model for the analysis of complex diseases with multiple genetic and environmental causes, and late onset neurodegenerative diseases. The course will also serve as a model for the analysis of complex diseases with multiple genetic and environmental causes and late-onset neurodegenerative disease.

Final exam not required. Instructor: Jagust

NEUROSC C260/MCELLBI C260 Introduction to Neurobiology 4 Units**Department:** Neuroscience; Molecular and Cell Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

An introductory course designed to provide a general understanding of the nervous system including how it functions, how it develops, and how it changes with learning and memory. Analysis from the level of molecules to cells to simple circuits to complex networks to higher brain functions. Final exam required.

NEUROSC C261/MCELLBI C261 Advanced Cellular Neurobiology 3 Units**Department:** Neuroscience; Molecular and Cell Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 160

Physical-chemical basis of membrane potentials, electrotonus, action potential generation and propagation, synaptic transmission, sensory receptor function, and volume conductor potentials.

Final exam not required.

NEUROSC C262/MCELLBI C262 Advanced Topics in Systems Neuroscience 3 Units**Department:** Neuroscience; Molecular and Cell Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered odd-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** 160 or equivalent.

Advanced coverage of current research problems in systems-level neuroscience, and experimental and computational techniques used for these studies.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as IDS 200B.

NEUROSC C263/MCELLBI C263 Advanced Developmental Neurobiology 3 Units**Department:** Neuroscience; Molecular and Cell Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered odd-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 162 or equivalent.

Advanced level coverage of current research problems in the embryonic and post-embryonic development of invertebrate and vertebrate nervous systems.

Final exam not required.

NEUROSC C265/VIS SCI C265 Neural Computation 3 Units**Department:** Neuroscience; Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Calculus, differential equations, basic probability and statistics, linear algebra, and familiarity with high level programming languages such as Matlab.

This course provides an introduction to the theory of neural computation. The goal is to familiarize students with the major theoretical frameworks and models used in neuroscience and psychology, and to provide hands-on experience in using these models. Topics include neural network models, supervised and unsupervised learning rules, associative memory models, probabilistic/graphical models, and models of neural coding in the brain.

Final exam not required. Instructor: Olshausen

NEUROSC 290 Neuroscience First Year Research 2 Units**Department:** Neuroscience**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate standing in Neuroscience Graduate Group; concurrent enrollment in 291A-291B.

Seminar on the presentation and evaluation of research results for first-year neuroscience graduate students. During the first weeks, faculty present their research (FERPS); later, students present individual research results and evaluate their own and each other's work. Course enrollment limited to 15.

Final exam not required. Instructor: Ngai

NEUROSC 291A Neuroscience Introduction to Research 4 - 12 Units**Department:** Neuroscience**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 20 to Forty hours of Laboratory per week for 15 weeks.**Prerequisites:** Graduate standing in Neuroscience Graduate Group; consent of instructor.

Closely supervised, intensive laboratory experimental research under the direction of an individual faculty member. For first-year neuroscience graduate students, this course will provide an introduction to experimental methods and research approaches in the different areas of neuroscience. Grade awarded on completion of sequence, which includes 3 ten-week laboratory rotations spread out over the fall and spring semesters. Final exam not required. Instructor: Ngai

NEUROSC 291B Neuroscience Introduction to Research 4 - 12 Units**Department:** Neuroscience**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part two of a year long series course. Upon completion, the final grade will be applied to both parts of the series.**Hours and format:** 20 to Forty hours of Laboratory per week for 15 weeks.**Prerequisites:** Graduate standing in Neuroscience Graduate Group; consent of instructor.

Closely supervised, intensive laboratory experimental research under the direction of an individual faculty member. For first-year neuroscience graduate students, this course will provide an introduction to experimental methods and research approaches in the different areas of neuroscience. Grade awarded on completion of sequence, which includes 3 ten-week laboratory rotations spread out over the fall and spring semesters. Final exam not required. Instructor: Ngai

NEUROSC 292 Neuroscience Graduate Research 3 - 12 Units**Department:** Neuroscience**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 10 to Forty hours of Laboratory per week for 15 weeks. 15 to 6ty hours of Laboratory per week for 10 weeks.**Prerequisites:** Graduate standing in the Neuroscience Graduate Group; advanced approval from instructor.

For graduate students in neuroscience in their second or later years.

During the summer, the course will count for 3-6 units. Individual research under faculty supervision. In this course each graduate student conducts basic thesis and dissertation research after successful completion of the first-year laboratory rotation, Neuroscience 291A-291B. Laboratory work provides the basis for students' thesis research, preparation for the preliminary examination, and continued progress toward completion of Ph.D. dissertation.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

NEUROSC 293 Neuroscience Research Review 2 Units**Department:** Neuroscience**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks. 3 hours of Seminar per week for 10 weeks. 3.5 hours of Seminar per week for 8 weeks. 5 hours of Seminar per week for 6 weeks.**Prerequisites:** Concurrent enrollment in 292; graduate standing in the neuroscience program; consent of instructor.

For graduate students in neuroscience in their second or later years. Two hours of seminar per week which complements the individual laboratory work under faculty supervision. Seminar will review current scientific literature and discuss original research performed by faculty, postdoctoral fellows, scientists, and graduate students in individual faculty laboratories. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

NEUROSC 294 Neuroscience Graduate Student Presentation Seminar 1 Unit

Department: Neuroscience

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1 hour of Seminar per week for 15 weeks.

Prerequisites: Graduate student standing.

This course will encompass three important facets of graduate education in the neurosciences: 1) Development of research presentation skills: fourth and fifth year graduate students will present seminars based on their ongoing dissertation research. Preparation and critiques of presentations will focus on organization of conceptual issues, data presentation, and summarization. 2) Exposure to current topics in neuroscience: faculty speakers will present on current issues and topics relevant to scientific development in the neurosciences, such as technical methods, application of analytical and statistical techniques, and organization and preparation of competitive fellowship and other grant applications. 3) Seminar preparation: a crucial aspect of graduate education is the interaction of students with invited seminar speakers - who are often leaders in their fields. A selected number of class meetings will be devoted to the review of scientific articles published by upcoming seminar speakers and/or other related articles in the field. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

NEUROSC 299 Seminars 1 - 3 Units

Department: Neuroscience

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1 to 3 hour of Seminar per week for 15 weeks.

Course that focuses on topical subjects in specific fields of neuroscience. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

New Media (NWMEDIA)

NWMEDIA 150AC New Media and American Cultures 4 Units

Department: New Media

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 to 4 hours of lecture/discussion per week. 7 to 9 hours of lecture/discussion per week for 6 weeks. 5 to 7 hours of lecture/discussion per week for 8 weeks. 4 to 6 hours of lecture/discussion per week for 10 weeks.

This course studies the influence of new media on various cultures in the U.S. and/or the influence of American cultures on new media. Topics vary by semester. Check current Schedule of Classes or Berkeley Center for New Media web site for current course offerings (bcnm.berkeley.edu). Satisfies the American Cultures requirement

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

NWMEDIA 190 Special Topics in New Media 1 - 4 Units

Department: New Media

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1 to 4 hours of lecture/seminar per week. 1.5 hours to 6 hours of lecture/seminar per week for 10 weeks. 1.5 hours to 7.5 hours of lecture/seminar per week for 8 weeks. 5 to 15 hours of lecture/seminar per week for 3 weeks.

See Schedule of Classes for current section offerings. Topics deal with new media and related issues.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

NWMEDIA 198 Directed Group Study 1 - 3 Units

Department: New Media

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

Hours and format: 3 hours of work per unit per week.

Prerequisites: Upper division standing.

Course may be student-initiated or initiated by a faculty affiliate of the Center for New Media. The subject matter will vary from semester to semester. Student initiated courses will be taught by a student facilitator under the supervision of the faculty sponsor, who must be a faculty affiliate of the Berkeley Center for New Media.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

NWMEDIA 200 History and Theory of New Media 4 Units

Department: New Media

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 4 hours of Seminar per week for 15 weeks.

Prerequisites: Graduate standing or consent of instructor. Required for all students in the Designated Emphasis in New Media.

This course provides a broad historical and theoretical background for new media production and practice. The class will map out theoretical approaches from different disciplines and allow graduate students to discuss and apply them to their own research projects.

Final exam not required.

NWMEDIA 201 Questioning New Media 3 Units**Department:** New Media**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of conference paper/workshop presentation every other week.**Prerequisites:** Graduate standing or consent of instructor. Required of all students in the Designated Emphasis in New Media.

Held in conjunction with the Art, Technology, and Culture Colloquium which brings internationally-known speakers to campus to present their work on advanced topics in new media: <http://atc.berkeley.edu>. Students will enhance skills in questioning new media: how to think critically about new media, how to use new media resources to research pioneering work in new media, how to form incisive questions about new media, and how to evaluate and create effective presentations on topics in new media. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Goldberg

NWMEDIA C262/INFO C262 Theory and Practice of Tangible User Interfaces 4 Units**Department:** Center for New Media; Information**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.

This course explores the theory and practice of Tangible User Interfaces, a new approach to Human Computer Interaction that focuses on the physical interaction with computational media. The topics covered in the course include theoretical framework, design examples, enabling technologies, and evaluation of Tangible User Interfaces. Students will design and develop experimental Tangible User Interfaces using physical computing prototyping tools and write a final project report. Final exam not required. Instructor: Ryokai

NWMEDIA C263/INFO C263 Technologies for Creativity and Learning 3 Units**Department:** Center for New Media; Information**Course level:** Graduate**Term course may be offered:** Spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

How does the design of new educational technology change the way people learn and think? How do we design systems that reflect our understanding of how we learn? This course explores issues on designing and evaluating technologies that support creativity and learning. The class will cover theories of creativity and learning, implications for design, as well as a survey of new educational technologies such as works in computer supported collaborative learning, digital manipulatives, and immersive learning environments.

Students will receive no credit for Information C263/New Media C263 after taking Information 290/New Media 290 section 2 spring 12 only. Final exam not required. Instructor: Ryokai

NWMEDIA C265/INFO C265 Interface Aesthetics 2 Units**Department:** Center for New Media; Information**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

This course will cover new interface metaphors beyond desktops (e.g., for mobile devices, computationally enhanced environments, tangible user interfaces) but will also cover visual design basics (e.g., color, layout, typography, iconography) so that we have systematic and critical understanding of aesthetically engaging interfaces. Students will get a hands-on learning experience on these topics through course projects, design critiques, and discussions, in addition to lectures and readings. Final exam not required. Instructor: Ryokai

NWMEDIA 290 Special Topics in New Media 1 - 4 Units**Department:** New Media**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1 to 4 hours of lecture/seminar per week. 1.5 to 4.5 hours of lecture/seminar per week for 10 weeks. 1.5 to 7.5 hours of lecture/seminar per week for 8 weeks. 5 to 15 hours of lecture/seminar per week for 3 weeks.

See Schedule of Classes for current section offerings. Topics deal with new media and related issues.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

NWMEDIA 299 Individual Study or Research 1 - 4 Units**Department:** New Media**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1 to 4 hour of Independent study per week for 15 weeks. 1.5 to 7.5 hours of Independent study per week for 8 weeks. Individual study or research with Center for New Media- affiliated faculty. This course provides the opportunity to search out and study in detail subjects unavailable in the ordinary course offerings. Unit credit will reflect comparable work per unit as regular courses, and will include both meetings with faculty sponsor and independent work.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

Nuclear Engineering (NUC ENG)

NUC ENG 24 Freshman Seminars 1 Unit

Department: Nuclear Engineering

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: The grading option will be decided by the instructor when the class is offered.

Hours and format: 1 hour of Seminar per week for 15 weeks.

The Berkeley Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Berkeley Seminars are offered in all campus departments, and topics vary from department to department and semester to semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

NUC ENG 92 Issues in Nuclear Science and Technology 2 or 3 Units

Department: Nuclear Engineering

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of lecture and 1 hour of discussion (optional) per week.

Introduction to technical, social, institutional, and ethical issues in nuclear engineering; nuclear reactions and radiation, radiation protection and control, nuclear energy production and utilization, nuclear fuel cycle, reactor safety, controlled fusion, nuclear waste, medical and other applications of radiation, nuclear nonproliferation and arms control and engineering ethics. Nuclear Engineering majors must enroll in 3 units; discussion section and design project required. Non-majors may take course for 2 or 3 units. Discussion section and design project not required for 2 units.

Final exam required. Formerly known as 39A.

NUC ENG 101 Nuclear Reactions and Radiation 4 Units

Department: Nuclear Engineering

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 4 hours of Lecture per week for 15 weeks.

Prerequisites: Physics 7C.

Energetics and kinetics of nuclear reactions and radioactive decay, fission, fusion, and reactions of low-energy neutrons; properties of the fission products and the actinides; nuclear models and transition probabilities; interaction of radiation with matter.

Final exam required. Instructor: Norman

NUC ENG 102 Nuclear Reactions and Radiation Laboratory 3 Units

Department: Nuclear Engineering

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1 hour of Lecture, 1 hour of Discussion, and 4 hours of Laboratory per week for 15 weeks.

Prerequisites: 101

Laboratory course in nuclear physics. Experiments will allow students to directly observe phenomena discussed in Nuclear Engineering 101. These experiments will give students exposure to (1) electronics, (2) alpha, beta, gamma radiation detectors, (3) radioactive sources, and (4) experimental methods relevant for all aspects of nuclear science. Experiments include: Rutherford scattering, x-ray fluorescence, muon lifetime, gamma-gamma angular correlations, Mossbauer effect, and radon measurements.

Final exam required. Instructor: Norman

NUC ENG 104 Radiation Detection and Nuclear Instrumentation Laboratory 4 Units

Department: Nuclear Engineering

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1 hour of lecture and 4 hours of laboratory per week; for 4 units, 2 additional hours of lecture per week.

Prerequisites: 101 or equivalent or consent of instructor; 150 or equivalent recommended.

Basic science of radiation measurement, nuclear instrumentation, neutronics, radiation dosimetry. The lectures emphasize the principles of radiation detection. The weekly laboratory applies a variety of radiation detection systems to the practical measurements of interest for nuclear power, nuclear and non-nuclear science, and environmental applications. Students present goals and approaches of the experiments being performed.

Final exam required. Formerly known as 104A. Instructor: Vetter

NUC ENG 107 Introduction to Imaging 3 Units

Department: Nuclear Engineering

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: 101 and 104A or consent of instructor.

Introduction to medical imaging physics and systems, including x-ray computed tomography (CT), nuclear magnetic resonance (NMR), positron emission tomography (PET), and SPECT; basic principles of tomography and an introduction to unfolding methods; resolution effects of counting statistics, inherent system resolution and human factors.

Final exam required. Instructor: Vetter

NUC ENG 120 Nuclear Materials 4 Units**Department:** Nuclear Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 1 hour of discussion/demonstration per week.**Prerequisites:** Engineering 45 and an upper division course in thermodynamics.

Effects of irradiation on the atomic and mechanical properties of materials in nuclear reactors. Fission product swelling and release; neutron damage to structural alloys; fabrication and properties of uranium dioxide fuel. Final exam required. Instructor: Wirth

NUC ENG 124 Radioactive Waste Management 3 Units**Department:** Nuclear Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Engineering 117 or equivalent course.

Components and material flowsheets for nuclear fuel cycle, waste characteristics, sources of radioactive wastes, compositions, radioactivity and heat generation; waste treatment technologies; waste disposal technologies; safety assessment of waste disposal. Final exam required. Instructor: Ahn

NUC ENG 130 Analytical Methods for Non-proliferation 4 Units**Department:** Nuclear Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 to 3 hour of Laboratory per week for 15 weeks.**Prerequisites:** 101 or equivalent course in nuclear physics, or consent of instructor.

Use of nuclear measurement techniques to detect clandestine movement and/or possession of nuclear materials by third parties. Nuclear detection, forensics, signatures, and active and passive interrogation methodologies will be explored. Techniques currently deployed for arms control and treaty verification will be discussed. Emphasis will be placed on common elements of detection technology from the viewpoint of resolution of threat signatures from false positives due to naturally occurring radioactive material. Laboratory will involve experiments conducted in the Nucleonics Laboratory featuring passive and active neutron signals, gamma ray detection, fission neutron multiplicity, and U and Pu isotopic identification and age determination. Students should be familiar with alpha, beta, gamma, and neutron radiation and basic concepts of nuclear fission. Final exam required. Instructor: Morse

NUC ENG 150 Introduction to Nuclear Reactor Theory 4 Units**Department:** Nuclear Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 101; Mathematics 53 and 54.

Neutron interactions, nuclear fission, and chain reacting systematics in thermal and fast nuclear reactors. Diffusion and slowing down of neutrons. Criticality calculations. Nuclear reactor dynamics and reactivity feedback. Production of radionuclides in nuclear reactors. Final exam required. Instructors: Greenspan, Vujic

NUC ENG 155 Introduction to Numerical Simulations in Radiation Transport 3 Units**Department:** Nuclear Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Mathematics 53 and 54.

Computational methods used to analyze radiation transport described by various differential, integral, and integro-differential equations. Numerical methods include finite difference, finite elements, discrete ordinates, and Monte Carlo. Examples from neutron and photon transport; numerical solutions of neutron/photon diffusion and transport equations. Monte Carlo simulations of photon and neutron transport. An overview of optimization techniques for solving the resulting discrete equations on vector and parallel computer systems. Final exam required. Instructors: Vujic, Wirth

NUC ENG 161 Nuclear Power Engineering 4 Units**Department:** Nuclear Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 1 hour of discussion/demonstration per week.**Prerequisites:** Course(s) in fluid mechanics and heat transfer; junior-level course in thermodynamics.

Energy conversion in nuclear power systems; design of fission reactors; thermal and structural analysis of reactor core and plant components; thermal-hydraulic analysis of accidents in nuclear power plants; safety evaluation and engineered safety systems.

Final exam required. Instructor: Peterson

NUC ENG 162 Radiation Biophysics and Dosimetry 3 Units**Department:** Nuclear Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Upper division standing or consent of instructor.

Interaction of radiation with matter; physical, chemical, and biological effects of radiation on human tissues; dosimetry units and measurements; internal and external radiation fields and dosimetry; radiation exposure regulations; sources of radiation and radioactivity; basic shielding concepts; elements of radiation protection and control; theories and models for cell survival, radiation sensitivity, carcinogenesis, and dose calculation.

Final exam required. Instructor: Vujic

NUC ENG 167 Nuclear Reactor Safety 3 Units**Department:** Nuclear Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 150, 161, or consent of instructor.

Principles and methods used in the safety evaluation of nuclear power plants. Safety philosophies, design criteria, and regulations. Deterministic and probabilistic models, reliability analysis, nuclear and thermal-hydraulic transients, radiological consequences, and risk assessment. Design-basis and severe accident analysis, role of engineered safety systems, siting, and licensing.

Final exam not required. Instructor: Kastenberg

NUC ENG 170A Nuclear Design: Design in Nuclear Power Technology and Instrumentation 3 Units**Department:** Nuclear Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Senior standing or consent of instructor.

Design of various fission and fusion power systems and other physically based applications. Each semester a topic will be chosen by the class as a whole. In addition to technology, the design should address issues relating to economics, the environment, and risk assessment.

Final exam required. Formerly known as 170.

NUC ENG 170B Nuclear Design: Design in Bionuclear, Nuclear Medicine, and Radiation Therapy 3 Units**Department:** Nuclear Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 107, 161, or consent of instructor.

A systems approach to the development of procedures for nuclear medicine and radiation therapy. Each semester a specific procedure will be studied and will entail the development of the biological and physiological basis for a procedure, the chemical and biochemical characteristics of appropriate drugs, dosimetric requirements and limitations, the production and distribution of radionuclides and/or radiation fields to be applied, and the characteristics of the instrumentation to be used.

Final exam required. Formerly known as 167.

NUC ENG 175 Methods of Risk Analysis 3 Units**Department:** Nuclear Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks.**Prerequisites:** Upper division standing.

Methodological approaches for the quantification of technological risk and risk based decision making. Probabilistic safety assessment, human health risks, environmental and ecological risk analysis.

Final exam required. Instructor: Kastenberg

NUC ENG 180 Introduction to Controlled Fusion 3 Units**Department:** Nuclear Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Physics 7C.

Introduction to energy production by controlled thermonuclear reactions. Nuclear fusion reactions, energy balances for fusion systems, survey of plasma physics; neutral beam injection; RF heating methods; vacuum systems; tritium handling.

Final exam required. Instructor: Morse

NUC ENG H194 Honors Undergraduate Research 1 - 4 Units**Department:** Nuclear Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hour of Independent study per week for 15 weeks. 1.5 to 6 hours of Independent study per week for 10 weeks.**Prerequisites:** Upper division technical GPA of 3.3, consent of instructor and faculty advisor.

Supervised research. Students who have completed three or more upper division courses may pursue original research under the direction of one of the members of the staff. A final report or presentation is required. A maximum of three units of H194 may be used to fulfill a technical elective requirement in the Nuclear Engineering general program or joint major programs.

Course may be repeated for credit once. Course may be repeated once for credit. Course may be repeated for a maximum of 8 units. Final exam not required.

NUC ENG 199 Supervised Independent Study 1 - 4 Units**Department:** Nuclear Engineering**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Individual conferences.**Prerequisites:** Consent of instructor and major adviser.

Supervised independent study. Enrollment restrictions apply; see the Introduction to Courses and Curricula section of this catalog.

Course may be repeated for credit when topic changes. Course may be repeated for credit for a maximum of 4 units per semester. Final exam not required.

NUC ENG S199 Supervised Independent Study 1 - 4 Units**Department:** Nuclear Engineering**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Individual conferences.**Prerequisites:** Consent of instructor and major adviser.

Supervised independent study. Please see section of the for description and prerequisites.

Course may be repeated for credit when topic changes. Course may be repeated for credit for a maximum of 4 units per semester. Final exam not required.

NUC ENG 201 Nuclear Reactions and Interactions of Radiation with Matter 4 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks.**Prerequisites:** 101

Interaction of gamma rays, neutrons, and charged particles with matter; nuclear structure and radioactive decay; cross sections and energetics of nuclear reactions; nuclear fission and the fission products; fission and fusion reactions as energy sources.

Final exam required. Instructor: Norman

NUC ENG 204 Advanced Concepts in Radiation Detection and Measurements 3 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 4 hours of Laboratory per week for 15 weeks.**Prerequisites:** Graduate standing, 104 or similar course or consent of instructor.

Advanced concepts in the detection of ionizing radiation relevant for basic and applied sciences, nuclear non-proliferation, and homeland security.

Concepts of signal generation and processing with advantages and drawbacks of a range of detection technologies. Laboratory comprises experiments to compare conventional analog and advanced digital signal processing, information generation and processing, position-sensitive detection, tracking, and imaging modalities.

Final exam not required. Instructor: Vetter

NUC ENG 220 Irradiation Effects in Nuclear Materials 3 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered odd-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 120 or consent of instructor.

Physical aspects and computer simulation of radiation damage in metals. Void swelling and irradiation creep. Mechanical analysis of structures under irradiation. Sputtering, blistering, and hydrogen behavior in fusion reactor materials.

Final exam required. Instructor: Wirth

NUC ENG 221 Corrosion in Nuclear Power Systems 3 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 120, Materials Science and Mineral Engineering 112 recommended.

Structural metals in nuclear power plants; properties and fabrication of Zircaloy; aqueous corrosion of reactor components; structural integrity of reactor components under combined mechanical loading, neutron irradiation, and chemical environment.

Final exam required. Instructor: Wirth

NUC ENG 224 Safety Assessment for Geological Disposal of Radioactive Wastes 3 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Prerequisites: 124 or upper division course in differential equations. Multi-barrier concept; groundwater hydrology, mathematical modeling of mass transport in heterogeneous media, source term for far-field model; near-field chemical environment, radionuclide release from waste solids, modeling of radionuclide transport in the near field, effect of temperature on repository performance, effect of water flow, effect of geochemical conditions, effect of engineered barrier alteration; overall performance assessment, performance index, uncertainty associated with assessment, regulation and standards.

Final exam required. Instructor: Ahn

NUC ENG 225 The Nuclear Fuel Cycle 3 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered alternate spring semesters.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.**Prerequisites:** Graduate standing or consent of instructor; 124 and 150 are recommended.

This course is intended for graduate students interested in acquiring a foundation in nuclear fuel cycle with topics ranging from nuclear-fuel reprocessing to waste treatment and final disposal. The emphasis is on the relationship between nuclear-power utilization and its environmental impacts. The goal is for graduate engineering students to gain sufficient understanding in how nuclear-power utilization affects the environment, so that they are better prepared to design an advanced system that would result in minimized environmental impact. The lectures will consist of two parts. The first half includes mathematical models for individual processes in a fuel cycle, such as nuclear fuel reprocessing, waste solidification, repository performance, and nuclear transmutation in a nuclear reactor. In the second half, these individual models are integrated, which enables students to evaluate environmental impact of a fuel cycle.

Final exam required. Instructor: Ahn

NUC ENG 230 Analytical Methods for Non-Proliferation 4 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 20-5 hours of laboratory and 15 hours of lecture per week for 2 weeks.

Prerequisites: 101, Physics 7C, or equivalent course in nuclear physics. Use of nuclear measurement techniques to detect clandestine movement and/or possession of nuclear materials by third parties. Nuclear detection, forensics, signatures, and active passive interrogation methodologies will be explored. Techniques currently deployed for arms control and treaty verification will be discussed. Emphasis will be placed on common elements of detection technology from the viewpoint of resolution of threat signatures from false positives due to naturally occurring radioactive material. Laboratory will involve experiments conducted in the Nucleonics Laboratory featuring passive and active neutron signals, gamma ray detection, fission neutron multiplicity, and U and Pu isotopic identification and age determination. Students should be familiar with alpha, beta, gamma, and neutron radiation and basic concepts of nuclear fission. Final exam not required. Instructor: Morse

NUC ENG 250 Nuclear Reactor Theory 4 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer. Offered odd-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks. 10 hours of Lecture per week for 6 weeks.

Prerequisites: 101, 150; Engineering 117 recommended. Fission characteristics; neutron chain reactions, neutron transport and diffusion theory; reactor kinetics; multigroup methods, fast and thermal spectrum calculations, inhomogeneous reactor design, effects of poisons and fuel depletion.

Final exam required. Instructor: Greenspan

NUC ENG 255 Numerical Simulation in Radiation Transport 3 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 150

Computational methods used to analyze nuclear reactor systems described by various differential, integral, and integro-differential equations. Numerical methods include finite difference, finite elements, discrete ordinates, and Monte Carlo. Examples from neutron and photon transport, heat transfer, and thermal hydraulics. An overview of optimization techniques for solving the resulting discrete equations on vector and parallel computer systems.

Final exam required. Instructor: Vujic

NUC ENG 260 Thermal Aspects of Nuclear Reactors 4 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks.**Prerequisites:** Mechanical Engineering 106 and 109 or Chemical Engineering 150B.

Fluid dynamics and heat transfer; thermal and hydraulic analysis of nuclear reactors; two-phase flow and boiling; compressible flow; stress analysis; energy conversion methods.

Final exam required. Instructor: Peterson

NUC ENG 265 Design Analysis of Nuclear Reactors 3 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 150 and 161.

Principles and techniques of economic analysis to determine capital and operating costs; fuel management and fuel cycle optimization; thermal limits on reactor performance, thermal converters, and fast breeders; control and transient problems; reactor safety and licensing; release of radioactivity from reactors and fuel processing plants.

Final exam not required. Instructor: Greenspan

NUC ENG 267 Nuclear Reactor Safety 3 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered odd-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 150 and 161.

Principles and methods used in the safety evaluation of nuclear power plants. Safety philosophies, design criteria and regulations. Deterministic and probabilistic models, reliability analysis, nuclear and thermal-hydraulic transients, radiological consequences, and risk assessment. Design-basis and severe accident analysis, role of engineered safety systems, siting, and licensing. Case studies of accidents.

Final exam required. Instructor: Peterson

NUC ENG 275 Principles and Methods of Risk Analysis 4 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered odd-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor. Civil Engineering 193 and Industrial Engineering 166 recommended.

Principles and methodological approaches for the quantification of technological risk and risk-based decision making.

Final exam required. Instructor: Kastenber

NUC ENG 280 Fusion Reactor Engineering 3 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 120 and 180.

Engineering and design of fusion systems. Introduction to controlled thermonuclear fusion as an energy economy, from the standpoint of the physics and technology involved. Case studies of fusion reactor design. Engineering principles of support technology for fusion systems.

Final exam required. Instructor: Morse

NUC ENG 281 Fully Ionized Plasmas 3 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

Introduction to warm and hot magnetized plasmas. Single particle motion in electric and magnetic fields. Collective particle oscillations, waves and instabilities. Magnetohydrodynamic equilibria, stability and transport. Magnetically confined plasmas for controlled fusion. Space plasmas. Final exam required. Formerly known as Electrical Engineering 239B. Instructor: Morse

NUC ENG C282/ENGIN C282 Charged Particle Sources and Beam Technology 3 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Topics in this course will include the latest technology of various types of ion and electron sources, extraction and formation of charge particle beams, computer simulation of beam propagation, diagnostics of ion sources and beams, and the applications of beams in fusion, synchrotron light source, neutron generation, microelectronics, lithography, and medical therapy. This is a general accelerator technology and engineering course that will be of interest to graduate students in physics, electrical engineering, and nuclear engineering.

Final exam not required. Instructors: Leung, Steier

NUC ENG C285/PUB POL C285 Nuclear Security: The Nexus Between Policy and Technology 4 Units**Department:** Nuclear Engineering; Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The course will review the origins and evolution of nuclear energy, how it has been applied for both peaceful and military purposes, and the current and prospective challenges it presents. The purpose of the course is to educate students on the policy roots and technological foundations of nuclear energy and nuclear weapons so they are positioned to make original contributions to the field in their scholarly and professional careers.

Final exam not required. Instructors: Nacht, Prussin

NUC ENG 290B Subsurface Nuclear Technology 3 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 1 1/2-hour lectures per week.**Prerequisites:** 155, 162 and graduate standing.

This course will cover the fundamentals of subsurface nuclear technology and its applications to 1) infer the porosity, the density, elemental composition, and fluid saturation of subsurface media; 2) identify fluid movement in reservoirs, 3) determine fluid characteristics in complex fluid regimes, and 4) perform borehole diagnostics, using neutron and photon measurement and simulation techniques. Application of computational methods will also be covered.

Final exam required. Instructors: Badruzzaman, Vujic

NUC ENG 290C Introduction to Sensitivity and Uncertainty Analysis 3 Units**Department:** Nuclear Engineering**Course level:** Graduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** Graduate standing or consent of instructor.

The course introduces the fundamental concepts for sensitivity and uncertainty analysis of mathematical models of physical, engineering, biological, etc., processes. Being self-contained, the course also provides a review of the mathematical tools needed for sensitivity and uncertainty analysis, assembled from linear algebra, differential and integral equations, numerical methods, operators, and differential calculus in vector spaces.

Final exam not required. Instructor: Cacuci

NUC ENG 290D Analytical Methods for Non-Proliferation 3 Units**Department:** Nuclear Engineering**Course level:** Graduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 20-5 hours of laboratory and 15 hours of lecture per week for 2 weeks.**Prerequisites:** 101 or equivalent; Physics 7C.

Use of nuclear measurement techniques to detect clandestine movement and/or possession of nuclear materials by third parties. Course will involve on-site experiments conducted at a national laboratory facility. guest lecturers from national laboratories and academic institutions will describe the state of the art in analytical techniques and measurement capabilities. Students must be willing to attend lectures and laboratory at a remote site for three weeks of the course. Students should be familiar with alpha, beta, gamma, and neutron radiation and basic concepts of nuclear fission. Students may be required to undergo a security check for certain site visits.

Course is restricted to UC Berkeley students only. Final exam not required. Instructor: Morse

NUC ENG 290F Particle Simulation of Plasmas 2 Units**Department:** Nuclear Engineering**Course level:** Graduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 10 hours of Lecture per week for 3 weeks.**Prerequisites:** Electrical Engineering 117, or Physics 110A, or equivalent course in electromagnetics. Graduate standing or consent of instructor.

This course introduces the fundamentals of plasma simulation methods, focusing on particle methods. The course will include treatment of electrostatic and electromagnetic models in the classical and relativistic regimes for collisional and collisionless plasmas. Emphasis is on bounded plasmas, including models for field and particle interaction with boundaries. Fluid and Monte Carlo collision models will be addressed. Applications will be drawn from basic plasma physics, beams, low temperature plasmas (e.g., lighting, materials processing, thrusters) and high temperature plasmas (magnetic fusion), wave-particle interactions (microwave sources, laser-plasma interactions, accelerators).

Final exam not required. Instructor: Verboncoeur

NUC ENG 290G Scientific and Regulatory Basis for Environmental Protection in Nuclear Fuel Cycle 3 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing or permission of instructor; 124, 224, or 225 recommended.

This course is intended for graduate students interested in acquiring a foundation in scientific and regulatory basis for environmental safety for nuclear fuel cycles, including basic computational capability. The course contents consist of 1) the standards and regulations, 2) technical bases for assessing environmental impacts of nuclear fuel cycle facilities under normal operation and accidental situations, 3) interpretation of environmental impact assessment results, and 4) student mini-projects.

Final exam not required. Instructor: Ahn

NUC ENG 290H Interaction of Intense Charged Particle Beams with Electric and Magnetic Fields 3 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered odd-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Prerequisites: Required: undergraduate level dynamics and electromagnetic theory; Recommended: basic plasma physics. Comprehensive introduction to charged particle accelerator systems with high space charge intensity. Provides a foundation for research and design of systems with intensities sufficiently high so that mutual interactions of the particles in a beam focused and accelerated by applied electric and magnetic fields can not be neglected. Methodologies systematically developed by applying dynamics, electromagnetic theory, and plasma physics. Appropriate for students in engineering and physics. Final exam not required. Instructor: Verboncoeur

NUC ENG 290J Nuclear Physics in High Energy Density Plasmas 3 Units**Department:** Nuclear Engineering**Course level:** Graduate**Term course may be offered:** Fall**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture and 1 hour of discussion per week.

Prerequisites: Graduate standing or permission of instructor, Nuclear Engineering 101 or equivalent course in nuclear physics.
>Recommended: Undergraduate background in plasma and nuclear physics.

This course provides an introduction to the nuclear processes taking place in the High Energy Density (HED) plasmas present in astrophysical settings and the new generation of laser-driven inertial confinement fusion facilities. Topics covered will include a description of the new generation of laser-driven inertial confinement fusion facilities, the role of nuclear-plasma induced excited state population on reaction rates, and the experimental methods used to diagnose HED plasmas.

Course Objectives: This course is intended to give the student an introduction to nuclear physics phenomena that take place in high energy density plasmas. The student will be exposed to the following research topics:

- The effects of HED plasmas on charged-particle reactions, e.g., the concept of the "Gamow window", the role of nuclear resonances, atomic vs. plasma screening.
- Nuclear-plasma interactions (electron- and photon-induced).
- Statistical Reaction Modeling (Hauser-Feshbach) and the effects of excited state population.
- Laser-driven HEDP facilities (laser-driven systems, storage rings, ion traps etc.)
- Accelerator-based HED experiments (atomic beam-foil)
- Non-laboratory HEDPs/Applications (astrophysical environments, nuclear weapons)
- Experimental methods (X-ray and nuclear diagnostics, current vs. pulse mode measurements, Nuclear activation)
- Neutron diagnostics/transport

Final exam required. Instructors: van Bibber, Bernstein

NUC ENG 295 Nuclear Engineering Colloquium 0 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1.5 hours of Lecture per week for 15 weeks.

Presentations on current topics of interest in nuclear technology by experts from government, industry and universities. Open to the campus community.

Course may be repeated for credit when topic changes. Final exam not required. Instructor: Peterson

NUC ENG 298 Group Research Seminars 1 Unit**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1.5 hours of Seminar per week for 15 weeks.

Seminars in current research topics in nuclear engineering: Section 1 - Fusion; Section 2 - Nuclear Waste Management; Section 3 - Nuclear Thermal Hydraulics; Section 4 - Nuclear Chemistry; Section 6 - Nuclear Materials; Section 7 - Fusion reaction design; Section 8 - Nuclear Instrumentation.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

NUC ENG 299 Individual Research 1 - 12 Units**Department:** Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.

Hours and format: Zero hours of Independent study per week for 15 weeks.

Prerequisites: Graduate standing.

Investigation of advanced nuclear engineering problems.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

NUC ENG 375 Teaching Techniques in Nuclear Engineering 1 - 3 Units**Department:** Nuclear Engineering**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.

Hours and format: 1 hour of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: Graduate standing or ASE status.

This course is designed to acquaint new teaching assistants with the nature of graduate student instruction in courses in the department of Nuclear Engineering. Discussion, practice, and review of issues relevant to the teaching of nuclear engineering. Effective teaching methods will be introduced by experienced GSIs and faculty.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Nuclear Engineering 301.

NUC ENG 602 Individual Study for Doctoral Students 1 - 8 Units**Department:** Nuclear Engineering**Course level:** Graduate examination preparation**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks.**Prerequisites:** For candidates for doctoral degree.

Individual study in consultation with the major field adviser, intended to provide an opportunity for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Course does not satisfy unit or residence requirements for doctoral degree. Final exam not required.

Nutritional Sciences and Toxicology (NUSCTX)

NUSCTX 10 Introduction to Human Nutrition 3 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 4 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 6 weeks.

This course provides an overview of digestion and metabolism of nutrients. Foods are discussed as a source of nutrients, and the evidence is reviewed as to the effects of nutrition on health. The emphasis of the course is on issues of current interest and on worldwide problems of food and nutrition. Students are required to record their own diet, calculate its composition, and evaluate its nutrient content in light of their particular needs.

Students will receive no credit for 10 after taking 103 or 160. Final exam required. Formerly known as Nutritional Sciences 10.

NUSCTX 11 Introduction to Toxicology 3 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture and 1 hour of discussion per week.**Prerequisites:** Open to students pursuing science and non science majors.

Discussion of principles for the evaluation of toxic hazard of natural and man-made substances present in the environment, the workplace, food, drink, and drugs. The bases for species selectivity, individual variations in sensitivity and resistance, and the combined effects of toxic agents will be addressed. Issues related to the impact of toxic agents in modern society will be emphasized.

Final exam required. Instructors: Vulpe, Nomura, Wang

NUSCTX 24 Freshman Seminar 1 Unit**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of Seminar per week for 15 weeks.

The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Freshman seminars are offered in all campus departments, and topics vary from department to department and semester to semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Nutritional Sciences 24. Instructor: Chang

NUSCTX 98 Directed Group Study 1 - 3 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.

Hours and format: 1 hour of group study per week per unit. 1 hour of group study per week per unit. 3 hours of group study per week per unit for 6 weeks. 2 hours of group study per week per unit for 8 weeks. 3 hours of group study per week per unit for 6 weeks. 2 hours of group study per week per unit for 8 weeks.

Prerequisites: Lower division standing and consent of instructor.

Study of special topics in nutritional sciences that are not covered in depth in regular courses.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Nutritional Sciences 98.

NUSCTX 99 Supervised Independent Study and Research 1 - 3 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 hours of laboratory per week per unit.**Prerequisites:** Consent of instructor.

Lower division laboratory and independent research under the direction of a faculty supervisor. Written report required upon completion of the project. Enrollment is restricted by regulations in the General Catalog. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Nutritional Sciences 99.

NUSCTX 103 Nutrient Function and Metabolism 3 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Prerequisites: 10, Molecular and Cell Biology 32, and Molecular and Cell Biology 102 (may be taken concurrently), or consent of instructor.

Delivery of nutrients from foods to mammalian cells; major metabolic pathways; function of nutrients in energy metabolism, nitrogen and lipid metabolism, structural tissues and regulation; essentiality, activation, storage, excretion, and toxicity of nutrients.

Final exam required. Instructors: Sul, Chen

NUSCTX 104 Human Food Practices 2 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture per week. 5 hours of lecture per week for 6 weeks.**Prerequisites:** 10 recommended.

Historical, geo-ecological, biological, cultural, socio-economic, political and personal determinants of human diets. Community food and nutrition problems and programs. Food safety and consumer protection. Contributes to the pursuit of multidisciplinary degrees in nutrition policy and planning.

Final exam required. Instructor: McCoin

NUSCTX 108A Introduction and Application of Food Science 3 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.**Prerequisites:** Molecular and Cell Biology 102 (may be taken concurrently), or consent of instructor.

Evaluation of the chemical, physical, functional, and nutritional properties of foods. Emphasis on how these properties, and preparation, processing, and storage, influence quality characteristics of food products.

Final exam required. Instructor: Rasmussen

NUSCTX 108B Application of Food Science Laboratory 1 Unit**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** 108A or concurrent enrollment.

Experimental evaluation of the chemical, physical, functional, and nutritional properties of foods, and the changes occurring during preparation that affect quality characteristics of food products.

Final exam required. Instructor: Rasmussen

NUSCTX 110 Toxicology 4 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Molecular and Cell Biology 102 (may be taken concurrently), or consent of instructor.

A comprehensive survey of the principles of modern toxicology and their applications in evaluating the safety of foods, additives and environmental contaminants. Mechanisms of metabolic activation, detoxification, gene regulation, and selective toxicity are emphasized.

Final exam required. Instructors: Wang, Nomura

NUSCTX C114/ESPM C148 Pesticide Chemistry and Toxicology 3 Units**Department:** Nutritional Sciences and Toxicology; Environ Sci, Policy, and Management**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Introductory courses in organic chemistry and biology, or consent of instructor.

Chemical composition of pesticides and related compounds, their mode of action, resistance mechanisms, and methods of evaluating their safety and activity.

Final exam required. Instructor: Casida

NUSCTX 115 Principles of Drug Action 2 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** 110, 120 (may be taken concurrently), and Molecular and Cell Biology 102.

Basic principles and quantitative aspects of drug action and risk/benefit as applied to the discovery, design, and development of human therapeutics. The course will highlight the importance of integrating pharmacology, toxicology, and pharmacokinetics to create effective and safe treatments for human disease. Special emphasis will be placed on pharmacogenomics and variation in individual response.

Final exam required. Instructor: Johnson

NUSCTX C119/PB HLTH C170B Advanced Toxicology 3 or 4 Units**Department:** Nutritional Sciences and Toxicology; Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Lecture per week for 15 weeks.**Prerequisites:** Nutritional Sciences and Toxicology 110.

The application of toxicology to answer questions about safety and risk. Using a case-study approach, participants will learn how to interpret toxicological data and apply their knowledge to evaluating the risk presented by exposures to toxic chemicals, including drugs and environmental contaminants. Discussion of current topics of controversy in the field of toxicology.

Final exam required. Instructor: M. Smith

NUSCTX 120 Molecular Toxicology 4 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 110 or consent of instructor.

Molecular toxicology attempts to understand the mechanisms by which hazardous compounds cause their toxic effects. The course will focus on our understanding of the important tissue and cellular components involved in chemical exposure from entry to effect to exit. Topics include metabolism and mechanisms of toxicants, toxicogenomics, toxicant effects in individuals and groups, and tools to predict toxicology.

Final exam required. Formerly known as Nutritional Sciences 120.

Instructor: Vulpe

NUSCTX 121 Computational Toxicology 3 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 110, 120 (may be taken concurrently).

Introducing the use of bioinformatics tools useful in linking the molecular structure of chemicals to the toxicity they induce in biological systems. Discussions on the highly interactive process of collecting, organizing, and assimilating chemistry and toxicology information - and the use of computer programs to visualize, browse, and interpret this information to discover chemical structure-toxicity correlations. The importance of these concepts in drug discovery and development and food safety will be emphasized.

Final exam required. Formerly known as Nutritional Sciences 121.

Instructor: Johnson

NUSCTX 135 Food Systems Organization and Management 4 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 hours of Fieldwork per week for 15 weeks.**Prerequisites:** Consent of instructor.

Principles of organization and management applied to institutional food service systems: production and delivery systems, management of resources, quality assurance, equipment, layout, marketing, personnel management, fiscal management. Laboratory experiences, projects and field work in institutional situations.

Final exam not required. Instructor: Rasmussen

NUSCTX 145 Nutrition Education and Counseling 2 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** 161A and 161B or concurrent enrollment in these courses. Dietetic majors only.

This course will focus on communicating nutrition messages through nutrition education and nutrition counseling. Students will develop and implement theory-based nutrition education interventions and conduct mock counseling sessions for various populations and conditions. Strategies for effective nutrition instruction, counseling, and behavior change will be discussed.

Final exam required. Instructor: McCoin

NUSCTX 150 Mechanisms of Metabolic Regulation 3 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 103, or Molecular and Cell Biology 102 or equivalent.

Principles of metabolic regulation in higher animals. Integration of metabolic paths and fluxes emphasizing experimental data and understanding mechanisms of nutrient affects. Advances in methods for studying metabolism, ranging from isotopic to molecular genetics techniques. This course provides the foundation for pursuing research in nutrient biochemistry/molecular biology, and for understanding nutrient and endocrine related diseases such as diabetes, birth defects, osteoporosis, obesity, and cardiovascular disease.

Final exam required. Formerly known as Nutritional Sciences 150.

Instructors: Napoli, Sul

NUSCTX C159/ESPM C159 Human Diet 4 Units**Department:** Nutritional Sciences and Toxicology; Environ Sci, Policy, and Management**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Since we eat every day, wouldn't it be useful to learn more about human dietary practices? A broad overview of the complex interrelationship between humans and their foods. Topics include the human dietary niche, biological variation related to diet, diet and disease, domestication of staple crops, food processing techniques and development of regional cuisines, modern diets and their problems, food taboos, human attitudes toward foods, and dietary politics.

Final exam required. Instructor: Milton

NUSCTX 160 Metabolic Bases of Human Health and Diseases 4 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 1 hour of discussion per week.**Prerequisites:** 103, or Molecular and Cell Biology 102 or equivalent.

The physiological bases of human nutrient homeostasis and common disorders resulting from over and under nutrition will be discussed with a specific focus on macronutrients. Topics related to nutrient deficiency and excess will include adaptation to starvation and the effects of caloric restriction on life-span, obesity and its complications, lipoprotein metabolism and cardiovascular disease, as well as a detailed discussion of the causes, disease mechanisms, and treatment of diabetes mellitus. Final exam required. Instructors: Stahl, Napoli

NUSCTX 161A Medical Nutrition Therapy 4 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks.**Prerequisites:** 103 and 160.

This lecture course addresses nutrition as a component of disease treatment. As we explore medical nutrition therapy, we will also study disease pathophysiology, diagnosis, and medical and pharmacological treatments. Methods of nutrition assessment and nutrient delivery in a medical setting will be covered.

Final exam required. Instructor: McCoin

NUSCTX 161B Applications in Medical Nutrition Therapy 4 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of lecture with demonstration per week.**Prerequisites:** 103, 160, 161A or consent of instructor.

Theory and concepts from 161A are applied through a variety of methods including completion of disease specific case studies, nutrition assessments, care plans, and medical record documentation. Students design and calculate therapeutic diets, and enteral supplements and parenteral nutrition support. Product analysis and supermarket surveys are completed.

Final exam required. Instructor: Henderson

NUSCTX 166 Nutrition in the Community 3 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 10 recommended; upper division standing required.

This course addresses basic nutrition in the context of the community. It explores nutrition programs that serve various segments of the population and the relationships of these programs to nutrition policy at the local, national, and international levels. Community assessment is used as the basis for program planning, implementation, and evaluation. The specific needs of population groups (infants, children, women, and the elderly) are considered and questions of food security are investigated.

Final exam required. Instructor: Henderson

NUSCTX 170 Experimental Nutrition Laboratory 4 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 6 hours of Laboratory per week for 15 weeks.**Prerequisites:** 103, and a course in statistics.

Basic principles and techniques used in human and animal nutrition research. Students design, execute, and analyze experiments.

Students will receive no credit for 170 after taking 171. Final exam not required. Formerly known as Nutritional Sciences 170. Instructors: Aponte, Shane

NUSCTX 171 Nutrition and Toxicology Laboratory 4 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture and 6 hours of laboratory per week.**Prerequisites:** 110, Molecular and Cell Biology 104 or 142 (may be taken concurrently) or Integrative Biology 141.

Basic principles and techniques used in human and animal nutrition and toxicology research. Students design, execute, and analyze experiments. Students will receive no credit for 171 after taking 170. Final exam required. Instructor: Leitman

NUSCTX 190 Introduction to Research in Nutritional Sciences 1 Unit**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of lecture/discussion per week.**Prerequisites:** 103

Students will be asked to prepare an oral and written report on a topic selected from the current research literature in nutritional sciences.

Final exam not required. Formerly known as Nutritional Sciences 190.

NUSCTX 192 Junior Seminar in Dietetics 1 Unit**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of lecture/discussion per week.**Prerequisites:** Upper division standing and consent of instructor.

This seminar course explores the professional roles and responsibilities of dietitians as well as career opportunities within the field. Current issues in the practice of dietetics will be discussed. Students will do research and present an oral report to the class. Each student will begin to develop his or her professional portfolio.

Final exam required. Formerly known as Nutritional Sciences 192.

Instructor: Mead

NUSCTX 193 Introduction to Research in Toxicology 1 Unit**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Seminar per week for 15 weeks.**Prerequisites:** 110 or consent of instructor.

Students will be asked to prepare an oral and written report on a topic selected from the current research literature in toxicology.

Final exam required. Formerly known as Nutritional Sciences 193.

Instructor: Kubo

NUSCTX 194 Senior Seminar in Dietetics 2 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Upper division standing and consent of instructor.

This course will cover the changes that are occurring in the field of dietetics. Students will explore revisions of the national nutritional standards and guidelines, issues related to complementary and alternative nutrition practices, the area of genomics as it is expected to affect practice, professional ethics in the changing health care environment, reimbursement for professional services, legislation related to the field of dietetics, and other emerging issues.

Final exam required. Formerly known as Nutritional Sciences 194.

Instructor: Mead

NUSCTX H196 Honors Research 4 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: A student may take between 2-4 units per semester but must complete a total of 8 units to qualify for the College Honors Distinction. 3 hours of work per week per unit.

Prerequisites: Upper division standing and minimum GPA. See CNR Honors website for current minimum GPA. http://nature.berkeley.edu/site/honors_program.php

Supervised independent honors research specific to aspects of the Nutritional Science and Toxicology major, followed by an oral presentation, and a written report.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Nutritional Sciences H196.

NUSCTX 197 Field Study in Food and Nutritional Sciences 1 - 3 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Approximately 3 hours field study per week per unit.

Supervised experience in off-campus organizations relevant to specific aspects of foods and nutritional sciences. Regular individual meetings with faculty sponsor and written reports required.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Nutritional Sciences 197.

NUSCTX 198 Directed Group Study 1 - 3 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of group study per week per unit.**Prerequisites:** Consent of instructor.

Study of special topics in food science or nutrition that are not covered in depth in regular courses.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Nutritional Sciences 198.

NUSCTX 199 Supervised Independent Study and Research 1 - 4 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Approximately 3 hours of laboratory per week per unit.**Prerequisites:** Upper division standing and consent of instructor.

Upper division laboratory and independent research under the direction of a faculty supervisor. Written report required upon completion of the project.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Nutritional Sciences 199.

NUSCTX 200 Advanced Organismal Nutrition and Metabolism 3 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** 103, 160, and Molecular and Cell Biology 102 or equivalent.

Critical analysis of concepts and research methods relating to nutritional metabolism and its regulation in intact organisms is studied. Areas covered include the basis of nutrient requirements and nutritional assessment, integration of metabolic pathways, research techniques, nutritional diseases, and specific topics such as calcium, vitamins, and trace elements.

Final exam required. Formerly known as Nutritional Sciences 200.

Instructor: Hellerstein

NUSCTX 211A Introduction to Research in Nutritional Sciences 4 - 8 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 1 hour of discussion and 4 hours of laboratory per week per unit.**Prerequisites:** Restricted to graduate students in the nutrition program; consent of instructor.

Closely supervised experimental work under the direction of individual faculty members; an introduction to experimental methods and research approaches in areas of nutritional sciences.

Final exam not required. Formerly known as Nutritional Sciences 211A-211B. Instructor: Napoli

NUSCTX 211B Introduction to Research in Nutritional Sciences 4 - 8 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part two of a year long series course. Upon completion, the final grade will be applied to both parts of the series.**Hours and format:** 1 hour of discussion and 4 hours of laboratory per week per unit.**Prerequisites:** Restricted to graduate students in the nutrition program; consent of instructor.

Closely supervised experimental work under the direction of individual faculty members; an introduction to experimental methods and research approaches in areas of nutritional sciences.

Final exam not required. Formerly known as Nutritional Sciences and Toxicology 211B. Instructor: Napoli

NUSCTX C219/PB HLTH C270B Advanced Toxicology 3 or 4 Units**Department:** Nutritional Sciences and Toxicology; Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Lecture per week for 15 weeks.

The application of toxicology to answer questions about safety and risk. Using a case-study approach, participants will learn how to interpret toxicological data and apply their knowledge to evaluating the risk presented by exposures to toxic chemicals, including drugs and environmental contaminants. Discussion of current topics of controversy in the field of toxicology.

Final exam required. Instructor: Smith

NUSCTX 220 Molecular Toxicology 4 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 110 or consent of instructor.

Molecular toxicology attempts to understand the mechanisms by which hazardous compounds cause their toxic effects. The course will focus on our understanding of the important tissue and cellular components involved in chemical exposure from entry to effect to exit. Topics include metabolism and mechanisms of toxins, toxicogenomics, toxin effects in individuals and groups, and tools to predict toxicology.

Final exam required. Instructor: Vulpe

NUSCTX 250 Advanced Topics in Metabolic Biology 3 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Term course may be offered:** Spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.**Prerequisites:** Molecular and Cell Biology 102 or equivalent

Overview lectures and discussion of primary literature will be combined in this course to provide a working knowledge of principles, regulation, and experimental approaches in metabolic biology. Select topics ranging from molecular mechanism of metabolite synthesis and cellular signaling to integrative physiology of organismal metabolic homeostasis will be discussed with a particular emphasis on their connection to human diseases.

Course Objectives: Use selective topics in metabolic biology to provide a working understanding of basic concepts and technical approaches in metabolic biology.**Student Learning Outcomes:** Students learning outcomes will be focused on their ability to derive basic concepts and technical approaches in metabolic biology from the lectures and primary literature discussion.

Final exam not required. Instructor: Nomura

NUSCTX 290 Advanced Seminars in Nutritional Sciences 1 - 2 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 2 hours of lecture/discussion per week.**Prerequisites:** Graduate standing.

Advanced study of topics in nutritional sciences. More than one section may be taken simultaneously.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Nutritional Sciences 290.

NUSCTX 292 Graduate Research Colloquium 1 Unit**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of lecture/discussion per week.**Prerequisites:** Graduate standing.

Presentations by graduate students of research proposals and results of their research. Participation in discussion and evaluation of others' presentations is required.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Nutritional Sciences 292.

NUSCTX 293 Research Seminar 1 Unit**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of lecture/discussion per week.**Prerequisites:** Graduate standing or consent of instructor.

Presentation and discussion of current faculty research projects and experimental techniques in nutritional sciences. Intended primarily for first year graduate students.

Final exam not required. Formerly known as Nutritional Sciences 293.

NUSCTX 296A Research Review in Nutritional Sciences and Toxicology 2 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 2 hour of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Review of current literature and discussion of original research.

Course may be repeated for credit when topic changes. Final exam not required.

NUSCTX 296B Research Review in Nutritional Sciences and Toxicology 2 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 2 hour of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Review of current literature and discussion of original research.

Course may be repeated for credit when topic changes. Final exam not required.

NUSCTX 296C Research Review in Nutritional Sciences and Toxicology 2 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 2 hour of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Review of current literature and discussion of original research.

Course may be repeated for credit when topic changes. Final exam not required.

NUSCTX 296D Research Review in Nutritional Sciences and Toxicology 2 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 2 hour of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Review of current literature and discussion of original research.

Course may be repeated for credit when topic changes. Final exam not required.

NUSCTX 296E Research Review in Nutritional Sciences and Toxicology 2 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 2 hour of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Review of current literature and discussion of original research.

Course may be repeated for credit when topic changes. Final exam not required.

NUSCTX 296F Research Review in Nutritional Sciences and Toxicology 2 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 2 hour of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Review of current literature and discussion of original research.

Course may be repeated for credit when topic changes. Final exam not required.

NUSCTX 296G Research Review in Nutritional Sciences and Toxicology 2 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 2 hour of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Review of current literature and discussion of original research.

Course may be repeated for credit when topic changes. Final exam not required.

NUSCTX 296H Research Review in Nutritional Sciences and Toxicology 2 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 2 hour of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Review of current literature and discussion of original research.

Course may be repeated for credit when topic changes. Final exam not required.

NUSCTX 296I Research Review in Nutritional Sciences and Toxicology 2 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 2 hour of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Review of current literature and discussion of original research.

Course may be repeated for credit when topic changes. Final exam not required.

NUSCTX 296J Research Review in Nutritional Sciences and Toxicology 2 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 2 hour of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Review of current literature and discussion of original research.

Course may be repeated for credit when topic changes. Final exam not required.

NUSCTX 296K Research Review in Nutritional Sciences and Toxicology 2 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 2 hour of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Review of current literature and discussion of original research.

Course may be repeated for credit when topic changes. Final exam not required.

NUSCTX 296L Research Review in Nutritional Sciences and Toxicology 2 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 2 hour of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Review of current literature and discussion of original research.

Course may be repeated for credit when topic changes. Final exam not required.

NUSCTX 298 Directed Group Studies 1 - 4 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of lecture/discussion per week per unit.**Prerequisites:** Graduate standing and consent of instructor.

Special study in various fields of nutritional sciences. Topics will vary depending on interests of qualified graduate students and availability of staff.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Nutritional Sciences 298.

NUSCTX 299 Nutritional Sciences and Toxicology Research 1 - 12 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Approximately 4 hours of research per week per unit.**Prerequisites:** Graduate standing and consent of instructor.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Nutritional Sciences 299.

NUSCTX 301 Professional Preparation: Teaching in Nutritional Sciences 1 - 2 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of lecture/discussion per week per unit.**Prerequisites:** Consent of instructor.

Creative approaches to teaching nutrition to diverse audiences are emphasized. Participants will identify needs of target populations, formulate educational objectives, design and/or use motivational teaching strategies, and evaluate the impact of their teaching on knowledge, attitudes, and behavior. Undergraduates may teach nutrition to elementary school children. Graduates may become teaching assistants. Final exam not required. Formerly known as Nutritional Sciences 301. Instructors: Bjeldanes, Ikeda

NUSCTX 302 Professional Preparation: Supervised Teaching Experience in Nutrition 1 - 4 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of supervised teaching experience per week per unit.**Prerequisites:** 301 (may be taken concurrently) and consent of instructor. Practical supervised experience in teaching nutrition and food science at the university level; planning, presentation, and evaluation of instructional units.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Nutritional Sciences 302. Instructor: Bjeldanes

NUSCTX 602 Individual Study for Doctoral Students 1 - 8 Units**Department:** Nutritional Sciences and Toxicology**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Approximately 4 hours of study per week per unit.**Prerequisites:** Graduate standing and consent of instructor.

Individual study in consultation with the major field adviser intended to provide an opportunity for qualified students to prepare themselves for the various examinations required for candidates for the Ph.D.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Course does not satisfy unit or residence requirements for doctoral degree. Final exam not required. Formerly known as Nutritional Sciences and Toxicology 602.

Optometry (OPTOM)

OPTOM 10 The Eye and Vision in a Changing Environment 2 Units**Department:** Optometry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

Course covers introduction to the basis of common sight-reducing visual disorders with major public health implications for society--e.g., myopia, cataracts, diabetic hypertensive eye disorders, developmental disorders (e.g., lazy eye), and environmentally induced disease and disorders (solar eye burns, cataracts). Major approaches to the prevention, diagnosis, and treatment of common disorders will be addressed in terms of the biological and optical sciences underlying the treatment or prevention. Impact of eye care on society and health and care delivery will be reviewed.

Final exam required. Instructor: Adams

OPTOM C10/UGIS C10 The Eye and Vision in a Changing Environment 2 Units**Department:** Optometry; Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

Course covers introduction to the basis of common sight reducing visual disorders with major public health implications for society--e.g., myopia, cataracts, diabetic hypertensive eye disorders, developmental disorders (e.g., lazy eye), and environmentally induced disease and disorders (solar eye burns, cataracts). Major approaches to the prevention, diagnosis, and treatment of common disorders will be addressed in terms of the biological and optical sciences underlying the treatment or prevention. Impact of eye care on society and health and care delivery will be reviewed.

Final exam required. Instructor: Adams

OPTOM 39B Freshman/Sophomore Seminar 2 - 4 Units**Department:** Optometry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 2 to 4 hours of Seminar per week for 15 weeks.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester. No prerequisites. Enrollment limits are set by the faculty, but the suggested limit is 25.

Course may be repeated for credit when topic changes. Final exam required.

OPTOM 84 Sophomore Seminar 1 or 2 Units**Department:** Optometry**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.

Hours and format: 1 hour of seminar per week per unit for 15 weeks. 1 and 1 half hours of seminar per week per unit for 10 weeks. 2 hours of seminar per week per unit for 8 weeks. 3 hours of seminar per week per unit for 5 weeks.

Prerequisites: At discretion of instructor.

Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

OPTOM 98 Directed Group Study 1 Unit**Department:** Optometry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of Directed group study per week for 15 weeks.

Directed group study for undergraduates interested in the field of optometry.

Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam required. Instructor: Van Sluyters

OPTOM 198 Directed Group Studies 1 - 4 Units**Department:** Optometry**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Directed group study per week for 15 weeks.

Directed group study for undergraduates interested in the field of Optometry.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

OPTOM 200A Clinical Examination of the Visual System 2 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture per week.

Fundamentals of the optometric examination. Case history, visual acuities, objective and subjective methods of determining refractive status. Basic examination of anterior ocular structures and the ocular fundus; perimetry.

Final exam required. Formerly known as 100A.

OPTOM 200AL Clinical Examination of the Visual System 3 Units**Department:** Optometry**Course level:** Graduate**Term course may be offered:** Fall**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Fundamentals of the optometric examination. Case history, visual acuities, objective and subjective methods of determining refractive status. Basic examination of anterior ocular structures and the ocular funds; perimetry.

Course may be repeated for credit when topic changes. Final exam not required.

OPTOM 200B Clinical Examination of the Visual System 2 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture per week.**Prerequisites:** 200A.

Classification and epidemiology of refractive errors, evaluation of accommodative and binocular status. Tonometry, advanced techniques of examining the posterior pole, evaluation of visual pathway function.

Course may be repeated for credit when topic changes. Final exam not required. Formerly known as 100B.

OPTOM 200BL Clinical Examination of the Visual System 3 Units**Department:** Optometry**Course level:** Graduate**Term course may be offered:** Spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Prerequisites:** Opt 200A, Opt 200AL

Classification and epidemiology of refractive errors, evaluation of accommodative and binocular status. Tonometry, advanced techniques of examining the posterior pole, evaluation of visual pathway function.

Course may be repeated for credit when topic changes. Final exam not required.

OPTOM 200C Clinical Examination of the Visual System 2 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture per week.**Prerequisites:** 200B.

Case analysis of refractive, accommodative, and binocular anomalies. Pediatric examination techniques. Advanced methods of examining the peripheral ocular fundus; anterior chamber angle evaluation. Final exam required. Formerly known as 100C.

OPTOM 200CL Clinical Examination of the Visual System 2 Units**Department:** Optometry**Course level:** Graduate**Term course may be offered:** Fall**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Prerequisites:** Optom 200B

Case analysis of refractive, accommodative, and binocular anomalies. Pediatric examination techniques. Advanced methods of examining the peripheral ocular funds; anterior angle evaluation.

Course may be repeated for credit when topic changes. Final exam not required.

OPTOM 200D Clinical Examination of the Visual System 2 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture per week.**Prerequisites:** 200C, 200CL

Modification of the exam sequence for specific patient needs. Evaluation and management of tear film disorders; analysis of vision with cataract. Patient management and professional communications; legal and ethical issues; managed care and optometry.

Course may be repeated for credit when topic changes. Final exam not required.

OPTOM 200DL Clinical Examination of the Visual System 2 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Prerequisites:** Optom 200C, Optom 200CL

Modification of the exam sequence for specific patient needs. Evaluation and management of tear film disorders; analysis of vision with cataract. Patient management and professional communications; legal and ethical issues; managed care and optometry.

Course may be repeated for credit when topic changes. Final exam not required.

OPTOM 213 Evidence Based Optometry 1 Unit**Department:** Optometry**Course level:** Graduate**Term course may be offered:** Fall**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of lecture per week.

Basic concepts in evidence based optometry including various clinical study designs, potential sources of bias in each design as well as development of a systematic approach to evaluate strength of evidence from published studies, to identify potential limitations and develop appreciation for the importance of evidence based practice as a practice philosophy.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Liu

OPTOM 222A Optics of Ophthalmic Lenses 4 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** Vision Science 203A

Optical and physical characteristics of ophthalmic lenses, to include spherical and aspherical surface of single and multifocal lens designs, and ophthalmic prisms. Lens power measurement methods, lens thickness power relationships and considerations in designing prescription eyewear. Characteristics of absorptive lenses, ophthalmic coatings, lens materials, and their role in ocular protection.

Final exam required.

OPTOM 222B Advanced Clinical Optics 2 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** 222A.

Ophthalmic lens aberrations and minimization. Ophthalmic lens designs relating to anisometropia, aniseikonia, and high refractive errors. Optics of the eye, contact lens optics, and optical principles of low vision aids. Environmental vision and related ophthalmic standards.

Final exam not required. Formerly known as 122B.

OPTOM 226A Systemic Pharmacology 2.5 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Vision Science 206D.

Basic pharmacology, terminology, and concepts (both pharmacodynamic and pharmacokinetic) and pharmacotherapy of medical conditions commonly encountered in clinical optometric practice (including cardiovascular disease, respiratory disease, diabetes, infection and inflammatory conditions, as well as central nervous system disorders).

Final exam required. Instructor: Wildsoet

OPTOM 226B Ocular Pharmacology 2.5 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 226A.

Basic pharmacology, terminology, and concepts (both pharmacodynamic and pharmacokinetic) as applied to the eye and ophthalmic drugs, clinical prescribing issues including formulation, dosing and prescribing, and pharmacotherapy of anti-inflammatory, centrally acting, hormonal and other "specialist" systemic drugs.

Final exam not required. Instructor: Wildsoet

OPTOM 230A Graduate General Clinical Practice 2 - 6 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 4 hours of clinic per credit hour.**Prerequisites:** O.D. degree.

General optometric practice for four hours per week per credit hour, including optometric examination, dispensing, consultation, and subsequent vision care of patients, performed independently by graduate student clinicians.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

OPTOM 230B Graduate General Clinical Practice 2 - 6 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 4 hours of clinic per credit hour.**Prerequisites:** O.D. degree.

General optometric practice for four hours per week per credit hour, including optometric examination, dispensing, consultation, and subsequent vision care of patients, performed independently by graduate student clinicians.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

OPTOM 231A Graduate Specialty Clinics 2 - 8 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 4 hours of clinic per week per unit.**Prerequisites:** O.D. degree.

Clinical examination of patients in designated specialty clinics. More than one clinical specialty may be taken simultaneously.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

OPTOM 231B Graduate Specialty Clinics 2 - 8 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 4 hours of clinic per week per unit.**Prerequisites:** O.D. degree.

Clinical examination of patients in designated specialty clinics. More than one clinical specialty may be taken simultaneously.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Orel-Bixler

OPTOM 236A Systemic Disease and its Ocular Manifestations 3 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 2 hours of Lecture and 2 hours of Discussion per week for 15 weeks.**Prerequisites:** 200D. 236A is a prerequisite for 236B.

The pathophysiology, pharmacotherapy, and clinical management of systemic and ocular diseases will be discussed through a combination of lecture and problem-based learning approaches. Disease processes will be emphasized and include cellular injury and repair, inflammation, infection, degeneration, and neoplasia. Neurologic, cardiovascular, endocrine, pulmonary, and congenital disease and their relative ocular manifestations will be presented.

Final exam required. Instructor: Harvey

OPTOM 236B Systemic Disease and its Ocular Manifestations 3 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 2 hours of Lecture and 2 hours of Discussion per week for 15 weeks.**Prerequisites:** 236A.

OPTOM 240 Diagnosis and Treatment of Sensory/Motor Anomalies 3 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2.5 hours of lecture per week and 16 hours of laboratory per semester.**Prerequisites:** Vision Science 217 and 219.

Diagnosis and treatment of heterophoria, accommodative, vergence and oculomotor anomalies including sensory anomalies and amblyopia. Rationale and methods for treatment with lenses, prism, occlusion, and vision training. Design and implementation of treatment programs. Final exam not required. Formerly known as 140.

OPTOM 241 Advanced Management and Rehabilitation of Sensory/Motor Anomalies 3 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2.5 hours of lecture per week and 16 hours of laboratory per semester.**Prerequisites:** 240

Advanced diagnosis, prognosis and treatment of strabismus, neurologic oculomotor disorders, amblyopia, and other associated sensory anomalies. Assessment and management of developmental and acquired visual perceptual disorders in relationship to learning disabilities. Design and implementation of treatment programs.

Final exam required. Formerly known as 141.

OPTOM 246 Diagnosis and Treatment of Anterior Segment Ocular Disease 4 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks.**Prerequisites:** 236

This course series consists of the pathophysiology, pharmacotherapy, and clinical management of systemic and ocular diseases through a combination of lecture and problem-based learning approaches. Disease processes will be emphasized and include cellular injury and repair, inflammation, infection, degeneration, and neoplasia. Neurologic, cardiovascular, endocrine, pulmonary, and congenital disease, and their relative ocular manifestations will be presented. The basic principles of pharmacology will be followed by overviews of drugs used to treat diseases of each system. The role of the optometrist in the health care system will be emphasized.

Final exam required. Formerly known as 146.

OPTOM 251 Low Vision 2.5 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2.5 hours of Lecture per week for 15 weeks.**Prerequisites:** 200D.

Epidemiology and etiology of low vision. Optical principles of low vision aids. Optometric examination and treatment of the low vision patient. Interdisciplinary rehabilitation resources, counseling, and referral. Final exam required. Formerly known as 151.

OPTOM 256 Diagnosis and Treatment of Posterior Segment Ocular Disease 4 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks.**Prerequisites:** 246

This course series consists of the pathophysiology, pharmacotherapy, and clinical management of systemic and ocular diseases through a combination of lecture and problem-based learning approaches. Disease processes will be emphasized and include cellular injury and repair, inflammation, infection, degeneration, and neoplasia. Neurologic, cardiovascular, endocrine, pulmonary, and congenital disease and their relative ocular manifestations will be presented. The basic principles of pharmacology will be followed by overviews of drugs used to treat diseases of each system. The role of the optometrist in the health care system will be emphasized.

Final exam not required. Formerly known as 156.

OPTOM 260A Contact Lenses: Examination Principles and Practice 3 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Examination procedures and instrumentation used in monitoring the ocular response to contact lenses. Contact lens inspection, care, and handling. Physical and optical properties of contact lenses. Fitting contact lenses to the human eye, clinical implications. The Sarver Lecture series in Contact Lenses (12 hours on a Saturday and Sunday.).

Final exam not required. Formerly known as 160A.

OPTOM 270A Eyecare Business and Professional Management I 1 Unit**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of Lecture per week for 15 weeks.**Prerequisites:** 200B.

Ethics in general, and in an optometric setting in particular, are presented and discussed. Debt management, goal setting, epidemiological trends and health care implications, and micro-economics as it affects the practice of optometry.

Final exam not required.

OPTOM 270B Eyecare Business and Professional Management II 1 Unit**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of Lecture per week for 15 weeks.**Prerequisites:** 270A.

Patient scheduling, patient communication, systems design and office flow, accounting and finance in an optometric setting, fee computation techniques.

Final exam required.

OPTOM 270C Eyecare Business and Professional Management III 2 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/seminar per week.**Prerequisites:** 270A.

Entrepreneurship, financing alternatives, business loans, human resources, marketing, personal finance, business law as it affects optometry.

Final exam not required.

OPTOM 281A Graduate Clinical Rounds 1 - 3 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Seminar/patient demonstration.**Prerequisites:** O.D. degree.

Presentation and discussion of the diagnosis, etiology, prognosis, and treatment of selected clinical cases.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

OPTOM 281B Graduate Clinical Rounds 1 - 3 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Seminar/patient demonstration.**Prerequisites:** O.D. degree.

Presentation and discussion of the diagnosis, etiology, prognosis, and treatment of selected clinical cases.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

OPTOM 291A Optometry Research Project 1 Unit**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 290A-290B.

Thesis research for optometry students. Presentation of research results. Final exam required. Formerly known as 191A-191B. Instructor: Cohn

OPTOM 291B Optometry Research Project 1 Unit**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only. This is part two of a year long series course. Upon completion, the final grade will be applied to both parts of the series.**Hours and format:** 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 290A-290B.

Thesis research for optometry students. Presentation of research results. Final exam required. Formerly known as 190A-190B.

OPTOM 292A Graduate Optometry Seminar 1 - 3 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Seminar.**Prerequisites:** O.D. degree.

Graduate seminars on selected topics in clinical optometry.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

OPTOM 292B Graduate Optometry Seminar 1 - 3 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Seminar.**Prerequisites:** O.D. degree.

Graduate seminars on selected topics in clinical optometry.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

OPTOM 298A Independent or Group Studies 1 - 6 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Directed studies.**Prerequisites:** O.D. degree.

Directed studies on a selected topic(s) within optometry.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

OPTOM 298B Independent or Group Studies 1 - 6 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Directed studies.**Prerequisites:** O.D. degree.

Directed studies on a selected topic(s) within optometry.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

OPTOM 299A Graduate Optometry Research 2 - 4 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Research.**Prerequisites:** O.D. Degree.

Directed research on a selected topic within clinical optometry.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

OPTOM 299B Graduate Optometry Research 2 - 4 Units**Department:** Optometry**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Research.**Prerequisites:** O.D. Degree.

Directed research on a selected topic within clinical optometry.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

OPTOM 430A Optometry Clinics 8 Units**Department:** Optometry**Course level:** Other professional**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Minimum of 32 hours of clinic per week combined with 1 hour of lecture per week and 4 hours of seminar per week for 8 weeks. Minimum of 37 hours of clinic per week combined with 1 and 1 half hours of lecture per week and 5 hours of seminar per week for 6 weeks.**Prerequisites:** 100D.

Clinical practice in examination techniques and interpretation of clinical data. Primary care optometric exams.

Final exam not required.

OPTOM 430B Optometry Clinics 9 Units**Department:** Optometry**Course level:** Other professional**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 2 hours of seminar per week and a minimum of 18 hours of clinic per week.**Prerequisites:** 430A.

Examination of patients in a primary care setting, prescribing of optometric therapy, management of emergency procedures, and vision screenings of children and adults.

Final exam not required. Instructor: Revelli

OPTOM 430C Optometry Clinics 9 Units**Department:** Optometry**Course level:** Other professional**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 2 hours of seminar per week and a minimum of 18 hours of clinic per week.**Prerequisites:** 430A.

Examination of patients in a primary care setting, prescribing of optometric therapy, management of emergency procedures, and vision screenings of children and adults.

Final exam not required. Instructor: Revelli

OPTOM 435 Advanced Procedures in Ocular Disease Diagnosis 2 Units**Department:** Optometry**Course level:** Other professional**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture and 2 hours of Laboratory per week for 15 weeks.

Instrumentation, techniques, and principles for examination, diagnosis, and treatment of ocular disease. Introduction to optometric informatics related to ocular disease.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

OPTOM 440A Advanced Optometry Clinic 5 Units**Department:** Optometry**Course level:** Other professional**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of seminar per week and a minimum of 20 hours of clinic per week.**Prerequisites:** 430C.

Optometric examination of patients in the primary care clinic performed independently by student clinicians under supervision of the clinical staff. Final exam not required. Formerly known as 490.

OPTOM 440B Advanced Optometry Clinic 9 Units**Department:** Optometry**Course level:** Other professional**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 2 hours of seminar per week and a minimum of 22 hours of clinic per week.**Prerequisites:** 440A and 441A.

Examination of patients in a primary care setting. Diagnosis, prognosis, treatment, patient management and follow-up.

Final exam not required. Instructor: Revelli

OPTOM 440C Advanced Optometry Clinic 9 Units**Department:** Optometry**Course level:** Other professional**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 2 hours of seminar per week and a minimum of 22 hours of clinic per week.**Prerequisites:** 440A and 441A (offered Summer Session only).

Examination of patients in a primary care setting. Diagnosis, prognosis, treatment, patient management and follow-up.

Final exam not required. Instructor: Revelli

OPTOM 441A Specialty Clinics 5 Units**Department:** Optometry**Course level:** Other professional**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of seminar per week and a minimum of 16 hours of clinic per week.**Prerequisites:** 430C.

Examination, diagnosis, prognosis, treatment, and management of patients in the specialty clinics.

Final exam not required. Formerly known as 490.

OPTOM 441B Specialty Clinics 7 Units**Department:** Optometry**Course level:** Other professional**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Minimum of 15 to 20 hours of clinic per week.**Prerequisites:** 440A and 441A (offered Summer Session only).

Examination, diagnosis, prognosis, treatment, and/or management of patients in specialty clinics; ocular disease, contact lenses, binocular vision, ophthalmic optics, and environmental and occupational vision. Final exam not required.

OPTOM 441C Specialty Clinics 7 Units**Department:** Optometry**Course level:** Other professional**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Minimum of 15 to 20 hours of clinic per week.**Prerequisites:** 440A and 441A (offered Summer Session only).

Examination, diagnosis, prognosis, treatment, and/or management of patients in specialty clinics; ocular disease, contact lenses, binocular vision, ophthalmic optics, and environmental and occupational vision. Final exam not required.

OPTOM 450A Grand Rounds and Seminar 2 Units**Department:** Optometry**Course level:** Other professional**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 2 hours of Discussion per week for 15 weeks.**Prerequisites:** 440A.

Presentation of clinical cases demonstrating basic and advanced optometric care, including diagnosis, treatment, and patient management. Final exam not required. Formerly known as 450B-450C. Instructors: Bailey, Sheedy

OPTOM 450B Grand Rounds and Seminar 2 Units**Department:** Optometry**Course level:** Other professional**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 2 hours of Discussion per week for 15 weeks.**Prerequisites:** 440A.

Presentation of clinical cases demonstrating basic and advanced optometric care, including diagnosis, treatment, and patient management. Final exam not required. Instructor: Revelli

OPTOM 452 Current Concepts in Ocular Disease 1 Unit**Department:** Optometry**Course level:** Other professional**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Seminar per week for 15 weeks.**Prerequisites:** 440B and 441B.

Recent advances in the detection, diagnosis, and management of ocular disease.

Final exam not required.

OPTOM 490A Optometric Spanish - Beginner Level I 1 Unit**Department:** Optometry**Course level:** Other professional**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of Lecture per week for 15 weeks. 2 hours of Lecture per week for 8 weeks.

This course provides an introduction to Spanish in its uses in a clinical optometry setting with the Spanish-speaking patient. Basic vocabulary and grammar acquisition and skill building exercises will help the practitioner perform conversations and procedures in simple but accurate and clear communications. The sounds and structures of Spanish, including the present tense and some other verbs will be covered. All materials will be taught and practiced in relation to their practical application in a clinical setting. Final exam required.

OPTOM 490B Optometric Spanish - Intermediate Level II 1 Unit**Department:** Optometry**Course level:** Other professional**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of Lecture per week for 15 weeks. 2 hours of Lecture per week for 8 weeks.

This course provides vocabulary and grammar acquisition and skill building for the intermediate to advanced Spanish student who works with Spanish-speaking patients in the field of optometry. Emphasis is on practical, hands-on application of the materials: patient interviewing, doing various aspects of the eye exam, taking a history, and giving diagnostic, treatment, and follow-through information to the patient, with appropriate cultural sensitivity, taking into consideration the socio-cultural background of the patient. The goal is accurate and sophisticated communication. Final exam required.

OPTOM 499 Supervised Independent Study 1 - 12 Units**Department:** Optometry**Course level:** Other professional**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 12 hour of Independent study per week for 15 weeks. 1.5 to 20-2.5 hours of Independent study per week for 8 weeks. 2.5 to 18 hours of Independent study per week for 6 weeks.**Prerequisites:** Consent of instructor.

Independent study under control of Associate Dean for Student Affairs. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Peace and Conflict Studies (PACS)

PACS 10 Introduction to Peace and Conflict Studies 4 Units**Department:** Peace and Conflict Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 7 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 10 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

This course introduces students to a broad range of issues, concepts, and approaches integral to the study of peace and conflict. Subject areas include the war system and war prevention, conflict resolution and nonviolence, human rights and social justice, development and environmental sustainability. Required of all Peace and Conflict Studies majors.

Final exam required. Instructor: Sanders

PACS 24 Freshman Seminar 1 Unit**Department:** Peace and Conflict Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of Seminar per week for 15 weeks. 2 hours of Seminar per week for 8 weeks.

The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments, and topics vary from department to department and semester to semester. Enrollment is limited to 15 freshmen. Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

PACS 94 Theory and Practice of Meditation 1 Unit**Department:** Peace and Conflict Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 2 hours of discussion and practice per week for 15 weeks. 5 hours of discussion and practice per week for 6 weeks.

A practicum using a modern method for systematically reducing random activity in the mind, with comparative studies of relevant texts from monastic and householder traditions, East and West.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

PACS 98 Directed Group Study 1 - 3 Units**Department:** Peace and Conflict Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hours of lecture/group study per week.

Group discussion, research and reporting on selected topics.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PACS 100 Peace Theory: Approaches and Analyses 3 Units**Department:** Peace and Conflict Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 10

This course will explore the historical development of the field through analysis of the operative assumptions, logic, and differing approaches of the seminal schools and thinkers that have shaped the field. Students will become familiar with the body of literature and major debates in peace studies and research.

Final exam required. Instructor: Sanders

PACS 119 Special Topics in Peace and Conflict Issues 4 Units**Department:** Peace and Conflict Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks. 15 hours of Lecture per week for 3 weeks.

Course will focus on specific issues of current research and issues in the field of peace and conflict studies. Topics will be different each term and reflect the current research of the instructor. Students will be required to do extensive reading on a weekly basis, participate in assigned projects, and complete one major research project and class presentation. Actual assignments may vary from term to term depending upon the subject. Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

PACS 125AC War, Culture, and Society 4 Units**Department:** Peace and Conflict Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 8 weeks. 10 hours of Lecture per week for 6 weeks.

This course examines the experience and meaning of war in the formation of American culture and society. It considers the profound influence war has had in shaping the identities and life chances of succeeding generations of American men and women. It will take special note of the role of race, ethnicity, and class as prisms that filter this process. This course also explores how different interpretations of democracy and nationalism have served as a catalyst for social conflict and change in racial and ethnic identity and relations, especially as reflected in war. Satisfies the American Cultures requirement. Final exam required.

PACS 126 International Human Rights 4 Units**Department:** Peace and Conflict Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

This course provides an overview to the historical, theoretical, political, and legal underpinnings that have shaped and continue to shape the development of human rights. Students are introduced to substantive topics within human rights and provided an opportunity to develop critical thinking, oral presentation, and writing skills. We discuss where the concept of human rights originates, how these ideas have been memorialized in international declarations and treaties, how they develop over time, and how they are enforced and monitored. We examine a variety of issues and encourage students to think differently--to analyze world and community events through a human rights framework utilizing some of the necessary tools to investigate, research, and think critically about human rights and the roles that we may assume within this arena. The course requires two six-page papers, participation in a team debate, and an independent reading assignment. Final exam required.

PACS 127 Human Rights and Global Politics 4 Units**Department:** Peace and Conflict Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

After World War II, we witnessed a "revolution" in human rights theory, practice, and institution building. The implications of viewing individuals as equal and endowed with certain rights is potentially far reaching as in the declaration that individuals hold many of those rights irrespective of the views of their government. Yet, we also live in a world of sovereign states with sovereign state's rights. We see everyday a clash between the rights of the individual and lack of duty to fulfill those rights when an individual's home state is unwilling or unable to do so. After introducing the idea of human rights, its historic development and various international human rights mechanisms, this course will ask what post-World War II conceptions of human rights mean for a number of specific issues including humanitarian intervention, international criminal justice, U.S. foreign policy, immigration, and economic rights. Looking in-depth at these five areas, we will ask how ideas about human rights, laws about human rights, and institutions to protect human rights have on how states and other global actors act, and how individuals have fared. Final exam required. Formerly known as 127B.

PACS 128AC Human Rights and American Cultures 4 Units**Department:** Peace and Conflict Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 8 weeks.

The course analyzes the theory and practice of human rights for three groupings in the United States and examines questions of race and ethnicity as they are embedded in various international human rights instruments. The course utilizes an interdisciplinary approach to the study of developing systems, laws, and norms for the promotion and protection of human rights while considering each group's underlying political, literary, and cultural traditions.

Satisfies the American Cultures requirement

Final exam required.

PACS 130 Cross-Listed Topics 1 - 4 Units**Department:** Peace and Conflict Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hour of Lecture per week for 15 weeks. 1.5 to 7.5 hours of Lecture per week for 8 weeks. 2.5 to 10 hours of Lecture per week for 6 weeks.**Prerequisites:** Consent of instructor.

This course is designed to accommodate cross-listed courses offered through other departments, the content of which is applicable to Peace and Conflict Studies majors.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

PACS 135 Special Topics in Regional Conflict 3 Units**Department:** Peace and Conflict Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

Topics vary from semester to semester. The course will offer a critical interdisciplinary study of geo-political regions and the sources of their conflicts.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

PACS 148AC/IAS 158AC Social Movements, Urban Histories, and the Politics of Memory 4 Units**Department:** Peace and Conflict Studies; International and Area Studies**Course level:** Undergraduate**Term course may be offered:** Spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 1 hour of discussion per week. Course examines the history of progressive social movements in the San Francisco Bay Area. Combining history, sociology, urban geography, and ethnic studies, we ask: why and how these movements emerged? What cultural, racial, ethnic and political identities were drawn from, reconfigured, and created within these movements? What kinds of knowledge and institutions were created by these movements, and how have these legacies shaped (and been shaped by) the geography, culture, and politics of the area. As part of the ACES program, this course also engages students in creating social movement documentation through collaborations with community partners. Small student groups, supervised by an ACES Fellow, will carry out documentation projects. Satisfies the American Cultures requirement**Course Objectives:** #NAME?

Final Research Project Instructor: Burns

PACS 149 Global Change and World Order 3 Units**Department:** Peace and Conflict Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

This course will analyze emerging trends, patterns, and problems associated with the phenomenon of globalization. Particular attention will be given to world economic and social integration, ethno-religious nationalism and identity politics, domestic politics, and foreign policy. Special emphasis is placed on the prospects of peace and world order in the post-cold war era.

Final exam required. Instructor: Sanders

PACS 150 Conflict Resolution: Theory and Practice 3 Units**Department:** Peace and Conflict Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.

This course will investigate theories of individual and group conflict as a conceptual framework for practical application. Students will engage in practice as parties to conflicts and as third-party intervenors. The course will look at the sources of conflict, including multicultural aspects, and will emphasize the opportunities for growth and development in conflictive incidents.

Final exam required.

PACS 150AC Conflict Resolution: Theory and Practice 3 Units**Department:** Peace and Conflict Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.This course explores the nature of interpersonal and group conflict, resolution, and their relationship to culture. The course examines the intersection between conflict and race and ethnicity in particular, with an emphasis on the major racial/ethnic groups in the United States. Other dimensions of diversity such as gender, class, and sexual orientation in conflict situations are also explored. The goal is to apply this understanding to resolving intercultural conflicts through mediation. Satisfies the American Cultures requirement
Students will receive no credit for 150AC after taking 150. Final exam required.**PACS 151 International Conflict: Analysis and Resolution 3 Units****Department:** Peace and Conflict Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.

Inspired by the changed meaning of international conflict and the expanding mission of conflict resolution in the post-cold war era, this course will study the contemporary context and issues of conflict by examining the evolution in thinking about conflict, the resolution, and their application in practice.

Final exam required. Instructor: Sanders

PACS 154 Multicultural Conflict Resolution 4 Units**Department:** Peace and Conflict Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 8 weeks.**Prerequisites:** 150 and 153, or consent of instructor.

This course will investigate the special issues involved with facilitating resolution of cross/multicultural conflicts. Topics will include cultural contrasts (e.g., values, communication, and problem solving styles), mediator (facilitator/negotiator), credibility, cultural (including gender) contributions to conflict resolution and unique ethical dilemmas. Introduction to ethical and political philosophy.

Final exam required.

PHILOS 3 The Nature of Mind 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

Introduction to the philosophy of mind. Topics to be considered may include the relation between mind and body; the structure of action; the nature of desires and beliefs; the role of the unconscious.

Final exam required.

PHILOS 4 Knowledge and Its Limits 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

Introduction to the theory of knowledge.

Final exam required.

PHILOS 6 Man, God, and Society in Western Literature 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

Philosophical issues as expressed in poetry, drama, and the novel. This course will compare and contrast the Greek, Medieval, and modern worlds, as reflected in their greatest literature, with special emphasis on the role of the community in reconciling conflicts between sub-groups in society and the individual's ability to understand and control his own life. We will also follow man's realization that the changing answers to these questions are themselves self-interpretations.

Final exam required.

PHILOS 7 Existentialism in Literature and Film 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Christian, agnostic, and atheistic existentialism as expressed in the works of Dostoyevsky, Melville, Kafka, Antonioni, Goddard, etc.

Final exam required.

PHILOS 11 Introduction to the Philosophy of Religion 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

A survey of basic issues in contemporary philosophy of religion, exploring arguments about God's existence, the status of religious experiences and beliefs, how souls might interact with bodies, and the relationship of God to morality.

Final exam required.

PHILOS 12A Introduction to Logic 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks. 7.5 hours of Lecture and 5 hours of Discussion per week for 6 weeks.

Syntax, semantics, and proof theory of sentential and predicate logic.

Final exam required.

PHILOS 13 Business Ethics 3 Units**Department:** Philosophy**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7.5 hours of Lecture per week for 6 weeks.

This course addresses the nature of ethical motivation and agency, with special attention to the individual's role in a business organization. Topics include theories of ethical motivation; individual character and organizational culture; personal integrity; corporate agency; corporate responsibility to society.

Final exam required. Instructor: Merritt

PHILOS 16 Introduction to Metaphysics 3 Units**Department:** Philosophy**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7.5 hours of Lecture per week for 6 weeks.

This course is an introduction to some of the traditional questions in metaphysics--the study of what there is in the world and how what there is is structured. Topics will include free will and determinism, the mind-body problem, and personal identity. If time permits, we will also examine arguments for the existence of God.

Final exam required.

PHILOS 17 Concepts of the Person in Novel, Drama, and Film 3 Units**Department:** Philosophy**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture per week for 8 weeks.

In any culture, the way we act implies some view of what it is to be a person, and indeed what it is to be a particular kind of person, e.g., black or white, male or female, citizen or non-citizen. This view determines what roles and privileges are available to specific individuals and how these individuals will think of themselves and evaluate their actions and obligations. We will focus on works of philosophy, literature and film which have had a powerful and lasting impact on our culture.

Final exam not required.

PHILOS 21X Philosophy of Biology 4 Units**Department:** Philosophy**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture and 4 hours of Discussion per week for 6 weeks.

Are living things simply complex machines? Many philosophers and biologists think that they are, for to think otherwise seems to fly in the face of recent scientific advances and threatens to reintroduce into biology unscientific notions like "spirit" and "vital force". This course takes seriously the position that life can not be reduced to chemical and physical processes. We will also study ways this question affects our understanding of the freedom of the will, the relation of the mind to the body, and "evolutionary" explanations of gender differences.

Final exam required.

PHILOS 22X The Self and the World 4 Units**Department:** Philosophy**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture and 4 hours of Discussion per week for 6 weeks.

What sort of thing am I? And what is my relation to others, and to the world in general? We will consider versions of these questions, as they are asked and answered in a variety of classical and contemporary philosophical texts: what can we know about the world? Is the skeptic right to answer: nothing? What is it in the nature of minds (and bodies) which makes knowledge seem so problematic? How are minds and bodies related to those things which have them: persons? And how does this bear on the question of the meaning of life?

Final exam required.

PHILOS 23X Philosophy and Medicine 4 Units**Department:** Philosophy**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

We will consider the following questions: Is medicine a science? What are its aims? How are the central concepts of "health" and "disease" defined? What is meant by the charge that there is an "overmedication of everyday life" in our society and is that charge justified? What is "medical reductionism" and what are its limits? What are the assumptions behind "specialistic" and holistic approaches to medicine and which of these two approaches serves better the aims of medicine? What is the proper place of medicine in the social, legal, and moral contexts?.

Final exam required.

PHILOS 24 Freshman Seminar 1 Unit**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of Seminar per week for 15 weeks.

The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Freshman seminars are offered in all campus departments, and topics vary from department to department and semester to semester. Enrollment is limited to 15 freshmen. Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

PHILOS 24X Social Justice 4 Units**Department:** Philosophy**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture and 3.5 hours of Discussion per week for 6 weeks.

This course will examine the values underlying different visions of a just society. Freedom, equal opportunity, and community are considered important, for example, but there is little agreement on how these values should be realized. The course will consider various perspectives on these values and their practical implications. Special attention will be devoted to the role of the government in economic affairs, equal educational opportunities, and nationalism.

Final exam required.

PHILOS 25A Ancient Philosophy 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

The history of ancient philosophy with special emphasis on the Presocratics, Plato, and Aristotle.

Final exam required.

PHILOS 25B Modern Philosophy 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

The history of modern philosophy from Descartes through Kant.

Final exam required.

PHILOS 39M Freshman Seminar 3 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Study of various fields of philosophy of special interest to freshman. Topics will vary from semester to semester and will be individually announced. Freshman seminars are restricted to fifteen students each. Course may be repeated for credit when topic changes. Final exam required.

PHILOS 98 Directed Group Study for Lower Division Students 1 Unit**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Prerequisites:** Lower Division standing

Directed study on special topics. One unit per weekly hour of instruction. Must be taken on a passed/not passed basis. Please see the Introduction to Courses and Curricula section of this catalog. Course may be repeated for credit when topic changes. Final exam not required.

PHILOS 100 Philosophical Methods 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 2 hours of Discussion per week for 15 weeks.**Prerequisites:** Two courses from 2, 4, 25A, 25B. Restricted to students in the major.

The course is designed to acquaint students with the techniques of philosophical reasoning through detailed study of selected philosophical texts and through extensive training in philosophical writing, based on those texts. Should be taken as early as possible after declaring the major.

Final exam not required.

PHILOS 104 Ethical Theories 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.

The fundamental concepts and problems of morality examined through the study of classical and contemporary philosophical theories of ethics. Final exam required. Formerly known as C104.

PHILOS 107 Moral Psychology 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.

An investigation of central issues in moral psychology, such as: free will, weakness of will, self-deception, moral motivation, emotions, virtues, moral education.

Final exam required.

PHILOS 108 Contemporary Ethical Issues 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.**Prerequisites:** 2 or 104, or two courses in philosophy, or consent of instructor.

This course will be devoted to in-depth discussion of a variety of problems in moral philosophy raised by real-life questions of individual conduct and social policy. Its contents will vary from occasion to occasion. Possible topics include philosophical problems posed by affirmative action, abortion, euthanasia, capital punishment, terrorism, war, poverty, and climate change.

Course may be repeated for credit with consent of instructor if the content changes sufficiently. Course may be repeated for credit when topic changes. Final exam required.

PHILOS 109 Freedom and Responsibility 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.

A systematic examination of freedom and responsibility. The following topics will be addressed (among others): the relations between freedom of will, freedom of action, and autonomy; moral responsibility and its conditions; naturalism, determinism, and their relevance for human freedom; practical deliberation and the structure of the will; weakness and strength of will. Readings may be drawn from both historical and contemporary sources.

Final exam required.

PHILOS 110 Aesthetics 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 1 hour of discussion per week.**Prerequisites:** Upper division courses in philosophy or consent of instructor. Majors in literature or the arts.

Visual arts/literature and music. Form, expression, representation style; interpretation and evaluation.

Course may be repeated for credit when topic changes. Final exam required.

PHILOS 112 Special Topics in Aesthetics 3 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks.

This course is intended to allow a more focused exploration of particular topics in aesthetics than is possible in Philosophy 110. Its contents will vary from occasion to occasion. Topics may include philosophical questions arising for particular art forms such as painting, music, or dance; questions about form, expression, representation, and emotion in aesthetic experience; or the ideas of particular aesthetic movements or schools of thought.

Final exam not required.

PHILOS C112/MUSIC C128P Music and Meaning 3 Units**Department:** Philosophy; Music**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week. This course may include 1 field trip to a local concert.

This course will explore the question of whether music has meaning, and if so, what kind. Can music represent, say, birdsong, or the sea, or merely imitate? If music expresses emotions, then whose--those of the listener? The composer? The performer? We will consider parallels and contrasts between linguistic and musical meaning, theories of how music can be expressive, and the question of whether music can convey political meaning.

Students will receive no credit for Music C128P/Philosophy C112 after taking Philosophy 112.
 There will be a final paper in lieu of a final exam. Instructors: Smart, Ginsborg

PHILOS 114 History of Political Philosophy 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** One course in philosophy.

A survey of the major political philosophers, including some or all of Plato, Aristotle, Hobbes, Locke, Rousseau, Kant, Bentham, Mill, and Marx. Final exam required.

PHILOS 115 Political Philosophy 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Analysis of political obligation and related problems.

Final exam required.

PHILOS 116 Special Topics in Political Philosophy 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 115 or equivalent.

This course is designed to deal with a variety of topics in political philosophy. Its contents will vary from occasion to occasion. Possible topics include problems in liberal theory; justice, desert, and responsibility; communitarianism, nationalism, and cosmopolitanism.

Final exam required.

PHILOS 119 Feminism and Philosophy 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 1 hour of discussion per week. This course will introduce students to a range of historical and contemporary feminist issues.

Final exam not required. Instructor: Madva

PHILOS 122 Theory of Knowledge 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Final exam required.

PHILOS 125 Metaphysics 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

An advanced introduction to contemporary metaphysics, focusing on the ideas of objectivity, existence, naturalness, identity, time, causation, and possibility.

Final exam required.

PHILOS 127 Rationality and Irrationality in Science 3 Units**Department:** Philosophy**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture per week for 8 weeks.

Science is often regarded as preeminently rational. Yet recent work in philosophy, history and sociology of science suggests that scientific knowledge is no more rationally established than other sorts of knowledge, and that scientists' convictions are driven more by party loyalty and ego than by a pureminded pursuit of truth. This course will consider the case for and against the rationality of science. It will also consider the recent controversy concerning "scientific" creationism.

Final exam not required.

PHILOS 128 Philosophy of Science 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

A survey of main topics in the logic of science and of other issues coming under the general heading of philosophy of science.

Final exam required.

PHILOS 132 Philosophy of Mind 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Mind and matter; other minds; the concept "person.".

Final exam required.

PHILOS C132/L & S C160T Philosophy of Mind 4 Units**Department:** Philosophy; Letters and Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Mind and matter; other minds; the concept of "person.".

Final exam required.

PHILOS 133 Philosophy of Language 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Final exam required.

PHILOS 134 Form and Meaning 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: Eight units of philosophy courses and 12A (or equivalent). How is the meaning of a whole sentence determined by the meanings of its parts, and by its structure? This question is addressed in empirical semantic theories for natural language. The character and content of such theories has been a central concern both of the philosophy of language and of recent linguistics, and it is the central focus of this course.

Final exam required. Instructor: Yalcin

PHILOS 135 Theory of Meaning 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Prerequisites: One course in logic or consent of instructor. Language as social behavior. Language compared to other sign systems. The foundations of semantics, truth, meaning, reference. Issues of logical form in belief sentences, indirect discourse, sentences about causality, events, actions. Relations between thought and language.

Final exam required.

PHILOS 136 Philosophy of Perception 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** One previous course in philosophy is recommended.

The philosophy of perception is a microcosm of the metaphysics of mind. Its central problems - What is perception? What is the nature of perceptual consciousness? How can one fit an account of perceptual experience into a broader account of the nature of the mind and the world? - are problems at the heart of metaphysics. It is often justifiably said that the theory of perception (and especially vision) is the area of psychology and neuroscience that has made the greatest progress in recent years. Despite this progress, or perhaps because of it, philosophical problems about perception retain a great urgency, both for philosophy and for science.

Final exam required.

PHILOS 138 Philosophy of Society 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This course deals with the ontology of society and thus provides a foundation for the social sciences. The main questions discussed are: 1) What is the mode of existence of social reality? 2) How does it relate to psychological and physical reality? 3) What implications does social ontology have for social explanations?.

Final exam required.

PHILOS 140A Intermediate Logic 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Major concepts, results, and techniques of modern logic. Basic set theoretic tools. Model theoretic treatment of propositional and first-order logic (completeness, compactness, Lowenheim-Skolem). Philosophical implications of these results.

Final exam required.

PHILOS 140B Intermediate Logic 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 140A or equivalent.

Major concepts, results, and techniques of modern logic. Turing machines, computability theory, undecidability of first-order logic, proof theory, Godel's first and second incompleteness theorems. Philosophical implications of these results.

Final exam required.

PHILOS 141 Philosophy and Game Theory 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.**Prerequisites:** One course in philosophy.

An exploration of how game theory and rational choice theory shed light on traditional philosophical problems; and of new paradoxes and problems introduced by these theories.

Final exam required.

PHILOS 142 Philosophical Logic 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The course aims at introducing students to the basic topics in philosophy of logic. Among the topics to be treated are the notions of validity, truth and truth functionality, quantification, and necessity.

Final exam required.

PHILOS 143 Modal Reasoning 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Philosophy 12A (or equivalent) or consent of instructor.

An introduction to the logical study of modality in its many forms: reasoning about necessity, knowledge, obligation, time, counterfactuals, provability, and other modal notions. Covers core concepts and basic metatheory of propositional modal logic, including relations to first-order logic; basics of quantified modal logic; selected philosophical applications ranging from epistemology to ethics, metaphysics to mathematics.

Final exam required.

PHILOS 146 Philosophy of Mathematics 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Foundations of mathematics: logicism, intuitionism, formalism. Set theoretical paradoxes, definition of numbers, problems of continuum.

Final exam required.

PHILOS 149 Special Topics in Philosophy of Logic and Mathematics 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course is conceived in analogy with Philosophy 129 (Special Topics in Philosophy of Science). It is supposed to allow the class to focus on more specific problems in philosophy of logic or mathematics than can be treated in a broad introductory course such as Philosophy of Mathematics (Philosophy 146) or Philosophical Logic (Philosophy 142).

Final exam required.

PHILOS 155 Medieval Philosophy 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

A study of some of the major philosophical texts from the medieval period with a focus on issues in metaphysics and epistemology. Topics may include universals, individuation, the nature and existence of God, faith and reason, skepticism, freedom, language, human nature and human cognition.

Final exam required.

PHILOS 156A Foundations of Analytic Philosophy: Frege 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

The work of Gottlob Frege with special emphasis on his contributions to logic, the philosophy of mathematics, and the philosophy of language.

Final exam required. Instructor: Sluga

PHILOS 160 Plato 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Final exam required.

PHILOS 161 Aristotle 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Final exam required.

PHILOS 163 Special Topics in Greek Philosophy 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Philosophy 25A or equivalent.

The course is designed to deal with a variety of topics in Greek philosophy. Its contents will vary from occasion to occasion. Possible topics are: the close study of one or more of Plato's dialogues, the reading of one of Aristotle's texts, stoicism, scepticism, and neo-platonism. Final exam required.

PHILOS 170 Descartes 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Final exam required.

PHILOS 172 Spinoza 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Final exam required.

PHILOS 173 Leibniz 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Final exam required.

PHILOS 176 Hume 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Final exam required.

PHILOS 178 Kant 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Final exam not required.

PHILOS 181 Hegel 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 5.5 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Final exam required.

PHILOS 183 Schopenhauer and Nietzsche 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

An examination of the philosophy of Schopenhauer and Nietzsche.

Final exam required.

PHILOS 184 Nietzsche 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Final exam required.

PHILOS 185 Heidegger 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

A study of Heidegger's .

Final exam required. Formerly known as 187.

PHILOS 186B Later Wittgenstein 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

A close reading and extended discussion of central parts of Wittgenstein's Philosophical Investigations.

Final exam required.

PHILOS 187 Special Topics in the History of Philosophy 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

The course's specific content will vary from occasion to occasion but either the course will focus narrowly upon problems drawn from the work of a philosopher in the 160 to 178 series, or it will study several influential philosophers, active mainly before the twentieth century, who shared a common outlook or who were linked by other types of philosophically significant reaction to one another's work.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

PHILOS 188 Phenomenology 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.

Backgrounds of phenomenology and existentialism. Husserl and Merleau-Ponty.

Final exam required. Formerly known as 186.

PHILOS N188 Phenomenology 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

Backgrounds of phenomenology and existentialism. Husserl and Merleau-Ponty.

Final exam not required. Formerly known as 186.

PHILOS 189 Special Topics in Recent European Philosophy 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

The course is designed to deal with a variety of topics in recent European philosophy. Its contents will vary from occasion to occasion. Possible topics include: further work in phenomenology and existentialism, the study of a particular text by an important figure in contemporary European philosophy, current French and German philosophy.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

PHILOS 190 Proseminar 3 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Prerequisites: Philosophy majors who have taken at least two upper-division philosophy courses.

A seminar-style exploration of some topic in philosophy. The students and instructor will investigate the topic in a collaborative way, through discussion rather than lecture. Topics vary from semester to semester. Enrollment is limited to 15 undergraduate philosophy majors.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHILOS H195 Philosophy Tutorial 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Tutorial per week for 15 weeks. Zero hours of Tutorial per week for 8 weeks. Zero hours of Tutorial per week for 6 weeks.

Prerequisites: Students in Honors Program.

The department will designate a tutor, under whose guidance the student will seek to satisfy the thesis requirement of the Honors Program.

Final exam not required.

PHILOS 198 Group Study 1 - 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Tutorial. 1 unit per weekly hour of instruction.

Prerequisites: Consent of instructor.

Directed study on special topics.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

PHILOS 199 Supervised Independent Study and Research 1 - 4 Units**Department:** Philosophy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Tutorial. 1 unit per weekly hour of instruction.

Enrollment restrictions apply; see the Introduction to Courses and Curricula section in this catalog.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHILOS 200 First-Year Graduate Seminar 3 Units**Department:** Philosophy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

A combination seminar and tutorial, required of and limited to first year graduate students in philosophy.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHILOS 250 Special Studies 1 - 9 Units**Department:** Philosophy**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Tutorial.**Prerequisites:** Admission to candidacy for the doctoral degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHILOS 251 Directed Studies 1 - 9 Units**Department:** Philosophy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Tutorial.**Prerequisites:** Consent of instructor.

Open to qualified students wishing to pursue special study or research under the direction of a member of the staff.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHILOS 290 Seminar 3 Units**Department:** Philosophy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Advanced study in various fields of philosophy. Topics will vary from semester to semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHILOS 295 Dissertation Seminar 2 Units**Department:** Philosophy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Restricted to graduate students who are writing dissertations in philosophy.

Presentations by graduate students of dissertation research in progress.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as 109.

PHILOS 299 Independent Study 2 - 12 Units**Department:** Philosophy**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Independent study.**Prerequisites:** Consent of instructor.

Course may be repeated for credit when topic changes. Final exam not required.

PHILOS 301 Professional Preparation: The Teaching of Philosophy 2 - 6 Units**Department:** Philosophy**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks.**Prerequisites:** Appointment as a graduate student instructor.

Students will work as teachers under the guidance of a faculty member. They will attend lectures, guide classroom discussion, and participate in a workshop in teaching methods.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Course does not satisfy unit or residence requirements for doctoral degree. Final exam not required.

PHILOS 375 Graduate Student Instructor Teaching Seminar 3 Units**Department:** Philosophy**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 1-hour seminar per week.**Prerequisites:** Admission to Ph.D. program.

A hands-on training seminar for new philosophy GSIs that addresses both practical and theoretical issues.

Final exam not required. Formerly known as Philosophy 302.

PHILOS 602 Individual Study for Doctoral Students 1 - 8 Units**Department:** Philosophy**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Independent study.

Individual study in consultation with the major field adviser, intended to provide an opportunity for qualified students to prepare themselves for the various examinations required of candidates of the Ph.D.

Course may be repeated for a maximum of 16 units. Course may be repeated for a maximum of 16 units. Course does not satisfy unit or residence requirements for doctoral degree. Final exam not required.

PHILOS 603 Independent Philosophical Studies 1 - 4 Units**Department:** Philosophy**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Independent study.**Prerequisites:** Graduate standing.

Reading or other advanced study by arrangement with a staff member, for preparation in advance of an examination for a higher degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Course does not satisfy unit or residence requirements for doctoral degree. Final exam not required.

Physical Education (PHYS ED)

PHYS ED 1 Physical Education Activities 0.5 Units

Department: Physical Education

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Laboratory per week for 15 weeks. 4 hours of Laboratory per week for 8 weeks. 5 hours of Laboratory per week for 6 weeks.

Instruction in a variety of sports, exercise, and conditioning activities is offered at the elementary level. Students select section by activity and time preferences. Students should consult the each semester to determine the particular activities available.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHYS ED 2 Physical Education Activities 0.5 Units

Department: Physical Education

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Laboratory per week for 15 weeks. 5 hours of Laboratory per week for 6 weeks.

Instruction in a variety of sports, exercise, and conditioning activities is offered at the low intermediate level. Students select section by activity and time preferences. Students should consult the each semester to determine the particular activities available.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHYS ED 3 Physical Education Activities 0.5 Units

Department: Physical Education

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Laboratory per week for 15 weeks. 6 hours of Laboratory per week for 6 weeks.

Instruction in a variety of sports, exercise, and conditioning activities is offered at the intermediate level. Students select section by activity and time preferences. Students should consult the each semester to determine the particular activities available.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHYS ED 4 Physical Education Activities 0.5 Units

Department: Physical Education

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Laboratory per week for 15 weeks. 6 hours of Laboratory per week for 6 weeks.

Instruction in a variety of sports, exercise, and conditioning activities is offered at the high intermediate level. Students select section by activity and time preferences. Students should consult the each semester to determine the particular activities available.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHYS ED 5 Physical Education Activities 0.5 Units

Department: Physical Education

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Laboratory per week for 15 weeks. 6 hours of Laboratory per week for 8 weeks.

Instruction in a variety of sports, exercise, and conditioning activities is offered at the advanced level. Students select section by activity and time preferences. Students should consult the each semester to determine the particular activities available.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHYS ED 11 Physical Education Activities 0.5 Units

Department: Physical Education

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

Hours and format: 2 hours of Laboratory per week for 15 weeks.

Variety of intercollegiate sports for men. Students should select section by activity and time preferences. Students should consult the each semester to determine the particular activities available.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as 6.

Instructor: Scott

PHYS ED 12 Physical Education Activities 0.5 Units

Department: Physical Education

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

Hours and format: 2 hours of Laboratory per week for 15 weeks.

Variety of intercollegiate sports for women. Students should select section by activity and time preferences. Students should consult the each semester to determine the particular activities available.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as 7.

Instructor: Scott

PHYS ED 32 Fitness for Life: Physical Adaptations to Exercise 2 Units

Department: Physical Education

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1.5 hours of Lecture and 2 hours of Laboratory per week for 15 weeks. 3 hours of Lecture and 3.5 hours of Laboratory per week for 8 weeks. 4 hours of Lecture and 5 hours of Laboratory per week for 6 weeks.

Develops the relationship between physical fitness and wellness through scientific evidence presented in the areas of exercise physiology and health. The body's adaptation to programs of aerobic conditioning and strength training are examined. Areas associated with health and fitness, including nutrition and weight control, maintaining fitness with age, heart disease, low back care, and stress reduction are discussed. The laboratory will provide students with opportunities to assess their own fitness and health.

Final exam required. Instructor: Johannessen

PHYS ED 47A Introduction to Skin and SCUBA Diving 2 Units**Department:** Physical Education**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Prerequisites: Pass swim evaluation and medical examination for diving. This course will prepare students to explore the marine environment. Lecture topics will include: diving physics and physiology, life support equipment, the marine environment, diving safety and planning, and dive rescue techniques. Students will be introduced to the skills needed to maximize safety and enjoyment for recreational diving. Practice dives will be completed in both pool sessions and several open water ocean dives. Upon completion of the course, students will be able to demonstrate proper techniques in skin diving, SCUBA equipment handling, emergency response, neutral buoyancy, navigation, buddy diving techniques and rescue skills. Student who successfully complete all the course requirements will receive the Basic Open Water SCUBA certificate. Final exam required. Instructors: Hayward, Scott

PHYS ED 47B Intermediate Skin and SCUBA Diving 2 Units**Department:** Physical Education**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** Basic SCUBA certification; pass swim evaluation and medical examination for SCUBA.

This course is designed to continue the training and experiences of divers possessing a Basic Open Water certificate. Divers will be introduced to new diving environments and techniques, including night diving, nitrox diving, deeper diving, hazardous marine life, additional search and rescue techniques, etc. The weekend open water ocean dives will be conducted in Monterey and Carmel. This course will properly prepare students interested in underwater marine research and participation in PE/IB C407 - Introduction to Scientific Diving. Students who successfully complete all the course requirements will receive Advanced Diver and Enriched Air Nitrox Diver certifications from the National Association of Underwater Instructors (NAUI).

Final exam required. Instructors: Hayward, Scott

PHYS ED 60 Cultural Sources of Dance, Rhythm, and Movement 3 Units**Department:** Physical Education**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 2 hours of Laboratory per week for 15 weeks. 3 hours of Lecture and 4.5 hours of Laboratory per week for 8 weeks. 4 hours of Lecture and 6 hours of Laboratory per week for 6 weeks.

This course examines the many roles that dance plays in various cultures around the world. Students will explore dance with respect to folklore, religion, sociology, geography, body types, and lifestyles. Dances for birth, death, marriage, war, harvest, religion, and pleasure will be dissected, discussed, and related back to society. The course material will also bring focus to ideas pertaining to American culture and the use of the body in art and contemporary society. Bi-weekly lectures will identify how and why humans dance, and why certain rhythms and movements are inherent to each culture. In conjunction with lectures will be a two-hour laboratory where students will personally experience movement styles, rhythms, and sounds of the world. No prior dance experience needed.

Final exam required. Instructor: Li-Jue

PHYS ED 64 Cultural, Historical, Philosophical, and Social Impact of Martial Arts 2 Units**Department:** Physical Education**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

This course is designed for students to learn historical and cultural contexts in which various martial arts have emerged; how they have been influenced by historical, philosophical, cultural, social, political, and educational developments; what functions they once performed; and the place they hold in contemporary societies. Recent research will be studied regarding the physiological and psychological dimensions of martial arts and their contribution to physical and mental health. An essential component of such martial arts as Judo and Taekwondo is the development of strong moral and ethical values. Students will study why and how these are developed and how to be able to use this information in bettering their own lives.

Final exam required. Instructors: Ahn, Min

PHYS ED 98 Supervised Group Study 1 - 4 Units**Department:** Physical Education**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Directed group study per week for 15 weeks.**Prerequisites:** Restricted to freshmen and sophomores with consent of instructor.

Supervised studies by lower division students. Enrollment is restricted by regulations listed in the General Catalog.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

PHYS ED C129/INTEGBI C129L Human Physiological Assessment 3 Units**Department:** Physical Education; Integrative Biology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 3 hours of Laboratory per week for 15 weeks. 5 hours of Lecture and 7.5 hours of Laboratory per week for 6 weeks.**Prerequisites:** Biology 1A, IB 132 (may be taken concurrently); IB 123AL is recommended.

Principles and theories of human physiological assessment in relation to physical activity and conditioning. Performance of laboratory procedures in the measurement and interpretation of physiological fitness (cardiorespiratory endurance, body composition, musculoskeletal fitness). Final exam required. Instructor: Johannessen

PHYS ED C165/INTEGBI C125L Introduction to the Biomechanical Analysis of Human Movement 4 Units**Department:** Physical Education; Integrative Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** 9 and Integrative Biology 131 and 131L.

Basic biomechanical and anatomical concepts of human movement and their application to fundamental movement patterns, exercise, and sport skills.

Final exam required. Instructor: Scott

PHYS ED C165L Introduction to the Biomechanical Analysis of Human Movement 4 Units**Department:** Physical Education**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** 9 and Integrative Biology 131 and 131L.

Basic biomechanical and anatomical concepts of human movement and their application to fundamental movement patterns, exercise, and sport skills.

Final exam required. Formerly known as C165. Instructor: Scott

PHYS ED 197 Field Study in Physical Education 1 - 3 Units**Department:** Physical Education**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Individual conferences to be arranged.

Supervised experience relevant to specific aspects of physical education, sport, and fitness. Regular individual meetings with faculty sponsor and written reports required.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHYS ED 198 Supervised Group Study 1 - 4 Units**Department:** Physical Education**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Directed group study per week for 15 weeks.**Prerequisites:** Must have 60 units and consent of instructor.

Supervised studies by upper division students. Enrollment is restricted by regulations listed in the General Catalog.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHYS ED C407/INTEGBI C407 Introduction to Scientific Diving 3 Units**Department:** Physical Education; Integrative Biology**Course level:** Other professional**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture and 6 hours of laboratory per day for 12 days.**Prerequisites:** Advanced scuba certification, swim test, medical exam, and consent of instructor.

Diving physics, physiology, medicine, rescue, decompression, theory, navigation, environment, marine life, research methods, equipment, and University regulations. Course leads to University certification to use underwater life support apparatus for study or research under University auspices.

Final exam required.

Physics (PHYSICS)

PHYSICS 7A Physics for Scientists and Engineers 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 4 hours of laboratory/workshop per week. 6 hours of lecture and 8 hours of laboratory/workshop per week for 8 weeks.**Prerequisites:** High school physics; Math 1A or 1AS; Math 1B or 1BS (which may be taken concurrently).

Mechanics and wave motion.

Final exam required.

PHYSICS 7B Physics for Scientists and Engineers 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 4 hours of laboratory/workshop per week. 6 hours of lecture and 8 hours of laboratory/workshop per week for 8 weeks.**Prerequisites:** 7A, Math 1A-1B, Math 53 (may be taken concurrently).

Heat, electricity, and magnetism.

Final exam required.

PHYSICS 7C Physics for Scientists and Engineers 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture, 1 hour of Discussion, and 3 hours of Laboratory per week for 15 weeks. 6 hours of Lecture, 2 hours of Discussion, and 6 hours of Laboratory per week for 8 weeks.**Prerequisites:** 7A-7B, Math 1A-1B, Math 53, 54 (Math 54 may be taken concurrently).

Electromagnetic waves, optics, relativity, and quantum physics.

Final exam required.

PHYSICS H7A Physics for Scientists and Engineers 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture, 1 hour of Discussion, and 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** High school physics; Math 1A or 1AS; Math 1B or 1BS (may be taken concurrently); Math 53; Math 54.

Honors sequence corresponding to 7A-7B-7C, but with a greater emphasis on theory as opposed to problem solving. Recommended for those students who have had advanced Physics on the high school level and who are intending to declare a major in physics. Entrance into H7A is decided on the basis of performance on an examination given during the first week of class or the consent of the instructor, and into H7B-H7C on performance in previous courses in a standard sequence.

Students will receive no credit for H7A after taking 7A. Final exam required.

PHYSICS H7B Physics for Scientists and Engineers 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture, 1 hour of Discussion, and 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** High school physics; Math 1A or 1AS; Math 1B or 1BS (may be taken concurrently); Math 53; Math 54.

Honors sequence corresponding to 7A-7B-7C, but with a greater emphasis on theory as opposed to problem solving. Recommended for those students who have had advanced Physics on the high school level and who are intending to declare a major in physics. Entrance into H7A is decided on the basis of performance on an examination given during the first week of class or the consent of the instructor, and into H7B-H7C on performance in previous courses in a standard sequence.

Students will receive no credit H7B after taking 7B. Final exam required.

PHYSICS H7C Physics for Scientists and Engineers 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture, 1 hour of Discussion, and 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** High school physics; Math 1A or 1AS; Math 1B or 1BS (may be taken concurrently); Math 53; Math 54.

Honors sequence corresponding to 7A-7B-7C, but with a greater emphasis on theory as opposed to problem solving. Recommended for those students who have had advanced Physics on the high school level and who are intending to declare a major in physics. Entrance into H7A is decided on the basis of performance on an examination given during the first week of class or the consent of the instructor, and into H7B-H7C on performance in previous courses in a standard sequence.

Final exam required.

PHYSICS 8A Introductory Physics 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 4 hours of discussion/laboratory week. 6 hours of lecture and 8 hours of laboratory/workshop per week for 8 weeks.**Prerequisites:** Mathematics 1A, 10A, 16A, or equivalent, or consent of instructor.

Introduction to forces, kinetics, equilibria, fluids, waves, and heat. This course presents concepts and methodologies for understanding physical phenomena, and is particularly useful preparation for upper division study in biology and architecture.

Students with credit for 7A will not receive credit for 8A. Final exam required.

PHYSICS 8B Introductory Physics 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 4 hours of discussion/laboratory section per week. 6 hours of lecture and 8 hours of laboratory/workshop per week for 8 weeks.**Prerequisites:** 8A or equivalent.

Introduction to electricity, magnetism, electromagnetic waves, optics, and modern physics. The course presents concepts and methodologies for understanding physical phenomena, and is particularly useful preparation for upper division study in biology and architecture.

Students with credit for 7B or 7C will not receive credit for Physics 8B.

Final exam required.

PHYSICS C10/L & S C70V Descriptive Introduction to Physics 3 Units**Department:** Physics; Letters and Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 8 weeks.**Prerequisites:** Open to students with or without high school physics.

The most interesting and important topics in physics, stressing conceptual understanding rather than math, with applications to current events.

Topics covered may vary and may include energy and conservation, radioactivity, nuclear physics, the Theory of Relativity, lasers, explosions, earthquakes, superconductors, and quantum physics.

Final exam required.

PHYSICS C21/L & S C70W Physics and Music 2 Units**Department:** Physics; Letters and Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** No previous courses in Physics are assumed, although Physics 10 is recommended.

What can we learn about the nature of reality and the ways that we humans have invented to discover how the world works? An exploration of these questions through the physical principles encountered in the study of music. The applicable laws of mechanics, fundamentals of sound, harmonic content, principles of sound production in musical instruments, musical scales. Numerous illustrative lecture demonstrations will be given. Only the basics of high school algebra and geometry will be used.

Final exam required.

PHYSICS 24 Freshman Seminars 1 Unit**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of Seminar per week for 15 weeks.

The Berkeley Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Berkeley Seminars are offered in all campus departments, and topics vary from department to department and semester to semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

PHYSICS 39 Lower Division Physics Seminar 1.5 - 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1.5 to 4 hours of Seminar per week for 15 weeks.**Prerequisites:** Enrollment by consent of instructor during the week of pre-enrollment. Consult bulletin boards outside 366 Le Conte for more information.

Enrollment limited to 20 students per section. Physics seminar course designed for both non major students and students considering a major in physics. Topics vary from semester to semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

PHYSICS 49 Supplementary Work in Lower Division Physics 1 - 3 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Meetings to be arranged.

Students with partial credit in lower division physics courses may, with consent of instructor, complete the credit under this heading.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHYSICS 98 Directed Group Study 1 - 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Directed group study per week for 15 weeks. 1.5 to 7.5 hours of Directed group study per week for 8 weeks.**Prerequisites:** Restricted to freshman and sophomores only; consent of instructor.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

PHYSICS 99 Supervised Independent Study 1 - 3 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Independent study per week for 15 weeks. 1.5 to 7.5 hours of Independent study per week for 8 weeks.**Prerequisites:** Restricted to freshmen and sophomores only; consent of instructor.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

PHYSICS 100 Communicating Physics and Physical Science 2 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/fieldwork per week.

For undergraduate and graduate students interested in improving their ability to communicate scientific knowledge by teaching science in K-12 schools. The course will combine instruction in inquiry-based science teaching methods and learning pedagogy with 10 weeks of supervised teaching experience in a local school. Students will practice, with support and mentoring, communicating scientific knowledge through presentations and hands-on activities. Approximately three hours per week including time spent in school classrooms.

Final exam required.

PHYSICS 105 Analytic Mechanics 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Newtonian mechanics, motion of a particle in one, two, and three dimensions, Lagrange's equations, Hamilton's equations, central force motion, moving coordinate systems, mechanics of continuous media, oscillations, normal modes, rigid body dynamics, tensor analysis techniques.

Final exam required.

PHYSICS 110A Electromagnetism and Optics 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

A course emphasizing electromagnetic theory and applications; charges and currents; electric and magnetic fields; dielectric, conducting, and magnetic media; relativity, Maxwell equations. Wave propagation in media, radiation and scattering, Fourier optics, interference and diffraction, ray optics and applications.

Final exam required.

PHYSICS 110B Electromagnetism and Optics 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

A course emphasizing electromagnetic theory and applications; charges and currents; electric and magnetic fields; dielectric, conducting, and magnetic media; relativity, Maxwell equations. Wave propagation in media, radiation and scattering, Fourier optics, interference and diffraction, ray optics and applications.

Final exam required.

PHYSICS 111 Modern Physics and Advanced Electrical Laboratory 1 - 3 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 8 hours of Laboratory per week for 15 weeks.**Prerequisites:** 137A or consent of instructor.

The first semester (3 units), on Basic Semiconductor Circuits (BSC), covers introductory analog and digital circuits. The class meets for two 4-hour afternoon lab sessions, and a 1-1/2 hour weekly lecture. In the second semester, Advanced Lab (3 units), students complete 4 of 20+ advanced experiments. These include many in atomic, nuclear, classical, and solid-state physics, among others. Students may, with approval, enroll in an optional third semester for variable units.

Course may be repeated for a maximum of 9 units. Course may be repeated for a maximum of 9 units. Six units required for physics major; nine units may be taken for credit. No more than 3 units may be completed in one semester. Final exam not required.

PHYSICS 112 Introduction to Statistical and Thermal Physics 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Basic concepts of statistical mechanics, microscopic basis of thermodynamics and applications to macroscopic systems, condensed states, phase transformations, quantum distributions, elementary kinetic theory of transport processes, fluctuation phenomena.

Final exam required.

PHYSICS 129 Particle Physics 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 137A, 137B (may be taken concurrently), or consent of instructor.

Tools of particle and nuclear physics. Properties, classification, and interaction of particles including the quark-gluon constituents of hadrons. High energy phenomena analyzed by quantum mechanical methods. Course will survey the field including some related topics in nuclear physics.

Final exam required. Formerly known as 129A.

PHYSICS 130 Quantum and Nonlinear Optics 3 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 110A and 137A-137B, or consent of instructor.

Detailed theory and experimental basis of quantum and nonlinear optics, exhibiting concepts of quantum measurement, noise, stochastic processes and dissipative quantum systems. Topics include second-quantization of electromagnetic fields, photodetection, coherence properties, light-atom interactions, cavity quantum electrodynamics, nonlinear optical systems, squeezed light, aspects of quantum information science, and contemporary research.

Final exam required.

PHYSICS 132 Contemporary Physics 3 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 8A-8B or equivalent or consent of instructor.

A general descriptive course of selected topics in contemporary physics. Subject matter will vary and may include topics from special and general relativity, atomic and nuclear physics, radiation, fundamental particles and their symmetries, superconductivity and superfluidity, solid state physics, astrophysics, and cosmology.

Not open for credit to students who have completed 137A. Final exam required.

PHYSICS 137A Quantum Mechanics 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 8 weeks.

Introduction to the methods of quantum mechanics with applications to atomic, molecular, solid state, nuclear and elementary particle physics. Final exam required.

PHYSICS 137B Quantum Mechanics 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 8 weeks.

Introduction to the methods of quantum mechanics with applications to atomic, molecular, solid state, nuclear and elementary particle physics. Final exam required.

PHYSICS 138 Modern Atomic Physics 3 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 137A-137B.

This course covers atomic, molecular, and optical physics as a quantitative description of atoms and fields, a generalized toolbox for controlling quantum systems, and a vibrant research area. Topics covered include atomic structure and spectra, atom-field interactions, topics in quantum electrodynamics, methods of resonant manipulation of quantum systems, resonance optics, and experimental techniques. Final exam required.

PHYSICS 139 Special Relativity and General Relativity 3 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 105, 110A or consent of instructor.

Historical and experimental foundations of Einstein's special theory of relativity; spatial and temporal measurements, particle dynamics, electrodynamics, Lorentz invariants. Introduction to general relativity. Selected applications. Designed for advanced undergraduates in physics and astronomy.

Final exam required.

PHYSICS 141A Solid State Physics 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 137A-137B; 137B may be taken concurrently.

A thorough introductory course in modern solid state physics. Crystal symmetries; classification of solids and their bonding; electromagnetic, elastic, and particle waves in periodic lattices; thermal magnetic and dielectric properties of solids; energy bands of metals and semi-conductors; superconductivity; magnetism; ferroelectricity; magnetic resonances.

Final exam required.

PHYSICS 141B Solid State Physics 3 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 137A-137B; 137B may be taken concurrently.

A thorough introductory course in modern solid state physics. Crystal symmetries; classification of solids and their bonding; electromagnetic, elastic, and particle waves in periodic lattices; thermal magnetic and dielectric properties of solids; energy bands of metals and semi-conductors; superconductivity; magnetism; ferroelectricity; magnetic resonances.

Final exam required.

PHYSICS 142 Introduction to Plasma Physics 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 105, 110A-110B (110B may be taken concurrently).

Motion of charged particles in electric and magnetic fields, dynamics of fully ionized plasma from both microscopic and macroscopic point of view, magnetohydrodynamics, small amplitude waves; examples from astrophysics, space sciences and controlled-fusion research.

Final exam required.

PHYSICS 151 Elective Physics: Special Topics 3 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Consent of instructor.

Topics vary from semester to semester. The subject matter level and scope of the course are such that it is acceptable as the required elective course in the Physics major. See Department of Physics course announcements.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

PHYSICS C161/ASTRON C161 Relativistic Astrophysics and Cosmology 4 Units**Department:** Physics; Astronomy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 110A-110B; 112 (may be taken concurrently).

Elements of general relativity. Physics of pulsars, cosmic rays, black holes. The cosmological distance scale, elementary cosmological models, properties of galaxies and quasars. The mass density and age of the universe. Evidence for dark matter and dark energy and concepts of the early universe and of galaxy formation. Reflections on astrophysics as a probe of the extrema of physics.

Final exam required. Formerly known as C160B and Physics C160B.

Instructors: Boggs, Davis, Holzapfel, A. Lee, Ma, Quataert

PHYSICS 177 Principles of Molecular Biophysics 3 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 112 or consent of instructor.

We will review the structure of proteins, nucleic acids, carbohydrates, lipids, and the forces and interactions maintaining their structure in solution. We will describe the thermodynamics and kinetics of protein folding. The principles of polymer chain statistics and of helix-coil transitions in biopolymers will be reviewed next, together with biopolymer dynamics. We will then cover the main structural methods in biology: X-ray crystallography, MNR and fluorescence spectroscopy, electron and probe microscopy, and single molecular methods.

Final exam required.

PHYSICS H190 Physics Honors Course 2 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

A seminar which includes study and reports on current theoretical and experimental problems. Open only to students officially in the physics honors program or with consent of instructor.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHYSICS C191/CHEM C191/COMPSCI C191 Quantum Information Science and Technology 3 Units**Department:** Physics; Chemistry; Computer Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.

This multidisciplinary course provides an introduction to fundamental conceptual aspects of quantum mechanics from a computational and informational theoretic perspective, as well as physical implementations and technological applications of quantum information science. Basic sections of quantum algorithms, complexity, and cryptography, will be touched upon, as well as pertinent physical realizations from nanoscale science and engineering.

Final exam required. Instructors: Crommie, Vazirani, Whaley

PHYSICS H195A Senior Honors Thesis Research 2 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: Zero hours of Independent study per week for 15 weeks.

Prerequisites: Open only to students in the honors program.

Thesis work under the supervision of a faculty member. To obtain credit the student must, at the end of two semesters, submit a satisfactory thesis. A total of four units must be taken. The units may be distributed between one or two semesters in any way.

Final exam not required.

PHYSICS H195B Senior Honors Thesis Research 2 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part two of a year long series course. Upon completion, the final grade will be applied to both parts of the series.

Hours and format: Zero hours of Independent study per week for 15 weeks.

Prerequisites: Open only to students in the honors program.

Thesis work under the supervision of a faculty member. To obtain credit the student must, at the end of two semesters, submit a satisfactory thesis. A total of four units must be taken. The units may be distributed between one or two semesters in any way.

Final exam not required.

PHYSICS 198 Directed Group Study 1 - 4 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.

Hours and format: 1 to 4 hour of Directed group study per week for 15 weeks. 1.5 to 7.5 hours of Directed group study per week for 8 weeks. 2.5 to 10 hours of Directed group study per week for 6 weeks.

Enrollment restrictions apply; see the Introduction to Courses and Curricula section in this catalog.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHYSICS 199 Supervised Independent Study 1 - 3 Units**Department:** Physics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.

Hours and format: Zero hours of Independent study per week for 15 weeks. 1.5 to 4.5 hours of Independent study per week for 10 weeks. 1.5 to 5.5 hours of Independent study per week for 8 weeks. 2.5 to 7.5 hours of Independent study per week for 6 weeks.

Enrollment restrictions apply; see the Introduction to Courses and Curricula section in this catalog.

Course may be repeated for credit when topic changes. Final exam not required.

PHYSICS C201/BIO ENG C280/MAT SCI C261/NSE C201 Introduction to Nano-Science and Engineering 3 Units**Department:** Physics; Bioengineering; Materials Science and Engineering; Nanoscale Science and Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Prerequisites: Major in physical science such as chemistry, physics, etc., or engineering; consent of advisor or instructor.

A three-module introduction to the fundamental topics of Nano-Science and Engineering (NSE) theory and research within chemistry, physics, biology, and engineering. This course includes quantum and solid-state physics; chemical synthesis, growth fabrication, and characterization techniques; structures and properties of semiconductors, polymer, and biomedical materials on nanoscales; and devices based on nanostructures. Students must take this course to satisfy the NSE Designated Emphasis core requirement.

Course may be repeated for credit when topic changes. Final exam not required. Instructors: Gronsky, S.W. Lee, Wu

PHYSICS C202/ASTRON C202 Astrophysical Fluid Dynamics 4 Units**Department:** Physics; Astronomy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Principles of gas dynamics, self-gravitating fluids, magnetohydrodynamics and elementary kinetic theory. Aspects of convection, fluid oscillations, linear instabilities, spiral density waves, shock waves, turbulence, accretion disks, stellar winds, and jets.

Final exam not required. Instructors: Chiang, Kasen, Ma, Quataert, White

PHYSICS C203/NSE C242 Computational Nanoscience 3 Units**Department:** Physics; Nanoscale Science and Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

A multidisciplinary overview of computational nanoscience for both theorists and experimentalists. This course teaches the main ideas behind different simulation methods; how to decompose a problem into "simulatable" constituents; how to simulate the same thing two different ways; knowing what you are doing and why thinking is still important; the importance of talking to experimentalists; what to do with your data and how to judge its validity; why multiscale modeling is both important and nonsense.

Final exam not required.

PHYSICS 205A Advanced Dynamics 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 105 or equivalent.

Lagrange and Hamiltonian dynamics, variational methods, symmetry, kinematics and dynamics of rotation, canonical variables and transformations, perturbation theory, non-linear dynamics, KAM theory. Final exam required.

PHYSICS 205B Advanced Dynamics 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 205A.

Continuous systems, dissipative systems. Attractors. Emphasis on recent developments, including turbulence.

Final exam not required.

PHYSICS C207/ASTRON C207 Radiation Processes in Astronomy 4 Units**Department:** Physics; Astronomy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Physics 105, 110A; 110B concurrently; open to advanced undergraduates with GPA of 3.70.

An introduction to the basic physics of astronomy and astrophysics at the graduate level. Principles of energy transfer by radiation. Elements of classical and quantum theory of photon emission; bremsstrahlung, cyclotron and synchrotron radiation. Compton scattering, atomic, molecular and nuclear electromagnetic transitions. Collisional excitation of atoms, molecules and nuclei.

Final exam required. Instructors: Bower, Chiang, Kasen, Quataert

PHYSICS 209 Classical Electromagnetism 5 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 110A-110B or consent of instructor.

Maxwell's equations, gauge transformations and tensors. Complete development of special relativity, with applications. Plane waves in material media, polarization, Fresnel equations, attenuation, and dispersion. Wave equation with sources, retarded solution for potentials, and fields. Cartesian and spherical multipole expansions, vector spherical harmonics, examples of radiating systems, diffraction, and optical theorem. Fields of charges in arbitrary motion, radiated power, relativistic (synchrotron) radiation, and radiation in collisions.

Final exam not required.

PHYSICS 211 Equilibrium Statistical Physics 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 112 or equivalent.

Foundations of statistical physics. Ensemble theory. Degenerate systems. Systems of interacting particles.

Final exam required.

PHYSICS 212 Nonequilibrium Statistical Physics 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 112 and 221A-221B, or equivalents.

Time dependent processes. Kinetic equations. Transport processes.

Irreversibility. Theory of many-particle systems. Fluctuation phenomena.

Final exam not required.

PHYSICS 216 Special Topics in Many-Body Physics 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 221A-221B or equivalent recommended.

Quantum theory of many-particle systems. Applications of theory and technique to physical systems. Pairing phenomena, superfluidity, equation of state, critical phenomena, phase transitions, nuclear matter.

Final exam required.

PHYSICS 221A Quantum Mechanics 5 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 137A-137B or equivalent.

Basic assumptions of quantum mechanics; quantum theory of measurement; matrix mechanics; Schrodinger theory; symmetry and invariance principles; theory of angular momentum; stationary state problems; variational principles; time independent perturbation theory; time dependent perturbation theory; theory of scattering.

Final exam required.

PHYSICS 221B Quantum Mechanics 5 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 221A.

Many-body methods, radiation field quantization, relativistic quantum mechanics, applications.

Final exam required.

PHYSICS 226 Particle Physics Phenomenology 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 221A-221B or equivalent or consent of instructor.

Introduction to particle physics phenomena. Emphasis is placed on experimental tests of particle physics models. Topics include Quark model spectroscopy; weak decays; overview of detectors and accelerators; e^+e^- annihilation; parton model; electron-proton and neutrino-proton scattering; special topics of current interest.

Final exam not required.

PHYSICS C228/ASTRON C228 Extragalactic Astronomy and Cosmology 3 Units**Department:** Physics; Astronomy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

A survey of physical cosmology - the study of the origin, evolution, and fate of the universe. Topics include the Friedmann-Robertson-Walker model, thermal history and big bang nucleosynthesis, evidence and nature of dark matter and dark energy, the formation and growth of galaxies and large scale structure, the anisotropy of the cosmic microwave radiation, inflation in the early universe, tests of cosmological models, and current research areas. The course complements the material of Astronomy 218.

Final exam not required. Instructors: Davis, Holzapfel, Lee, Ma, Seljak, White

PHYSICS 229 Advanced Cosmology 3 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week. 3 hours of lecture per week.**Prerequisites:** Physics/Astronomy C228 or equivalent or consent of instructor

Advanced topics in physical and early-universe cosmology. Topics include the expanding Universe, evidence and nature of dark matter and dark energy, relativistic perturbation theory, models of cosmological inflation, the formation and growth of large scale structure and the anisotropy of the cosmic microwave background, and current research areas. The course extends the material of C228.

Final exam required.

PHYSICS 231 General Relativity 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 209 or equivalent, or consent of instructor.

An introduction to Einstein's theory of gravitation. Tensor analysis, general relativistic models for matter and electromagnetism, Einstein's field equations. Applications, for example, to the solar system, dense stars, black holes, and cosmology.

Final exam not required.

PHYSICS 232A Quantum Field Theory I 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 221A-221B or equivalent or consent of instructor (concurrent enrollment in 226 is recommended).

Introduction to quantum field theory: canonical quantization of scalar, electromagnetic, and Dirac fields; derivation of Feynman rules; regularization and renormalization; introduction to the renormalization group; elements of the path integral.

Final exam not required.

PHYSICS 232B Quantum Field Theory II 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 232A or equivalent or consent of instructor.

Renormalization of Yang-Mills gauge theories: BRST quantization of gauge theories; nonperturbative dynamics; renormalization group; basics of effective field theory; large N ; solitons; instantons; dualities. Selected current topics.

Final exam not required.

PHYSICS 233A Standard Model and Beyond I 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 232A or equivalent or consent of instructor (concurrent enrollment in 232B is recommended).

Introduction to the standard model of particle physics and its applications: construction of the standard model; Higgs mechanism; phenomenology of weak interactions; chiral Lagrangian; QCD and scaling violation.

Final exam not required.

PHYSICS 233B Standard Model and Beyond II 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 233A or equivalent or consent of instructor.

Advanced topics in the standard model and beyond: open problems in the standard model; supersymmetric models; grand unification; neutrino physics; theories with flat and warped extra dimensions; models at the TeV scale; low string/gravity scale. Selected current topics.

Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam not required.

PHYSICS 234A String Theory I 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 232A or equivalent or consent of instructor. 232B is recommended.

Perturbative theory of the bosonic strings, superstrings, and heterotic strings: NSR and GS formulations; 2d CFT; strings in background fields; T-duality; effective spacetime supergravity; perturbative description of D-branes; elements of compactifications and string phenomenology; perturbative mirror symmetry.

Final exam not required.

PHYSICS 234B String Theory II 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 234A or equivalent or consent of instructor.

Nonperturbative aspects of string theory. Topics selected from black holes; black branes; Bekenstein-Hawking entropy; D-branes; string dualities; M-theory; holographic principle and its realizations; AdS/CFT correspondence; gauge theory/gravity dualities; flux compactifications; cosmology in string theory; topological string theories. Selected current topics.

May be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam not required.

PHYSICS 238 Advanced Atomic, Molecular, and Optical Physics 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 110A, 130, 137A-137B, and 138; or consent of instructor.

Contemporary topics in atomic, molecular, and optical physics are presented at an advanced level. These topics may include one or several of the following, at the discretion of the instructor: mechanical effects of light-atom interactions, ultra-cold atomic physics, molecular physics, resonance optics of multi-level atoms, and probing particle physics with atoms and molecules.

Final exam not required.

PHYSICS 240A Quantum Theory of Solids 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 141A-141B and 221A-221B or equivalents, or consent of instructor; 240A is prerequisite to 240B.

Excitations and interactions in solids; crystal structures, symmetries, Bloch's theorem; energy bands; electron dynamics; impurity states; lattice dynamics, phonons; many-electron interactions; density functional theory; dielectric functions, conductivity and optical properties; excitons; electron-phonon interactions, polarons; Fermi surfaces; magnetoresistance; quantum Hall effect; transport processes, Boltzmann equation; superconductivity, BCS theory; many-body perturbation theory, Green's functions.

Final exam not required.

PHYSICS 240B Quantum Theory of Solids 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: 141A-141B and 221A-221B or equivalents, or consent of instructor; 240A is prerequisite to 240B.

Excitations and interactions in solids; crystal structures, symmetries, Bloch's theorem; energy bands; electron dynamics; impurity states; lattice dynamics, phonons; many-electron interactions; density functional theory; dielectric functions, conductivity and optical properties; excitons; electron-phonon interactions, polarons; Fermi surfaces; magnetoresistance; quantum Hall effect; transport processes, Boltzmann equation; superconductivity, BCS theory; many-body perturbation theory, Green's functions.

Final exam not required.

PHYSICS 242A Theoretical Plasma Physics 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered alternate years.

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: 142

Analysis of plasma behavior according to the Vlasov, Fokker-Planck equations, guiding center and hydromagnetic descriptions. Study of equilibria, stability, linear and nonlinear electromagnetic waves, transport, and interaction with radiation. Rigorous kinetic theory.

Final exam not required.

PHYSICS 242B Theoretical Plasma Physics 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: 142

Analysis of plasma behavior according to the Vlasov, Fokker-Planck equations, guiding center and hydromagnetic descriptions. Study of equilibria, stability, linear and nonlinear electromagnetic waves, transport, and interaction with radiation. Rigorous kinetic theory.

Final exam not required.

PHYSICS 250 Special Topics in Physics 2 - 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 to 4 hours of Lecture per week for 15 weeks.

Prerequisites: Consent of instructor.

Topics will vary from semester to semester. See Department of Physics announcements.

Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam not required.

PHYSICS 251 Introduction to Graduate Research in Physics 1 Unit**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Offered for satisfactory/unsatisfactory grade only.

Hours and format: 1 hour of Lecture per week for 15 weeks.

Prerequisites: Graduate standing in Department of Physics or consent of instructor.

A survey of experimental and theoretical research in the Department of Physics, designed for first-year graduate students. One regular meeting each week with supplementary visits to experimental laboratories. Meetings include discussions with research staff.

Final exam not required.

PHYSICS C254/ASTRON C254 High Energy Astrophysics 3 Units**Department:** Physics; Astronomy**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: 201 or consent of instructor. 202 recommended.

Basic physics of high energy radiation processes in an astrophysics environment. Cosmic ray production and propagation. Applications selected from pulsars, x-ray sources, supernovae, interstellar medium, extragalactic radio sources, quasars, and big-bang cosmologies.

Final exam not required. Instructors: Boggs, Quataert

PHYSICS C285/ASTRON C285 Theoretical Astrophysics Seminar 1 Unit**Department:** Physics; Astronomy**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Offered for satisfactory/unsatisfactory grade only.

Hours and format: 1 hour of Lecture per week for 15 weeks.

The study of theoretical astrophysics.

Final exam not required. Instructor: Quataert

PHYSICS 290A Seminar 2 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Offered for satisfactory/unsatisfactory grade only.

Hours and format: 2 hours of Seminar per week for 15 weeks.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHYSICS 290R Seminar 2 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHYSICS 290S Seminar 2 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHYSICS 290T Seminar 2 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHYSICS 290X Seminar 2 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHYSICS 290Y Seminar 2 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHYSICS 290Z Seminar 2 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHYSICS 295 Special Study for Graduate Students 1 - 4 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 4 hour of Independent study per week for 15 weeks. 1 to 4 hour of Independent study per week for 8 weeks. 1 to 4 hour of Independent study per week for 6 weeks.**Prerequisites:** Graduate standing.

This course is arranged to allow qualified graduate students to investigate possible research fields or to pursue problems of interest through reading or non-laboratory study under the direction of faculty members who agree to give such supervision.

Course may be repeated for credit when topic changes. Final exam not required.

PHYSICS 299 Research 1 - 12 Units**Department:** Physics**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks. 1 to 12 hour of Independent study per week for 8 weeks. 1 to 12 hour of Independent study per week for 6 weeks.**Prerequisites:** Graduate standing.

Course may be repeated for credit when topic changes. Final exam not required.

PHYSICS 301 Advanced Professional Preparation: Supervised Teaching of Physics 1 - 2 Units**Department:** Physics**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of informal meeting and 10 to 20 hours of teaching per week.**Prerequisites:** 300

Discussion, problem review and development, guidance of physics laboratory experiments, course development.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PHYSICS 375 Professional Preparation: Supervised Teaching of Physics 2 Units**Department:** Physics**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of lecture plus 10 to 20 hours of teaching per week.**Prerequisites:** Graduate standing or consent of instructor; may be taken concurrently with 301.

Mandatory for first time GSIs. Topics include teaching theory, effective teaching methods, educational objectives, alternatives to standard classroom methods, reciprocal classroom visitations, and guided group and self-analysis of videotapes.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Physics 300.

PHYSICS 602 Individual Study for Doctoral Students 1 - 8 Units**Department:** Physics**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 8 hour of Independent study per week for 15 weeks. 1 to 8 hour of Independent study per week for 8 weeks. 1 to 8 hour of Independent study per week for 6 weeks.**Prerequisites:** For qualified graduate students.

Individual study in consultation with the major field adviser intended to provide an opportunity for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Course does not satisfy unit or residence requirements for doctoral degree. Final exam not required.

Plant and Microbial Biology (PLANTBI)

PLANTBI 10 Plants, Agriculture, and Society 2 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

Changing patterns of agriculture in relation to population growth, the biology and social impact of plant disease, genetic engineering of plants: a thousand years of crop improvement and modern biotechnology, interactions between plants and the environment, and effects of human industrial and agricultural activity on plant ecosystems. Knowledge of the physical sciences is neither required nor assumed.

Final exam required. Instructors: Staskawicz, David Zilberman

PLANTBI 11 Fungi, History, and Society 3 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture, 1 hour of discussion/demonstration, and 3 optional weekend field trips.

Fungi have interacted with humans in both positive and negative ways throughout history. These interactions have included production of foods, medicines, fuels, plant and animal diseases, decay, allergies, and mind-altering drugs.

Final exam required. Instructors: Bruns, Taylor

PLANTBI 13 Genetic Revolutions 3 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Genetic discoveries have changed our lives. All are controversial.

Especially changed are human physical and mental health, agriculture, social systems, and worldviews. Having many DNA-sequenced genomes, including human, accelerates discovery. This course will study the science, history, and philosophical implications behind past discoveries and will contemplate future genetic revolutions.

Final exam required. Instructor: Freeling

PLANTBI 20 Introduction to the Plant Sciences at Berkeley 1 Unit**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Term course may be offered:** Fall**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of lecture/discussion per week plus field trips.

This course will include discussions on the academic path (courses) needed for the Genetics and Plant Biology major; an introduction to resources and facilities for studies of the plant sciences at Berkeley, such as the University Herbarium and the Botanical Garden; an exploration of plant science related careers, including presentations from guest speakers who work in organic farming, government, and Cooperative Extension; talks by faculty about their current research, and information about how to do research in a lab.

Students will be asked to provide a personal perspective/reflection on how their understanding of the plants sciences, and how their views/intentions of majoring in the plant sciences, have been influenced by this class.

Instructor: Feldman

PLANTBI 22 Microbes Make the World Go Around 2 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Term course may be offered:** Fall**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Although often unseen, microbes are everywhere! This course covers the role that microbes, including archaea, bacteria, protists and fungi, play in terrestrial, marine and extreme environments and their effect on the geochemistry of the earth. In addition, we will explore the profound effects of microbes on human and plant health and how microbes have changed the course of human history.

Final exam required. Instructor: Glass

PLANTBI 24 Freshman Seminar 1 Unit**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of Discussion per week for 15 weeks.

Reading and discussion with Plant and Microbial Biology faculty on current research and topics in plant and microbial biology. Topics which may be discussed include Microbial biology, plant genetics, plant development, plant pathology, agricultural biotechnology, and genetic engineering. Ideal for students who are considering a major in the Department of Plant and Microbial Biology. Enrollment is limited to 20 freshman.

Final exam required. Formerly known as 20.

PLANTBI 39E Freshman/Sophomore Seminar 2 - 4 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of lecture per week per unit.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester. Enrollment limits are set by the faculty, but the suggested limit is 25.

Course may be repeated for credit when topic changes. Final exam required. Instructor: Lindow

PLANTBI 40 The (Secret) Life of Plants 3 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Covers contemporary topics in plant biology. Examines how plants grow, reproduce, and respond to the environment (e.g., to light) in ways distinct from animals. Presents basic principles of genetics, cell, and molecular biology. Basics of genetic engineering and biotechnology reveal how they are used to modify plants, and these socially relevant issues are assessed. Includes visit to modern plant biology research laboratory, and aspects of plant disease and diversity. Knowledge of the physical sciences neither required nor assumed.

Final exam required. Instructor: Zambryski

PLANTBI 84 Sophomore Seminar 1 or 2 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.

Hours and format: 1 hour of seminar per week per unit for 15 weeks. 1 and 1 half hours of seminar per week per unit for 10 weeks. 2 hours of seminar per week per unit for 8 weeks. 3 hours of seminar per week per unit for 5 weeks.

Prerequisites: At discretion of instructor.

Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

PLANTBI C96/INTEGBI C96/MCELLBI C96 Studying the Biological Sciences 1 Unit**Department:** Plant Biology; Integrative Biology; Molecular and Cell Biology; Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

Freshmen will be introduced to the "culture" of the biological sciences, along with an in-depth orientation to the academic life and the culture of the university as they relate to majoring in biology. Students will learn concepts, skills, and information that they can use in their major course, and as future science professionals. Restricted to freshmen in the biology scholars program.

Final exam required. Instructor: Matsui

PLANTBI 98 Directed Group Study 1 - 3 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 3 hour of Directed group study per week for 15 weeks.

Lectures and small group discussions focusing on topics of interest, varying from semester to semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PLANTBI 99 Supervised Independent Study and Research 1 - 4 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Individual meetings.**Prerequisites:** GPA of 3.4 or higher; lower division status.

Lower division independent study and research intended for the academically superior student. Enrollment only with prior approval of faculty advisor directing the research.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PLANTBI 101L Experimental Plant Biology Laboratory 3 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Laboratory and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Biology 1A-1B; Plant and Microbial Biology 135, 150, and 160 (may be taken concurrently).

Students will perform state-of-the-art research to address an important question in modern plant biology. The experimental progression exposes students to a variety of modern molecular approaches and techniques. Experimental design, data acquisition, and analysis of the student's real experimental data is emphasized. Research results will be presented in written and oral formats similar to those used in research laboratories.

Final exam required. Instructor: Wildermuth

PLANTBI C102/INTEGBI C101 Diversity of Plants and Fungi 2 Units

Department: Plant Biology; Integrative Biology; Plant and Microbial Biology

Course level: Undergraduate

Terms course may be offered: Fall and spring. Offered alternate years.

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Lecture per week for 15 weeks.

Prerequisites: Biology 1A-1B. Must be taken concurrently with 101L.

An integrated treatment of the biology and evolution of the major groups in the plant, algal, and fungal kingdoms.

Final exam required.

PLANTBI C102L/INTEGBI C101L Diversity of Plants and Fungi with Laboratory 4 Units

Department: Plant Biology; Integrative Biology; Plant and Microbial Biology

Course level: Undergraduate

Terms course may be offered: Fall and spring. Offered alternate years.

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of lecture and 4 hours of laboratory per week, plus 2 1-day field trips.

Prerequisites: Biology 1A-1B. Must be taken concurrently with 101.

An integrated treatment of the biology and evolution of the major groups in the plant, algal, and fungal kingdoms.

Final exam required.

PLANTBI C103/MCELLBI C103/PB HLTH C102 Bacterial Pathogenesis 3 Units

Department: Plant Biology; Molecular and Cell Biology; Plant and Microbial Biology; Public Health

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: 100, 102 or consent of instructor.

This course for upper division and graduate students will explore the molecular and cellular basis of microbial pathogenesis. The course will focus on model microbial systems which illustrate mechanisms of pathogenesis. Most of the emphasis will be on bacterial pathogens of mammals, but there will be some discussion of viral and protozoan pathogens. There will be an emphasis on experimental approaches. The course will also include some aspects of bacterial genetics and physiology, immune response to infection, and the cell biology of host-parasite interactions.

Final exam required. Instructor: Portnoy

PLANTBI 104L Discovery-Based Research in Microbiology 2 Units

Department: Plant and Microbial Biology

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1.5 hours of Lecture and 4.5 hours of Laboratory per week for 10 weeks.

An introduction to microbiology research in which students generate gene knockouts in *Caulobacter* and analyze the mutant phenotypes. Each student will disrupt one gene of known function and one gene of unknown function. Students will attend lectures focusing on the techniques to be employed and perform experiments under supervision. This course may be taken by students with no prior laboratory experience to expose them to discovery-oriented research.

Final exam required. Instructor: Ryan

PLANTBI C107L/INTEGBI C107L Principles of Plant Morphology with Laboratory 5 Units

Department: Plant Biology; Integrative Biology; Plant and Microbial Biology

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Lecture, 1 hour of Discussion, and 6 hours of Laboratory per week for 15 weeks.

Prerequisites: Biology 1A-1B; must be taken concurrently with 107.

An analysis of the structural diversity of multicellular plants, especially the higher forms, with emphasis on the developmental mechanisms responsible for this variation in form and the significance of this diversity in relation to the environments in which plants grow.

Final exam required. Formerly known as 100L. Instructor: Specht

PLANTBI C110L/INTEGBI C110L Biology of Fungi with Laboratory 4 Units

Department: Plant Biology; Integrative Biology; Plant and Microbial Biology

Course level: Undergraduate

Term course may be offered: Fall

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of lecture and 6 hours of laboratory per week. Several field trips are offered, including day trips to a mushroom farm and winery, and a weekend mushroom foray.

Prerequisites: Biology 1B

Selected aspects of fungi: their structure, reproduction, physiology, ecology, genetics and evolution; their role in plant disease, human welfare, and industry. Offered even fall semesters.

Final exam required. Instructors: Bruns, Taylor

PLANTBI C112/MCELLBI C112 General Microbiology 4 Units

Department: Plant Biology; Molecular and Cell Biology; Plant and Microbial Biology

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 4.5 hours of Lecture and 1.5 hours of Discussion per week for 10 weeks.

Prerequisites: Biology 1A and 1B.

This course will explore the molecular bases for physiological and biochemical diversity among members of the two major domains, Bacteria and Archaea. The ecological significance and evolutionary origins of this diversity will be discussed. Molecular, genetic, and structure-function analyses of microbial cell cycles, adaptive responses, metabolic capability, and macromolecular syntheses will be emphasized.

Final exam required. Instructors: Ryan, Wildermuth

PLANTBI C112L/MCELLBI C112L General Microbiology Laboratory 2 Units

Department: Plant Biology; Molecular and Cell Biology; Plant and Microbial Biology

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 4 hours of laboratory and 1 hour of discussion per week.

Prerequisites: C112 (may be taken concurrently).

Experimental techniques of microbiology designed to accompany the lecture in C112 and C148. The primary emphasis in the laboratory will be on the cultivation and physiological and genetic characterization of bacteria. Laboratory exercises will include the observation, enrichment, and isolation of bacteria from selected environments.

Final exam not required. Instructors: Komeili, Taga

PLANTBI 113 California Mushrooms 3 Units

Department: Plant and Microbial Biology

Course level: Undergraduate

Terms course may be offered: Fall and spring. Offered alternate odd years.

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of laboratory and 1 hour of discussion per week and 3 weekend overnight field trips.

Prerequisites: Consent of instructor.

This is a hands-on class in identification of macro fungi. Emphasis will be on laboratory work with fresh and dried fungi. Short lectures at the beginning of labs focus on mushroom systematic, collection techniques, and identification. Three weekend field trips are required in addition to the weekly laboratory. Previous course experience with fungi is recommended, but not required. Grades are based on tests and a collection.

Final exam required. Instructor: Bruns

PLANTBI C114/ESPM C138/MCELLBI C114 Introduction to Comparative Virology 4 Units

Department: Plant Biology; Environ Sci, Policy, and Management; Molecular and Cell Biology; Plant and Microbial Biology

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Introductory chemistry (Chemistry 1A or 3A-3B or equivalent) and introductory biology (Biology 1A, 1AL, and 1B or equivalent) and general biochemistry (Molecular and Cell Biology C100A or equivalent--preferably completed but may be taken concurrently).

This course will provide a comparative overview of virus life cycles and strategies viruses use to infect and replicate in hosts. We will discuss virus structure and classification and the molecular basis of viral reproduction, evolution, assembly, and virus-host interactions. Common features used during virus replication and host cellular responses to infection will be covered. Topics also included are common and emerging virus diseases, their control, and factors affecting their spread.

Final exam required. Instructors: Glaunsinger, Jackson

PLANTBI C116/MCELLBI C116 Microbial Diversity 3 Units

Department: Plant Biology; Molecular and Cell Biology; Plant and Microbial Biology

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: Upper-division standing. C112 or consent of instructor and organic chemistry (may be taken concurrently).

This course for upper-division and graduate students will broadly survey myriad types of microbial organisms, both prokaryote and eucaryote, using a phylogenetic framework to organize the concept of "biodiversity." Emphasis will be on the evolutionary development of the many biochemical themes, how they mold our biosphere, and the organisms that affect the global biochemistry. Molecular mechanisms that occur in different lineages will be compared and contrasted to illustrate fundamental biological strategies. Graduate students additionally should enroll in C216, Microbial Diversity Workshop.

Final exam required. Formerly known as 116. Instructor: Coates

PLANTBI 120 Biology of Algae 2 Units

Department: Plant and Microbial Biology

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Lecture per week for 15 weeks.

Prerequisites: Biology 1A-1B; Integrative Biology 101 recommended. Must be taken concurrently with 120L.

General biology of freshwater and marine algae, highlighting current research and integrating phylogeny, ecology, physiology, genetics, and molecular biology.

Final exam required. Instructor: Niyogi

PLANTBI 120L Laboratory for Biology of Algae 2 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of laboratory per week plus field trips.**Prerequisites:** Biology 1A-1B; Integrative Biology 101 recommended. Must be taken concurrently with 120.

Laboratories include study of representative types, identification of specimens collected during several field trips, and experiments on development, physiology, and molecular genetics.

Final exam not required. Instructor: Niyogi

PLANTBI 122 Bioenergy 2 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Biology 1A and 1B; Chemistry 3B.

Offers an assessment of global energy supply and demand, addresses the chemistry of climate change, examines the response of plants and microbes to changes in the environment, and emphasizes the role of biology and photosynthesis in offering solutions to related energy and societal problems. Bioenergy is examined from the point-of-view of potential biofuels, including aspects of the biological generation of hydrogen, hydrocarbons, fatty acids, lipids, and bio-oils, polymers and related materials.

Final exam required. Instructors: Buchanan, Melis, Pauly

PLANTBI C124/BIO ENG C181/CHEM C138/CHM ENG C195A The Berkeley Lectures on Energy: Energy from Biomass 3 Units**Department:** Plant Biology; Bioengineering; Chemical Biomolecular Engineering; Chemistry; Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Chemistry 1B or Chemistry 4B, Mathematics 1B, Biology 1A.

After an introduction to the different aspects of our global energy consumption, the course will focus on the role of biomass. The course will illustrate how the global scale of energy guides the biomass research. Emphasis will be placed on the integration of the biological aspects (crop selection, harvesting, storage and distribution, and chemical composition of biomass) with the chemical aspects to convert biomass to energy. The course aims to engage students in state-of-the-art research.

Repeatable when topic changes with consent of instructor. Final exam required. Instructors: Bell, Blanch, Clark, Smit, C. Somerville

PLANTBI C134/MCELLBI C134 Chromosome Biology/Cytogenetics 3 Units**Department:** Plant Biology; Molecular and Cell Biology; Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Survey of behavior, structure, and function of chromosomes with emphasis on behavior in model organisms. Topics include mitosis, meiosis, chromosome aberrations, genome function, dosage compensation, transposons, repetitive DNA, and modern cytological imaging.

Final exam required. Instructors: Cande, Hollick

PLANTBI 135 Physiology and Biochemistry of Plants 3 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Biology 1A-1B.

A study of physiological and biochemical processes in higher plants, including water relations, ion transport, and hormone physiology; photosynthesis (light utilization and carbon assimilation), nitrogen and sulfur metabolism, and plant-specific biosynthetic pathways.

Final exam required. Instructors: Melis, Terry

PLANTBI 142 Plant Genomics and Bioinformatics 2 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Any lower division biology class. Genetics and Plant Biology majors in the Plant Genetics, Genomics, and Bioinformatics concentration must take this course concurrently with Plant and Microbial Biology C144L in order to receive credit toward the major.

This course is designed as a companion course to Plant and Microbial Biology C144L and will equip students with the minimal skills required to use the main bioinformatics web servers and databases. Each lecture will present one or more web servers or databases and explain how to use that web server as part of a protein function or structure prediction/analysis.

Final exam required. Instructor: Sjolander

PLANTBI C144/BIO ENG C144 Introduction to Protein Informatics 4 Units**Department:** Plant Biology; Bioengineering; Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This course will introduce students to the fundamentals of molecular biology, and to the bioinformatics tools and databases used for the prediction of protein function and structure. It is designed to impart both a theoretical understanding of popular computational methods, as well as some experience with protein sequence analysis methods applied to real data. This class includes no programming, and no programming background is required.

Final exam required. Instructor: Sjolander

PLANTBI C144L/BIO ENG C144L Protein Informatics Laboratory 2 Units**Department:** Plant Biology; Bioengineering; Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Laboratory per week for 15 weeks.

This course is intended to introduce students to a variety of bioinformatics techniques that are used to predict protein function and structure. It is designed to be taken concurrently with C144 (which provides the theoretical foundations for the methods used in the laboratory class), although students can petition to take this laboratory course separately. No programming is performed in this class, and no prior programming experience is required.

Final exam required. Instructor: Sjolander

PLANTBI C148/MCELLBI C148 Microbial Genomics and Genetics 4 Units**Department:** Plant Biology; Molecular and Cell Biology; Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Molecular and Cell Biology C100A/Chemistry C130 or Molecular and Cell Biology 102.

Course emphasizes bacterial and archaeal genetics and comparative genomics. Genetics and genomic methods used to dissect metabolic and development processes in bacteria, archaea, and selected microbial eukaryotes. Genetic mechanisms integrated with genomic information to address integration and diversity of microbial processes. Introduction to the use of computational tools for a comparative analysis of microbial genomes and determining relationships among bacteria, archaea, and microbial eukaryotes.

Final exam required. Formerly known as Plant and Microbial Biology 118. Instructors: Brenner, Glass

PLANTBI 150 Plant Cell Biology 3 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Biology 1A-1B.

An introduction to the structure, dynamics, and function of plant cells: organelle structure and development; intracellular trafficking of small and macromolecules; cellular signaling; cell division and specialization.

Final exam required. Instructors: Luan, Sung

PLANTBI 160 Plant Molecular Genetics 3 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Biology 1A-1B.

A consideration of plant genetics and molecular biology. Principles of nuclear and organellar genome structure and function: regulation of gene expression in response to environmental and developmental stimuli; clonal analysis; investigation of the molecular and genetic bases for the exceptional cellular and developmental strategies adopted by plants.

Final exam required. Instructors: Fischer, Fletcher

PLANTBI 160L Laboratory for Plant Molecular Genetics 1 Unit**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** Biology 1A-1B. Must be taken concurrently with 160.

Laboratory designed to accompany 160, Plant Molecular Genetics.

Final exam not required. Instructors: Fischer, Fletcher

PLANTBI 165 Plant-Microbe Interactions 3 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.**Prerequisites:** Biology 1A-1B, Statistics 2 or 20 or 131A or Public Health 142. Completion of an upper division plant biology and an upper division microbiology course is recommended.

This course will cover topics in molecular plant-microbe interactions ranging from how microbes cause disease to how plants defend themselves. A second goal of the course is to engage students in state-of-the-art research in the area of plant-microbe interactions.

Oral Presentation Instructors: Somerville, Baker, Lewis

PLANTBI 170 Modern Applications of Plant Biotechnology 2 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Biology 1A-1B.

This course is designed to introduce students to the principles and applications of modern plant biotechnology. Basic concepts of modern agriculture will be reviewed in light of emerging biotechnology applications. Emphasis will be placed on understanding the tools and strategies involved in optimizing plant productivity.

Final exam required. Instructors: Baker, Somerville

PLANTBI 180 Environmental Plant Biology 2 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Biology 1A-1B.

An integrated and multidisciplinary approach to the study of interactions between plants and the environment. Introduces physical parameters in the global and micro-environment that affect plant function; and molecular, cellular, and developmental aspects of plant response to suboptimal/adverse conditions. Underlying biochemistry, physiology, and molecular biology of plant adaptation and acclimation mechanisms. Examines consequences of industrial activity on plant growth and productivity. Final exam required. Instructor: Terry

PLANTBI 185 Techniques in Light Microscopy 3 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 3 hours of laboratory per week.

The course will be a detailed overview of the practice of light microscopy as applied to scientific investigation. The emphasis of the course will be on the correct and appropriate use of the light microscope for biological scientists; however students of other disciplines are welcome. The course will cover optical microscope theory, microscope components and mechanics, and optical techniques including detailed descriptions, demonstrations, and use of all the modern light microscope contrast methods. Students will receive hands-on experience in all microscope and digital imaging techniques via direct instruction and use of instrumentation in the College of Natural Resources Biological Imaging Facility.

Final exam required. Instructor: Ruzin

PLANTBI 190 Special Topics in Plant and Microbial Biology 1 - 4 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hour of Lecture per week for 15 weeks. 2.5 to 10 hours of Lecture per week for 6 weeks.**Prerequisites:** Upper division standing or consent of instructor.

This class is designed to develop skills in critical analysis of specific plant and/or microbial biology issues. Topics may vary from semester to semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

PLANTBI H196 Honors Research - Plant and Microbial Biology 4 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hour of Independent study per week for 15 weeks. 1.5 to 7.5 hours of Independent study per week for 8 weeks.**Prerequisites:** Upper division standing and minimum GPA. See College of Natural Resources Honors website for current minimum GPA. http://nature.berkeley.edu/site/honors_program.php.

Supervised independent honors research specific to aspects of the plant and microbial biology major, followed by an oral presentation and a written report. Honors students must complete two semesters of research.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PLANTBI 198 Directed Group Studies in Plant Biology 1 - 3 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of discussion per unit per week.**Prerequisites:** Consent of instructor.

Group studies of selected topics.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PLANTBI 199 Supervised Independent Study and Research 1 - 4 Units**Department:** Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks. 1 to 3 hour of Independent study per week for 8 weeks. 1 to 3 hour of Independent study per week for 6 weeks.**Prerequisites:** Consent of instructor; overall GPA of 3.0.

Enrollment restrictions apply; see the Introduction to Courses and Curricula section of this catalog.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PLANTBI 200A Plant Developmental Genetics 1.5 Unit**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1.5 hours of Discussion per week for 5 weeks.**Prerequisites:** Consent of instructor.

The students will be provided with both the basic framework and current topics of plant developmental genetics.

Final exam required. Instructor: Hake

PLANTBI 200B Genomics and Computational Biology 1.5 Unit**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1.5 hours of Discussion per week for 5 weeks.**Prerequisites:** Consent of instructor.

Principles of computational and genomic biology. Covers evolutionary, algorithmic, and statistical foundations of sequence analysis, allowing students to understand concepts underlying modern computational methods. Practical applications will be pursued in student-coordinated sessions. Combined lecture with 220B.

Final exam not required. Instructor: Brenner

PLANTBI 200C Plant Diversity and Evolution 1.5 Unit**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1.5 hours of Discussion per week for 5 weeks.**Prerequisites:** Consent of instructor.

This course will introduce the students to the diversity of plant form and function and provide them with a basic understanding of the tools and techniques used to study plant diversification and evolution. Molecular and morphological data will be discussed and plant diversity will be introduced at molecular, population, organismal, and ecological levels.

Final exam not required. Instructor: Specht

PLANTBI 200D Plant Cell Biology 1.5 Unit**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1.5 hours of Discussion per week for 5 weeks.**Prerequisites:** Consent of instructor.

The course will describe the conceptual framework of plant cell biology followed by in-depth discussion of several active areas of research including cell wall biology, membrane transport, cellular trafficking, and cell signaling.

Final exam not required. Instructor: Luan

PLANTBI 200E Plant Biochemistry 1.5 Unit**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1.5 hours of Discussion per week for 5 weeks.**Prerequisites:** Consent of instructor.

The aim of this course is to augment the student's knowledge of key plant-specific (or particularly relevant) biochemical processes focusing on the underlying experiments used to deduce key cycles coupled with current areas of exploration and debate surrounding a given topic area. In addition, this section will broaden and deepen the student's knowledge of biochemistry in general including basic enzyme kinetics, assessment of enzymatic (biochemical) function, and modes of regulation.

Final exam not required. Instructor: Scheller

PLANTBI 200F Plant Systems Biology 1.5 Unit**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1.5 hours of Discussion per week for 5 weeks.**Prerequisites:** Consent of instructor.

The aim of this course is to highlight the specific hallmarks of systems biology. Students will be informed of the many resources for systems biology available to plant biologists and the recent published work that capitalizes on these resources. Each lecture will focus on fundamental principles followed by discussion of papers that are germane to the topic.

Final exam not required. Instructor: Harmon

PLANTBI 201 Faculty Research Review 2 Units**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

Presentation and discussion of faculty research in the areas of plant and microbial biology. Faculty speakers review recent advances in their area of expertise and present an outlook of current research activities in their laboratories. The format of the class is designed to stimulate a dialogue between instructor and students in the course of each presentation.

Final exam not required.

PLANTBI 202 Faculty Research Review 2 Units**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

Presentation and discussion of faculty research in the area of microbial biology. Faculty speakers review recent advances in their area of expertise and present an outlook of current research activities in their laboratories. The format of the class is designed to stimulate a dialogue between instructor and students in the course of each presentation.

Final exam not required.

PLANTBI 210 Scientific Reasoning and Logic 1 Unit**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture per week for 15 weeks.

The objectives of this class are to teach students to critically read and interpret scientific papers. Students will read and discuss strongly and poorly reasoned papers. At the end of the class the student should understand the logic and reasoning which make a paper strong, often classic, contribution.

Final exam not required. Instructor: Quail

PLANTBI C216/MCELLBI C216 Microbial Diversity Workshop 1 Unit**Department:** Plant Biology; Molecular and Cell Biology; Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Workshop and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Graduate standing; C112 or consent of instructor and organic chemistry (may be taken concurrently).

This workshop for graduate students will parallel C116, Microbial Diversity, which should be taken concurrently. Emphasis in the workshop will be on review of research literature and formulation of paper pertinent to research in microbial diversity.

Final exam not required. Instructor: Coates

PLANTBI 220A Microbial Genetics 1.5 Unit**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1.5 hours of Discussion per week for 5 weeks.**Prerequisites:** Consent of instructor.

The students will learn fundamental principles and advanced techniques in microbial genetics. The use of genetics in deducing biochemical pathways, protein interactions, and signal transduction pathways will be explored through reading and discussion of current and classic papers from the primary literature. Experimental design and interpretation will be the focus of problem sets solved in student-coordinated sessions.

Final exam not required. Instructor: Taga

PLANTBI 220B Genomics and Computational Biology 1.5 Unit**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1.5 hours of Discussion per week for 5 weeks.**Prerequisites:** Consent of instructor.

Principles of computational and genomic biology. Covers evolutionary, algorithmic, and statistical foundations of sequence analysis, allowing students to understand concepts underlying modern computational methods. Practical applications will be pursued in student-coordinated sessions. Combined lecture with 200B.

Final exam not required. Instructor: Brenner

PLANTBI 220C Microbial Diversity and Evolution 1.5 Unit**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1.5 hours of Discussion per week for 5 weeks.**Prerequisites:** Consent of instructor.

The students will be provided with both the basic framework and current topics of microbial diversity and evolution.

Final exam not required. Instructor: Taylor

PLANTBI 220D Cell Structure and Function 1.5 Unit**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1.5 hours of Discussion per week for 5 weeks.**Prerequisites:** Consent of instructor.

The students will be provided with both the basic framework and current topics of cell structure and function.

Final exam not required. Instructor: Komeili

PLANTBI 220E Microbial Physiology 1.5 Unit**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1.5 hours of Discussion per week for 5 weeks.**Prerequisites:** Consent of instructor.

The students will be provided with both the basic framework and current topics of microbial physiology.

Final exam not required. Instructor: Coates

PLANTBI 220F Microbial Ecology 1.5 Unit**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1.5 hours of Discussion per week for 5 weeks.**Prerequisites:** Consent of instructor.

The students will be provided with both the basic framework and current topics of microbial ecology.

Final exam not required. Instructor: Lindow

PLANTBI 222 Biochemistry of Biofuels: Concepts and Foundations 1 Unit**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

This course offers a consideration of genes, enzymes, metabolic pathways and biochemical processes leading to the generation of hydrogen, bio-oils, ethanol, and other biofuels. Discussion of biochemistry is extended to cover product yields and techno-economic analyses of commercial viability of the various biofuel products. Lectures are based on historical and contemporary papers in plant and microbial biochemistry, integrating structure, function and evolution of the molecular, cellular, and organismal levels, and discussing how this knowledge can be applied in the generation of renewable biofuels.

Final exam required. Instructors: Buchanan, Melis

PLANTBI C224/BIO ENG C281/CHEM C238/CHM ENG C295A The Berkeley Lectures on Energy: Energy from Biomass 3 Units**Department:** Plant Biology; Bioengineering; Chemical Biomolecular Engineering; Chemistry; Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Biology 1A; Chemistry 1B or 4B, Mathematics 1B.

After an introduction to the different aspects of our global energy consumption, the course will focus on the role of biomass. The course will illustrate how the global scale of energy guides the biomass research. Emphasis will be places on the integration of the biological aspects (crop selection, harvesting, storage, and distribution, and chemical composition of biomass) with the chemical aspects to convert biomass to energy. The course aims to engage students in state-of-art research.

Repeatable when topic changes with consent of instructor. Final exam not required. Instructors: Bell, Blanch, Clark, Smit, C. Somerville

PLANTBI 238 Readings in Environmental Microbiology 1 Unit**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Consent of instructor.

Special Topics and Advanced Seminars in Plant Pathology. Seminar/discussion by graduate students of current research in the field of plant pathogenic bacteria.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Environmental Science, Policy, and Management 238A. Instructor: Lindow

PLANTBI C244/BIO ENG C244 Introduction to Protein Informatics 4 Units**Department:** Plant Biology; Bioengineering; Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This course will introduce students to the fundamentals of molecular biology, and to the bioinformatics tools and databases used for the prediction of protein function and structure. It is designed to impart both a theoretical understanding of popular computational methods, as well as some experience with protein sequence analysis methods applied to real data. This class includes no programming, and no programming background required.

Final exam not required. Instructor: Sjolander

PLANTBI C244L/BIO ENG C244L Protein Informatics Laboratory 2 Units**Department:** Plant Biology; Bioengineering; Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Laboratory per week for 15 weeks.

This course is intended to introduce students to a variety of bioinformatics techniques that are used to predict protein function and structure. It is designed to be taken concurrently with C244 (which provides the theoretical foundations for the methods used in the laboratory class), although students can petition to take this laboratory course separately. No programming is performed in this class, and no prior programming experience is required.

Final exam not required. Instructor: Sjolander

PLANTBI C246/BIO ENG C246 Topics in Computational Biology and Genomics 4 Units**Department:** Plant Biology; Bioengineering; Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture, 1.5 hours of paper review, and discussion per week.

Prerequisites: Bioengineering 142, Computer Science 61A, or equivalent ability to write programs in Java, Perl, C, or C++; Molecular and Cell Biology 100, 102 or equivalent; or consent of instructor.

Instruction and discussion of topics in genomics and computational biology. Working from evolutionary concepts, the course will cover principles and application of molecular sequence comparison, genome sequencing and functional annotation, and phylogenetic analysis.

Final exam required. Instructors: Brenner, Eisen

PLANTBI 290 Seminar 1 - 2 Units**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 2 hour of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Advanced study in various fields of plant biology and microbial biology.

Topics will be announced in advance of each semester. Enrollment in more than one section permitted.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PLANTBI 296 Graduate Supervised Independent Study 1 - 12 Units**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of independent study per week per unit.**Prerequisites:** Graduate standing.

Graduate student independent study under the supervision of a faculty member. Sections are operated independently and directed toward different topics.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PLANTBI 297 Grant Writing and Research Presentations 2 Units**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

Each student will write a grant proposal in three steps: a one page outline, a three-page pre-proposal, and a complete 10-page grant proposal.

There will be feedback at each step in the process -- each participant will review the other grant proposals. Some of the scheduled classes will include discussion of the outlines and pre-proposals, and the last class will be organized as a grant panel, with students assigned as primary and secondary reviewers.

Final exam not required. Instructor: McCormick

PLANTBI 298 Plant Biology Group Studies 1 - 6 Units**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of lecture/discussion per week per unit.**Prerequisites:** Consent of instructor.

Advanced study of research topics which will vary semester to semester. Enrollment in more than one section permitted.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PLANTBI 299 Graduate Research 1 - 12 Units**Department:** Plant and Microbial Biology**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of research/laboratory per week per unit.**Prerequisites:** Graduate standing.

Graduate student research.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PLANTBI 300 Workshop on Teaching 2 Units**Department:** Plant and Microbial Biology**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of lecture/discussion per week.**Prerequisites:** Graduate student status.

Designed for all graduate students. This course has two goals: discussion of questions and problems relating to the GSI's teaching, and learning how to design and execute a whole course. Effective teaching methods will be introduced by experienced GSIs and faculty. Students will participate in reciprocal classroom visits, visitation and critique of faculty lectures, course design, lecture preparation, sample lecture presentation, and discussion of current literature on teaching.

Course may be repeated for a maximum of 4 units. Course may be repeated for a maximum of 4 units. Final exam not required.

PLANTBI 602 Individual Study for Graduate Students 1 - 8 Units**Department:** Plant and Microbial Biology**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 1-hour meeting per week.**Prerequisites:** Graduate standing.

Individual study in consultation with the major field adviser, intended to provide an opportunity for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Course does not satisfy unit or residence requirements for doctoral degree. Final exam not required.

PLANTBI S602 Individual Study for Graduate Students 1 - 6 Units**Department:** Plant and Microbial Biology**Course level:** Graduate examination preparation**Term course may be offered:** Summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Zero hours of Independent study per week for 8 weeks.**Prerequisites:** Graduate standing.

Individual study in consultation with the major field adviser, intended to provide an opportunity for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D.

Final exam not required.

Political Economy (POLECON)

POLECON 24 Freshman Seminar 1 Unit

Department: Political Economy

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: The grading option will be decided by the instructor when the class is offered.

Hours and format: 1 hour of Seminar per week for 15 weeks. 2 hours of Seminar per week for 8 weeks.

The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments, and topics vary from department to department and semester to semester. Enrollment is limited to 15 freshmen.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Political Economy of Industrial Societies 24.

POLECON 84 Sophomore Seminar 1 or 2 Units

Department: Political Economy

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: The grading option will be decided by the instructor when the class is offered.

Hours and format: 1 hour of seminar per week per unit for 15 weeks. 1 and 1 half hours of seminar per week per unit for 10 weeks. 2 hours of seminar per week per unit for 8 weeks. 3 hours of seminar per week per unit for 5 weeks.

Prerequisites: At discretion of instructor.

Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Political Economy of Industrial Societies 84.

POLECON 98 Directed Group Study 1 - 4 Units

Department: Political Economy

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

Hours and format: Group meetings to be arranged.

Prerequisites: Consent of instructor.

Student-directed course under the supervision of a faculty member.

Subject matter to change from semester to semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Political Economy of Industrial Societies 98.

POLECON 100 Classical Theories of Political Economy 4 Units

Department: Political Economy

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 7.5 hours of lecture per week for 8 weeks. 10 hours of lecture per week for 6 weeks.

One-semester lecture course offered each semester. In-depth analysis of the classical political economy literature, including such authors as Locke, Smith, Marx, Mills, and Weber to Veblen and Polanyi. Strong emphasis is placed on providing appropriate background for understanding the evolution of the literature that has emanated from the various social science disciplines which forms the basis of modern political economy. Final exam required. Formerly known as Political Economy of Industrial Societies 100.

POLECON 101 Contemporary Theories of Political Economy 4 Units

Department: Political Economy

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.

Prerequisites: 100, Political Economy of Industrial Societies 100 or consent of instructor.

This course is designed to introduce students to modern theoretical works of central intellectual debates on 20th century international political economy. The course explores alternative explanations for inequality in economic development among nations and economic declines of the dominate powers. It will also examine tensions between the increasing "globalization" of that economy and continued fragmentation of the international political system in nation-states.

Final exam required. Formerly known as Political Economy of Industrial Societies 101.

POLECON 130 Cross-Listed Topics 1 - 4 Units

Department: Political Economy

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1 to 4 hour of Lecture per week for 15 weeks.

Prerequisites: Consent of instructor.

This course is designed to accommodate cross-listed courses offered through other departments, the content of which is applicable to PE majors. Content and unit values vary from course to course.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Political Economy of Industrial Societies 130.

POLECON 133 Junior Seminar in Political Economy 3 Units**Department:** Political Economy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Prerequisites:** Junior Standing

These small research and writing seminars will focus on the research area of the faculty member teaching the course and will provide students the opportunity to engage in conversation, research, and writing in greater depth than is possible in a larger class.

Final Paper

POLECON 140 Special Topics 2 Units**Department:** Political Economy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 8 weeks.**Prerequisites:** Consent of instructor.

A short course designed to provide a vehicle to take advantage of short-term visitors coming to campus who have considerable expertise in areas of interest to political economy of industrial societies. Topics will vary from semester to semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Political Economy of Industrial Societies 140.

POLECON 150 Advanced Study in Political Economy of Industrial Societies 4 Units**Department:** Political Economy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks. 5.5 hours of Seminar per week for 8 weeks. 7.5 hours of Seminar per week for 6 weeks.**Prerequisites:** Consent of instructor and background in political economy or related social sciences.

Advanced multidisciplinary research in current issues of political economy and industrialization. Seminars will focus on specific geographical areas or topics with appropriate comparative material included. A major research project is required as well as class presentations. Topics change each semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Political Economy of Industrial Societies 150.

POLECON 155 Developments in Modern Political Economy 4 Units**Department:** Political Economy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 100 and 101 or consent of instructor.

This course focuses on the relationship of politics and economics in modern societies. Special attention is given to problems and issues in social science or public policy best examined from an interdisciplinary perspective with an eye toward building students' knowledge of recently developed analytical tools in political economy.

Course may be repeated for a maximum of 8 units. Course may be repeated for a maximum of 8 units. Final exam not required. Formerly known as Political Economy of Industrial Societies 155.

POLECON 160 Political Economy in Historical Context 4 Units**Department:** Political Economy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 100 and 101, or Political Economy of Industrial Societies 100 and 101, or consent of instructor.

This course focuses specifically on the historical context and perspective of the relationship of politics and economics in modern societies. Students are guided through an interdisciplinary survey of the historical experience of peoples and places who have participated in the ongoing great transformation away from agricultural societies to the rise of the industrial state and onto post-industrialism. Each term provides a different perspective of this transformation.

Course may be repeated for a maximum of 8 units. Course may be repeated for a maximum of 8 units. Final exam required. Formerly known as Political Economy of Industrial Societies 160.

POLECON W160A Political Economy in Historical Context: The Twentieth Century: Economies, Societies, Politics, Technologies 4 Units**Department:** Political Economy**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Web-based lecture and 3 hours of Web-based discussion per week for 8 weeks. This is an online course.**Prerequisites:** Econ 1 or equivalent.

The world today is more different in its economies, in its forms of political organization, in its sociological dynamics, and perhaps most of all in the technologies we use and abuse every day than the world of 1870 was from the world of 1820, or indeed than the world of 1870 was from the world of 500 BC. We who live on this globe now are who we are because the history of the past century and a half has taken the form that it has. And that history is predominantly economic and technological. This course is web-based.

Students will receive no credit for W160A after taking 160A or Economics 115 or Political Economy of Industrial Societies 160A. Final exam required. Formerly known as Political Economy of Industrial Societies W160A. Instructor: DeLong

POLECON 192 Senior Thesis 3 Units**Department:** Political Economy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual weekly meetings.**Prerequisites:** Upper division standing; consent of instructor.

This course is designed to provide a vehicle for undergraduate students interested in writing a major paper on a political economy topic. The paper should be approximately thirty pages in length; the topic should be agreed upon in advance by both the student and faculty sponsor.

Final exam not required. Formerly known as Political Economy of Industrial Societies 192.

POLECON H195 Senior Honors Thesis Seminar 4 Units**Department:** Political Economy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of seminar plus 1 hour of consultation per week.**Prerequisites:** International and Area Studies 102 and consent of instructor; senior standing.

Honors students are required to research and write a thesis based on the prospectus developed in International and Area Studies 102. The thesis work is reviewed by the honors instructor and a second reader to be selected based on the thesis topic. Weekly progress reports required.

Final exam not required. Formerly known as Political Economy of Industrial Societies H195.

POLECON 196 Special Field Research 1 - 6 Units**Department:** Political Economy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 240-300 hours work per semester plus regular meetings with the faculty supervisor.**Prerequisites:** Consent of instructor.

Students to work in selected internship programs approved in advance by the faculty coordinator and for which written contracts have been established between the sponsoring organization and the student. Students will be expected to produce two progress reports for their faculty coordinator during the course of the internship, as well as produce a final paper for the course consisting of no fewer than 35 pages. Other restrictions apply; see faculty adviser.

Course may be repeated for a maximum of 12 units. Course may be repeated for a maximum of 12 units. Final exam not required. Formerly known as Political Economy of Industrial Societies 196.

POLECON C196A/GWS C196A/HISTART C196A/HISTORY C196A/MEDIAST C196A/POL SCI C196A/SOCIOL C196A/UGIS C196A UCDC**Core Seminar 4 Units****Department:** Political Economy; Gender and Women's Studies; History; History of Art; Media Studies; Political Science; Sociology; Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 4.5 hours of Lecture and 1.5 hours of Discussion per week for 10 weeks.**Prerequisites:** C196B (must be taken concurrently).

This course is the UCDC letter-graded core seminar for 4 units that complements the P/NP credited internship course UGIS C196B. Core seminars are designed to enhance the experience of and provide an intellectual framework for the student's internship. UCDC core seminars are taught in sections that cover various tracks such as the Congress, media, bureaucratic organizations and the Executive Branch, international relations, public policy and general un-themed original research.

Final exam not required. Instructor: Cain

POLECON C196B/GWS C196B/HISTART C196B/HISTORY C196B/MEDIAST C196B/POL SCI C196B/SOCIOL C196B/UGIS C196B UCDC**Internship 6.5 Units****Department:** Political Economy; Gender and Women's Studies; History; History of Art; Media Studies; Political Science; Sociology; Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 20-4 to Thirty hours of Internship per week for 15 weeks.**Prerequisites:** C196A (must be taken concurrently).

This course provides a credited internship for all students enrolled in the UCDC and Cal in the Capital Programs. It must be taken in conjunction with the required academic core course C196A. C196B requires that students work 3-4 days per week as interns in settings selected to provide them with exposure to and experience in government, public policy, international affairs, media, the arts or other areas or relevance to their major fields of study.

Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 to 2 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 1.5 to 2.5 hours of Discussion per week for 8 weeks.

This course is designed to introduce students to the major theoretical approaches to international politics, to explore important historical and contemporary questions and debates in international affairs, and to teach students to think critically about international relations. It is a prerequisite for most upper division international relations courses in Political Science. Final exam required.

POL SCI 18AC Race, Culture, and Politics in the Golden State 4 Units**Department:** Political Science**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture per week for 6 weeks.**Prerequisites:** Consent of instructor.

This course will study the historical processes of racial formation and transformation in California. Students will develop an understanding of the dynamic nature of racial and ethnic cultures and identities, and use these tools to better understand their own cultural position. Two periods are studied: 1848-1882 and 1964-1988. The course will consider the experiences of Asian Americans, Chicano/Latinos, African Americans, European Americans, and Native Americans.

Satisfies the American Cultures requirement

Final exam required.

POL SCI 39B Freshman/Sophomore Seminar 2 - 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of seminar per unit.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Course may be repeated for credit when topic changes. Final exam required.

POL SCI 41 Freshman Seminar 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 3 hours of seminar and 1 hour of conference per week.

Topics, experimental in nature, will vary from year to year.

Course may be repeated for credit with consent of department. Course may be repeated for credit with consent of department. Final exam not required.

POL SCI C79/COMPSCI C79/STAT C79 Societal Risks and the Law 3 Units**Department:** Political Science; Computer Science; Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Defining, perceiving, quantifying and measuring risk; identifying risks and estimating their importance; determining whether laws and regulations can protect us from these risks; examining how well existing laws work and how they could be improved; evaluating costs and benefits.

Applications may vary by term. This course cannot be used to complete engineering unit or technical elective requirements for students in the College of Engineering.

Final exam not required.

POL SCI 98 Directed Group Study for Lower Division Students 1 - 3 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Hours to be arranged.**Prerequisites:** Consent of instructor.

Lectures and small group discussion focusing on topics of interest that vary from semester to semester.

Course may be repeated for credit with consent of department. Course may be repeated for credit with consent of department. Final exam not required.

POL SCI 99 Supervised Independent Study 1 - 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** By arrangement with faculty.**Prerequisites:** Completion of two Political Science courses and a 3.3 GPA.

Supervised Independent Study and Research for lower division students, pursuant to the Regulations of the Berkeley Division, Section A230.

Final exam not required.

POL SCI 102 The American Presidency 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 10 hours of lecture/discussion per week for 6 weeks. 6 hours of lecture and 2 hours of discussion for 8 weeks.

Analysis of principal institutions, functions, and problems of the Presidency and the federal executive branch. Special attention will be given to topics of presidential leadership, staffing, executive-legislative relations, and policy formation. Comparative reference to executive processes in other political systems.

Final exam required.

POL SCI 103 Congress 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 10 hours of lecture/discussion per week for 6 weeks.**Prerequisites:** 1 or consent of instructor.

Nomination and election, constituent relations, the formal and informal structures of both houses, relations with the executive branch, policy formation, and lobbying.

Final exam required.

POL SCI 103W The Congress 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 to 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Admittance to UC Berkeley-Washington Program. For details see <http://learning.berkeley.edu/ucdc>.

This course will explore the Congress--the first branch under the Constitution--and its role in our political system. It will leverage our environment in Washington by featuring frequent guest speakers and seeking connections to current policy and political debate. In addition to surveying the pathways of lawmaking, we will ask how Congress and its members relate to the other branches of government, to the press, and to the public.

Final exam required.

POL SCI 104 Political Parties 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

The institutional environment within which American politics takes place. Concept and history of parties in the American context: their nature and function, origin and development. Party organization and structure. State, national, and local party systems and their variations. Nominations and elections. One directed research paper will be required.

Final exam required.

POL SCI 105 The Politician 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

The nature of politics, the education of politicians, the structure of ambition, and the ethical values of social behavior in the political world. Sessions with elected officials and party workers on their vocation.

Directed field research.

Final exam required.

POL SCI 106A American Politics: Campaign Strategy - Media 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Junior or senior standing.

An inside look at how political campaigns operate from the viewpoint of the media, taught by the people who run them. Class material will be directed towards students who are interested in direct involvement in campaign politics or who are looking for a greater understanding of the political process. Students will be required to develop a complete written campaign strategy document in order to fulfill class requirements. Students will be expected to follow political and campaign news via the media and be prepared to discuss those developments in class.

Final exam required.

Topics will vary.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Formerly known as 108W.

POL SCI 110B Cal-in-Sacramento 2 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Limited to summer Cal-in-Sacramento interns.

The purpose of this course is to provide Cal-in-Sacramento interns and other interested UC Berkeley students with a rudimentary understanding of our state government. We will focus on the state legislature and executive branch, exploring both the policy-making process and the politics in Sacramento, which we will learn are quite closely related to one another.

Course may be repeated for credit with consent of department. Course may be repeated for credit with consent of department. Final exam required.

POL SCI 111AC The Politics of Displacement 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks. 10 hours of Lecture per week for 6 weeks.

Antebellum American political history generally follows a routine script in which the purpose of the Revolution was to liberate Americans for self-government and economic and social development. Slavery is viewed as an anomaly still needing explanation, and Native American relocation as the consequence of natural forces of immigration and pre-modern social values. In this class, the revolution against traditional political authority embodied in Jefferson's and Thomas Paine's attack on the British crown, the rise of slavery, and the conflict with Native America are seen as coherent parts of a cultural and social development that emerges in the 18th- and 19th-century America. Using both original antebellum materials, including biographies, history, and literature, and contemporary images from American popular culture such as film, news and magazine articles, and music, we will compare and contrast the experiences of antebellum Native Americans, European immigrants, and African slaves as a connection between the past and the present emerges.

Satisfies the American Cultures requirement

Final exam required.

POL SCI 112A History of Political Theory 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture, 2 hours of discussion, and 1 hour of conference per week.

Major theories from the ancient Greeks to the modern period. Ancient and medieval political thought, including Plato, Aristotle, and St. Augustine.

Final exam required.

POL SCI 112B History of Political Theory 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

Basic problems of political theory as viewed within the context of American history and institutions.

Final exam required.

POL SCI 114A Theories of Governance: Late 20th Century 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 1.5 hours of Discussion per week for 6 weeks.

What is governance? How should we explain its emergence? What are its implications for public policy and democracy? This course uses debates about contemporary governance to examine four approaches to political science and political theory. The approaches are rational choice theory, institutionalism, Marxism, and poststructuralism. The course looks at the narrative that each approach provides of the origins and workings of governance since 1979, and at the way these narratives embody theoretical commitments about rationality and power, structure and agency, and democracy. It thus promotes an awareness of the way questions about contemporary governance are inextricably linked to philosophical and normative commitments. This course has a required discussion section.

Final exam not required.

POL SCI 116A Special Topics in Political Theory 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 to 2 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 1 to 2 hour of Discussion per week for 6 weeks.

Intensive study of one topic, problem, or intellectual movement in political theory. See department web site for specific course offerings.

POL SCI 118AC Three American Cultures 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

The course will examine three American cultural forms. The focus of the course is to be comparative; readings will center around first-person accounts, written by members of the ethnic groups most immediately involved in each of the cultural forms. The theme is that of identity, seen politically as well as culturally: examining how the various ethnic groups involved came to forge a collective identity for themselves. The three groups studied will vary by instructor. See departmental listings for more specific information.

Satisfies the American Cultures requirement

POL SCI 122A Politics of European Integration 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 to 2 hour of Discussion per week for 15 weeks.

The European Union is the world's most advanced experiment in governance beyond the level of the traditional nation-state. Through the European Union, the main members countries have pooled their national sovereignty and created new ways political authority, economic competition, social cohesion, and cultural identity. While specialists in comparative politics focus on the separate countries, scholars in international relations emphasize the construction of supranational institutions and transnational identities. This course seeks to synthesize the comparative and international approaches by examining the economic, political, and cultural aspects of integration. Readings are drawn from international relations, comparative politics, public policy, sociology, and some anthropological debates. Course requirements include careful preparation of the readings, discussion sections, participation in a group report on one of the major domains mentioned above, and a closed-book final.

Final exam required.

POL SCI 124A War! 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks. 8 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks.**Prerequisites:** 5

War, what is it good for? Absolutely nothing! Is this necessarily true?

Wars are brutal and horrific events, but are they all necessarily the result of miscalculation, accident, or fanaticism? Can war serve a rational purpose? Are wars governed by rules and do states care about these rules? This course is designed for upper-level undergraduate students. Final exam required.

POL SCI 124C Ethics and Justice in International Affairs 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 to 2 hour of Discussion per week for 15 weeks.

Should nations intervene in other countries to prevent human rights abuses or famine? On what principles should immigration be based?

Should wealthy states aid poorer states, and if so, how much? Who should pay for global environmental damage? Answers to these moral questions depend to a great degree on who we believe we have an obligation to: Ourselves? Nationals of our country? Residents of our country? Everyone in the world equally? We will examine different traditions of moral thought including skeptics, communitarians, cosmopolitans, and use these traditions as tools to make reasoned judgments about difficult moral problems in world politics.

Final exam required.

POL SCI 126A International Political Economy 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** A is prerequisite to B.

Economic concepts in the study of international political behavior. Political concepts influencing the choice of economic policies.

Final exam required. Instructor: 126A is prerequisite to B.

POL SCI 128 Chinese Foreign Policy 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This course covers the history and analysis of Chinese foreign policy since the inception of the People's Republic of China 1949. Some attention is devoted to pre-1949 Far Eastern international relations, but only as a background to the study of the contemporary period. Emphasis is placed on Sino-American and Sino-Soviet relations, on the domestic determinants of Chinese foreign policy, on the changing nature of China's relations with her Asian neighbors, and on important substantive issues. Final exam required.

POL SCI 128A Chinese Foreign Policy 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Chinese foreign policy from the inception of the People's Republic of China in 1949 to the present. This course aims at providing the student with a sufficient factual base, alternative theoretical approaches and some of the methodological tools useful in studying Chinese foreign policy. Final exam required.

POL SCI 129B Russia after Communism 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 1 hour of discussion per week. 8 hours of lecture and 2 hours of discussion per week for 6 weeks.

This course presents a broad introduction to contemporary politics and society in Russia. The social movements and political transformations of the Gorbachev period will be explored. Most of the course is devoted to the post-communist period and current problems of political change and upheaval. Topics to be investigated include the movement from a command economy to capitalism, struggles among emerging social interests, the changing role of the military in society, crime and social disintegration, the rise of nationalism and the search for national identity, civil war, and the transformation of political institutions. The course is recommended for juniors and seniors but is open to all students. Final exam required.

POL SCI C131A/ECON C142/PUB POL C142 Applied Econometrics and Public Policy 4 Units**Department:** Political Science; Economics; Public Policy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and zero to 1 hour of discussion/laboratory per week.**Prerequisites:** 140 or 141 or consent of instructor.

This course focuses on the sensible application of econometric methods to empirical problems in economics and public policy analysis. It provides background on issues that arise when analyzing non-experimental social science data and a guide for tools that are useful for empirical research. By the end of the course, students will have an understanding of the types of research designs that can lead to convincing analysis and be comfortable working with large scale data sets. Final exam required.

POL SCI C135/ECON C110 Game Theory in the Social Sciences 4 Units**Department:** Political Science; Economics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

A non-technical introduction to game theory. Basic principle, and models of interaction among players, with a strong emphasis on applications to political science, economics, and other social sciences. Students will receive no credit for C135 after taking Economics 104. Final exam required. Formerly known as 135.

POL SCI 137A Revolutionary Change 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Theories of revolutionary violence, rebellion, and revolution. Strategies of revolution, terrorism, sources of revolutionary action. Final exam required.

POL SCI 138E The Varieties of Capitalism: Political Economic Systems of the World 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1.5 hours of Discussion per week for 15 weeks.

This course examines the interaction between politics and markets, both in theory and in practice, explicitly linking classic works on political economy with current policy debates. We study how political systems and markets are organized in a wide range of different national settings, looking at both history and contemporary issues. Topics include: 1) early industrialization in Britain and the United States, 2) late industrialization in continental Europe and Japan, 3) the varieties of capitalism in contemporary industrialized countries, 4) the newly industrializing economics of Latin America and East Asia, 5) the problems of development, and 6) the transition from communism to a market economy in Eastern Europe and China. Final exam required.

POL SCI 138G National Success and Failure in the Age of a Global Economy: from Pleats to Cleats 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

In the present era political, economic, and social organization powerfully influence national capacity to assure economic success, real and rising incomes for the population, and political success, basic survival, and the projection of its purposes and values. This course looks at the continual process of international competition and transformation, and examines which factors separate the winners from the losers. We will gain leverage into these questions by examining critical moments in the 20th and 21st centuries and analyze according to national responses. What choices signal success? Can the failures be avoided? The course will discuss whether globalization is shunting aside national political choice, or whether globalization is in fact a sequence of national and regional stories played out on a larger stage. We will consider how economic constraint structures political choice and national response to the global economy. But we will also examine how political developments shape market dynamics and national innovations. We will learn about all sorts of things from the politics of French fashion to why Japanese make good cars.

Final exam required. Instructor: Zysman

POL SCI 139B Development Politics 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1.5 hours of Discussion per week for 15 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Politics of economic development in developing countries. Comparative analysis of the theories and practice of development in the light of contemporary experience. Political strategies of agrarian, industrial, educational, and regional development and their impact on autonomy, welfare, justice, and human development.

Final exam required.

POL SCI C139/CY PLAN C139 Urban and Sub-national Politics in Developing Countries 4 Units**Department:** Political Science; City and Regional Planning**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 to 2 hour of Discussion per week for 15 weeks.

Over half of the world's population is now urban. As urban populations swell, metropolitan areas in both the developed and the developing world struggle to provide basic services and address the negative externalities associated with rapid growth. Sanitation, transportation, pollution, energy services, and public safety typically fall to sub-national governments. Yet local sub-national institutions face difficulties as they tackle these challenges because development tends to spill over political boundaries and resources are limited. Such difficulties are particularly acute in the developing world due to tighter resource constraints, weak institutions, and the comparative severity of the underlying problems. Moreover, democratization and decentralization suggest that urban governance and service delivery may have become more democratic, but present challenges with respect to priority setting, coordination, and corruption. Final exam required. Instructor: Post

POL SCI 139D Urban and Sub-national Politics in Developing Countries 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 to 2 hour of Discussion per week for 15 weeks.

The structure and evolution of political institutions in Japan. Emphasis upon such topics as political parties, the bureaucracy, social change, and contemporary policy issues.

Final exam required.

POL SCI 143C Chinese Politics 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

An overview of Chinese politics since the fall of the Qing Dynasty. Emphasis on the People's Republic of China and post-Mao reforms.

Final exam required. Instructor: O'Brien

POL SCI 143T Chinese Politics and Society 4 Units**Department:** Political Science**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 18 hours of lecture/discussion per week for the first week in Berkeley and 15 to 20 hours of lecture/discussion per week while in China.

This course offers the opportunity to learn about contemporary Chinese politics and society while visiting both famous and ordinary places to see and hear first hand how the Chinese people have experienced over five decades of dramatic change. The course has two components. The first week will be spent on the Berkeley campus and will involve an intensive introduction to the major strands of scholarly work on Chinese politics since the Communist revolution. During this time, students will also have a chance to become familiar with the basic outlines of recent Chinese history. The remaining 3 weeks of the course will be held in the Peoples Republic of China with an emphasis on experiential learning. Lecture and discussions will be on-going during and following field work and tours. In addition to lecture and discussions, two essays will be required. Course may be repeated for credit with departmental approval. Course may be repeated for credit when topic changes. Final exam required.

POL SCI 144 American Foreign Policy Toward Asia 4 Units**Department:** Political Science**Course level:** Undergraduate**Term course may be offered:** Fall**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

This course is designed primarily for students interested in exploring in depth the relationship between U.S. foreign policy and developments in East Asia. This course will explore the historical and contemporary foreign policies of the United States toward Asia with an eye toward analyzing the ways in which Asia has been shaped by American, and in turn American policies have been shaped by events in Asia. Final exam required.

POL SCI 144B Politics of Divided Korea 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

An overview of modern Korea divided into the Republic of Korea and the Democratic People's Republic of Korea. The course will compare the two Koreas in terms of political, social and economic institutions, culture, political elites and modernization strategy.

Final exam required.

POL SCI 145A South Asian Politics 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

A comparative analysis of development and change in the political systems of contemporary South Asia.

Final exam required.

POL SCI W145A Understanding Political Developments in India 4 Units**Department:** Political Science**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Web-based lecture and 2 hours of Web-based discussion per week for 8 weeks. 8 hours of Web-based lecture and 2 hours of Web-based discussion per week for 6 weeks. This is an online course.

This class focuses mostly on the "domestic" politics of India. In addition to providing an overview of political developments in India since independence, this online course assesses the nature of democratic participation and representation in contemporary India - the world's largest democracy.

Final exam required.

POL SCI 146A African Politics 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Introduction to politics in the states of contemporary sub-Saharan Africa. Comparative study of political institutions and regime transitions; economic crisis and development; political violence and civil conflict.

Final exam required.

POL SCI 146D Environment, Culture, and Peacebuilding 6 Units**Department:** Political Science**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours of Lecture per week for 6 weeks.

The course begins at the global level and moves to the local level in examining the nexus of politics, environment, and culture where conflicts ensue. These conflicts can lead to violence and hardship. They can also result in creative adaptations and solutions based in political and administrative institutions and processes that build peace. The first three weeks of the course examine global trends and institutions; the last three weeks examine the specific dynamics involving land and resource conflict in Kenya. Throughout the course, students will be introduced to social science and environmental science perspectives. Students will be exposed to the analytical tools of political economy, history, and political ecology. The class will consist of students from the University of California, Berkeley and Kenyatta University. It will be led by faculty from both institutions.

Final exam required. Instructors: Arriola, Kanogo, Olukoye

POL SCI N146C Conflict and Change in Southern Africa 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 20 hours of Lecture per week for 3 weeks.

Combining classroom lectures and discussion with visits to interesting and relevant places in the Cape Town area, this course will be concerned with the dynamics of political change in South Africa. We will sketch the historical evolution of the system of minority racial rule that characterized South Africa until 1994; analyze the process of political upheaval and the transformation that culminated in the transitional election of 1994; examine the process of negotiations and constitution making that began in 1990, and its implications for the nature of politics and governance in a new government to overcome the legacies of South Africa's past.

Final exam not required. Instructor: Price

POL SCI 147F Contemporary French Politics: The Republican Model in Transition 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 to 2 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 1 to 2 hour of Discussion per week for 6 weeks.

French political life has long gravitated around a "Republican model" marked by an unmediated relationship between the citizen and the state, socialization into French values through secular public education, a special vocation for France on the international stage, and an activist state. Recent developments have called the Republican model into question. This course will examine the transformation of France's Republican model - its origins, operations, and responses to contemporary challenges.

Final exam required.

POL SCI 147G The Welfare State in Comparative Perspective 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Comparison of welfare states in Western Europe and North America. Origins of welfare states. Varieties of welfare states. Relationship between welfare states and the economy. Impact of changing social, economic, and family structure states. Contemporary welfare reform. Final exam required.

POL SCI 147T German History and Politics 4 Units**Department:** Political Science**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of lecture for 4 days per week for 4 weeks.

This course provides an introduction to German history, from ancient times to the post-reunification period. Special emphasis will be placed on the history of the city of Berlin. Except for a few preparatory activities in Berkeley, the course will be conducted in Berlin, offering lectures as well as hands-on visits to important places of German history. This is a four-week travel-study course.

Final exam required. Instructor: Sperlich

POL SCI 148A Latin American Politics 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 10 hours of lecture/discussion per week for 6 weeks. 10 hours of lecture/discussion per week for 6 weeks.

Political institutions, groups and parties in Latin American countries. Basic characteristics of political processes in Latin America; problems of political development and modernization and political change. Comparative study of political systems, institutions, groups and political culture.

Final exam required.

Final exam required.

POL SCI 150 The American Legal System 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

The nature of the American legal system; the interrelationships of judges, lawyers, police, political officials, bureaucrats, press, and general public; the political and social aspects of the legal process.

Students who have taken 150A during the 1983-84 or 1984-85 academic year will receive no credit for 150. Final exam required.

POL SCI 157A Constitutional Law of the United States 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 to 4 hours of Lecture and 1 to 2 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

Fundamental principles of constitutional law, leading cases, causes, and consequences of legal decisions and their role in influencing, shaping, and constraining the American political system. Judicial Review and the Limits to National Power.

Final exam required.

POL SCI 157B Constitutional Law of the United States 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 to 4 hours of Lecture and 1 to 2 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.**Prerequisites:** 157A.

Fundamental principles of constitutional law, leading cases, causes, and consequences of legal decisions and their role in influencing, shaping, and constraining the American political system. Civil Rights and Civil Liberties.

Final exam required.

POL SCI 161 Public Opinion, Voting and Participation 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 10 hours of lecture/discussion per week for 6 weeks. 6 hours of lecture and 2 hours of discussion per week for 8 weeks.

The nature of public opinion, attitude formation, electoral turnout and choice; political cleavages; the role of the mass public.

Final exam required.

POL SCI 164A Political Psychology and Involvement 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 8 weeks.

Personality factors in political behavior; psychological roots of decision-making; leadership; psychological sources of political belief; conflict theory.

Final exam required.

POL SCI N164A Psychology of Politics 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 1 hour of discussion per week. 8 hours of lecture and 2 hours of discussion per week for 6 weeks.

This course explores the sources of political beliefs and actions through the application of psychological theories about personality, learning, cognition, and group dynamics. The course begins by briefly considering a number of alternative analytic approaches to linking human nature and politics and then considers such problems as political ideology, persuasion, compliance, protest, violence, and leadership in terms of these approaches. The course considers both mass and elite political behavior. The readings include both quantitative materials drawn from survey research and experiments and more impressionistic and clinical studies.

Final exam not required.

POL SCI 166 Latinos and the U.S. Political System 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This course provides a critical analysis of the political circumstances, political behavior, and the activities and consequences of Latinos (or Hispanics) within the governmental and political system of the United States. Latinos became the nation's largest minority group in 2005 and are also the largest minority group in U.S. elementary/secondary schools. For these and other reasons the situation of Latinos has broad social and political significance.

Final exam required.

POL SCI 167AC Racial and Ethnic Politics in the New American Century 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 1 hour of Discussion per week for 6 weeks.

Some of the most enduring and violent conflicts in America center on race. The goal of this course is to explore, discuss, and better understand the relationship between perceptions of racial identity, attributions of racial difference, and politics, broadly defined. We focus on the recent and persistent debates about racism, identity, rights, representation, citizenship, conflict, and coalitions. A repeated theme of this course is the question whether racial order and inequality are essential to, or an exception from, the liberal democracy in the U.S. This is a lecture course with intensive readings, written assignments, and in-class discussion. Satisfies the American Cultures requirement

Final exam required.

POL SCI 169 Selected Topics in Political Behavior 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

See departmental announcements.

Course may be repeated for credit with consent of department. Course may be repeated for credit with consent of department. Final exam required.

POL SCI 171 California Politics 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

An inquiry into the political environment of the state--historical, economic, geographic, and social; its political institutions--government, parties, interest groups, and citizens; and the policies resulting from the interaction of environment and institutions.

Final exam required.

POL SCI 173S Political Economy of the California Crisis 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

This course examines the emergence and crisis of California's political economy. An analytical framework is developed that encompasses the secular growth and cyclical variability of California's income, expenditure, and revenue levels. California's economic growth and political development since 1875 will be analyzed. Specific topics covered include the Edmund G. (Pat) Brown era; Proposition 13 and the Ronald Reagan governorship; California's demographic transformation; challenges of minority economic development and political representation; the 2003 gubernatorial recall and the 2002-04 fiscal crisis. Course is part of the University of California Center Sacramento Program and is located in Sacramento.

Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam not required.

Instructor: Dymski

POL SCI 175A Urban and Metropolitan Government and Politics 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

The roles of various levels of government--local, regional, state, and national--in politics and policy-making in metropolitan regions.

Final exam required.

POL SCI 179 Undergraduate Colloquium on Political Science 1 Unit**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of lecture per week.

Political issues facing the state of California, the United States, or the international community.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Take home final exam

POL SCI 181 Public Organization and Administration 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 10 hours of Lecture per week for 6 weeks.

The methods used to manage the power of the bureaucracy in the American political system. An introduction to theories of organizational behavior. The effects of administrative structure upon the creation and distribution of public benefits.

Final exam required.

POL SCI H190A Honors Seminar 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 2 hours of seminar per week plus individual conferences.

Prerequisites: Consent of instructor. Must be a declared political science senior with a 3.5 GPA in the major and a 3.3 GPA overall.

Eligible students must have taken at least two letter-graded upper division Political Science courses at Berkeley. H190A is the first of a two-semester research seminar designed to provide support and structure to political science seniors writing an honors thesis. To receive department honors, students must maintain the minimum GPA for honors and complete H190B with a B+ or better. For additional details, please consult the Undergraduate Advising Office or <http://www.polisci.berkeley.edu>.

Final exam required.

POL SCI H190B Honors Seminar 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of seminar per week plus individual conferences.

Prerequisites: Consent of instructor. Must be a declared political science senior with a 3.5 GPA in the major and a 3.3 GPA overall.

Eligible students must have taken at least two letter-graded upper division Political Science courses at Berkeley. H190B is the second of a two-semester research seminar designed to provide support and structure to political science seniors writing an honors thesis. To receive department honors, students must maintain the minimum GPA for honors and complete H190B with a B+ or better. For additional details, please consult the Undergraduate Advising Office or <http://www.polisci.berkeley.edu>.

Final exam required.

POL SCI 191 Junior Seminar 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Lecture per week for 15 weeks.**Prerequisites:** Open to Political Science majors only.

The seminars will be led by ladder-rank faculty members in the subfields of American Politics, International Relations, and Comparative Politics. These intense writing seminars will focus on the research area of the faculty member teaching the course. The seminars will provide an opportunity for students to have direct intellectual interactions with faculty members while also giving the students an understanding of faculty research.

Students are allowed to take one seminar per semester while in junior status. Final exam required.

POL SCI 196 Special Research Project 1 - 4 Units**Department:** Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Regular individual meetings with faculty sponsor.

Regular individual meetings with faculty sponsor.

Prerequisites: Consent of faculty sponsor and department chairman.

Independent study of an advanced topic resulting in a substantial research paper.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI C196A/GWS C196A/HISTART C196A/HISTORY C196A/MEDIAST C196A/POLECON C196A/SOCIOL C196A/UGIS C196A UCDC Core Seminar 4 Units**Department:** Political Science; Gender and Women's Studies; History; History of Art; Media Studies; Political Economy; Sociology; Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 4.5 hours of Lecture and 1.5 hours of Discussion per week for 10 weeks.**Prerequisites:** C196B (must be taken concurrently).

This course is the UCDC letter-graded core seminar for 4 units that complements the P/NP credited internship course UGIS C196B. Core seminars are designed to enhance the experience of and provide an intellectual framework for the student's internship. UCDC core seminars are taught in sections that cover various tracks such as the Congress, media, bureaucratic organizations and the Executive Branch, international relations, public policy and general un-themed original research.

Final exam not required. Instructor: Cain

POL SCI C196B/GWS C196B/HISTART C196B/HISTORY C196B/MEDIAST C196B/POLECON C196B/SOCIOL C196B/UGIS C196B UCDC Internship 6.5 Units

Department: Political Science; Gender and Women's Studies; History; History of Art; Media Studies; Political Economy; Sociology; Undergrad Interdisciplinary Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

Hours and format: 20-4 to Thirty hours of Internship per week for 15 weeks.

Prerequisites: C196A (must be taken concurrently).

This course provides a credited internship for all students enrolled in the UCDC and Cal in the Capital Programs. It must be taken in conjunction with the required academic core course C196A. C196B requires that students work 3-4 days per week as interns in settings selected to provide them with exposure to and experience in government, public policy, international affairs, media, the arts or other areas or relevance to their major fields of study.

Final exam not required. Instructor: Cain

POL SCI C196W/GWS C196W/HISTART C196W/HISTORY C196W/MEDIAST C196W/POLECON C196W/SOCIOL C196W/UGIS C196W Special Field Research 10.5 Units

Department: Political Science; Gender and Women's Studies; History; History of Art; Media Studies; Political Economy; Sociology; Undergrad Interdisciplinary Studies

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 240-300 hours of work per semester plus regular meetings with the faculty supervisor.

Prerequisites: Consent of instructor.

Students work in selected internship programs approved in advance by the faculty coordinator and for which written contracts have been established between the sponsoring organization and the student. Students will be expected to produce two progress reports for their faculty coordinator during the course of the internship, as well as a final paper for the course consisting of at least 35 pages. Other restrictions apply; see faculty adviser.

Course may be repeated for a maximum of 12 units. Course may be repeated for a maximum of 12 units. Final exam not required. Formerly known as 196W.

POL SCI 196S UC Sacramento Internship and Research Seminar 9 - 13 Units

Department: Political Science

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of seminar and 24 to 32 hours of tutorial per week.

Prerequisites: Consent of instructor.

This seminar will introduce students to the theory and practice of policy analysis and development as it relates to legislative action at the state level to maximize students' internship experience. The internship component of the course will provide students with a challenging opportunity to engage in experiential learning in some aspect of the political, policy-making, or governmental processes in California's state capital. This course will permit students to develop a systematic understanding of the public policy and political process in California and to develop analytical writing skills to produce a 25-30 page research paper developing and reflecting on this understanding. This course is part of the University of California Center Sacramento Program and is located in Sacramento.

Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Unit credit will be based on the number of hours of the internship. Final exam not required. Instructor: Dymski

POL SCI 196W Understanding the Congressional World: A Field Research Seminar 10.5 Units

Department: Political Science

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Seminar, 1 hour of Colloquium, 3 hours of Fieldwork, and 18 hours of Internship per week for 15 weeks.

Prerequisites: Admission to UC Berkeley-Washington Program.

This research seminar will explore the workings of Congress and its role in making public policy. It combines elective coursework with the original scholarship requirements of a UCDC research seminar and is designed for students in Congressional internships and those considering Congressional staff positions after graduation. In addition to studying the pathways of lawmaking, we will ask how Congress and its Members relate to the other branches of government, the press, and the public.

Final exam required.

POL SCI 197 Field Study in Political Science 1 - 3 Units

Department: Political Science

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Offered for pass/not pass grade only.

Hours and format: By arrangement with faculty.

Prerequisites: Consent of faculty sponsor and department chair.

Supervised experience relevant to specific aspects of Political Science in off-campus organizations. Regular individual meetings with faculty sponsor and written reports required.

Final exam not required.

The relation between domestic political developments and the international system. The effect of economic development on political change. The effect of labor politics on national politics.

Final exam not required.

POL SCI 201D Governance of the E-economy 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

New digital technologies, changing market structures, and innovative business organizations are transforming the economic and social landscape of the advanced industrial countries. The policy issues associated with this transformation pose fundamental philosophical and political questions of how to organize our markets, polity, and society. The means of making and implementing these choices is politics. The necessarily global scope of the E-economy extends the political and policy challenges to the international arena. This course will explore the literature on the political economy of the Internet to determine what policy choices -- hence which political debates -- are and will be most important. We also will examine our conceptual understanding of the burgeoning digital economy and its impact on politics, law, and socio-economic relations.

Final exam not required.

POL SCI 202A Theories of Development and Political Change 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Issues of social organization and political change. Theories of progress, development, modernization and dependence.

Final exam not required.

POL SCI 203 Urban and Subnational Politics in Developing Countries 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 to 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate student standing.

Metropolitan areas in the developing world face enormous challenges. This course will consider the political and institutional environment in which efforts to address metropolitan problems are developed, the financial and institutional vehicles used to provide services of different types, and the role of political parties and other political organizations in the development and allocation of services. Readings will be drawn from Political Science, Sociology, Geography, and Economics. Final exam not required.

POL SCI C203/GMS C203 Urban and Subnational Politics in Developing Countries 4 Units**Department:** Political Science; Global Metropolitan Studies**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 to 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate student standing.

This course will consider the political and institutional environment in which efforts to address metropolitan problems are developed, the financial and institutional vehicles used to provide services of different types, and the role of political parties and other forms of political organization in the development and allocation of services. Emphasis will be placed upon fertile areas for research within the social sciences. Final exam not required.

POL SCI 206 Comparative Party Systems 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Why are there political parties? The origins of parties in issue cleavages, legislatures, social movements, and personal followings. Types of parties. The political machine, the ideological party, third parties, flash parties. Federalism and political parties. Intra-party competition and selection of leaders. What do parties try to maximize: votes? ideological purity? personal security of party professionals? How parties change: reform movements, issue crises, external social movements. Final exam not required.

POL SCI 207 Political Violence 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 to 3 hours of Seminar per week for 15 weeks.

This graduate seminar is designed to introduce students to the comparative study of political violence. The course examines two broad themes through a variety of theoretical and empirical approaches. The first theme focuses on why individuals choose to rebel: When does violence become a strategy for resolving conflict? Why do individuals participate in violence? How is violence organized? The second theme focuses on how states choose to repress citizens: When are human rights violations committed? When does a state use violence over other strategies? What are the effects of state violence?. Final exam not required.

POL SCI 209A Comparative Political Economy 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Seminar per week for 15 weeks.

This seminar provides an introduction to the major debates in comparative political economy. Although the empirical focus is on the affluent democracies, many of the debates and issues analyzed have implications for other regions. The course is divided into two main parts. The first part examines leading theoretical perspectives on political economy, such as Friedman, Marx, Weber, and Polanyi. The second part of the course is more topical. It probes a number of examples of economic development, crisis, and change, with an eye to assessing alternative theoretical perspectives. Final exam not required.

POL SCI 209B Post Fordism: New Patterns of Production, Time, and Meaning in Contemporary Capitalism 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 to 4 hours of Seminar per week for 15 weeks. With changes in technology, the internationalization of production and the massive increase in trans-border transactions of all kinds, it has been argued that we live and work in an era of substantively different capitalism. Were this true, it has deep implications for politics and for political economy. This graduate seminar explores the validity of this claim of a "new capitalism" through a variety of materials, starting with the question of whether "Fordism" ever existed, moving on to the question of whether "Post-Fordism" exists and ending with a variety of ethnographic studies that show how global production chains shape culture, gender, and hierarchy/power. Final exam not required. Instructor: Chaundhry

POL SCI 210 Selected Topics in Comparative Politics 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

See departmental announcements. Topic will vary with instructor.

Course may be repeated for credit with different topic and consent of instructor. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI 212A History of Political Thought: Ancient and Medieval 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Seminar per week for 15 weeks.

A weekly seminar on political thought from the ancient Greeks to the Renaissance. Ancient and medieval political theorist, typically including Plato, Aristotle, St. Augustine, and Aquinas.

Final exam not required.

POL SCI 212B History of Political Thought: Early Modern (Renaissance to French Revolution) 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Seminar per week for 15 weeks.

A weekly seminar on political thought from the Renaissance to the French Revolution. Early modern political theorist, typically including Machiavelli, Hobbes, Locke, Rousseau.

Final exam not required.

POL SCI 212C History of Political Thought: Modern (French Revolution through World War II) 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Seminar per week for 15 weeks.

A weekly seminar on political thought in the 19th and early 20th centuries. Modern political theorists, typically including Tocqueville, Hegel, Marx, Mill, Nietzsche, and Weber.

Final exam not required.

POL SCI 213 Methodological Topics in the History of Political Thought 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Seminar per week for 15 weeks.

A weekly seminar on approaches to the history of political thought.

Theoretical topics, typically including the nature of meaning and textuality, validity, and historical explanation.

Final exam not required.

POL SCI 214 Symposium in the History of Political Thought 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Seminar per week for 15 weeks.

An intensive examination of theorists, theories, or concepts in the history of political thought.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI 215A Approaches to Contemporary Political Theory 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Seminar per week for 15 weeks.

A weekly seminar on contemporary approaches to political theory.

Final exam not required.

POL SCI 215B Topics to Contemporary Political Theory 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Seminar per week for 15 weeks.

A weekly seminar on leading topics in contemporary political theory.

Final exam not required.

POL SCI 216 Symposium in Contemporary Political Theory 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Seminar per week for 15 weeks.

An intensive examination of a contemporary theorist, debate, or issue.

Final exam not required.

POL SCI 220A Theories of International Relations 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Previous work in international relations.

Origin, application and utility of major concepts featured in the study of international relations. Relation of various strands of political and social theory to international relations.

Final exam not required.

POL SCI 223 Selected Topics in International Relations 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

See departmental announcements. Topic will vary with instructor.

Course may be repeated for credit with different topic and consent of instructor. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI 224 Sociological Traditions in International Relations 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Lecture per week for 15 weeks.

This seminar traces the development of the constructivist program in international relations in order to better understand its elements, assumptions, and methods and apply those to current issues. We start by uncovering the roots of constructivism in sociology and philosophy and examine structuration theory, the English School, world systems theory, regime theory, and sociological institutionalism. The second part of this course focuses on the constructivist agenda in international relations, its boundaries and its critics. In the last part of the course we examine current research in IR that draws on sociological methods, including work on the role of norms, epistemic communities, transnational civil society, and the origins of the state.

Final exam not required. Instructor: Hassner

POL SCI 224A International Security 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 to 4 hours of Lecture per week for 15 weeks.

The goal of this course is to introduce advanced political science graduate students to current debates in the field of international security and to prepare these students for conducting dissertation research in their own areas of interest within this field. This course is designed for advanced political science graduate students preparing to commence their dissertation research. Its orientation is theoretical rather than empirical and it is both reading and research.

Final exam not required.

POL SCI 225 Constructivism 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Seminar per week for 15 weeks.

This seminar traces the development of the constructivist program in international relations in order to better understand its elements, assumptions, and methods and apply those to current issues. We start by uncovering the roots of constructivism in sociology and philosophy and examine structuration theory, the English School, world systems theory, regime theory, and sociological institutionalism. The second part of this course focuses on the constructivist agenda in international relations, its boundaries and its critics. In the last part of the course we examine current research in international relations that draws on sociological methods, including work on the role of norms, epistemic communities, transnational civil society, and the origins of the state.

Final exam not required. Formerly known as 224B. Instructor: Hassner

POL SCI 225A The Empirical Analysis of International Security 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks.

This course offers an introduction to the empirical analysis of International Security. The primary goals are 1) to acquaint students with the empirical knowledge in the field of International Security that has been produced with quantitative approaches and 2) to help students develop and hone their skills in empirical analysis. Therefore, particular emphasis will be given on how to go beyond being "consumers" of empirical research and how to become "producers" of novel empirical knowledge.

Final exam not required.

POL SCI 226 Religion and International Relations 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 to 3 hours of Seminar per week for 15 weeks.

How has religion shaped the structure of the international system? How should IR scholars approach the role that religion plays in contemporary affairs? How does religion constrain or motivate international conflict?

This seminar seeks to guide students through readings in the social sciences, from psychology and sociology to anthropology and political science, that explore the intersection of religion and international relations. We will examine a variety of theoretical approaches to the topic of religion and global politics, explore religious origins of the modern state system, and analyze the influence of religion on historical and contemporary conflicts, with a particular focus on ethnic conflict, terrorism, and peacemaking.

Final exam required.

POL SCI 226A International Political Economy 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Introductory courses (graduate or undergraduate) in international relations, foreign policy, international organizations and political economy.

The creation, maintenance, transformation, and decay of international arrangements designed to manage or regulate interstate activities relating to trade, money, resource use, technology, and physical environment.

Final exam not required.

POL SCI 230 Essential Methodological Tools 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Lecture and 1 to 2 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 1.5 to 3.5 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 to 5 hours of Discussion per week for 6 weeks.**Prerequisites:** Open only to graduate students. Consent of instructor and graduate adviser.

This course presents essential methodological concepts, ideas, and tools students need to know before beginning their study of the formal and quantitative methods tools used in political science research. Topics covered include functions, limits, continuity, calculus, optimization, probability and statistics, and linear algebra. Entire courses are often devoted to each of these topics (e.g., Math 1A-1B, 53, 54; Stat 101, 134, 135), and this course clearly cannot provide an equally comprehensive treatment. Rather, the class selectively focuses on specific mathematical concepts that are most commonly used in applied formal and quantitative work in political science. The goal of the class is to ensure that students have a sufficiently firm understanding of these critical ideas and facility with them that subsequent methods course can build on the foundation. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

POL SCI 231A Quantitative Analysis in Political Research 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Seminar and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 132A-132B or Statistics 130A.

Introductory course in the analysis of political data.

Final exam not required.

POL SCI 232A Formal Models of Political Science 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Mathematical models of politics with applications to political learning, bargaining, and democratic theory. Topics from game theory, collective choice theory, and mathematical psychology.

Final exam required. Formerly known as 232. Instructor: Powell

POL SCI 232B Formal Models of Political Science 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** 232A or consent of instructor.

This course emphasizes the application of the formal analytic tools to current or significant research in political science.

Final exam not required. Instructor: Powell

POL SCI 232H Public Policy and Business 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 to 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate student.

The course will study public policy in its connection with business. Policy is seen as an endogenous outcome of a game where diverse political forces try to shape public decisions to their advantage. The focus is broad, covering both theory and evidence. The aim is to analyze how a wide range of political institutions and processes affect public policy and economic performance. The ultimate goal of the course is to acquaint students with the topics at hand, and to consolidate their control of formal theory and quantitative techniques by discussing their application to the subject.

Final exam not required.

POL SCI 234A Qualitative and Multi-Method Research 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course introduces diverse methodological tools, following the premise that all methods are strengthened if linked to qualitative analysis. Explores alternative approaches to concept formation, measurement, and causal inference, based on large- and small-N analysis and case studies. Analytic tensions that motivate the course derive from, among other sources, the pressure on case-study and small-N researchers to strive for analytic rigor and generality; and the skepticism of some statisticians about quantitative inference - both descriptive and casual - in social science.

Final exam not required.

POL SCI 235 Introduction to Research Methods 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Overview of methods of political research. Theories, concepts, variables, hypotheses. Research design, quantitative and qualitative methodology. Basic data collection techniques. Approaches to data analysis. Provides an overview of different statistical techniques, but does not teach statistics.

Final exam not required.

POL SCI 236A The Statistics of Causal Inference in the Social Sciences 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 to 4 hours of Lecture per week for 15 weeks.**Prerequisites:** One multivariate regression course.

Approaches to causal inference using the potential outcomes framework. Covers observational studies with and without ignorable treatment assignment, randomized experiments with and without noncompliance, instrumental variables, regression discontinuity, sensitivity analysis, and random inference. Applications are drawn from a variety of fields including political science, economics, sociology, public health, and medicine.

Final exam not required. Formerly known as Political Science 236.

Instructor: Sekhon

POL SCI 236B Quantitative Methodology in the Social Sciences Seminar 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part two of a year long series course. Upon completion, the final grade will be applied to both parts of the series.**Hours and format:** 3 hours of lecture and 2 hours of discussion per week.**Prerequisites:** Political Science 236A or STAT 215A or equivalent.

A seminar on successful research designs and a forum for students to discuss the research methods needed in their own work, supplemented by lectures on relevant statistical and computational topics such as matching methods, instrumental variables, regression discontinuity, and Bayesian, maximum likelihood and robust estimation. Applications are drawn from political science, economics, sociology, and public health. Experience with R is assumed.

Final exam not required.

POL SCI C236A/STAT C239A The Statistics of Causal Inference in the Social Science 4 Units**Department:** Political Science; Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks.

Approaches to causal inference using the potential outcomes framework. Covers observational studies with and without ignorable treatment assignment, randomized experiments with and without noncompliance, instrumental variables, regression discontinuity, sensitivity analysis and randomization inference. Applications are drawn from a variety of fields including political science, economics, sociology, public health and medicine.

Final exam not required.

POL SCI C237A/ECON C215A Political Economics 3 Units**Department:** Political Science; Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

Tools of political economics: preferences and institutions, electoral competition, agency, partisan politics. Redistributive politics: general interest politics, special interest politics. Comparative politics: electoral rules, separation of powers, political regimes. Dynamic politics: fiscal policy, growth.

Final exam not required.

POL SCI C237B/ECON C215B Political Economics 3 Units**Department:** Political Science; Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** ECON C215A is a prerequisite to ECON C215B, and POL SCI C237A is a prerequisite to POL SCI C237B.

Tools of political economics: preferences and institutions, electoral competition, agency, partisan politics. Redistributive politics: general interest politics, special interest politics. Comparative politics: electoral rules, separation of powers, political regimes. Dynamic politics: fiscal policy, growth.

Final exam not required.

POL SCI 239 Selected Topics in Methodology 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

See departmental announcements. Topic will vary with instructor.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI 239T An Introduction to Computational Tools and Techniques for Social Science Research 2 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate student standing.

This course will provide students with necessary technology skills for the Political Science methods curriculum. It will introduce students to both the software programs and the basic computational and programming skills that students will need to be successful in further methods work. This course is not an introduction to statistics. Some familiarity with basic statistics or linear regression may be helpful, but is neither expected nor required.

Final exam not required.

POL SCI 243B Political Authority and Economic Exchange in East Asia 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This course will compare how authority and exchange relations are combined to regulate political and economic activities in China, Taiwan, South Korea, North Korea, and Japan. The course will examine theoretical literature on state-society relations, market, world system, late development, as well as empirical case studies dealing with each nation covered.

Final exam required.

POL SCI 243C Japanese Politics 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Japanese domestic politics--issues in historical development; political bureaucratic and legal structures; studies in economic policymaking.

Final exam not required.

POL SCI 244A Analysis of Contemporary China 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This is the first in a two-semester sequence designed to provide the incoming graduate student with a basic grounding in the politics of contemporary China. The focus will be on wide reading and comprehension of the available analytical literature; its sequel will be devoted to integrating that reading with primary source research materials. There are no prerequisites, though undergraduate course work in Chinese politics and/or some acquaintance with the Chinese language would be useful.

Final exam not required.

POL SCI 244C Approaches to Chinese Politics 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of seminar per week with an additional hour to be arranged with instructor.

This course has three main objectives: to expose students to debates in the study of post-1949 Chinese politics; to consider how research on contemporary China both draws from and informs political science; and to explore characterizations of the Chinese state and state-society relations. Emphasis on questions such as: What can we learn by examining Chinese culture and institutions? Do concepts such as fragmented authoritarianism, neotraditionalism, state "reach," civil society, and corporatism produce insights into the structure and dynamics of Chinese politics?.

Final exam not required.

POL SCI 244D Collective Action in China 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of seminar per week with an additional hour to be arranged with instructor.

This course will explore contentious politics in the People's Republic of China. Special attention to the current era and dissent by peasants, migrants, workers, religious groups, women, students, artists, and dissidents. How do concepts drawn from social movement theory help us understand popular activism? What are the consequences of protest for regime stability and the development of a more complete citizenship?.

Final exam not required.

POL SCI 245A South Asian Politics 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Major themes of politics and international relations in India, Pakistan, Burma and the mountain kingdoms.

Final exam not required.

POL SCI 245B International Relations in East Asia 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 to 3 hours of Seminar per week for 15 weeks.

This seminar will focus on postwar relations among the countries in East Asia. Asia was long divided by colonialism, the Cold War, and America's "hub and spoke" alliance system. Nationalist sentiments and suspicions remain strong; one scholar characterized the region as "the cockpit of great power rivalries." Northeast Asia has seen no shooting wars between states since the Korean armistice in 1953; Southeast Asia has been at peace since the pullback of Vietnam from Cambodia in 1979.

Final exam not required.

POL SCI 246B Ethnic Politics 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Seminar per week for 15 weeks.

This graduate seminar is designed to introduce students to the comparative study of ethnic politics. It provides an overview of theoretical questions and methodological innovations across five topics: the conceptualization and measurement of ethnicity; the sources of ethnic mobilization and cleavage choice; the consequences of ethnic mobilization for democratization and democracy; the impact of ethnicity on redistributive politics; and the relationship between ethnicity and patterns of violence ranging from urban riots to civil wars. Readings for each topic are drawn from various political science subfields as well as from other disciplines. They also reflect a range of regional contexts, including Eastern Europe, South Asia, and Sub-Saharan Africa. The purpose of the course is to provide graduate students with a basis for undertaking their own original research on questions relating to ethnic politics. It should enable them to critically engage recent scholarship, understanding which theories have yet to be adequately tested and which theoretically interesting questions have yet to be asked.

Final exam not required.

POL SCI 247A Western European Politics 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Major themes of politics and international relations of Western Europe.

Final exam not required.

POL SCI 247G The Comparative Politics of the Welfare State 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Lecture per week for 15 weeks.

This course analyzes the politics of social protection in Western Europe and the United States. After describing different national welfare regimes, we turn to contemporary challenges, notably globalization, persistent poverty, and changes in family forms and gender roles. We also look at the politics of welfare retrenchment and adjustment, paying particular attention to the prospects for progressive social policy. Must reform inevitably scale back protections for the weak and vulnerable, or can equity be safeguarded while promoting efficiency?.

Final exam not required. Instructor: Levy

POL SCI 248A Latin American Politics 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Explores different analytical approaches to Latin American politics, focusing both on major concepts (clientelism, corporatism, the state, legitimacy, nationalism) and different explanatory approaches (focusing on factors such as dependency and imperialism, internal social order and economic change, political structure and institutions and political culture). Either part of the 248A-248B sequence may be taken separately for credit. Final exam not required.

Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Fundamental principles of constitutional law, leading cases, judicial decisions affecting the liabilities, rights, duties and procedures of governmental officers and agencies, causes and consequences of legal decision, judicial behavior.

Final exam not required.

POL SCI 259 Selected Topics in Public law 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

See departmental announcements. Topic will vary with instructor.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI 261 Political Behavior 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

A comprehensive review of the major topics in political behavior through intensive examination of the theories, findings, and proceedings of the most significant studies in the field.

Final exam not required.

POL SCI 262 Voting Behavior and Public Opinion 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Examination of the basic literature on American voting behavior, public opinion and student research on individually selected topics in this field. Final exam not required.

POL SCI 263 Mass Politics in Advanced Industrial Democracies 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Theories and evidence concerning political conflict in advanced industrial societies. The empirical focus is on mass politics: the beliefs, attitudes, and behaviors of ordinary citizens rather than of activists or elites. The principal theoretical focus is on how changes in social structure, culture, and political institutions influence patterns of political cleavages. The analysis is largely comparative, with attention to the issue of American exceptionalism versus cultural and policy convergence.

Final exam not required.

POL SCI 269 Selected Topics in Political Behavior 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

See departmental announcements. Topic will vary with instructor.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI 271 American Government and Political Field Seminar 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This seminar is designed to acquaint students with current research approaches in various subfields of American Politics. Particular attention will be given to debates over theory, methodology, and substance.

The seminar is not designed to provide a complete survey of the field.

Students planning to be examined in American Politics are expected to master recommended readings on their own and should review additional readings included in versions of this seminar offered in the past years.

Final exam not required.

POL SCI 273 Urban Politics 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Politics and policy-making in American cities. Historical, economic and social context of cities. Major urban political institutions, other levels of government in urban affairs.

Final exam not required.

POL SCI 274 American Political Development 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This course will consider several broad themes in American political development. The objective is to extract the central conditions, processes, and controversies that scholars have found running through American political development and try to come to terms with possible relations among them.

Final exam required.

POL SCI 279 Selected Topics in American Government 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

See departmental announcements. Topic will vary with instructor.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI 280A Public Organization Theory 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

A survey of the literature of organization and management theory, emphasizing the major writers and distinctive contributions of various disciplines.

Final exam not required.

POL SCI 284 Strategies of Contemporary Governance 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 to 3 hours of Seminar per week for 15 weeks.

This course explores the implications of new strategies for coping with social problems and managing public programs. In response to growing criticism of government bureaucracy, public skepticism of expert authority, and an explosion of advocacy groups, a variety of new governance strategies have been developed. These new strategies are characterized by five broad themes: the use of markets or market mechanisms to increase efficiency; an emphasis on holding public agencies accountable and making them more transparent; the development of coordinating networks to link public agencies with each other and with stakeholders; the extensive involvement of non-state organizations in all aspects of governing; and renewed attention to the civic role of individuals and communities. The course investigates the extent to which these new strategies succeed in making the governance process more efficient, accountable, effective, representative, and civic.

Final exam not required. Instructor: Ansell

POL SCI 289 Research Topics in Public Organization 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

See departmental announcements.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI 290 Dissertation Research 4 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Seminar to aid students in initiating, carrying out, and completing dissertation research. Problems of planning dissertation research, the preparation of research designs and proposals for outside funding, field work, and writing and presenting the results of completed research. Presentations by graduate students working on their dissertations. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI 291 Research Workshop in American Politics 1 or 2 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 to 3 hours of Directed group study per week for 15 weeks.**Prerequisites:** Graduate student standing (second year or above).

A forum for the presentation and discussion of research in progress by graduate students. To receive two units of credit, a student must make at least one presentation of work in progress and serve as a discussant for another student's presentation. To receive one unit of credit a student must regularly attend class and participate in discussion, but will not be required to make a presentation. Appropriate works in progress include (but are not limited to) a paper in preparation for submission to a journal, a dissertation prospectus (including early drafts), a dissertation chapter, or a job market paper. Anyone working on American politics, political behavior, public law, or public administration is welcome.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Schickler

POL SCI 291AS Research Workshop in Area Studies 2 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 to 3 hours of Seminar-Research/Development.**Prerequisites:** Graduate student (second year or above).

A forum for the presentation and discussion of research in progress by graduate students (second year and above). To receive credit for the course, the student will make at least one presentation of work in progress per semester and to serve as a discussant for another student's work. Appropriate works-in progress include (but not limited to) a paper in preparation for submission to a journal a dissertation prospectus (including early drafts), dissertation chapter, or a job market paper. Anyone working on Area Studies is welcome.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI 291F Research Workshop in Formal Modeling 1 - 3 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 to 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate student standing.

A forum for the presentation and discussion of research in formal modeling. Anyone working on formal modeling or empirical testing of formal models is welcome to attend. To receive credit for the course, a student must attend regularly, participate actively, and make at least two presentations per semester. Presentations can be of the student's own work-in-progress or of work by other scholars (including both influential/classic works or interesting current working papers).

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI 291IR Research Workshop in International Relations 2 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 to 3 hours of seminar-research/development.**Prerequisites:** Graduate student (second year or above).

A forum for the presentation and discussion of research in progress by graduate students (second year and above). To receive credit for the course, the students will make at least one presentation of work-in-progress per semester and to serve as a discussant for another student's work. Appropriate works-in-progress include (but not limited to) a paper in preparation for submission to a journal a dissertation prospectus (including early drafts), dissertation chapter, or a job market paper. Anyone working on International Relations is welcome.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI 291T Research Workshop in Theory 2 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 to 3 hours of Seminar-Research/Development.**Prerequisites:** Graduate student (second year or above).

A forum for the presentation and discussion of research in progress by graduate students (second year and above). To receive credit for the course, the student will make at least one presentation of work in progress per semester and to serve as a discussant for another student's work. Appropriate works-in-progress include (but are not limited to) a paper in preparation for submission to a journal, a dissertation prospectus (including early drafts), a dissertation chapter, or a job market paper. Anyone working on theory is welcome.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI 292 Directed Advanced Study 2 - 12 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** By arrangement with faculty.**Prerequisites:** Consent of instructor and graduate adviser.

Open to qualified graduate students wishing to pursue special study and research under direction of a member of the staff.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI 296 Directed Dissertation Research 4 - 12 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** By arrangement with faculty.

Open to qualified students advanced to candidacy for the Ph.D. degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI 299 Special Study in Political Science 1 - 12 Units**Department:** Political Science**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** By arrangement with faculty.

Special individual study for qualified graduate students.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI 375 Graduate Student Instructor Training Seminar 2 Units**Department:** Political Science**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks. 3.5 hours of Seminar per week for 8 weeks. 5 hours of Seminar per week for 6 weeks.

This course is intended for all new graduate student instructors (GSI) in the Department of Political Science, and is meant to be taken simultaneously with the first semester of teaching as a GSI. The course functions as a participatory workshop. Although the course is intended for first-time GSIs, it is not a course in "how to be a GSI," but rather, how to be an effective political science teacher, now and at later steps in professional careers. Workshop time will be divided among presentations by the instructor, discussion of required readings, and discussion of weekly assignments in relation to challenges encountered by GSIs in the course of their teaching.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Political Science 301.

POL SCI 398 Professional Preparation for Graduate Student Instructors. 4 Units**Department:** Political Science**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** By arrangement with faculty.

Special study under the direction of a staff member with emphasis on the teaching of undergraduate courses in political science.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI 404 Research Skills 1 - 4 Units**Department:** Political Science**Course level:** Other professional**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** By arrangement with faculty.

Individual research work under supervision of faculty members. Open to students engaged in supervised research projects in Political Science.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

POL SCI 602 Individual Study for Doctoral Students 4 - 12 Units**Department:** Political Science**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** By arrangement with faculty.

Individual study in consultation with the major field adviser, intended to provide opportunity for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D. May not be used for unit or residence requirements for the doctoral degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Portuguese (PORTUG)

PORTUG 11 Elementary Portuguese 5 Units**Department:** Portuguese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Beginner's course. Not open to students who have taken Portuguese 101 or equivalent, nor native speakers.

Final exam required.

PORTUG 12 Elementary Portuguese 5 Units**Department:** Portuguese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** 11, or equivalent.

Continuation of Portuguese 11. Not open to students who have taken Portuguese 101 or equivalent, nor to native speakers. Completion of this course qualifies students for Portuguese 8, 25, or 102.

Final exam required.

PORTUG 24 Freshman Seminar 1 Unit**Department:** Portuguese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of Seminar per week for 15 weeks.

The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Freshman Seminars are offered in all campus departments, and topics vary from department to department and semester to semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

PORTUG 101 Portuguese for Advanced Students 5 Units**Department:** Portuguese**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture and 4 hours of Recitation per week for 8 weeks.**Prerequisites:** Credit of 16-20 units or equivalent of another Romance language, or consent of instructor.

An intensive course for students with no previous study of the language. The emphasis is on reading, speaking, and understanding. After completion of this course, a student will be prepared to do further upper-division work.

Final exam required.

PORTUG 101A Portuguese for Advanced Students 3 Units**Department:** Portuguese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Credit of 16-20 units or equivalent of another Romance language, or consent of instructor.

An intensive course for students with no previous study of the language. This offering may be taken independently for reading knowledge.

In conjunction with 101B, it constitutes an intensive introduction to Portuguese, and prepares the student for further upper division course work.

Final exam required.

PORTUG 101B Portuguese for Advanced Students: Workshop 2 Units**Department:** Portuguese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Workshop per week for 15 weeks.**Prerequisites:** Credit of 16-20 units or equivalent of another Romance language, or consent of instructor. Must be taken concomitantly with 101A. No independent registration.

Emphasis on understanding, speaking and writing Portuguese. Taken in conjunction with Portuguese 101A, the course provides an intensive introduction to the language.

Final exam required.

PORTUG 102 Readings in Portuguese 3 Units**Department:** Portuguese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** 101A-101B, 12, or equivalent.

The continuation of Portuguese 101A-101B, this course focuses on a variety of texts with special emphasis on 20th-century Brazil. Discussion in Portuguese; reinforcement and development of language skills.

Final exam required.

PORTUG 103 Advanced Grammar and Composition 3 Units**Department:** Portuguese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** 1 to 4 and 102 or consent of instructor.

Advanced work in Portuguese grammatical structures. Practice in writing. Final exam required.

PORTUG 104 Introduction to Brazilian Literature 3 Units**Department:** Portuguese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 4 or equivalent.

A survey of Brazilian literature from the beginnings through the 20th century, with attention to the relationships between literature and society. Final exam required.

PORTUG 107B Survey of Portuguese Literature 3 Units**Department:** Portuguese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** 4 or equivalent.

A survey of Portuguese literature from the beginnings through the 17th century.

Final exam required.

PORTUG 112 Portuguese Civilization 3 Units**Department:** Portuguese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 12 or equivalent.

This course offers a historical-cultural perspective on Portugal since its formation to the present. It looks at key themes in the development of a specifically Portuguese identity, and examines the concept of "Portuguese-ness" in terms of the foundation of not only European, but also African, Asian, and American Portuguese-speaking societies. Course materials include works of poetry, fiction, and non-fiction.

Final exam required.

PORTUG 113 Brazilian Civilization 3 Units**Department:** Portuguese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.

The course presents an overview of major themes in Brazilian cultural expression with emphasis on the 19th and 20th centuries.

Final exam required.

PORTUG 128 Twentieth-Century Brazilian Literature 3 Units**Department:** Portuguese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 104 is recommended, but not required.

An examination of the most important 20th-century writers from the 1920s through the present. Emphasis on the shifting definition of "brasileiridade" and on new directions in contemporary poetry and fiction.

Final exam required.

PORTUG 135 Studies in Luso-Brazilian Literature 3 Units**Department:** Portuguese**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week. 8 hours of lecture per week for 6 weeks.**Prerequisites:** Twenty units or equivalent of Portuguese or another Romance language.

Study of literature and cultural texts representative of classical literary genres: narrative prose, plays and poetry.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

PORTUG N135 African Roots of Brazil: Afro-Brazilian Culture and Identity 6 Units**Department:** Portuguese**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 20 hours of Lecture and 2 hours of Discussion per week for 6 weeks.**Prerequisites:** 101A-101B or equivalent.

Offers a critical view of African contribution and presence in Brazil, with a homestay in Salvador, Bahia, Brazil. Focuses on race relations in Bahia and the formation of Afro-Brazilian identity and its cultural expression.

Provides tools for critical assessment of social and cultural relations.

Investigates concepts of cultural adaptation, and emergence of Afro-Brazilian culture. Topics include enslavement, group identity formation; spiritual and religious traditions; early resistance movements; women's roles; contemporary political movements.

Final exam required.

PORTUG 139 Introduction to Contemporary Portugal 4 Units**Department:** Portuguese**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 3 to 6 hours of lecture/discussion/site visits 5 days a week for 4 weeks.**Prerequisites:** A working knowledge of the Portuguese language.

A combination of classroom lectures and discussion with visits to appropriate field sites, this course offers an introduction to mainland Portugal and the Azores. Students will spend two weeks in Lisbon and two weeks in the Azores Islands. They will study the relationship of contemporary Portugal both to the European Union and the the U.S. in terms of massive Azorean immigration to California and New England (there are presently approximately a million persons of Azorean descent in the U.S.). Students will examine the Azores both as part of a rapidly modernizing nation and as a point of departure--and increasingly, return--for immigrants. Lectures will provide an overview of contemporary Portuguese history, culture, and socio-economic development by professors in the ISCTE of Lisbon and the Universidade dos Acores in Sao Miguel.

Final exam required. Instructor: Slater

PORTUG C170/IAS C170 Portugal: Language and Culture 6 Units**Department:** Portuguese; International and Area Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** In10sive 6 week summer travel course. Language acquisition courses in the morning; history, culture, and language courses in the afternoon.

This summer course provides the opportunity to begin and/or continue the study of Portuguese language and enhances awareness of Portuguese culture through direct contact with Portuguese educational and cultural institutions. Additionally, it examines historical, cultural, economic and political links between Portugal, Europe, Africa, Asia, and the Americas, particularly South America.

Course may be repeated for a maximum of 24 units with consent of instructor. Course may be repeated for a maximum of 24 units. Final exam required. Instructor: Adao

PORTUG H195 Portuguese Honors Course 3 Units**Department:** Portuguese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences.**Prerequisites:** Twenty units or equivalent of Portuguese or another Romance language.

Directed study centering on the preparation/completion of an honors thesis (see Honors Program, Option B, above).

Final exam not required.

PORTUG 199 Supervised Independent Study and Research 1 - 3 Units**Department:** Portuguese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Individual conferences.**Prerequisites:** Senior honor status and 20 units or equivalent of Portuguese or another Romance language.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

PORTUG 298 Special Study for Graduate Students 3 - 8 Units**Department:** Portuguese**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Zero hours of Independent study per week for 15 weeks. 5.5 to 10 hours of Independent study per week for 8 weeks.**Prerequisites:** Graduate standing.

Individual conferences on special programs of study or research in a restricted field not covered by available courses or seminars.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PORTUG 299 Special Advanced Study 3 - 8 Units**Department:** Portuguese**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Individual conferences.**Prerequisites:** Restricted to students writing doctoral dissertations.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Practice of Art (ART)

ART 8 Introduction to Visual Thinking 4 Units

Department: Practice of Art

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1 hour of Lecture and 6 hours of Studio per week for 15 weeks. 2.5 hours of Lecture and 15 hours of Studio per week for 6 weeks.

A first course in the language, processes, and media of visual art. Course work will be organized around weekly lectures and studio problems that will introduce students to the nature of art making and visual thinking.

Final exam required. Formerly known as 8A-8B.

ART 12 The Language of Drawing 4 Units

Department: Practice of Art

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 6 hours of Studio per week for 15 weeks. 7.5 hours of Lecture and 15 hours of Studio per week for 6 weeks.

Prerequisites: 8

A study of drawing as a tool for articulating what the eyes, hand, and mind discover and investigate when coordinated. Some sessions will be devoted to drawing the human figure. Lectures and demonstrations introduce students to techniques and varied applications.

Final exam not required.

ART N12 The Language of Drawing 3 Units

Department: Practice of Art

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 6 hours of instructional studio and 3 hours of open studio per week.

Prerequisites: 8A or 8B.

A study of drawing as a tool for articulating what the eyes, hand, and mind discover and investigate when coordinated. Some sessions will be devoted to drawing the human figure.

Final exam not required.

ART 13 Language of Painting 4 Units

Department: Practice of Art

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 6 hours of Studio per week for 15 weeks. 8 hours of Lecture and 15 hours of Studio per week for 6 weeks.

Prerequisites: 8

A concentrated investigation of what painting on a two-dimensional surface can elicit from what is both observed and felt. Illustrated talks will help familiarize you with issues that have concerned painters in the 20th century. Lectures and demonstrations introduce students to techniques and varied applications.

Final exam required.

ART N13 Language of Painting 3 Units

Department: Practice of Art

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 6 hours of instructional studio and 3 hours of open studio per week.

Prerequisites: 8A or 8B.

A concentrated investigation of what painting on a two-dimensional surface can elicit from what is both observed and felt. Illustrated talks will help familiarize you with issues that have concerned painters in the 20th century.

Final exam not required.

ART 14 The Language of Sculpture 4 Units

Department: Practice of Art

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 6 hours of Studio per week for 15 weeks. 7.5 hours of Lecture and 15 hours of Studio per week for 6 weeks.

Prerequisites: 8

This course is the study of the interaction between physical form and space. We will focus on building a strong conceptual foundation while developing the practical studio skills needed to translate your ideas into three dimensions. Shop practices will include hand, machine, and computer-aided fabrications. Field trips and illustrated talks will help acquaint students with the ideas sculptors have explored through history and in contemporary sculptural practices.

Final exam not required.

ART 16 Introduction to Printmaking 4 Units

Department: Practice of Art

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 6 hours of Lecture and 3 hours of Studio per week for 15 weeks.

This course examines and explores various print disciplines. Students study and create traditional forms of fine art printmaking including woodcut, lithography, intaglio, and screenprinting as well as newer approaches which include transfer and digital printmaking. This course is a prerequisite for upper division print courses. Lectures and demonstrations introduce students to techniques and varied applications.

Final exam required.

ART 21 Digital Photography: The Image and the Hive Mind 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 7 hours of Studio per week for 15 weeks. 5 hours of Lecture and 16.5 hours of Studio per week for 6 weeks.

This class provides a basic foundation for digital photography with hands-on instruction in the use of digital cameras and online image dissemination. Topics include image capture, composition, image syntax, image analysis, image manipulation, metatext production, and image sequencing for visual narratives. We also study image dissemination through online networks including social networks, blogs, news, storage, search, and print services. Rather than limiting the discussion of photography to the production of the photographic image itself, we explore in written assignments how the reception of images can change based on context, usage, and network dynamics. While we rely on required DSLR digital cameras to produce images for weekly photographic assignments, we also experiment with alternate digital image generation techniques from telescopes to microscopes. All coursework will be posted and discussed online as well as in weekly lectures, workshops, and critiques. Course readings cover the history of photography, the theory of photographic reproduction and the theory of networked and memetic dissemination.

Final exam not required. Instructor: Niemeyer

ART 23AC Foundations of American Cyber-Culture 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of lecture/studio per week. 16 hours of lecture/studio per week for 6 weeks. 11 hours of lecture/studio per week for 8 weeks. 9 hours of lecture/studio per week for 10 weeks.

This new course will enable students to think critically about, and engage in practical experiments in, the complex interactions between new media and perceptions and performances of embodiment, agency, citizenship, collective action, individual identity, time and spatiality. We will pay particular attention to the categories of personhood that make up the UC Berkeley American Cultures rubric (race and ethnicity), as well as to gender, nation, and disability. The argument threading through the course will be the ways in which new media both reinforce pre-existing social hierarchies, and yet offer possibilities for the transcendence of those very categories. The new media -- and we will leave the precise definition of the new media as something to be argued about over the course of the semester -- can be yet another means for dividing and disenfranchising, and can be the conduit of violence and transnational dominance.

Satisfies the American Cultures requirement

Final exam required.

ART N23 Digital Media Foundation 3 Units**Department:** Practice of Art**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 9 hours of Studio per week for 6 weeks.

Server-based art course introduces principles of digital media creation from program to poetry through a combination of lectures, creative projects, and studio seminars. Topics: basic units of digital media, video, audio, and interactivity authoring, digital cinema, scripting, interactive art, web cam and net art. Final project is a web-based ambient/dramatic performance. All course resources, projects, and reviews are web-based. Students must own networked computer.

Final exam not required.

ART W23AC American Cybercultures: Principles of Internet Citizenship 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1.5 hours of web lecture and 1.5 hours of online video conferencing group discussions per week for 15 weeks. 20-3 hours of web lecture and 3.5 hours of online video conferencing group discussions per week for 6 weeks. This is an online course.

This online course establishes internet citizenship as the process of forming online communities through participation. The course itself seeks to establish a community of learners, innovators, and explorers who engage with 23 principles of internet culture through missions. The missions include topics aggregation, networking, identity, amplification, and subversion. Students work in small groups with about five members and complete learning missions through research and creative assignments using photography, writing, video, and user interaction design.

Satisfies the American Cultures requirement presentations of creative projects Instructor: Niemeyer

ART 26 Moving Image Media Production 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 7 hours of Studio per week for 15 weeks. 5 hours of Lecture and 16.5 hours of Studio per week for 6 weeks.

This course provides students with the technological and conceptual groundwork for advanced courses in video art and filmmaking including the use of digital cameras, sound recording, basic lighting techniques, digital editing, compression, and online dissemination. We will focus on what makes compelling moving images that elicit powerful intellectual and emotional responses. The course also explores the range of techniques and languages of creative video making from traditional story genres to more contemporary experimental forms.

The course consists of weekly lectures, screenings, discussions and a lab section. The lab is a production workshop in which students will produce a series of short exercises and a final project.

Course Objectives: master the basic elements of video making and editing

Final exam not required. Instructors: Niemeyer, Walsh

ART 98 Directed Group Study 1 - 3 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 hours of studio work per unit per week.**Prerequisites:** Open to freshmen and sophomores. Open to freshmen and sophomores.

This is a student-initiated course to be offered for academic credit. The subject matter will vary from semester to semester and will be taught by the student facilitator under the supervision of the faculty sponsor. Topics to be related to art practice.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 99 Supervised Independent Study 1 - 2 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 2 hour of Independent study per week for 15 weeks.

This course will be a rubric for all one and two credit Independent Study courses in Art Practice that concentrate on the practical aspects of art production. Some students will study gallery work by participating in every phase of producing art exhibitions--from selecting works to hanging and insuring them. Other students will learn concepts, skills and information they can use in their major courses. All students gaining credit from these courses will have to produce at least three short term papers analyzing their experiences and reflecting on the principles involved in their work. Final exam not required.

ART 102 Approaches to Painting 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 6 hours of Studio per week for 15 weeks. 4.5 hours of Lecture and 15 hours of Studio per week for 6 weeks.**Prerequisites:** 8, 12, and 13 or equivalents.

Inquiry into concepts of order, process, and content as related to human experience. While faculty contact with students is highly individualized, the course involves group critiques and lectures as well as assigned field trips. Lectures and demonstrations introduce students to techniques and varied applications.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART N102 Approaches to Painting 3 Units**Department:** Practice of Art**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of instructional studio and 3 hours open studio per week.**Prerequisites:** 10, 12, and 14 or equivalents.

Inquiry into concepts of order, process, and content as related to human experience. While faculty contact with students is highly individualized, the course involves group critiques and lectures as well as assigned field trips.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 117 Drawing and Composition 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 6 hours of Studio per week for 15 weeks. 7.5 hours of Lecture and 15 hours of Studio per week for 6 weeks.**Prerequisites:** 8 and 12; and one from 13, 14, 16, 23 or equivalents.

Advanced drawing and composition, color and black-and-white, primarily on paper. 117 or 118 is required of all art majors. Lectures and demonstrations introduce students to techniques and varied applications. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART N117 Drawing and Composition 3 Units**Department:** Practice of Art**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of instructional studio and 3 hours of open studio per week.**Prerequisites:** 12, 13, 14, and 15 or equivalents.

Advanced drawing and composition, color and black-and-white, primarily on paper. Art 117 or 118 is required of all art majors.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 118 Figure Drawing 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 6 hours of Studio per week for 15 weeks.

Prerequisites: 8 and 12; and one from 13, 14, 16 and 23 or equivalents. Emphasis on the human figure seen in the context of pictorial space, dark and light and color. Various media. 118 or 117 is required of all art majors. Lectures and demonstrations introduce students to techniques and varied applications.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 119 Global Perspectives in Contemporary Art 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 5.5 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 7.5 hours of Lecture and 2 hours of Discussion per week for 6 weeks.**Prerequisites:** for declared Art Practice majors.

This course is designed to explore a range of contemporary art movements around the globe, through a closer look at their central ideas, artists, and artworks, as well as the preconditions and broader social context in which the work is being produced. Topics covered will range from the emergence of localized avant-garde movements in Europe, Asia, Africa, and Latin America to the implicit globalism of the international biennial circuit.

Final exam required.

ART 120 Approaches to Printmaking: Intaglio 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 6 hours of Studio per week for 15 weeks.**Prerequisites:** 8, 12, and 16, or equivalents.

An opportunity to discover what an artist can do with an etching press and a familiarity with such processes as etching, drypoint, aquatint, color, and monotype printing. The difference in the ways that these mediums enhance and condition your ideas will be made clear through individual and group critiques. Lectures and demonstrations introduce students to techniques and varied applications.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 122 Approaches to Printmaking: Lithography 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 6 hours of Studio per week for 15 weeks.**Prerequisites:** 8, 12, and 16, or equivalents.

In the course of making lithographs, you will be encouraged to find an aesthetic direction of your own. Your instructor will also help you develop skill in using both stone and metal plates. Lectures and demonstrations introduce students to techniques and varied applications.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 123 The Language of Printmaking-Screenprinting 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture and 3 hours of Studio per week for 15 weeks.**Prerequisites:** Open to upper division art majors or by consent of instructor.

The process of screenprinting images onto paper and other surfaces will be explored in a variety of image producing techniques. Hand drawn, photographic, and digitally manipulated images are combined to produce multiple works of limited edition fine art prints. Image content and development is examined through drawings, studies, slide lectures, group critiques, and direct assistance. Each student is required to attend all class periods and participate in group discussions and critique. It is the responsibility of the student to maintain a portfolio of all works executed during the semester and to turn in all assignments on time. The grade is determined by attendance, completion of projects and participation in critiques. Personal improvement will also be taken into account.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Hussong

ART 124 Advanced Projects in Printmaking 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 6 hours of Studio per week for 15 weeks.**Prerequisites:** 8, 12, and 16, or equivalents.

Non-traditional projects in printmaking. Lectures and demonstrations introduce students to techniques and varied applications.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 130 Approaches to Sculpture: Concept and Construction 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 6 hours of Studio per week for 15 weeks.**Prerequisites:** 8, 12, and 14, or equivalents.

Course is geared toward constructing objects, forms, and particular structures to reveal concept. This class will have more advanced instruction in fabrications, emphasizing the use of wood and metal shops. Architectural considerations, physical experience of space, and innovative sculptural practices will be explored. Lectures and demonstrations introduce students to techniques and varied applications.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 132 Approaches to Sculpture: Ceramics 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of instructional studio and 3 hours of open studio per week.**Prerequisites:** 8, 12, and 14, or equivalents.

An opportunity to learn the many ways of shaping and giving form to wet clay, then making it permanent by firing it. Illustrated talks will examine the ideas that have engaged ceramic sculptors in many traditions and the processes that they have used to expand them. Lectures and demonstrations introduce students to techniques and varied applications. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 133 Approaches to Sculpture: Meaning in Material 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 6 hours of Studio per week for 15 weeks. 7.5 hours of Lecture and 15 hours of Studio per week for 6 weeks.**Prerequisites:** 8, 12, and 14, or equivalents.

This class will investigate the possibilities and potentials of sculptural material, both physically and conceptually. We will focus on a deeper exploration of the current state of art practice while questioning what methods and materials are considered non-traditional. We will discuss multiple applications as a means of mediating ideas in space, including sculpture, installation, video, photography and public exchanges. This class will have more advanced instruction in fabrications, including the wood and metal shops. Lectures and demonstrations introduce students to techniques and varied applications.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 137 Advanced Projects in Ceramic Sculpture 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 6 hours of Studio per week for 15 weeks.**Prerequisites:** 8, 12, and 14, or equivalents.

Students who are experienced in clay may enroll in this course to continue developing their ideas and their technical command of ceramic materials and processes. Lectures and demonstrations introduce students to techniques and varied applications.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 138 Approaches to Sculpture: Installations 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 6 hours of Studio per week for 15 weeks.**Prerequisites:** 8, 12, 14, or equivalents.

In this class we will consider sculptural issues of (and beyond) the object itself, notions of "site specific," and of whether an object is distinct from its environment or is part of it. We will also question issues of space, placement, installation, context, and public interaction. Students will engage with a variety of sites, both on and off campus, with drawings and written proposals being an integral part of all projects. Lectures and demonstrations will introduce students to techniques and varied applications.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 141 Temporal Structures: Video and Performance Art 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 6 hours of Studio per week for 15 weeks. 7.5 hours of Lecture and 15 hours of Studio per week for 8 weeks. 7.5 hours of Lecture and 15 hours of Studio per week for 6 weeks.

Prerequisites: 8, and 12; and one from 13, 14, 16, 23, or equivalents. Projects are aimed at understanding and inventing ways in which time and change can become key elements in an artwork. Regular screenings of professional tapes will illustrate uses of the mediums and provide a historical context. Lectures and demonstrations introduce students to techniques and varied applications.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 142 New Genres 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 6 hours of Studio per week for 15 weeks.**Prerequisites:** 8 and 12; and one from 13, 14, 16, 23, or equivalents.

A survey intended to expose you to the nature and potential of such non-traditional tools for artmaking as performance, video, and audiotape.

Lectures and demonstrations introduce students to techniques and varied applications.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

ART 160 Special Topics in Visual Studies 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks. 20-2.5 hours of Lecture per week for 6 weeks.**Prerequisites:** Consent of instructor.

Topics of concern to the instructor, usually related to current research, which may fall outside of the normal curriculum or be of more restricted content than regular studio courses. An opportunity to investigate topics and mediums on an ad hoc basis when there is a compelling reason to do so, providing there is no other course that deals with these concerns. Primarily intended for advanced undergraduates and graduates in Art Practice but open to others. For special topics and enrollment see listings outside of 345 Kroeber.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

ART N160 Foundations of Digital Photography 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 16 hours of lecture/studio per week for 6 weeks.

While digital photography has simplified the process of taking and sharing pictures, the challenges of image composition, visual storytelling, and image sequencing remain at the center serious photography. In this course, students who have a working knowledge of photography and who have access to a digital camera learn to compose and sequence images beyond the stereotypes of popular photography. The course covers essential topics such as lighting, timing, composition, image sequencing, history of photography, potential and limitations of mechanical reproduction, photography and fine art, alternative tradition and digital image processes. All student work will be shared and reviewed online; classes are 33% lecture, 33% studio work, and 33% group critique. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 162 Issues in Cultural Display: Studio and Post-Studio Art Practices 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture and 2 hours of Discussion per week for 15 weeks. 10 hours of Lecture and 5 hours of Discussion per week for 6 weeks.**Prerequisites:** 8

This is a seminar class designed to engage in "close readings" of contemporary art-making and curatorial practices. Through weekly studio visits with artists and/or curators, the course examines the practical methods, historical origins, philosophical roots, and political and aesthetic implications of each maker's practice. Readings and discussions will focus on (though not be limited to) issues concerning the interaction of aesthetics and ethics; culture and capital; copyright law; art and craft; singular vs. collective authorship.

Final exam not required. Instructor: Walsh

ART 163 Social Practice: The Artist in Body & Site 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Social Practice broadly refers to work produced through various forms of direct engagement with a site, social system or collaborator. Interdisciplinary in nature, such work often takes the form of guerilla interventions, performance, institutional critique, community based public art and political activity, all sharing the premise that art created in the public sphere can help alter public perception and work toward social transformation.

art review

ART 164 Art and Meditation 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks. 10 hours of Lecture per week for 6 weeks.**Prerequisites:** Completion of all lower division requirements for the major.

Meditation is arguably the most ancient, powerful, and yet simple spiritual practice in the world. It is known in various forms in nearly all times and cultures, and plays a part in every religious tradition. We will examine how meditation can affect your art both in terms of practice and content. The class will be structured with slide presentations, museum visits, discussion of reading, and reviews of art work. Art from various contemplative traditions will be examined.

Final exam required. Instructor: Sherwood

ART 165 Art, Medicine, and Disabilities 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 6 hours of studio and/or supervised research and/or internship per week. 7.5 hours of lecture and 15 hours of studio and/or supervised research and/or internship per week for 6 weeks.

This course will examine how visual artists have responded to illness and disability. We will consider visual representations of disability and healing, as well as the expressive work of visual artists working from within the personal experience of disability; in other words, we will look at disability as both a subject and a source of artistic creation. Several topics, historical and contemporary, will be explored. Students will complete either a semester-long internship with an arts and disability organization, a research paper, or a creative project.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Instructor: Sherwood

ART 171 Digital Video: The Architecture of Time 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 6 hours of Studio per week for 15 weeks. 7.5 hours of Lecture and 15 hours of Studio per week for 6 weeks.**Prerequisites:** 8, 12, and 23; or equivalents.

This hands-on studio course is designed to present students with a foundation-level introduction to the skills, theories and concepts used in digital video production. Non-linear and non-destructive editing methods used in digital video are defining new "architectures of time" for cinematic creation and experience, and offer new and innovative possibilities for authoring new forms of the moving image. This course will expose students to a broad range of industry standard equipment, film and video history, theory, terminology, field and post-production skills. Students will be required to technically master the digital media tools introduced in the course. Each week will include relevant readings, class discussions, guest speakers, demonstration of examples, and studio time for training and working on student assignments.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

ART C171/FILM C185 Digital Video: The Architecture of Time 4 Units**Department:** Art Practice; Film and Media; Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 9 hours of Studio per week for 15 weeks.

This hands-on studio course is designed to present students with a foundation-level introduction to the skills, theories, and concepts used in digital video production. As digital technologies continue to expand our notion of time and space, value and meaning, artists are using these tools to envision the impossible. Nonlinear and nondestructive editing methods used in digital video are defining new "architectures of time" for cinematic creation and experience, and offer new and innovative possibilities for authoring new forms of the moving image. Through direct experimentation, this course will expose students to a broad range of industry-standard equipment, film and video history, theory, terminology, field, and post-production skills. Students will be required to technically master the digital media tools introduced in the course, and personalize the new possibilities digital video brings to time-based art forms.

Final exam required.

ART N171 Digital Video: The Architecture of Time 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 9 hours of Studio per week for 15 weeks. 9 hours of Studio per week for 6 weeks.**Prerequisites:** 23

This hands-on studio course is designed to present students with a foundation-level introduction to the skills, theories, and concepts used in digital video production. Non linear and non destructive editing methods used in digital video are defining new "architectures of time" for cinematic creation and experience and offer new and innovative possibilities for authoring new forms of the moving image. This course will expose students to a broad range of industry-standard equipment, film and video history, theory, terminology, field, and post production skills. Students will be required to gain technical mastery of the digital media tools introduced in the course.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 172 CGI Animation Studies 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 6 hours of Studio per week for 15 weeks. 5.5 hours of Lecture and 11 hours of Studio per week for 8 weeks. 7.5 hours of Lecture and 15 hours of Studio per week for 6 weeks.**Prerequisites:** 8, 12, and 23; or equivalents.

Motion is a ubiquitous element of human experience, yet attempts to explain it remain incomplete. The representation of motion with technical means is in continuous development, starting perhaps with sculptural representations of celestial movements in antiquity and leading to dynamic computer graphics simulations of molecular processes today. In this production-intensive studio course, we will study computer graphics for motion simulations, or animations. We will also probe these tools for their use in creative expression and analyze their impact on our own perception of motion. Software used: Maya. Each week will include relevant readings, class discussions, guest speakers, demonstration of examples, and studio time for training and working on student assignments .

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

ART 173 Sound Art 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture and 3 hours of Studio per week for 15 weeks.

This is a studio class designed to introduce artists to the medium of sound. Students will learn the basic skills necessary to work with audio, including microphones, digital recording, editing and processing, speaker and installation design, and circuit-bending. In addition, students will learn about the history of sound art and the ways in which visual art and experimental sound practice inform and expand upon each other.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 174 Advanced Digital Video 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 6 hours of Studio per week for 15 weeks.**Prerequisites:** 8, 12, and 23; or equivalents.

This advanced studio course is designed for students who have mastered basic skills and concepts involved in digital video production, and are interested in further investigating critical, theoretical, and creative research topics in digital video production. Each week will include relevant readings, class discussions, guest speakers, demonstration of examples, and studio time for training and working on student assignments. Final exam required.

ART C174/FILM C187 Advanced Digital Video 4 Units**Department:** Art Practice; Film and Media; Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 9 hours of Studio per week for 15 weeks.

This advanced studio course is designed for students who have mastered basic skills and concepts involved in digital video production and are interested in further investigating critical, theoretical, and creative research topics in digital video production. Final exam required.

ART 178 Game Design Methods 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 4 hours of Studio per week for 15 weeks. 4 hours of Lecture and 7.5 hours of Studio per week for 8 weeks. 5 hours of Lecture and 10 hours of Studio per week for 6 weeks.**Prerequisites:** 23AC.

This course offers an introduction to game design and game studies. Game studies has five core elements: the study of games as transmitters of culture, the study of play and interactivity, the study of games as symbolic systems; the study of games as artifacts; and methods for creating games. We will study these core elements through play, play tests, play analysis, and comparative studies. Our reading list includes classic game studies theory and texts which support game design methods. After weekly writing and design exercises, our coursework will culminate in the design and evaluation of an original code-based game with a tangible interface.

Final exam required. Instructor: Niemeyer

ART C178/FILM C181 Game Design Methods 4 Units**Department:** Art Practice; Film and Media; Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 2 to 4 hours of Laboratory per week for 15 weeks. 6 hours of Lecture and 3 hours of Laboratory per week for 8 weeks. 8 hours of Lecture and 3 hours of Laboratory per week for 6 weeks.**Prerequisites:** 25A.

This course offers an introduction to game design and game studies. Game studies has five core elements: the study of games as culture generators, the study of play and interactivity, the study of games as symbolic systems, the study of games as artifacts, and the design of games. One process which is crucial to all these elements is to play. We will study the core elements of game studies through play, play tests, and the study of people playing. There will also be a close examination of classical game studies as well as practice-oriented texts. The final exam for this course is to design, test, and evaluate a playable game. Final exam required.

ART C179/ANTHRO C146 Mobile City Chronicles: Gaming with New Technologies of Detection and Security 5 Units**Department:** Art Practice; Anthropology; Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Studio per week for 15 weeks.

This course studies the city through cases of 19th and 21st century urban detection, including detective fiction, epidemiology, urban planning, surveillance, ethnography, and related technologies. Students develop and playtest cellphone games that in turn require players to investigate cities. This "gaming the city" uses smart phones not only to read existing databases but also to write to them, producing new urban practice and knowledge. The course is organized as a research and game lab. Final exam not required.

ART 180 Advanced Digital Photography 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 8 hours of studio and 1 hour of lecture per week. 20 hours of studio and 2.5 hours of lecture per week for 6 weeks.**Prerequisites:** ART 26 - Beginning Digital Photography
or equivalent

This course will cover a range of digital media and practices, with a view towards exploring current and future possibilities for photography. Inclusive of multiple approaches to scale, execution, and technique, the course enables students to examine and push the limits of photographic practices. This course will help students advance their digital shooting and Photoshop skills from a beginning to a more advanced level, and will cover the workflow of digital photography: camera usage, scanning, image editing, management, and printing.

Course may be repeated for credit when topic changes. critiques/ presentations/exhibitions

ART 185 Senior Projects/Professional Practices 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 3 hours of studio critique per week.**Prerequisites:** Senior level students only.

This course provides students with a foundation for understanding their work within a cross-disciplinary critical context. Through class and individual critique, readings, guest artists, and field trips, students will explore the practical and conceptual components of their own media and practice within a broader discussion of artistic production. In addition to this focused attention on the critique process, the class will address the ongoing needs of supporting one's work within a community of artists, arts professionals, and arts organizations. Each student will work towards developing the most effective tools for communicating their work to these broader audiences using strategies that are appropriate/effective for their ideas, media, and audience.

Final exam not required.

ART H195A Special Study for Honors Candidates in the Practice of Art 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Hours to be arranged.**Prerequisites:** Eligibility for admission to the Honors Program.

Honors students are required to take three units of H195A. They may elect to take an additional three units (H195B) the following semester. Course may be applied toward major requirements. Final exam not required.

ART H195B Special Study for Honors Candidates in the Practice of Art 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Hours to be arranged.**Prerequisites:** Eligibility for admission to the Honors Program.

Honors students are required to take three units of H195A. They may elect to take an additional three units (H195B) the following semester. Course may be applied toward major requirements. Final exam not required.

ART 198 Directed Group Study 1 - 3 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 hours of group study per unit per week.**Prerequisites:** Upper division standing.

This is a student-initiated course to be offered for academic credit. The subject matter will vary from semester to semester and will be taught by the student facilitator under the supervision of the faculty sponsor. Topics to be related to art practice.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 199 Supervised Independent Study for Advanced Undergraduates 1 - 4 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Hours to be arranged.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Course does not satisfy major requirement for art. Final exam not required.

ART N199 Supervised Independent Study for Advanced Undergraduates 1 - 3 Units**Department:** Practice of Art**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Hours to be arranged.**Prerequisites:** Consent of instructor, major adviser, and department chair.

This course is for students wishing to pursue an interest not represented in the curriculum by developing an individual program of study supervised by a faculty member. Study may involve creative projects, research. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 218 Seminar: Theory and Criticism 4 Units**Department:** Practice of Art**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate standing and consent of instructor.

Weekly meetings will provide a forum for the discussion of issues related to assigned readings in the fields of esthetics, theory and art criticism. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 290 Independent Study 4 Units**Department:** Practice of Art**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Hours to be arranged.**Prerequisites:** Graduate standing and consent of instructor.

Individual projects by first-year graduate students with one assigned instructor.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 294 Seminar for M.F.A. Students 4 Units**Department:** Practice of Art**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Admission to the M.F.A. program.

Studio work emphasizing various aspects of form. Group criticism.

Intended especially for M.F.A. candidates.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 295 Independent Study for M.F.A. Students 4 - 12 Units**Department:** Practice of Art**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Hours to be arranged.**Prerequisites:** Admission to the M.F.A. program.

M.F.A. candidates, special study--M.F.A. Committee members as well as other faculty.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 298 Directed Group Study 4 Units**Department:** Practice of Art**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

Directed group study in special problems, group research, and/or interdisciplinary topics.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 299 Supervised Independent Study for Graduate Students 1 - 4 Units**Department:** Practice of Art**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Hours to be arranged.**Prerequisites:** Graduate standing and consent of instructor, graduate adviser, and Department Chair.

Special projects by graduate students undertaken with a specific member of the faculty.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

ART 301 The Teaching of Art: Practice 1 Unit**Department:** Practice of Art**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of lecture/discussion per week.**Prerequisites:** Consent of instructor.

Utilizing aspects of pedagogical and andragogical teaching, the interactive lecture, collaborative learning, simulations, and brainstorming-freewriting, this semester-long seminar will focus on these various integrative teaching approaches, to facilitate communication in the diverse and wide-ranging arena which is fine arts today. Discussion of course aims, instructional methods, grading standards, and special problems in the teaching of art practice.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Psychology (PSYCH)

PSYCH 1 General Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 4 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Introduction to the principal areas, problems, and concepts of psychology.

This course is required for the major; students not considering a psychology major are directed to 2.

Students will not receive credit for 1 after taking 2. Final exam required.

PSYCH N1 General Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7 hours of lecture per week for 6 weeks.

Introduction to the principal areas, problems, and concepts of psychology.

This course is required for the major; students not considering a psychology major are directed to 2.

Students will not receive credit for Psychology N1 after taking Psychology 1 or 2. Final exam required.

PSYCH W1 General Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 7.5 hours of lecture/discussion per week for 6 weeks. 3 hours of lecture/discussion per week. This is an online course. Introduction to the principal areas, problems, and concepts of psychology. Students will not receive credit for Psychology W1 after taking Psychology 1, Psychology N1, or Psychology 2. Final exam required. Formerly known as N1. Instructor: Kihlstrom

PSYCH 2 Principles of Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks. An overview of psychology for students who will not major in the field. This course satisfies the prerequisite for upper division decade courses. Students will not receive credit for 2 after taking 1. Final exam required.

PSYCH 3 Introduction to How the Brain Works 1 Unit**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1 hour of Lecture per week for 15 weeks. 3 hours of Lecture per week for 6 weeks.

Prerequisites: A year of college-level general biology for majors. This course will give a rigorous yet accessible overview of our current understanding of how the brain works and how it is altered by experience. Specifically, the class provides: an introduction to the structure and function of the sensory and motor systems; discussions of disorders and phenomena such as blindsight, synaesthesia, color blindness, and phantom limbs; and a lecture with presentation of classical experiments on the capacity of the young and adult brain for plasticity and learning. Final exam required.

PSYCH 6 Stress and Coping 2 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of lecture per week. 5 hours of lecture per week for 6 weeks.

Prerequisites: Psychology 1, N1, W1, 2, or equivalent. This course is designed to provide students with an in-depth analysis of the various areas within the field of psychology that address topics related to stress and coping. In particular, we will cover the biological, social, personality, cognitive, and clinical factors that play a role in the development of stress and subsequent coping techniques that can be used to deal with stress. The class will have a strong focus on the empirical findings relating to the subject. Final exam required.

PSYCH 14 Psychology of Gender 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.

Examination of various factors in the development of feminine and masculine roles, including personality, social processes, biology, and culture. Final exam required.

PSYCH C19/L & S C30T/MCELLBI C62 Drugs and the Brain 3 Units**Department:** Psychology; Letters and Science; Molecular and Cell Biology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 4.5 hours of Lecture per week for 8 weeks.

The history, chemical nature, botanical origins, and effects on the human brain and behavior of drugs such as stimulants, depressants, psychedelics, analgesics, antidepressants, antipsychotics, steroids, and other psychoactive substances of both natural and synthetic origin. The necessary biological, chemical, and psychological background material for understanding the content of this course will be contained within the course itself.

Students will receive no credit for C62 after taking 62, C100A/Chemistry C130, 102, 104, 110, 130A, 136, C160/Neuroscience C160,
 Integrative Biology 132, Letters and Science C30T, or Psychology C19 .
 Final exam not required. Instructor: Presti

PSYCH 24 Freshman Seminars 1 Unit**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.

Hours and format: 1 hour of Seminar per week for 15 weeks.

The Berkeley Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Berkeley Seminars are offered in all campus departments, and topics vary from department to department and semester to semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

PSYCH 39AC Unnatural Causes: Is Inequality Making Us Sick? 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This interdisciplinary seminar will explore the large and disturbing socio-economic and racial/ethnic disparities in health...and search for their causes. The social circumstances in which we are born, live, and work become 'biologically embedded' and put us at a risk for stroke, heart disease, poor mental health, and academic achievement. This seminar will explore why some populations get sicker more often in the first place, i.e. the role of inequality, racism, and neglect in breeding disease.

Satisfies the American Cultures requirement

Student will receive no credit for 39AC after taking 39J. Final exam not required.

PSYCH 39E Freshman/Sophomore Seminar 2 - 4 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required.

PSYCH 39I Freshman/Sophomore Seminar 2 - 4 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required.

PSYCH 39J Freshman/Sophomore Seminar 2 - 4 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required.

PSYCH 39K Freshman/Sophomore Seminar 2 - 4 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required.

PSYCH 39L Freshman/Sophomore Seminar 2 - 4 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required.

PSYCH 39M Freshman/Sophomore Seminar 2 - 4 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required.

PSYCH 48 Brain Development and Aging 1 Unit**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture per week for 15 weeks. 3 hours of Lecture per week for 6 weeks.**Prerequisites:** One year of college level biology.

This is an introductory survey course on brain and cognitive development. It gives an overview of brain structure and function and how it changes throughout life. Topics include: effect of pre-natal maternal and paternal behavior in brain development; critical periods; experience-dependent changes in the brain; the adolescent brain; and the aging brain. We will also discuss developmental disorders such as Down syndrome and the putative benefits of exercise and diet to brain health. Students will receive no credit for Psychology 48 after taking Psychology 125. Final exam required.

PSYCH C61/MCELLBI C61 Brain, Mind, and Behavior 3 Units**Department:** Psychology; Molecular and Cell Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Introduction to human brain mechanisms of sensation, movement, perception, thinking, learning, memory, and emotion in terms of anatomy, physiology, and chemistry of the nervous system in health and disease. Intended for students in the humanities and social sciences and others not majoring in the biological sciences. Students will receive no credit for C61 after taking 61, W61, or Psychology C61. A deficient grade in 61, W61, or Psychology C61 may be removed by taking C61. Final exam required. Instructor: Presti

PSYCH C64/MCELLBI C64 Exploring the Brain: Introduction to Neuroscience 3 Units**Department:** Psychology; Molecular and Cell Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture and 1 hour of discussion per week.**Prerequisites:** High school chemistry or Chemistry 1A; high school biology or Biology 1A. Biology 1AL is not required.

This course will introduce lower division undergraduates to the fundamentals of neuroscience. The first part of the course covers basic membrane properties, synapses, action potentials, chemical and electrical synaptic interactions, receptor potentials, and receptor proteins. The second part of the course covers networks in invertebrates, memory and learning behavior, modulation, vertebrate brain and spinal cord, retina, visual cortex architecture, hierarchy, development, and higher cortical centers.

Students will receive no credit for Molecular and Cell Biology/Psychology C64 after taking Molecular and Cell Biology C61/Letters and Science C30W, 104, 100A/Chemistry C130, Molecular and Cell Biology 110, 130A, 136, 160, C160/Neuroscience C160, or Integrative Biology 132. Students may remove a deficient grade in Molecular and Cell Biology C64/Psychology C64 after Molecular and Cell Biology 64. Final exam required. Instructor: Caporale

PSYCH 98 Supervised Group Study 1 - 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 3 hour of Directed group study per week for 15 weeks.

Group study of selected topics. Enrollment restricted. See Introduction to Courses and Curriculum section of this catalog.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 99 Supervised Independent Study and Research 1 - 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.

Hours and format: Zero hours of Independent study per week for 15 weeks. 2 to 6 hours of Independent study per week for 8 weeks. 2.5 to 7.5 hours of Independent study per week for 6 weeks.

Prerequisites: 1 or consent of instructor and 3.4 GPA or higher.

Intended for freshmen and sophomores who wish to undertake a program of individual inquiry on a topic in psychology.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 101 Research and Data Analysis in Psychology 4 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 5 hours of lecture/discussion per week. 10 hours of lecture/discussion per week for 8 weeks. 12.5 hours of lecture/discussion per week for 6 weeks.

Prerequisites: 1 and completion of the quantitative prerequisites for the major.

The course will concentrate on hypothesis formulation and testing, tests of significance, analysis of variance (one-way analysis), simple correlation, simple regression, and nonparametric statistics such as chi-square and Mann-Whitney U tests. Majors intending to be in the honors program must complete 101 by the end of their junior year.

Final exam required.

PSYCH 102 Methods for Research in Psychological Sciences 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.

Prerequisites: 101

Lecture and computer lab course on advanced data analysis techniques used by researchers in psychology. The course will cover programming techniques in R and data analysis methods that include modeling, multivariate statistics, and data reduction and visualization techniques. The following topics will be covered: generalized linear model (includes logistic regression), discriminant analysis (includes multivariate ANOVA), principal component analysis, and factor analysis.

Final exam required. Instructor: Theunissen

PSYCH C102/AFRICAM C139 Psychology and African-Descent People 3 Units**Department:** Psychology; African American Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 8 hours of lecture per week for 4 weeks.

The course will provide a deconstruction of the use of Euro-American psychological research and theory pertaining to African-descent people and will present an African-centered theoretical perspective for understanding identity construction among selected populations within the African diaspora. Readings, lectures, and class discussions will facilitate increases in students' ability to conceptualize important issues and concerns as researchable questions and develop appropriate methodologies for conducting research.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Instructor: Mitchell

PSYCH 107 Buddhist Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Based on tradition of direct observation of working of ordinary mind in everyday life situations. Provides contrasting perspective to present theories of cognition, perception, motivation, emotion, social interaction, and neurosis.

Students will not receive credit for Psych 107 after having completed Psych N107. Final exam required.

PSYCH N107 Buddhist Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7 hours of lecture per week for 6 weeks.**Prerequisites:** Psychology 1, Psychology 2, or equivalent

Based on tradition of direct observation of working of ordinary mind in everyday life situations. Provides contrasting perspective to present theories of cognition, perception, motivation, emotion, social interaction, and neurosis.

Students will not receive credit for Psych N107 after having completed Psych 107. Final exam required.

PSYCH 109 History of Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 101 or consent of instructor.

Development of scientific study of human and animal behavior.

Consideration of history of particular subject areas--such as biological, comparative, developmental, personality, and social psychology--as well as general trends.

Final exam required.

PSYCH 110 Introduction to Biological Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 4 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.**Prerequisites:** 1 and biological prerequisites for the major or consent of instructor.

Survey of relations between behavioral and biological processes. Topics include sensory and perceptual processes, neural maturation, natural bases of motivation, and learning.

Final exam required.

PSYCH N110 Introduction to Biological Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7 hours of lecture per week for 6 weeks.**Prerequisites:** 1 and biological prerequisites for the major or consent of instructor.

Survey of relations between behavioral and biological processes. Topics include sensory and perceptual processes, neural maturation, natural bases of motivation, and learning.

Students will receive no credit for Psychology N110 after completing Psychology 110. A deficient grade in Psychology 110 may be removed by taking Psychology N110. Final exam required.

PSYCH C113/INTEGBI C143A Biological Clocks: Physiology and Behavior 3 Units**Department:** Psychology; Integrative Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Completion of biological prerequisites for the major and one of the following: 110 or a course in animal organismal physiology (Integrative Biology 132, 138, 140, 148, or Molecular and Cell Biology 160).

A consideration of the biological clocks that generate daily, lunar, seasonal and annual rhythms in various animals including people. Emphasis on neuroendocrine substrates, development and adaptive significance of estrous cycles, feeding rhythms, sleep-wakefulness cycles, reproductive and hibernation cycles, body weight and migratory cycles. Final exam required.

PSYCH 114 Biology of Learning and Neural Plasticity 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 110 or consent of the instructor.

A study of theoretical and experimental investigations of the biological substrates of learning, memory and forms of neural plasticity related to the growth and maturation of the nervous system. Final exam required.

PSYCH C116/INTEGBI C143B Hormones and Behavior 3 Units**Department:** Psychology; Integrative Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: Completion of biological prerequisites for the major and consent of instructor; a course in mammalian physiology recommended. This course provides a comprehensive overview of behavioral endocrinology beginning with hormone production and actions on target issues and continuing with an exploration of a variety of behaviors and their hormonal regulation/consequences. The course uses a comparative approach to examine the reciprocal interactions between the neuroendocrine system and behavior, considering the effects of hormone on development and adult behavior in addition to how behavior regulates endocrine physiology. While much of the course focuses on non-human vertebrate species, the relevance to humans is explored where appropriate. Topics include sexual differentiation and sex differences in behavior, reproductive, parental, and aggressive behaviors, and hormonal and behavioral homeostatic regulation. Final exam required.

PSYCH 117 Human Neuropsychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.**Prerequisites:** 110

A survey of contemporary psychological approaches to problems of human disabilities including mental disorders, behavior changes following human brain injury and disease, and mental subnormality. Emphasis on nervous system models of these problems and areas of potential application of basic research development. Final exam required.

PSYCH 119 Drugs and Behavior 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.**Prerequisites:** 110 or consent of instructor.

A survey course exploring the basic principles of psychopharmacology. The major focus of the course is on the relationship between behavior and the physiological actions of drugs. Emphasis will be placed on effects of pharmacological agents on complex mental processes such as attention, motivation, learning, and memory. Students will receive no credit for 119 after taking Letters and Science 19 or Molecular and Cell Biology 62. Final exam not required.

PSYCH C120/COG SCI C100 Basic Issues in Cognition 3 Units**Department:** Psychology; Cognitive Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 3.5 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Theoretical foundations and current controversies in cognitive science will be discussed. Basic issues in cognition--including perception, imagery, memory, categorization, thinking, judgment, and development--will be considered from the perspectives of philosophy, psychology, computer science, and physiology. Particular emphasis will be placed on the nature, implications, and limitations of the computational model of mind. Students will receive no credit for C120 after taking 120A. Final exam required.

PSYCH 121 Animal Cognition 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 115B or consent of instructor.

This course focuses on how animals process, organize, and retain information. Specific topics include learning and memory, sensory processes, navigation and migration, communication, and cross-species comparisons of behavior. Material will be drawn from the ethological, behavioral/experimental, and, to a lesser extent, the neurosciences literature.

Final exam required.

PSYCH 122 Introduction to Human Learning and Memory 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 101 is recommended.

Theoretical and experimental analysis of human learning and memory; short-term and long-term memory; coding and retrieval processes; transfer and interference; mechanisms of forgetting.

Final exam required.

PSYCH C123/COG SCI C131 Computational Models of Cognition 4 Units**Department:** Psychology; Cognitive Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Calculus, discrete mathematics, C1, Computer Science 61A, or equivalents.

This course will provide advanced students in cognitive science and computer science with the skills to develop computational models of human cognition, giving insight into how people solve challenging computational problems, as well as how to bring computers closer to human performance. The course will explore three ways in which researchers have attempted to formalize cognition -- symbolic approaches, neural networks, and probability and statistics -- considering the strengths and weaknesses of each.

Final exam not required.

PSYCH C124/COG SCI C124 Psycholinguistics 3 Units**Department:** Psychology; Cognitive Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Introduction to psycholinguistics, emphasizing effects of psychological variables on the learning and use of language, influence of language behavior on psychological processes; special attention to psychological applicability of modern linguistic theory and to social psychological aspects of language behavior.

Final exam required.

PSYCH 125 The Developing Brain 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

What are the changes in brain structure and function that underlie improvements in cognitive abilities over childhood and adolescence? Or, coming from a different perspective, what insights can we gain regarding the neural basis of cognition by examining how the brain develops? And how are such findings relevant for medicine, education, and the law? The cutting-edge new field of developmental cognitive neuroscience is beginning to address these and other questions. This course will constitute an overview of current research and methods in this field, focusing on both typically and atypically developing children and adolescents.

Students will receive no credit for 125 after taking 192 Fall 2007. Final exam required.

PSYCH C126/COG SCI C126 Perception 3 Units**Department:** Psychology; Cognitive Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Consent of instructor. 101 recommended.

An introduction to principal theoretical constructs and experimental procedures in visual and auditory perception. Topics will include psychophysics; perception of color, space, shape, and motion; pattern recognition and perceptual attention.

Final exam required.

PSYCH C127/COG SCI C127 Cognitive Neuroscience 3 Units**Department:** Psychology; Cognitive Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 110 or 120A or C120B, or Cog Sci C100.

This course will examine research investigating the neurological basis of cognition. Material covered will include the study of brain-injured patients, neurophysiological research in animals, and the study of normal cognitive processes in humans with non-invasive behavioral and physiological techniques such as functional Magnetic Resonance Imaging (fMRI), electroencephalography (EEG), and transcranial magnetic stimulation (TMS). Topics to be covered include perception, attention, memory, language, motor control, executive control, and emotion. Final exam required.

PSYCH 128 Topical Seminars in Cognitive Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

For a precise schedule of offerings check with the Student Services Office each semester.

Course may be repeated for credit with different topic and consent of instructor. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH C129/COG SCI C102 Scientific Approaches to Consciousness 3 Units**Department:** Psychology; Cognitive Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 1 or Cognitive Science C1; or 120A or C120B or Cognitive Science C100.

This course will examine the nature of human consciousness from the interdisciplinary perspective of cognitive science. It will cover topics from the philosophy of mind, cognitive linguistics, neuroscience, psychology, and computational models.

Final exam required.

PSYCH 130 Clinical Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 4 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.**Prerequisites:** 1

Theoretical and empirical approaches to the explanation of psychological dysfunction. The relation between theories of psychopathology and theories of intervention. A critical evaluation of the effects of individual, family, and community approaches to therapeutic and preventive intervention. Thematic focus of the course may change from year to year. See department notices for details.

Student will not receive credit for Psych 130 after having completed Psych N130. Final exam required.

PSYCH N130 Clinical Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7 hours of lecture per week for 6 weeks.**Prerequisites:** 1

Theoretical and empirical approaches to the explanation of psychological dysfunction. The relation between theories of psychopathology and theories of intervention. A critical evaluation of the effects of individual, family, and community approaches to therapeutic and preventive intervention. Thematic focus of the course may change from year to year. See department notices for details.

Students will not receive credit for Psych N130 after having completed Psych 130. Final exam required.

PSYCH 131 Developmental Psychopathology 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.**Prerequisites:** 130 or consent of instructor.

This course will discuss linkages between developmental processes and child psychopathology. Included will be discussion of cognitive impairments in children, including learning disabilities and mental retardation; internalizing disorders, such as anxiety, withdrawal, and depression; externalizing disorders, such as attention-deficit hyperactivity disorder and conduct disorder; and child abuse and neglect. Psychobiological, familial, legal, and societal factors will be emphasized. Final exam required.

PSYCH 133 Psychology of Sleep 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

This course has two primary goals: (1) to provide a basic introduction to the study of sleep and an overview of sleep measurement, regulation, ontogeny, phylogeny, physiology, and psychology; and (2) to provide a basic introduction to sleep disorders including their classification, cause, and treatment.

Final exam required.

PSYCH N133 Psychology of Sleep 3 Units**Department:** Psychology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7 hours of lecture per week for 6 weeks.

This course has two primary goals: (1) to provide a basic introduction to the study of sleep and an overview of sleep measurement, regulation, ontogeny, phylogeny, physiology, and psychology; and (2) to provide a basic introduction to sleep disorders including their classification, cause, and treatment.

Students will not receive credit for Psych N133 after having completed Psych 133. Final exam required.

PSYCH 136 Human Sexuality 3 Units**Department:** Psychology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7.5 hours of Lecture per week for 6 weeks.

Biological, social, and clinical issues in sexuality. Topics include psychology and physiology of sexual response, new developments in contraception, homosexuality and lesbianism, variations in sexual behavior, gender identity and role, definition and treatment of sexual dysfunction. Approved for state psychology licensing requirement.

Final exam required.

PSYCH 136X Human Sexuality 3 Units**Department:** Psychology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 to 6 hours of Lecture and 1 to 2 hour of Discussion per week for 6 weeks.

Biological, social, and clinical issues in sexuality. Topics include psychology and physiology of sexual response, new developments in contraception, homosexuality and lesbianism, variations in sexual behavior, gender identity and role, definition and treatment of sexual dysfunction. Approved for state psychology licensing requirement.

Final exam not required.

PSYCH 139 Case Studies in Clinical Psychology 2 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks. 5 hours of Lecture per week for 6 weeks.**Prerequisites:** Psychology 130, 131, or equivalent.

This course is for students who are curious about clinical psychology and who seek to explore real world cases and examples of mental health diagnoses. Through the use of clinical cases and first-person accounts, this course will give an overview of the diagnostic criteria mental health providers use to make diagnoses, discuss environmental and genetic casual factors, and explore available treatment options for various mental illnesses.

Final exam required.

PSYCH 140 Developmental Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.**Prerequisites:** 1

This course explores the development of children from birth to adolescence, in a wide range of areas including biological, cognitive, linguistic, social, and personality development. It also covers the effects of genes, experience, and social context on children's development.

Final exam required.

PSYCH N140 Developmental Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7 hours of lecture per week for 6 weeks.**Prerequisites:** 1

This course explores the development of children from birth to adolescence, in a wide range of areas including biological, cognitive, linguistic, social, and personality development. It also covers the effects of genes, experience, and social context on children's development.

Students will not receive credit for Psych N140 after having completed Psych 140. Final exam required.

PSYCH 141 Development During Infancy 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 140

Cognitive, perceptual, and social development during the first two years of life with emphasis upon methods of observation and experimentation.

Final exam required.

PSYCH C143/LINGUIS C146 Language Acquisition 3 Units**Department:** Psychology; Linguistics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 to 8 hours of Lecture per week for 6 weeks.

An overview of topics and theories in language acquisition: early development of speech perception and production, word learning, generalizing linguistic structure, and differences between first language acquisition, second language acquisition, and bilingualism. We will also compare different theoretical approaches, and address the classic "nature vs. nurture" question by examining both traditional generativist approaches and more recent usage based models.

Final exam required.

PSYCH 145 Coping and Adaptation in Childhood and Adolescence 3 Units**Department:** Psychology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture and 1 hour of Discussion per week for 8 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 6 weeks.

This course will examine basic processes in and contextual influences on social and emotional development. Topics will include major milestones of social and emotional development, the causes of disruptions in healthy development, and the theoretical concepts and models of development in everyday contexts.

Final exam not required.

PSYCH 146 Developmental and Biological Processes in Attachment 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 110 or consent of instructor.

This course on attachment theory provides an integrative (evolutionary/genetic/experiential) approach to studying secure vs. insecure parent-child relationships; their precursors in parental rearing patterns and genetics; and their favorable vs. less favorable psychological sequelae for children. Adult life-history narratives indicative of secure vs. insecure adult attachment have been found associated with care-giving of offspring and change from insecure to secure adult attachment is discussed.

Final exam required.

PSYCH 147 Contemporary Parenting 3 Units**Department:** Psychology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture and 1 hour of Discussion per week for 8 weeks. 5.5 hours of Lecture and 1.5 hours of Discussion per week for 6 weeks.

This course examines theories of parent-child relationships in the context of human development. The influences of ethnicity and immigration status, cultural values and expectations, and socioeconomic status on the parenting process are explored. We will discuss contemporary parenting philosophies and several issues of relevance (divorce and blended families, dual worker and single parent families, older and younger parents, child abuse, adoption, etc.).

Final exam not required. Instructor: Strage

PSYCH 147X Contemporary Parenting 3 Units**Department:** Psychology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 to 6 hours of Lecture and 1 to 2 hour of Discussion per week for 6 weeks.

This course examines theories of parent-child relationships in the context of human development. The influences of ethnicity and immigration status, cultural values and expectations, and socioeconomic status on the parenting process are explored. We will discuss contemporary parenting philosophies and several issues of relevance (divorce and blended families, dual worker and single parent families, older and younger parents, child abuse, adoption, etc.).

Final exam not required.

PSYCH 148 Topical Seminars in Developmental Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

For a precise schedule of offerings, check with the Student Services Office each semester.

Course may be repeated for credit with different topic and consent of instructor. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 150 Psychology of Personality 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 4 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.**Prerequisites:** 1

A consideration of general and systematic issues in the study of personality and an evaluation of major theories and points of view. Final exam required.

PSYCH N150 Psychology of Personality 3 Units**Department:** Psychology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7 hours of lecture per week for 6 weeks.**Prerequisites:** 1

A consideration of general and systematic issues in the study of personality and an evaluation of major theories and points of view. Students will not receive credit for Psych N150 after having completed Psych 150. Final exam required.

PSYCH 156 Human Emotion 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

This course will examine two different theoretical perspectives on emotion: (1) the differential emotions approach with its strong evolutionary grounding, and (2) the social constructionist approach. Next, the course will investigate empirical research on many facets of emotion including facial expression, physiology, appraisal, and the lexicon of emotion. Finally, we will consider more specific topics including social interaction, culture, gender, personality, and psychopathology. Final exam required.

PSYCH 160 Social Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 4 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.**Prerequisites:** 1

Survey of social psychology including interaction processes, small groups, attitudes and attitude change, and social problems. Final exam required.

PSYCH N160 Social Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7 hours of lecture per week for 6 weeks.**Prerequisites:** 1

Survey of social psychology including interaction processes, small groups, attitudes and attitude change, and social problems. Students will not receive credit for Psych N160 after having completed Psych 160. Final exam required.

PSYCH 162 Human Happiness 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 5.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.**Prerequisites:** 160 or consent of instructor.

This course will take an interdisciplinary approach to an understanding of happiness. The first part of the course will be devoted to the different treatments of happiness in the world's philosophical traditions, focusing up close on conceptions of the good life in classical Greek and Judeo-Christian thought, the great traditions in East Asian thought (Taoism, Buddhism, Confucianism), and ideas about happiness that emerged more recently in the age of Enlightenment. With these different perspectives as a framework, the course will then turn to treatments of happiness in the behavioral sciences, evolutionary scholarship, and neuroscience. Special emphasis will be given to understanding how happiness arises in experiences of the moral emotions, including gratitude, compassion, reverence and awe, as well as aesthetic emotions like humor and beauty. Students will receive no credit for 162 after taking C162, Letters and Science C160V or 160C. Final exam required.

PSYCH C162/L & S C160V Human Happiness 3 Units**Department:** Psychology; Letters and Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This course will take an interdisciplinary approach to an understanding of happiness. The first part of the course will be devoted to the different treatments of happiness in the world's philosophical traditions, focusing up close on conceptions of the good life in classical Greek and Judeo-Christian thought, the great traditions in East Asian thought (Taoism, Buddhism, Confucianism), and ideas about happiness that emerged more recently in the age of Enlightenment. With these different perspectives as a framework, the course will then turn to treatments of happiness in the behavioral sciences, evolutionary scholarship, and neuroscience. Special emphasis will be given to understanding how happiness arises in experiences of the moral emotions, including gratitude, compassion, reverence and awe, as well as aesthetic emotions like humor and beauty. Final exam required.

PSYCH N162 Human Happiness 3 Units**Department:** Psychology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7 hours of lecture per week for 6 weeks.**Prerequisites:** Psychology 160 or consent of instructor.

This course will take an interdisciplinary approach to an understanding of happiness. We will first review the different treatments of happiness in the world's philosophical traditions: conceptions of the good life in classical Greek and Judeo-Christian thought, the great East Asian philosophies, and ideas about happiness that emerged in the age of Enlightenment. With these different perspectives as a framework, the course will turn to treatments of happiness in the behavioral sciences, evolutionary scholarship, and neuroscience. Special Emphasis will be given to understanding how happiness arises in experiences of the moral emotions, including gratitude, compassion, reverence and awe, and aesthetic emotions like humor and beauty.

Students will receive no credit for Psychology N162 after taking Psychology 162, or Psychology C162/Letters and Science C160V. A deficient grade in Psychology 162 may be removed by taking Psychology N162. Final exam required.

PSYCH 164 Social Cognition 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** C120 or 150 or 160, or Cog Sci C100.

Surveys empirical and theoretical approaches to our understanding of perception, memory, thought, and language concerning ourselves, other people, interpersonal behavior, and the situations in which social interaction takes place. Emphasis is placed on the integration of problems in social, personality, and clinical psychology with the concepts and principles employed in the study of nonsocial cognition.

Final exam required.

PSYCH 165 Psychology of Creativity 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 1, sophomore standing.

This is a course on creativity, both at the individual and the group level. We will consider traits of highly creative individuals (vs. less creative individuals) and the ways in which they think. We will also investigate the ways in which influence processes affect individual creativity and will then focus on group creativity, including techniques by which creativity is hindered or stimulated. Finally, we will consider applications from organizations as we consider cultures in which creativity thrives. Throughout the course, discussion will be encouraged and we will also do some experiential exercises. The course will be a combination of lecture, discussion, and experiential learning.

Final exam required.

PSYCH 166AC Cultural Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture and 1 hour of discussion per week.

7 hours of lecture and zero hours of discussion per week for 6 weeks.

Prerequisites: 1; 160 is recommended.

The course will review research on culture, race, and ethnicity and will consider the implications of these findings for our understanding of race, culture, and ethnicity in American society. Mounting evidence suggests that psychological processes are culture-specific, theory-driven, and context-dependent. This course will focus on the effects that theories of mind, person, self, and social institutions have on human cognition, motivation, emotion, and social interactions in American society. Students will gain a better appreciation of the ways that cultural traditions and social practices regulate and transform psychological functioning. Simply, the course is about how culture affects psyche and how psyche affects culture.

Satisfies the American Cultures requirement

Final exam required.

PSYCH 167AC Stigma and Prejudice 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 1 or consent of instructor.

Traditionally, research on prejudice and stereotyping has focused on the psychological mechanisms that lead people to be biased against others. Recent research has begun to shed light on the psychological legacy of prejudice and stereotyping for their targets. This course will review the major contributions of each of these literatures, providing students with a broad understanding of both classic and current issues in the field. The course will be divided into three sections: bias (i.e., the perpetrator's perspective), stigma (i.e., the target's perspective), and intergroup relations.

Satisfies the American Cultures requirement

Final exam required.

PSYCH 168 Topical Seminars in Social Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

For a precise schedule of offerings check with Student Services Office each semester.

Course may be repeated for credit with different topic and consent of instructor. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 180 Industrial-Organizational Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Primarily for majors. Introduction to the field of industrial psychology, covering fundamental theory and concepts in personnel and social aspects in the field. Concerned with the processes involved in developing and maintaining organizations.

Final exam required.

PSYCH N180 Industrial-Organizational Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7 hours of lecture per week for 6 weeks.

Primarily for majors. Introduction to the field of industrial psychology, covering fundamental theory and concepts in personnel and social aspects in the field. Concerned with the processes involved in developing and maintaining organizations.

Students will receive no credit for Psychology N180 after taking Psychology 180. A deficient grade in Psychology 180 may be removed by taking Psychology N180. Final exam required.

PSYCH 192 Special Topics in Psychology 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** Consent of instructor.

Course examines current problems and issues in psychology.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

PSYCH 192AC Child Development in Different Cultures 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 2 hours of Lecture per week for 8 weeks. 5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

This course explores "culture" as a context for development from both global and American sub-group perspectives, through developmental stages from early childhood to adolescence, across physical, social and cognitive domains. It will examine traditional theories and modern systems theories with respect to individual and social contexts, discuss the experience of sub-groups of American children and conclude with a comprehensive analysis of the development of an individual.

Satisfies the American Cultures requirement

Final exam required.

PSYCH H194A Honors Seminar 2 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Required of and limited to psychology majors in the honors program. H195A-H195B should be taken concurrently.

In the fall semester the seminar will concentrate on issues of research design, ethics, and data analysis using statistical packages. The spring semester will focus on oral and written presentations of the thesis projects and feedback on thesis drafts.

Final exam not required.

PSYCH H194B Honors Seminar 2 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Required of and limited to psychology majors in the honors program. H195A-195B should be taken concurrently.

In the fall semester the seminar will concentrate on issues of research design, ethics, and data analysis using statistical packages. The spring semester will focus on oral and written presentations of the thesis projects and feedback on thesis drafts.

Final exam not required.

PSYCH H195A Special Study for Honors Candidates 1 - 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Individual conferences.**Prerequisites:** Open only to senior psychology majors in the Honors Program.

Independent study and preparation of an honors thesis under the supervision of a faculty member.

Course may be repeated for a maximum of 6 units. Course may be repeated for a maximum of 6 units. Final exam not required.

PSYCH H195B Special Study for Honors Candidates 1 - 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part two of a year long series course. Upon completion, the final grade will be applied to both parts of the series.**Hours and format:** Individual conferences.**Prerequisites:** Open only to senior psychology majors in the Honors Program.

Independent study and preparation of an honors thesis under the supervision of a faculty member.

Course may be repeated for a maximum of 6 units. Course may be repeated for a maximum of 6 units. Final exam not required.

PSYCH 197 Field Study in Psychology 1 - 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Individual conferences.**Prerequisites:** 1; appropriate upper division work in psychology (to be determined by instructor). Consent of instructor.

Supervised experience relevant to specific aspects of psychology in off-campus settings. Individual and/or group meetings with faculty. Enrollment is restricted by regulations of the Berkeley Division listed elsewhere in this catalog.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 198 Directed Group Study 1 - 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Individual conferences.**Prerequisites:** Consent of instructor.

Group study of a selected topic or topics in psychology. Enrollment is restricted by regulations of the Berkeley Division listed elsewhere in this catalog.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 199 Supervised Independent Study and Research 1 - 3 Units**Department:** Psychology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Individual conferences.**Prerequisites:** Consent of instructor.

Enrollment is restricted by regulations of the Berkeley Division listed elsewhere in this catalog.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 205A Data Analysis 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of lecture and 2 hours of discussion/laboratory per week.

Students will need to work through problems (homework). A general data analytic course that emphasizes design issues and problems, from pure experimental research through field studies. Techniques of ANOVA and multiple regression/correlation will be presented as analytical models for both lab and field research.

Final exam not required.

PSYCH 205B Data Analysis 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of lecture and 2 hours of discussion/laboratory per week.

Students will need to work through problems (homework). A general data analytic course that emphasizes design issues and problems, from pure experimental research through field studies. Techniques of ANOVA and multiple regression/correlation will be presented as analytical models for both lab and field research.

Final exam not required.

PSYCH 210A Proseminar: Cognition, Brain, and Behavior 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

A survey of the field of biological psychology. Areas covered are (a) cognitive neuroscience; (b) biological bases of behavior; (c) sensation and perception (d) learning and memory, (e) thought and language.

Final exam not required.

PSYCH 210B Proseminar: Cognition, Brain, and Behavior 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

A survey of the field of biological psychology. Areas covered are (a) cognitive neuroscience; (b) biological bases of behavior; (c) sensation and perception (d) learning and memory, (e) thought and language.

Final exam not required.

PSYCH 210C Proseminar: Cognition, Brain, and Behavior 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Consent of instructor.

A survey of the field of biological psychology. Areas covered are (a) cognitive neuroscience; (b) biological bases of behavior; (c) sensation and perception (d) learning and memory, (e) thought and language. Final exam not required.

PSYCH 210D Proseminar: Cognition, Brain, and Behavior 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Consent of instructor.

A survey of the field of biological psychology. Areas covered are (a) cognitive neuroscience; (b) biological bases of behavior; (c) sensation and perception (d) learning and memory, (e) thought and language. Final exam not required.

PSYCH 210E Proseminar: Cognition, Brain, and Behavior 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks.

A survey of the field of biological psychology. Areas covered are (a) cognitive neuroscience; (b) biological bases of behavior; (c) sensation and perception (d) learning and memory, (e) thought and language.

Final exam not required. Formerly known as 220C.

PSYCH 214 Functional MRI Methods 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

This course will provide an overview of functional MRI methodology. Topics to be covered include the basic physics of fMRI, the nature of BOLD fMRI signal, the spatial and temporal resolution of fMRI, issues in experimental design, and statistical techniques used for analyzing fMRI data. The class will review published studies as well as ongoing research projects that address questions regarding brain-behavior relationships. Students will have the opportunity for hands-on experience performing an fMRI experiment and analyzing the data. Final exam not required.

PSYCH 222 Consciousness 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Survey of psychological, philosophical, and neuroscientific approaches to consciousness. Introspection. The mind-body problem. Automaticity. Explicit-implicit dissociations in memory, perception, and thought. Implicit emotion and motivation. Sleep and dreams. Anesthesia and coma. Hypnosis. Meditative states. Consciousness in nonhuman animals and computing machines.

Final exam not required. Formerly known as 220B.

PSYCH C223/EDUC C229A Proseminar: Problem Solving and Understanding 3 Units**Department:** Psychology; Education**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Consent of instructor.

Students will examine problem solving in children and adults, from a predominantly cognitive science perspective, beginning with an examination of thinking involved in diverse problem types. Students will then analyze the literature concerning cognitive issues that transcend problem types, including representation, "understanding," access and availability of knowledge, access to one's own cognitive processing, categorization, the architecture of knowledge, and the control of cognition. Final exam not required.

PSYCH 229 Cognition, Brain, and Behavior Colloquium 1 Unit**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Offered for satisfactory/unsatisfactory grade only.

Hours and format: 1.5 hours of Colloquium per week for 15 weeks.

Prerequisites: Graduate standing or consent of instructor.

Reports and discussions of original research in the area of cognitive psychology. Not all participants must report in any given semester, but all are expected to attend and to enter into the discussions. Required course for all students in the cognition, brain, and behavior graduate program. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 230 Proseminar: Clinical Psychology 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Required of all 1st-year Clinical Science Program graduate students.

This course is a review of the history and theory of the field of clinical psychology. The course covers adult and child psychopathology, ethnic minority mental health, culture, and community influences.

Final exam not required. Formerly known as 230A-230B.

PSYCH 233A Clinical Assessment: Theory, Application, and Practicum 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** First-year status as graduate student in clinical psychology or enrollment in limited training in clinical psychology.

The clinical interview and principles and methods of intellectual, objective, and projective clinical assessment. Readings, discussion, and supervised experience in clinical assessment. The first semester will focus on adult assessments; the second semester will focus on child/adolescent assessments. Required of all clinical students.

Final exam not required.

PSYCH 233B Clinical Assessment: Theory, Application, and Practicum 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** First year status as graduate student in clinical psychology or enrollment in limited training in clinical psychology.

The clinical interview and principles and methods of intellectual, objective, and projective clinical assessment. Readings, discussion, and supervised experience in clinical assessment. The first semester will focus on adult assessments; the second semester will focus on child/adolescent assessments. Required of all clinical students.

Final exam not required.

PSYCH 234D Theories of Cognitive Behavior Therapy 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Central features of cognitive behavior therapy; basics of several cognitive-behavioral theories; evidence of efficacy and effectiveness of methods; methods for assessing, conceptualizing and treating patients; theories, methods, and efficacy evidence for several disorders, primarily anxiety and affective disorders.

Final exam not required.

PSYCH 236 Specialty Clinic 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Clinic per week for 15 weeks.**Prerequisites:** Open only to Clinical Science Program graduate students.

A Specialty Clinic is offered to graduate students in the Clinical Science program. Each course combines didactics and hands-on clinical work. Students in the course work with the instructor to develop the topic of interest by reviewing the empirical literature, defining and developing an intervention/consultation, defining a clinical population, marketing and delivering the intervention/consultation, and evaluating the effectiveness of the intervention/consultation. A number of readings are included in the course, and class discussion is a central part of the course. Written products are also a part of the course, either in the form of a presentation or publication of findings from the clinic. A Specialty Clinic also includes its own Case Conference and supervisors to handle supervision of the clinical cases.

Final exam required.

PSYCH 237E Professional Development in Clinical Science 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture and 1 hour of individual meetings per week.**Prerequisites:** Limited to second and third year clinical psychology students or consent of instructor.

Issues in decisions about providing psychological services to individuals, families, groups and social systems.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 237F Intervention: Couples Therapy 1 Unit**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Limited to second- and third-year clinical psychology students or consent of instructor.

Psychological intervention with couples.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 237G Intervention: Specialty Clinics 1 or 2 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 2 hour of Lecture per week for 15 weeks.**Prerequisites:** Limited to second- and third-year clinical psychology students or consent of instructor.

Psychological intervention with and evaluation of specially designated populations.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 237H Intervention: Introduction to Clinical Methods 1 Unit**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture per week for 15 weeks.**Prerequisites:** Limited to first-year clinical psychology students or consent of instructor.

This course is an introduction to clinical methods in preparation for the clinical practicum in the Psychology Clinic during the second and third years of the clinical graduate program. Topics covered include clinical policies and procedures, legal and ethical issues, risk management, standards of care, HIPAA, and consultations.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 239 Clinical Seminar 1 Unit**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1.5 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

Reports and discussions of original research in the area of clinical psychology. Not all participants need report in any given semester, but all are expected to attend and to enter into the discussions. Required course for all students in the clinical graduate program.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 240A Proseminar: Biological, Cognitive, and Language Development 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Survey of the biology of the nervous system and behavior; the cellular interactions during development in animals and humans, including neurogenesis, synaptogenesis, cell death and synapse elimination; and the genetic and experiential determinants of neural development. Exploration of the origins and development of knowledge from infancy through childhood; the development of children's concepts across multiple domains including physics, biology, math, and psychology. Survey of facts and theories of language acquisition; focus on what learners acquire and the role of input in the process; review of phonology, syntax, and morphology.

Final exam not required.

PSYCH 240B Proseminar: Emotional, Social, and Psychopathological Development 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Survey of current research and theory on the origins and maintenance of normal and pathological socioemotional development in infancy. Exploration of biological, psychological, familial, and cultural factors affecting social and emotional development through childhood and adolescence. Focus of the course includes how normal or pathological trajectories are maintained in some children, while others shift into or out of clinically diagnosable disorders.

Final exam not required.

PSYCH 249 Developmental Seminar 1 Unit**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1.5 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

Reports and discussions of original research in the area of developmental psychology. Not all participants need report in any given semester, but all are expected to attend and to enter into the discussions. Required course for all students in the developmental graduate program.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 250A Perspectives in Personality: Overview 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Introduces the perspectives and research programs of the personality faculty to graduate students having an interest in their field. Each week, attention is directed to the work of a different faculty member associated with the personality program.

Final exam not required.

PSYCH 250B Perspectives in Personality: Trends and Issues 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Considers historical trends and current discussions regarding such topics as (1) the concept of disposition; (2) person by environment transactions; (3) observational assessment of persons; (4) personality systematics; (5) personality development and concepts of structure, and (6) formulations of personality system-social system interactions.

Final exam not required.

PSYCH 250C Proseminar: Social Cognition 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Surveys empirical and theoretical approaches to our understanding of perception, memory, thought, and language concerning ourselves, other people, interpersonal behavior, and the situations in which social interaction takes place. Emphasis is placed on the integration of problems in social, personality, and clinical psychology with the concepts and principles employed in the study of nonsocial cognition.

Final exam not required.

PSYCH 250D Principles and Pragmatics of Personality Measurement 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Methods of personality measurement and assessment, with particular attention to the qualities, attributes, talents and dispositions considered in the everyday evaluations people make of self and others.

Final exam not required.

PSYCH 259 Personality Seminar 1 Unit**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1.5 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate standing and consent of instructor.

Reports and discussions of original research in the area of personality psychology. Not all participants need report in any given semester, but all are expected to attend and to enter into the discussions. Required course for all students in the personality graduate program.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 260B Proseminar Course in Social Psychology 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Extensive coverage of theoretical and research literature. Topics include history and systems, attitudes and attitude change, interpersonal processes, motivation, social interaction, small groups, and organizational behavior. Required course for all students in the social graduate program. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 269 Social Seminar 1 Unit**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1.5 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

Reports and discussion of original research in the area of social psychology. Not all participants need report in any given semester, but all are expected to attend and to enter into the discussions. Required for all students in the social graduate program.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 290B Seminars: Biological 2 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 290E Seminars: Perception 2 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 290H Seminars: Developmental 2 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 290I Seminars: Personality 2 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 290J Seminars: Social 2 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 290K Seminars: Clinical 2 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 290P Seminars: Additional Seminars on Special Topics to Be Announced 2 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 290Q Seminars: Cognition 2 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 290Z Seminars 1 - 3 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 3 hours of seminar per week.

Special section.

Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 292 Introduction to the Profession of Psychology 2 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

This course provides both a broad review of the field of psychology and an introduction to the faculty of this department. Faculty from various program areas will present biographical information and discuss their particular research programs, as well as summarizing current developments in their areas. The course will also cover topics in professional development (e.g., scientific writing, convention presentations, journal review processes, professional and scientific ethics, and special issues facing women and minority psychologists). Required of all first-year students in the graduate program.

Final exam not required. Formerly known as 292A.

PSYCH 293 Second-Year Seminar on Professional Development 2 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

This course will focus on various issues related to professional development. Topics may include planning a research program, preparing for qualifying exams, choosing a dissertation committee, identifying career options, presenting work at conferences and in journals, preparing grant proposals, preparing for job interviews, juggling professional and personal life, and recognizing obstacles in career development. The seminar participants will select actual topics at the beginning of the term, and all will be expected to participate in the discussions. All participants will present their research at a departmental poster session at the end of the term. Required of all second-year students.

Final exam not required. Formerly known as 293A-293B.

PSYCH 294 Current Issues Colloquium Series 1 Unit**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 to 2 hour of Colloquium per week for 15 weeks.

Current issues in specified areas of psychology presented weekly by announced speakers.

Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 298 Directed Study 1 - 12 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conference.

Special study under the direction of a member of the staff.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 299 Research 1 - 12 Units**Department:** Psychology**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences.

Individual research.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 301 Supervision for Teaching Psychology 2 2 Units**Department:** Psychology**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Prerequisites: 300, advancement to candidacy, and consent of instructor. Supervised teaching experience for graduate student instructors of Psych 2.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 375 Teaching Psychology 2 Units**Department:** Psychology**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

This course will provide training in a variety of teaching techniques, will review relevant pedagogical issues, and will assist graduate students in mastering their initial teaching experiences.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Psychology 300.

PSYCH 401A Clinical Internship (Off Campus) 1 - 12 Units**Department:** Psychology**Course level:** Other professional**Terms course may be offered:** Fall, spring and summer

Grading: The grading option will be decided by the instructor when the class is offered. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: Individual conferences.

Prerequisites: Advancement to candidacy; limited to clinical psychology graduate students or consent of instructor.

Individual programs of practice and supervision in approved off-campus agencies.

Credit and grade to be awarded on completion of internship appointment. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 401B Clinical Internship (Off Campus) 1 - 12 Units**Department:** Psychology**Course level:** Other professional**Terms course may be offered:** Fall, spring and summer

Grading: The grading option will be decided by the instructor when the class is offered. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: Individual conferences.

Prerequisites: Advancement to candidacy; limited to clinical psychology graduate students or consent of instructor.

Individual programs of practice and supervision in approved off-campus agencies.

Credit and grade to be awarded on completion of internship appointment. Course may be repeated for credit when topic changes. Final exam not required.

PSYCH 602 Individual Study for Doctoral Students 1 - 8 Units**Department:** Psychology**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Individual conferences.

Individual study in consultation with the major field adviser, intended to provide opportunity for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D. May not be used for unit or residence requirements for the doctoral degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Public Health (PB HLTH)

PB HLTH 14 Healthy People: Introduction to Health Promotion 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Introduction to personal and community health, drawing on physical and social sciences. Specific areas include stress, alcohol and drugs, nutrition, exercise, the environment, communication, and sexuality.

Readings, lectures, and discussions explore key issues for students and examine those issues in the context of contemporary American society. Public health approaches to disease prevention and health promotion are explored for each topic.

Final exam required. Instructor: Kodama

PB HLTH 14N Healthy People: Introduction to Health Promotion 3 Units**Department:** Public Health**Course level:** Undergraduate**Term course may be offered:** Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 6 hours of lecture and 1 hour of discussion per week for 8 weeks.

This course introduces students to the basic theories and skills of personal and community health promotion within a public health context. Using a broad multi-disciplinary perspective, the course will examine selected health topics with particular attention to individual and group behaviors and their implications for personal and community health.

Course Objectives: 1. To introduce students to the depth and scope of issues embraced by the theory and practice of public health.

2. To provide an overview of the meaning, principles, ethics and scope of personal and community health promotion.

3. To help students identify ways that individuals can take action to maximize their own health and create health-promoting environments.

4. To provide an opportunity for students to critically explore selected health issues from a multi-disciplinary perspective.

5. To provide an opportunity for students to apply the above concepts to a scholarly examination of a health issue in their own community, and to create positive, healthy change in their own community.

Final exam required. Instructors: Harris, Gamble

PB HLTH 24 Freshman Seminar in Public Health 1 Unit**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: The grading option will be decided by the instructor when the class is offered.

Hours and format: 1 hour of lecture/discussion per week.

Seminar limited to 15 freshmen led by senior faculty on broad topics in public health such as financing health care, promoting preventive behavior, controlling major public health problems such as world hunger, AIDS, drugs, and the population explosion.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

PB HLTH 39C Freshman/Sophomore Seminar 2 - 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format. 1 hour of seminar per week per unit. Freshman and sophomore seminars offer lower-division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Priority given to freshmen and sophomores. Final exam required.

PB HLTH 39E Freshman/Sophomore Seminar 2 - 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format. 1 hour of seminar per week per unit. Freshman and sophomore seminars offer lower-division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Priority given to freshmen and sophomores. Final exam required.

PB HLTH 39G Freshman/Sophomore Seminar 2 - 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format. 1 hour of seminar per week per unit. Freshman and sophomore seminars offer lower-division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Priority given to freshmen and sophomores. Final exam required.

PB HLTH 39H Freshman/Sophomore Seminar 2 - 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format. 1 hour of seminar per week per unit. Freshman and sophomore seminars offer lower-division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Priority given to freshmen and sophomores. Final exam required.

PB HLTH 39I Freshman/Sophomore Seminar 2 - 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format. 1 hour of seminar per week per unit. Freshman and sophomore seminars offer lower-division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Priority given to freshmen and sophomores. Final exam required.

PB HLTH 84 Sophomore Seminar 1 or 2 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of seminar per week per unit for 15 weeks. 1 and 1 half hours of seminar per week per unit for 10 weeks. 2 hours of seminar per week per unit for 8 weeks. 3 hours of seminar per week per unit for 5 weeks.**Prerequisites:** At discretion of instructor.

Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

PB HLTH 97 Field Study 1 - 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Variable format.**Prerequisites:** Lower division standing.

Supervised experience relevant to specific aspects of public health in off-campus organizations. Regular individual meetings with faculty sponsor and written reports required.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PB HLTH 98 Directed Group Study 1 - 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Variable format.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

PB HLTH 99 Supervised Independent Study 1 - 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Independent study per week for 15 weeks. 1.5 to 6 hours of Independent study per week for 10 weeks. 1.5 to 7.5 hours of Independent study per week for 8 weeks. 2.5 to 10 hours of Independent study per week for 6 weeks.**Prerequisites:** Consent of instructor.

Final exam not required.

PB HLTH C102/MCELLBI C103/PLANTBI C103 Bacterial Pathogenesis 3 Units**Department:** Public Health; Molecular and Cell Biology; Plant and Microbial Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 100, 102 or consent of instructor.

This course for upper division and graduate students will explore the molecular and cellular basis of microbial pathogenesis. The course will focus on model microbial systems which illustrate mechanisms of pathogenesis. Most of the emphasis will be on bacterial pathogens of mammals, but there will be some discussion of viral and protozoan pathogens. There will be an emphasis on experimental approaches. The course will also include some aspects of bacterial genetics and physiology, immune response to infection, and the cell biology of host-parasite interactions.

Final exam required. Instructor: Portnoy

PB HLTH 103 Drugs, Health, and Society 2 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Introduces undergraduates to concepts basic to understanding and analyzing relationships between drugs, health, and society. Using a broad multi-disciplinary perspective, examines legal and illegal drugs and their effects on personal and community health. Prevention of drug problems at the policy, community, organization, and individual levels will be examined.

Final exam required. Instructor: Kodama

PB HLTH 104A Health Promotion in a College Setting 2 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 1.5 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Consent of instructor.

Topics include health promotion, medical self-care, and delivery of health care service. Through a combined theory and practice approach, topics are covered as they apply to the campus community. The course is divided into three sections corresponding to particular campus health field experiences in which students may be involved.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Kodama

PB HLTH 104B Health Promotion in a College Setting 2 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 1.5 hour of lecture per week and 1 hour of seminar every other week.**Prerequisites:** Consent of instructor.

Topics include health promotion, medical self-care, and delivery of health care service. Through a combined theory and practice approach, topics are covered as they apply to the campus community. The course is divided into three sections corresponding to particular campus health field experiences in which students may be involved.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Kodama

PB HLTH 105 Policy, Planning, and Evaluation of Health Promotion in a College Setting 3 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** 14, 104A or 104B, and consent of instructor.

Theory and practice of policy, planning, implementation, and evaluation of health promotion programs in a college setting. Comparison of different methodologies (peer education, teaching, problem-posing, organizational change), content areas (stress, nutrition, alcohol and drugs, AIDS, sexuality, women's health, self-care, health services), and settings (clinical, classroom, living room, campus).

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Instructor: Kodama

PB HLTH 107 Violence, Social Justice, and Public Health 2 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

This course addresses violence as a public health issue, using an interdisciplinary public health approach to enable undergraduate students to explore and analyze violence from personal, social, community, and political perspectives. Beginning with individual experiences of violence and its impact, the course will go on to focus on gender- and race-based violence, firearms, poverty, youth, and collective violence; students will learn to apply public health strategies to identify causes of violence and develop practical community-based plans to prevent violence and promote safety.

Final exam required. Instructors: Creighton, Kodama

PB HLTH 112 Global Health: A Multidisciplinary Examination 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This course examines health at the individual and community/global level by examining the interplay of many factors, including the legal, social, political, and physical environments; economic forces; access to food, safe water, sanitation, and affordable preventive/medical care; nutrition; cultural beliefs and human behaviors; and religion; among others. Students will be expected to read, understand, and use advanced materials from diverse disciplines. Class accompanied by case-based discussions.

Final exam required. Instructors: Krishnan, Reingold

PB HLTH 113 Campus/Community Health Impact Program 3 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course looks at the issues of substance abuse, HIV prevention, and sexual health, particularly in relation to underrepresented groups, including African-American, Chicano/Latino, and LGBT communities. It covers principles of public health, community engagement, social justice, and health promotion. Students have the chance to participate in community outreach and develop basic outreach and health educator skills.

Final exam required.

PB HLTH 116 Seminar on Social, Political, and Ethical Issues in Health and Medicine 2 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

An interdisciplinary approach to health and medicine administered through the Health and Medical Apprenticeship Program (HMAP). Guest lecturers will speak on the social, political, and ethical aspects of health and medicine; students will then discuss and present analyses of the reading materials as well as issues raised by the speakers.

Final exam required. Formerly known as Interdepartmental Studies 130.

Instructor: Potts

PB HLTH C117/INTEG BI C195 Introduction to Global Health Disparities Research 2 Units**Department:** Public Health; Integrative Biology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture and 1 hour of Discussion per week for 15 weeks.

This course is designed to prepare trainees in the UC Berkeley "Minority Health/Global Health" (MH/GH) program to conduct a ten-week infectious disease research project in a disease-endemic country. The course provides a background in neglected tropical disease research, international research ethics, and the conduct of health research in low-resource settings.

Final exam required. Instructor: Reingold

PB HLTH 126 Health Economics and Public Policy 3 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of lecture/discussion per week for 8 weeks. 3 hours of lecture/discussion per week.**Prerequisites:** Public Health major or consent of instructor.

This course focuses on a selected set of the major health policy issues and uses economics to uncover and better understand the issues. The course examines the scope for government intervention in health markets.

Final exam required. Instructor: Scheffler

PB HLTH C129/NEUROSC C129 The Aging Human Brain 3 Units**Department:** Public Health; Neuroscience**Course level:** Undergraduate**Terms course may be offered:** Fall and spring. Offered odd-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

The course will survey the field of the human brain, with introductory lectures on the concepts of aging, and brief surveys of normal neuroanatomy, neurophysiology, neurochemistry, and neuropsychology as well as methods such as imaging, epidemiology, and pathology. The neurobiological changes associated with aging will be covered from the same perspectives: neuropsychology, anatomy, biochemistry, and physiology. Major neurological diseases of aging including Alzheimer's and Parkinson's disease will be covered, as will compensatory mechanisms, neuroendocrine changes with aging, depression and aging, epidemiology of aging, and risk factors for decline.

Final exam required. Instructor: Jagust

PB HLTH 140 Introduction to Risk and Demographic Statistics 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** One year of calculus.

Statistical and evaluation methods in studies of human mortality, morbidity, and natality. History of statistical terminology and notation, critical appraisal of registry and census data, measurement of risk and introduction to life tables. Computational systems and the analysis of mass data.

Final exam required. Instructor: Tarter

PB HLTH 141 Introduction to Biostatistics 5 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture, 1 hour of discussion, and 2 hours of laboratory per week.**Prerequisites:** High school algebra.

An intensive introductory course in statistical methods used in applied research. Emphasis on principles of statistical reasoning, underlying assumptions, and careful interpretation of results. Topics covered: descriptive statistics, graphical displays of data, introduction to probability, expectations and variance of random variables, confidence intervals and tests for means, differences of means, proportions, differences of proportions, chi-square tests for categorical variables, regression and multiple regression, an introduction to analysis of variance. Statistical software will be used to supplement hand calculation. Students who successfully complete Public Health 141 are prepared to continue their biostatistics course work in 200-level courses. With the approval of their degree program, MPH students may use Public Health 141 to fulfill the biostatistics course requirement (contact program manager for approval). Public Health 141 also fulfills the biostatistics course requirement for the Public Health Undergraduate Major.

Final exam required.

PB HLTH 142 Introduction to Probability and Statistics in Biology and Public Health 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks.**Prerequisites:** High school algebra.

Descriptive statistics, probability, probability distributions, point and interval estimation, hypothesis testing, chi-square, correlation and regression with biomedical applications.

Final exam required. Formerly known as 142A. Instructor: Selvin

PB HLTH 142AB Introduction to Probability and Statistics in Public Health and Biology 4 Units**Department:** Public Health**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours of lecture/laboratory per week for 4 weeks. 15 hours of lecture/laboratory per week for 4 weeks.**Prerequisites:** High school algebra.

This course will provide an intense, fast-paced presentation of material contained in 142A-142B, which are offered during the regular academic year. Topics from 142A include descriptive statistics, probability, probability distributions, point and interval estimation, hypothesis testing, chi-square, correlation and regression with biomedical applications. The following topics from 142B will also be covered: analysis of variance, multiple regression, and nonparametric statistics.

Final exam required. Instructor: van der Laan

PB HLTH W142 Introduction to Probability and Statistics in Biology and Public Health 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 8 hours of web-based lecture per week for 7 weeks.

This is an online course.

Descriptive statistics, probability, probability distributions, point and interval estimation, hypothesis testing, chi-square, correlation, and regression with biomedical applications.

Final exam not required. Instructor: Lahiff

PB HLTH 144A Introduction to SAS Programming 2 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture, 3 hours of laboratory, and 2 hours of work outside of class per week for 8 weeks.**Prerequisites:** 142 or consent of instructor.

This course is intended to serve as an introduction to the SAS programming language for Windows in an applied, workshop environment. Emphasis is on data management and programming in a public health research setting. Topics include SAS language to compute, recode, label, and format variables as well as sort, subset, concatenate, and merge data sets. SAS statistical procedures will be used to compute univariate and bivariate summary statistics and tests, simple linear models, graphical plots, and statistical output data sets.

This course (or equivalent) is required for students who plan to enroll in 251, Practicum in Epidemiological Methods. Enrollment is limited to School of Public Health students. If space permits, others may enroll with consent of instructor. Final exam required. Instructor: Lein

PB HLTH 144B Intermediate SAS Programming 2 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture, 3 hours of laboratory, and 2 hours of work outside of class per week for 8 weeks.**Prerequisites:** 144A.

Topics include data step flow control, looping and automated processing, implicit and explicit arrays, data simulation strategies, data set reconfiguration, use of SAS Macro variables, and writing simple SAS Macro programs.

Enrollment is limited to School of Public Health students. If space permits, others may enroll with consent of instructor. Final exam required. Instructor: Lein

PB HLTH 145 Statistical Analysis of Continuous Outcome Data 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 2 hours of laboratory/discussion per week.**Prerequisites:** 142 or equivalent.

Regression models for continuous outcome data: least squares estimates and their properties, interpreting coefficients, prediction, comparing models, checking model assumptions, transformations, outliers, and influential points. Categorical explanatory variables: interaction and analysis of covariance, correlation and partial correlation. Appropriate graphical methods and statistical computing. Analysis of variance for one- and two-factor models: F tests, assumption checking, multiple comparisons. Random effects models and variance components. Introduction to repeated measures models.

Final exam required. Formerly known as 142B. Instructor: Lahiff

PB HLTH 150A Introduction to Epidemiology and Human Disease 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** A course in statistics, preferably 142.

This course introduces epidemiological methods with the goal of teaching students to read critically and interpret published epidemiologic studies in humans. The course also exposes students to the epidemiology of diseases and conditions of current public health importance in the United States and internationally.

Final exam required. Formerly known as 150. Instructors: Abrams, Barcellos, Buffler

PB HLTH 150B Introduction to Environmental Health Sciences 3 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 142 and 150A recommended. May be taken concurrently.

The course will present the major human and natural activities that lead to release of hazardous materials into the environment as well as the causal links between chemical, physical, and biological hazards in the environment and their impact on human health. The basic principles of toxicology will be presented including dose-response relationships, absorption, distribution, metabolism, and excretion of chemicals. The overall role of environmental risks in the pattern of human disease, both nationally and internationally, will be covered. The engineering and policy strategies, including risk assessment, used to evaluate and control these risks will be introduced.

Final exam required. Formerly known as second half of 150. Instructor: K. Smith

PB HLTH 150D Introduction to Health Policy and Management 3 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of lecture/discussion per week for 8 weeks. 3 hours of lecture/discussion per week.

This course is intended to introduce students to health policy making and health care organizations in the United States. Students will be introduced to concepts from public policy, economics, organizational behavior, and political science. Students will also be introduced to current issues in U.S. health policy and the present organization of the U.S. health care system.

Final exam required. Instructor: Halpin

PB HLTH 150E Introduction to Community Health and Human Development 3 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** Third or fourth undergraduate standing or consent of instructor.

This course will consist of a survey of the major social, cultural, and bio-behavioral patterns of health and well-being among individuals, families, neighborhoods, and communities. The course also will address the design, implementation, and evaluation of leading social and behavioral interventions and social policies designed to improve community and population health. This course will satisfy one of the core requirements for the undergraduate major in public health.

Satisfies the American Cultures requirement

Final exam required. Instructor: Satariano

PB HLTH C155/SOCIOL C115 Sociology of Health and Medicine 4 Units**Department:** Public Health; Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 to 8 hours of Lecture per week for 6 weeks.**Prerequisites:** Sociology 1, 3, 3AC or consent of instructor.

This course covers several topics, including distributive justice in health care, the organization and politics of the health system, the correlates of health (by race, sex, class, income), pandemics (e.g., AIDS, Avian Flu and other influenzas, etc.), and the experience of illness and interactions with doctors and the medical system.

Students will receive no credit for C115 after taking 155, C155 or Public Health C155. Final exam required. Formerly known as C155.

PB HLTH C160/ESPM C167 Environmental Health and Development 4 Units**Department:** Public Health; Environ Sci, Policy, and Management**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

The health effects of environmental alterations caused by development programs and other human activities in both developing and developed areas. Case studies will contextualize methodological information and incorporate a global perspective on environmentally mediated diseases in diverse populations. Topics include water management; population change; toxics; energy development; air pollution; climate change; chemical use, etc.

Final exam required. Instructor: Morello-Frosch

PB HLTH 162A Public Health Microbiology 3 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 2 hours of demonstration/discussion/laboratory per week.

Prerequisites: One year each of college-level biology and chemistry. Introduction to properties of microorganisms; their relationships with humans in causing infectious diseases and in maintaining health. With 162L, satisfies most requirements for a laboratory course in microbiology. May be taken without 162L.

Final exam required. Instructors: Buehring, Dailey

PB HLTH 162L Public Health Microbiology Laboratory 1 Unit**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 2 hours of demonstration/discussion/laboratory per week.

Prerequisites: One year each of college-level biology and chemistry. Students must take 162A concurrently or have taken it previously.

Laboratory to accompany 162A.

Final exam required. Instructor: Loretz

PB HLTH 170B Toxicology 3 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Consent of instructor.

Introduction to toxicology covering basic principles, dose-response, toxicity testing, chemical metabolism, mechanisms of toxicity, carcinogenesis, interpretation of toxicological data for risk assessment, and target organ toxicity.

Final exam required. Instructor: M. Smith

PB HLTH 170C Drinking Water and Health 3 Units**Department:** Public Health**Course level:** Undergraduate**Term course may be offered:** Spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.

The course covers monitoring, control and regulatory policy of microbial, chemical and radiological drinking water contaminants. Additional subjects include history and iconography of safe water, communicating risks to water consumers and a bottled water versus tap water taste test as part of the discussion on aesthetic water quality parameters. A field trip to a local water treatment plant is included.

Student Learning Outcomes: By the end of this course, students will be expected to:

Recognize the global occurrence of waterborne contaminants and related health impacts.

Understand water quality monitoring and control of key water quality constituents.

Appreciate the complexities of the regulatory process as it pertains to public drinking water systems in the US and abroad.

Read and synthesize published and unpublished sources of information regarding drinking water and health. Prepare a literature review in journal submission format.

Final term paper. Instructor: Smith

PB HLTH C170B/NUSCTX C119 Advanced Toxicology 3 or 4 Units**Department:** Public Health; Nutritional Sciences and Toxicology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Lecture per week for 15 weeks.**Prerequisites:** Nutritional Sciences and Toxicology 110.

The application of toxicology to answer questions about safety and risk. Using a case-study approach, participants will learn how to interpret toxicological data and apply their knowledge to evaluating the risk presented by exposures to toxic chemicals, including drugs and environmental contaminants. Discussion of current topics of controversy in the field of toxicology.

Final exam required. Instructor: M. Smith

PB HLTH 180 The Evolution of Human Sexuality 2 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

This course is built around an evolutionary perspective of the basis of human mating behavior and explores a variety of topics in human sexuality with the goal of helping us to understand ourselves and to understand and accept the behavior of others. The course takes examples from art, sociology, anatomy, anthropology, physiology, contemporary politics, and history to explore the richness of human sexual behavior and reproduction and the interaction between our biology and our culture.

Final exam required. Instructor: Potts

PB HLTH 181 Poverty and Population 3 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.

Globally one million more births than deaths occur every 112 hours, 90% in the poorest countries. Between 1960 and 1980, considerable attention was focused on rapid population growth. Afterwards, the attention has faded and investment in family planning evaporated. Family size among some of the poorest women is increasing. This course seeks to provide an understanding of the relationships between population growth, poverty, women's autonomy, and health. It explores the political "fashions" underlying changing paradigms among demographers, and economists, and development specialists.

Final exam required. Instructors: Campbell, Potts, Prata

PB HLTH 183 The History of Medicine, Public Health, and the Allied Health Sciences 3 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Prerequisites: Knowledge of (and preferably a college level course which covered) basic aspects of (mammalian) physiology and anatomy. Graduate or upper division undergraduate status.

This course will examine the historical developments of social and scientific responses to human disease from their beginnings to their current roles as major forces in modern society. It will consider the evolution of diagnoses, treatment, and prevention of human morbidity and death from both a humanistic and scientific perspective. It invites pre-medical, pre-dental, and other students preparing for careers in public health, nursing, optometry, or the other health sciences, students interested in public policy and health-related law, and students of history or the other humanities who wish an overview of medicine and health from a broad historical perspective.

Final exam required. Instructor: Hook

PB HLTH H195A Special Study for Honors Candidates in Public Health 3 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Independent study per week for 15 weeks. 5.5 hours of Independent study per week for 8 weeks. 7.5 hours of Independent study per week for 6 weeks.

Prerequisites: Senior status; 3.3 overall GPA.

Regular individual meetings with a faculty advisor culminating in a thesis at completion of H195B. H195A will concentrate primarily on researching a topic in public health. H195B will concentrate on development and writing up results in the form of a thesis. Students must enroll for both semesters of the sequence.

Final exam not required.

PB HLTH H195B Special Study for Honors Candidates in Public Health 3 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part two of a year long series course. Upon completion, the final grade will be applied to both parts of the series.**Hours and format:** 3 hours of Independent study per week for 15 weeks. 5.5 hours of Independent study per week for 8 weeks. 7.5 hours of Independent study per week for 6 weeks.

Regular individual meetings with a faculty advisor culminating in a thesis at completion of H195B. H195A will concentrate primarily on researching a topic in public health. H195B will concentrate on development and writing up results in the form of a thesis. Students must enroll for both semesters of the sequence.

Final exam not required.

PB HLTH 196 Special Topics in Public Health 1 - 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hour of Lecture per week for 15 weeks.**Prerequisites:** Upper division standing.

Special topics in various fields of Public Health. Topics covered will vary from semester to semester and will be announced at the beginning of each term.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

PB HLTH 197 Field Study in Public Health 1 - 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Independent study per week for 15 weeks.**Prerequisites:** Upper division standing.

Supervised experience relevant to specific aspects of public health in off-campus organizations. Regular individual meetings with faculty sponsor and written reports required.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PB HLTH 198 Directed Group Study 1 - 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Directed group study per week for 15 weeks. 1 to 4 hour of Directed group study per week for 8 weeks. 1 to 4 hour of Directed group study per week for 6 weeks.**Prerequisites:** Upper division standing.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PB HLTH 199 Supervised Independent Study and Research 1 - 4 Units**Department:** Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Independent study per week for 15 weeks. 1 to 4 hour of Independent study per week for 8 weeks. 1 to 4 hour of Independent study per week for 6 weeks.

Enrollment restrictions apply; see the Introduction to Courses and Curricula section of this catalog.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PB HLTH 200A Current issues in Public Health Ethics: Research and Practice 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing.

This course seeks to examine the ethical challenges inherent in public health practice, research, and policy. It covers a range of topics in ethics through cases representative of different public health dilemmas. The cases considered include treating homeless people with TB, rationing medical care in the United States, conducting HIV studies of maternal-fetal transmission in Africa, managed care policies and setting priorities, the deaf community and cochlear implants, and the societal implications of genetic information. The goal is to enable students to develop an analytical methodology that has practical application for their future work. Final exam not required. Instructor: Halpern

PB HLTH 200C Public Health Core Breadth Seminar 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture per week plus optional 45-minute discussion.**Prerequisites:** Graduate standing.

This course is designed to provide students with a brief introduction to the field of public health and a basic understanding of the contributions of the environmental, behavioral, and management and policy sciences to the practice of public health. Central foci of the course include the interactions of biology, behavior and environment; the community and population-based nature of public health; health disparities; the relationships among health care access, cost and quality of care; the performance of the health care delivery system; the concepts of risk and burden of disease; the importance of ecological and life course perspectives; and theory- and evidence-based public health research and practice. By the conclusion of this course, students will be able to discuss and describe seminal concepts and approaches, as well as current theories and methods underlying societal efforts to study and address key public health problems.

Final exam not required. Instructors: Minkler, Shortell, Smith

PB HLTH 200C1 Health Policy and Management Breadth Course 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of web-based lecture.

Health policy and management applies concepts from economics, organizational behavior, and political science to the structure, financing, and regulation of the public health and health care delivery systems.

This breadth course is designed to give MPH students a basic set of competencies in the domains central to the field.

Final exam required. Instructor: Robinson

PB HLTH 200C2 Environmental Health Sciences Breadth Course 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of web-based lecture.

This course will give an introduction to the major human and natural activities that lead to release of hazardous materials into the environment as well as the causal links between chemical, physical, and biological hazards in the environment and their impact on human health, including those related to climate change. The basic principles of toxicology, exposure assessment, risk assessment, risk perception, and environmental health policy will be presented. The overall role of environmental risks in the pattern of human disease, both nationally and internationally, will be covered.

Final exam not required. Instructors: Bates, K. Smith

PB HLTH 200C3 Health and Social Behavior Breadth 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

Health and social behavior uses theory and research from the behavioral sciences to explain the causes and health effects of salutary and risky behavior.

Final exam not required. Instructor: Catalano

PB HLTH 200D Applied Public Health: Putting Theory Into Practice 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** 142, 200C, and 250A.

This course trains students in applied public health through discussion, lectures, guest speakers, cases, and field trips. Students integrate learning from previous courses with work experience. Cases emphasize current national/global public health issues and practice. At course completion, students will be able to: Demonstrate the capacity to identify, research, and respond to real-life public health challenges; work effectively and efficiently in problem-solving groups; professionally present the results of their effort to large groups for feedback and evaluation.

Final exam not required. Instructors: Braff, Rundall, Winkelstein

PB HLTH W200E Health Policy and Management Breadth Course 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of web-based lecture per week for 5 weeks, 8 hours of lecture per week for 1 week. 4 hours of web-based lecture per week for 5 weeks and 8 hours of lecture per week for 1 week. This is an online course.

Health policy and management applies concepts from economics, organizational behavior, and political science to the structure, financing, and regulation of the public health and health care delivery systems.

This breadth course is designed to give MPH students a basic set of competencies in the domains central to the field.

Final exam not required. Instructor: Fulton

PB HLTH W200F Environmental Health Sciences Breadth Course 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of web-based lecture per week for 7 weeks.

This is an online course.

This survey course covers the breadth of hazards from chemical, biological, and physical agents of concern to environmental health professionals. Lectures are presented by experts on particular topics that emphasize the activities involved in professional practice.

Final exam not required. Instructor: K. Smith

PB HLTH W200G Health and Social Behavior Breadth 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of web-based lecture per week for 7 weeks.

This is an online course.

Health and social behavior uses theory and research from the behavioral sciences to explain the causes and health effects of salutary and risky behavior.

Final exam not required. Instructor: Chang

PB HLTH 201E Public Health Interventions: Theory, Practice, and Research 2 or 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Previous experience with health interventions and doctoral student status or consent of instructor.

This course focuses on the primary factors that affect health and the interventions that can promote health. Students examine the determinants of health and the theory, history, types, ethics, and approaches of public health interventions. Community level interventions and multidisciplinary approaches receive special emphasis. The course stresses a rigorous critique of the outcomes of interventions and practical ways to improve them. Students take an active role in the design and conduct of the course.

Final exam not required. Instructors: Neuhauser, Syme

PB HLTH 201F Community-Based Research and Interventions to Promote Health: Theory and Methods 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing.

This course will delve into theoretical, methodological, and practical considerations in conducting physical and mental health interventions in diverse communities. Course emphases are: a) conceptualization and implementation of community interventions within ecological models and principles; b) logic models of intervention process and outcomes; c) comparing and integrating prevention science and community-based participatory approaches to intervention; d) strategies and challenges in replicating and diffusing community-based interventions across diverse settings; and e) cultural competency in community intervention development.

Final exam not required. Instructor: Ozer

PB HLTH 202B Ethnic and Cultural Diversity in Health Status and Behavior 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

Focus on ethnic and cultural diversity in health behavior as a basis for public health programs. Consideration of U.S. ethnic minority groups and cultural groups in non-Western societies. Health status and behavior examined in context of relevant social and anthropological theory (social class, acculturation, political economy). Influence of socio-cultural background on concepts of health, illness, and health-seeking behavior. Implications for planning public health programs and policies.

Final exam not required. Instructor: Herd

PB HLTH C202B/ESPM C254 Ethnic and Cultural Diversity in Health Status 3 Units**Department:** Public Health; Environ Sci, Policy, and Management**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Focus on ethnic and cultural diversity in health behavior as a basis for public health programs. Consideration of U.S. ethnic minority groups and cultural groups in non-Western societies. Health status and behavior examined in context of relevant social and anthropological theory (social class, acculturation, political economy). Influence of socio-cultural background on concepts of health, illness, and health-seeking behavior. Implications for planning public health programs and policies.

Final exam not required. Instructor: Morello-Frosch

PB HLTH 202G Advanced Alcohol Research Seminar 1 Unit**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

This course is an advanced alcohol research seminar in which presentations are made by alcohol research scientists nationally and internationally, as well as pre-and post-doctoral fellows, and focus on special topical areas related to psychosocial research in the field each semester. Areas covered include the epidemiology of drinking patterns and alcohol-related problems, issues related to treatment of alcohol-related problems, and health services research. Guest presentations are also provided (related to topics outside psychosocial research) to provide a breadth of understanding in the field. The seminar also includes sessions focused on methodological issues in alcohol-related research and grant writing, and has a research ethics component covering a number of sessions.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructors: Cherpitel, Kaskutas

PB HLTH W202 Ethnic and Cultural Diversity in Health Status 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of web-based lecture per week for 7 weeks. This is an online course.

This course will examine ethnic and cultural differences in health status and behavior among historically marginalized communities in the United States, including African-Americans, Latinos, Asian-Americans, Native Americans, as well as sexual minorities and groups from non-Western societies.

Final exam not required. Instructor: Morello-Frosch

PB HLTH 203A Theories of Health and Social Behavior 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Background in social and behavioral sciences. Consent of instructor.

This course provides a survey of theoretical perspectives and their application in analyzing the behavioral, social, and cultural dimensions of community health problems. An emphasis is placed on critically examining the strengths and weaknesses of particular theories for understanding and addressing complex community health problems.

Final exam not required. Instructor: Holmes

PB HLTH 204A Mass Communications in Public Health 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** Graduate standing or consent of instructor.

Examines the role of mass communication in advancing public health goals. Reviews mass media theories in general, and theories of the news media in particular. Provides an in-depth understanding of media advocacy as a strategy for using news media and paid advertising to support policy initiatives at the local, state, and federal levels. Examples are drawn from a wide range of public health issues.

Final exam not required.

PB HLTH 204D Community Organizing and Community Building for Health 3 or 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

This course emphasizes community organizing and community building as major approaches to creating healthy communities and fostering broader social change. It further examines the role of public health practitioners as change agents, stressing in particular the values and ethical issues that arise within the context of diverse and multicultural communities. Both advancement of theoretical knowledge and the development of skills in applying such knowledge in the areas of community organizing and community building will be stressed. This is a Service Learning Course, and students wishing to undertake a concurrent field project can earn an additional optional unit of credit.

Final exam not required. Instructor: Minkler

PB HLTH 204F Culture, Public Health Practice, and Eliminating Health Disparities: From Ideas to Action in the 21st Century 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** Graduate students in Public Health or by consent of instructor.

Public health literature and practice make frequent reference to the terms culture, cultural competence, race, racism, ethnicity, and health disparities. Understanding these terms, their complex meanings and current application in public health practice is the subject matter of this course. By the end of the course students will be able to describe the concepts of culture, race, racism, ethnicity, cultural competence, cultural humility, health disparities and their use in public health theory and practice; identify and describe the application of these concepts in local public health practice; and demonstrate an understanding of these concepts and their application in public health practice through the completion of a group project.

Final exam not required. Instructor: Nazeeri-Simmons

PB HLTH 204G Research Advances in Health Disparities: Multidisciplinary Perspectives 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

A critical overview of major theories and research findings on health disparities from a multidisciplinary perspective. It will focus on applying major theoretical approaches from Public Health, Anthropology, Social Welfare, and other disciplines to understand and address health disparities. These approaches include social determinants of health, lifecourse perspectives, health as a human right, stress and bio-social perspectives, social construction of disease, and healthcare access and quality.

Final exam not required. Instructor: Herd

PB HLTH W204 Mass Communication in Public Health 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of web-based lecture per week for 5 weeks and 30 hours of lecture for 1 week. 6 hours of web-based lecture per week for 5 weeks and 30 hours of lecture per week for 1 week. This is an online course.

The purpose of this course is to provide students with an understanding of how the media can be used to promote healthy public policy. The primary focus of the course is on "media advocacy." Students will learn how to frame issues from a public health perspective. In learning more about how the media operate, they will be better equipped to work effectively with journalists.

Final exam not required. Instructor: Dorfman

PB HLTH 205 Program Planning, Development, and Evaluation 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** Public health students.

Basic elements and considerations in planning health programs; case material will be drawn from health settings, with emphasis on multidisciplinary planning. Assessment of problems, setting goals and objectives, designing activities, implementation and evaluation.

Final exam not required.

PB HLTH W205 Program Planning, Development, and Evaluation 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of web-based lecture per week for 7 weeks. This is an online course.

The purpose of this course is to provide students with the necessary skills to plan health programs. We will examine the principles and methods underlying program planning. Multi-disciplinary, collaborative planning will be emphasized. Program planning applications will be emphasized throughout the course by using case studies, specific illustrations, and online planning exercises.

Final exam not required. Instructor: Dublin

PB HLTH 206 PH Nutrition Core Course: Critical Issues in Public Health Nutrition 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.**Prerequisites:** Master of Public Health students.

This course will introduce first-year public health nutrition and other MPH students to critical issues in public health nutrition, and provide them with critical thinking skills to analyze these issues using scientific literature. Students will build group facilitation skills, library research skills, and professional advocacy skills. Second-year public health nutrition students and a panel of PHN graduates will speak to the students about valuable skills and competencies needed for work in public health nutrition. Final exam not required. Instructor: Fernald

PB HLTH 206A Nutrition Status, Physical Activity, and Chronic Conditions 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week. 2 hours of lecture/discussion per week. 15 hours of lecture/discussion per week. 15 hours of lecture/discussion per week. 2 hours of lecture/discussion per week.**Prerequisites:** Graduate standing or consent of instructor.

Concepts, methods, and limitations in the determination of nutritional status; application of methodologies for determining and interpreting data; technical, social, and political implications of nutritional assessments and related community needs.

Final exam not required. Instructor: Laraia

PB HLTH 206B Food and Nutrition Policies and Programs 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week. 15 hours of lecture/discussion per week for 3 weeks. 15 hours of lecture/discussion per week for 3 weeks. 3 hours of lecture/discussion per week.**Prerequisites:** Graduate standing or consent of instructor.

This course examines the historical origins of food and nutrition improvement programs in the United States, including the political and administrative conditions that led to the development of these programs. It also examines the goals, design, operations, and effectiveness of some of these programs: Food Stamp Program, the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC), the National School Lunch Program, the School Breakfast Program, Head Start, the Child Care Food Program, and the Elderly Nutrition Program.

Final exam required. Instructor: Fernald

PB HLTH 206C Nutritional Epidemiology 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours of lecture/discussion per week for 3 weeks. 15 hours of lecture/discussion per week for 3 weeks.

This course develops the ability to read published nutritional epidemiology research critically. Basic research methods in nutritional epidemiology will be reviewed, and issues in design, analysis, and interpretation unique to nutritional epidemiology will be addressed. This will be accomplished by readings and study questions, lecture/discussions, and problem sets. Final exam not required. Instructor: Block

PB HLTH 206D Food and Nutrition Programs and Policies in Developing Countries 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.**Prerequisites:** Graduate standing or consent of instructor.

This course will use a case-based approach to examine the ways in which governments in developing countries design and implement policies and programs that affect food production and access to safe, affordable, and nutritionally adequate diets. In the course we will analyze, assess and evaluate ways to take action to ameliorate the major nutritional problems facing vulnerable populations in developing countries. Final exam not required. Instructor: Fernald

PB HLTH 207A Public Health Aspects of Maternal and Child Nutrition 2 or 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.**Prerequisites:** Course in epidemiology required; previous coursework in biology and nutritional science highly recommended.

Nutrition plays a vital role in human reproduction and child growth and development. This course provides an overview of the major nutritional issues faced by women of childbearing age, infants, children, and adolescents in the United States and around the world, with selected topics explored in greater depth. Nutritional problems are multi-factorial and occur at multiple levels and we will study them from a variety of viewpoints (biological, psychological, socio-cultural, economic, political, and behavioral) as well as from individual and population perspectives. Participants in the course will become acquainted with nutritional research, policies, and interventions designed to enhance reproduction, growth, and development. This course will also explore health disparities in maternal and child nutrition in both a domestic and international context.

Final exam required. Instructor: Abrams

PB HLTH 208A Public Health Aspects of Nutritional Care: In Hospital Setting 5 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 8 hours of lecture/discussion and 32 hours of laboratory per week for 10 weeks.**Prerequisites:** Admission to MPH Nutrition Internship and Nutritional Science 161, Nutritional Science 161L or equivalent.

The nutritional care of people with major diseases is reviewed, observed, and practiced in various Bay Area hospitals. Current nutritional therapies of heart disease, cancer, diabetes, renal diseases, liver diseases, gastrointestinal disorders, and trauma are reviewed. The organization and delivery of nutritional care services in hospital settings. Final exam not required.

PB HLTH 208B Public Health Aspects of Nutritional Care: In Selected Facilities 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of lecture/discussion and 8 hours of fieldwork per week.**Prerequisites:** Completion of 208A or consent of instructor.

The organization and delivery of nutrition care services facilities such as health departments, ambulatory health care settings, child care and education facilities, skilled nursing facilities, and senior nutrition programs. Included are nutrition education and counseling, food service, nutrition assessments, consultation, and training.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Social and Administrative Health Sciences 256B.

PB HLTH 210 Maternal and Child Health Specialty Area Core Course 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

The core course in maternal and child health will provide an integrated approach to issues, programs, and policies in the field of maternal and child health. The following concepts will be explored and addressed in depth: 1) the foundation of maternal and child health, including an overview of the field, history, and foundation of MCH practice and programs, and attention to financing of these programs; 2) MCH data sources, uses of data, and related issues; and 3) policies and practices in MCH (including discussions with community professionals to address practical problems, public policy concerns, current issues in MCH, and current research in MCH). In addition, major health problems facing women, children, and adolescents will be explored, including how and why these are distributed in these populations.

Final exam not required. Instructor: Pies

PB HLTH 210B Adolescent Health 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** Graduate standing.

This course is designed to provide an understanding of the epidemiology and etiology of critical health issues among adolescents, including complex contextual influences and individual processes related to this dynamic period of life. Each adolescent health outcome will be considered in light of developmental issues related to the pubertal transition and multilevel influences that contribute to adolescent health and well-being, including 1) biological, 2) cognitive, 3) behavioral, and 4) social-culture factors. The course will emphasize: empirical evidence for the etiology of adolescent health problems, documented risk and protective factors, and content and timing of preventive intervention efforts to ameliorate risk. Final exam not required. Instructor: Deardorff

PB HLTH 210C Needs Assessment in Maternal and Child Health 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of seminar/discussion per week.**Prerequisites:** Graduate student in Public Health.

The purpose of this course is to provide a conceptual and practical understanding of health needs and the strategies that can be used for conducting needs assessments in maternal and child health. The course is aimed at students who anticipate working in situations that involve measuring health problems in communities, planning for health services, and advocating or making decisions about the distribution of community health resources.

Course may be repeated for credit when topic changes. Final exam required. Formerly known as 210B. Instructor: Guendelman

PB HLTH 210D Reproductive and Perinatal Epidemiology 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing in epidemiology or consent of instructor.

Research methods and issues in perinatal and reproductive epidemiology with emphasis on methods of study. Specific adverse reproductive outcomes, risk factors, and prevalence will be discussed. Will include critiques of published studies and techniques of proposal writing. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Eskenazi

PB HLTH 212A International Maternal and Child Health 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.**Prerequisites:** Graduate standing or consent of instructor.

Assessment of health status of mothers, infants, and children on worldwide basis; special emphasis on problems, policies, and programs affecting MCH and family planning in developing countries.

Final exam required. Instructor: Miller

PB HLTH 212C Migration and Health: A U.S.-Mexico Binational Perspective 2 - 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Building upon expertise on migration from Mexico to the U.S., the goal of this course is to strengthen students' knowledge and understanding of public health issues of immigrants and the effects that migration has on the health/disease issues of communities in the countries of origin, transit, and destination. Students will explore successful public health intervention programs targeting these populations.

Final exam not required. Instructor: Guendelman

PB HLTH 212D Global Health Core Course 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Qualified seniors may enroll with prior consent of instructor.

This is a graduate level survey course on selected topics in international health designed to introduce students to key areas of the specialty. The course will review the main contributors to the global burden of disease and discuss current interventions and possible approaches for the future. The primary goal of the course is to transfer knowledge and experiences that will prepare public health students to evaluate international health projects and better prepare themselves for international health work. The focus is on developing countries with the most challenging large-scale health problems, where physical and systems infrastructure as well as human resources are poorly developed. The course provides students with the tools to make their own assessments. Complex ethical and political issues pervading this field will also be addressed throughout the course.

Final exam not required. Instructors: Campbell, Hosang, Potts, Prata, Walsh

PB HLTH 212E Private Sector Health Services in Developing Countries 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing.

This course will serve students intending to conduct research, policy work, or program implementation in health services in developing countries.

Topics covered will include definition and typology of private sector in various countries, theories of private sector regulation, motivation, and research. Methodological and practical issues in measuring provider importance, quality, and in influencing the activities of actors in private health delivery will be explored from viewpoints of both research and programmatic intervention.

Final exam not required. Instructors: Montagu, Prata

PB HLTH 213A Family Planning, Population Change, and Health 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** Graduate standing or consent of instructor.

Course examines the determinants of family size and the role played by contraception, voluntary sterilization, and induced abortion in the transition to small families. It looks at the factors controlling access to fertility regulation in developed and developing countries and discusses the factors that have made for successful family programs as well as those that have generated controversy. The course looks at the relationship between family planning and the health of women and children and at the role of family size in economic development and environmental problems. It looks at advances in family planning, organization, and promotion of services and discusses ethical issues facing providers.

Final exam required. Instructors: Campbell, Potts, Prata

PB HLTH 216A Biological Embedding of Social Factors 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

This is an interdisciplinary course which will adopt a broad-based ecological perspective of health and behavior. This class will emphasize the interconnected and multidirectional relationships between biology, behavior, and the social environment. This course will be conducted as a seminar series (with a focus on biological processes). We will investigate the assertion that biological, psychological, and social processes interact over a lifetime to influence health and vulnerability to disease (a developmental epigenetic perspective). Rather than focusing on "if" social factors can influence health and disease we will focus on "how" social factors may regulate/change biological measures. Three very general themes will be addressed: development, "social" neuroscience and gene-environment interactions as they relate to behavior. Topics such as constraints/plasticity and behavior, genetic determinism, vulnerability versus resilience, gene-environment interactions, fetal/developmental programming, and stress will all be touched upon.

Final exam not required. Instructor: Francis

PB HLTH 217C Aging and Public Health 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

The purpose of this course is to provide an overview of research, practice, and policy in the area of aging and public health. Topics will include the epidemiology of aging; race, class, gender, and aging; nutrition and the elderly; and current health policy surrounding aging. Themes running throughout the course and linking a number of the topics covered will include the diversity of the elderly; the importance of co-morbidity and functional health status in this population group; the family and broader environmental contexts in which aging takes place; and the influence of public and private sector policies on health and health-related behavior in the elderly. Weekly lectures by the faculty will be complemented by presentations by prominent Bay Area researchers in the areas of geriatrics and gerontology. This is the core course for the School of Public Health specialty in aging and public health.

Final exam not required. Instructor: Satariano

PB HLTH C217D/NEUROSC C217D Biological and Public Health Aspects of Alzheimer's Disease 3 Units**Department:** Public Health; Neuroscience**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of seminar/discussion per week.**Prerequisites:** Graduate standing or consent of instructor.

This course will survey the field of Alzheimer's disease (AD) from a biological and public health perspective by reading original research papers in the fields of medicine, neuroscience, and epidemiology. The course will begin with a historical survey of the concept of AD, followed by a description of clinical and neuropathological features. Subsequent classes will cover the genetics and molecular biology of the disease, as well as biomarkers, epidemiology, risk factors, treatment, development of new diagnostic approaches, and ethical issues. The course will also serve as a model for the analysis of complex diseases with multiple genetic and environmental causes, and late onset neurodegenerative diseases. The course will also serve as a model for the analysis of complex diseases with multiple genetic and environmental causes and late-onset neurodegenerative disease.

Final exam not required. Instructor: Jagust

PB HLTH 218B Evaluation of Health and Social Programs 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.

The study of concepts, methods, rationale, and uses of evaluation research as they apply to health and social programs.

Final exam not required.

PB HLTH W218 Evaluation of Health and Social Programs 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of web-based lecture per week for 7 weeks. This is an online course.

This course provides an overview of the concepts and methods of program evaluation. The course will be useful to those concerned with evaluation of health and social service programs. Participants will develop the critical skills necessary to assess the quality of evaluation research projects, to apply technical skills in professional practice, and to develop evaluation plans for a variety of health and social programs.

Final exam not required. Instructor: Paleo

PB HLTH 219A Advanced Methods: Qualitative Research 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** Doctoral student in public health or a related discipline, or consent of instructor.

An overview of the theoretical and methodological components involved in various aspects of qualitative research.

Final exam required.

PB HLTH 219C Community-Based Participatory Research in Public Health 3 - 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.

The goal of this seminar is to provide doctoral and advanced master's degree students with an understanding of theories, principles, and strategies of community-based participatory research (CBPR) and related traditions. The advantages and limitations of this approach, skills necessary for effective application, and theory-driven case studies will be explored. Students undertaking a service-learning project applying CBPR may receive a 4th unit.

Final exam not required. Instructor: Minkler

PB HLTH 219D Social and Behavioral Health Research: Introduction to Survey Methods 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course provides students with a thorough tool kit for designing survey questionnaires and for implementing telephone, face-to-face, and mail surveys. The three-hour weekly class sessions are designed to convey practical knowledge, with a case study approach used to complement each topical lecture. An SPSS laboratory is also given each semester. The course is an elective for Health and Social Behavior students, and many from the multidisciplinary program and other tracks in the school (including UCSF, e.g., nurses in their Ph.D. programs) have often enrolled as well. By the end of the semester, students will have designed, as their class project, a research project including a study design rationale, aims and hypotheses, data collection methods and measures, human subjects consent form, codebook and analysis plan.

Final exam not required. Instructor: Karriker-Jaffe

PB HLTH 219E Introduction to Qualitative Methods in Public Health Research 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

This course is designed to familiarize students who have little or no experience in conducting qualitative research with the perspectives, methods, and techniques of a vast and contentious tradition of research. The course will cover some of the methods of data collections used in the conduct of qualitative inquiries, the analysis of textual data, the write-up of findings from qualitative studies, and the development of a qualitative research proposal. While learning about qualitative methods, students will gain an understanding of the qualitative research literature on a topic of their choice, as well as how to integrate findings from a variety of qualitative studies on a research question of topic.

Final exam not required. Instructor: Miller

PB HLTH W219 Social and Behavioral Health Research: Introduction to Survey Methods 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of web-based lecture per week for 7 weeks. This is an online course.

This course provides students with a thorough tool kit for designing survey questionnaires and for implementing telephone, face-to-face, mail, and internet surveys. The two three-hour, weekly class sessions are designed to convey practical knowledge with a case study approach used to complement the topical lectures. An SPSS laboratory also is given each semester.

Final exam not required. Instructor: Karriker-Jaffe

PB HLTH 220 Health Policy Decision-Making 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussions per week.

Introduction to federal-level health policy and analysis of government capacity in addressing major issues in health policy. The course explores structural impediments to reform in the US, regulatory decision-making -- particularly decision-making under conditions of uncertainty, and basic tools of policy analysis. Students will apply these tools in a seminar paper that analyzes a proposed or existing health policy or program.

Final exam required. Instructor: Sentell

PB HLTH 220C Health Risk Assessment, Regulation, and Policy 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks.**Prerequisites:** 250A, 270A-270B recommended. Graduate standing.

This course introduces the basic scientific components of environmental and occupational health risk assessment and describes the policy context in which decisions to manage environmental health risks are made. The course presents the quantitative methods used to assess the human health risks associated with exposure to toxic chemicals, focusing on the four major components of risk assessment: hazard identification, dose-response assessment, exposure assessment, and risk characterization. Students use these tools to develop their own risk assessment for an environmental health problem. The course also provides a broad overview of occupational and environmental health regulations with consideration of how hazard, risk, cost, and benefits are considered. Current political controversies about environmental policy will be examined.

Final exam not required. Instructors: Hammond, McKone

PB HLTH 220D Health Policy Advocacy 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** Graduate standing or consent of instructor.

A graduate seminar in practice-based means to advocate for health policy. This course focuses on data based strategies using persuasive written and oral communication skills necessary to preserve and/or improve the health status of populations. Students will develop research, organization, and coalition-building skills necessary to produce an effective advocacy campaign. The course identifies the roles of those involved in the making of policy and demonstrates the use of appropriate channels and technologies to influence health policy change.

Final exam not required. Instructor: Snyder

PB HLTH 220E Global Health Policy 2 or 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** Graduate standing.

This course will provide an intensive introduction to current topics in international health policy. Students in the course will become familiar with the major actors, institutions, and regimes that shape international health policy. The course will also introduce students to theories of governance as they apply to international settings and evaluate the relative roles of state actors, NGOs, and international regimes in producing key health policy outcomes. The course will cover several current issues in international health and will require students to critically assess the state of policy with respect to these issues. Using Bardach's method for policy analysis, students will analyze current policies and propose policy alternatives with an assessment of the tradeoffs implied in choosing a given policy option over its competitors.

Final exam not required. Instructor: Keller

PB HLTH 220F Health Workforce and Public Policy 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.**Prerequisites:** Graduate standing.

This course focuses on three interrelated issues: How do we determine when we have too many or too few health care workers to provide high quality and cost effective care? What are the factors that determine the supply and distribution of health care workers? What are the methods that can be used to increase the performance and productivity of health care workers? We will review recent evidence on the supply, quality, and cost of the health workforce in California, the U.S., and globally. Approaches to the public and private financing of medical education will also be analyzed. This course is taught in a seminar format with lectures, visiting speakers, and student presentations.

Final exam not required. Instructor: Scheffler

PB HLTH 220G Politics, Policy, and Democracy in Environmental Health 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

This course provides an intensive introduction to environmental health policy in the United States and emphasizes the respective roles of science, policy, and politics in shaping environmental health protection. Students who complete this course will understand the basic tools for gaining policy leverage over environmental health problems and be able to critically assess the capacity of public institutions to address key environmental health issues.

Final exam not required. Instructor: Keller

PB HLTH 221 Mental Health Policies, Programs, and Services 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.**Prerequisites:** Graduate standing or consent of instructor.

This course provides a foundation for understanding mental illness and mental health services and the evolution and current state of our thinking about them. It presents the most frequent varieties of mental illness and addresses their frequency of occurrence, and it addresses the social disability from mental illness and the societal response to mental illness. It also considers treatments, services, effectiveness, quality of care, and financing, as well as considering financing, legal issues, and special concerns and services for children and youth. In addition, the course provides a forum to critically examine the knowledge base on mental illness, epidemiology, policies, programs, and services as it presents major controversies and highlights the best available evidence. Final exam not required. Instructor: Snowden

PB HLTH 221B Understanding and Overcoming Health Care Disparities 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.**Prerequisites:** Graduate standing or consent of instructor.

In this class, we will construct a framework to formulate explanations for health care disparities and to construct responses that have the potential for a policy-oriented, and therefore widespread, response. Taking advantage of selected developments in social science theory and research that can provide insight into how health care disparities come about, we will draw from anthropological and psychological theories of cultural orientation, cultural framing of problems, and cultural identity; as well as drawing from psychological theories of stress and coping. We also will draw from sociological theories of individual and community poverty, and theories characterizing health care system design and service delivery.

Final exam not required. Instructor: Snowden

PB HLTH 222A Health Care Technology Policy 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

The course examines the public policy institutions and processes influencing innovation, regulation, and payment for biotechnology, pharmaceuticals, and medical devices. Topics include technology transfer and patent law, the Food and Drug Administration (FDA) review for safety and efficacy, insurance coverage policy at the Center for Medicare and Medicaid Services (CMS), coverage, payment, and benefit by private insurers for new technology, and cost-effectiveness analysis. Special topics vary from year to year. Examples and case studies are drawn from all three of the technology sectors.

Final exam not required. Instructor: Robinson

PB HLTH 222B Health Care Technology Strategy 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

This class will familiarize the student with core principles and case examples of strategic decision-making related to the development, pricing, distribution and purchasing of biomedical technologies such as biopharmaceuticals and implantable medical devices. We will consider the perspectives of product developers/manufacturers, investors, and purchasers/users (e.g., insurers, hospitals).

Final exam not required. Instructor: Robinson

PB HLTH 223A Introduction to the Health Care System 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

An intensive introduction that will provide students with an understanding of the structure, financing, and special properties of health services delivery. The course will analyze the larger management and policy issues that drive reform efforts.

Final exam not required. Instructor: Raube

PB HLTH 223B Cases in Health Management 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** Graduate standing or consent of instructor.

This is an advanced course in health management. It is intended for master's degree students in the Division of Health Policy and Management who have already completed their field residency. The course consists of analyses and discussions of cases highlighting complex managerial issues in health care delivery, E-health, biotechnology, and other health-related organizations. The cases used in the class will provide the student with real-world management problems, choices, and information. The key task for the student is to develop solutions to problems and propose actions using the information in the case. The case discussions will draw on the student's knowledge of health organizations and current health policies and the skills the student has acquired in operational management, strategic management, ethical analysis, health politics and policy analysis, and interpersonal communication.

Final exam not required. Instructor: Rundall

PB HLTH 223C Strategic Management and the Organization of Health Services 2 or 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture and additional group work.**Prerequisites:** Business Administration 205 or 224A and 223A or consent of instructor. Students are required to have a general background knowledge of the health services system.

The overall purpose of this course is to assist the student in managing health care organizations from a strategic perspective. This is accomplished by systematically addressing systemwide, organization-wide, group- and individual-level issues in strategy formulation, content, implementation, and performance. Emphasis is placed upon the manager's role in simultaneously taking into account a wide variety of internal and external factors to improve organization and system performance in meeting the health needs of individuals and communities. Emphasis is also placed on the development and implementation of strategies to meet multiple stakeholder demands, with particular attention given to continuous quality improvement/total quality management approaches. The course will cover a wide variety of health care organizations including physician group practices, health systems, hospitals, HMOs, suppliers, pharmaceutical and biotech companies. The course builds on Business Administration 205: Organizational Behavior and 223A: Medical Care Organization.

Final exam not required. Instructors: Shortell, Oxendine

PB HLTH 223D Foundations of Health Policy and Management 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.**Prerequisites:** Graduate standing in Health Policy and Management or consent of instructor.

This course is designed as a first semester seminar for master's students in the Division of Health Policy and Management. The purposes of this course are fourfold: 1) to provide an overview of the U.S. medical and health care systems; 2) to provide an introduction to basic concepts and competencies in health policy analysis and health management; 3) to provide internship preparation and career development activities; and 4) to provide opportunities to develop relationships with 1st- and 2nd-year HPM students and with faculty, alumni, and healthcare leaders.

Final exam not required. Instructors: Oxendine, Solomon

PB HLTH 223E Capstone Seminar in Health Policy and Management 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate standing in HPM and completion of 297 internship.

This course is an integrative seminar that builds on the core curriculum requirements of the school and HPM specialty. Participants are master's degree students advancing to candidacy. After sharing their internship experiences and the impact on career decisions, the students are required to draw on situations from their internship to demonstrate what they have learned by leading fellow seminar participants in facilitated discussions, culminating in a specific management recommendation or policy position. Students will gain exposure to a range of HPM issues based on the experiences of their peers. Each student is also required to produce a 20-page paper and prepare and deliver a formal presentation to seminar participants and invited faculty. The paper will address an HPM topic of interest that has been selected by the student and approved by the course faculty and the student's academic advisor. Suggested formats for the paper are a policy or strategic management analysis, but other options may be proposed and approved by the instructor.

Final exam not required. Instructor: Solomon

PB HLTH 223F Effective Public Health Negotiations 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/practice per week.

The ability to secure enduring agreements is an essential skill for a successful public health leader. This course integrates lecture and experiential components to expose students to major theories and specific tactics that underlie effective negotiating. It offers the opportunity to develop the skills needed to build awareness of personal styles. Students will be evaluated on their understanding of relevant theory and their ability to apply it in individual and team-based negotiations.

Final exam not required. Instructors: MacPherson, Oxendine

PB HLTH W223 Strategic Management and the Health Sector 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Web-based lecture per week for 7 weeks.

This is an online course.

The overall purpose of this course is to assist the student in managing healthcare organizations from a strategic perspective. This is accomplished by systemically addressing systemwide, organization-wide, group- and individual-level issues in strategy formulation, content, implementation, and performance. The course will cover a wide variety of health care organizations including physician group practices, health systems, hospitals, HMOs, suppliers, pharmaceutical and biotech companies.

Final exam not required. Instructor: Shortell

PB HLTH 224A Health Care Organizations and Management 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** Graduate standing or consent of instructor.

Introduction to health administration, focusing on theories of management, organizations, and environments as they relate to the administration of health services. Cases, simulation, and structured experiences will be used to tie theory to practice.

Final exam not required. Instructor: Bloom

PB HLTH 224C Advanced Health Care Organizations and Environments 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** 224A or consent of instructor.

This course examines major theories and frameworks for analyzing health care organizations. Emphasis is given to the application and testing of theories in the health care sector. Theories to be examined include bureaucracy, contingency theory, culture and climate, resource dependence, institutional theory, and theories of change and innovation. The seminar will rely on extensive student participation.

Final exam not required. Instructor: Bloom

PB HLTH W224 Health Care Organizations and Management 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of web-based lecture per week for 7 weeks. This is an online course.

Today, the health care system consists of a mixture of organizational forms that plan, regulate, and deliver medical care and other health services. The objective of this course is to consider 1) the structure of these organizations and the factors that affect their performance, as well as their growth and decline and 2) the role that health care managers play in the organizations in which they work.

Final exam not required. Instructor: Bloom

PB HLTH 225 Legal Basis for Health Care Delivery 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor. No legal experience or training required.

This is a course for nonlawyers in legal issues in the organization and delivery of health care, including regulation, fraud and abuse, physician arrangements, Medicare, managed care, privacy, malpractice, patient dumping, health care organizations, contracts, etc. Students will gain an appreciation of the interaction of law, policy, and health care delivery. Case studies, including an extended contract negotiation and medical-legal cases, will focus on the application and communication of legal principles in complex but common health care decision-making situations. Final exam required. Instructor: Lipman

PB HLTH 226A Health Economics 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1.5 hours of Discussion per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

This course introduces students to the economics of health and health care. In addition to familiarizing students with the language and tools of health economics, the course will provide an overview of key institutional features of the health economy as well as important research findings in the field. These will be used to evaluate the economic logic and incentives in competing proposals for health care reform.

Final exam required. Instructor: Robinson

PB HLTH 226B Microeconomics of Health Care Policy 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1.5 hours of Discussion per week for 15 weeks.

Prerequisites: A recent graduate course in microeconomics, a second-level undergraduate course in microeconomics, or consent of instructor. An economic and policy analysis of the health care system. It examines integration of the health care delivery system and the impact of competition and regulation on providers and patients. Alternative models of health care system reform are presented and analyzed.

Final exam required. Instructor: Dow

PB HLTH 226C Public Health and the Economy 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

An introduction to the literature that suggests that the performance of a regional economy affects the health of the population it supports. Controversies in the theoretical and empirical literature are discussed. The implications of the work for public health practice are discussed. Final exam required. Instructors: Catalano, Dow

PB HLTH 226D Global Health Economics 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing and knowledge of health policy and consent of instructor.

This class is a survey of different health care systems in western and eastern Europe, the former Soviet Union, Canada, Japan, Taiwan, and China. Other countries will be added to meet the interests of students. The course examines the structure and financing of the health system in each country and assesses the effectiveness, efficacy, and equity of each systems. Students will make a presentation on a country's health system and write a paper.

Final exam not required. Instructor: Scheffler

PB HLTH 227A Health Care Finance 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.**Prerequisites:** Graduate standing.

This course covers finance and strategic financial management in the health services and products industry, including provider organizations, insurance firms, and biopharmaceutical and medical device companies. Cases are used to apply the financial analysis and planning skills learned in the course. Topic areas include financial statement analysis, pricing and service decisions, debt financing, venture capital, and private equity, IPO and public equity markets, risk and return, capital budgeting and project risk assessment, mergers and acquisitions, vertical and horizontal integration.

Final exam not required. Instructors: Robinson, Safer

PB HLTH 227B Advanced Health Care Finance 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.**Prerequisites:** 227A or a master's level course in finance.

This course covers finance and strategic financial management in the health services and products industry, including provider organizations (e.g., hospitals, physician groups), insurance firms, and biopharmaceutical and medical device companies. Cases are used to apply the financial analysis and planning skills learned in the course. Topic areas include financial statement analysis, cost behavior, pricing and service decisions, planning and budgeting, management control, debt and equity financing, risk and return, capital budgeting and project risk assessment, for-profit and non-profit organization, mergers and acquisitions.

Final exam not required. Instructor: Robinson

PB HLTH 229 Public Health and the Law 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor. No previous legal experience or training necessary.

This is an introductory course for nonlawyers in selected aspects of the law relating to public health. Major attention is paid to fundamental legal principles and legal reasoning, recurring legal issues confronted by health professionals, and the use of law to advance a public health agenda. Emphasis is placed on giving students tools to use when they encounter law-related problems in their professional careers. The course is intended for students in all divisions of the School of Public Health.

Final exam required. Instructors: Ashe, Simpson

PB HLTH 230 Advanced Health Politics 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** 220A or consent of instructor.

Critical analysis of selected issues in health policy. Topics include political ideology and health policy, interest group politics in health, Marxist and materialist interpretation of health policy, and the politics of health care technology, implementation, bureaucracy, and health professions.

Final exam not required. Instructor: Halpin

PB HLTH 231A Analytic Methods for Health Policy and Management 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 142 or equivalent (basic probability and statistics).

This course provides an overview of analytic methods that Master's students in health policy and management should be familiar with.

Topics include linear regression, limited dependent variable models such as logit, design, and analysis of complex surveys (with weighted and clustered sampling), and quasi-experimental causal analysis. The course complements 245, with an emphasis on enabling nonstatisticians to interpret and critique applications in the HPM literature.

Final exam required. Instructor: Dow

PB HLTH 232 Doctoral Seminar in Public Health Applications of Time Series Analysis 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.**Prerequisites:** Doctoral standing or consent of instructor.

An introduction to time-domain analyses of potential interest to public health researchers and practitioners. Applications in forecasting and hypothesis testing will be demonstrated.

Final exam required. Instructor: Catalano

PB HLTH C234/CHEM C234/ESPM C234 Green Chemistry: An Interdisciplinary Approach to Sustainability 3 Units**Department:** Public Health; Chemistry; Environ Sci, Policy, and Management**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 20 hours of Lecture per week for 6 weeks.**Prerequisites:** One year of chemistry, including a semester of organic chemistry, or consent of instructors based on previous experience.

Meeting the challenge of global sustainability will require interdisciplinary approaches to research and education, as well as the integration of this new knowledge into society, policymaking, and business. Green Chemistry is an intellectual framework created to meet these challenges and guide technological development. It encourages the design and production of safer and more sustainable chemicals and products.

Final exam not required. Instructors: Arnold, Bergman, Guth, Iles, Kokai, Mulvihill, Schwarzman, Wilson

PB HLTH C240A/STAT C245A Biostatistical Methods: Advanced Categorical Data Analysis 4 Units**Department:** Public Health; Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered odd-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** Statistics 200A (may be taken concurrently).

This course focuses on statistical methods for discrete data collected in public health, clinical and biological studies. Lectures topics include proportions and counts, contingency tables, logistic regression models, Poisson regression and log-linear models, models for polytomous data and generalized linear models. Computing techniques, numerical methods, simulation and general implementation of biostatistical analysis techniques with emphasis on data applications.

Final exam required.

PB HLTH C240B/STAT C245B Biostatistical Methods: Survival Analysis and Causality 4 Units**Department:** Public Health; Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** Statistics 200B (may be taken concurrently).

Analysis of survival time data using parametric and non-parametric models, hypothesis testing, and methods for analyzing censored (partially observed) data with covariates. Topics include marginal estimation of a survival function, estimation of a generalized multivariate linear regression model (allowing missing covariates and/or outcomes), estimation of a multiplicative intensity model (such as Cox proportional hazards model) and estimation of causal parameters assuming marginal structural models. General theory for developing locally efficient estimators of the parameters of interest in censored data models. Computing techniques, numerical methods, simulation and general implementation of biostatistical analysis techniques with emphasis on data applications.

Final exam required. Instructor: van der Laan

PB HLTH C240C/STAT C245C Biostatistical Methods: Computational Statistics with Applications in Biology and Medicine 4 Units**Department:** Public Health; Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** Statistics 200A or equivalent (may be taken concurrently).

This course provides an introduction to computational statistics, with emphasis on statistical methods and software for addressing high-dimensional inference problems in biology and medicine. Topics include numerical and graphical data summaries, loss-based estimation (regression, classification, density estimation), smoothing, EM algorithm, Markov chain Monte-Carlo, clustering, multiple testing, resampling, hidden Markov models, in silico experiments.

Final exam required. Instructor: Dudoit

PB HLTH C240D/STAT C245D Biostatistical Methods: Applications of Statistics to Genetics and Molecular Biology 4 Units**Department:** Public Health; Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 2 hours of laboratory per week.**Prerequisites:** Statistics 200A-200B or Statistics 201A-201B (may be taken concurrently) or consent of instructor.

This course and Pb Hlth C240C/Stat C245C provide an introduction to computational statistics with emphasis on statistical methods and software for addressing high-dimensional inference problems that arise in current biological and medical research. The courses also discuss statistical computing resources, with emphasis on the R language and environment (www.r-project.org). Programming topics to be discussed include: data structures, functions, statistical models, graphical procedures, designing an R package, object-oriented programming, inter-system interfaces. The statistical and computational methods are motivated by and illustrated on data structures that arise in current high-dimensional inference problems in biology and medicine.

Final exam required. Instructor: Dudoit

PB HLTH C240E/STAT C245E Statistical Genomics 4 Units**Department:** Public Health; Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Statistics 200A and 200B or equivalent (may be taken concurrently). A course in algorithms and knowledge of at least one computing language (e.g., R, matlab) is recommended.

Genomics is one of the fundamental areas of research in the biological sciences and is rapidly becoming one of the most important application areas in statistics. This is the first course of a two-semester sequence, which provides an introduction to statistical and computational methods for the analysis of meiosis, population genetics, and genetic mapping. The second course is Statistics C245F/Public Health C240F. The courses are primarily intended for graduate students and advanced undergraduate students from the mathematical sciences.

Final exam not required. Instructors: Dudoit, Huang, Nielsen, Song

PB HLTH C240F/STAT C245F Statistical Genomics 4 Units**Department:** Public Health; Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Genomics is one of the fundamental areas of research in the biological sciences and is rapidly becoming one of the most important application areas in statistics. The first course in this two-semester sequence is Public Health C240E/Statistics C245E. This is the second course, which focuses on sequence analysis, phylogenetics, and high-throughput microarray and sequencing gene expression experiments. The courses are primarily intended for graduate students and advanced undergraduate students from the mathematical sciences.

Final exam not required. Instructors: Dudoit, Huang, Nielsen, Song

PB HLTH 241 Statistical Analysis of Categorical Data 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 2 hours of discussion/laboratory per week.**Prerequisites:** 142 or consent of instructor.

Biostatistical concepts and modeling relevant to the design and analysis of multifactor population-based cohort and case-control studies, including matching. Measures of association, causal inference, confounding interaction. Introduction to binary regression, including logistic regression. Final exam required. Instructor: Jewell

PB HLTH 242A Biometrical Data Analysis--Pathological Incomplete Data and Pattern Recognition 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered odd-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks.**Prerequisites:** 140, 142, and 145 or consent of instructor.

Survey of classical methods; mixture, clustered, grouped, incomplete, Cox-model, and truncated data simulation and analysis.

Final exam required. Instructor: Tarter

PB HLTH 242B Biometrical Data Analysis--Model Free Curve Estimation 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks.**Prerequisites:** 140, 142, and 145 or consent of instructor.

Generalized histograms and Gram-Charlier expansions; series inclusion and stopping rules, multiplier and weighting techniques, nonparametric regression, variance reduction, smoothing, and equiprobability contour estimation methods and other graphical methods.

Final exam required. Instructor: Tarter

PB HLTH C242C/STAT C247C Longitudinal Data Analysis 4 Units**Department:** Public Health; Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks.**Prerequisites:** 142, 145, 241 or equivalent courses in basic statistics, linear and logistic regression.

The course covers the statistical issues surrounding estimation of effects using data on subjects followed through time. The course emphasizes a regression model approach and discusses disease incidence modeling and both continuous outcome data/linear models and longitudinal extensions to nonlinear models (e.g., logistic and Poisson). The primary focus is from the analysis side, but mathematical intuition behind the procedures will also be discussed. The statistical/mathematical material includes some survival analysis, linear models, logistic and Poisson regression, and matrix algebra for statistics. The course will conclude with an introduction to recently developed causal regression techniques (e.g., marginal structural models). Time permitting, serially correlated data on ecological units will also be discussed.

Final exam not required. Instructors: Hubbard, Jewell

PB HLTH 243A Special Topics in Biostatistics 1 - 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 1 to 3 hours of lecture/discussion per week.**Prerequisites:** 240A and 240B.

Current issues in biostatistics research. Topics will vary from term to term depending on student demand and faculty availability. Possible topics are bioassay, meta-analysis, compartmental models, biostatistical consulting, covariance structure models, bootstrap and jackknife methods, artificial intelligence techniques in biostatistics.

Final exam required.

PB HLTH 243C Information Systems in Public Health 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.

An introduction to new information systems, such as the Internet and interactive television, and how they may be used to improve human health. The course has three objectives: first, to familiarize students with new information technologies; second, to review how these technologies will be used by public health professionals, consumers, health care providers, and others; and third, to study related ethical and legal issues such as privacy, access, and liability. The course is designed for people with minimal understanding of interactive technologies.

Final exam not required. Instructor: Van Brunt

PB HLTH 243D Special Topics in Biostatistics: Adaptive Designs 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Prior biostatistics or statistics course or consent of instructor.

This course examines the theory and statistical methods for analyzing data generated by adaptive group sequential designs. It also considers the construction of targeted adaptive group sequential designs that adapt in a way that is optimal for the estimation of a particular target feature of the data generating experiment (i.e., causal effect of the treatment). Topics to be covered include: sequential testing, adaptive sample size, martingale estimating functions to construct estimators, targeted maximum likelihood estimation for adaptive designs, targeted Bayesian learning for adaptive designs, martingale theory for the analysis of estimators for adaptive designs.

Final exam not required. Instructor: van der Laan

PB HLTH 245 Introduction to Multivariate Statistics 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** 145 or equivalent or consent of instructor.

The following topics are discussed in the context of biomedical and biological application: multiple regression, loglinear models, discriminant analysis, principal components. Instruction in statistical computing is given in the laboratory session.

Final exam required. Instructor: Lahiff

PB HLTH C246A/STAT C249A Censored Longitudinal Data and Causality 4 Units**Department:** Public Health; Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered odd-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** 240B, Statistics 200A-200B or consent of instructor.

This course examines optimal robust methods for statistical inference regarding causal and non-causal parameters based on longitudinal data in the presence of informative censoring and informative confounding of treatment. Models presented include multivariate regression models, multiplicative intensity models for counting processes, and causal models such as marginal structural models and structural nested models. Methods will be illustrated with data sets of practical interest and analyzed in the laboratory section. This course, appropriate for advanced masters and Ph.D. students, provides exposure to a number of ongoing research topics.

Final exam not required. Instructor: van der Laan

PB HLTH 248 Statistical/Computer Analysis Using R 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Statistics 200A (may be taken concurrently) or 142, 145, and 245.

The material presented will focus on learning the programming language R, which will be taught in the context of reviewing and introducing a number of statistical methods. Four topic areas will be presented focusing on implementation; these are descriptive methods, simulation techniques, linear models, and estimation. The goal of the course is to provide a package of statistical techniques along with new and advanced computer tools for implementation.

Final exam not required. Formerly known as 249. Instructor: Selvin

PB HLTH 250A Epidemiologic Methods I 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 12 hours of lecture/laboratory per week for 6 weeks.**Prerequisites:** 142 (may be taken concurrently).

Principles and methods of epidemiology: study design, selection, and definition of cases and controls; sampling, data collection, analysis, and inference. Discussion session provides an opportunity to apply methods to problem sets and to discuss issues presented in lectures.

Final exam required. Instructors: Reingold, Smith

PB HLTH 250B Epidemiologic Methods II 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** 250A or an equivalent introductory course in epidemiology or advanced degree (M.D., Ph.D., D.V.M.) in a biomedical field.

This course is intended as an intermediate level course in the field of epidemiology. Topics include causal inference; measurement of disease rates; inferential reasoning; and research study designs including ecologic, case-control, cohort, intervention trials, and meta-analytic designs (potential sources of bias, confounding, and effect modification in each research design are explored in depth); topics in clinical epidemiology including the use of likelihood ratios, receiver operator curves, and the sensitivity, specificity, predictive value of a test; and a brief introduction to logistic regression, survival analysis, and decision analysis. The readings from this course are drawn primarily from advanced epidemiology textbooks (Kleinbaum, Rothman, Miettinen).

The course is intended to provide a firm foundation for students who will subsequently enroll in 250C.

Final exam required. Instructor: Ahern or Colford (alternating years)

PB HLTH 250C Epidemiologic Theory 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of lecture and 2 hours of practicum per week.**Prerequisites:** 241, 245, 250B, or consent of instructor.

This course is a continuation of 250B. The course covers many of the same topics as 250B but explores them in greater breadth and depth. Topics that follow from 250B include causal inference; the interrelation between measures of disease frequency; the theory that underlies case-control studies and the practical issues that relate to implementation of case-control studies; and further exploration of the quantitative aspects of bias, confounding, propensity scores, and measurement error. An introduction to the theory of ecological studies and mixed model analysis also are provided. Readings are primarily from the epidemiologic methods literature, and problems are based on the evaluation of published data. The course is divided into a series of modules that range in length from 1-4 weeks: causal inference/models of causality; epidemiologic measures of disease occurrence and their inter-relations; standardization of rates; bias and validity--general consideration; misclassification/measurement error; confounding; matching; case-control studies; ecological studies. Final exam not required. Instructor: Tager

PB HLTH W250 Epidemiologic Methods I 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of web-based lecture per week for 7 weeks.

This is an online course.

Prerequisites: Concurrent or previous enrollment in an introductory biostatistics course (e.g., W142).

This introductory graduate course presents the principles and methods of epidemiology, including descriptive and analytic approaches to assessing the distributions of health, disease, and injury in the population and factors that influence those distributions. Through the combination of lecture, readings, and discussion of problem sets, students without prior coursework in epidemiology will acquire the core competencies in epidemiology expected of all MPH graduates.

Final exam not required. Instructor: Tager

PB HLTH 251A Practicum in Epidemiologic Methods I 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.**Prerequisites:** 250A; 145 or 241B concurrently; consent of instructor.

A two-semester sequence intended for students in the Epidemiology/Biostatistics MPH program and other qualified graduate students. This is a practicum course in research design data analysis. Students select a research question and learn practical skills to analyze a large database in order to answer the research question. The course teaches use of CMS and SAS in performing univariate analyses; students also learn critically to review scientific literature. Students are required to complete computer assignments, an oral presentation of a literature review with handouts for class, a final presentation (as would be presented at a scientific meeting), and a final report in a style for a publishable manuscript.

Final exam not required. Instructor: Eskenazi

PB HLTH 251C Causal Inference and Meta-Analysis in Epidemiology 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Students in the first semester of the second year of the epidemiology/biostatistics Master's of Public Health program. (Students from other programs welcome.)

This course will review the theoretical aspects of causal inference, literature review, and meta-analysis, but its focus will be more on the practical aspects of these topics that are not commonly found in textbooks or presented in classes on epidemiologic theory. It is hoped that the student develops the day-to-day skills necessary to complete and present a well-documented, accurate, and thorough review of epidemiologic literature.

Final exam not required. Instructors: A. Smith, Steinmaus

PB HLTH 251D Applied Epidemiology Using R 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

This is an intensive, one-semester introduction to the R programming language for applied epidemiology. R is a freely available, multi-platform (Mac OS, Linux, and Windows, etc.), versatile, and powerful program for statistical computing and graphics (<http://www.r-project.org>). This course will focus on core basics of organizing, managing, and manipulating epidemiologic data; basic epidemiologic applications; introduction to R programming; and basic R graphics.

Final exam not required. Instructor: Aragon

PB HLTH 252 Epidemiological Analysis 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 245, 250A, or consent of instructor.

This course consists of two distinct components: (1) advanced treatment of epidemiologic methods: matched data, spatial analysis, logistic and Poisson regression models; (2) survival analysis: Kaplan-Meier estimation, survival distributions, parametric and semi-parametric survival analysis models. Students are encouraged to concurrently enroll in 248L which carries the prerequisite of a working knowledge of the statistical computing language R.

Final exam not required. Instructor: Selvin

PB HLTH 252A Applied Sampling and Survey Design and Analysis 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture per week for 2 units; an additional computer laboratory of 2 hours required per week for 3 units.

This course will cover the basic principles and methods of sampling and survey design. The weekly lecture will cover the principles of sampling and include a discussion of various case studies. The computer laboratory will consist of exercises that develop skills for using computers to draw samples and to solve sampling problems. The material covered in the computer laboratory session will generally correspond to the topics covered in the preceding class meetings.

Final exam not required. Instructor: Piazza

PB HLTH 252B Modeling the Dynamics of Infectious Disease Processes 2 - 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** Calculus (e.g. Math 1A-1B), statistical programming packages (247, 249, or equivalent)

This course will cover the basic tools required to both critically read modeling papers and to develop and use models as research tools. Emphasis will be placed on using models to understand infectious disease processes and to evaluate potential control strategies. The class meeting will consist of both lecture material covering conceptual issues and a computer lab to apply these concepts using standard infectious disease models.

Final exam not required. Instructor: Porco

PB HLTH 252C Intervention Trial Design 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 245 and 250A (may be taken concurrently).

Students learn (through lectures and graded student presentations and projects) to design clinical and population-level field trials. Topics: formulation of a testable hypothesis; identification of appropriate populations; blinding (including indices for assessment); randomization (including traditional and adaptive randomization algorithms); sample-size estimation; recruitment strategies; data collection systems; quality control and human subjects responsibilities; adverse effects monitoring; improving participant adherence; use of surrogate outcomes. Final exam not required. Instructor: Colford

PB HLTH 252D Introduction to Causal Inference 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of discussion/lecture per week.**Prerequisites:** 241 or C240A (can be taken concurrently); 245 or similar course covering multivariable linear and logistic regression analysis; for epidemiology students, 250C, or consent of instructor.

This course presents a general framework for causal inference using directed acyclic graphs, non-parametric structural equation models, and counterfactuals. Marginal structural models and causal effect estimation using inverse probability of treatment weighting, G-computation, and targeted maximum likelihood are introduced. In two-part presentations, students will define and implement research questions. Final exam not required. Instructor: Petersen

PB HLTH 253A Topics in Disease Surveillance 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Session per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

Ways of doing surveillance for infectious and non-infectious diseases; how the reasons for doing surveillance determine the system selected; and how to evaluate whether or not a given surveillance is providing the data needed to meet various goals. The impact of various biases on the conclusions derived from surveillance data will be explored.

Final exam required. Instructor: Rutherford

PB HLTH 253B Epidemiology and Control of Infectious Diseases 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** Prior degree or courses in biomedical sciences and consent of instructor.

A discussion of major infectious diseases with emphasis on disease surveillance, investigative procedures, and prevention programs.

Emphasis is on current problems in health agencies at a state, national, and international level.

Final exam not required. Instructor: Reingold

PB HLTH C253/DEVP C232 Foundations of Public Health 2 Units**Department:** Public Health; Development Practice**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

The seminar will introduce core disciplines and concepts in public health, using a case-based, integrated approach. Examples of cases discussed include: respiratory disease and air pollution; tobacco control and prevention of smoking-related conditions; disease elimination or eradication via childhood immunization; environmental control and prevention of schistosomiasis; behavior change and prevention of HIV/AIDS; and novel economic approaches to improving healthcare delivery to impoverished groups.

Final exam not required. Instructors: Reingold, Smith

PB HLTH 253D Behavior and Policy Science in HIV Treatment and Prevention 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course will integrate various social science disciplines and apply these perspectives to problems of HIV treatment and prevention, particularly in the developing world. Throughout the academic term, students will apply knowledge of behavioral science, epidemiology, quantitative and qualitative methods in the analysis of developing and evaluating HIV-related treatment and prevention interventions, including policy interventions. Course requirements will include the preparation of a major paper recommending interventions, country level budgets and evaluation designs for a specific developing country. Specific requirements for this paper will be distributed during the third class session.

Final exam not required. Instructors: Ekstrand, Morin

PB HLTH 253E Ethical Challenges in Public Health Interventions: Catastrophic and Routine 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

This course aims to enhance course participants' ability to articulate and examine ethical issues surrounding responses to public health/healthcare challenges whether routine or during catastrophe. Discussions will be based on presentations and assigned readings for the class, and with an expectation that students will incorporate their own diverse views and approaches to moral and logistical challenges.

Final exam not required. Instructor: Kayman

PB HLTH 253F Foundations of Public Health 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

The seminar will introduce core disciplines and concepts in public health, using a case-based, integrated approach. Examples of cases discussed include: respiratory disease and air pollution; tobacco control and prevention of smoking-related conditions; disease elimination or eradication via childhood immunization; environmental control and prevention of schistosomiasis; behavior change and prevention of HIV/AIDS; and novel economic approaches to improving healthcare delivery to impoverished groups.

Final exam required. Instructors: Reingold, Smith

PB HLTH 253G Sexual Health Promotion and Sexually Transmitted Disease Control 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate students, undergraduates with consent of instructor.

This seminar will explore current issues and controversies in public health approaches to sexual health promotion and STD control with a focus on pragmatic skills including program development and evaluation. Students will engage in independent research with interactive group discussions and student presentations.

Final exam not required. Instructor: Bernstein

PB HLTH 254 Occupational and Environmental Epidemiology 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Session per week for 15 weeks.**Prerequisites:** 250A.

Epidemiological methods for designing, conducting, and interpreting epidemiological studies of persons occupationally or environmentally exposed to chemical and physical agents.

Final exam not required. Formerly known as 254B. Instructor: A. Smith

PB HLTH 255A Social Epidemiology 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** Consent of instructor. 142, 145, and 250A-250B recommended.

This course is designed to introduce students to the field of social epidemiology and its role in understanding the social determinants of population health and health disparities. This course will provide a systematic and selected overview of literature in the field covering the history and development of the field of social epidemiology, theoretical perspectives, major topical areas, conceptual approaches, and current controversies related to theory, research methods, and research findings. Three principles will be emphasized throughout the course: 1) the ecological model, 2) the lifecourse approach, and 3) causality. These principles will provide a framework for the critical analysis of scholarly journal articles and the synthesis of information across content areas. This is a breadth course intended to provide an overview of the field of social epidemiology; and expose students to relevant areas of study. This is not a methods course.

Final exam not required. Instructor: Nuru-Jeter

PB HLTH 255C Mental Health and Psychopathology 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Open to doctoral students or with consent of instructor.

This doctoral seminar is designed to provide an understanding of the complex (and often interactive) individual and environmental conditions that increase the risk of psychopathology in individuals across the life span. We will start by learning about general concepts important to an understanding of psychopathology and prevention of psychopathology, including the "biopsychosocial model," "psychological resilience," and different levels of preventive interventions. For each different area of psychopathology, we will consider: a) the core feature of disorder; b) key theory and empirical evidence regarding etiology and course, with a particular emphasis on understanding the range of risk and protective factors on the individual, family, and community level; and c) the implications of etiological understanding for public health efforts to prevent the particular disorder.

Final exam not required. Instructor: Ozer

PB HLTH 255D Methods in Social Epidemiology 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

This course is designed to review, evaluate, and apply methods currently used in the field of social epidemiology. The course aims to teach approaches to forming clear research questions, and selecting the best method(s) to answer the questions posed. Initially we will discuss approaches to defining clear and specific research questions. We will then discuss recent controversies around the meaning of questions posed in social epidemiology, and the ability of currently used methods to answer questions in social epidemiology. Finally we will review, evaluate, and apply a range of different methods that are or could be used to answer questions in social epidemiology, again emphasizing the types of questions answered by these methods, and their ability to address the challenges to effectively answering questions in social epidemiology. There will be a mixture of discussion and lecture depending on the topic, with student participation and questions strongly encouraged. Final exam not required. Instructors: Ahern, Hubbard

PB HLTH 255E Structural Inequalities and Reproductive Health 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** 250A or equivalent, background in reproductive health.

This course will address the role that structural inequalities assume in shaping reproductive health disparities. We will examine relevant epidemiological research, review and critique public health interventions, and discuss how research in this area can inform policy. The course will be organized around three modules, each linked to reproductive health: poverty, gender-based violence, and migration. Within each module, students will examine measurement, research design, and ethical challenges.

Final exam not required. Instructors: Dunbar, Krishnan, Minnis

PB HLTH 256 Molecular and Genetic Epidemiology and Human Health in the 21st Century 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture, 1 hour of laboratory (wet/comp), journal review per week.**Prerequisites:** College-level biology course or consent of instructor. Introductory biostatistics recommended.

This course will cover basic principles of human/population genetics and molecular biology relevant to understanding approaches to molecular and genetic epidemiology: approaches to genome-wide association studies; application of biomarkers to define exposures; recent developments in genomics, epigenomics and other -omics, including next generation sequencing technology and genomics in personalized medicine and health. Hands-on computer and wet laboratory will provide experience with modern research tools.

Final exam not required. Instructors: Barcellos, Holland

PB HLTH 257 Outbreak Investigation 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of seminar per week and field work outside class time.**Prerequisites:** 250A, 250B, or an equivalent introductory course in epidemiologic methods.

This course will teach students why and how clusters of illnesses/epidemics are investigated. Methods and approaches required for such investigations will be discussed in detail, using published articles from the scientific literature to provide examples.

Final exam not required. Instructor: Reingold

PB HLTH 257B Public Health Preparedness & Emergency Response 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours lecture/discussion per week.**Prerequisites:** Completion of one semester of graduate public health curriculum or in public health practice.

This one semester course is an intensive introduction to public health emergency preparedness and response, and covers the following topic areas: the role of public health in disasters, natural disasters and severe weather, intentional mass threats (CBRNE), detecting and monitoring public health threats, post-disaster sampling, surveys, rapid needs assessments, public health emergency incident management system, emergency operations planning and exercises, infectious disease emergency readiness, environmental health emergency readiness, mental health emergency readiness, special needs and vulnerable populations, essentials of public health leadership during a disaster, essentials of crisis risk communication, essentials of investigating outbreaks, disaster medicine and mass casualty care, and personal and community disaster preparedness.

Final exam not required. Instructor: Aragon

PB HLTH N257 Outbreak Investigations 2 Units**Department:** Public Health**Course level:** Graduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of seminar per week and field work outside class time. 15 hours of lecture and 15 hours of laboratory per week for 2 weeks.**Prerequisites:** Consent of instructor.

This intensive course covers the essential knowledge, skills, and abilities to conduct an epidemiologic field investigation including concepts for controlling infectious diseases; the epidemiologic approach and steps to public health action; conducting an outbreak investigation; conducting post-disaster rapid health assessments; field sampling design and implementation; field survey design and implementation; design and management of field database systems; and analysis of outbreak modules using a computer laboratory. The computer lab component will emphasize basic analysis and interpretation.

Final exam not required. Instructor: Aragon

PB HLTH W257 Public Health Preparedness and Emergency Response 3 Units

Department: Public Health

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 6 hours of web-based lecture per week for 7 weeks.

This is an online course.

Prerequisites: Completion of one semester of graduate public health curriculum, or in public health practice.

This one semester course is an intensive introduction to public health emergency preparedness and response, and covers the following topic areas: the role of public health in disasters; natural disasters and severe weather; intentional mass threats (CBRNE); biosurveillance: detecting and monitoring public health threat; post-disaster sampling, surveys, and rapid needs assessments; public health emergency incident management systems; emergency operations planning and exercises.

Final exam required. Instructor: Aragon

PB HLTH 258 Epidemiology of Neoplastic Diseases 3 Units

Department: Public Health

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: 150A or 250.

For students with a basic understanding of epidemiology, biostatistics, and tumor biology. An introduction to the epidemiology of some major site-specific cancers, considering epidemiological approaches to the study of their causation, and implementation will be discussed.

Final exam not required. Instructor: Buffler

PB HLTH 258B Ethical Issues in Epidemiology Research 3 Units

Department: Public Health

Course level: Graduate

Terms course may be offered: Fall and spring. Offered even-numbered years.

Grading: Offered for satisfactory/unsatisfactory grade only.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Graduate standing or consent of instructor.

Ethical issues are as important for the field of epidemiology as they are for all human endeavors. Of special concern to epidemiologists are: informed consent, privacy and confidentiality, academic freedom, contractual obligations, beneficence and non-maleficence, scientific misconduct, and fraud. These are but a few of the issues being addressed currently by epidemiologists and which will be considered in this course.

Final exam not required. Instructor: Buffler

PB HLTH 259A History of Epidemiology 3 Units

Department: Public Health

Course level: Graduate

Terms course may be offered: Fall and spring. Offered alternate years.

Grading: Offered for satisfactory/unsatisfactory grade only.

Hours and format: 3 hours of Lecture per week for 15 weeks.

This course traces the development of epidemiological methodology and theory from the "Golden Age" of Greece in the sixth century B.C. to modern practice at the turn of the 21st century. Consideration will also be given to historical events such as major epidemics and important research activities. The course provides students preparing for academic careers in epidemiology the background to teach and research the field. Case studies will be a major vehicle for accomplishing the course objectives. Original readings will be discussed.

Final exam not required. Instructors: Winkelstein, Jr.

PB HLTH 259B Practical Applications of Epidemiologic Methods in Developing Countries 3 Units

Department: Public Health

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Practical application of epidemiologic methods in the developing country settings, including surveillance, surveys, case-control studies, and intervention trials. The applications of these methods to the study of infectious and non-infectious disease problems common in developing countries will be presented.

Final exam not required. Instructor: Reingold

PB HLTH 260A Principles of Infectious Diseases 4 Units

Department: Public Health

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 4 hours of Lecture per week for 15 weeks.

Prerequisites: Upper division course preparation in biology.

This course presents general principles of microbial interactions with humans that result in infection and disease. Common themes are developed using examples of viral, bacterial, and parasitological pathogens that exemplify mechanisms of infectious disease. The epidemiology, pathogenesis, host immune response, diagnosis, treatment, and control will be presented for each infectious disease discussed.

Final exam required. Instructors: Riley, Swartzberg

PB HLTH 260B Principles of Infectious Diseases 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Prerequisites:** Upper division course preparation in biology.

This course presents general principles of microbial interactions with humans that result in infection and disease. Common themes are developed using examples of viral, bacterial, and parasitological pathogens that exemplify mechanisms of infectious disease. The epidemiology, pathogenesis, host immune response, diagnosis, treatment, and control will be presented for each infectious disease discussed.

Final exam required. Instructors: Riley, Swartzberg

PB HLTH 260C Infectious Disease Laboratory 2 or 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture and 6 hours of laboratory per week.

This course is split into 2 modules, each 7.5 weeks. Students may take a single module for 2 units.

Prerequisites: 260A or consent of instructor.

Module 1: Practice in standard techniques for the isolation, identification, and characterization of infectious agents; laboratory safety. Module 2: Application of molecular methods to the identification and characterization of infectious agents, vectors, and hosts.

Final exam not required. Instructors: Loretz, Sensabaugh

PB HLTH 260E Molecular Epidemiology of Infectious Diseases 2 - 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and hours of Discussion per week for 15 weeks.**Prerequisites:** 150A.

The course will cover general principles and practical approaches in the use of molecular laboratory techniques to address infectious disease epidemiologic problems. It is designed for students with experience in the laboratory or in epidemiology, but not both. The principles to be discussed will include the use of molecular techniques in outbreak investigations, characterizations of dynamics of disease transmission, identifying vehicles, and quantifying attributable risks in sporadic infections, refining data stratification to assist case-control studies, distinguishing pathovars from non-pathogenic variants of organisms, doing surveillance, and identifying genetic determinants of disease transmissions. 3-units if a five-page paper completed.

Final exam not required. Instructor: Riley

PB HLTH 260F Infectious Disease Research in Developing Countries 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered alternate years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

The objective of this course is to provide M.P.H. and Ph.D. students with an appreciation and understanding of the complex issues involved in conducting scientific, laboratory-based investigation in developing countries. We will discuss the many obstacles to establishing and sustaining research projects, such as poor infrastructure, insufficient financial and material resources, and lack of scientific information and interaction. More importantly, we will identify innovative solutions to overcoming these obstacles. The first half of the course will consist of presentations by U.S. and developing countries investigators who have long-term research experience in Latin America, Asia, and Africa. We will also discuss related issues such as ethical considerations, equitable collaborations, research capacity strengthening. During the second half of the course, students will give presentations on topics of their choice.

Final exam not required. Instructor: Harris

PB HLTH 261 Advanced Medical Virology 3 - 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of lecture/discussion per week.**Prerequisites:** Consent of instructor.

Analysis of viral and host factors that play a role in viral diseases of medical importance. Four units of credit given to doctoral students who write a research proposal on a topic other than that proposed for their dissertation.

Final exam required. Instructor: Liu

PB HLTH 262 Molecular and Cellular Basis of Bacterial Pathogenesis 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week and 1 hour of literature review.**Prerequisites:** 260A, 260B, or consent of instructor.

This course for graduate students will explore the molecular and cellular basis of bacterial pathogenesis. The emphasis will be on model bacterial pathogens of mammals. The course also will include some aspects of bacterial genetics and physiology, immune response to infection, and the cell biology of host-parasite interactions. Taught concurrently with. Students enrolled in 262 also will be required to attend a weekly discussion of the primary literature, both current and classic. Each student will be required to present one paper.

Final exam required. Instructor: Portnoy

PB HLTH 263 Public Health Immunology 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 260A (prior or concurrent). Graduate standing. Public Health majors by consent of instructor.

This course will be the principal immunology course for students in the field of public health. It is designed to teach both the basic biology of the human immune system and its response in health and disease, especially the specific response of the human immune system to major human pathogens. Four areas will be explored: 1) components of the immune system (spectrum of cell types and cell products); 2) different arms of the immune system including humoral, cell-mediated, innate, and mucosal immunity; 3) specific immune response to infection caused by viral, bacterial, fungal, and parasitic pathogens; and 4) disorders of the immune system unrelated to infectious disease. Through this course, students should not only gain a basic understanding of the human immune system, but also learn the functions and responses of the human immune system to diseases of infectious and non-infectious nature, and the relevance of these interactions in the context of public health problems.

Students will receive no credit for 263 after taking Molecular and Cell Biology 150. Final exam required. Instructor: Stanley

PB HLTH 264 Current Issues in Infectious Diseases 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: Second-year Infectious Diseases MPH students only. Examination of scientific, social, and policy dimensions of issues involving infectious diseases. Students select one topic for in-depth analysis and present findings in a public debate. Topics vary from year to year. Final exam not required. Formerly known as 264A-264B. Instructor: Sensabaugh

PB HLTH 265 Molecular Parasitology 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 10 weeks.

Prerequisites: Upper division courses in molecular biology, parasitology, biochemistry, immunology, microbiology, or consent of instructor. Familiarity with reading primary research is recommended. Advanced course in the molecular aspects of parasite immunology, molecular biology, genetics, biochemistry, and genomics. For each parasite, the following areas will be covered: biology; disease spectrum; epidemiology; pathogenesis, immunology; and vaccine development. The lectures will focus on "state-of-the-art" research in relation to molecular mechanisms of pathogenesis, parasite adaptations for survival within the host, and strategies for drug and vaccine development and disease control and prevention. Course content will rely heavily on current literature.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Instructor: Harris

PB HLTH 266 Viruses and Human Cancer 2 - 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Course in basic virology or microbiology.

Topics include the basic biology of cancer; molecular biology of tumor viruses; mechanisms of viral carcinogenesis; characteristics of virally transformed cells; the challenge of proving the viral etiology of human cancers; the epidemiology, pathology, diagnosis, treatment, and prevention of virally caused human cancers. The course format will include lectures and reading/discussion of original research publications. To be taken for three units if a term paper is written and for two units without a term paper.

Final exam not required. Instructor: Buehring

PB HLTH 266A Foodborne diseases 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1.5 hours of Lecture per week for 15 weeks.**Prerequisites:** Basic knowledge of microbiology.

This course will cover public health, microbiological, social, and economical issues related to foodborne diseases. Three areas will be explored: 1) categories, clinical manifestations, and disease processes of foodborne illnesses; 2) etiological agents causing foodborne illnesses; 3) investigation and prevention of foodborne illness. The course will discuss different types of foodborne diseases, clinical manifestations, and the interactions between etiological agents (pathogens and non-pathogens) and human hosts. We will cover pathogens that are the most frequently associated with foodborne illness including bacterial and viral pathogens such as Salmonella, E coli, hepatitis viruses and Norwalk-like gastroenteritis viruses. We will also study non-pathogen agents such as heavy metal, pesticide, and toxic chemicals. Furthermore, the course will discuss how to identify the etiological agents in outbreaks and possible measures that can be taken to minimize the risk to the public including vaccines and education. Finally, we will explore the social and economic issues involved in the food production, distribution, and consumption that contribute to foodborne diseases.

Final exam required. Instructor: Lu

PB HLTH 267B Characterization of Airborne Contaminants 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 3 hours of field/laboratory per week.**Prerequisites:** Graduate standing in environmental health sciences or consent of instructor.

Principles underlying the use of air monitoring methods in industry and the environment. Topics include behavior of gases, vapors, and aerosols; mechanisms of absorption and elimination of inhaled toxicants; methods for measuring of airborne chemicals and particles.

Final exam not required. Instructor: Hammond

PB HLTH 267D Health Impact Assessment 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Health Impact Assessment (HIA) refers to a diverse set of analytic and communicative practices that aim to inform and improve social decisions in order to improve the environmental, economic, and social conditions required for optimal population health. This course provides an introduction to HIA with a focus on the need for and application of HIA to land use and transportation planning and development. The objectives of the course include understanding and comparing the range of practices used to conduct Health Impact Assessments in the U.S. and internationally; identifying the opportunities and obstacles for using the environmental impact assessment as vehicles for health analysis; and development and application of environmental health assessment tools to inform decision-making as part of a class project.

Final exam not required. Instructor: Seto

PB HLTH C269C/BIO ENG C279 Occupational Biomechanics 4 Units**Department:** Public Health; Bioengineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/fieldwork per week.

Overview of ergonomics and occupational biomechanics. Course covers pathophysiology and risk factors of upper extremity and back loading at work, measurement of force and posture, models for risk assessment, anthropometry applied to task and workstation design, tool design, and structure of successful ergonomics programs. Students will conduct a detailed job analysis and design a workplace intervention.

Final exam required. Instructor: Rempel

PB HLTH 269D Ergonomics Seminar 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered alternate years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** 269C or consent of instructor.

Readings and lectures in occupational biomechanics. Topics to be covered are muscle, tendon, and joint biomechanics, material handling models, mechanisms of injury, hand tool design, and instrumentation issues. Students will prepare critical reviews of recent publications and design an engineering intervention to reduce work-related risk factors.

Final exam not required. Instructor: Rempel

PB HLTH 269E Current Topics in Environmental Medicine 2 - 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 to 3 hours of Lecture per week for 15 weeks.

Topics in environmental medicine will provide students with an overview of the health impacts, disease mechanisms, and public health controversies related to selected environmental exposures. The course will cover established environmental diseases as well as impacts of some emerging exposures of concern. The focus will primarily be on pathophysiology, issues related to exposure pathways, and the susceptibilities of specific human populations. No prior medical knowledge required.

Final exam not required. Instructors: Harrison, Seward

PB HLTH 270 Introduction to Environmental Health Sciences 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks.**Prerequisites:** One epidemiology course; one biostatistics course (may be taken concurrently). One Epidemiology course; one Biostatistics course, can be concurrent.

This survey course covers the breadth of hazards to chemical, biological, and physical agents of concern to environmental health professionals. Lectures are presented by experts on particular topics that emphasize the activities involved in professional practice. Students will also meet twice monthly with the instructor to discuss advanced readings and assignments related to the lecture topics. Students will conduct a project on a topic of current interest in some aspect of environmental health (under the guidance of the instructor). This course is designed for MPH students in Environmental Health Sciences and other graduate-level students interested in an overview course on environmental health.

Final exam not required. Instructor: Balmes

PB HLTH 270A Exposure Assessment and Control 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing in the School of Public Health or consent of instructor.

Direct and indirect methods and procedures for the estimation and control of human exposure to chemical, physical, and biological agents of concern to health in the community and in occupational settings. Includes review of measurement technologies, exposure assessment strategies, and multipathway analyses used by regulatory agencies. Also covers exposure control options and strategies, including administrative procedures, personal protective equipment, and various engineering control approaches.

Final exam required. Instructors: Nicas, Spear

PB HLTH 270B Toxicology I 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

Introduction to toxicology covering basic principles, dose-response, toxicity testing, chemical metabolism, mechanisms of toxicity, carcinogenesis, interpretation of toxicological data for risk assessment, and target organ toxicity.

Final exam not required. Instructor: M. Smith

PB HLTH 270C Practical Toxicology 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.**Prerequisites:** 270B or Nutrition Science and Toxicology 110 or equivalent course in toxicology.

This course will focus on cutting-edge issues involving real-world toxicology in drug discovery, pesticide regulation, stem cell research, etc. Many well-known toxicologists, regulators, and consultants from pharmaceutical companies, petroleum industry, private consulting firms, non-profit institutes, federal and state regulatory agencies in the Bay Area will be invited to talk to our participating students. Some of the speakers are our school's alumni who understand exactly what our students need to know before entering the real world. Learning outside the classroom will be another major focus and different from other existing toxicology courses offered at Berkeley. This new class will provide students a chance to visit some of the real-world sites allowing students to see and feel what they really need to know and to learn. To better prepare our students for the real world, we will use combined teaching/learning styles including lecture with discussion sections, site-visits, hand-on experience in a toxicology laboratory, and student group assignments or projects.

Final exam not required. Instructor: Zhang

PB HLTH C270B/NUSCTX C219 Advanced Toxicology 3 or 4 Units**Department:** Public Health; Nutritional Sciences and Toxicology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 4 hours of Lecture per week for 15 weeks.

The application of toxicology to answer questions about safety and risk. Using a case-study approach, participants will learn how to interpret toxicological data and apply their knowledge to evaluating the risk presented by exposures to toxic chemicals, including drugs and environmental contaminants. Discussion of current topics of controversy in the field of toxicology.

Final exam required. Instructor: Smith

PB HLTH 271C Drinking Water and Health 3 Units**Department:** Public Health**Course level:** Graduate**Term course may be offered:** Spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.

The course covers monitoring, control and regulatory policy of microbial, chemical and radiological drinking water contaminants. Additional subjects include history and iconography of safe water, communicating risks to water consumers and a bottled water versus tap water taste test as part of the discussion on aesthetic water quality parameters.

Student Learning Outcomes: By the end of this course, students will be expected to:

Recognize the global occurrence of waterborne contaminants and related health impacts.

Understand water quality monitoring and control of key water quality constituents.

Appreciate the complexities of the regulatory process as it pertains to public drinking water systems in the US and abroad.

Read and synthesize published and unpublished sources of information regarding drinking water and health. Prepare a literature review in journal submission format.

Using an established rubric, review and comment on a literature review (prepared by a fellow student). Rank the paper as acceptable, acceptable with minor revision, acceptable with major revision, unacceptable. Final exam not required. Instructor: Smith

PB HLTH C271G/ESPM C282 Health Implications of Climate Change 3 Units**Department:** Public Health; Environ Sci, Policy, and Management**Course level:** Graduate**Term course may be offered:** Spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.

Prerequisites: The material will be presented with minimal expectation of a background in physical science, although some additional reading may be needed for students with no university science courses. A background in epidemiology is also helpful, but not necessary.

The course will provide a basic foundation in the physical mechanisms of, responses to, and health implications of climate change. We will explore the variety of epidemiologic, risk assessment, and statistical methods used to understand the impacts of climate change on health across diverse demographic groups. The public health implications, positive and negative, of efforts to mitigate and adapt to climate change will be elaborated, including discussions of ethical, political, and economic aspects of these efforts. Students will be responsible for leading class discussions and presenting a poster on their choice of a topic related to climate change and health.

Final exam required. Instructors: Jerrett, Morello-Frosch

PB HLTH 271D Global Burden of Disease and Comparative Risk Assessment 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** Graduate standing or consent of instructor. Introductory epidemiology (250A or equivalent) is recommended.

The Global Burden of Disease (GBD) database utilized by provides estimates of illness, injury, and death by disease type, age, sex, and world region in a consistent and coherent manner. The course will explore the ways such a detailed database makes possible a wide range of new types of analysis of health priorities and the relationship of database will also be introduced. This seminar will also provide an opportunity for reading and discussion of the basic assumptions, data limitations, critiques, and methodological difficulties of the GBD. It is intended to be a true seminar relying heavy on class participation. The homework assignments will be greatly facilitated by use of computer spreadsheets.

Final exam not required. Instructor: K. Smith

PB HLTH 271E Science and Policy for Environment and Health 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

Scientific knowledge and analyses are important to the development of public policies that address the impact of the environment on health. The limits of existing knowledge and uncertainties in research results create significant challenges in applying science to answer critical questions. This course critically examines how scientific information is used in policy decisions. Case studies of current issues address characterization of scientific knowledge, interpretation of science in policy contexts, scientific integrity, and factors in addition to science that influence decisions. Assignments prepare students to effectively translate technical knowledge for multi-disciplinary and lay audiences and to participate in public policy proceedings. Core materials address differences between regulatory and market-based approaches; emerging paradigms including the precautionary principle and environmental justice; and key elements of risk assessment and cost-benefit analysis.

Final exam not required. Instructor: Kyle

PB HLTH 271G Global Environmental Change for Health Scientists 1 or 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** An introductory course in epidemiology is strongly suggested.

The course will first provide a basic foundation in the physical and societal basis of climate change, including atmospheric structure and feedbacks, carbon cycling, and the sources and trends of human and natural greenhouse pollutant emissions. Forecasts of future climate, and their uncertainties, will be discussed, emphasizing parameters of potential relevance to human health. We will explore epidemiologic, risk assessment, and statistical methods appropriate for understanding the impact of climate on health in different populations, including reviews of current burden of disease estimates of avoidable and attributable risk. The public health implications, positive and negative, of society's efforts to mitigate and adapt to climate change will be elaborated, including discussions of ethical, political, and economic aspects. The one-unit version ends before the spring break. Students in the two-unit version will continue and be responsible for formal class presentations summarizing and critiquing the evidence based on a health outcome related to climate change.

Final exam not required. Instructors: Jerrett, Smith

PB HLTH 272A Geographic Information Science for Public and Environmental Health 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** Introductory statistics course or equivalent.

Geographic information systems (GIS) have emerged as an important tool for performing health and environmental analyses. GIS is generally seen as a spatial analysis system for the organization, storage, retrieval, and analysis of data for which the location and other spatial attributes are considered important (e.g., incidence of a specific disease condition in relation to a pollution source). GIS also encompasses the organizational structure, personnel, software, and hardware needed to support spatial analysis. For many health and social scientists, GIS has evolved into a new lens for viewing their work. The course will provide students with an introduction to this exciting and expanding field of inquiry. On successful completion of the course you should possess the following skills and knowledge: 1) A basic understanding of the fundamental geographic and cartographic concepts that underlie GIS. 2) Working knowledge of ArcGIS, a powerful "desktop" GIS software package that runs in a Windows environment. 3) Introductory knowledge of past, present, and possible future applications of GIS for health and environmental studies. Final exam not required. Instructor: Jerrett

PB HLTH 272B Case Studies in Environmental and Occupational Epidemiology 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Public Health 250C and 241.

Using published studies as examples, we will focus on key epidemiologic methods as they arise in the study of environmental hazards in the community and workplace. Selected topics include the validity of exposure assessment for both community-based and workplace-based studies, specific forms of selection bias (e.g., healthy worker survivor effect), measurement error (e.g., exposure misclassification), time varying confounding, and analytical methods to model exposure-response (e.g., person-years, causal models, spatial analysis, and nonlinear models) in environmental and occupational epidemiology. Grades will be based on class participation, homework, and final project.

Final exam not required. Instructors: Buffler, Eisen, Hammond

PB HLTH 275 Current Topics in Vaccinology 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered alternate years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** 250A, 260A, and 264 or consent of instructor.

This is an advanced level course designed to cover current issues related to the biological and analytical aspects of vaccine development and utilization. Latest developments in recombinant vaccine technology, vaccine delivery systems, "naked DNA" vaccines, "designer" vaccines, new adjuvants, anti-tumor vaccines, epidemiological approaches to assess vaccine efficacy, effectiveness, and safety will be discussed and covered.

Final exam not required. Instructors: Riley, Enanoria

PB HLTH 276 Integrity in the Conduct of Research 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered odd-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate students in good standing.

This course presents an analysis of the core issues for the responsible and ethical conduct of research in biomedical sciences. Issues pertinent to standards and responsibilities of research conduct, authorship and publication practices, peer review and privileged information, conflicts of interest, collaboration, and use of animals and humans in research will be defined and explored. The legal and regulatory structures, definitions of misconduct and process of misconduct investigations will be presented.

Final exam not required. Instructor: Stephens

PB HLTH 281 Public Health and Spirituality 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 10 weeks.**Prerequisites:** Completion or concurrent enrollment in at least one other course in public health, or consent of instructor.

This course presents a brief introduction to the emerging field of spirituality and health. We examine scholarly and scientific views of links between spirituality, religion, and health. Topics include highlights and overviews of the rapidly emerging scientific evidence base, public health relevance, collaborations with faith-based organizations, and other practical applications.

Final exam required. Instructor: Oman

PB HLTH 282 Topics in the History of Medicine and Public Health 2 or 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

A series of lectures and seminars providing detailed scrutiny of selected topics in the history of medicine, public health, and the allied health sciences. The precise content will vary from year to year and may reflect, in part, topics of class interest. Students electing to take the course for 3 units will be assigned a research topic.

Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam not required.

Instructor: Hook

PB HLTH 285A Public Health Injury Prevention and Control 2 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

Injuries are a major and often neglected health problem with substantial human and economic costs. Injuries are the leading cause of death from the first year of life to age 45, and the leading cause of lost potential years of life. This course provides an historical and conceptual framework within which to consider injuries (both intentional and unintentional) as social, and public health problems. Through review of epidemiology and intervention studies, course work will consider the causes and consequences of traumatic injury within developmental, social and economic contexts. Particular emphasis is placed on alternative strategies for injury prevention and on the relative benefits of intervention at different levels.

Final exam not required. Instructor: Ragland

PB HLTH C285/CIV ENG C265 Traffic Safety and Injury Control 3 Units**Department:** Public Health; Civil and Environmental Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

This course applies principles of engineering, behavioral science, and vision science to preventing traffic collisions and subsequent injury. A systematic approach to traffic safety will be presented in the course, and will include (1) human behavior, vehicle design, and roadway design as interacting approaches to preventing traffic crashes and (2) vehicle and roadway designs as approaches to preventing injury once a collision has occurred. Implications of intelligent transportation system concepts for traffic safety will be discussed throughout the course.

Final exam not required. Instructor: Ragland

PB HLTH 288C Preventive Medicine Residency Seminar: Managed Care and Preventive Medicine 1 Unit**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 8 weeks.**Prerequisites:** MD or medical student.

This seminar is required for preventive medicine residents, but is also open to other physicians and medical students interested in preventive medicine and public health practice. It provides an overview of preventive medicine practice, especially those areas covered by the American Board of Preventive Medicine examination in public health and preventive medicine. The objectives of this seminar are to review basic principles and practices of health care organization and financing, quality assurance, clinical practice guidelines, clinical preventive services and health care delivery for the underserved and to describe the role of the preventive medicine physician in health care organizations.

Two hours of seminar per week for eight weeks. Final exam not required. Instructors: Rutherford, Seward

PB HLTH 288D Preventive Medicine Residency Seminar: Public Administration 1 Unit**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 8 weeks.**Prerequisites:** MD or medical student. MD or medical student.

This seminar is required for preventive medicine residents, but is also open to other physicians and medical students interested in preventive medicine and public health practice. It provides an overview of preventive medicine practice, especially those areas covered by the American Board of Preventive Medicine examination in public health and preventive medicine. The objectives of this seminar are to review basic principles and practices of public administration as they relate to the management of a governmental public health agency and to describe the role of the preventive medicine physician as a leader and administrator in those agencies.

Two hours of seminar per week for eight weeks. Final exam not required. Instructors: Rutherford, Seward

PB HLTH W289 Interdisciplinary Health Seminar 3 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 14 hours of lecture per week for 2 weeks and 4 hours of web-based lecture plus 4 hours of web-based discussion per week for 4 weeks. This is an online course.

This hybrid seminar course consists of both online and face-to-face instruction, with the objective of mastering, at least partially, the following competencies: basic leadership skills for public health leaders, ability to design and conduct a needs assessment and stakeholder analysis, the ability to critically analyze a public health journal article, the ability to conduct an ethical analysis in public health, basic negotiation skills, and the ability to complete a Human Subjects Protocol (IRB) application. Final exam not required. Instructor: Hosang

PB HLTH 290 Health Issues Seminars 1 - 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 to 4 hour of Seminar per week for 15 weeks.

A discussion of current developments and issues in public health of interest to faculty and students of the department as a whole. Content varies from semester to semester depending upon current issues and interests.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PB HLTH 291A Preparation for Public Health Practice 1 Unit**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Workshop per week for 15 weeks.

A series of skills-based workshops designed to introduce the student to specialized skills needed in the public health workplace. These workshops are designed to complement the core curriculum of the School of Public Health and are selected based on regular feedback from faculty, public health practitioners, and students. Workshop facilitators include consultants, CPHP field supervisors, and public health practitioners with expertise in the subject. This course or series of workshops is open to all M.P.H. and Dr.Ph. students. The student selects from a list of two-hour workshops to total 1 unit equal to 15 hours of class time, plus readings that are assigned for many of the workshops. Workshop topics have included writing for publication, moderating focus groups, human resources management, legislative policy and advocacy, negotiation, evaluation, tools for financial planning, scientific grant writing, leadership, oral presentations, strategic planning, cultural competency, time management, and budgeting.

Final exam not required. Formerly known as 291.

PB HLTH 292 Seminars for M.P.H. Students 1 - 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 to 4 hours of seminar per week.

Current topics and special issues in the health field.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PB HLTH 293 Doctoral Seminar 1 - 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 to 4 hour of Seminar per week for 15 weeks.

Discussion and analysis of dissertation research projects, as well as of conceptual and methodological problems in planning and conducting health research.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PB HLTH 295 Seminars 1 - 4 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hours of seminar per week.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PB HLTH 296 Special Study 1 - 10 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Independent study.

Designed to permit any qualified graduate student to pursue special study under the direction of a faculty member.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PB HLTH N297A Field Study in Public Health 1 - 6 Units**Department:** Public Health**Course level:** Graduate**Term course may be offered:** Summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Forty-5 hours of work per term per unit.

Final exam not required.

PB HLTH N297B Field Study in Public Health: Environmental Health Sciences 1 - 6 Units**Department:** Public Health**Course level:** Graduate**Term course may be offered:** Summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Forty-5 hours of work per term per unit.

Final exam not required.

PB HLTH N297C Field Study in Public Health: Epidemiology/Biostatistics 1 - 6 Units**Department:** Public Health**Course level:** Graduate**Term course may be offered:** Summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Forty-5 hours of work per term per unit.

Final exam not required.

PB HLTH N297D Field Study in Public Health: Health Policy and Management 1 - 6 Units**Department:** Public Health**Course level:** Graduate**Term course may be offered:** Summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Forty-5 hours of work per term per unit.

Final exam not required.

PB HLTH N297E Field Study in Public Health: Maternal and Child Health 1 - 6 Units**Department:** Public Health**Course level:** Graduate**Term course may be offered:** Summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Forty-5 hours of work per term per unit.

Final exam not required.

PB HLTH N297F Field Study in Public Health: Nutrition 1 - 6 Units**Department:** Public Health**Course level:** Graduate**Term course may be offered:** Summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Forty-5 hours of work per term per unit.

Final exam not required.

PB HLTH N297G Field Study in Public Health: Health and Social Behavior 1 - 6 Units**Department:** Public Health**Course level:** Graduate**Term course may be offered:** Summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Forty-5 hours of work per term per unit.

Final exam not required.

PB HLTH N297H Field Study in Public Health: Infectious Diseases 1 - 6 Units**Department:** Public Health**Course level:** Graduate**Term course may be offered:** Summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Forty-5 hours of work per term per unit.

Final exam not required.

PB HLTH 299 Independent Research 1 - 12 Units**Department:** Public Health**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 to 12 hour of Independent study per week for 15 weeks. 1 to 12 hour of Independent study per week for 8 weeks. 1 to 12 hour of Independent study per week for 6 weeks.

Independent study and research.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PB HLTH 375A School of Public Health Schoolwide Pedagogy Course 2 Units

Department: Public Health

Course level: Professional course for teachers or prospective teachers

Terms course may be offered: Fall and spring

Grading: Offered for satisfactory/unsatisfactory grade only.

Hours and format: 2 hours of Session per week for 15 weeks.

Skill development and professional preparation for graduate student instructors in public health courses. Preparing for and leading discussion sections. Designing writing prompts. Preparing and creating problem sets. Working with students one-on-one. Grading students' writing and exams. Self assessment. Developing a course syllabus. Use of technology in public health classes. Required for first-time public health GSIs who are not participating in an SPH divisional pedagogy course.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Public Health 333.

PB HLTH 375B Instructional Techniques in Biostatistics 2 Units

Department: Public Health

Course level: Professional course for teachers or prospective teachers

Terms course may be offered: Fall and spring

Grading: Offered for satisfactory/unsatisfactory grade only.

Hours and format: 2 hours of lecture per week.

Discussion and practice of techniques in teaching biostatistics as applied to public health topics.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Public Health 300. Instructor: Lahiff

Public Policy (PUB POL)

PUB POL 24 Freshman Seminar 1 Unit

Department: Public Policy

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: The grading option will be decided by the instructor when the class is offered.

Hours and format: 1 hour of Seminar per week for 15 weeks.

The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Freshman seminars are offered in all campus departments, and topics vary from department to department and semester to semester. Enrollment limited to 15 freshmen.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

PUB POL 39B Freshman/Sophomore Seminar 2 Units

Department: Public Policy

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: The grading option will be decided by the instructor when the class is offered.

Hours and format: 2 hours of seminar per week for 10 weeks.

Freshman and sophomore seminars offer lower-division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester. Enrollment limits are set by the faculty, but the suggested limit is 25.

Final exam required.

PUB POL 98 Group Study in Public Policy 1 - 4 Units

Department: Public Policy

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

Hours and format: 1 to 4 hour of Directed group study per week for 15 weeks.

Group study on selected public policy topics. Open to freshmen and sophomores.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PUB POL 101 Introduction to Public Policy Analysis 4 Units

Department: Public Policy

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

A systematic and critical approach to evaluating and designing public policies. Combines theory and application to particular cases and problems. Diverse policy topics, including environmental, health, education, communications, safety, and arts policy issues, among others. Final exam not required.

PUB POL 103 Wealth and Poverty 4 Units

Department: Public Policy

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of lecture and 2 hours of discussion per week.

This course is designed to provide students with a deeper understanding both of the structure of political economy and of why the distribution of earnings, wealth, and opportunity have been diverging in the United States and in other nations. It is also intended to provide insight into the political and public policy debates that have arisen in light of the divergence as well as possible means of reversing it.

Final exam required. Instructor: Reich

PUB POL C103/L & S C180U Wealth and Poverty 4 Units

Department: Public Policy; Letters and Science

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Lecture and 2 hours of Discussion per week for 15 weeks.

This course is designed to provide students with a deeper understanding both of the organization of the political economy in the United States and of other advanced economies, and of why the distribution of earnings, wealth, and opportunity have been diverging in the United States and in other nations. It also is intended to provide insights into the political and public-policy debates that have arisen in light of this divergence, as well as possible means of reversing it.

Students will receive no credit for C103 after taking 103. Final exam required. Instructor: Reich

PUB POL 117AC Race, Ethnicity, and Public Policy 4 Units**Department:** Public Policy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The objective of this course is to use the tools and insights of public policy analysis as a means of understanding the ways in which policies are shaped by and respond to issues of race, ethnicity, and cultural difference. The course is organized around a series of discrete policy problems involving issues of race and ethnicity. It is designed to allow for comparative analysis within and across cases to explore the variety of ways in which policy intersects with different racial and ethnic groups. Satisfies the American Cultures requirement. Final exam required.

PUB POL C142/ECON C142/POL SCI C131A Applied Econometrics and Public Policy 4 Units**Department:** Public Policy; Economics; Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and zero to 1 hour of discussion/laboratory per week.**Prerequisites:** 140 or 141 or consent of instructor.

This course focuses on the sensible application of econometric methods to empirical problems in economics and public policy analysis. It provides background on issues that arise when analyzing non-experimental social science data and a guide for tools that are useful for empirical research. By the end of the course, students will have an understanding of the types of research designs that can lead to convincing analysis and be comfortable working with large scale data sets. Final exam required.

PUB POL 156 Program and Policy Design 4 Units**Department:** Public Policy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Studio/laboratory in the design of nonphysical environments. Complements courses in policy analysis, public management, economics, and political science; especially intended to integrate elements of professional programs in public policy and related areas. Students will design, in groups and individually, programs and policies that create value in the public sector, including statutes, regulations, and implementation projects. Comparative reviews will feature invited guests. Undergraduate level of 256.

Final exam not required. Instructor: O'Hare

PUB POL 157 Arts and Cultural Policy 4 Units**Department:** Public Policy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Survey of government policy toward the arts (especially direct subsidy, copyright and regulation, and indirect assistance) and its effects on artists, audiences, and institutions. Emphasizes "highbrow" arts, U.S. policy, and the social and economic roles of participants in the arts. Readings, field trips, and case discussion. One paper in two drafts required for undergraduate credit; graduate credit awarded for an additional short paper to be arranged and attendance at four advanced colloquia throughout the term. Undergraduate level of 257.

Final exam required. Formerly known as 108. Instructor: O'Hare

PUB POL C157/L & S C180X Arts and Cultural Policy 4 Units**Department:** Public Policy; Letters and Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Survey of government policy toward the arts (especially direct subsidy, copyright and regulation, and indirect assistance) and its effects on artists, audiences, and institutions. Emphasizes "highbrow" arts, U.S. policy, and the social and economic roles of participants in the arts. Readings, field trips, and case discussion. One paper in two drafts required for undergraduate credit; graduate credit awarded for an additional short paper to be arranged and attendance at four advanced colloquia throughout the term. Undergraduate level of 257.

Students will receive no credit for Public Policy C157/Letters and Science C180x after taking Public Policy 108 or 157. Final exam required.

Instructor: O'Hare

PUB POL C164/DEMOG C164 Impact of Government Policies on Poor Children and Families 4 Units**Department:** Public Policy; Demography**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Examination of the impact of policies of state intervention and public benefit programs on poor children and families. Introduction to child and family policy, and study of specific issue areas, such as income transfer programs, housing, health care, and child abuse.

This course may be applied to the Demography major. Final exam required. Instructor: Mauldon

PUB POL 179 Public Budgeting 4 Units**Department:** Public Policy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Public sector budgeting incorporates many, perhaps most, of the skills of the public manager and analyst. The goal of this course is to develop and hone these skills. Using cases and readings from all levels of American government, the course will allow the student to gain and understanding of the effects and consequences of public sector budgeting, its processes and participants, and the potential impacts of various reforms. Undergraduate level of Public Policy 269. This course can be applied to the political science major.

Final exam required. Instructor: Ellwood

PUB POL 182 Environment and Technology from the Policy and Business Perspective 4 Units**Department:** Public Policy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Most environmental issues involve technology, either in the role of "villain" or "hero." This course uses the lens of specific technologies to survey environmental policy and management, with an emphasis on the complexities of policy-making with diverse interest groups. The class includes case studies, guest practitioners, and a group project in which students employ a range of analytic tools and frameworks in order to develop creative, effective, and actionable environmental solutions.

Final exam not required. Instructor: Taylor

PUB POL C184/ENE,RES C100 Energy and Society 4 Units**Department:** Public Policy; Energy and Resources Group**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 1 hour of discussion per week, plus 8 hours of outside readings, research, papers, and work.

Energy sources, uses, and impacts: an introduction to the technology, politics, economics, and environmental effects of energy in contemporary society. Energy and well-being; energy in international perspective, origins, and character of energy crisis.

Final exam required. Instructor: Kammen

PUB POL 190 Special Topics in Public Policy 1 - 4 Units**Department:** Public Policy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1 to 4 hours of lecture per week depending on the topic. 2 to 8 hours of lecture per week for 7 weeks depending on topic. Course examines current problems and issues in the field of public policy. Topics may vary from year to year and will be announced at the beginning of the semester. Open to students from other departments.

Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam required.

PUB POL 198 Directed Group Study 1 - 4 Units**Department:** Public Policy**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Directed group study per week for 15 weeks.**Prerequisites:** Consent of instructor.

Group study of a selected topic or topics in Public Policy. Meetings to be arranged.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PUB POL 199 Supervised Independent Study and Research 1 - 4 Units**Department:** Public Policy**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.

Hours and format: 1 to 4 hour of Independent study per week for 15 weeks. 1.5 to 6 hours of Independent study per week for 10 weeks. 2 to 7.5 hours of Independent study per week for 8 weeks. 2.5 to 10 hours of Independent study per week for 6 weeks.

Prerequisites: Upper division standing.

For upper division students wishing to pursue special study and directed research under direction of a member of the staff. Enrollment restrictions apply; see the Introduction to Courses and Curricula section of this catalog.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PUB POL 200 Introduction to Policy Analysis 4 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Discussion per week for 15 weeks.**Prerequisites:** Open only to students in the Graduate School of Public Policy.

This introductory course will integrate various social science disciplines and apply these perspectives to problems of public policy. Throughout the academic term, students will apply knowledge of politics, economics, sociology, and quantitative methods in the analysis of case studies of policymakers and managers making decisions. Students learn to use the techniques of social science to evaluate projects and programs. Course will include the preparation of a major paper for a client.

Final exam not required.

PUB POL 205 Advanced Policy Analysis 6 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Open only to majors who have completed the core curriculum.

Each student will conduct thorough analysis on a major policy question. In this research, students will apply the interdisciplinary methods, approaches, and perspectives studied in the core curriculum.

Final exam not required.

PUB POL 210A The Economics of Public Policy Analysis 4 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of lecture/discussion and 1 hour of session per week.**Prerequisites:** Open only to students in the Graduate School of Public Policy.

Theories of microeconomic behavior of consumers, producers, and bureaucrats are developed and applied to specific policy areas. Ability to analyze the effects of alternative policy actions in terms of 1) the efficiency of resource allocation and 2) equity is stressed. Policy areas are selected to show a broad range of actual applications of theory and a variety of policy strategies.

Final exam not required. Instructor: Friedman

PUB POL 210B The Economics of Public Policy Analysis 4 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of lecture/discussion and 1 hour of session per week.**Prerequisites:** Open only to students in the Graduate School of Public Policy.

Final exam not required. Instructor: Friedman

PUB POL 220 Law and Public Policy 4 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of lecture/discussion per week.**Prerequisites:** Open only to students in the Graduate School of Public Policy.

Focuses on legal aspects of public policy by exposing students to primary legal materials, including court decisions and legislative and administrative regulations. Skills of interpretation and legal draftsmanship are developed. Relationships among law-making agencies and between law and policy are explored through case-centered studies.

Final exam not required. Instructor: Kirp

PUB POL C221/DEVP C221/ENE,RES C221 Climate, Energy and Development 3 Units**Department:** Public Policy; Development Practice; Energy and Resources Group**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.**Prerequisites:** Graduate student standing or consent of instructor.

Graduate seminar examining the role of energy science, technology, and policy in

international development. The course will look at how changes in the theory and practice

of energy systems and of international development have co-evolved over the past half-

century, and what opportunities exist going forward.

A focus will be on rural and decentralized energy use, and the issues of technology, culture,

and politics that are raised by both current trajectories, and potential alternative energy

choices. We will explore the frequently divergent ideas about energy and development that

have emerged from civil society, academia, multinational development agencies, and the

private and industrial sector.

Final exam required. Instructor: Kammen

PUB POL 240A Decision Analysis, Modeling, and Quantitative Methods 4 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 4 hours of Lecture per week for 15 weeks.**Prerequisites:** Open only to students in the Graduate School of Public Policy.

An integrated course on the use of quantitative techniques in public policy analysis: computer modeling and simulation, linear programming and optimization, decision theory, and statistical and econometric analysis of policy-relevant data. The student develops a facility in distilling the policy relevance of numbers through an analysis of case studies and statistical data sets.

Final exam not required.

PUB POL 240B Decision Analysis, Modeling, and Quantitative Methods 4 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 4 hours of Lecture per week for 15 weeks.**Prerequisites:** Open only to students in the Graduate School of Public Policy.

An integrated course on the use of quantitative techniques in public policy analysis: computer modeling and simulation, linear programming and optimization, decision theory, and statistical and econometric analysis of policy-relevant data. The student develops a facility in distilling the policy relevance of numbers through an analysis of case studies and statistical data sets.

Final exam not required.

PUB POL 250 Political and Agency Management Aspects of Public Policy 4 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of lecture/discussion per week.**Prerequisites:** Open only to students in the Graduate School of Public Policy.

This course examines the political and organizational factors involved in developing new policies, choosing among alternatives, gaining acceptance, assuring implementation, and coping with unanticipated consequences. Materials will include case studies, theoretical, empirical, and interpretive works from several disciplines.

Final exam not required. Formerly known as 230A. Instructor: Ellwood

PUB POL 251 Microeconomic Organization and Policy Analysis 3 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of seminar and 1 hour of conference per week.**Prerequisites:** Business Administration 101B or Economics 200A or equivalent, and consent of instructor.

Research seminar to develop public policy analyses based on microeconomic theories of organization, including collective demand mechanisms, behavioral theory of regulatory agencies and bureaucracies, and productivity in the public sector.

Final exam not required. Instructor: Friedman

PUB POL C253/A, RESEC C253 International Economic Development Policy 3 Units**Department:** Public Policy; Agricultural and Resource Economics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course emphasizes the development and application of policy solutions to developing-world problems related to poverty, macroeconomic policy, and environmental sustainability. Methods of statistical, economic, and policy analysis are applied to a series of case studies. The course is designed to develop practical professional skills for application in the international arena.

Final exam not required.

PUB POL 256 Program and Policy Design 4 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Studio/laboratory in the design of non-physical environments.

Complements courses in policy analysis, public management, economics, and political science; especially intended to integrate elements of professional programs in public policy and related areas. Students will design, in groups and individually, programs and policies that create value in the public sector, including statutes, regulations, and implementation projects. Comparative reviews will feature invited guests. Graduate level of 156.

Final exam not required. Formerly known as 206. Instructor: O'Hare

PUB POL 257 Arts and Cultural Policy 4 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Survey of government policy toward the arts (especially direct subsidy, copyright and regulation, and indirect assistance) and its effects on artists, audiences, and institutions. Emphasizes "highbrow" arts, U.S. policy, and the social and economic roles of participants in the arts. Readings, field trips, and case discussion. One paper in two drafts required for undergraduate credit; graduate credit awarded for an additional short paper to be arranged and attendance at four advanced colloquia throughout the term. Graduate level of 157.

Final exam required. Formerly known as 208. Instructor: O'Hare

PUB POL 259 Benefit-Cost Analysis 4 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of seminar per week.**Prerequisites:** Calculus and Intermediate Microeconomics or consent of instructor.

This course discusses and criticizes the conceptual foundations of cost-benefit analysis, and analyzes in depth some important applied aspects such as endogenous prices of other commodities, methods to infer willingness to pay, valuation of life, uncertainty and the rate of discount. The goal of this course is to teach you the theory and practice of cost-benefit analysis, with an eye to preparing you to confidently conduct a CBA for an employer or client starting on day one of your career as a policy analyst. There will be three main components to the course: The textbook, discussion, and the semester project. Final exam not required. Instructor: Acland

PUB POL 260 Public Leadership and Management 4 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of lecture/discussion per week.**Prerequisites:** Open only to students in the Graduate School of Public Policy and a select few students at other graduate schools.

This course is designed to help students develop their skills for leading and managing groups, government agencies, nonprofit organizations, and public advocacy, with the goal of achieving positive social change. Materials include case studies, analyses, and works from several disciplines. Course is open to first and second year MPP students, but recommended for first year.

Final exam not required. Formerly known as Public Policy 230B. Instructor: Reich

PUB POL 269 Public Budgeting 4 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.

Public sector budgeting is an activity that incorporates many, perhaps most, of the skills of the public manager and analyst. The goal of this course is to develop and hone these skills. Using cases and readings from all levels of American government, the course will allow the student to gain an understanding of the effects and consequences of public sector budgeting, its processes and participants, and the potential impacts of various reforms. Graduate level of Public Policy 179.

Final exam required. Formerly known as 209. Instructor: Ellwood

PUB POL 270 Kid-First Policy: Family, School, and Community 4 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This seminar appraises the critical policy choices that shape the lives of children and adolescents from birth through high school and beyond. The issues are as varied-and hotly debated by politicians and policy-makers-as banning Coke machines in schools to reduce obesity, regulating teenage abortion, providing universal preschool and helping abused children. Students from across the campus-public policy, education, social welfare, business, sociology, political science, economics-bring different perspectives. Discussions and readings draw on insights from across the policy sciences. Problem-solving is the focus in seminar meetings and research projects.

Final exam not required. Instructor: Kirp

PUB POL 279 Research Design and Data Collection for Public Policy Analysis 3 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** At least one semester of statistics.

Public policy analysis requires a sophisticated understanding of a variety of types of data. Empirical arguments and counterarguments play a central role in policy debates. Quantitative analysis courses teach you how to analyze data; this course will introduce you to strategies of data collection and principles for critically evaluating data collected by others. Topics include measurement reliability and validity, questionnaire design, sampling, experimental and quasi-experimental program evaluation designs, qualitative research methods, and the politics of data in public policy.

Final exam not required. Instructor: MacCoun

PUB POL 280 Ethics, Policy, and the Power of Ideas 4 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This seminar brings together two related frames for policy thinking: the ethics of policy, that is, what does it mean to do the right thing? and the intervention of policy, that is, how do new policy paradigms emerge? Those who seek to govern well inescapably confront questions of value in their political, professional, and personal choices. The discussion of ethical dilemmas, which will take up the first half of the semester, is designed to provoke analytic reflection on the moral challenges and responsibilities of public policymaking in a democracy. The focus is on the many and often competing obligations, commitments and values that should guide public actors, as well as on the public principles that guide the design of good public policy. Politics and conventional analytics dominate policy in the short run. But over the longer term, conceptualizations as varied as exit/voice/loyalty, satisficing, the tipping point, memes, winner-take-all, strong democracy, broken windows, and the prisoners dilemma profoundly influence the policy conversation..

Final exam not required. Instructor: Kirp

PUB POL 282 Environment and Technology from the Policy and Business Perspective 4 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Most environmental issues involve technology, either in the role of "villain" or "hero." This course uses the lens of specific technologies to survey environmental policy and management, with an emphasis on the complexities of policy-making with diverse interest groups. The class includes case studies, guest practitioners, and a group project in which students employ a range of analytic tools and frameworks in order to develop creative, effective, and actionable environmental solutions. Final exam not required. Instructor: Taylor

PUB POL C284/ENE,RES C200 Energy and Society 4 Units**Department:** Public Policy; Energy and Resources Group**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 1 hour of discussion per week, plus 8 hours of outside readings, research, papers, and work.

Energy sources, uses, and impacts; an introduction to the technology, politics, economics, and environmental effects of energy in contemporary society. Energy and well-being; energy international perspective, origins, and character of energy crisis.

Final exam not required. Instructor: Kammen

PUB POL C285/NUC ENG C285 Nuclear Security: The Nexus Between Policy and Technology 4 Units**Department:** Public Policy; Nuclear Engineering**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The course will review the origins and evolution of nuclear energy, how it has been applied for both peaceful and military purposes, and the current and prospective challenges it presents. The purpose of the course is to educate students on the policy roots and technological foundations of nuclear energy and nuclear weapons so they are positioned to make original contributions to the field in their scholarly and professional careers.

Final exam not required. Instructors: Nacht, Prussin

PUB POL 286 US National Security Policy 4 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

An extensive examination of contemporary U.S. national security issues and how policy is developed and implemented. Topics include Russia after the Cold War with emphasis on nuclear and biological weapons; crisis decision-making and the key players in national security policy; the struggle against terrorism, especially since 9/11, with some reference to homeland security; the challenges to U.S. policy in the Middle East after the Arab spring; China as the chief great power rival; and the role of unmanned vehicles, cyber, and special operations as key elements of U.S. policy. Students will write policy memos, participate in crisis simulation exercises, and complete a take-home final examination. Final exam not required. Instructor: Nacht

PUB POL 288 Risk and Optimization Models for Policy 4 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks.**Prerequisites:** One course in statistics/probability.

Optimization and simulation models in stochastic and deterministic contexts. Monte Carlo simulation, Bayesian models and decisions, linear and nonlinear programming, queuing models, and a review of heuristics and biases in individual risk assessment. Hands-on exploration of tools oriented to management and policy decisions in public and nonprofit organizations. Objective for students: lifelong habit of learning and using new analytic methods.

Final exam not required. Instructor: O'Hare

PUB POL 290 Special Topics in Public Policy 1 - 4 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1 to 4 hours of lecture per week for 14 weeks depending on topic. 2 to 8 hours of lecture per week for 7 weeks depending on topic.

Course examines current problems and issues in the field of public policy. Topics may vary from year to year and will be announced at the beginning of the semester. Open to students from other departments. Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam not required.

PUB POL 292 Directed Advanced Study 1 - 12 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1 to 12 hour of Independent study per week for 15 weeks. 1.5 to 18 hours of Independent study per week for 10 weeks.

Open to qualified graduate students wishing to pursue special study and research under direction of a member of the staff.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PUB POL 295 Supervised Research Colloquium 1 - 9 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks.**Prerequisites:** Graduate standing.

Open to qualified graduate students wishing to pursue special research under direction of a member of the staff. Discussion and analysis of dissertation research projects, including conceptual and methodological problems of designing and conducting policy research.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PUB POL 296 Ph.D. Seminar 3 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of seminar and 1 hour of consultation per week.**Prerequisites:** Must be a Ph.D. student in public policy in third year or beyond.

Discussion and analysis of dissertation research projects, including conceptual and methodological problems of designing and conducting public policy research.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PUB POL 297 Graduate Student Led Course in Public Policy 1 Unit**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1.5 hours of lecture per week for 15 weeks. 3 hours of lecture per week for 7 weeks.**Prerequisites:** Open to graduate students only.

Course examines current problems and issues in the field of public policy. Topics vary from year to year.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

PUB POL 298 Directed Advanced Study 1 - 12 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks. 1 to 4 hour of Independent study per week for 8 weeks. 1 to 5 hour of Independent study per week for 6 weeks.

Open to qualified graduate students wishing to pursue special study and research under direction of a member of the staff.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

PUB POL 299 Independent Study in Preparation for the Advanced Policy Analysis 3 Units**Department:** Public Policy**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Zero hours of Independent study per week for 15 weeks.**Prerequisites:** Consent of faculty.

By arrangement with faculty. Open only to qualified second-year graduate students working toward the M.P.P. degree.

Credit to be awarded on completion of the Master's thesis. Course may be repeated for credit when topic changes. Final exam not required.

PUB POL 375 GSI Practicum 2 Units**Department:** Public Policy**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

This course is directed at Graduate Student Instructors for undergraduate and graduate courses, and reviews the most important elements of effective teaching, especially teaching graduate students in professional programs like the Master of Public Policy. It satisfies the graduate division requirement for a 300 course for GSI's.

Final exam not required. Formerly known as Public Policy 300. Instructor: O'Hare

Punjabi (PUNJABI)

PUNJABI 1A Introductory Punjabi 5 Units**Department:** Punjabi**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** 1A is prerequisite to 1B.

Gurmukhi script. Survey of grammar. Graded exercises, leading to a mastery of basic language patterns, essential vocabulary, and achievement of basic reading and writing skills.

Final exam required. Instructors: Ubhi, Upkar

Final exam required. Formerly known as 157.

RELIGST C132/NE STUD C135 Jewish Civilization I: The Biblical Period 4 Units**Department:** Religious Studies; Near Eastern Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This is the first course in a four-course sequence in the history of Jewish culture and civilization. It covers the biblical period and the period up to the destruction of the second temple. This course will explore the current state of our knowledge, including the legacy of ancient Near Eastern myth and religion, the history of Israelite religion, the literary features of biblical narrative, and the Dead Sea Scrolls.

Final exam required.

RELIGST C135/HISTORY C175B/UGIS C155 Jewish Civilization: Modern Period 4 Units**Department:** Religious Studies; History; Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This is the fourth course in a four-course sequence in the history of Jewish culture and civilization. It explores the major themes in Jewish history from 1750 to the present, with special attention paid to the transformation of Jewish communal and individual identity in the modern world. Topics to be treated include the breakdown of traditional society, enlightenment and emancipation, assimilation, Hasidism, racial anti-Semitism, colonialism, Zionism, and contemporary Jewish life in Europe, North America, and Israel. The multicultural nature of Jewish history will be highlighted throughout the course through the treatment of non-European Jewish narratives alongside the more familiar Ashkenazi perspective.

Final exam required.

RELIGST C161/S ASIAN C127 Religion in Early India 4 Units**Department:** Religious Studies; South Asian**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.

Designed as a two-semester sequence, these courses are an introduction to the religions that have their origin on the Indian subcontinent--Hinduism, Buddhism, Jainism, Sikhism, and tribal religions--as well as those that originated in other regions such as Islam, Christianity, Judaism, and Zoroastrianism. Organizing this material chronologically rather than teaching it by separate religious traditions facilitates comparisons and promotes an understanding not only of the differences among these religions but also some of their commonalities in philosophy, theology, and praxis.

Final exam required.

RELIGST C162/S ASIAN C141 Religion in South India 3 Units**Department:** Religious Studies; South Asian**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The development and practice of religion in South India. Emphasis will be on sources translated directly from Indian languages. Subjects covered include: the indigenous religion, the effect of Brahmanical religion, movements, and the practice of Hinduism in modern South India.

Final exam required. Instructor: G. Hart

RELIGST C165/S ASIAN C140 Hindu Mythology 4 Units**Department:** Religious Studies; South Asian**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.

Literary and religious aspects of Hindu myths. Reading of selected mythological texts in translation.

Final exam required. Formerly known as 140. Instructor: Goldman

RELIGST C166/S ASIAN C142 India's Great Epics: The Mahabharata and the Ramayana 4 Units**Department:** Religious Studies; South Asian**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 5A, 127, 140, or consent of instructor.

The course entails substantial selected readings from the great Sanskrit epic poems--the Mahabharata and the Ramayana in translation, selected readings from the corpus of secondary literature on Indian epic studies as well as lectures on salient issues in both. Discussion will focus on a variety of historical and theoretical approaches to the study of the poems and their extraordinary influence on Indian culture. Readings will be supplemented with selected showings of popular cinematic and television versions of the epics.

Final exam required. Instructor: Goldman

RELIGST 173AC/AFRICAM 173AC Gandhi and the Civil Rights Movement in America 3 Units**Department:** Religious Studies; African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course surveys the impact of Gandhi's philosophy of nonviolence and justice in American Civil Rights struggles. Through narratives, images from African American, itinerant Gandhian, and ethnic critics of race practice in American culture, we examine how Gandhian satyagraha shaped emergent civil resistance movements, as also the global appeal to nonviolent democracy. ACES component comprises internship with civil liberties partners that monitor local implementations of human rights treaties.

Satisfies the American Cultures requirement

Final exam required. Instructor: Bilimoria

RELIGST C182/SOCIOL C112 Sociology of Religion 4 Units**Department:** Religious Studies; Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 1, 3, 3AC or consent of instructor.

The course will locate the place of religious consciousness in human action and then survey comparatively and historically the role that religion has played in human society. Will include a general theory of the nature of religious experience, religious symbolism, and the basis of religious community.

Final exam required.

RELIGST 190 Topics in the Study of Religion 4 Units**Department:** Religious Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7.5 hours of lecture/discussion per week for 6 weeks. Selected topics or problems in the study of religion.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

RELIGST H195A Honors Course 3 Units**Department:** Religious Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Independent study.

Course may take one or two semesters at the option of the instructor and student with credit to be earned upon completion of a successful thesis.

Successful completion of the course will normally, but not necessarily, mean the awarding of honors.

Final exam not required.

RELIGST H195B Honors Course 3 Units**Department:** Religious Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Independent study.

Course may take one or two semesters at the option of the instructor and student with credit to be earned upon completion of a successful thesis.

Successful completion of the course will normally, but not necessarily, mean the awarding of honors.

Final exam not required.

RELIGST 198 Directed Group Study 1 - 4 Units**Department:** Religious Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Independent study.

Tutorial instruction in areas not covered by regularly scheduled courses.

Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 1A or equivalent.

Intensive argumentative writing drawn from controversy stimulated

through selected readings and class discussion. Satisfies the second half of the Reading and Composition requirement.

Satisfies the second half of the Reading and Composition requirement

Final exam not required. Formerly known as 1B.

RHETOR 2 Fundamentals of Public Speaking 2 Units**Department:** Rhetoric**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 hours of Lecture per week for 10 weeks. 4 hours of Lecture per week for 8 weeks. 5 hours of Lecture per week for 6 weeks.

Basic principles of rhetoric as applied to the criticism and practice of public speaking.

Final exam required.

RHETOR 10 Introduction to Practical Reasoning and Critical Analysis of Argument 4 Units

Department: Rhetoric

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 5.5 hours of lecture per week for 8 weeks. 7.5 to 9 hours of lecture/discussion per week for 6 weeks.

An introduction to practical reasoning and the critical analysis of argument. Topics treated will include: definition, the syllogism, the enthymeme, fallacies, as well as various non-logical appeals. Also, the course will treat in introductory fashion some ancient and modern attempts to relate rhetoric and logic.

Final exam required.

RHETOR 12 Introduction to the Rhetoric and Theory of Popular Culture 4 Units

Department: Rhetoric

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 7.5 hours of Lecture per week for 6 weeks.

This course examines both the rhetoric surrounding popular culture and the discourse inherent in popular culture itself. Envisioning popular culture as the medium of at once the most blatant and least obvious carrier of mass deployments of rhetoric in any given culture, this course seeks to uncover the various messages conveyed by what is popular and the extent to which pop culture engages in the act of creating itself and producing its own consumers. Race, gender, sexuality, and acculturation, as well as economic and power dynamics are among the issues to be discussed. The course will involve extensive reading of secondary critical texts and engagement with examples of the popular culture topic at hand in the context of critical inquiry. Topics vary.

Final exam required.

RHETOR 20 Rhetorical Interpretation 4 Units

Department: Rhetoric

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 5.5 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Introduction to the study of rhetorical interpretation, treating how the action of tropes, figures, and performance generates meaning in communication: from fiction and other forms of literature, to politics, to film, to visual and material culture generally.

Final exam required.

RHETOR 22 Rhetoric of Shakespearean Drama 4 Units

Department: Rhetoric

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 7.5 hours of Lecture per week for 6 weeks.

This class examines the way in which a distinctively rhetorical concern with persuasion, tropes, topicality, and modes of appeal can be engaged in readings of Shakespearean texts. Using written documents from the period along with contemporary rhetorical criticism and theory, the class analyzes the importance of rhetoric in the production and performance of Shakespeare's plays, in their particular rendering of verbal conflict and the scene of persuasion, and in the analysis of their participation in larger cultural contests over the legitimacy of the prevailing political, legal, moral, or natural order.

Final exam required.

RHETOR 24 Freshman Seminars 1 Unit

Department: Rhetoric

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: The grading option will be decided by the instructor when the class is offered.

Hours and format: 1 hour of Seminar per week for 15 weeks.

The Berkeley Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Berkeley Seminars are offered in all campus departments, and topics vary from department to department and semester to semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

RHETOR 39I Freshman/Sophomore Seminar 1.5 - 4 Units

Department: Rhetoric

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: The grading option will be decided by the instructor when the class is offered.

Hours and format: 1.5 to 4 hours of Seminar per week for 15 weeks.

Prerequisites: Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required.

RHETOR 98 Supervised Group Study 1 - 3 Units

Department: Rhetoric

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

Hours and format: 3 hours of work per week per unit.

Prerequisites: Consent of adviser.

Instruction for a small group of students on a topic initiated by those students.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

RHETOR 103A Approaches and Paradigms in the History of Rhetorical Theory 4 Units**Department:** Rhetoric**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 4.5 hours of Lecture and 1 hour of Discussion per week for 10 weeks. 6 hours of Lecture and 1 hour of Discussion per week for 8 weeks. 7.5 hours of Lecture and 1 hour of Discussion per week for 6 weeks.**Prerequisites:** 10 or consent of instructor.

Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Study of the textual strategies whereby the masses and mass culture emerge as objects of anxiety, hope, and scrutiny for social theorists of the 19th and 20th centuries.

Final exam required.

RHETOR 172 Rhetoric of Social Theory 4 Units**Department:** Rhetoric**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Rhetorical analysis of theorists from Durkheim and Weber, as well as Marx, Ricardo and Bentham, to contemporary representatives of social and economic thought.

Final exam required.

RHETOR 176 Rhetoric of Material Culture 4 Units**Department:** Rhetoric**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 10 or 20 and R1A-R1B sequence.

Where did the first collections originate? Why did people begin to collect? How did--and do--museums and museum collections contribute to the definition of the cultural values/power of elite groups? How do we define ourselves--as citizens, as members of a discipline or tribe, as nations--with reference to collections? What values/ideologies structure the debates and conflicts over definition, meaning, and ownership of collections? These are questions we will try to answer in the class. Final exam required.

RHETOR 180 Critical Theories of Science 4 Units**Department:** Rhetoric**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 8 weeks.

This course will examine the foundation of science and technology studies. Our methodology will be borrowed from critical theory and the philosophical movements upon which critical theory itself depends. The reading will be directed toward understanding those texts which form the theoretical and methodological basis for a critical theory of science and technology. The great success of science in proliferating technology into the larger sphere of modern western society has for the most part legitimated its approach and claims to be the method of attaining knowledge, at least within our own techno-scientific culture. Along with science's accomplishments, however, have come new questions as to the potential of the knowledge it brings, the technology it engenders and the power it carries. Technology is one of the means by which science proceeds, but perhaps more importantly it is the juncture between science and society as well as theory and praxis. This course will investigate the means by which writers have reflected upon science and technology. Final exam required. Instructor: Cohen

RHETOR 182 Rhetorics of Sexual Exchange and Sexual Difference 4 Units**Department:** Rhetoric**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 3 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

This course examines the centrality of sexual difference and sexual exchange to the structuring of societies, cultures, and political life. Possible topics include theories of desire and corporeality; the figure of woman as object of exchange in historical and contemporary contexts such as Sati, prostitution, surrogacy and IVF, and the global traffic in female labor; and an examination of how sexual difference functions as a blind-spot in theories of culture, society, and economy.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Formerly known as 179.

RHETOR 189 Special Topics 4 Units**Department:** Rhetoric**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.

Group instruction and investigation of topics not accommodated in regular course offerings.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

RHETOR H190A Honors Thesis 2 Units**Department:** Rhetoric**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** Tutorial. Individual study in consultation with faculty director as preparation for degree examinations.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Sanskrit (SANSKR)

SANSKR 100A Elementary Sanskrit 5 Units**Department:** Sanskrit**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 5 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.

Elements of Sanskrit grammar and practice in reading Sanskrit texts.

Final exam required. Instructor: S. Goldman

SANSKR 100B Elementary Sanskrit 5 Units**Department:** Sanskrit**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 5 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.

Elements of Sanskrit grammar and practice in reading Sanskrit texts.

Final exam required. Instructor: S. Goldman

SANSKR 101A Intermediate Sanskrit: Epic and Puranic Sanskrit 5 Units**Department:** Sanskrit**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 4 hours of lecture per week. 6 hours of lecture per week for 8 weeks. 8 hours of lecture per week for 6 weeks.**Prerequisites:** 100B. 101B may be taken before 101A with consent of instructor.

Introduces students to the itihasa/puranic traditions and related commentarial style of Sanskrit. An extended passage from Valmiki's Ramayana, Vyasa's Mahabharata, or one of the Mahapuranas is normally read with commentary, if available. The development of strong reading skills is the focus of the class. Additionally, students are introduced to the use of hard copy and web-based resources. Grammar is reviewed and explained as needed. Students are also introduced to the current scholarship on epic literature. Students are expected to memorize at least one verse per class for recitation. Emphasis is placed on correct prosody and pronunciation. Submission of an annotated translation project, assigned in class, is required.

Course Objectives: Course content changes every semester and may be repeated for credit. Reading of texts in the original language. Students are expected to prepare readings for translation in class. Mastering of grammar and genre-specific style is emphasized. Additionally students skills in writing, listening, and speaking of Sanskrit are further developed. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Instructor: S. Goldman

Course may be repeated for credit when topic changes. Final exam not required.

SCANDIN 150 Studies in Scandinavian Literature 4 Units**Department:** Scandinavian**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.

Variable subject matter; see departmental announcement for description.

Sample topics: Scandinavian romanticism; the Modern Breakthrough; literature by and about women; the political tradition. Readings and discussion in English.

Final exam required.

SCANDIN C160/RELIGST C108 Scandinavian Myth and Religion 4 Units**Department:** Scandinavian; Religious Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.

Religious beliefs and practices during the Viking Age in Scandinavia and their manifestations in later recordings. Readings and discussion in English.

Final exam required.

SCANDIN 165 Scandinavian Folklore 4 Units**Department:** Scandinavian**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Scandinavian folklore, emphasizing oral narrative traditions (legends and folk belief, folktales, ballads) and their contexts. Such minor verbal forms as proverbs, riddles, and formulas will also be considered. Readings and discussion in English.

Final exam required. Instructor: Lindow

SCANDIN 170 Arctic Folklore and Mythology in Nordic Lands 4 Units**Department:** Scandinavian**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Survey of the folklore and mythology of the principal non-Scandinavian peoples of the Nordic lands: Finns, Saami, Greenland, Inuit. Comparative evidence from other circumpolar traditions and from ancient and modern Scandinavian tradition. Readings and discussion in English.

Final exam required. Instructor: Lindow

SCANDIN 180 Special Topics in Scandinavian 4 Units**Department:** Scandinavian**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Topics will vary from semester to semester. Additional screening time may be required for film topics. See departmental announcement for offerings. Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam required.

SCANDIN 198 Group Study for Advanced Undergraduates 2 - 4 Units**Department:** Scandinavian**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Directed study.**Prerequisites:** Two years study of one Scandinavian language.

Advanced readings and interpretation of Scandinavian texts.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SCANDIN 199 Independent Study and Research 2 - 4 Units**Department:** Scandinavian**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Directed study.**Prerequisites:** Two years study of one Scandinavian language.

Courses in Scandinavian literature, culture, or history. Supervised study; restricted enrollment.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SCANDIN 201A Old Norse 4 Units**Department:** Scandinavian**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

An introduction to the language of medieval Iceland and Norway.

Grammar, historical phonology, and texts.

Final exam required. Instructor: Lindow

SCANDIN 201B Norse Literature 4 Units**Department:** Scandinavian**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 201A or equivalent.

Literary production of early Iceland and Norway. Reading of representative texts in the original.

Final exam not required. Instructor: Lindow

SCANDIN 206 Studies in Philology and Linguistics 4 Units**Department:** Scandinavian**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Variable subject matter; see departmental announcement for description.

Sample topics: runology; history of the Scandinavian languages; dialectology.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Lindow

SCANDIN 215 Literary and Cultural Theory 4 Units**Department:** Scandinavian**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

Introduction to varieties of literary and cultural theory used in the analysis of literary texts and other cultural artefacts.

Final exam not required.

SCANDIN 220 Early Scandinavian Literature 4 Units**Department:** Scandinavian**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 201A or equivalent.

Variable subject matter; see departmental announcement for description.

Course normally focuses on one of two areas: Eddic and skaldic poetry; or sagas (royal family, legendary, courtly, episcopal).

Course may be repeated for credit when topic changes. Final exam required. Instructor: Lindow

SCANDIN 235 Studies in Romanticism and Realism 4 Units**Department:** Scandinavian**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Variable subject matter; see departmental announcement for description.

Reading and analysis of representative works.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SCANDIN 240 Modern and Contemporary Scandinavian Literature 4 Units**Department:** Scandinavian**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.

Reading and analysis of representative works. Topics vary from semester to semester; see departmental announcement for description.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SCANDIN 249 Graduate Studies 1 Unit**Department:** Scandinavian**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Graduate standing in Scandinavian.

Additional work in connection with one of the following courses:

Scandinavian C107, C108, 115, 116, 117, 120, 123, 125, C160, 165.

Students attend lectures and do all written work in the "main course," and

also read assignments in the Scandinavian languages, and write a paper.

Course may be repeated for credit. Course may be repeated for credit

when topic changes. Final exam not required.

SCANDIN 250 Seminar in Scandinavian Literature 4 Units**Department:** Scandinavian**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

Investigation of selected authors, topics, or problems. Variable subject matter; see departmental announcement for description.

Course may be repeated for credit. Course may be repeated for credit

when topic changes. Final exam not required.

SCANDIN 298 Special Study 2 - 12 Units**Department:** Scandinavian**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Tutorial.

Designed to explore a restricted field involving the writing of a report. May not be substituted for available seminars.

Course may be repeated for credit. Course may be repeated for credit

when topic changes. Final exam not required.

SCANDIN 299 Dissertation Writing 2 - 12 Units**Department:** Scandinavian**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Supervised study.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SCANDIN 300A Methods of Teaching Scandinavian Languages 3 Units**Department:** Scandinavian**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

The course consists of a two-hour session per week that will examine current theory and practice of foreign language teaching in connection with Danish, Finnish, Norwegian, and Swedish.

Course may be repeated for credit. Course may be repeated for credit

when topic changes. Final exam not required.

SCANDIN 300B Teaching Practicum 1 Unit**Department:** Scandinavian**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of consultation per week.**Prerequisites:** Graduate Student Instructor in the Scandinavian department.

Graduate Student Instructors must enroll in 300B each semester following

the completion of 300A or the equivalent. The course consists of a

one-hour weekly session devoted to the analysis and a discussion of pedagogical problems as they arise in the classroom.

Course may be repeated for credit. Course may be repeated for credit

when topic changes. Final exam not required.

SCANDIN 301 Scandinavian Teaching Methods 3 Units**Department:** Scandinavian**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 3 hours of individual or group consultation per week.

Course on practical teaching methods, grading, testing, classroom activities, and design of course materials and syllabi. Required of all Scandinavian Department GSIs.

Course is repeatable for credit each semester of employment as a graduate student instructor (GSI). Course may be repeated for credit when topic changes. Final exam not required.

SCANDIN 601 Individual Study for M.A. Candidates 1 - 8 Units**Department:** Scandinavian**Course level:** Graduate examination preparation**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Supervised study.

Individual study for the comprehensive or language requirements in consultation with the field adviser. Units may not be used to meet unit or residence requirements for the master's degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SCANDIN 602 Individual Study for Doctoral Candidates 1 - 8 Units**Department:** Scandinavian**Course level:** Graduate examination preparation**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Supervised study.

Individual study in consultation with the major field adviser to prepare qualified students for various examinations required of candidates for the Ph.D. May not be used to meet unit or residence requirements for the doctoral degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Science and Mathematics Education (SCMATHE)

SCMATHE 210 Practicum in Science and Math Education Research and Development 1 - 4 Units

Department: Science and Mathematics Education

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of meeting per week.

Prerequisites: Consent of instructor.

Practical experience on an educational research or development project on campus or elsewhere for 8-12 hours per week. Class meetings augment research experience with discussions of readings and interaction with guest speakers.

One unit of credit for each four hours of student effort per week. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SCMATHE 220C Instructional Design in Science and Mathematics Education 3 Units

Department: Science and Mathematics Education

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of lecture/discussion per week.

Prerequisites: 220B or consent of the instructor.

Survey of literature on design of instruction in science and mathematics, including development of computer-based instruction. Includes consideration of evaluation methods and development of instruction modules for topics in science and mathematics.

Final exam not required.

SCMATHE 292 Research Seminar and Colloquium 1 Unit

Department: Science and Mathematics Education

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Offered for satisfactory/unsatisfactory grade only.

Hours and format: 2 hours of lecture/discussion per week.

Prerequisites: Consent of instructor.

Discussion of current education research carried on by students, faculty, and guest speakers. A written analysis of several presentations required. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SCMATHE 294 Formulation of Educational Research 1 - 3 Units

Department: Science and Mathematics Education

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: Individual conferences with instructor.

Prerequisites: Consent of instructor.

Development of thesis proposal under supervision of faculty member. One unit of credit for each four hours of student effort per week. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SCMATHE 295 Research 1 - 12 Units

Department: Science and Mathematics Education

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: Individual conferences.

Prerequisites: Consent of instructor.

Independent research activities under supervision of a faculty member.

One unit of credit for each four hours of student effort per week. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SCMATHE 299 Individual Reading and Study 1 - 5 Units

Department: Science and Mathematics Education

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: Individual conferences.

Prerequisites: Consent of instructor.

Individual reading and study under the supervision of a faculty member.

One unit of credit for each four hours of student effort per week. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SCMATHE 602 Individual Study for Qualifying Examination 1 - 8 Units

Department: Science and Mathematics Education

Course level: Graduate examination preparation

Terms course may be offered: Fall and spring

Grading: Offered for satisfactory/unsatisfactory grade only.

Hours and format: Individual conferences.

Prerequisites: Consent of instructor.

Individual study, under the supervision of a faculty member, designed to prepare the student for Ph.D qualifying examination.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Course does not satisfy unit or residence requirements. Final exam not required.

Science and Technology Studies (STS)

STS C200/ANTHRO C254/ESPM C252/HISTORY C250 Topics in Science and Technology Studies 3 Units

Department: Science and Technology Studies; Anthropology; Environ Sci, Policy, and Management; History

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Seminar per week for 15 weeks.

This course provides a strong foundation for graduate work in STS, a multidisciplinary field with a signature capacity to rethink the relationship among science, technology, and political and social life. From climate change to population genomics, access to medicines and the impact of new media, the problems of our time are simultaneously scientific and social, technological and political, ethical and economic.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

STS C250/ANTHRO C273/ESPM C273/HISTORY C251 Science and Technology Studies Research Seminar 3 Units

Department: Science and Technology Studies; Anthropology; Environ Sci, Policy, and Management; History

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Offered for satisfactory/unsatisfactory grade only.

Hours and format: 3 hours of Seminar per week for 15 weeks.

This course will cover methods and approaches for students considering professionalizing in the field of STS, including a chance for students to workshop written work.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Semitics (SEMITIC)

SEMITIC 100A Aramaic 3 Units

Department: Semitics

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Hebrew 100A-100B.

Biblical and Ancient Aramaic, including study of the Aramaic parts of Daniel and Ezra and the inscriptions and papyri from Syria, Egypt, Mesopotamia, and the Persian Empire. Sequence begins Fall.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SEMITIC 100B Aramaic 3 Units

Department: Semitics

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: Hebrew 100A-100B.

Biblical and Ancient Aramaic, including study of the Aramaic parts of Daniel and Ezra and the inscriptions and papyri from Syria, Egypt, Mesopotamia, and the Persian Empire. Sequence begins Fall.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SEMITIC 205A Ugaritic 3 Units

Department: Semitics

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: 101A-101B or 100A-100B or equivalent.

Ugarit language and literature with stress on comparative morphology and lexicography. Sequence begins Fall.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SEMITIC 205B Ugaritic 3 Units

Department: Semitics

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: 101A-101B or 100A-100B or equivalent.

Ugarit language and literature with stress on comparative morphology and lexicography. Sequence begins Fall.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SEMITIC 209A Northwest Semitic Epigraphy 4 Units

Department: Semitics

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Seminar per week for 15 weeks.

Prerequisites: Reading knowledge of Biblical Hebrew.

This two course sequence will study the epigraphic remains of the Northwest Semitic languages. First semester will study inscriptions in Hebrew. Second semester topics will vary from year to year. Possible topics include: Canaanite dialects; El-Amarna Akkadian; Eblaite. The inscriptions will be studied both from the perspective of the comparative history of the Northwest Semitic languages and also for their relevance in illuminating contemporaneous history and culture.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SEMITIC 209B Northwest Semitic Epigraphy 4 Units

Department: Semitics

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Seminar per week for 15 weeks.

Prerequisites: Reading knowledge of Biblical Hebrew.

This two course sequence will study the epigraphic remains of the Northwest Semitic languages. First semester will study inscriptions in Hebrew. Second semester topics will vary from year to year. Possible topics include: Canaanite dialects; El-Amarna Akkadian; Eblaite. The inscriptions will be studied both from the perspective of the comparative history of the Northwest Semitic languages and also for their relevance in illuminating contemporaneous history and culture.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Slavic Languages and Literatures (SLAVIC)

SLAVIC 1 Elementary Russian 5 Units

Department: Slavic Languages and Literatures

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 5 hours of lecture and 2 hours of language laboratory per week.

Beginner's course.

Final exam required.

SLAVIC 2 Elementary Russian 5 Units

Department: Slavic Languages and Literatures

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 5 hours of lecture and 2 hours of language laboratory per week.

Prerequisites: 1, 14A, or equivalent.

Final exam required.

SLAVIC 3 Intermediate Russian 5 Units

Department: Slavic Languages and Literatures

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 5 hours of lecture and 1 hour of language laboratory per week.

Prerequisites: 2, 14B, or equivalent.

Final exam required.

SLAVIC 4 Intermediate Russian 5 Units

Department: Slavic Languages and Literatures

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 5 hours of lecture and 1 hour of language laboratory per week.

Final exam required.

SLAVIC R5A Reading and Composition 4 Units

Department: Slavic Languages and Literatures

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.

Prerequisites: UC Entry Level Writing Requirement or equivalent for 5A; 5A or equivalent for 5B.

Reading and composition course based on works of Russian and other Slavic writers, either written in English or translated into English. As students develop strategies of writing and interpretation, they will become acquainted with a particular theme in Russian and/or Slavic literatures and their major voices. R5A satisfies the first half of the Reading and Composition requirement, and R5B satisfies the second half. Satisfies the first half of the Reading and Composition requirement. Final exam not required. Formerly known as 5A.

SLAVIC R5B Reading and Composition 4 Units

Department: Slavic Languages and Literatures

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.

Prerequisites: UC Entry Level Writing Requirement or equivalent for 5A; 5A or equivalent for 5B.

Reading and composition course based on works of Russian and other Slavic writers, either written in English or translated into English. As students develop strategies of writing and interpretation, they will become acquainted with a particular theme in Russian and/or Slavic literatures and their major voices. R5A satisfies the first half of the Reading and Composition requirement, and R5B satisfies the second half. Satisfies the second half of the Reading and Composition requirement. Final exam not required. Formerly known as 5B.

SLAVIC 6A Introductory Russian for Heritage Speakers 3 Units**Department:** Slavic Languages and Literatures**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Basic proficiency in Russian; placement test and consent of instructor.

The course is aimed at "heritage speakers" of Russian, i.e., those who grew up speaking Russian in the family without a full Russian educational and cultural background. These courses are designed for students who have speaking and comprehension ability in Russian but have minimum exposure to writing and reading. This course teaches basic skills of writing, reading, and grammar. 6A focuses on basic writing and reading ability. 6B introduces further knowledge of grammar and syntax and develops writing skills. Both 6A and 6B include reading and cultural material. (Students with advanced reading proficiency should consider Slavic 114 or Slavic 190.).

Final exam required.

SLAVIC 6B Introductory Russian for Heritage Speakers 3 Units**Department:** Slavic Languages and Literatures**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Basic proficiency in Russian; placement test and consent of instructor.

Final exam required.

SLAVIC 10 Elementary Intensive Russian 10 Units**Department:** Slavic Languages and Literatures**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 20 hours of instruction and 2 hours of language laboratory per week for 10 weeks.

This summer session course is equivalent to the first year of Russian language instruction offered at Berkeley. An intensive program designed to develop students' comprehension and conversation skills while presenting the basic grammar of modern, standard Russian. Lectures and films on Russian culture will be arranged.

Final exam not required.

SLAVIC 20 Intermediate Intensive Russian 10 Units**Department:** Slavic Languages and Literatures**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 20 hours of instruction and 2 hours of language laboratory per week for 10 weeks.**Prerequisites:** First year Russian.

This summer session course is equivalent to the second year of Russian language instruction at Berkeley. An intensive program designed to consolidate command of basic grammar and further develop comprehension, speaking, reading and writing skills.

Final exam not required.

SLAVIC 24 Freshman Seminar 1 Unit**Department:** Slavic Languages and Literatures**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of Seminar per week for 15 weeks.

The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Freshman seminars are offered in all campus departments, and topics vary from department to department and semester to semester. Enrollment limited to 15 freshmen.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

SLAVIC 25A Introductory Polish 5 Units**Department:** Slavic Languages and Literatures**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 5 hours of Lecture per week for 15 weeks.**Prerequisites:** 25A is prerequisite to 25B.

Beginner's course. Sequence beginning fall.

Final exam required.

SLAVIC 25B Introductory Polish 5 Units**Department:** Slavic Languages and Literatures**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 5 hours of Lecture per week for 15 weeks.**Prerequisites:** 25A is prerequisite to 25B.

Beginner's course. Sequence beginning fall.

Final exam required.

SLAVIC 26A Introductory Czech 5 Units**Department:** Slavic Languages and Literatures**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 5 hours of Lecture per week for 15 weeks.**Prerequisites:** 26A is prerequisite to 26B.

Beginner's course. Sequence beginning fall.

Final exam required.

SLAVIC 26B Introductory Czech 5 Units**Department:** Slavic Languages and Literatures**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 5 hours of Lecture per week for 15 weeks.**Prerequisites:** 26A is prerequisite to 26B.

Beginner's course. Sequence beginning fall.

Final exam required.

SLAVIC 27A Introductory Bosnian/Croatian/Serbian 5 Units**Department:** Slavic Languages and Literatures**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 5 hours of Lecture per week for 15 weeks.**Prerequisites:** 27A is prerequisite to 27B.

Beginner's course. Sequence beginning Fall semester.

Final exam required.

Individual study for the comprehensive or language requirements in consultation with a field adviser.

May not be used to satisfy unit or residence requirements for a master's degree. Course may be repeated for a maximum of 16 units. Course may be repeated for a maximum of 16 units. Final exam not required.

SLAVIC 602 Individual Study for Doctoral Students 2 - 8 Units**Department:** Slavic Languages and Literatures**Course level:** Graduate examination preparation**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Individual conferences.

Individual study in consultation with a major field adviser, intended to provide an opportunity for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D.

Course may be repeated for a maximum of 16 units. Course may be repeated for a maximum of 16 units. Course does not satisfy unit or residence requirements for doctoral degree. Final exam not required.

Social Welfare (SOC WEL)**SOC WEL 10 An Introduction to American Social Welfare in World Context 2 Units****Department:** Social Welfare**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of lecture/discussion per week for 6 weeks. 2 hours of lecture/discussion per week.

This course will consider the U.S. social welfare system in comparison with systems in other parts of the world, including Japan, Mexico, and the United Kingdom. It will examine the history and role of "welfare," "the welfare state," and the social work profession in the U.S. and in other countries and will consider key issues in contemporary social work practice. Topics such as discrimination, economic deprivation, and oppression and their effects on people of color, women, and gay and lesbian people will be highlighted.

Final exam required.

SOC WEL 20 Confronting America's Social Problems 2 Units**Department:** Social Welfare**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Session per week for 6 weeks.

America's recognition of and response to major social problems usually involves a mix of hyperbole and denial, inaction and innovation, volunteerism and professionalization, feasts and famines of resources, media applause and attack, and unsustained successes and long-term failures. What is usually lacking is a consistent, thoughtful effort. Yet help is given and lives are changed, for better and sometimes worse. Social Welfare 20 considers the American approach to social problems through an examination of issues such as substance abuse, mental illness, poverty and inequality, homelessness, family violence, and child maltreatment. Each area will be explored in terms of history, causes and dimensions, and human service and social policy responses.

Final exam required. Instructor: Grossman

SOC WEL 24 Freshman Seminar 1 Unit**Department:** Social Welfare**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of Seminar per week for 15 weeks.

Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 4 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

This course examines social work as a profession: the practice of the profession, the organizational context of professional practice, and the ethics of the profession.

Final exam required. Formerly known as 102.

SOC WEL 112 Social Welfare Policy 3 Units**Department:** Social Welfare**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 8 hours of lecture/discussion per week for 6 weeks.

Analysis of social welfare policies and programs including public assistance, social insurance, social services, and health and mental health.

Final exam required. Formerly known as 100.

SOC WEL 114 Practice in Social Work 3 Units**Department:** Social Welfare**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture and 1 hour of laboratory/discussion per week.

An introduction to the basic skills of interpersonal helping and problem solving and to related theory and research.

Final exam required. Formerly known as 103.

SOC WEL 114AC Practice in Social Work 3 Units**Department:** Social Welfare**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture and 1 hour of discussion per week. 4 hours of lecture and 2 hours of discussion per week for 8 weeks. 5 hours of lecture and 2 hours of discussion per week for 6 weeks.

An introduction to the basic skills of interpersonal helping and problem solving and to related theory and research.

Satisfies the American Cultures requirement

Students will receive no credit for Social Welfare 114AC after taking Social Welfare 114; a deficient grade in Social Welfare 114 may be removed by taking Social Welfare 114AC. Final exam required.

SOC WEL 116 Current Topics in Social Welfare 2 Units**Department:** Social Welfare**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of lecture/discussion per week for 6 weeks.**Prerequisites:** Social Welfare 110.

Course examines current problems and issues in the field of social welfare.

Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam required.

SOC WEL 138 Confronting Drug and Alcohol Issues 3 Units**Department:** Social Welfare**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 8 hours of lecture/discussion per week for 6 weeks.

Course provides an overview of alcohol, tobacco, and other drug issues in the U.S. Emphasis on how alcohol, tobacco, and other drug problems are formulated as social problems and how these definitions influence intervention strategies. Class examines the history and trends associated with use of alcohol, tobacco, and other drugs; conceptual frameworks for understanding these problems; treatment models and issues; prevention; and special topics such as the legalization of drugs, cross-cultural issues, women, homelessness, and lesbian and gay issues.

Final exam required.

SOC WEL 148 Substance Abuse Treatment 2 Units**Department:** Social Welfare**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of lecture/discussion per week for 6 weeks.

Provides an overview of theoretical perspectives and practice models in the substance abuse field. Addresses issues of misuse and addiction, impacts on the family, and the range of intervention modalities including prevention and treatment. Students will also become familiar with alcohol and drug related problems including mental disorders, HIV/AIDS, and criminal behavior.

Final exam required.

SOC WEL 150L Sexuality and Social Work 2 Units**Department:** Social Welfare**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of lecture per week for 6 weeks.

This course introduces the developmental, psychological and environmental issues related to sexuality at different stages in life, and in different social service venues. It includes an introduction to the strengths perspective, exploration of heterosexist aspects of society, policies related to a person's sexuality and gender, and ethics and diversity issues often arising in work with sexual minorities. Variability within sexual culture is addressed, introducing students to the strengths of the LGBT community, the experience of growing up and discovering sexuality, and how research and practice models define homosexuality in relation to human sexuality and development. Issues of sexuality in specific social work settings are addressed.

Final exam required.

SOC WEL 152 Current Perspectives on Aging 3 Units**Department:** Social Welfare**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 8 hours of lecture/discussion per week for 6 weeks.

Course examines social, economic, and psychological issues of aging in America. Topics include aging demographics, aging theories, legal and financial planning, health and social service concerns, and the roles played by different professionals in the gerontology field.

Final exam required.

SOC WEL 154 Basic Skills in Working with People 3 Units**Department:** Social Welfare**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7.5 hours of Lecture per week for 6 weeks.

Course examines the fundamental theory and practice of the helping relationship, focusing on communication skills, building the relationship and establishing goals, and applying and evaluating interventions.

Final exam required.

SOC WEL 174 Immigrants in the U.S.: Issues of Identity, Conflict, and Adaptation 2 Units**Department:** Social Welfare**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5 hours of Lecture per week for 6 weeks.

Course examines the history, character, and consequences of U.S. immigration, focusing on issues of identity, conflict, and adaptation. Topics include the social and psychological experiences of immigrants, global migration patterns, theories of transnationalism and migration, and the public response to immigration and immigrants. The perspectives of African, Asian, Latino, and European migrants will be explored.

Final exam required.

SOC WEL 174AC Immigrants in the U.S.: Identity, Conflict, and Accommodation 3 Units**Department:** Social Welfare**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.

Course examines the history, character, and consequences of U.S. immigration, focusing on issues of identity, conflict, and adaptation. Topics include the social and psychological experiences of immigrants, global migration patterns, theories of transnationalism and migration, and the public response to immigration and immigrants. The perspectives of African, Asian, Latino, and European migrants will be explored. Satisfies the American Cultures requirement. Final exam required.

SOC WEL 175AC The Dialogue of Diversity: Deciphering the Cues and Codes of Intercultural Communication 3 Units**Department:** Social Welfare**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7.5 hours of Lecture per week for 6 weeks.

Learning more about the diversity of American culture often does not increase our ability to understand and get along with one another. Multi-cultural (African Americans, Asian Americans, Latinos, and European Americans) educational and workplace environments are fraught with conflicts in which persons find their peers to be disrespectful, aloof, or inappropriately familiar. The course will explore assumptions, attitudes, and beliefs and how they influence how we relate to each other and how we conceive of fairness, entitlement, respect, and oppression.

Satisfies the American Cultures requirement

Final exam required.

SOC WEL 180 Introduction to Social Work Research Methods and Design 3 Units**Department:** Social Welfare**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 8 weeks.

This course in social work research and statistical methods introduces students to the foundation concepts and skills for using research evidence to inform and improve practice, policy, and social service delivery.

The course prepares students to identify and consider how to employ evidence-based interventions, and provides students with the ability to understand and use quantitative and qualitative research methods to build knowledge using scientific and ethical approaches.

Final exam not required.

SOC WEL H195 Senior Honors Course 1 - 3 Units**Department:** Social Welfare**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Hours to be arranged.**Prerequisites:** Consent of instructor

Preparation of an honors thesis.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SOC WEL 197 Field Studies in Social Welfare 1 - 3 Units**Department:** Social Welfare**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Field work in community agencies and individual conferences with faculty.

Supervised experience relevant to specific aspects of social welfare in off-campus organizations. Regular individual meetings with faculty sponsor and written reports required.

Course may be repeated for credit when topic changes. Final exam not required.

SOC WEL 198 Group Study for Advanced Undergraduates 1 - 3 Units**Department:** Social Welfare**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Lecture and discussion.

Group study on selected social welfare topics.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

Analysis of issues in social welfare policy and recent trends shaping the development of the American welfare state.

Final exam required. Instructor: Gilbert

SOC WEL 222 Mental Health and Social Policy 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

Mental health policies and programs at the national, state, and local levels; major factors influencing the provision of mental health services; reciprocal relationships between mental health policy and social work practice.

Final exam not required. Instructor: Segal

SOC WEL 223 Advanced Seminar in Community Mental Health 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Seminar examines critical policy and practice issues affecting the mental health field.

Final exam not required. Instructor: Segal

SOC WEL 226 Social Policy and Gerontology 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

U.S. social policy and programs for the aging are analyzed with respect to the knowledge required to assess the needs for societal supports and major issues and trends in the delivery of social services.

Final exam not required. Instructor: Robinson

SOC WEL 230 Social Policy: Children and Families 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

Introduction to current problems, programs, and policies in child, youth, and family welfare.

Final exam not required. Instructor: Berrick

SOC WEL 232 Social Work and Education Policy 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of lecture/discussion per week for 6 weeks. 2 hours of lecture/discussion per week.

This course examines the intersection between social work practice and the educational system. It focuses on the school as a social system and the current policy context of education. It presents current topics in educational policy and critically analyzes them from a social work perspective. A focus is placed on the potential roles played not only by school social workers, but the social work profession in general, in actively collaborating with educational systems to support optimal developmental pathways for children and adolescents.

Final exam not required. Instructor: Stone

SOC WEL 234C Legal and Ethical Issues in Aging 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.

Course focuses on legal and ethical issues related to aging and long-term care, and their resolution. Issues covered include end-of-life decisions making; health care rationing; paternalism and self-determination; competency determination; mandated family responsibility; age vs. need as a criterion for service eligibility.

Final exam not required.

SOC WEL 235 Homelessness in America 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.

This course addresses homelessness in the context of social responsibility for the poor. It considers the legal, social, and economic context of homelessness; examines the diversity of the homeless, their special needs, handicaps, and behaviors; and assesses newly institutionalized systems of care and treatment. The course looks at homelessness as a full-time job of survival and explores the prospects of the homeless for changing their condition.

Final exam not required. Instructor: Segal

SOC WEL 236 International Social Welfare 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of seminar/discussion per week.

This seminar explores key international social welfare issues from the perspective of the globalization of social, economic, and political activities. Although its primary focus is on social policies and social services, attention will also be given to the role of professional social work in the international context. While emphasizing theoretical and analytical issues, practical and professional matters with particular reference to social work and social development will also be discussed. Students will have the opportunity to acquire knowledge of international social welfare activities as well as the analytical skills to address and debate complex international issues.

Final exam not required. Instructor: Midgley

SOC WEL 237 The Benevolent Asylum 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.

Supervised residential care provision, for a variety of reasons, has been much maligned during the last 50 years. Yet for many, residential placement has served as a source of stability and quality care. This course will consider the history of residential care provision and development, financing and design issues, including group responses to various aspects of the residential environment such as size, architecture, community access, supervision, etc. Using an evidence-based approach to residential care, the course will consider setting objectives, special population needs, and person-environment fit. This course will look at the pros and cons of group, institutional or residential placement from a value-based and from an empirical perspective. It will involve substantial use of international materials. The course will consider the theory and practice of residential care for a broad range of populations. It will provide the essentials necessary to enable students to develop and design benevolent asylums.

Final exam not required. Instructor: Segal

SOC WEL 238B Drug and Alcohol Policy 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

Examines how substance abuse policy is formulated by examining political, historical, epidemiological and clinical factors. Emphasis on how alcohol and drug problems become defined as social problems and how these definitions influence subsequent treatment/intervention strategies. Focus on alcohol abuse and on individual and social control models of substance abuse. In addition, the development and evaluation of alcohol and drug abuse treatment will be discussed.

Final exam not required. Instructor: Midanik

SOC WEL 238C Health Policy--A Social Welfare Perspective 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

Reviews major issues and programs in the health care field. Course considers the social context of health care; the roles of the public, voluntary, and private sectors; and the implications of policies and programs for society and the individual client.

Final exam not required. Instructor: Hastings

SOC WEL 240 Introduction to the Field of Social Welfare and the Profession of Social Work 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

Course examines the history, development, and mission of the field and profession, fundamental social work tasks, and the organizational contexts of practice.

Final exam not required. Instructor: Grossman

SOC WEL 241 Foundations of Social Work Practice 3 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of seminar/discussion per week.

This course is designed to introduce generalist skills and knowledge for social work practice with individuals, families, groups, organizations, and communities, within a framework of social work's core values and fundamental practice responsibilities. These core values include social justice and client empowerment. A generalist approach to understanding fundamental practice responsibilities includes cultural responsiveness, commitment to professional competence, and demonstration of practice effectiveness.

Final exam not required.

SOC WEL 243 Direct Practice in Child and Family Settings 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.**Prerequisites:** 241

Direct intervention models for addressing the behavioral, emotional, and situational problems of children and families in child welfare, mental health, medical, school, and community settings.

Final exam not required. Instructors: Ayasse, Gambrill

SOC WEL 244 Direct Practice in Mental Health Settings 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.**Prerequisites:** 241

Planning, implementing, and evaluating services for clients with major mental disorders or at risk of developing mental illness. Review of intervention models addressing the needs of clients for basic resources, social rehabilitation, and clinical treatment.

Final exam not required. Instructor: Manoleas

SOC WEL 245 Direct Practice in Health Settings 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.**Prerequisites:** 241

Examines the range of therapeutic modalities used by social workers in health care; the interaction of health care policies and practices; interdisciplinary issues; and the ethical dimensions of practice.

Final exam not required. Instructor: Merrill

SOC WEL 246 Direct Practice in Aging Settings 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.**Prerequisites:** 241

Clinical case management with older adults. Comprehensive multidimensional assessment, advocacy and empowerment, and the range of direct intervention models for addressing the physical, cognitive, and psychosocial concerns of older adults and their families.

Final exam not required. Instructor: Scharlach

SOC WEL 250A Social Work with Groups 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** 241

Theory and practice regarding the formation, sustenance, and termination of groups. Emphasis on the role of the social worker in facilitating interpersonal processes in groups.

Final exam not required. Instructor: Edwards

SOC WEL 250B Family Therapy 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** 241

Theoretical frameworks and intervention skills for family work.

Final exam not required.

SOC WEL 250C Brief Therapy and Crisis Intervention 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** 241

Examines the clinical application of crisis intervention and brief psychotherapy from an historic and psychodynamic perspective. Provides assessment criteria for assignment to these forms of treatment and techniques for intervention.

Final exam not required. Instructor: Herrera

SOC WEL 250F Understanding and Effectively Facilitating Intercultural Group Dynamics 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

This interactive course considers intra- and inter-group dynamics with a particular focus on cultural differences of individuals, intercultural communication, and effective group facilitation. It describes the roles of social workers in facilitating processes that include learning group and inter-group relations theories, developing skill in group facilitation, and the articulation and resolution of intercultural conflict. Course material is presented from a multi-cultural perspective.

Final exam not required. Instructor: Edwards

SOC WEL 250G Psychodynamically Oriented Social Work Practice with Adults 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.**Prerequisites:** 241

Course examines clinical skills for working with adult clients from a psychodynamic perspective. Key concepts and processes, such as the formation of a therapeutic alliance, resistance, transference, counter-transference, and the development of interventions, are discussed and illustrated with case vignettes.

Final exam not required.

SOC WEL 250I Essential Spanish for Social Workers 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of seminar per week.

This course will provide students with the knowledge and skills needed to communicate effectively with monolingual Spanish speaking clients and perform effective and responsible social work practice assessments and interventions. The seminar will be conducted in Spanish and will expose students to the language utilized by social workers and other human service providers in a variety of settings.

Final exam not required. Instructor: Herrera

SOC WEL 250J Social Work with Latino Populations 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.**Prerequisites:** 241

Examines major social problems and mental health issues confronting Chicanos and other Latino groups in the U.S. Emphasis on the assessment and treatment of psychosocial problems.

Final exam not required. Instructor: Organista

SOC WEL 250K Social Work and Disability 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.

Using a theoretical framework grounded in the values of self-determination, dignity, and respect, this course will address issues in the disabilities field including demographics, etiology, policy and programs, and the disability resources network. Practice skills in communications, assessment, and micro- and macro-level intervention will be reviewed.

Final exam not required.

SOC WEL 250L Human Sexuality 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of lecture/discussion per week per unit.

This course will provide a forum for the exploration of multiple issues related to human sexuality and the diversity of sexual experience, including the human sexual response cycle; childhood and adolescent sexuality development; sexual problems, causes and treatment approaches (including systems approaches to working with couples); sexual orientation and gender identity development; sexuality and living with a disability; sexual violence and consent; sexuality and HIV/AIDS; and the law and ethics related to professional sexual misconduct and boundary violations. Teaching methods will include interactive lecture, small group discussions, video presentations, and guest speakers from throughout the Bay Area who specialize in a range of sexuality issues.

Final exam not required.

SOC WEL 250M Death and Dying 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/seminar per week.

This course explores death and dying from a variety of perspectives: psychological, philosophical, cultural, spiritual, and phenomenological. Emphasis is placed on understanding the experiences of dying persons and their loved ones, as well as the interplay between the process of dying and the process of living. Implications for social work interventions are discussed. This course is both academic and experiential, relying on a wide variety of materials: autobiography, fiction, scholarly and theoretical writings, case examples, films, poetry, and guest lectures.

Final exam not required. Instructor: Rothman

SOC WEL 250N Public Child Welfare Services 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/seminar every week.**Prerequisites:** 241

This course is designed for students preparing for careers in public child welfare. Addresses the range of documentation required for legal purposes, practice issues for social workers within the court setting, and skills required in presenting testimony.

Final exam not required. Formerly known as 250NA and 250NB.

Instructor: Ralph

SOC WEL N250A Group Work in the Human Services 2 Units**Department:** Social Welfare**Course level:** Graduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of lecture per week for 6 weeks and 1 6-hour laboratory.

The purpose of this course is to prepare students with basic theory, concepts, and practical knowledge to conduct groups in human service settings. Group models to be studied will include group psychotherapy, social support, educational, task, and social action groups. Theories of group development will be considered and applied to all stages of a group intervention including group design, client selection, pre-group planning, direct and indirect intervention at the individual and group level, evaluation and termination. Weekly classes will include lecture, simulation, and discussion of group work practice and observation. Participation will be limited to 30 students. The course will be of particular value to active practitioners and advanced students in social work, psychology, counseling, and other human service fields.

Final exam not required. Instructor: Grossman

SOC WEL 250P Child Psychopathology: Issues in Assessment and Treatment 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** 205, 241.

Course surveys assessment and empirically based treatment approaches to various psychosocial problems in childhood and adolescence. Specific emphasis is placed on internalizing and externalizing disorders. Course is taught using a development psychopathological framework. Students must possess a working knowledge of DSM-IV-TR nosology.

Final exam required.

SOC WEL 250T Social Work Practice in School Settings 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/seminar per week.**Prerequisites:** 241

This course (1) provides students with an understanding of how current educational policies and practices impact the day-to-day lives of academically and socially vulnerable students; (2) builds student skills in identifying and selecting the multiple points of intervention relevant to social work practice in schools, including individual intervention with children, family intervention, building links between families and school staff, advocacy, classroom-based intervention, and collaboration with teachers; and (3) presents assessment and intervention strategies guided by an ecosystemic and resilience perspective which focus on student and family strengths and suggests multiple intervention options.

Final exam not required. Instructor: Ayasse

SOC WEL 250U Substance Abuse Treatment 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of lecture/discussion per week for 6 weeks.**Prerequisites:** 241

Course provides an introductory overview of various theories and methodologies currently used in the diagnosis and treatment of substance abuse disorders. Though the bulk of the course will be devoted to the disease model and corresponding interventions, some attention will be given to prevention and epidemiology. Emphasis will be placed on the unique practice role of social work in the prevention/intervention of substance abuse problems.

Final exam not required. Instructor: Manoleas

SOC WEL 250X Domestic Violence: Assessment and Intervention 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

This practice-oriented course will teach graduate level social work students how to engage, assess, and intervene effectively with individuals, families, and children impacted by intimate partner violence. We will review the scope, impact, and causes of the problem; relevant screening and assessment skills; effective clinical intervention paradigms and techniques for victims, perpetrators, and children; and future directions. Significant time will be devoted to examining this problem in disadvantaged and diverse populations and, identifying emotional coping strategies for the developing clinician.

Final exam not required. Instructor: Merrill

SOC WEL 250Y Social Development 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing or consent of instructor.

This seminar focuses on the theory and practice of social development and, in particular, engages members of the seminar in an analysis of the social development practice strategies that are now widely used in community settings not only in the developing but in the western countries as well. The course is primarily designed for MSW students who have an interest in issues of development and international social welfare, but doctoral and undergraduate students may enroll.

Final exam not required. Instructor: Midgley

SOC WEL 250Z Cognitive Behavioral Methods 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Graduate standing.

The purpose of this course is to increase students' understanding of and competencies in cognitive-behavior methods. Throughout the course practice decisions and related research will be closely integrated. Although further guided experience will be needed to develop high levels of related skills, especially concerning assessment and relationship factors as these are needed to maximize success, students will have the opportunity to develop a beginning understanding of basic behavior principles.

Final exam not required. Instructor: Gambrell

SOC WEL 251 Community Practice 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

This course provides an overview of the theories, knowledge, and skills required for community organization, needs assessment, and program planning and development. Course focuses on developing community-based interventions in a diverse society.

Final exam not required. Instructor: Chow

SOC WEL 252 Management Practice 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

Basic theories, areas of knowledge, and practice skills for the administration of human services. Topics include program development implementation, inter-organizational collaboration, and staff supervision.

Final exam not required. Instructor: Austin

SOC WEL 254 Policy Practice 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Course introduces the practice of social welfare policy making. Focusing on the California State Legislature, students in the first half of the course are taught policy analysis skills, lobbying, testifying, working with legislators, legislative staff, and the media, and forwarding a policy agenda. In the second half of the course, students examine the internal environment of agency change, address the use of management information systems and outcomes measurement as strategies for information collection, and learn skills for effectively using information to improve agency decision making.

Final exam not required. Instructor: Berrick

SOC WEL 255 Community Organizing 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.

Introduction to the theory and practice of community organization.

Final exam not required. Instructor: Albano

SOC WEL 257 Financial Management 1 Unit**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.

This course provides both theoretical knowledge and practical skills for managing scarce resources in social service organizations. Students will learn tools and techniques for effective planning and budgeting as well as how to design information systems to control, evaluate, and revise plans. Accounting principles and systems will be examined from a management perspective with an emphasis on designing systems to meet the unique management information needs of different organizations. The use and development of internal and external financial statements will be covered. Students will learn the tools and techniques of financial statement analysis, interpretation, and presentation. The course is designed to develop the core financial management skills needed by senior and middle managers in large and small social service organizations.

Final exam not required. Formerly known as 298.

SOC WEL 260 Forensic Social Work 2 Units**Department:** Social Welfare**Course level:** Graduate**Term course may be offered:** Spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Prerequisites:** Social Welfare 240 and Social Welfare 241.

Focuses on issues arising within the practice of forensic social work in correctional settings (jails, prisons, and probation and parole departments), especially practice with people whose social positions and/or mental health struggles render them disproportionately affected by incarceration. Uses a person-in-environment perspective to explore the phenomenology of corrections, paying particular attention to the intersection of social identities and psychological capacities among individuals who are incarcerated, the complexities of the systems within which social workers attempt to create change, and the historical and contemporary role of incarceration in the United States.

Final exam not required.

SOC WEL 265M Motivational Interviewing 2 Units**Department:** Social Welfare**Course level:** Graduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of seminar per week for 6 weeks.

Motivational interviewing (MI) is a modern clinical paradigm that dialectically integrates humanistic, client-centered principles with goal-focused strategies. Students in this course will be introduced to all key aspects of MI including its major tenets, its theoretical base, the available empirical evidence on its efficacy, and its overall compatibility with social work. Moreover, students will learn all of the associated clinical skills for the four processes of motivational interviewing: 1) engaging; 2) focusing; 3) evoking; and 4) deciding and planning.

Final exam not required.

SOC WEL 274 Immigrants and Refugees in the U.S 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Overview of immigration policy in the U.S. from an international and historical perspective. Theories of migration, transnationalism, and adaptation will be addressed, along with skills required for working with refugees and immigrants facing difficulties. Addresses the impact of policy on who comes to the U.S. and the circumstances newcomers and their families face once here.

Final exam not required. Instructor: Chow

SOC WEL 275 Diversity-Sensitive and Competent Social Work 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture/discussion per week.

Course prepares students to understand, provide, and evaluate diversity-sensitive social work services. The course (1) builds sensitivity to human diversity by addressing multiple status dimensions (race, ethnicity, gender, sexual orientation, social class, etc.), (2) involves students in the process of diversity sensitization through experience self-reflection and interactive exercises, and (3) promotes diversity competent practice skills. Final exam not required.

SOC WEL 279 Seminar in the History and Philosophy of Social Welfare 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Primarily for doctoral students. A review of efforts to conceptualize the field of social welfare and to analyze its tendencies.

Final exam not required. Instructor: Gilbert

SOC WEL 280 Introduction to Social Welfare Research 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture and 1 hour of Discussion per week for 15 weeks.

Introduction to the theory and practice of research in social welfare.

Final exam not required.

SOC WEL 282A Seminar in Social Welfare Research 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 2 hours of Seminar per week for 15 weeks. 5.5 hours of Seminar per week for 8 weeks. 7.5 hours of Seminar per week for 6 weeks.

Prerequisites: 280

Problem formulation, design, and implementation.

Final exam not required.

SOC WEL 282B Seminar in Social Welfare Research 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 2 hours of Seminar per week for 15 weeks. 5.5 hours of Seminar per week for 8 weeks. 7.5 hours of Seminar per week for 6 weeks.**Prerequisites:** 280

Problem formulation, design, and implementation.

Final exam not required.

SOC WEL 285A Statistics for Social Workers 1 Unit**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 2 hours of laboratory/discussion per week.**Prerequisites:** To be taken concurrently with Biomedical and Environmental Health Sciences 130A-130B.

Foundation and theory underlying introductory statistical methods. Course focuses on statistical applications in areas of social welfare.

Final exam not required.

SOC WEL 287 Research Resources and Processes 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Students will be introduced to the tasks and tools of library research in social welfare, including reference works, bibliographic aids, and computer databases. Individual faculty members will present their research, emphasizing methodology, outcomes, and contributions to social welfare.

Final exam not required.

SOC WEL 289A Research Methods and Techniques in Social Welfare 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

The logic of social research: topics include rationale and procedure of research design, validity, reliability, and an introduction to sampling.

Final exam not required.

SOC WEL 291 Preparing for an Academic Career in Social Work 2 Units**Department:** Social Welfare**Course level:** Graduate**Term course may be offered:** Spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

This 2 unit seminar is intended for doctoral colleagues who are preparing to embark on a career as social work scholars and educators. The seminar is designed to facilitate an understanding of the nature of research universities and the role of social work education in these universities. It focuses on preparing doctoral colleagues for academic positions within research universities, and to understand their roles and expectations with regard to scholarship, teaching and service. It seeks to acquaint them with the evolution of professional social work education, with particular reference to research universities and to discuss current topics, issues and concerns in the field.

Final exam not required. Instructor: Midgley

SOC WEL 293 Social Welfare Theory: Policy Implications 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours lecture/discussion per week.**Prerequisites:** Graduate standing.

The course deals primarily with macro-theories of a sociological and political-economy nature that offer 1) conceptual representations of welfare systems, 2) explanations of the dynamics and functions of welfare systems, and 3) analyses and assessments of the different normative perspectives that inform policy making in social welfare. The latter aspect is given particular emphasis and the major normative theoretical perspectives in the field will be reviewed with reference to their policy implications for social welfare in the United States. The major theoretical perspectives to be discussed include institutionalism, welfare pluralism, neo-liberalism, Marxism, traditionalism, regulationism, critical theory, multiculturalism, feminism, ecologism, and developmentalism. This course is designed for doctoral students but is open to other qualified graduate students with instructor permission.

Final exam not required.

SOC WEL 295 Dissertation Seminar 2 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

The purpose of this seminar is (1) to develop research skills by integrating issues of research design with measurement, data analysis, and report writing, and (2) to prepare students for their dissertation research by directly addressing issues related to the development of a dissertation prospectus.

Final exam not required.

SOC WEL 296 Individual Study for Graduate Students 1 - 12 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 unit will be awarded for each 4 hours per week of student work.**Prerequisites:** Consent of instructor.

Designed to permit qualified graduate students to pursue special study in a subject area of their choosing under the direction of a faculty member.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SOC WEL 298 Group Study for Graduate Students 1 - 12 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 unit will be awarded for each 4 hours per week of student work. Seminar discussion.**Prerequisites:** Consent of instructor.

Intensive examination of selected social welfare topics.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SOC WEL 299 Individual Research for Graduate Students 1 - 12 Units**Department:** Social Welfare**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 unit will be awarded for each 4 hours per week of student work.**Prerequisites:** Consent of instructor.

Designed to permit qualified graduate students to pursue research in a subject area of their choosing under the direction of a faculty member.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SOC WEL 300 Teaching in Social Welfare 2 Units**Department:** Social Welfare**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

This seminar aims to prepare doctoral students for teaching in social welfare. The course is divided into two parts. The first part examines education from the perspective of the student and the teacher, and their interface. It reviews philosophies and theories of adult education, and underscores the importance of critical reflection, both on the part of the teacher and the student. The second part of the course is concerned with the practice of teaching in social welfare, and addresses specific skills, such as syllabus design, instructional methods, coverage of diversity content, student assignment and evaluation, use of technology, advising, mentoring, and working with GSIs and students with special needs. Finally, students develop the beginnings of a teaching portfolio. Using an interactive format, students are encouraged to share their own learning and teaching experiences, and to progress in their development as teachers.

Final exam not required. Instructor: Ying

SOC WEL 301 Training in Teaching 1 - 6 Units**Department:** Social Welfare**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 unit will be awarded for each 4 hours per week of student work.

Supervised teaching assistance.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SOC WEL 400 Introductory Practicum 1 Unit**Department:** Social Welfare**Course level:** Other professional**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Introduction to the range of professional roles and services in social welfare through university-based seminars, agency visits, and professional panels. Taken in the first semester of the MSW program. Final exam not required.

SOC WEL 400B Field Integration Seminar 1 Unit**Department:** Social Welfare**Course level:** Other professional**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of Seminar per week for 15 weeks.**Prerequisites:** 400

This first year, spring semester seminar will continue the exploration of field placement issues and common agency and practice-based concerns. The seminar is also used to guide students through the process of finding a second year placement, help students evaluate their practice by engaging in consultation, and prepare students for an optimal final field evaluation.

Final exam not required.

SOC WEL 401 Field Practicum 1 - 10 Units**Department:** Social Welfare**Course level:** Other professional**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 unit of credit awarded for each 4 hours per week of practicum work. 1 unit of credit awarded for every 8 days of field instruction per week for 10 weeks.

Supervised field work in social agencies and university-based group meetings.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SOC WEL 403 Training in Research 1 - 6 Units**Department:** Social Welfare**Course level:** Other professional**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 unit will be awarded for each 4 hours per week of student work.

Supervised research assistance.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SOC WEL 999 Departmental Colloquium 0 Units**Department:** Social Welfare**Course level:** Graduate examination preparation**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Colloquium per week for 15 weeks.

Final exam not required.

Sociology (SOCIOL)

SOCIOL 1 Introduction to Sociology 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 to 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks.

Introduces students who are considering majoring in sociology to the basic topics, concepts, and principles of the discipline. This course is required for the major; 1 or any version of 3 is prerequisite for other sociology classes; students not considering a sociology major are directed to any version of 3.

Not open to students who have taken 3, 3A or 3AC. Final exam required.

SOCIOL 3AC Principles of Sociology: American Cultures 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

Comparing the experience of three out of five ethnic groups (e.g. African Americans, Asian Americans, Chicano/Latino, European Americans, and Native Americans) we shall examine historically how each people entered American society and built communities and transformed their cultures in the process. Students will be introduced to the sociological perspective, characteristic methods of research, and such key concepts as culture, community, class, race, social change, and social movements.

Satisfies the American Cultures requirement

Students will not receive credit for 3 or 3AC after taking 1. Deficiency in 3 or 3A may be removed by completing 3AC. No credit for 3AC after 3 or 3A. Final exam required.

SOCIOL 5 Evaluation of Evidence 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks. 4.5 hours of Lecture and 3 hours of Discussion per week for 10 weeks. 5.5 hours of Lecture and 3.5 hours of Discussion per week for 8 weeks.

A review of methodological problems in assessing data relating to social life. Topics to be covered include: posing a sociological problem, gaining access to data, measuring, establishing correlation and causal connection among data, and relating data to theoretical context.

Final exam required.

SOCIOL 7 Statistics for Social Scientists 4 Units**Department:** Sociology**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture per week for 8 weeks.

This course is intended as a first course in statistics, covering basic concepts of descriptive and inferential statistics. Students will analyze and display small bodies of data and will interpret and evaluate research findings.

Final exam required.

SOCIOL 98 Directed Group Study 1 - 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Individual and group conferences.**Prerequisites:** Consent of Instructor.

Group studies of selected topics which vary over time.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 101 Sociological Theory I 5 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks.**Prerequisites:** 1, 3 or 3AC, or consent of instructor.

First half of a year-long course on the history of social thought as a source of present-day problems and hypotheses.

Final exam required. Formerly known as 101A.

SOCIOL 103 Advanced Study in Social Theory 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks.**Prerequisites:** 101A-101B or 101 and 102.

Course involves pursuing study in subfields of sociological theory. The course presumes a general background in social theory.

Students will receive no credit for 103 after taking 102 prior to Fall 2010.

Final exam not required. Formerly known as 102.

SOCIOL 105 Research Design and Sociological Methods 5 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks.**Prerequisites:** 5 or consent of instructor.

Problems of research design, measurement, and data collection, processing, and analysis will be considered. Attention will be given to both qualitative and quantitative studies.

Final exam required.

SOCIOL 106 Quantitative Sociological Methods 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of seminar per week and individual conferences.**Prerequisites:** Sociology 5 or consent of instructor

This course will cover more technical issues in quantitative research methods, and will include, according to discretion of instructor, a practicum in data collection and/or analysis. Recommended for students interested in graduate work in sociology or research careers.

Final exam required.

SOCIOL 107A Field Research: Participant Observation 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1, 3, 3AC or consent of instructor.

This course gives students both substantive background and practical training in the participant-observation method. The first semester will be classroom based to introduce the method. In the second semester students will put the method into practice as they are sent to the field to gather data for the Center for Urban Ethnography's Bay Area Study. During the fieldwork students will participate in a bi-weekly seminar and work under the guidance of the professor to address issues that arise in the field.

Final exam required. Instructor: Sanchez-Jankowski

SOCIOL 107B Field Research: Participant Observation 5 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part two of a year long series course. Upon completion, the final grade will be applied to both parts of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 107A.

This course gives students both substantive background and practical training in the participant-observation method. The first semester will be classroom based to introduce the method. In the second semester students will put the method into practice as they are sent to the field to gather data for the Center for Urban Ethnography's Bay Area Study. During the fieldwork students will participate in a bi-weekly seminar and work under the guidance of the professor to address issues that arise in the field.

Final exam required. Instructor: Jankowski

SOCIOL 108 Advanced Methods: In-depth Interviewing 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** 5 (or equivalent but with consent of instructor).

Scientists regularly gather data through observation. Sociologists can go a step further and ask the objects of their studies about their lives and thoughts. This upper-level course teaches students how to engage in scientific research using question-based data. It involves a mix of classroom and hands-on learning, culminating in an independent research paper.

Final exam not required.

SOCIOL 110 Organizations and Social Institutions 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 1, 3 or 3AC or consent of instructor.

This survey course studies administrative organizations and voluntary associations; major social institutions in industry, government, religion, and education.

Final exam required.

SOCIOL 111 Sociology of the Family 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 1, 3 or 3AC or consent of instructor.

In this course, we trace the history of the American family from the 19th-century farm--in which work, medical care, and entertainment went on--to the smaller, more diverse, and subjectively defined family of the 21st century. We also explore ways in which the family acts as a "shock absorber" of many trends including immigration, the increasing social class divide, and especially the growing domination of the marketplace. Finally, we also explore the diversity of family forms associated with social class, ethnicity, and sexual orientation.

Final exam required.

SOCIOL 111AC Sociology of the Family 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 1 hour of discussion per week. 6 hours of lecture and 1 hour of discussion per week for 8 weeks. 8 hours of lecture and 1 hour of discussion per week for 6 weeks.**Prerequisites:** Sociology 1, 3, or 3AC, or consent of instructor.

In this course, we trace the history of the American family from the 19th-century farm--in which work, medical care, and entertainment went on--to the smaller, more diverse, and subjectively defined family of the 21st century. We also explore ways in which the family acts as a "shock absorber" of many trends including immigration, the increasing social class divide, and especially the growing domination of the marketplace. Finally, we also explore the diversity of family forms associated with social class, ethnicity, and sexual orientation.

Satisfies the American Cultures requirement

Students will receive no credit for Sociology 111AC after taking Sociology 111; a deficient grade in Sociology 111 may be removed by taking Sociology 111AC. Assessment will take place via the submission of a final essay. Instructor: Kelsey

SOCIOL 111C Sociology of Childhood 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 1, 3, 3AC or consent of instructor.

This course focuses on children and on varied contexts and experiences of growing up; it also highlights the social organization and meanings of age. It explores the idea of childhood as a social construction, including cross-cultural and historical variation in assumptions. Then it highlights the changing political economy and history of childhoods, including children's roles in consumption and production in the world. Lastly, it examines the intersecting dynamics of age, social class, racial ethnicity, gender and sexuality in growing up.

Final exam required.

SOCIOL 111P Families, Inequality and Social Policy 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1, 3, 3AC or consent of instructor.

This course explores the relationships between changes in how Americans are experiencing family life, growing inequality in the U.S., and the social policy "solutions" aimed at families and children. While discussing these trends and changes and their social consequences, we will discuss government responses to these changes, how debates are framed, who debates, and how other industrialized countries consider these questions.

Final exam required.

SOCIOL C112/RELIGST C182 Sociology of Religion 4 Units**Department:** Sociology; Religious Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 1, 3, 3AC or consent of instructor.

The course will locate the place of religious consciousness in human action and then survey comparatively and historically the role that religion has played in human society. Will include a general theory of the nature of religious experience, religious symbolism, and the basis of religious community.

Final exam required.

SOCIOL 113 Sociology of Education 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks. 6 hours of Lecture and 4 hours of Discussion per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 1, 3 or 3AC or consent of instructor.

The role of formal education in modern societies. Educational systems in relation to the religious, cultural, economic, and political forces shaping their character.

Final exam required.

SOCIOL 113AC Sociology of Education 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture and 4 hours of Discussion per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 1, 3 or 3AC or consent of instructor.

The role of formal education in modern societies. Educational systems in relation to the religious, cultural, economic, and political forces shaping their character.

Satisfies the American Cultures requirement

Final exam required.

SOCIOL 114 Sociology of Law 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1.5 hours of Discussion per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 1, 3, 3A or 3AC or consent of instructor.

Selected legal rules, principles, and institutions treated from a sociological perspective. Influence of culture and social organization on law; role of law in social change; social aspects of the administration of justice; social knowledge and the law.

Final exam required.

SOCIOL 115B Biology, Genetics and Society 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.**Prerequisites:** Sociology 1, 3, 3AC or consent of instructor.

The course will provide an overview of the intersections of biology, genetics and society in an examination of the past, present, and possible future effects of such intersections. In particular, the course addresses contemporary controversies, such as the search for the gay gene and the biology of human behavior, the biology of superiority, and the nature-nurture debate, in order to provide students a critical insight into biology's profound role in shaping our modern way of life.

Final exam required.

SOCIOL C115/PB HLTH C155 Sociology of Health and Medicine 4 Units**Department:** Sociology; Public Health**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 to 8 hours of Lecture per week for 6 weeks.**Prerequisites:** Sociology 1, 3, 3AC or consent of instructor.

This course covers several topics, including distributive justice in health care, the organization and politics of the health system, the correlates of health (by race, sex, class, income), pandemics (e.g., AIDS, Avian Flu and other influenzas, etc.), and the experience of illness and interactions with doctors and the medical system.

Students will receive no credit for C115 after taking 155, C155 or Public Health C155. Final exam required. Formerly known as C155.

SOCIOL 116 Sociology of Work 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 1, 3, or 3AC or consent of instructor.

The labor force; social control within and of occupations and professions (professionalization, professional associations vs. labor unions, codes of ethics, legal controls); social structure of the workplace, work experience of the participants, relation of both to community and society.

Final exam required.

SOCIOL C116G/L & S C150T Working People in the Global Economy 4 Units**Department:** Sociology; Letters and Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks.

Work is central to our identities, self-esteem, well-being, and social status. How societies organize work shapes the distribution of rewards and power, not just in the workplace but in society at large. Everyone's work is profoundly shaped by the way it connects to other people's labor around the globe. Using a variety of disciplinary lenses, we will look at working people world wide and examine how the organized efforts of working people have shaped the nature of jobs and social change.

Final exam required.

SOCIOL 117 Sport As a Social Institution 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

Analysis of sport as social institution, its structure and functions; male-female role contrasts, race and sport; economics of sport; the roles of coach, athlete, fan--their interrelationships and complexities; current turmoil in sport and the ideological struggle which has emerged.

Final exam required.

SOCIOL 119S Organizational Strategy and Design: A Sociological Perspective 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.**Prerequisites:** Sociology 1 or 3 or 3AC or consent of instructor.

This course addresses organizational design strategy formulation and institutional analysis for a variety of organizational entities. The course features a focus on international issues, key debates in organizational design and their implications. By the end of the course, students will be expected to detect, diagnose, and recommend globally savvy solutions for many types of organizational design related issues.

Course may NOT be repeated for credit. Students who took Soc. 119T in Fall '11, Fall '12 and Fall '13 will not receive credit for Sociol 119S. Final exam required.

SOCIOL 120 Economy and Society 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

This survey course focus on three major themes of the contemporary United States: government, resources, and cities. Stress on the importance of transition from the 1960's. Examination of how each sector is influenced by policy currents, economic trends, and social conflicts. Final exam required. Formerly known as 143.

SOCIOL 121 Innovation and Entrepreneurship: Social and Cultural Context 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1, 3, 3AC or consent of instructor.

This course will examine the social and cultural environment that enables or hinders the innovation process in business. The course starts by reviewing how companies can create and foster innovative cultures and organize for innovation, and reviews differences between countries in innovativeness. It continues by examining the factors which influence whether innovations are or are not adopted. It addresses some social and ethical issues of innovation, examines the social role and context of entrepreneurs, and closes with some case studies. Final exam required.

SOCIOL 123 Corporate Social Responsibility and Green Business 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 1, 3, 3AC, or consent of instructor.

A corporation is a "citizen" of a society and, like all other citizens, has certain legal, regulatory, moral, and ethical duties. This course will examine the definitions of corporate social responsibility and examples of good and bad corporate citizenship based on some of those definitions, with an emphasis on "green business", ways in which corporations minimize their impact on the environment. Final exam required.

SOCIOL 124 Sociology of Poverty 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Introductory sociology or consent of instructor.

This course will explore the sociology of poverty. It will examine a number of theories on the causes of poverty, then turn to an examination of empirical studies concerning the trends and determinants of poverty, followed by an examination of the everyday life of those who live in the condition of poverty. This course will conclude with a look at social policy toward poverty. The course will focus primarily, although not exclusively, on poverty in the U.S. While there will be some readings concerning rural poverty, the course will have a decidedly urban focus. Deficiency in 124AC cannot be removed by completing 124. No credit for 124 after 124AC. Course may be repeated for credit when topic changes. Final exam required.

SOCIOL C126/DEMOG C126 Social Consequences of Population Dynamics 4 Units**Department:** Sociology; Demography**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

Introduction to population issues and the field of demography, with emphasis on historical patterns of population growth and change during the industrial era. Topics covered include the demographic transition, resource issues, economic development, the environment, population control, family planning, birth control, family and gender, aging, intergenerational transfers, and international migration. Final exam required.

SOCIOL 127 Development and Globalization 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

A comparative analysis of socio-economic and political change, focusing on the poor countries of Asia, Africa, and Latin America. Offers both a basic descriptive understanding of processes of change in these countries and an introduction to major theoretical perspectives on development and globalization.

Final exam required. Formerly known as 172.

SOCIOL 128 Society and the Environment 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

Living in an urban area at the end of the 20th century, it is easy to forget how germane the biophysical world is to our lives. This course seeks to explore the relationships between society and the environment as they have varied over time and across societies. The approach taken will be broadly historical and multicultural and will include readings on the social construction of nature, early industrialization and natural resource use, social movements and the environment, and the environmental impacts of late capitalism.

Final exam required.

SOCIOL 130 Social Inequalities 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

This survey course studies recent trends in occupational stratification; social classes in local communities and the nation as related to interest organizations.

Students cannot take 130 to remove a deficient grade in 130AC. Final exam required.

SOCIOL 130AC Social Inequalities: American Cultures 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

This course explores the causes and consequences of inequality in the U.S. First, we will discuss theories and concepts scholars use to understand inequality. We then consider several institutions that sustain, reproduce and/or mitigate inequality in the U.S., such as education, labor markets, family structure, and the criminal justice system. Within each topic, we pay attention to the significance of race and ethnicity, social class, and gender.

Satisfies the American Cultures requirement

Students will receive no credit for 130AC after taking 130; a deficient grade in 130 may be removed by taking 130AC. A deficient grade in 130AC can only be removed by repeating the course. Final exam required.

SOCIOL 131 Race and Ethnic Relations: The United States Experience 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

Course focuses on race and ethnic relations in the United States. Examination of historical experiences, contemporary circumstances and future prospects of racial and ethnic populations with particular attention to trends in relations between the dominant society and the Afro-American, Native-American, Asian-American and Latino sub-cultures. Political and social consequences of racial and ethnic stratification are explored.

Course may be repeated for credit when topic changes. Students will receive no credit for 131 after taking 131A or 131AC; a deficiency in 131A may be removed by taking 131. Final exam required. Formerly known as 131A.

SOCIOL 131A Race and Ethnic Relations: The United States Experience 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

Course focuses on race and ethnic relations in the United States. Examination of historical experiences, contemporary circumstances and future prospects of racial and ethnic populations with particular attention to trends in relations between the dominant society and the Afro-American, Native-American, Asian-American and Latino sub-cultures. Political and social consequences of racial and ethnic stratification are explored.

Deficiency in 131AC cannot be removed by completing 131A. No credit for 131A after 131AC. Course may be repeated for credit when topic changes. Final exam required.

SOCIOL 131AC Race and Ethnic Relations: U.S. American Cultures 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

Course focuses on race and ethnic relations in the United States. Examination of historical experiences, contemporary circumstances, and future prospects of racial and ethnic populations with particular attention to trends in relations between the dominant society and the African American, Native American, Asian American, and Latino subcultures. Political and social consequences of racial and ethnic stratification are explored.

Satisfies the American Cultures requirement

Course may be repeated for credit when topic changes. Students will receive no credit for 131AC after taking 131 or 131A. Deficiency in 131 or 131A may be removed by 131AC. Final exam required.

SOCIOL 131F Four Centuries of Racial Vision and Division in the U.S. 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1, 3, 3AC or consent of instructor.

This course mixes sociological theory and social history to trace the workings of race as a principle of social vision and division. It proceeds through a focused inquiry into the making, functioning, and contradictions of four "peculiar institutions" that have operated to define, confine, and control African Americans in the history of the United States: slavery; the Jim Crow system of legal discrimination and segregation; the ghetto of the Northern metropolis; and the novel institutional mesh formed by the hyperghetto and the prison.

No credit for 131F after taking 132. Final exam required.

SOCIOL 133 Sociology of Gender 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

Historical and comparative theories of gender and gender relations. Exploration of key institutions such as family, state, and workplace through which students can understand the social, economic, and cultural factors that create gender and shape what it means to be a man or a woman. Consideration of feminist movements, in a global context, and of relationships of gender to social class, sexuality, age, race/ethnicity, and nationality.

Final exam required.

SOCIOL 136 Urban Sociology 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

The nature, causes, consequences of world urbanization; metropolitan areas; location and types of cities, social and demographic characteristics of urban populations.

Students will receive no credit for 136 after taking 125 or 125AC.

Deficiency in 125 may be removed by taking 136. Final exam required.

Formerly known as 125.

SOCIOL 137AC/ESPM 163AC Environmental Justice: Race, Class, Equity, and the Environment 4 Units**Department:** Sociology; Environ Sci, Policy, and Management**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture, 1 hour of discussion, and 1 hour of service learning.

Overview of the field of environmental justice, analyzing the implications of race, class, labor, and equity on environmental degradation and regulation. Environmental justice movements and struggles within poor and people of color communities in the U.S., including: African Americans, Latino Americans, and Native American Indians. Frameworks and methods for analyzing race, class, and labor. Cases of environmental injustice, community and government responses, and future strategies for achieving environmental and labor justice.

Satisfies the American Cultures requirement

Final exam required. Formerly known as Sociology 128AC. Instructor: O'Rourke

SOCIOL 139 Selected Topics in Social Inequality 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 1, 3, 3AC or consent of instructor.

Specialized topics in Social Inequalities that are not regularly offered in the curriculum may occasionally be offered under this number. The focus of the course will vary depending on the instructor in charge. The survey course in Social Inequalities, 130, is recommended before taking this course.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

SOCIOL 140 Politics and Social Change 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks. 7.5 hours of Lecture and 5 hours of Discussion per week for 6 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

This survey course studies the relationship between society and politics through an analysis of the intersection of economic development, social relations, and the political sphere. Examines how class, race, ethnicity, and gender interact with political culture, ideology, and the state. The course also looks at diverse forms of political behavior, a key aspect of politics.

Final exam required.

SOCIOL 142 Sociology of War and Conflict 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

Violent and peaceful procedures in the pursuit of national objectives; analysis of attempts to specify the causes of war.

Final exam required.

SOCIOL 144 Ethnic Politics 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

Examination of the role that ethnicity plays in influencing the political behavior of individuals as well as analysis of how the state in multi-ethnic countries interacts with ethnic groups.

No credit for Sociology 144 after taking 144AC. Deficiency in 144AC cannot be removed by taking 144. Final exam required.

SOCIOL 145 Social Change 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

Study of major changes in modern societies: the sources of these changes; the processes through which they spread; their meaning for individuals and institutions.

Students will receive no credit for 145 after taking 145AC, 170, or 170AC. Final exam required. Formerly known as 170.

SOCIOL 145AC Social Change: American Cultures 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Sociology 1, 3, or 3AC.

This course will seek to explain the formation of modern United States society by inquiring into the processes of social change that have brought us to the present as well as created possibilities for the future.

Race, nationalism, and ethnicity--and movements against racism and nationalism and for multiculturalism--are central dimensions of social change in the United States. The course will explore the processes of social change as they affect and are affected by different racial and ethnic groups in the United States.

Satisfies the American Cultures requirement

Students will receive no credit for 145AC after taking 145, 170, or 170AC. Deficiency in 145, 170, 170AC may be removed by taking 145AC. Final exam required. Formerly known as 170AC.

SOCIOL 145L Social Change in Latin America 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

This course will introduce students to the origins and nature of social change in contemporary Latin America. A socio-historical approach will be used to describe the region's development, which will lay the groundwork for understanding the emergence in recent decades of movements promoting social change there. While focusing particularly on Latin America, the course will also provide the theoretical and analytical tools required to comprehend social change elsewhere in the Third World. Final exam required. Formerly known as 187.

SOCIOL 146 Contemporary Immigration in Global Perspective 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1, 3, 3AC or consent of instructor.

The goal of this course is to introduce students to important academic and political debates around immigration, to discuss processes of immigration, integration and exclusion in different national and cultural contexts, and to look at how the question of immigration plays out in different social and political areas.

Final exam required.

SOCIOL 146AC Contemporary Immigration in Global Perspective 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1, 3, 3AC or consent of instructor.

The goal of this course is to introduce students to important academic and political debates around immigration, to discuss processes of immigration, integration and exclusion in different national and cultural contexts, and to look at how the question of immigration plays out in different social and political areas.

Satisfies the American Cultures requirement

Final exam required.

SOCIOL 148 Social Policy 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Sociology 1, 3AC, or 5.

In this course, we will examine American policy responses to poverty and inequality and evaluate various theories. We will pay particular attention to the role of public opinion, interest groups, race and class relations, social movements, and the state in explaining the American social welfare provision.

Final exam required.

SOCIOL 150 Social Psychology 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

This survey course examines many theoretical approaches to social psychology. The approaches may include: symbolic interactionism, neo-behaviorism, psychodynamic analyses, cognitive theories, interpersonal processes and theories of exchange.

Final exam required.

SOCIOL 150A Social Psychology: Self and Society 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This survey course provides tools from social psychology to help students develop a better understanding of their own and others' behavior. Social psychology is a field that bridges sociology and psychology and is primarily concerned with how individuals view and interact with one another in everyday life. The class is organized around a survey of the great ideas from the history of social psychology. We will study research on a wide variety of topics including conformity, obedience, identity, power, status, and interpersonal perception.

Students will receive no credit for 150A after taking C150A or Letters and Science C180V. Deficiency in C150A or Letters and Science C180V may be removed by taking 150A. Final exam required.

SOCIOL C150A/L & S C180V Social Psychology: Self and Society 4 Units**Department:** Sociology; Letters and Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Final exam required.

SOCIOL 151 Personality and Social Structure 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 1, 3, 3AC or consent of instructor.

This course addresses how individual psyches are shaped by the wider society: how a person's locations in a culture, an historical era, and within a society affect how they think, what they feel, and how they express their personalities.

Course may be repeated for credit when topic changes. Final exam required.

SOCIOL 152 Deviance and Social Control 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 1, 3 or 3AC or consent of instructor.

A consideration of forms, causes, and controls of deviant behavior.

Final exam required. Formerly known as 115.

SOCIOL 160 Sociology of Culture 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

This survey course studies human meaning systems, particularly as manifested in art, literature, music, and other media. It includes study of the production, reception, and aesthetic experience of cultural forms.

Final exam required.

SOCIOL 165 Social Networks 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 1, 3, 3AC, or consent of instructor.

A "social network" can be an association of people or of groups of people. It is usually for some kind of exchange, with the network serving as a forum or medium. It can be personal or impersonal. This course will study the relations linking persons, organizations, interest groups, states, etc., analyze the structure of these relations, and review how such structures constrain behavior, and channel social change. Final exam required.

SOCIOL 166 Society and Technology 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7 hours of Lecture per week for 6 weeks.**Prerequisites:** 1, 3, 3AC, or consent of instructor.

This course studies the interaction between society and technologies in a comparative and multicultural perspective. Some topics covered include the relationship between technology and human society; technology, culture and values; technology in the new global economy; development and inequality; electronic democracy; how technology has transformed work and employment; and the challenges of technological progress and the role that society plays in addressing these challenges. Final exam required. Formerly known as 119.

SOCIOL 167 Virtual Communities/Social Media 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 1, 3, 3AC, or consent of instructor.

With the advent of virtual communities and online social networks, old questions about the meaning of human social behavior have taken on renewed significance. Using a variety of online social media simultaneously, and drawing upon theoretical literature in a variety of disciplines, this course delves into discourse about community across disciplines. This course will enable students to establish both theoretical and experiential foundations for making decisions and judgments regarding the relations between mediated communication and human community. Final exam required.

SOCIOL C167/INFO C167 Virtual Communities/Social Media 4 Units**Department:** Sociology; Information**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

With the advent of virtual communities and online social networks, old questions about the meaning of human social behavior have taken on renewed significance. Using a variety of online social media simultaneously, and drawing upon theoretical literature in a variety of disciplines, this course delves into discourse about community across disciplines. This course will enable students to establish both theoretical and experiential foundations for making decisions and judgments regarding the relations between mediated communication and human community. Final exam not required.

SOCIOL 169 Selected Topics in Sociology of Culture 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1, 3, 3AC or consent of instructor.

Specialized topics in sociology of culture that are not regularly offered in the curriculum may occasionally be offered under this number. The focus of the course will vary depending on the instructor in charge. Possibilities include investigations of new media for cultural expression or social networking, cultures of care giving, and the meaning of consumption patterns. The survey course in sociology of culture, 160, is recommended before taking this course. Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

SOCIOL 169F Cultural Perspectives of Food 3 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.**Prerequisites:** Sociology 1, 3, 3AC, or consent of instructor.

The course will provide a broad overview of food as culture. The course begins with foundational writings on the cultural implications of food as consumption and social distinction, and the culture of a global food world. The course also examines how food is imbued with gender, race, class, ethnic and sexual meanings and the constitution and creation of identity. Final exam required.

SOCIOL 180C Comparative Perspectives on U.S. and European Societies: Culture 4 Units

Department: Sociology

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: 1,3, 3AC or consent of instructor.

This survey course explores difference between the US and European countries in the cultural domain. It starts by discussing American Exceptionalism, focusing on 1) individualism versus collectivism, 2) liberal market ideology versus social democracy, and 3) religiously versus secularism. Subsequent topics are: differences in the mind and psyche, focusing on substance use and abuse, the role of self-fulfillment, and of therapy, as well as moral judgment and the visions of the good life, systems of classification and evaluation, family, abortion and sex, and the cultural integration of immigrants.

Students will receive no credit for 180C after taking 122. Final exam required. Formerly known as 122B.

SOCIOL 180E Comparative Perspectives on U.S. and European Societies: Education 4 Units

Department: Sociology

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: 1, 3, or 3AC; or consent of instructor.

In this course we will focus first on relevant sociological theories of comparative education, and then apply these theories in their practical context by looking at social issues in education in the United States and selected European countries. Next we will discuss the impact of race, ethnicity, language, social class, and gender. Finally, we will consider sociological perspectives on contemporary education reform, school change, and alternative education.

Final exam not required.

SOCIOL 180I Comparative Perspectives on U.S. and European Societies: Inequality 4 Units

Department: Sociology

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: 1, 3, 3AC, or consent of instructor.

This survey course explores differences between modern societies through systematic comparisons of inequality in the U.S. and European countries. It analyzes central social changes, social problems and institutions in the societies, addressing gender inequality, immigration, and rising inequality.

Students will receive no credit for 180I after taking 122 prior to spring 2009 or 122A. Final exam required. Formerly known as 122A.

SOCIOL 180P Comparative Perspectives on U.S. and European Societies: Political Economy 4 Units

Department: Sociology

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Prerequisites: 1, 3, 3AC, or consent of instructor.

This course introduces comparative political economy with focus on the US, European countries, and the international economic arena. We will compare and contrast different theories of comparative political economy. Then we will focus on the varied economic, political, and social impacts of the EU in comparison to the NAFTA. Lastly, we will focus on challenges of and possible solutions to economic developments.

Final exam required.

SOCIOL 181 Historical Sociology 4 Units

Department: Sociology

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

Prerequisites: 1 or 3 or 3AC or consent of instructor.

Study of the major concepts, problems and works of scholarship in the field of historical sociology, with attention to such topics as industrialization, revolution, transformation of social structure, social life, political authority, institutions and culture viewed from an historical and comparative perspective.

Final exam required. Formerly known as 171.

SOCIOL 182 Elementary Forms of Racial Domination: International Perspectives 4 Units

Department: Sociology

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

Prerequisites: 1 or 3 or 3AC or consent of instructor.

A broad survey of race and ethnic relations in a wide variety of nations and periods, with special attention to comparisons with the present and past patterns in the United States. Emphasis on: social, economic, political, institutional, social psychological, and demographic processes. Final exam required. Formerly known as 131B.

SOCIOL 183 Contemporary Chinese Society 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

An introduction to institutions, social groups, and values in contemporary Chinese society. Dynamics of social change in a revolutionary and post-revolutionary setting. Trends in the future development of Chinese society.

Students will receive no credit for 183 after taking C183. Final exam required.

SOCIOL C184/DEMOG C165 Family and Household in Comparative Perspective 3 Units**Department:** Sociology; Demography**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Sociology 1, 3, 3AC or consent of instructor.

How are families and households organized around the world? Which aspects of household and family vary, and which are constant? What are the relationships between household and family on the one hand and the political, economic, or broad social patterns on the other? This course examines all of these questions, taking historical and contemporary examples from Africa, Asia, Europe, and the Americas.

Final exam required.

SOCIOL 185 Global Sociology 3 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** 1, 3, 3AC, or consent of instructor.

Global sociology seeks to transcend national boundaries, studying the world as a unit unto itself, populated by organizations, networks, and movements. Global sociology cannot be constructed by sociologists from a single country, but it must be a collaborative effort from different parts of the planet. We will study globalization through a sociological lens by asking distinguished sociologists from around the world to discuss such contemporary issues as immigration, terrorism, disasters, etc.

Final exam not required.

SOCIOL 186 American Society 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

This course explores the ways that contemporary American society is different than other societies and different than American society in earlier periods.

Final exam required. Formerly known as 180.

SOCIOL 189 Selected Topics in Comparative Perspectives and Area Studies in Sociology 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

Specialized topics in comparative perspectives and area studies in sociology that are not regularly offered in the curriculum may occasionally be offered under this number. The focus of the course will vary depending on the instructor in charge. One of the survey courses in comparative perspectives and area studies in sociology, 180C, 180E, 180I, or 180P, is recommended before taking this course.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

SOCIOL C189/DUTCH C170/HISTORY C194 Dutch Culture and Society: Amsterdam and Berkeley in the Sixties 4 Units**Department:** Sociology; Dutch; History**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.

This course will focus on the cultural aspects of protest- and youth cultures in two cities that were influential in the sixties: Amsterdam and Berkeley. Particular attention will be paid to how American popular culture was perceived in a European context. All readings and discussions in English.

Final exam required.

SOCIOL 189G Comparative Perspectives in Sociology: The Global Elite 3 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.**Prerequisites:** Sociology 1 or 3 or 3AC or consent of instructor.

The course will cover both traditional and new elite theories, examine contemporary empirical evidence on the rise of the new global plutocracy, and think about the long-term implications of this phenomenon for inequality, culture, and society.

Course may NOT be repeated for credit. Students who took Soc. 189 in Spring 2013 will not receive credit for Soc. 189G. Final exam required.

SOCIOL 190 Seminar and Research in Sociology 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of seminar per week. 4 hours of seminar per week for 8 weeks.**Prerequisites:** 1 or 3 or 3AC or consent of instructor.

Advanced study in sociology, with specific topics to be announced at the beginning of each semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 190AC Seminar and Research in Sociology: American Cultures 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** 1, 3, 3AC, or consent of instructor.

Advanced study in sociology, with specific topics that satisfy the American Cultures requirement, e.g., immigration, to be announced at the beginning of each semester.

Satisfies the American Cultures requirement

Final exam required.

SOCIOL H190A Senior Honors Thesis and Seminar 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 2 hours of seminar per week and individual conferences.

Prerequisites: Restricted to senior honors candidates with suitable preparation (see description of major).

Intensive study of individual topic to provide background for honors thesis which is completed during the second semester of the sequence. Group and individual conferences.

Credit and grade will be assigned only upon completion of the full sequence. Final exam not required.

SOCIOL H190B Senior Honors Thesis and Seminar 5 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part two of a year long series course. Upon completion, the final grade will be applied to both parts of the series.

Hours and format: 2 hours of seminar per week and individual conferences.

Prerequisites: Restricted to senior honors candidates with suitable preparation (see description of major).

Intensive study of individual topic to provide background for honors thesis which is completed during the second semester of the sequence. Group and individual conferences.

Credit and grade will be assigned only upon completion of the full sequence. Final exam not required.

SOCIOL 191 Sociology Proseminar 1 Unit**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of proseminar per week.**Prerequisites:** Declared sociology major or consent of instructor.

In this proseminar students will become familiar with faculty and their various research interests. It consists of presentations by faculty of their ongoing work and allows students to address questions within and about the discipline.

Final exam not required. Formerly known as 100.

SOCIOL 192 The Craft of Sociology 1 - 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.

Hours and format: 1 to 4 hour of Seminar per week for 15 weeks. 1.5 to 7.5 hours of Seminar per week for 8 weeks. 2.5 to 10 hours of Seminar per week for 6 weeks.

This course provides an orientation to the study of sociology at Berkeley.

In this class, students will gain exposure to the research and writing of Berkeley faculty, they will learn about the resources and opportunities available for their academic success and future goals, and they will develop their own sociological skills, notably around writing but also with regards to oral discussions and the presentation of numerical data.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

SOCIOL 194 Writing Seminar 1 - 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1 to 4 hour of Seminar per week for 15 weeks. 1.5 to 7.5 hours of Seminar per week for 8 weeks. 2.5 to 10 hours of Seminar per week for 6 weeks.

Prerequisites: 1, 3, 3AC; or consent of instructor.

This seminar is for students who are interested in writing a longer research-based paper. It is designed to improve writing skills, with a focus on empirical sociological research. Students will be required to conduct, write, and present an original research project. The seminar will also have a set of substantive readings, which will help students with specific substantive interests focus their work. The readings will vary by year and instructor, and may cover topics such as immigration, ethnicity, and poverty.

Final exam required.

SOCIOL 195 Social Psychology Laboratory Research 1 - 4 Units**Department:** Sociology**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 1 to 4 hour of Independent study per week for 15 weeks. 1.5 to 7.5 hours of Independent study per week for 8 weeks.

Prerequisites: Consent of instructor.

In this course, students apply to work as research assistants in the sociology department's Laboratory for Social Research. Students will do a variety of research related activities including participation in a weekly laboratory workshop, running participants in study sessions, analyzing data, conducting interviews, and conducting literature reviews.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

SOCIOL 200 Proseminar 1 Unit**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of Lecture per week for 15 weeks.

This proseminar is required of all first-year graduate students and is supervised by a regular faculty member. The seminar will familiarize students with faculty and their various research interests and of opportunities available for funding via research and teaching assistantships. It consists of presentations by faculty on their past, present and future research and by representatives of Organized Research Units on their mission, programs of research, and opportunities for assistantships.

Final exam not required.

SOCIOL 201A Classical Social Theory 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

Social Theory began as an attempt to come to grips with the massive social transformations in Europe beginning around 1500. Modernity was understood in three ways. It concerned the development of a capitalist economy based on the use of science to develop new technology, the emergence of states with bureaucracies allied with military organizations, and the decline of religious authority as the main arbiter of moral values accompanied by the rise of the model of the self-interested purposive actor. Social theory was produced not just to create an understanding of these changes and the problems they caused, but also to be used to propose how society ought to be structured. In this class, we examine how classical thinkers, like Karl Marx, Max Weber, and Emile Durkheim among others, proposed how to analyze those changes and in doing so created theories of society.

Students will receive no credit for 201A after taking 201. Final exam not required.

SOCIOL 201B Modern Social Theory 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

This course is a continuation of our required graduate theory course. We separate modern and classical social theory by considering modern social theory to consist of works published after World War II. Modern sociological theory uses classical social theory both as a source and a foil. There have been continuities in social thought whereby more contemporary theorists view themselves as using elements of classical social theory, sometimes in combination and at other times to understand different kinds of phenomena, such as micro-interaction or gender relations. Contemporary theory has also been critical of classical theory. This has caused different theorists to construct entirely new ideas or rely on new sources for their theories. The course considers a wide variety of authors and perspectives to illustrate the current breadth of social thought. Students will receive no credit for 201B after taking 201. Final exam not required.

SOCIOL 202A Advanced Study in Sociology Theory: Classical Sociological Theory 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Particular theorists or theoretical traditions will be selected for intensive study, according to the interests of the instructor.

Final exam not required.

SOCIOL 202B Advanced Study in Sociology Theory: Contemporary Sociological Theory 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Particular theorists or theoretical traditions will be selected for intensive study, according to the interests of the instructor.

Final exam not required.

SOCIOL 202C Advanced Study in Sociology Theory: Systematic Sociological Theory 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Particular theorists or theoretical traditions will be selected for intensive study, according to the interests of the instructor.

Final exam required.

Introductory study of a sociological field, among those listed in the 280 series, including participation in the appropriate undergraduate course in that field. Also includes individual meetings with the faculty sponsor, who may stipulate additional requirements.

Final exam not required.

SOCIOL 205F Supervised Preparatory Course Work: Family 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences, as well as class at 10 dance.**Prerequisites:** Consultation with and approval of regular faculty member responsible.

Introductory study of a sociological field, among those listed in the 280 series, including participation in the appropriate undergraduate course in that field. Also includes individual meetings with the faculty sponsor, who may stipulate additional requirements.

Final exam not required.

SOCIOL 205G Supervised Preparatory Course Work: Social Stratification and Class Analysis 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences, as well as class at 10 dance.**Prerequisites:** Consultation with and approval of regular faculty member responsible.

Introductory study of a sociological field, among those listed in the 280 series, including participation in the appropriate undergraduate course in that field. Also includes individual meetings with the faculty sponsor, who may stipulate additional requirements.

Final exam not required.

SOCIOL 205H Supervised Preparatory Course Work: Development 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences, as well as class at 10 dance.**Prerequisites:** Consultation with and approval of regular faculty member responsible.

Introductory study of a sociological field, among those listed in the 280 series, including participation in the appropriate undergraduate course in that field. Also includes individual meetings with the faculty sponsor, who may stipulate additional requirements.

Final exam not required.

SOCIOL 205I Supervised Preparatory Course Work: Religion 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences, as well as class at 10 dance.**Prerequisites:** Consultation with and approval of regular faculty member responsible.

Introductory study of a sociological field, among those listed in the 280 series, including participation in the appropriate undergraduate course in that field. Also includes individual meetings with the faculty sponsor, who may stipulate additional requirements.

Final exam not required.

SOCIOL 205J Supervised Preparatory Course Work: Urban Sociology 3 Units

Department: Sociology

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: Individual conferences, as well as class at 10dance.

Prerequisites: Consultation with and approval of regular faculty member responsible.

Introductory study of a sociological field, among those listed in the 280 series, including participation in the appropriate undergraduate course in that field. Also includes individual meetings with the faculty sponsor, who may stipulate additional requirements.

Final exam not required.

SOCIOL 205K Supervised Preparatory Course Work: Social Psychology 3 Units

Department: Sociology

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: Individual conferences, as well as class at 10dance.

Prerequisites: Consultation with and approval of regular faculty member responsible.

Introductory study of a sociological field, among those listed in the 280 series, including participation in the appropriate undergraduate course in that field. Also includes individual meetings with the faculty sponsor, who may stipulate additional requirements.

Final exam not required.

SOCIOL 205L Supervised Preparatory Course Work: Gender 3 Units

Department: Sociology

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: Individual conferences, as well as class at 10dance.

Prerequisites: Consultation with and approval of regular faculty member responsible.

Introductory study of a sociological field, among those listed in the 280 series, including participation in the appropriate undergraduate course in that field. Also includes individual meetings with the faculty sponsor, who may stipulate additional requirements.

Final exam not required.

SOCIOL 205M Supervised Preparatory Course Work: Culture 3 Units

Department: Sociology

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: Individual conferences, as well as class at 10dance.

Prerequisites: Consultation with and approval of regular faculty member responsible.

Introductory study of a sociological field, among those listed in the 280 series, including participation in the appropriate undergraduate course in that field. Also includes individual meetings with the faculty sponsor, who may stipulate additional requirements.

Final exam not required.

SOCIOL 205N Supervised Preparatory Course Work: Education 3 Units

Department: Sociology

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: Individual conferences, as well as class at 10dance.

Prerequisites: Consultation with and approval of regular faculty member responsible.

Introductory study of a sociological field, among those listed in the 280 series, including participation in the appropriate undergraduate course in that field. Also includes individual meetings with the faculty sponsor, who may stipulate additional requirements.

Final exam not required.

SOCIOL 205O Supervised Preparatory Course Work: Health and Medicine 3 Units

Department: Sociology

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: Individual conferences, as well as class at 10dance.

Prerequisites: Consultation with and approval of regular faculty member responsible.

Introductory study of a sociological field, among those listed in the 280 series, including participation in the appropriate undergraduate course in that field. Also includes individual meetings with the faculty sponsor, who may stipulate additional requirements.

Final exam not required.

SOCIOL 205P Supervised Preparatory Course Work: Area Studies 3 Units

Department: Sociology

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: Individual conferences, as well as class at 10dance.

Prerequisites: Consultation with and approval of regular faculty member responsible.

Introductory study of a sociological field, among those listed in the 280 series, including participation in the appropriate undergraduate course in that field. Also includes individual meetings with the faculty sponsor, who may stipulate additional requirements.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 205Q Supervised Preparatory Course Work: Economy and Society 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences, as well as class at 10dance.**Prerequisites:** Consultation with and approval of regular faculty member responsible.

Introductory study of a sociological field, among those listed in the 280 series, including participation in the appropriate undergraduate course in that field. Also includes individual meetings with the faculty sponsor, who may stipulate additional requirements.

Final exam not required.

SOCIOL 205R Supervised Preparatory Course Work: Professions 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences, as well as class at 10dance.**Prerequisites:** Consultation with and approval of regular faculty member responsible.

Introductory study of a sociological field, among those listed in the 280 series, including participation in the appropriate undergraduate course in that field. Also includes individual meetings with the faculty sponsor, who may stipulate additional requirements.

Final exam not required.

SOCIOL 205S Supervised Preparatory Course Work: Social Movements 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences, as well as class at 10dance.**Prerequisites:** Consultation with and approval of regular faculty member responsible.

Introductory study of a sociological field, among those listed in the 280 series, including participation in the appropriate undergraduate course in that field. Also includes individual meetings with the faculty sponsor, who may stipulate additional requirements.

Final exam not required.

SOCIOL 205T Supervised Preparatory Course Work: Theory 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences, as well as class at 10dance.**Prerequisites:** Consultation with and approval of regular faculty member responsible.

Introductory study of a sociological field, among those listed in the 280 series, including participation in the appropriate undergraduate course in that field. Also includes individual meetings with the faculty sponsor, who may stipulate additional requirements.

Final exam not required.

SOCIOL 205U Supervised Preparatory Course Work: Society and Environment 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences, as well as class at 10dance.**Prerequisites:** Consultation with and approval of regular faculty member responsible.

Introductory study of a sociological field, among those listed in the 280 series, including participation in the appropriate undergraduate course in that field. Also includes individual meetings with the faculty sponsor, who may stipulate additional requirements.

Final exam not required.

SOCIOL 205V Supervised Preparatory Course Work: Society and Technology 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences, as well as class at 10dance.**Prerequisites:** Consultation with and approval of regular faculty member responsible.

Introductory study of a sociological field, among those listed in the 280 series, including participation in the appropriate undergraduate course in that field. Also includes individual meetings with the faculty sponsor, who may stipulate additional requirements.

Final exam not required.

SOCIOL 271A Methods of Sociological Research 4 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 271A: 4 hours of lecture per week. 271B-271C: 2 hours of lecture and 2 hours of laboratory per week.**Prerequisites:** Consent of instructor.

A three-semester sequence course introducing logical and analytic techniques commonly employed in social science research. The methodological problems encountered in field work, historical and comparative inquiry, experimental research, and survey analysis. The first semester concentrates on techniques for gathering evidence; the second and third semesters focuses on beginning and intermediate numerical techniques for analyzing evidence.

Credit and grade to be assigned at the end of each semester. Final exam not required.

SOCIOL 271B Methods of Sociological Research 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 4 hours of Lecture per week for 15 weeks.

Prerequisites: Consent of instructor.

SOCIOL C271D/STAT C261 Quantitative/Statistical Research Methods in Social Sciences 3 Units**Department:** Sociology; Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Lecture per week for 15 weeks.

Prerequisites: Consent of instructor.

Selected topics in quantitative/statistical methods of research in the social sciences and particularly in sociology. Possible topics include: analysis of qualitative/categorical data; loglinear models and latent-structure analysis; the analysis of cross-classified data having ordered and unordered categories; measure, models, and graphical displays in the analysis of cross-classified data; correspondence analysis, association analysis, and related methods of data analysis.

Final exam not required.

SOCIOL 273C Advanced Seminars in Research Methods: Comparative and Historical Research 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Seminar per week for 15 weeks.

Seminar in advanced sociological research methods.

Course may be repeated for credit when topic changes. Final exam not required. Formerly known as 272C.

SOCIOL 273D Advanced Seminars in Research Methods: Quantitative/Statistical Research 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Seminar per week for 15 weeks.

Seminar in advanced sociological research methods.

Course may be repeated for credit when topic changes. Final exam required.

SOCIOL 273E Advanced Seminars in Research Methods: Participant Observation 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Seminar per week for 15 weeks.

Seminar in advanced sociological research methods.

Course may be repeated for credit when topic changes. Final exam required.

SOCIOL 273F Advanced Seminars in Research Methods: Interview Methods 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Seminar per week for 15 weeks.

Seminar in advanced sociological research methods.

Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 273I Advanced Seminars in Research Methods: Experimental Methods 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Seminar per week for 15 weeks.

Seminar in advanced sociological research methods.

Course may be repeated for credit when topic changes. Final exam not required. Formerly known as 272I.

SOCIOL 275 Research Design 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

This course will take students through the process of developing, carrying out, and writing up a research project. The course is ideal for students working on their MA papers, but it is also appropriate for students who are formulating dissertation prospectuses. We will begin by reading a guide to the logical problems that all research methods, qualitative or quantitative, must address if they are to study social causation.

Final exam not required. Formerly known as 272A.

SOCIOL 280A Advanced Study in Substantive Sociological Fields: Law 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Undergraduate preparation in the field; completion of a 205 in the field or an equivalent determined by the instructor.

Courses under this number involve pursuing graduate study in substantive sociological subfields. The courses presume familiarity with the fields of study. Consult departmental catalog for current descriptions.

Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 280AA Advanced Study in Substantive Sociological Fields: Sociology of Poverty 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Undergraduate preparation in the field; completion of a 205 in the field or an equivalent determined by the instructor.

This course introduces students to the sociology of poverty by understanding its causes and conditions. Poverty is part of the social stratification system as well as a condition with properties that characterize the individual living with extreme material scarcity. Thus, it involves both the social and the physical world. The course will engage a broad literature on poverty that incorporates research from sociology, economics, and anthropology. We also will consider structure, culture, and agency in creating and maintaining individuals and groups in the condition of poverty.

Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 280B Advanced Study in Substantive Sociological Fields: Race and Ethnic Relations 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Undergraduate preparation in the field; completion of a 205 in the field or an equivalent determined by the instructor.

Courses under this number involve pursuing graduate study in substantive sociological subfields. The courses presume familiarity with the fields of study. Consult departmental catalog for current descriptions.

Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 280C Advanced Study in Substantive Sociological Fields: Political Sociology 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Undergraduate preparation in the field; completion of a 205 in the field or an equivalent determined by the instructor.

Courses under this number involve pursuing graduate study in substantive sociological subfields. The courses presume familiarity with the fields of study. Consult departmental catalog for current descriptions.

Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 280D Advanced Study in Substantive Sociological Fields: Organizations 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Undergraduate preparation in the field; completion of a 205 in the field or an equivalent determined by the instructor.

Courses under this number involve pursuing graduate study in substantive sociological subfields. The courses presume familiarity with the fields of study. Consult departmental catalog for current descriptions.

Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 280E Advanced Study in Substantive Sociological Fields: Sociology of Work 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Undergraduate preparation in the field; completion of a 205 in the field or an equivalent determined by the instructor.

Courses under this number involve pursuing graduate study in substantive sociological subfields. The courses presume familiarity with the fields of study. Consult departmental catalog for current descriptions.

Course may be repeated for credit when topic changes. Final exam not required.

**SOCIOL 280V Advanced Study in Substantive Sociological Fields:
Sociology of Everyday Life 3 Units****Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Undergraduate preparation in the field; completion of a 205 in the field or an equivalent determined by the instructor.

This seminar approaches the sociology of everyday life from a thematic perspective. This course covers topics grouped in six major rubrics: the habitus, the public sphere, the private sphere, strategy and tactics, space, and time. We will focus on codes/rules of conduct and etiquette, taste, style, self-presentation, (house) work, emotions, resistance, and the spatial and temporal coordinates of social action. Readings will cover a broad terrain chronologically and geographically.

Course may be repeated for credit when topic changes. Final exam not required.

**SOCIOL 280W Advanced Study in Substantive Sociological Fields:
Sexuality 3 Units****Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Undergraduate preparation in the field; completion of a 205 in the field or an equivalent determined by the instructor.

In this course we address a wide range of social theories and sociological investigations of sexuality as it is conceptualized and experienced in social contexts. Theoretical approaches to sexuality may include psychoanalytic, feminist, Marxist, symbolic-interactionist, and discursive/post-structural approaches to understanding how sexual categories vary over time and across cultures, how people identify with or against them, and how social power works through time.

Course may be repeated for credit when topic changes. Final exam not required.

**SOCIOL 280X Advanced Study in Substantive Sociological Fields:
Immigration and Incorporation 3 Units****Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Undergraduate preparation in the field; completion of a 205 in the field or an equivalent determined by the instructor.

This seminar examines the dynamics of migration, integration, and citizenship, both from the perspective of the receiving society and from the lived experiences of migrants themselves. The seminar focuses on processes of incorporation--economic, social, cultural, and political--but we also look at paradigms that challenge an integrationist reading of migration, in particular transnationalism and models of postnational citizenship.

Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 280Y Sociology of Globalization 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.

Sociology now analyzes social organization that transcends national boundaries, not just as linking national societies or as influencing national societies, but as a phenomenon in its own right. This course brings together a selection of literature that looks at transnational social organizations and the distinctive dynamics of global political economy and culture and offers a sociological perspective on what lies behind the vague and confusing label of "globalization."

Final exam not required.

SOCIOL 280Z Advanced Study in Substantive Sociological Fields: Sociol Policy 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Undergraduate preparation in the field; completion of a 205 in the field or an equivalent determined by the instructor.

This course will examine the major theoretical arguments that seek to account for the development of social policy, including arguments about the power of social forces such as business and labor, the role of racial and ethnic division, the influence of ideas, and the organizational features of the state. The course readings examine developments in the United States with some comparison to other countries.

Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 285 Dissertation Seminar 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

The seminar is a forum for intensive attention to writing of seminar members at any stage, from initial planning of the dissertation to the job presentation talk. We will be especially concerned with reflexive issues: the choice of problem and method as a sociological, political, personal, and market issue; the place of the researcher in research; sociology as a discipline and interdiscipline. Problems of organization, scope, theoretical and empirical emphasis will also be addressed.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 286 Professional Writing Seminar 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 3 hours of lecture/workshop per week.**Prerequisites:** Consent of instructor.

This seminar is a workshop on professional writing for sociologists.

We will focus on editing, rewriting, re-editing, and re-rewriting seminar members' papers with the goal of completing a paper appropriate for the professional journals. In addition, we will cover several topics in writing, including psychological inhibition, style, journals, writing for the general public, and the world of book publishing. Class time will be divided into short lectures and workshop periods, during which we will discuss work in progress and do some collective editing of sample texts.

Final exam not required.

SOCIOL 290 Seminar 3 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

Advanced study in modern sociology. The specific topics will be announced at the beginning of each semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 292 Advanced Research Seminar 1 Unit**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of seminar per week or 2 hours of seminar every other week.

The purpose of this seminar is to provide participants with an opportunity to present their work-in-progress, be it a potential academic journal submission, dissertation chapter, dissertation prospectus or even a draft interview schedule. Through a process of peer-review, we will work on improving each participant's written work, and to stay abreast of the diverse work being done in the field of the seminar's topic.

Final exam not required.

SOCIOL 292D Advanced Research Seminar--Dissertation 1 Unit**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of seminar per week or 2 hours of seminar every other week.

The purpose of this seminar is to provide students an opportunity to present their work in progress (dissertation, chapter/prospectus, etc.). Through a process of peer review we will work to improve each student's dissertation work.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 292W Advanced Research Seminar 1 Unit**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of seminar per week or 2 hours of seminar every other week.

The purpose of this seminar is to provide students an opportunity to present their work in progress (academic journal submission, dissertation chapter/prospectus, etc., or even a draft interview schedule). Through a process of peer review, we will work to improve each student's written work and to stay abreast of the diverse work being done in the field of the seminar's topic.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 295 Independent Study for Graduate Students in Sociology 1 - 12 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Independent study, variable hours.**Prerequisites:** Consent of instructor.

By arrangement with faculty.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 296 Directed Dissertation Research 1 - 12 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Independent study, hours vary.**Prerequisites:** Consent of instructor.

By arrangement with faculty. Open to qualified students advanced to candidacy.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 298 Directed Group Studies for Graduates 1 - 9 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: Group conferences.**Prerequisites:** Consent of instructor.

Group studies of selected topics which vary from year to year.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 299 Individual Study and Research 1 - 9 Units**Department:** Sociology**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: Individual conferences.**Prerequisites:** Consent of instructor.

For students engaged in individual research and study. May not be substituted for available graduate lecture courses or 290.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 301 Professional Training: Teachers 3 - 6 Units**Department:** Sociology**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks.

Units may not be used to meet unit or residence requirements for either the master's or doctoral degree. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 375 Professional Training: Teachers 3 - 6 Units**Department:** Sociology**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks.

Units may not be used to meet unit or residence requirements for either the master's or doctoral degree. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Sociology 301.

SOCIOL 401 Professional Training: Research 3 - 6 Units**Department:** Sociology**Course level:** Other professional**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks.

Units may not be used to meet unit or residence requirements for either the master's or doctoral degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 601 Individual Study for Master's Students 1 - 12 Units**Department:** Sociology**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Individual conferences.**Prerequisites:** Consent of instructor.

Individual study for the master's requirements in consultation with the adviser. Units may not be used to meet either unit or residency requirements for the master's degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SOCIOL 602 Individual Study for Doctoral Students 1 - 12 Units**Department:** Sociology**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Individual conferences.

Individual study in consultation with the adviser intended to provide an opportunity for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D. May not be used for unit or residence requirements for the doctoral degree.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

South Asian (S ASIAN)

S ASIAN 1A Introduction to the Civilization of Early India 4 Units

Department: South Asian

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture per week for 6 weeks.

This course offers a broad historical and cultural survey of the civilizations of the Indian subcontinent from the earliest period known to archaeology to the advent of Islam as a major cultural and political force around the 13th century CE. Attention will be paid to the geography and ethnography of the region, its political history, and to the religious, philosophical, literary, scientific, and artistic movements that have shaped it and contributed to its development as a unique, diverse, and fascinating world civilization. Lectures, readings, and class discussions will center on salient texts, broadly defined, that have characterized major cultural, religious, and political formations from the earliest antiquity to the late medieval period. This course is open to all interested students and is required for those majoring or minoring in South Asian Studies. Final exam required.

S ASIAN 1B Introduction to the Civilization of Medieval and Modern India 4 Units

Department: South Asian

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture per week for 6 weeks.

This course offers a broad historical and cultural survey of the civilizations of the Indian subcontinent from the 12th century to partition of India in 1947. Attention will be paid to the geography and ethnography of the region, its political history, and the religious, philosophical, literary, and artistic movements that have shaped it and contributed to its development as a unique, diverse, and fascinating world civilization. Lectures, readings, and class discussions will center on salient texts, broadly defined, that have characterized major cultural, religious, and political formations from the medieval period to the 20th century. This course is open to all interested students and is required for those majoring or minoring in South Asian Studies. Final exam required.

S ASIAN R5A Great Books of India 4 Units

Department: South Asian

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 10 hours of lecture/discussion per week for 6 weeks. Reading and composition based on 10 classic works of Indian literature ranging from the ancient Sanskrit epics to modern novels by Indian and western authors. Weekly composition on texts and topics read and discussed in class. Satisfies the first half of the Reading and Composition requirement.

Satisfies the first half of the Reading and Composition requirement. Final exam not required. Formerly known as 5A.

S ASIAN R5B India in the Writer's Eye 4 Units

Department: South Asian

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 10 hours of lecture/discussion per week for 6 weeks. Reading and composition in connection with eastern and western representations of India, and other Asian cultures, in great works of modern literature. Satisfies the second half of the reading and composition requirement.

Satisfies the second half of the Reading and Composition requirement

Final exam not required. Formerly known as 5B.

S ASIAN C114/BUDDSTD C114/TIBETAN C114 Tibetan Buddhism 4 Units

Department: South Asian; Group in Buddhist Studies; Tibetan

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

This course is a broad introduction to the history, doctrine, and culture of the Buddhism of Tibet. We will begin with the introduction of Buddhism to Tibet in the eighth century and move on to the evolution of the major schools of Tibetan Buddhism, Tibetan Buddhist literature, ritual and monastic practice, the place of Buddhism in Tibetan political history, and the contemporary situation of Tibetan Buddhism both inside and outside of Tibet.

Final exam required. Formerly known as Buddhism 114.

S ASIAN 121 Classical Indian Literature in Translation 4 Units

Department: South Asian

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Literary works of ancient India are read in English translation and studied critically. The course aims at giving a comprehensive picture of many important areas of the Indian literary heritage.

Final exam required.

S ASIAN 122 The Novel in India 4 Units

Department: South Asian

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 5.5 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Lecture and discussion on the novel as it arose on the Indian subcontinent during the 19th and 20th centuries, using English translations and original works in English. Critical discussion of the novel as a modern genre adapted to local conditions and coexisting with older traditions of writing. Examines the novel as a window on Indian modernities. Interpretation of Indian society, culture, and history through literature.

Final exam required.

S ASIAN 124 Modern Indian Literature 4 Units**Department:** South Asian**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 4 hours of Discussion per week for 6 weeks.

Lectures and discussion of 19th and 20th century Indian literature through English translations and original works in English. Interpretation of Indian society and culture through literature.

Final exam required.

S ASIAN 127 Religion in Early India 4 Units**Department:** South Asian**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.

This course is an introduction to the religions that have their origin on the India subcontinent--Hinduism, Buddhism, Jainism, Sikhism, and tribal religions--as well as those that originated in other regions such as Islam, Christianity, Judaism, and Zoroastrianism. Organizing this material chronologically rather than teaching it by separate religious traditions facilitates comparisons and promotes an understanding not only of the differences among these religions but also some of their commonalities in philosophy, theology, and praxis.

Final exam required.

S ASIAN C127/RELIGST C161 Religion in Early India 4 Units**Department:** South Asian; Religious Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.

Designed as a two-semester sequence, these courses are an introduction to the religions that have their origin on the Indian subcontinent--Hinduism, Buddhism, Jainism, Sikhism, and tribal religions--as well as those that originated in other regions such as Islam, Christianity, Judaism, and Zoroastrianism. Organizing this material chronologically rather than teaching it by separate religious traditions facilitates comparisons and promotes an understanding not only of the differences among these religions but also some of their commonalities in philosophy, theology, and praxis.

Final exam required.

S ASIAN 128 Religious Movements in Modern India 4 Units**Department:** South Asian**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Introduces the history of religious movements in modern India. Examines the dissemination and reinterpretation of sacred texts and religious practices. Includes a reading of spiritual experience and religious authority at mid-century in an influential modern novel. Examines religious conversions, transformations of women's roles, and how the concept of a secular state in post-Independence India shapes religious policy and practice.

Final exam required.

S ASIAN C140/RELIGST C165 Hindu Mythology 4 Units**Department:** South Asian; Religious Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 8 hours of Lecture per week for 6 weeks.

Literary and religious aspects of Hindu myths. Reading of selected mythological texts in translation.

Final exam required. Formerly known as 140. Instructor: Goldman

S ASIAN C141/RELIGST C162 Religion in South India 3 Units**Department:** South Asian; Religious Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The development and practice of religion in South India. Emphasis will be on sources translated directly from Indian languages. Subjects covered include: the indigenous religion, the effect of Brahmanical religion, movements, and the practice of Hinduism in modern South India.

Final exam required. Instructor: G. Hart

S ASIAN C142/RELIGST C166 India's Great Epics: The Mahabharata and the Ramayana 4 Units**Department:** South Asian; Religious Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 5A, 127, 140, or consent of instructor.

The course entails substantial selected readings from the great Sanskrit epic poems--the Mahabharata and the Ramayana in translation, selected readings from the corpus of secondary literature on Indian epic studies as well as lectures on salient issues in both. Discussion will focus on a variety of historical and theoretical approaches to the study of the poems and their extraordinary influence on Indian culture. Readings will be supplemented with selected showings of popular cinematic and television versions of the epics.

Final exam required. Instructor: Goldman

S ASIAN 144 Islam in South Asia 4 Units**Department:** South Asian**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 5.5 hours of Lecture and 2 hours of Discussion per week for 8 weeks.**Prerequisites:** Consent of instructor.

The aim of this course on the culture and history of Muslim communities and institutions in South Asia is to introduce students to the broad historical currents of the expansion of Islam in the Indian subcontinent, the nature of Muslim political authority, the interaction between religious communities, Islamic aesthetics and contributions to material culture, the varied engagements and reactions of Muslims to colonial rule, and the contemporary concerns of South Asia's Muslims. While this is a lecture course, ample time will be set aside for discussion and the active engagement of participants will be expected. Lectures will be supplemented with visual material, music, and movies where possible. Final exam required.

S ASIAN 146 Mughal India through Memoirs, Chronicles and other Texts 4 Units**Department:** South Asian**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks.

This course is designed to provide a dual chronological and thematic approach to the study of one of the greatest empires in human civilization: the Mughal Empire. Although the bulk of this course will focus on the Mughal Empire during its heyday between the 1550s and the early 1700s, careful attention will be paid to the larger historical and geographical contexts that both enabled the emergence and, ultimately, decentralization of Mughal power. In so doing, this course will not only study South Asia's complex history on its own terms but also examine the intricate web of political, economic, and social links that connected South Asia to the rest of the world. Simultaneously, this course will also pay particular attention to a series of common misconceptions that dog the study of pre-modern Islamic polities. Among them, the supposedly lesser role played by women in politics; the dogmatic and central role of Islam in "Muslim" states; and the economic and political superiority of Western Europe. Crucial to these questions also is an examination of the historiography and historiographical traditions that have come to define contemporary understanding of the Mughal Empire.

Final exam required. Instructor: Faruqui

S ASIAN 148 Religious Nationalism in South Asia 4 Units**Department:** South Asian**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks.

This course seeks to interrogate the highly contentious and controversial issue of Hindu and Muslim religious nationalism (otherwise known as "communalism") in South Asia. In so doing, we will interrogate the historical trajectory and development of religious nationalism from the colonial period through to the present. We will examine issues relating to the rise of (non-religious) nationalism outside of South Asia; Hindu and Muslim relations in the pre-colonial period; colonial attempts to construct South Asia's past along religious lines; the dialectical interplay of early Hindu and Muslim religious nationalism; the interplay between secular and religious nationalism; different intellectual attempts to articulate notions of bounded religious communities; the success of religious nationalism in contemporary South Asia; and the implications of religious nationalism for the future of South Asia.

Final exam required. Instructor: Faruqui

S ASIAN 151 A History of Yoga: Origins, Innovations, and Modern Reinventions 4 Units**Department:** South Asian**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

This course explores the history of yoga from the late Vedic period to its most recent formulation in American popular and consumer culture. It seeks to make students conversant in the key texts and philosophical innovations of yoga across time. But to better convey the complex nuances of yoga's historical development it approaches the subject in three parts: it explores theories of origin leading up to the formation of yoga as a classical philosophical school; it focuses on specialists and medieval innovators as it examines sects, sadhus, and aberrant modes of practice; it explores the contemporary context as it investigates modern yoga's place in both popular imagination and the marketplace.

Final exam required. Instructor: Little

S ASIAN C154/BUDDSTD C154/TIBETAN C154 Death, Dreams, and Visions in Tibetan Buddhism 4 Units**Department:** South Asian; Group in Buddhist Studies; Tibetan**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Tibetan Buddhists view the moment of death as a rare opportunity for transformation. This course examines how Tibetans have used death and dying in the path to enlightenment. Readings will address how Tibetan funerary rituals work to assist the dying toward this end, and how Buddhist practitioners prepare for this crucial moment through tantric meditation, imaginative rehearsals, and explorations of the dream state.

Final exam required. Instructor: Dalton

S ASIAN 160 Jainism and Other Heterodox Systems 4 Units**Department:** South Asian**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.

Unique among the heterodox religious traditions that were prominent on the Indian subcontinent prior to the common era, Jainism has maintained an unbroken presence of lay and mendicant communities for more than 2,500 years. Throughout this time nonviolence has remained the guiding principle of Jain ethics and practices. This course will examine the teachings and practices of Jainism through selected readings from the Jain scriptures and commentaries (in translation) as well as secondary sources. The rise of later heterodoxies, particularly the Virasaivas in the South and the Nathas and Siddhas in the North, will also be discussed. Final exam required.

S ASIAN C214/BUDDSTD C214/TIBETAN C214 Seminar in Tibetan Buddhism 2 or 4 Units**Department:** South Asian; Group in Buddhist Studies; Tibetan**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This course provides a place for graduate-level seminars in Tibetan Buddhism that rely primarily on secondary sources and Tibetan texts in translation. Content will vary between semesters but will typically focus on a particular theme. Themes will be chosen according to student interests, with an eye toward introducing students to the breadth of available western scholarship on Tibet, from classics in the field to the latest publications.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Dalton

S ASIAN 215A Readings in Indian Buddhist Texts 2 or 4 Units**Department:** South Asian**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: 215A is prerequisite to 215B. One year of Sanskrit and/or consent of instructor.

This graduate seminar focuses on reading a wide spectrum of Indian Buddhist texts in the Sanskrit (or Pali) original introducing the students to different genres, and different aspects of Indian Buddhism. The students taking the course for 2 units (rather than 4) will be expected to prepare thoroughly every week for the reading of Buddhist texts in the original. They will also be expected to read all related secondary literature that is assigned to supplement the study of the primary source material. In contrast to the students taking the course for 4 units, they will not be expected to write a term paper or to prepare special presentations for class.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

S ASIAN C224/BUDDSTD C224/TIBETAN C224 Readings in Tibetan Buddhist Texts 2 or 4 Units

Department: South Asian; Group in Buddhist Studies; Tibetan

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Seminar per week for 15 weeks.

Prerequisites: Consent of instructor.

This graduate seminar provides an introduction to a broad range of Tibetan Buddhist texts as well as to the methods and resources for their study. Readings for the course will be drawn from a variety of genres and historical periods, including (1) chronicles and histories, (2) biographical literature, (3) doctrinal treatises, (4) canonical texts, (5) ritual manuals, (6) pilgrimage guides, and (7) liturgical texts. The seminar is designed to be of interest to graduate students interested in premodern Tibet from any perspective (literature, religion, art, history, philosophy, law, etc.). Students are required to do all of the readings in the original classical Tibetan. The course will also introduce students to "tools and methods" for the study of Tibetan Buddhist literature, including standard lexical and bibliographic references, digital resources, and secondary literature in modern languages. The content of the course will vary from semester to semester to account for the needs and interests of particular students. Final exam not required. Instructor: Dalton

South and Southeast Asian Studies (S,SEASN)

S,SEASN 1A Elementary Telugu 4 Units

Department: South and Southeast Asian Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 4 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Prerequisites: 1A is prerequisite to 1B.

The focus of this course will be on systematic grammar, essential vocabulary, and conversations. The goal is to achieve basic reading, writing, and conversational competence as well as exposure to Telugu culture and traditions through language learning. Students will be able to read short stories by the end of this course with some facility. Final exam required. Instructor: Sunkari

S,SEASN R5A Self, Representation, and Nation 4 Units

Department: South and Southeast Asian Studies

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 4 hours of Discussion per week for 6 weeks.

This course is devoted to a study of selected literary texts set in various regions of Southeast Asia. The readings will include works by foreign authors who lived and traveled in Southeast Asia and translations of works by Southeast Asian writers. These texts will be used to make comparisons and observations with which to characterize coloniality, nationalism, and postcoloniality. This course satisfies the first half of the Reading and Composition requirement.

Satisfies the first half of the Reading and Composition requirement. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as 5A.

S,SEASN R5B Under Western Eyes 4 Units

Department: South and Southeast Asian Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: 5A or course equivalent to 1A.

In this course, the student will read selections from the large body of scholarly texts that have been written about Southeast Asia. Expository and argumentative essays by premier scholars such as Sir Thomas Stamford Raffles, Margaret Mead, Clifford Geertz, and Benedict Anderson will be examined. Discussions will cover a broad range of theoretical issues including power, gender, and space. This course satisfies the second half of the Reading and Composition requirement. Satisfies the second half of the Reading and Composition requirement. Final exam not required. Formerly known as 5B.

S,SEASN 24 Freshman Seminar 1 Unit**Department:** South and Southeast Asian Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of Seminar per week for 15 weeks.

The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and topics vary from department to department and semester to semester. Enrollment limited to 15 freshmen.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

S,SEASN 39C Freshman/Sophomore Seminar 2 - 4 Units**Department:** South and Southeast Asian Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of seminar per week per unit.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester. Enrollment limits are set by the faculty, but the suggested limit is 25.

Course may be repeated for credit when topic changes. Final exam required.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

S,SEASN C52/BUDDSTD C50/EA LANG C50 Introduction to the Study of Buddhism 4 Units

Department: South and Southeast Asian Studies; East Asian Languages and Cultures; Group in Buddhist Studies

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

This introduction to the study of Buddhism will consider materials drawn from various Buddhist traditions of Asia, from ancient times down to the present day. However, the course is not intended to be a comprehensive or systematic survey; rather than aiming at breadth, the course is designed around key themes such as ritual, image veneration, mysticism, meditation, and death. The overarching emphasis throughout the course will be on the hermeneutic difficulties attendant upon the study of religion in general, and Buddhism in particular.

Final exam required. Formerly known as Buddhism C50.

S,SEASN 84 Sophomore Seminar 1 or 2 Units

Department: South and Southeast Asian Studies

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: The grading option will be decided by the instructor when the class is offered.

Hours and format: 1 hour of seminar per week per unit for 15 weeks. 1 and 1 half hours of seminar per week per unit for 10 weeks. 2 hours of seminar per week per unit for 8 weeks. 3 hours of seminar per week per unit for 5 weeks.

Prerequisites: At discretion of instructor.

Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

Department: South and Southeast Asian Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

Hours and format: 1 to 4 hour of Directed group study per week for 15 weeks.

Prerequisites: Consent of instructor.

Four-unit limit per term.

Course may be repeated for credit when topic changes. Final exam not required.

S,SEASN 99A Supervised Independent Study and Research for Lower Division Students: South Asian Studies 1 - 4 Units

Department: South and Southeast Asian Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

Hours and format: 1 to 4 hour of Independent study per week for 15 weeks.

Prerequisites: Consent of instructor.

Four-unit limit per term.

Course may be repeated for credit when topic changes. Final exam not required.

S,SEASN 100A Filipino 5 Units

Department: South and Southeast Asian Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Final exam required.

S,SEASN 100B Filipino 0 Units

Department: South and Southeast Asian Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Final exam required.

S,SEASN N113 Music of India 4 Units

Department: South and Southeast Asian Studies

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 7 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

The course aims to give a comprehensive picture of many important areas of the Indian musical heritage, including a detailed exploration of the classical traditions of both North and South India (Hindustani and Carnatic musics).

Final exam not required.

S,SEASN 120 Topics in South and Southeast Asian Studies 4 Units

Department: South and Southeast Asian Studies

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 6 hours of lecture and 1 hour of instructor consultation per week for 6 weeks.

Designed to permit regular faculty and visitors to explore special topics not normally covered in the curriculum. Focus and readings will change in response to current research interests of instructors and teaching needs of the department.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

S,SEASN C123 Religion in Medieval India 4 Units**Department:** South and Southeast Asian Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

This course is designed to provide a chronological and thematic approach to the study of religion in medieval India. It will cover the period from 600 to 1600 A.D.--a time of significant developments in both Hinduism and Islam on the subcontinent. Besides witnessing tremendous religious ferment in the South and the emergence of popular devotional movements within Hinduism in the North, the period also observed new mystical and regional articulations of Islam.

Final exam required. Instructors: Dalmia, Faruqi

S,SEASN C135/BUDDSTD C135/EA LANG C135 Tantric Traditions of Asia 4 Units**Department:** South and Southeast Asian Studies; East Asian Languages and Cultures; Group in Buddhist Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The emergence of the tantras in seventh and eighth-century India marked a watershed for religious practice throughout Asia. These esoteric scriptures introduced complex new ritual technologies that transformed the religious traditions of India, from Brahmanism to Jainism and Buddhism, as well as those of Southeast Asia, Tibet, Mongolia, China, Korea, and Japan. This course provides an overview of tantric religion across these regions.

Final exam required.

S,SEASN C145/BUDDSTD C128/EA LANG C128 Buddhism in Contemporary Society 4 Units**Department:** South and Southeast Asian Studies; East Asian Languages and Cultures; Group in Buddhist Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 1 hour of discussion per week.

A study of the Buddhist tradition as it is found today in Asia. The course will focus on specific living traditions of East, South, and/or Southeast Asia. Themes to be addressed may include contemporary Buddhist ritual practices; funerary and mortuary customs; the relationship between Buddhism and other local religious traditions; the relationship between Buddhist institutions and the state; Buddhist monasticism and its relationship to the laity; Buddhist ethics; Buddhist "modernism," and so on.

Final exam required.

S,SEASN 149 Studies in South and Southeast Asian Languages 2 - 4 Units**Department:** South and Southeast Asian Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 to 4 hours of Lecture per week for 15 weeks. 3.5 to 7.5 hours of Lecture per week for 8 weeks.

Directed study of South and Southeast Asian Languages. This course will provide intensive language training in languages not regularly taught by the Department. Language may vary each semester based on instructor availability. Intermediate language ability required.

Course may be repeated for credit as topic varies or with consent of instructor. Course may be repeated for credit when topic changes. Final exam required.

S,SEASN 190 Seminar in South and Southeast Asian Studies 3 Units**Department:** South and Southeast Asian Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of seminar and 1 hour of instructor consultation per week for 6 weeks.

Designed primarily to give majors sustained and intensive training in reading, writing, and analysis in the discipline. Independent research and a substantial essay required. Topics will vary in accord with faculty and student interests.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

Department: South and Southeast Asian Studies

Course level: Professional course for teachers or prospective teachers

Terms course may be offered: Fall and spring

Grading: Offered for satisfactory/unsatisfactory grade only.

Hours and format: 2 hours of seminar per week plus individual conferences and pedagogical videotaping.

Prerequisites: Graduate standing or graduate student status.

Team-taught by a faculty member and an advanced graduate student instructor, this weekly seminar will expose GSIs to methods and potential problems in teaching. Building a syllabus, grading, teaching writing and reading comprehension, fairness in the classroom, maintaining enthusiasm, developing a professional teaching portfolio, and campus resources for special needs students will be covered. The seminar will include periodic videotaping and feedback within each student's classroom.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as South and South East Asian Studies 300.

**S,SEASN 601A Individual Study for Masters Students: South Asian

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This course will examine the role of contemporary literature in Indonesian/Malaysian society. Emphasis on the socio-political aspects of this literature in historical context. Genres discussed will include poetry, the novel, the short story, and drama.

Final exam required.

SEASIAN 129 Mainland Southeast Asian Literature 4 Units**Department:** Southeast Asian**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks.

Prerequisites: Upper division standing or consent of instructor.

Readings and lectures focus on Thailand, Vietnam and Burma; Cambodian and Laotian materials as available. After brief attention to the influence of oral tradition, classical poetry, and dance drama, emphasis will be on modern novels, short stories, film, and television in their cultural/historical context.

Final exam required.

SEASIAN 130 Articulations of the Female in Indonesia 4 Units**Department:** Southeast Asian**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

This course examines the impact of the history of literacy and literature upon the ways in which perceptions and roles of women are constructed and reinforced in a developing non-Western society. Course material includes literature, oral and manuscript narratives, ritual performance.

Final exam required. Instructor: Tiwon

SEASIAN 137 Islam and Society in Southeast Asia 4 Units**Department:** Southeast Asian**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of seminar/discussion/laboratory/field trips/videos per week.

This undergraduate seminar will be an investigation into key discourses on Islam in Southeast Asia, focusing on history, literature, and culture. We will trace the processes through which Islam entered the Malay world in the 13th century, and explore the European colonial encounters with Islam in Southeast Asia and the ways that Islam interacted with and resisted colonialism. We will discuss the role of mysticism and of reformists and will also explore the struggles of Islam as a minority religion in the Philippines and Thailand. Readings will include primary sources in translation, literary texts, ethnographic works, and writings by colonial and local scholars.

Final exam required. Instructor: Hadler

SEASIAN 138 Southeast Asian Cultures, Texts, and Politics 4 Units**Department:** Southeast Asian**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of seminar, 2 hours of lecture, and 4 hours of reading/writing per week. 7.5 hours of seminar, 3.5 hours of lecture, and 7.5 hours of reading/writing per week for 8 weeks. 10 hours of seminar, 5 hours of lecture, and 10 hours of reading/writing per week for 6 weeks.**Prerequisites:** Southeast Asian 10B or consent of instructor.

This seminar will focus on the late colonial and national periods in Southeast Asia. Through literary and political texts as well as classical anthropological sources, we will explore different approaches to reading and analyzing Southeast Asian source material. There will be extensive readings of works of fiction and primary source material in translation, as well as occasional screenings of films. We will tackle broader themes and theoretical approaches to Southeast Asian sources and literatures and will discuss different approaches to reading modern Southeast Asian texts. The course is open to advanced undergraduates and graduate students. Final exam required. Instructor: Hadler

SEASIAN C141B/HISTORY C111B Modern Southeast Asia 4 Units**Department:** Southeast Asian; History**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 6 hours of Lecture and 1.5 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

Major themes in modern Southeast Asian history with an emphasis on cross-country comparisons involving the region's largest and most populous countries: Thailand, Burma, Vietnam, Indonesia, and the Philippines.

Final exam required.

SEASIAN C164/DUTCH C164 The Indonesian Connection: Dutch Literature About the Indies in English Translation 4 Units**Department:** Southeast Asian; Dutch**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

In postcolonial thought on European claims to cultural supremacy, the case of the "Dutch East-Indies" (the future Indonesia) still arouses questions like: What made the Dutch colonial policy different from that of other European powers? What were the main characteristics of the "Dutch East-Indies"? How did a small country like the Netherlands manage to rule a territory that was fifty-two times its own in scale? And how can we explain that 350 years of Dutch domination left so few traces in contemporary Indonesia?

Final exam required.

Spanish (SPANISH)

SPANISH 1 Elementary Spanish 5 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Recitation and 1.5 hours of Laboratory per week for 15 weeks. 10 hours of Recitation and 3 hours of Laboratory per week for 8 weeks.

Beginners' course. Not open to students who have completed two years or more of high school Spanish, or to native speakers.

Final exam required.

SPANISH R1A Reading and Composition Through Readings from the Spanish-Speaking World 4 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

The course will offer students an introduction to the literature and culture of Spanish-speaking worlds, will help them develop their skills as readers and critical thinkers and make significant progress in their ability to write coherent, intellectually forceful expository prose. We will focus on analytical writing by developing control of argument and style. Essays will be produced through a process of workshop and revision, with in-class writing, homework, and peer commentary. Our guide will be Style: Lessons in Clarity and Grace. Students meet together and also individually with the professor.

Satisfies the first half of the Reading and Composition requirement

Final exam not required.

SPANISH R1B Reading and Composition Through Readings from the Spanish-Speaking World 4 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Satisfies the second half of the Reading and Composition requirement
Final exam not required.

SPANISH 2 Elementary Spanish 5 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Recitation and 1.5 hours of Laboratory per week for 15 weeks. 10 hours of Recitation and 3 hours of Laboratory per week for 8 weeks.**Prerequisites:** 1 or equivalent.

Continuation of 1. Not open to students who have completed three years or more of high school Spanish, or native speakers.
Final exam required.

SPANISH 3 Intermediate Spanish 5 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Recitation and 1.5 hours of Laboratory per week for 15 weeks.**Prerequisites:** 2 or equivalent.

Continuation of 2. Course includes review and development of grammatical concepts taught in Spanish 1-2, as well as further practice in composition.

Final exam required.

SPANISH N3 Intermediate Spanish 5 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 20 hours of recitation per week for 1 week in Berkeley and 12 hours of recitation and 2 hours of writing and peer editing per week for 4 weeks in Madrid.**Prerequisites:** 2. 16 must be taken concurrently.

This five week course will have one week on the Berkeley campus and four weeks in Madrid, Spain, and is the first semester of the second year sequence. The students will have a complete grammar review of Spanish, focusing more on those grammatical aspects that present linguistic challenges. The course includes a writing component, using the stories in the reader as material compositions as well as visits to museums and the excursion to Toledo.

Any second year college level Spanish. Final exam not required.

SPANISH 4 Intermediate Spanish 5 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Recitation and 1.5 hours of Laboratory per week for 15 weeks. 10 hours of Recitation per week for 8 weeks.**Prerequisites:** 3 or equivalent.

Continuation of 3. Development of grammatical concepts taught in Spanish 1-3 and further practice in composition.
Final exam required.

SPANISH N4 Intermediate Spanish 5 Units**Department:** Spanish**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 20 hours of lecture per week for 5 weeks.**Prerequisites:** 3

Puts emphasis on more formal aspects of writing in Spanish; also a grammar review of the structures helps students reach this goal. Includes cultural components: visits to historic sites outside of Madrid and within the capital. Students will give oral presentations in class on those visits and personal presentations of their activities in the city. Follows guidelines in the department for lower division programs while enhancing the experience of language learning where it is spoken. Students who haven taken Spanish courses numbered 4 or higher will receive no credit for N4. Final exam not required.

SPANISH 5 Intensive Elementary Spanish Language and Latin American Culture 4 Units

Department: Spanish

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 20-5 hours of Lecture and 5 hours of Laboratory per week for 2 weeks.

Prerequisites: Spanish 1 or two years of high school Spanish.

A course designed to offer a total immersion experience in Mexico.

Continuation of Spanish 1 in the area of grammar. Special emphasis on increasing vocabulary and developing functional fluency in understanding, speaking, reading, and writing Spanish. Focus on conversational practice of everyday situations, supplemented by language laboratory work. Further study and discussion of different aspects of Latin American culture.

Final exam not required. Instructor: Parra

SPANISH 11 Elementary Spanish Course for Teachers 6 Units

Department: Spanish

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 10 hours of Recitation and 2 hours of Tutorial per week for 8 weeks. 15 hours of Recitation and 2 hours of Tutorial per week for 6 weeks.

An elementary Spanish course designed especially for teachers who need to meet the Cross-cultural Language and Academic Development foreign language requirement. Classes will meet three hours a day for six weeks with an additional two hours per week of tutorial sessions.

Final exam required.

SPANISH 12 Spanish for Advanced Beginners 5 Units

Department: Spanish

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 5 hours of Lecture per week for 15 weeks.

Prerequisites: Two to three years of high school Spanish, or AP score of one or two, or IB score of two to four, or one semester of community college Spanish.

Designed for advanced beginners; that is, students with previous exposure to Spanish. Builds on previous acquaintance with the language and will develop further four basic skills: speaking, listening, reading, and writing, in order to function at a more sophisticated and complex level.

Fully prepares for requirements of higher level Spanish courses. Students communicate and comprehend, acquire formal knowledge of grammatical structures and vocabulary, read both literary and non-literary prose, and continue to learn strategies to further develop these skills.

Final exam required.

SPANISH N12 Intensive Beginning Spanish Language Workshop and Culture 5 Units

Department: Spanish

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 20 hours of Lecture and 10 hours of Discussion per week for 8 weeks.

An intensive beginning Spanish workshop and culture course covering fundamentals of Spanish, with a homestay in Comillas, Spain. Only Spanish is spoken in class. The entire book of Dos Mundos will be covered. The cultural component of the course is designed to give a broad overview of issues that concern today's Spaniard. Weekly topics will be addressed through classroom discussion of assigned readings in English, supplemented with videos, films, and songs in Spanish, and excursions. Final exam not required.

SPANISH 16 Cultura Contemporanea 1 Unit

Department: Spanish

Course level: Undergraduate

Term course may be offered: Summer

Grading: Offered for pass/not pass grade only.

Hours and format: 2 hours of lecture per week for 5 weeks, plus 7.5 hours of field trips.

Prerequisites: 2. N3 must be taken concurrently.

This course accompanies the Spanish N3 course in the international programs in the summer program. The students spend one week in Berkeley and four weeks in Madrid. Students will have assignments to explore Madrid and make oral presentations of these experiences. There will also be at least two excursions: one to a more rural area and another to the city of Toledo. Each student will be required to write a summary of what was done on these excursions.

Final exam not required. Instructor: Dimitriou

SPANISH 18 Spanish for Communication 3 Units

Department: Spanish

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 8 hours of Discussion and 2 hours of Laboratory per week for 6 weeks.

Prerequisites: 3

An intensive course emphasizing spoken Spanish with a focus on improvement of vocabulary and correctness of oral communication. Hours in the language laboratory will be scheduled within the class period.

Final exam not required.

SPANISH 21 Spanish for Bilingual Students, First Course 3 Units

Department: Spanish

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.

Prerequisites: Consent of instructor.

An elementary course for students whose native language is Spanish.

Final exam required. Formerly known as 70.

SPANISH 22 Spanish for Bilingual Students, Second Course 3 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Laboratory per week for 15 weeks.**Prerequisites:** Consent of instructor.

An intermediate course for students whose native language is Spanish. Final exam required. Formerly known as 71.

SPANISH 24 Freshman Seminars 1 Unit**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of Seminar per week for 15 weeks.

The Berkeley Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Berkeley Seminars are offered in all campus departments, and topics vary from department to department and semester to semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 25

A study of four to seven representative Spanish lyric poets from the Renaissance to the 20th century. The course emphasizes language as a medium and aims to develop students' familiarity with poetic techniques and with the continuities in the Spanish poetic tradition. Optional translation project.

Final exam required.

SPANISH 117 The Picaresque Novel 3 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 25

This course will examine the discourse of poverty in (primarily) Spanish narrative literature, both thematically and formally. Readings will include ancient Roman novels and medieval Arabic and Italian stories, the "core" readings of Renaissance Spanish texts, and modern expressions of the picaresque sensibility.

Final exam required. Instructor: Navarrete

SPANISH 121 Contemporary Spanish History and Culture 2 Units**Department:** Spanish**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 8 weeks.**Prerequisites:** Four semesters of Spanish.

Overview of events leading to 20th and 21st century political and social changes in Spanish society. Combines cultural activities inside and outside of the classroom (lectures, fieldtrips, visits to monuments and museums). Taught entirely in Spanish. Attendance and fieldtrips are mandatory. Upon completion students will have better understanding of contemporary Spain--how the past shaped the present and how the present deals with the past; cultural diversity and its contradictions; Spain and globalization.

Final exam required.

SPANISH 122 Spanish Culture and Civilization 4 Units**Department:** Spanish**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours of lecture per week for 4 weeks or 12 hours of lecture for 5 weeks and field trips to sites.**Prerequisites:** Spanish 4 or consent of advisor.

An overview of the history and rich cultural heritage of Spain, emphasizing particular topics and visits to important historical sites.

Students will receive 1 unit for 122 after taking 112. Final exam required.

SPANISH 129 Madrid en el escenario 2 Units**Department:** Spanish**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of lecture and 4 hours of excursion per week for 4 weeks.**Prerequisites:** 4

This course will focus on seven plays which are representative works of the theater, starting with Cervantes, but concentrating on the 19th and 20th centuries. What these works have in common is their fascination with the city of Madrid. Since this class will be taught in Madrid, we will take advantage of seeing these plays in the context of the city, the streets, the neighborhoods, the cafes and see them in their true environment and come to understand them better. There will be field trips to the Corral de la Cruz, one of the oldest theaters in Madrid and to attend at least one theatrical performance. Students will have one paper to write for the course, but will be examined on the reading and asked to write brief commentaries on the works and the excursions.

Final exam required.

SPANISH 135 Studies in Hispanic Literature 3 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks. 8 hours of Lecture per week for 6 weeks.**Prerequisites:** 25

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

SPANISH N135 Studies in Hispanic Literature 4 Units**Department:** Spanish**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours of lecture per week for 5 weeks.**Prerequisites:** 4 or equivalent, or prior consent of instructor.

"Havana in Transition". This summer course will explore the changing physical, cultural, and social formations of contemporary Havana. Our aim will be to understand the pivotal role played by urban culture in the formation of a Cuban national imagery. After an intensive introductory week at UC Berkeley, the course will consist of a four-week stay in Havana. Classes and lectures will be conducted at Havana's Casa de las Americas, one of the cities major cultural centers. The course will be organized around the following topics: \n 1. Havana's cultural history \n 2. Modernity and Transition in Havana's architecture \n 3. Havana in Film \n 4. Havana's Writers.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Garcia-Calderon

SPANISH 135W Studies in Hispanic Literature - Writing Intensive 3 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 102A. Limited to majors.

Special topics in Hispanic literature. Fulfills "writing intensive" course requirement for the major.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Formerly known as 102W.

SPANISH 161 Spanish Phonetics and Phonology 3 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** 25 and proficiency in Spanish.

The aim of this course is to offer an introduction to the theories and practices of articulatory phonetics and phonology of Spanish. In class we will develop exercises about phonetic and phonological definitions, recognition, production and transcription, which will help the student to acquire skills to analyze the phonological system of Spanish.

Final exam required.

SPANISH 162 The Structure of Spanish 3 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 100 (or equivalent with consent of instructor); proficiency in Spanish.

Analysis of major syntactic structures of Spanish. The course surveys the parts of speech, major processes of word formation, and sentence structure (simple sentences, coordination, juxtaposition, and subordination). There will be intensive practice in analytical problems. Final exam required.

SPANISH 163 Issues of Multilingualism 3 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 100 and proficiency in Spanish.

Issues on the interaction of language, culture, and society in multilingual/multicultural settings. Critical examination of multilingualism in language conflict situations, educational policies and language planning, language socialization and ideologies, bilingual communicative practices and code-switching. Topics illustrated by case studies from Spanish-speaking communities, including the U.S. Final exam required.

SPANISH 166 Language and Style 3 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 25

Analysis of the linguistic component of literary and nonliterary texts (such as fiction prose, journalism, scientific writing, or advertising) from a linguistic viewpoint. Analysis of texts in Spanish and English compares linguistic structures and highlights structural similarities and differences between these languages. Course applies to the comparative linguistics requirement of Option D. Final exam required.

SPANISH 167 Language and Society in Spanish-Speaking World 3 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** 100 or equivalent.

This course will discuss general principles of sociolinguistics and language variation. It will analyze social issues related to the Spanish language in Spain, Spanish America, and the United States, as well as the role of Spanish as a world language. Specific topics will include an overview of the origins of Spanish, contact with other languages, regional and social variation, language policy, and Spanish in the media. Ultimately this course will provide a forum for reflection on the social implications of language. The readings will provide data and theory, and discussions will contribute to developing the habit of thinking critically about language. Final exam required. Instructor: Azevedo

SPANISH 168 The Language of Narrative 3 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 25, 166 or consent of instructor.

This course adopts a linguistic perspective to analyze the structure of narrative as a cognition-based process in literary and nonliterary texts, written as well as oral. It focuses on questions of syntax, vocabulary, style, dialogue, genre, ideology, and cognition. It provides a follow-up to Spanish 166, Language and Style, and is recommended for majors and minors in Spanish, particularly in option D. Topic may vary. Readings in Spanish and English. Attendance and participation essential. Final exam not required. Instructor: Azevedo

SPANISH 169 Linguistic Aspects of Style and Narrative 3 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.**Prerequisites:** Spanish 25

This course analyzes style & narrative in literary and nonliterary texts from a linguistic perspective as components of a cognition-based process. It focuses on questions of syntax, lexicon, diction, dialogue, genre, ideology, & language variation, seeking to characterize different types of discourse (such as journalism, scientific writing, fiction, legal writing, or advertising) in Spanish & English, while comparing the structures of these languages to highlight style variation & narrative structure as cognitive strategies for processing real or imaginary events. Readings include theoretical texts on style & narrative, & students will comment on texts to develop a critical perspective about theoretical approaches & narrative techniques.

1 capstone paper and 1 final paper

SPANISH 176 Introduction to Translation 3 Units**Department:** Spanish**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture per week for 8 weeks.**Prerequisites:** Upper division standing in Spanish.

This course gives an overview of translation techniques with a focus on the materials necessary for doing translations. There will be practice on general textual materials as well as specialized ones in legal, medical, technical and financial fields. Translations will be done at home and discussed in class.

Final exam not required.

SPANISH C178/AFRICAM C178/DUTCH C178 Cultural Studies 4 Units**Department:** Spanish; African American Studies; Dutch**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.

Although the Caribbean has been recognized in recent years as being one of the most compelling areas in regard to questions of interculturality, hybridity, and miscegenation, the Dutch-speaking part of it has somehow been neglected. This course intends to give an opportunity to those who do not necessarily have a command of Dutch language, but wish to complete their knowledge of Latin-American and Caribbean history, culture, and literature.

Final exam required.

SPANISH 179 Advanced Course in Hispanic Linguistics 3 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 100 or consent of instructor.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

SPANISH C179/GERMAN C179 Special Topics in German 3 Units**Department:** Spanish; German**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.**Prerequisites:** Open to any foreign language student.

Issues in bilingualism for students of foreign languages. This course explores what research on bilingualism says about what it means to learn someone else's language -- the cognitive, affective, and social dimensions of second language acquisition, the relation of language and culture, and language and identity. Fieldwork will include observing, recording, and transcribing segments of foreign language classrooms, visits to bilingual schools in the area, and interviews with native speakers of various languages on campus. Course taught in English, open to any foreign language student, data collected in the languages of the participants.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

SPANISH 185 Senior Course in Hispanic Literature 3 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours lecture/seminar per week.**Prerequisites:** Restricted to majors in Spanish with 90 units of university work, including 15 upper division units in Spanish or Spanish American literature.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

SPANISH H195 Spanish Honors Course 3 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences.**Prerequisites:** 25 or equivalent. Senior honors standing. Limited to senior honors candidates.

Directed study centering on the preparation/completion of an honors thesis (see Honors Program, Option A, above).

Final exam not required.

SPANISH H195A Spanish Honors Course 1.5 Unit**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences.**Prerequisites:** Spanish and Portuguese major, 3.6 GPA in the major, 3.3 GPA overall.

This is a two semester course. H195A will be graded at the end of the first semester, which will indicate that students are making progress on developing the thesis. During the second semester, each student will enroll in H195B and write an honors thesis.

Final exam not required.

SPANISH H195B Spanish Honors Course 1.5 Unit**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Individual conferences.**Prerequisites:** Spanish and Portuguese major, 3.6 GPA in the major, 3.3 GPA overall.

This is a two-semester course, graded at the end of each semester. During the second semester, each student will write an honors thesis. Completion of the thesis is required for a final grade in H195B.

Final exam not required.

SPANISH 197 Field Studies 1 - 4 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hours of field work per week, per unit.**Prerequisites:** Consent of the instructor.

Students will assist in the teaching of Spanish in local elementary and secondary schools. They will meet regularly with the instructor in charge and submit written reports.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SPANISH 198 Supervised Group Study 1 - 4 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Directed group study per week for 15 weeks.

Group study of a topic not included in the regular department curriculum. Topics may be initiated by students under the sponsorship and direction of a member of the Spanish and Portuguese department's faculty. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

SPANISH 199 Supervised Independent Study and Research 1 - 4 Units**Department:** Spanish**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Individual conferences.**Prerequisites:** Senior honor status plus preparation and 25.

Enrollment restrictions apply; see the Introduction to Courses and Curricula section of this catalog.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

SPANISH 200A Spanish Proseminar 1 Unit**Department:** Spanish**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1.5 hours of Lecture per week for 15 weeks.

This course is designed to introduce all new graduate students to the research conducted in the department. Readings will consist of research papers authored by members of the department. Final exam not required. Formerly known as 200.

SPANISH 200B Research Seminar I 4 Units**Department:** Spanish**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This research seminar introduces students to central questions and debates in literary and cultural studies in Spanish and Portuguese. The second objective consists of developing research strategies and the mastery of different academic genres. It will function to introduce students to the research interests of the faculty and to identify potential mentors. Students write book reviews, precis, position papers, and abstracts for applying to conferences, and conference-length papers.

Final exam not required. Formerly known as 200A.

SPANISH 200C Research Seminar II 4 Units**Department:** Spanish**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The objective of this course is to train students in developing article- or chapter-length critical writing. This is a writing workshop designed to assist students in writing an original research paper. Students will develop a research project conceived in one of their other courses and expand it in scope and argument to create a major paper with a significant critical bibliography. This course will serve as a forum for students to meet and discuss their projects, and as an organizational vehicle for their research. Final exam not required. Formerly known as 200B.

SPANISH 201 Literary Linguistics 4 Units**Department:** Spanish**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 or 3 hours of lecture per week.

Applications of linguistic theory to literary texts and the analysis of fiction prose, discourse analysis, and the literary representation of speech.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

Instructor: Azevedo

Qualified students may select to take this course pass/not pass.**Hours and format:** Forty hours of lecture or fieldwork per week for 3 weeks.

Current issues in gifted and talented education of particular interest to teachers, school-site administrators, and school counselors. Students will receive 1 unit of credit for each week of participation. Each week will focus on a different subject area: Week 1--Mathematics; Week 2--Language Arts, Humanities; Week 3--Science. Some fieldwork sessions will be at an off-campus site in Berkeley.

Final exam not required.

EDUCSPE 308 Curriculum Development and Pedagogy for Second Language Learning 4 Units**Department:** Special Education**Course level:** Professional course for teachers or prospective teachers**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours of Lecture per week for 5 weeks.

Formerly EDUC 308. This class is designed to equip bilingual, ESL, and other second language teachers with fundamental principles of curriculum development adapted to the particular educational needs of limited-English proficient (LEP) students and other second language learners. Instructional goals of the California Instructional Framework for effective use with LEP students will be reviewed.

EDUC 304. Final exam not required.

EDUCSPE 310 Teaching Science: Contemporary Methods and Techniques 4 Units**Department:** Special Education**Course level:** Professional course for teachers or prospective teachers**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours of Lecture per week for 5 weeks.

Formerly EDUC 310. This course will provide elementary and junior high teachers with strategies and activities to address the requirements of the California Science Framework and addendum. The course will focus on model science lessons related to physical, biological, and environmental science topics. Critical thinking skills as they relate to science teaching and learning will also be emphasized.

EDUC 310. Final exam not required.

EDUCSPE 313 A Cognitive Approach to Prejudice Reduction 3 Units**Department:** Special Education**Course level:** Professional course for teachers or prospective teachers**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 12 hours of lecture/discussion per week for 4 weeks.

As our schools become increasingly diverse in composition, our students seem to know less and less about each other. They tend to rely on stereotypes rather than to learn about and interact with people. The result is prejudice which is a prejudgement not based on knowledge, has several origins, of which a major one is lack of cognitive skills. This course will present and examine research on the cognitive processes which affect prejudiced thinking and will apply that research to the classroom.

Final exam not required.

EDUCSPE 315 Whole Language Learning in Classroom Settings 3 Units**Department:** Special Education**Course level:** Professional course for teachers or prospective teachers**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 8 hours of Lecture and 12 hours of Discussion per week for 8 weeks.

This course will explore recent research and theory that supports the concept of "whole language learning" and will examine the nature of acquisition and development of reading and writing skills as they relate to teaching and learning.

EDUC-LL 291M. Final exam not required.

EDUCSPE 316 Behavior Management of the Troubled and Troubling Child Adolescent 2 Units**Department:** Special Education**Course level:** Professional course for teachers or prospective teachers**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Thirty-5 hours of Lecture per week for 2 weeks.

In this course teachers examine and evaluate various teaching styles and strategies in terms of their effect on the acting-out, hyperactive, passive-aggressive, immature and withdrawn student. The emphasis will be on practical and specific suggestions for immediate use in the classroom. Final exam not required.

EDUCSPE 318 Examining Mathematics Acquisition from the Teaching-Learning Perspective 3 Units**Department:** Special Education**Course level:** Professional course for teachers or prospective teachers**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours of Lecture per week for 5 weeks.**Prerequisites:** No previous knowledge of pre-calculus is required. A course in high school trigonometry is recommended.

This course will provide a pedagogical view of mathematics learning for elementary and junior high teachers. Teachers will use learning theory to analyze the effects of pedagogical techniques on the development of their own understanding of mathematical ideas and discuss how these techniques can be applied to their own classroom settings. The didactic aspects of this exploratory approach will be illustrated through topics in pre-calculus and calculus.

Final exam not required.

EDUCSPE 319 Probability and Statistics for the Elementary School Teacher 3 Units**Department:** Special Education**Course level:** Professional course for teachers or prospective teachers**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 9 hours of Lecture per week for 8 weeks.

This course provides K-8 teachers with the background knowledge necessary to effectively teach the probability and statistics strand of the California Mathematics Framework. Participants will apply these concepts by developing innovative teaching strategies and activities for their own classrooms.

Final exam not required.

EDUCSPE 399S Special Study for Educators 1 - 4 Units**Department:** Special Education**Course level:** Professional course for teachers or prospective teachers**Term course may be offered:** Summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Individual conference and special study for 5 weeks.**Prerequisites:** Consent of instructor.

Special study of professional topics under direction of a faculty member. One unit of credit for every 7 hours of consultation and special study per week.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Statistics (STAT)

STAT 0PX Preparatory Statistics 1 Unit**Department:** Statistics**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Offered for pass/not pass grade only.

Hours and format: 5 hours of Lecture and 4.5 hours of Workshop per week for 8 weeks. 5 hours of Lecture and 4.5 hours of Workshop per week for 6 weeks.

Prerequisites: Consent of instructor.

This course assists entering Freshman students with basic statistical concepts and problem solving. Designed for students who do not meet the prerequisites for 2. Offered through the Student Learning Center.

Final exam required. Instructor: Purves

STAT 2 Introduction to Statistics 4 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks. 5 hours of Lecture and 4 hours of Laboratory per week for 8 weeks.

Population and variables. Standard measures of location, spread and association. Normal approximation. Regression. Probability and sampling. Binomial distribution. Interval estimation. Some standard significance tests.

Students who have taken 2X, 5, 20, 21, 21X, or 25 will receive no credit for 2. Final exam required.

STAT 20 Introduction to Probability and Statistics 4 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks. 6 hours of Lecture and 3 hours of Laboratory per week for 8 weeks.

Prerequisites: One semester of calculus.

For students with mathematical background who wish to acquire basic concepts. Relative frequencies, discrete probability, random variables, expectation. Testing hypotheses. Estimation. Illustrations from various fields.

Students who have taken 2, 2X, 5, 21, 21X, or 25 will receive no credit for 20. Final exam required.

STAT 21 Introductory Probability and Statistics for Business 4 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks. 5 hours of Lecture and 4 hours of Laboratory per week for 8 weeks.**Prerequisites:** One semester of calculus.

Descriptive statistics, probability models and related concepts, sample surveys, estimates, confidence intervals, tests of significance, controlled experiments vs. observational studies, correlation and regression.

Students who have taken 2, 2X, 5, 20, 21X or 25 will receive no credit for 21. A deficiency in N21 may be moved by taking 21. Final exam required.

STAT W21 Introductory Probability and Statistics for Business 4 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Web-based lecture per week for 15 weeks. 7.5 hours of Web-based lecture per week for 8 weeks. This is an online course.**Prerequisites:** One semester of calculus.

Reasoning and fallacies, descriptive statistics, probability models and related concepts, combinatorics, sample surveys, estimates, confidence intervals, tests of significance, controlled experiments vs. observational studies, correlation and regression.

Students will receive no credit for Statistics W21 after taking Statistics 2, 20, or 25. Final exam required. Formerly known as N21.

STAT 39D Freshman/Sophomore Seminar 2 - 4 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** Seminar format.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required.

STAT C79/COMPSCI C79/POL SCI C79 Societal Risks and the Law 3 Units**Department:** Statistics; Computer Science; Political Science**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Defining, perceiving, quantifying and measuring risk; identifying risks and estimating their importance; determining whether laws and regulations can protect us from these risks; examining how well existing laws work and how they could be improved; evaluating costs and benefits.

Applications may vary by term. This course cannot be used to complete engineering unit or technical elective requirements for students in the College of Engineering.

Final exam not required.

STAT 97 Field Study in Statistics 1 - 3 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 3 hour of Fieldwork per week for 15 weeks. 1.5 to 5.5 hours of Fieldwork per week for 8 weeks. 2.5 to 7.5 hours of Fieldwork per week for 6 weeks.

Supervised experience relevant to specific aspects of statistics in off-campus settings. Individual and/or group meetings with faculty.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

STAT 98 Directed Group Study 2 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 2 hours of group study per week.**Prerequisites:** Consent of instructor.

Must be taken at the same time as either Statistics 2 or 21. This course assists lower division statistics students with structured problem solving, interpretation and making conclusions.

Course may be repeated for credit when topic changes. Final exam not required.

STAT 100 Introduction to the SAS System for Data Analysis 1 Unit**Department:** Statistics**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 5 hours of Lecture per week for 3 weeks.

The SAS system is useful for reading input data from a variety of sources and then performing a wide range of analyses and graphical displays with the data. Topics include accessing SAS on a variety of computer platforms; inputting raw data; managing SAS data sets; programming in SAS and in the SAS macro language. Emphasis on large data sets. Students are encouraged to bring in their own data. Students should have used at least one program, such as a word processor.

Final exam required. Instructor: Spector

STAT 131A Introduction to Probability and Statistics for Life Scientists 4 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks. 5 hours of Lecture and 4 hours of Laboratory per week for 8 weeks.**Prerequisites:** One semester of calculus or consent of instructor.

Ideas for estimation and hypothesis testing basic to applications, including an introduction to probability. Linear estimation and normal regression theory.

Final exam required.

STAT 132 Practical Machine Learning 3 Units**Department:** Statistics**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 8 weeks.**Prerequisites:** Some prior exposure to basic probability and to linear algebra.

Machine learning is a collection of topics in which the focus is on large-scale statistical problems where computational issues are paramount. The goal is often one of prediction or classification, where based on a set of labeled data it is desired to predict the labels of unlabeled data. Machine learning algorithms also often focus on exploratory data analysis. This course will introduce core statistical machine learning algorithms in a non-mathematical way, emphasizing applied problem-solving.

Final exam not required.

STAT 133 Concepts in Computing with Data 3 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 1 hour of computer laboratory per week. 3.5 hours of lecture and 3.5 hours of computer laboratory per week for 8 weeks. 4 hours of lecture and 2 hours of computer laboratory per week for 10 weeks.

An introduction to computationally intensive applied statistics. Topics will include organization and use of databases, visualization and graphics, statistical learning and data mining, model validation procedures, and the presentation of results.

Final exam required.

STAT 134 Concepts of Probability 3 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5 hours of Lecture per week for 8 weeks.**Prerequisites:** One year of calculus.

An introduction to probability, emphasizing concepts and applications.

Conditional expectation, independence, laws of large numbers. Discrete and continuous random variables. Central limit theorem. Selected topics such as the Poisson process, Markov chains, characteristic functions.

Students will not receive credit for 134 after taking 101. Final exam required.

STAT 135 Concepts of Statistics 4 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks. 6 hours of Lecture and 4 hours of Laboratory per week for 8 weeks.**Prerequisites:** Statistics 134 and linear algebra (Mathematics 54 or equivalent). Statistics 133 strongly recommended.

A comprehensive survey course in statistical theory and methodology.

Topics include descriptive statistics, maximum likelihood estimation, non-parametric methods, introduction to optimality, goodness-of-fit tests, analysis of variance, bootstrap and computer-intensive methods and least squares estimation. The laboratory includes computer-based data-analytic applications to science and engineering.

Final exam required.

STAT 150 Stochastic Processes 3 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 101 or 103A or 134.

Random walks, discrete time Markov chains, Poisson processes. Further topics such as: continuous time Markov chains, queueing theory, point processes, branching processes, renewal theory, stationary processes, Gaussian processes.

Final exam required.

STAT 151A Linear Modelling: Theory and Applications 4 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Prerequisites: 102 or 135. 133 recommended.

A coordinated treatment of linear and generalized linear models and their application. Linear regression, analysis of variance and covariance, random effects, design and analysis of experiments, quality improvement, log-linear models for discrete multivariate data, model selection, robustness, graphical techniques, productive use of computers, in-depth case studies.

Final exam required.

STAT 151B Linear Modelling: Theory and Applications 4 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Prerequisites: 102 or 135. 133 recommended.

A coordinated treatment of linear and generalized linear models and their application. Linear regression, analysis of variance and covariance, random effects, design and analysis of experiments, quality improvement, log-linear models for discrete multivariate data, model selection, robustness, graphical techniques, productive use of computers, in-depth case studies.

Final exam required.

STAT 152 Sampling Surveys 4 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Prerequisites: 101 or 134. 133 and 135 recommended.

Theory and practice of sampling from finite populations. Simple random, stratified, cluster, and double sampling. Sampling with unequal probabilities. Properties of various estimators including ratio, regression, and difference estimators. Error estimation for complex samples.

Final exam required.

STAT 153 Introduction to Time Series 4 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Prerequisites: 101, 134 or consent of instructor. 133 or 135 recommended.

An introduction to time series analysis in the time domain and spectral domain. Topics will include: estimation of trends and seasonal effects, autoregressive moving average models, forecasting, indicators, harmonic analysis, spectra.

Final exam required.

STAT 154 Modern Statistical Prediction and Machine Learning 4 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Prerequisites: Mathematics 53 and 54 or equivalents; Statistics 135 or equivalent; experience with some programming language. Mathematics 55 or equivalent exposure to counting arguments is recommended but not required.

Theory and practice of statistical prediction. Contemporary methods as extensions of classical methods. Topics: optimal prediction rules, the curse of dimensionality, empirical risk, linear regression and classification, basis expansions, regularization, splines, the bootstrap, model selection, classification and regression trees, boosting, support vector machines. Computational efficiency versus predictive performance. Emphasis on experience with real data and assessing statistical assumptions.

Final exam required.

STAT 155 Game Theory 3 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks.

Prerequisites: 101 or 134.

General theory of zero-sum, two-person games, including games in extensive form and continuous games, and illustrated by detailed study of examples.

Final exam required.

STAT 157 Seminar on Topics in Probability and Statistics 3 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Mathematics 53-54, Statistics 134, 135. Knowledge of scientific computing environment (R or Matlab) often required. Prerequisites might vary with instructor and topics.

Substantial student participation required. The topics to be covered each semester that the course may be offered will be announced by the middle of the preceding semester; see departmental bulletins. Recent topics include: Bayesian statistics, statistics and finance, random matrix theory, high-dimensional statistics.

Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam required.

STAT 158 The Design and Analysis of Experiments 4 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** Statistics 134 and 135 or consent of instructor. Statistics 135 may be taken concurrently. Statistics 133 is recommended.

An introduction to the design and analysis of experiments. This course covers planning, conducting, and analyzing statistically designed experiments with an emphasis on hands-on experience. Standard designs studied include factorial designs, block designs, latin square designs, and repeated measures designs. Other topics covered include the principles of design, randomization, ANOVA, response surface methodology, and computer experiments.

Final exam required.

STAT H195 Special Study for Honors Candidates 1 - 4 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Zero hours of Independent study per week for 15 weeks. 1 to 4 hour of Independent study per week for 8 weeks. 1 to 5 hour of Independent study per week for 6 weeks.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

STAT 197 Field Study in Statistics 1 - 3 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 3 hour of Fieldwork per week for 15 weeks. 1.5 to 4.5 hours of Fieldwork per week for 10 weeks. 2 to 6 hours of Fieldwork per week for 8 weeks.

Supervised experience relevant to specific aspects of statistics in off-campus settings. Individual and/or group meetings with faculty.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

STAT 198 Directed Study for Undergraduates 1 - 3 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 3 hour of Directed group study per week for 15 weeks. 1.5 to 5.5 hours of Directed group study per week for 8 weeks. 2.5 to 7.5 hours of Directed group study per week for 6 weeks.**Prerequisites:** Consent of instructor.

Special tutorial or seminar on selected topics.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

STAT 199 Supervised Independent Study and Research 1 - 3 Units**Department:** Statistics**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks. 1 to 3 hour of Independent study per week for 8 weeks. 1 to 4 hour of Independent study per week for 6 weeks.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

STAT 200A Introduction to Probability and Statistics at an Advanced Level 4 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** Multivariable calculus and one semester of linear algebra. Probability spaces, random variables, distributions in probability and statistics, central limit theorem, Poisson processes, transformations involving random variables, estimation, confidence intervals, hypothesis testing, linear models, large sample theory, categorical models, decision theory.

Students will receive no credit for Statistics 200A-200B after taking Statistics 201A-201B. Final exam required.

STAT 200B Introduction to Probability and Statistics at an Advanced Level 4 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** Multivariable calculus and one semester of linear algebra. Probability spaces, random variables, distributions in probability and statistics, central limit theorem, Poisson processes, transformations involving random variables, estimation, confidence intervals, hypothesis testing, linear models, large sample theory, categorical models, decision theory.

Students will receive no credit for Statistics 200A-200B after taking Statistics 201A-201B. Final exam required.

STAT 201A Introduction to Probability at an Advanced Level 4 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture and 3 hours of Laboratory per week for 7 weeks.**Prerequisites:** Multivariable calculus, one semester of linear algebra, and Statistics 134 or consent of instructor.

Distributions in probability and statistics, central limit theorem, Poisson processes, modes of convergence, transformations involving random variables.

Students will receive no credit for 201A after taking 200A. Final exam required.

STAT 201B Introduction to Statistics at an Advanced Level 4 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Lecture and 3 hours of Laboratory per week for 7 weeks.**Prerequisites:** Statistics 200A, Statistics 201A, or consent of instructor.

Estimation, confidence intervals, hypothesis testing, linear models, large sample theory, categorical models, decision theory.

Students will receive no credit for 201B after taking 200B. Final exam required.

STAT 204 Probability for Applications 4 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

A treatment of ideas and techniques most commonly found in the applications of probability: Gaussian and Poisson processes, limit theorems, large deviation principles, information, Markov chains and Markov chain Monte Carlo, martingales, Brownian motion and diffusion. Students will receive no credit for 204 after taking 205A-205B. Final exam not required. Instructor: Evans

STAT C205A/MATH C218A Probability Theory 4 Units**Department:** Statistics; Mathematics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The course is designed as a sequence with Statistics C205B/ Mathematics C218B with the following combined syllabus. Measure theory concepts needed for probability. Expectation, distributions. Laws of large numbers and central limit theorems for independent random variables. Characteristic function methods. Conditional expectations, martingales and martingale convergence theorems. Markov chains. Stationary processes. Brownian motion. Final exam not required.

STAT C205B/MATH C218B Probability Theory 4 Units**Department:** Statistics; Mathematics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The course is designed as a sequence with with Statistics C205A/ Mathematics C218A with the following combined syllabus. Measure theory concepts needed for probability. Expectation, distributions. Laws of large numbers and central limit theorems for independent random variables. Characteristic function methods. Conditional expectations, martingales and martingale convergence theorems. Markov chains. Stationary processes. Brownian motion. Final exam not required.

STAT C206A/MATH C223A Advanced Topics in Probability and Stochastic Process 3 Units**Department:** Statistics; Mathematics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Statistics C205A-C205B or consent of instructor.

The topics of this course change each semester, and multiple sections may be offered. Advanced topics in probability offered according to students demand and faculty availability.

Course may be repeated for credit with a different instructor. Course may be repeated for credit when topic changes. Final exam not required.

STAT C206B/MATH C223B Advanced Topics in Probability and Stochastic Processes 3 Units**Department:** Statistics; Mathematics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The topics of this course change each semester, and multiple sections may be offered. Advanced topics in probability offered according to students demand and faculty availability.

Course may be repeated for credit with a different instructor. Course may be repeated for credit when topic changes. Final exam not required.

STAT 210A Theoretical Statistics 4 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Linear algebra, real analysis, and a year of upper division probability and statistics.

An introduction to mathematical statistics, covering both frequentist and Bayesian aspects of modeling, inference, and decision-making.

Topics include statistical decision theory; point estimation; minimax and admissibility; Bayesian methods; exponential families; hypothesis testing; confidence intervals; small and large sample theory; and M-estimation. Final exam required.

STAT 210B Theoretical Statistics 4 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Prerequisites: Statistics 210A and a graduate level probability course; a good understanding of various notions of stochastic convergence. Introduction to modern theory of statistics; empirical processes, influence functions, M-estimation, U and V statistics and associated stochastic decompositions; non-parametric function estimation and associated minimax theory; semiparametric models; Monte Carlo methods and bootstrap methods; distributionfree and equivariant procedures; topics in machine learning. Topics covered may vary with instructor. Final exam not required.

STAT 212A Topics in Theoretical Statistics 3 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 210 or 205 and 215.

This course introduces the student to topics of current research interest in theoretical statistics. Recent topics include information theory, multivariate analysis and random matrix theory, high-dimensional inference. Typical topics have been model selection; empirical and point processes; the bootstrap, stochastic search, and Monte Carlo integration; information theory and statistics; semi- and non-parametric modeling; time series and survival analysis.

Course may be repeated for credit with different instructor. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as 216A-216B and 217A-217B.

STAT 212B Topics in Theoretical Statistics 3 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring

STAT 215A Statistical Models: Theory and Application 4 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Prerequisites: Linear algebra, calculus, upper division probability and statistics, and familiarity with high-level programming languages. Statistics 133, 134, and 135 recommended.

Applied statistics with a focus on critical thinking, reasoning skills, and techniques. Hands-on-experience with solving real data problems with high-level programming languages such as R. Emphasis on examining the assumptions behind standard statistical models and methods. Exploratory data analysis (e.g., graphical data summaries, PCAs, clustering analysis). Model formulation, fitting, and validation and testing. Linear regression and generalizations (e.g., GLMs, ridge regression, lasso). Final exam not required.

STAT 215B Statistical Models: Theory and Application 4 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** Statistics 215A or consent of instructor.

Course builds on 215A in developing critical thinking skills and the techniques of advanced applied statistics. Particular topics vary with instructor. Examples of possible topics include planning and design of experiments, ANOVA and random effects models, splines, classification, spatial statistics, categorical data analysis, survival analysis, and multivariate analysis.

Final exam not required.

STAT 222 Masters of Statistics Capstone Project 4 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Seminar per week for 15 weeks.

Prerequisites: Statistics 201A-201B, 243. Restricted to students who have been admitted to the one-year Masters Program in Statistics beginning fall 2012 or later.

The capstone project is part of the masters degree program in statistics. Students engage in professionally-oriented group research under the supervision of a research advisor. The research synthesizes the statistical, computational, economic, and social issues involved in solving complex real-world problems.

Final exam not required.

STAT 230A Linear Models 4 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Prerequisites: Matrix algebra, a year of calculus, two semesters of upper division or graduate probability and statistics.

Theory of least squares estimation, interval estimation, and tests under the general linear fixed effects model with normally distributed errors.

Large sample theory for non-normal linear models. Two and higher way layouts, residual analysis. Effects of departures from the underlying assumptions. Robust alternatives to least squares.

Final exam required.

STAT 232 Experimental Design 4 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Prerequisites: 200B or equivalent.

Randomization, blocking, factorial design, confounding, fractional replication, response surface methodology, optimal design. Applications. Course may be repeated for credit when topic changes. Final exam required.

STAT C239A/POL SCI C236A The Statistics of Causal Inference in the Social Science 4 Units**Department:** Statistics; Political Science**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks.

Approaches to causal inference using the potential outcomes framework. Covers observational studies with and without ignorable treatment assignment, randomized experiments with and without noncompliance, instrumental variables, regression discontinuity, sensitivity analysis and randomization inference. Applications are drawn from a variety of fields including political science, economics, sociology, public health and medicine.

Final exam not required.

STAT 240 Nonparametric and Robust Methods 4 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Prerequisites: A year of upper division probability and statistics.

Standard nonparametric tests and confidence intervals for continuous and categorical data; nonparametric estimation of quantiles; robust estimation of location and scale parameters. Efficiency comparison with the classical procedures.

Final exam required.

STAT C241A/COMPSCI C281A Statistical Learning Theory 3 Units**Department:** Statistics; Computer Science**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Classification regression, clustering, dimensionality, reduction, and density estimation. Mixture models, hierarchical models, factorial models, hidden Markov, and state space models, Markov properties, and recursive algorithms for general probabilistic inference nonparametric methods including decision trees, kernel methods, neural networks, and wavelets. Ensemble methods.

Final exam not required. Instructors: Bartlett, Jordan, Wainwright

STAT C241B/COMPSCI C281B Advanced Topics in Learning and Decision Making 3 Units**Department:** Statistics; Computer Science**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture per week for 15 weeks.

Recent topics include: Graphical models and approximate inference algorithms. Markov chain Monte Carlo, mean field and probability propagation methods. Model selection and stochastic realization. Bayesian information theoretic and structural risk minimization approaches. Markov decision processes and partially observable Markov decision processes. Reinforcement learning.

Final exam not required. Instructors: Bartlett, Jordan, Wainwright

STAT 243 Introduction to Statistical Computing 4 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Prerequisites: Graduate standing.

The structure and use of statistical languages and packages. Use of graphical displays in data analysis. Statistical data base management. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

STAT 244 Statistical Computing 4 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Prerequisites: Knowledge of a higher level programming language. Algorithms in statistical computing: random number generation, generating other distributions, random sampling and permutations. Matrix computations in linear models. Non-linear optimization with applications to statistical procedures. Other topics of current interest, such as issues of efficiency, and use of graphics.

Final exam required.

STAT C245A/PB HLTH C240A Biostatistical Methods: Advanced Categorical Data Analysis 4 Units**Department:** Statistics; Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered odd-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Prerequisites: Statistics 200A (may be taken concurrently).

This course focuses on statistical methods for discrete data collected in public health, clinical and biological studies. Lectures topics include proportions and counts, contingency tables, logistic regression models, Poisson regression and log-linear models, models for polytomous data and generalized linear models. Computing techniques, numerical methods, simulation and general implementation of biostatistical analysis techniques with emphasis on data applications.

Final exam required.

STAT C245B/PB HLTH C240B Biostatistical Methods: Survival Analysis and Causality 4 Units**Department:** Statistics; Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Prerequisites: Statistics 200B (may be taken concurrently).

Analysis of survival time data using parametric and non-parametric models, hypothesis testing, and methods for analyzing censored (partially observed) data with covariates. Topics include marginal estimation of a survival function, estimation of a generalized multivariate linear regression model (allowing missing covariates and/or outcomes), estimation of a multiplicative intensity model (such as Cox proportional hazards model) and estimation of causal parameters assuming marginal structural models. General theory for developing locally efficient estimators of the parameters of interest in censored data models. Computing techniques, numerical methods, simulation and general implementation of biostatistical analysis techniques with emphasis on data applications.

Final exam required. Instructor: van der Laan

STAT C245C/PB HLTH C240C Biostatistical Methods: Computational Statistics with Applications in Biology and Medicine 4 Units**Department:** Statistics; Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Prerequisites: Statistics 200A or equivalent (may be taken concurrently).

This course provides an introduction to computational statistics, with emphasis on statistical methods and software for addressing high-dimensional inference problems in biology and medicine. Topics include numerical and graphical data summaries, loss-based estimation (regression, classification, density estimation), smoothing, EM algorithm, Markov chain Monte-Carlo, clustering, multiple testing, resampling, hidden Markov models, in silico experiments.

Final exam required. Instructor: Dudoit

STAT C245D/PB HLTH C240D Biostatistical Methods: Applications of Statistics to Genetics and Molecular Biology 4 Units**Department:** Statistics; Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 2 hours of laboratory per week.**Prerequisites:** Statistics 200A-200B or Statistics 201A-201B (may be taken concurrently) or consent of instructor.

This course and Pb Hlth C240C/Stat C245C provide an introduction to computational statistics with emphasis on statistical methods and software for addressing high-dimensional inference problems that arise in current biological and medical research. The courses also discusses statistical computing resources, with emphasis on the R language and environment (www.r-project.org). Programming topics to be discussed include: data structures, functions, statistical models, graphical procedures, designing an R package, object-oriented programming, inter-system interfaces. The statistical and computational methods are motivated by and illustrated on data structures that arise in current high-dimensional inference problems in biology and medicine.

Final exam required. Instructor: Dudoit

STAT C245E/PB HLTH C240E Statistical Genomics 4 Units**Department:** Statistics; Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: Statistics 200A and 200B or equivalent (may be taken concurrently). A course in algorithms and knowledge of at least one computing language (e.g., R, matlab) is recommended.

Genomics is one of the fundamental areas of research in the biological sciences and is rapidly becoming one of the most important application areas in statistics. This is the first course of a two-semester sequence, which provides an introduction to statistical and computational methods for the analysis of meiosis, population genetics, and genetic mapping. The second course is Statistics C245F/Public Health C240F. The courses are primarily intended for graduate students and advanced undergraduate students from the mathematical sciences.

Final exam not required. Instructors: Dudoit, Huang, Nielsen, Song

STAT C245F/PB HLTH C240F Statistical Genomics 4 Units**Department:** Statistics; Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Genomics is one of the fundamental areas of research in the biological sciences and is rapidly becoming one of the most important application areas in statistics. The first course in this two-semester sequence is Public Health C240E/Statistics C245E. This is the second course, which focuses on sequence analysis, phylogenetics, and high-throughput microarray and sequencing gene expression experiments. The courses are primarily intended for graduate students and advanced undergraduate students from the mathematical sciences.

Final exam not required. Instructors: Dudoit, Huang, Nielsen, Song

STAT C247C/PB HLTH C242C Longitudinal Data Analysis 4 Units**Department:** Statistics; Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks.**Prerequisites:** 142, 145, 241 or equivalent courses in basic statistics, linear and logistic regression.

The course covers the statistical issues surrounding estimation of effects using data on subjects followed through time. The course emphasizes a regression model approach and discusses disease incidence modeling and both continuous outcome data/linear models and longitudinal extensions to nonlinear models (e.g., logistic and Poisson). The primary focus is from the analysis side, but mathematical intuition behind the procedures will also be discussed. The statistical/mathematical material includes some survival analysis, linear models, logistic and Poisson regression, and matrix algebra for statistics. The course will conclude with an introduction to recently developed causal regression techniques (e.g., marginal structural models). Time permitting, serially correlated data on ecological units will also be discussed.

Final exam not required. Instructors: Hubbard, Jewell

STAT 248 Analysis of Time Series 4 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** 102 or equivalent.

Frequency-based techniques of time series analysis, spectral theory, linear filters, estimation of spectra, estimation of transfer functions, design, system identification, vector-valued stationary processes, model building. Final exam required.

STAT C249A/PB HLTH C246A Censored Longitudinal Data and Causality 4 Units**Department:** Statistics; Public Health**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered odd-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** 240B, Statistics 200A-200B or consent of instructor.

This course examines optimal robust methods for statistical inference regarding causal and non-causal parameters based on longitudinal data in the presence of informative censoring and informative confounding of treatment. Models presented include multivariate regression models, multiplicative intensity models for counting processes, and causal models such as marginal structural models and structural nested models. Methods will be illustrated with data sets of practical interest and analyzed in the laboratory section. This course, appropriate for advanced masters and Ph.D. students, provides exposure to a number of ongoing research topics.

Final exam not required. Instructor: van der Laan

STAT 260 Topics in Probability and Statistics 3 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Special topics in probability and statistics offered according to student demand and faculty availability.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

STAT C261/SOCIOL C271D Quantitative/Statistical Research Methods in Social Sciences 3 Units**Department:** Statistics; Sociology**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

Selected topics in quantitative/statistical methods of research in the social sciences and particularly in sociology. Possible topics include: analysis of qualitative/categorical data; loglinear models and latent-structure analysis; the analysis of cross-classified data having ordered and unordered categories; measure, models, and graphical displays in the analysis of cross-classified data; correspondence analysis, association analysis, and related methods of data analysis.

Final exam not required.

STAT 272 Statistical Consulting 3 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 hours of session per week and individual meetings as necessary.**Prerequisites:** Some course work in applied statistics and permission of instructor.

To be taken concurrently with service as a consultant in the department's drop-in consulting service. Participants will work on problems arising in the service and will discuss general ways of handling such problems.

There will be working sessions with researchers in substantive fields and occasional lectures on consulting.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

STAT 278B Statistics Research Seminar 1 - 4 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 2 or more hours of seminar per week.

Special topics, by means of lectures and informational conferences.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

STAT 298 Directed Study for Graduate Students 1 - 12 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: Zero hours of Independent study per week for 15 weeks. 1 to 12 hour of Independent study per week for 8 weeks. 1 to 16 hour of Independent study per week for 6 weeks.

Prerequisites: Consent of instructor.

Special tutorial or seminar on selected topics.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

STAT 299 Individual Study Leading to Higher Degrees 1 - 12 Units**Department:** Statistics**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Work hours to be arrange based on unit value.

Offered for 1-6 units during Summer Session.

Individual study.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

STAT 375 Professional Preparation: Teaching of Probability and Statistics 2 - 4 Units**Department:** Statistics**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 or 2 hours of lecture and 2 to 4 of laboratory per week.**Prerequisites:** Graduate standing and appointment as a graduate student instructor.

Discussion, problem review and development, guidance of laboratory classes, course development, supervised practice teaching.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Statistics 300.

STAT 601 Individual Study for Master's Candidates 1 - 8 Units**Department:** Statistics**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** By appointment.

Individual study in consultation with the graduate adviser, intended to provide an opportunity for qualified students to prepare themselves for the master's comprehensive examinations. Units may not be used to meet either unit or residence requirements for a master's degree.

Course may be repeated for a maximum of 16 units. Course may be repeated for a maximum of 16 units. Final exam not required.

STAT 602 Individual Study for Doctoral Candidates 1 - 8 Units**Department:** Statistics**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.

Hours and format: Zero hours of Independent study per week for 15 weeks. 1 to 8 hour of Independent study per week for 8 weeks. 1 to 10 hour of Independent study per week for 6 weeks.

Prerequisites: One year of full-time graduate study and permission of the graduate adviser.

Individual study in consultation with the graduate adviser, intended to provide an opportunity for qualified students to prepare themselves for certain examinations required of candidates for the Ph.D. degree.

Course may be repeated for a maximum of 16 units. Course may be repeated for a maximum of 16 units. Course does not satisfy unit or residence requirements for doctoral degree. Final exam not required.

Tagalog (TAGALG)

TAGALG 1A Introductory Tagalog 5 Units

Department: Tagalog

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 5 hours of Lecture and 1 to 2 hour of Discussion per week for 15 weeks. 12.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Prerequisites: 1A or equivalent or consent of instructor is a prerequisite for 1B.

A systematic introduction to the grammar, sentence patterns, and essential vocabulary of modern standard Tagalog. Emphasis is placed on extensive practice in idiomatic Tagalog conversation, with additional practice in reading and writing Tagalog.

Final exam required. Formerly known as Tagalog 1A.

TAGALG 1B Introductory Tagalog 5 Units

Department: Tagalog

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 5 hours of Lecture and 1 to 2 hour of Discussion per week for 15 weeks. 12.5 hours of Lecture and 2.5 hours of Discussion per week for 6 weeks.

Prerequisites: 1A or equivalent or consent of instructor.

A systematic introduction to the grammar, sentence patterns, and essential vocabulary of modern standard Tagalog. Emphasis is placed on extensive practice in idiomatic Tagalog conversation, with additional practice in reading and writing Tagalog.

Final exam required. Formerly known as Tagalog 1B.

TAGALG 15 Introductory Tagalog 10 Units

Department: Tagalog

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 20 hours of Lecture and 5 hours of Laboratory per week for 8 weeks.

A systematic introduction to the grammar, sentence patterns, and essential vocabulary of modern standard Tagalog. Emphasis is placed on extensive practice in idiomatic Tagalog conversation, with additional practice in reading and writing Tagalog. This course is equivalent to 1A-1B. It uses the same textbooks and the same syllabus.

Final exam not required. Instructor: Gosalvez

TAGALG 100A Intermediate Tagalog 5 Units

Department: Tagalog

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 5 hours of Lecture and 1 to 2 hour of Discussion per week for 15 weeks.

Prerequisites: 1A-1B, or consent of instructor; 100A or consent of instructor is a prerequisite for 100B.

The goal of this course is to enable students to increase their proficiency in Tagalog to at least the intermediate-high level of the national ACTFL Proficiency Guidelines. While speaking and listening comprehension will be stressed, training in reading and writing Tagalog will be an integral part of instruction. Films and video/audio materials will supplement written texts.

Final exam required. Formerly known as Tagalog 100A.

TAGALG 100B Intermediate Tagalog 5 Units

Department: Tagalog

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 5 hours of Lecture and 1 to 2 hour of Discussion per week for 15 weeks.

Prerequisites: 100A, or consent of instructor.

The goal of this course is to enable students to increase their proficiency in Tagalog to at least the intermediate-high level of the national ACTFL Proficiency Guidelines. While speaking and listening comprehension will be stressed, training in reading and writing Tagalog will be an integral part of instruction. Films and video/audio materials will supplement written texts.

Final exam required. Formerly known as Tagalog 100B.

Tamil (TAMIL)

TAMIL 1A Introductory Tamil 5 Units

Department: Tamil

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 5 hours of Lecture per week for 15 weeks.

The grammar of modern Tamil will be covered followed by readings in simple texts. Practice will also be given in spoken Tamil.

Final exam required. Instructor: K. Hart

TAMIL 1B Introductory Tamil 5 Units**Department:** Tamil**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 5 hours of Lecture per week for 15 weeks.

The grammar of modern Tamil will be covered followed by readings in simple texts. Practice will also be given in spoken Tamil.

Final exam required. Instructor: K. Hart

TAMIL 101A Readings in Tamil 4 Units**Department:** Tamil**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

Prerequisites: one-year of Tamil or consent of instructor.

These courses introduce students to a variety of literary styles. 101A will consist of weekly readings and discussions of short stories, poems, and dramatic sketches from representative authors. Short written assignments on themes suggested by the readings are required. Special attention is paid to matters of style and idiom. 101B is devoted to viewing films based on a variety of themes (social, village, mythological, classical Tamil) and to reading scripts and oral written exercises. Students will acquire language skills sufficient to approach literary texts on their own. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Instructor: K. Hart

TAMIL 101B Readings in Tamil 4 Units**Department:** Tamil**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

TAMIL 210A Seminar in Tamil Literature 4 Units**Department:** Tamil**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Seminar and 1 hour of Discussion per week for 15 weeks.

Prerequisites: 100B.

Readings in advanced Tamil. Texts to be determined by the needs of the student.

Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam not required. Instructor: G. Hart

TAMIL 210B Seminar in Tamil Literature 4 Units**Department:** Tamil**Course level:** Graduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Seminar and 1 hour of Discussion per week for 15 weeks.

Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam not required. Instructor: G. Hart

Telugu (TELUGU)

TELUGU 1A Elementary Telugu 4 Units**Department:** Telugu**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 4 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Prerequisites: 1A is prerequisite to 1B.

The focus of this course will be on systematic grammar, essential vocabulary, and conversations. The goal is to achieve basic reading, writing, and conversational competence as well as exposure to Telugu culture and traditions through language learning. Students will be able to read short stories by the end of this course with some facility.

Final exam required. Instructor: Sunkari

TELUGU 1B Elementary Telugu 4 Units**Department:** Telugu**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 4 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.**Prerequisites:** 1A is a prerequisite for 1B.

The focus of this course will be on systematic grammar, essential vocabulary, and conversations. The goal is to achieve basic reading, writing, and conversational competence as well as exposure to Telugu culture and traditions through language learning. Students will be able to read short stories by the end of this course with some facility.

Final exam required. Instructor: Sunkari

Thai (THAI)

THAI 1A Introduction to Thai 5 Units**Department:** Thai**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 15 weeks.

This course is designed for students who have little or no knowledge of the Thai language. The focus of Thai 1A is to build vocabulary and develop the ability to speak with correct pronunciation through basic conversation in day-to-day settings. Students will be introduced to the Thai alphabets and syllable construction rules. To prepare students for intensive literacy acquisition in the spring semester, students are expected to read and write simple words and short sentences by the end of the semester. The class will study common facts about Thailand, etiquette, customs, and values in contemporary Thai culture, through discussion, proverbs, and participation in cultural activities.

Final exam required.

THAI 1B Introduction to Thai 5 Units**Department:** Thai**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 15 weeks.

Prerequisites: Thai 1A, (Beginning Introductory Thai) or equivalent, by consent of instructor. Ability to speak some Thai and carry out basic conversation about oneself, family, food, and numbers. Knowledge of the alphabet, and ability to read and write simple words at rudimentary level. Continuing on from the fundamental knowledge of syllable construction learned in Thai 1A, this course is designed to rapidly elevate student's literacy, with the goal of completely abandoning transcription by mid-semester. By the end of the course, students should be reading and writing short descriptive and creative essays, equivalent to 2nd grade students in Thai school. Students continue to learn new vocabulary, grammar and practical thematic conversation with the opportunity to practice with native speakers. Students will also be introduced to Thai customs, culture and value, through a variety of media and cultural activities. Thai is used as the language of instruction up to 20% of the time.

Final exam required.

THAI 100A Intermediate Thai 5 Units**Department:** Thai**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 15 weeks.

Prerequisites: Thai 1B (Upper Introductory Thai) or equivalent, by consent of instructor. At least medium fluency in spoken and written Thai. Ability to conduct small talk with sufficient fluency. Ability to read and write equivalent to 2nd grade level in Thai school.

This course continues to integrate cultural awareness into language education. The emphasis shifts from the concrete to the abstract. Students will begin to read and write compound sentences, formal essays, and letters. Students will have the opportunity to practice conversation with native speakers. Students will also watch Thai films throughout the semester. Thai as the language of instruction will gradually increase from 20% up to 50%. By the end of the semester, students should have acquired a level of literacy equivalent to 4th grade in Thai schools. Final exam required.

THAI 100B Intermediate Thai 5 Units**Department:** Thai**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Lecture per week for 15 weeks.

Prerequisites: Thai 100A (Lower Intermediate Thai) or equivalent, by consent of instructor. Ability to read descriptive articles, and write short composition equivalent to 3rd - 4th grade students in Thai school. Capable of carrying informal conversation on a general subject with medium fluency.

A continuation of Intermediate Thai 100A. Students will learn to read longer and more abstract writing, advertisements from newspapers, and articles from magazines and webpage. The class will cover expressions, figures of speech, higher level grammar, and hierarchical pronouns. Writing will move from descriptive to expository. To increase verbal skills and cultural education, students will watch karaoke, TV advertisements, and films. Students will also have regular intensive conversation practice and in-class presentation. The language of instruction will be in Thai approximately 50% to 70% of the time. By the end of the semester, the average student should have acquired a level of literacy equivalent to 5th to 6th grade in Thai schools.

Final exam required.

THAI 101A Advanced Thai 3 Units**Department:** Thai**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Reading per week for 15 weeks.**Prerequisites:** 100A.

This third-year Thai course will focus on literature written between 1855 and 1955. Readings will be in Thai, with supporting essays in English, providing social/political context. Emphases on evolution of modern Thai society, overthrow of the absolute monarchy in 1932, development of literatures of social preservation and of social consciousness. Thai readings consist of short stories, novel excerpts, correspondence. Final exam required. Instructor: Kepner

THAI 101B Advanced Thai 3 Units**Department:** Thai**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Reading per week for 15 weeks.**Prerequisites:** 100A.

R1A satisfies the first half of the Reading and Composition requirement, and R1B satisfies the second half.

Satisfies the second half of the Reading and Composition requirement

Final exam not required. Formerly known as Dramatic Art R1B.

THEATER 10 Introduction to Acting 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of studio sessions per week plus preparation and rehearsals to be arranged.**Prerequisites:** Audition required.

This is a theory and performance course that provides an overview of the actor's creative process. Basic acting techniques are presented in conjunction with exercises, improvisation, and text work, designed to enhance concentration, imagination, vocal resonance, clarity of speech, self confidence, and communication skills.

Final exam not required. Formerly known as Dramatic Art 10.

THEATER N10 Introduction to Acting 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of studio sessions per week plus preparation and rehearsals to be arranged.

Instruction of elementary acting.

Final exam required. Formerly known as Dramatic Art N10.

THEATER 11 Scene Study and Characterization 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Studio per week for 15 weeks.**Prerequisites:** Audition required.

In this course the emphasis of the students' studies shifts from the development of basic skills to the development of skills necessary to the character actor. Students develop characterizations which lie outside their personal experience by performing characters who are not close to themselves in age or background. Students continue to employ the basic acting and vocal techniques introduced in 10.

Final exam not required. Formerly known as Dramatic Art 11.

THEATER N11 Scene Study and Character Development 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of studio sessions per week plus preparation and rehearsals to be arranged.

Instruction in study of scenes and character development in dramatic productions.

Final exam required. Formerly known as Dramatic Art N11. Instructor: Berman

THEATER 12 Speech and Vocal Communication Skills 2 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Studio per week for 15 weeks.**Prerequisites:** Consent of instructor.

The objective of this course is to foster the finest sound of spoken English through work on basic vocal relaxation techniques, breath, resonance, articulation, and projection practice. The International Phonetic Alphabet (IPA-narrow transcription) is used for purity and clarity of speech sounds. Also work on pitch, rate, quality, and inflection through a variety of material.

Final exam not required. Formerly known as Dramatic Art 12. Instructor: Sussel

THEATER N12 Speech and Vocal Communication Skills 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Session per week for 8 weeks. 7.5 hours of Session per week for 6 weeks.

The study of the principles of speech and voice production. The course will focus on the interpretation and communication of both dramatic and non-dramatic material.

Final exam required. Formerly known as Dramatic Art N12. Instructor: Sussel

THEATER 15 Improvisation for Performance 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Studio per week for 8 weeks.**Prerequisites:** 10 and 11 or equivalent, or consent of instructor.

This course will introduce students to the basic skills involved in creating characters, scenes, and stories for performance using only their bodies, voices, and imaginations. Attention will be paid to the challenges of creating and maintaining ensemble pieces as well as solo performances. Bridging the gap between these two modes of improvisation will be an overall focus on bringing students to a liberating yet critical appropriation of their own creativity. The course aims not only to prepare students for strictly improvisational theatre but also to free up a creative approach to the challenges of "conventional" theatre and performance.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Dramatic Art 15.

THEATER 24 Freshman Seminar 1 Unit**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of Seminar per week for 15 weeks.

The Berkeley Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Berkeley Seminars are offered in all campus departments, and topics vary from department to department and semester to semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Dramatic Art 24.

THEATER 25AC The Drama of American Cultures: An Introduction to Our Theater 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 5.5 hours of Lecture per week for 8 weeks. 7.5 hours of Lecture per week for 6 weeks.

This course provides an introduction to theater through the study of values and issues fundamental to cultural identity, the comparison of selected cultural groups and their relationship to American society as a whole, and the study of drama as an instrument for understanding and expressing cultural identity. Theater of specific cultural groups to be included will be determined by the availability of live theater productions offered on campus and in the Bay Area.

Satisfies the American Cultures requirement

Final exam required. Formerly known as Dramatic Art 25AC.

THEATER 26 Introduction to Performance Studies 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks.

This course introduces the critical terms and practices of the contemporary study of performance. Several key terms and important genres of artistic and social performance will be engaged; the course will draw critical and disciplinary methods from anthropology and ethnography, from the theory of dance and theater, from literary and cultural theory. Critical and theoretical concepts will be used to analyze a wide range of live and recorded performances, as well as performance texts.

Final exam required. Formerly known as Dramatic Art 26.

Course may be repeated for credit when topic changes. Final exam required. Formerly known as Dramatic Art 39H.

Course may be repeated for credit when topic changes. Final exam required. Formerly known as Dramatic Art 39X.

THEATER 39Y Freshman/Sophomore Seminar 1 - 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 to 3 hour of Seminar per week for 15 weeks.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required. Formerly known as Dramatic Art 39Y.

THEATER 39Z Freshman/Sophomore Seminar 1 - 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 to 3 hour of Seminar per week for 15 weeks.**Prerequisites:** Priority given to freshmen and sophomores.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Final exam required. Formerly known as Dramatic Art 39Z.

THEATER 40 Introduction to Modern Dance Technique 2 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Prerequisites:** Interested students must attend a placement class on the first day of class.

Introduction to modern dance from a Western concert dance perspective. Study of foundational concepts of movement such as: principles of alignment, locomotion, dance terminology, and musicality.

Course may be repeated for credit when topic changes. Showcase of student work at end of semester.

THEATER 52AC Reflections of Gender, Culture, and Ethnicity in American Dance 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week. 6 hours of lecture per week for 8 weeks.

Working with the premise that the context, content, and form of any dance event serve as a window on culture, we focus on dance associated with at least three of the following groups: African Americans, Asian Americans, indigenous peoples of the United States, Chicano/Latinos, and European Americans. We will look at traditional dance events as well as transcultural currents in American dance.

Satisfies the American Cultures requirement

Final exam required. Instructor: Johnson

THEATER 60 Introduction to Technical Theater and Production 3 - 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week.

A practical introduction to the terminology, theories, approaches, and techniques of technical theater and production. The course will cover theatrical terminology, stage equipment and architecture, production personnel and processes, and design departments, including scenery, properties, costumes, lighting, sound, and video. The course has a laboratory component. Based on student preference and availability, assignments for work on departmental productions will be made to one of two types of lab: department shops on a regular weekly schedule throughout the semester, or as run crew for a production fulfilling all required hours during a three week period including evening and weekend calls.

Final exam required. Formerly known as Dramatic Art 60.

THEATER 84 Sophomore Seminar 1 or 2 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of seminar per week per unit for 15 weeks. 1 and 1 half hours of seminar per week per unit for 10 weeks. 2 hours of seminar per week per unit for 8 weeks. 3 hours of seminar per week per unit for 5 weeks.**Prerequisites:** At discretion of instructor.

Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

THEATER 98 Directed Group Study 0.5 - 5 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Hours to be arranged.

Group study of a topic not included in the regular department curriculum.

Topics may be initiated by students.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required. Formerly known as Dramatic Art 98.

THEATER 99 Independent Study 1 - 5 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Hours to be arranged.**Prerequisites:** Open to sophomore students with an overall grade point average of 3.3.

Study of a topic not included in the regular department curriculum.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required. Formerly known as Dramatic Art 99.

THEATER C107/SCANDIN C107 Plays of Ibsen 4 Units**Department:** Theater, Dance, and Performance Studies; Scandinavian**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/discussion per week.

Reading and discussion of Ibsen's major plays. Readings and discussion in English.

Final exam required. Instructor: Sandberg

THEATER C108/SCANDIN C108 Strindberg 4 Units**Department:** Theater, Dance, and Performance Studies; Scandinavian**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Reading and discussion of Strindberg's major works; emphasis on his dramas and their significance. Readings and discussion in English.

Final exam required.

THEATER 110A Intermediate Acting 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 6 hours of Studio per week for 15 weeks.**Prerequisites:** Audition, one year of undergraduate work in acting, or consent of instructor.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Dramatic Art 110A.

THEATER 110B Intermediate Acting 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 6 hours of studio sessions per week plus preparation and rehearsals to be arranged.**Prerequisites:** Audition, one year of undergraduate work in acting, or consent of instructor.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Dramatic Art 110B.

THEATER 111 Advanced Acting 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of sessions per week plus preparation and rehearsal time.**Prerequisites:** Audition, two years of undergraduate work in acting or consent of instructor.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Dramatic Art 111.

THEATER 112 Regional Dialects of Great Britain 1 Unit**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of lecture per week for 4 weeks.

The process by which the actor arrives at a particular way of speaking a dialect. We will explore Standard British (received pronunciation), Cockney, and other regional dialects. In addition, the foundation of the International Phonetic Alphabet will be introduced. We will make use of the class location to specifically enhance learning by making observations of the many dialects heard throughout London and by using the speech in the plays as source material.

Final exam not required. Formerly known as Dramatic Art 112. Instructor: Sussel

THEATER 113A International Performance and Literature: Irish Theater: Origins and the Contemporary Scene 6 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 20 hours of lecture per week for 5 weeks. 1 week in Berkeley and 4 weeks abroad.

This course will explore what is involved in the performer's art through class participation, writing, discussion, and final exam. It includes lectures on classical and contemporary theater, acting training, literature study, and attendance at many professional theater performances. Enrollment is open to all applicants without audition, and the performance aspects of the class will be responsive to the skill level of the students who enroll. Course may be repeated for credit if taken in a different country or with a different instructor. Course may be repeated for credit when topic changes. Final exam required. Instructors: Dolas, McIvor

THEATER 114 Performance Workshop 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of session per week.**Prerequisites:** Two years of undergraduate work in acting or dance or consent of instructor.

Workshop involving advanced actors, dancers, and spoken-word performers in collaborative development of new performance; topics include cross-disciplinary arts, solo performance, language, and movement.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

THEATER 115 Advanced Acting: Company Class 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of sessions per week plus preparation and rehearsals.**Prerequisites:** 110A-110B or 111 or consent of instructor.

Intensive group study, rehearsal, and performance of a play or selected dramatic pieces.

Final exam required. Formerly known as Dramatic Art 115.

THEATER 119 Performance Theory 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

An examination of a theoretical topic or perspective on performance, with specific attention to the interface between theoretical endeavor and dramatic, nondramatic, and nontheatrical modes of performance; may involve visiting artists. Topics vary from semester to semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Dramatic Art 119.

THEATER 121 Performance and Culture 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

An examination of performance as an aspect of cultural production, ranging from everyday-life enactment to more formal or aesthetic activities associated with "artistic" production; may involve visiting artists. Specific attention to the methods of ethnography, cultural studies, and intercultural performance analysis. Topics vary from semester to semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Dramatic Art 121.

THEATER 122 African Theater and Performance 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

African performance includes a wide range of vibrant forms: from scripted drama, theatre, dance, and music to oral traditions, storytelling, masquerading, and ritual. Using source materials that are neither "traditional" nor "modern," "African" nor "European," but a complex amalgamation of influences, African performances defy these limited but nevertheless tenacious dichotomies. In the performing arts, one sees the resilience and tenacity of African cultural forms as repositories of memory, sites of intercultural negotiation, and potent forums for political resistance.

Final exam required. Instructor: Cole

THEATER 125 Performance and History 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

An examination of the historical conditions of performance, either given in a historical period or comparatively, with specific attention to the relationship between methods of historical studies and performance; may involve visiting artists. Topics vary from semester to semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Dramatic Art 125.

THEATER 126 Performance Literatures 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

An examination of the formal, ideological, and cultural dynamics of drama, with specific attention to the relationship between methods of literary studies and performance; may involve visiting artists. Topics vary from semester to semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Dramatic Art 126.

THEATER C131B/AFRICAM C151B Contemporary African American Drama 4 Units

Department: Theater, Dance, and Performance Studies; African American Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 4 hours of Lecture per week for 15 weeks.

Prerequisites: 151A or consent of instructor.

Survey of contemporary plays by African American writers and the portrayal of the black experience in American theatre. Emphasis on predominant themes, structural tendencies, socio-historical context. Final exam required.

THEATER 139A Fundamentals of Playwriting 3 Units

Department: Theater, Dance, and Performance St

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Prerequisites: To be considered for the course, submit a sample of creative writing (up to five pages) to the instructor by August 15 for Fall or Dec 15 for Spring (mailbox located in 101 Dwinelle Annex). Include your name, year, major, phone number, and email address.

A practical course for beginning playwrights. Through lecture, exercises, in class readings and group discussion, the class will explore the practical craft elements of playwriting along with the function of personal voice in one's work. Students will write one short and one longer form play during the semester.

Showcase of student work at end of semester.

THEATER 139B Playwriting 3 Units

Department: Theater, Dance, and Performance St

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Prerequisites: To be considered for the course, submit a sample of creative writing (up to five pages) to the instructor by August 15 for Fall or Dec 15 for Spring (mailbox located in 101 Dwinelle Annex). Include your name, year, major, phone number, and email address.

This course will focus on the writing of a full-length theatrical work. A more critical analysis of the playwriting process with particular emphasis on how a playwright's aesthetic and intellectual point of view inform the work. Instructor approval is a requirement for the course.

Showcase of student work at the end of the semester.

THEATER 141 Intermediate Modern Dance Technique 2 Units

Department: Theater, Dance, and Performance St

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Prerequisites: Interested students must attend audition on first day of class.

Development of body articulation and control utilizing modern dance concepts of time, space, and dynamics.

Course may be repeated for credit when topic changes. Showcase of student work at end of semester.

THEATER N141 Intermediate Modern Dance 3 Units

Department: Theater, Dance, and Performance St

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 7.5 hours of Session per week for 8 weeks. 10 hours of Session per week for 6 weeks.

Modern dance technique. The class will concentrate on physical coordination, rhythmic and spatial exploration.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Dramatic Art N141.

THEATER 142 Advanced Modern Dance Technique 2 Units

Department: Theater, Dance, and Performance St

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 6 hours of studio per week.

Prerequisites: Interested students must attend audition on the first day of class.

Refinement of movement techniques as well as qualitative analysis and demonstration of movement with regard to rhythm, dynamics, and style.

Course may be repeated for credit when topic changes. Showcase of student work at end of semester.

THEATER N142 Advanced Modern Dance Technique 3 Units

Department: Theater, Dance, and Performance St

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 7.5 hours of Studio per week for 8 weeks.

Prerequisites: Intermediate-level modern dance technique or consent of instructor.

Refinement of movement techniques and qualitative analysis of movement with regard to rhythm, dynamics, and style.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Dramatic Art N142.

THEATER 143 Practicum for Advanced Modern Dancers 2 Units

Department: Theater, Dance, and Performance St

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 7 hours of studio per week.

Prerequisites: Interested students must attend audition on the first day of class.

Practical application of previously studied theory and techniques of modern dance with an emphasis on development of individual movement style.

Course may be repeated for credit when topic changes. Showcase of student work at end of semester.

THEATER 144 Sources of Movement 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4.5 hours of lecture/studio per week.**Prerequisites:** 40A-40B, or consent of instructor.

Beginning application of dance technique as a means of communication in the theatre. Use of basic technical fundamentals as a means of extending natural movement in rhythm, energy, and space with emphasis on style and qualitative analysis.

Final exam not required. Formerly known as Dramatic Art 144.

THEATER 145 Music Resources for Performance 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture/studio per week.**Prerequisites:** 144 or consent of instructor.

This course is an introduction to the sonic poetry of gesture. Studying historical Eurocentric precedents and current trends in theatrical/dance music, we will examine the work of composers for early royal theater like Rameau; move to the program of music of composers like Tchaikovsky; look at pre-electronic composers like Varese, Berio, and Stockhausen; shift into the avant-garde with Cage; and study contemporary composers like Anderson. Discussions will be based on lectures and readings. An important aspect of this course is the practical experience and analysis of sonic experimentation in performance.

Final exam required. Formerly known as Dramatic Art 145.

THEATER 146A Choreography: Solo and Duet Forms 1 - 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Studio per week for 15 weeks.**Prerequisites:** 114 or 144, prior or concurrently.

Analysis of theories of form and structure and their practical application in relation to content.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

THEATER 146B Choreography: Group Forms 1 - 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 5 hours of Studio per week for 15 weeks.**Prerequisites:** 114 or 144, prior or concurrently.

Analysis of theories of form and structure and their practical application in relation to content.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

THEATER 147A Beginning Ballet Technique 2 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of studio per week. 10 hours of studio per week for 8 weeks.**Prerequisites:** Interested students must attend audition on first day of class.

This course is designed for contemporary/modern dancers interested in learning ballet vocabulary, technique, and alignment principles in order to support their contemporary/modern training. The course is intended to be taken in conjunction with one of the modern/contemporary dance technique courses offered by TDPS (40, 141, or 142). Beginning level. Audition first day of class.

Course may be repeated for credit when topic changes. Showcase of student work at end of semester.

THEATER 147B Intermediate Ballet Technique 2 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of studio per week. 10 hours of studio per week for 8 weeks.**Prerequisites:** Interested students must attend audition on first day of class.

This course is designed for contemporary/modern dancers interested in expanding their ballet vocabulary, improving ballet technique, and learning new approaches to taking ballet class. The course is intended to be taken in conjunction with one of the modern/contemporary dance technique courses offered by TDPS (40, 141, or 142) and requires that students have intermediate (or above) proficiency with ballet technique. Audition first day of class.

Course may be repeated for credit when topic changes. Showcase of student work at end of semester.

THEATER 151A Theater History 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

A chronological survey of world theater to 1800, this course begins with an investigation of "performance behavior"--the human impulse to organize complex games, rituals, and other display activities. It explores the mythological and historical origins of theater in various cultures as well as the derivation of the first dramatic scripts. A heavy emphasis is placed on the analysis of the "promptbooks" and visual sources of early European and Asian theaters for a practical understanding of their scenic and acting styles.

Final exam required. Formerly known as Dramatic Art 151A.

THEATER 151B Theater History 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

A chronological survey of Western theater from 1800 to the present, this course begins with the dismantling of Neoclassical thought in the European theater and the rise of avant-garde and popular forms. Rapidly changing social conditions, cultural tastes, and technological advances in the 19th and 20th centuries are studied in tandem with the development of theatrical productions and movements, playmaking, and acting styles. Final exam required. Formerly known as Dramatic Art 151B.

THEATER 153B Changing Forms in 20th-Century Dance 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

A chronological study of a large selection of works by 20th-century ballet, modern, and postmodern choreographers. We emphasize how dance reflects and affects political climate, social values, religious beliefs, and cultural constructions of gender by examining a variety of dance themes, movement vocabularies, and styles.

Final exam required. Formerly known as Dramatic Art 153B. Instructor: Johnson

THEATER 162 Fundamentals of Stage Directing 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of lecture/discussion per week plus preparation and rehearsals to be arranged.**Prerequisites:** 10 or 120; Junior standing and consent of instructor.

Beginning study of principles of stage composition, blocking, and analysis of dramatic texts for the director.

Final exam not required. Formerly known as Dramatic Art 162.

THEATER 163 Stage Directing 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of lecture/discussion per week.**Prerequisites:** 162 or consent of instructor.

Study of principles and practice of stage directing.

Final exam not required. Formerly known as Dramatic Art 163.

THEATER 166 Special Topics: Theater Arts 1 - 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Number of units will vary depending on specific course format and requirements. 1 hour of lecture or 3 hours of laboratory per week per unit.**Prerequisites:** Consent of instructor.

Topics vary from semester to semester and have included The Power of Music and Poetry in the Theater; Modern Drama and Theater, 1940 to the Present; Theaters, Tricksters, and Cultural Exchange; Art as Social Action; and The Invisible World (Process Seminar).

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Dramatic Art 166.

THEATER 167 Technical Theater: Performance Practice 1 - 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of laboratory per unit per week. Hours to be arranged.**Prerequisites:** 60 or consent of instructor.

Participation in technical theater practice associated with department theater and dance productions to include technical run crew for live performance in one of: lighting, sound, video, properties, costumes, make-up, scenery, deck, and rail.

Course may be repeated in another field at the beginning level. Course may be repeated for credit when topic changes. Final exam required.

Instructor: Mattson

THEATER 168 Technical Theater: Shop Practice 1 - 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of laboratory per unit per week. Hours to be arranged.**Prerequisites:** 60, or consent of instructor.

Participation in technical theater practice associated with department theater and dance productions to include workshop activities (fabrication, treatment, and installation) in one or more of: costumes, hair, make-up, scenery, properties, lighting, video, and sound for live performance.

Course may be repeated in another field at the beginning level. Course may be repeated for credit when topic changes. Final exam required.

Instructor: Mattson

THEATER 169 Advanced Technical Theater Practice 1 - 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of laboratory per unit per week. Hours to be arranged.

Prerequisites: 60, 167, 168, 176, and 179 or consent of instructor. Participation in advanced technical theater practice associated with department theater and dance productions to include lead, head, or coordinator position with technical run crew for live performance in one of: lighting, sound, video, properties, costumes, make-up, scenery, deck, rail, or advanced application of workshop activities (fabrication, treatment, and installation) in one or more of: costumes, hair, make-up, scenery, properties, lighting, video, and sound for live performance. Intended for a student who has completed introductory level application of theater practice and is training in advanced techniques and applications and/or assuming additional responsibilities in relation to production. Course may be repeated in another field or to fulfill additional advanced opportunities in the same design field. Course may be repeated for credit when topic changes. Final exam required. Instructor: Mattson

THEATER 170 Theatre Laboratory 1 - 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Hours to be arranged.**Prerequisites:** Consent of instructor.

Non-performing participation in the University Theatre to include: Stage managements; crew assistance in lighting, sound, properties, costumes, make-up, backstage; technical assistance in scene or costume shop. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Dramatic Art 170.

THEATER 171 Theatre Performance 1 - 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 hours of studio per week per unit.**Prerequisites:** Consent of instructor.

Practice in acting and/or dance in Dramatic Art productions. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Dramatic Art 171.

THEATER 172 Advanced Production Study 2 - 6 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 to 9 hours of Laboratory per week for 15 weeks.

Study of production techniques and procedures related to production management, stage management, and theater administration. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Dramatic Art 172. Instructor: Mattson

THEATER 173A Scenography: Scenic Design for the Theatre 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** 173A is the prerequisite to 173B.

Final exam required. Formerly known as Dramatic Art 173A.

THEATER 173B Scenography: Scenic Design for the Theatre 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** 173A is the prerequisite to 173B.

Final exam required. Formerly known as Dramatic Art 173B.

THEATER 174A Scenography: Costume Design for the Theatre 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** Consent of instructor.

Final exam required. Formerly known as Dramatic Art 174A.

THEATER 174B Scenography: Costume Design for the Theatre 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.**Prerequisites:** Consent of instructor.

Final exam required. Formerly known as Dramatic Art 174B.

THEATER 175A Scenography: Lighting Design for the Theatre 4 Units

Department: Theater, Dance, and Performance St

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of lecture per week and laboratory to be arranged.

Prerequisites: Consent of instructor; restricted enrollment of 18.

An introduction to theatrical lighting, including practical application through Dramatic Art productions.

Final exam required. Formerly known as Dramatic Art 175A.

THEATER 175B Scenography: Lighting Design for the Theatre 4 Units

Department: Theater, Dance, and Performance St

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 3 hours of lecture per week and laboratory to be arranged. 3 hours of lecture per week and laboratory to be arranged.

Prerequisites: Consent of instructor; restricted to enrollment of 18.

An introduction to theatrical lighting, including practical application through Dramatic Art productions.

Final exam required. Formerly known as Dramatic Art 175B.

THEATER 176 Applied Theatrical Design 1 - 4 Units

Department: Theater, Dance, and Performance St

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of studio per week per unit.

Prerequisites: One semester of theatrical design (173, 174, 175) or equivalent and at least 75 production hours of experience.

Students of set, costume, and lighting design are provided experience, structure, and support in the practical application of design to the stage in departmental productions. Interaction and team approach of the designers will be promoted from the earliest stages of conceptualization through the opening night and the run of the production(s).

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Dramatic Art 176.

THEATER 177 Sound Design and Media Theater 4 Units

Department: Theater, Dance, and Performance St

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks.

In this course, undergraduate students will learn to construct sound cues and soundtracks for theater performances and videos using industry standard software, and will learn fundamental principles of incorporating video and sound into stage productions. Students will be exposed to the writings and works of prominent sound theorists, designers, and engineers and multimedia performance artists. The most successful students may be invited to participate in UC Berkeley theater productions as sound designers.

Final exam required. Instructor: De Kosnik

THEATER 178 Video Production for Performance 3 Units

Department: Theater, Dance, and Performance St

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 6 hours of lecture per week. 12 hours of lecture per week for 8 weeks.

Video Production for Performance is a workshop class in which students will explore a broad range of video applications to performance. Through a series of exercise video shoots students learn the fundamentals of video production, including basic optics, camera angles and movement, sound recording, and editing. With an additional emphasis on concept and planning, students prepare for and execute a sustained video project—a detailed documentation of a staged performance, the development of a video component for a production, a documentary study of aspects of performance, or the generation of a freestanding video program. There is a lab fee of \$60 for use of equipment and editing lab. There will be a final project.

THEATER 179 Supervised Theatrical Design 1 - 4 Units

Department: Theater, Dance, and Performance St

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of studio per week per unit.

Prerequisites: 173A or 173B, 174A or 174B, 175A or 175B, or consent of instructor.

Students are trained in the working methods of set or costume design; supervised preparation and implementation of designs in the department's production season, from initial discussions through opening night. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Dramatic Art 179.

THEATER 180 Theatrical Realization of Dance 1 - 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of studio per week per unit.**Prerequisites:** Audition or consent of instructor.

This course relates choreography to theatrical presentation. Laboratory hours are spent in attendance at rehearsal, coaching sessions, and the performance of the dance concert. The course is taught by faculty choreographing the major dance production in the departmental season. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Dramatic Art 180.

THEATER 181 Theatrical Realization of Dramatic Texts 1 - 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of studio per week per unit.**Prerequisites:** Audition or consent of instructor.

This course relates dramatic texts or choreography to theatrical presentation. The lectures are based on the analysis of the work being presented. Laboratory hours are spent in attendance at rehearsal, coaching sessions, and the performance of the play or concert. The course will be taught by faculty involved in the major productions. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Dramatic Art 181.

THEATER 182 Summer Theatre Laboratory and Performance 1 - 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 to 6 hours of lecture per week for 8 weeks, plus laboratory to be arranged based on number of units taken. 3 to 10 hours of lecture per week for 6 weeks, plus laboratory to be arranged based on number of units taken.

Supervised instruction and labs to be arranged, variable 1-3 units. Supervised participation in summer stock season in one or more of the following capacities: acting, dancing, design, directing, choreography, stage management, backstage/scene shop and costume shop work, crew assistance in lighting, sound, properties, costumes, or make-up. Students should enroll in course in accordance with Summer Session deadlines, all casting and technical assignments will be arranged on the first day of class. Students interested in acting should contact the department for audition information.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Dramatic Art 182. Instructor: Berman

THEATER C183A/AFRICAM C143A Performance: An African American Perspective 3 Units**Department:** Theater, Dance, and Performance Studies; African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1A or consent of instructor.

Introduction to the Research-to Performance Method, African American aesthetics and dramatic performance techniques. Course will survey wide range of writings on performance and investigate applications through exercises and improvisations. Students will also assist in information gathering for works in progress. Final exam required.

THEATER C183B/AFRICAM C143B Research-to-Performance Laboratory 3 Units**Department:** Theater, Dance, and Performance Studies; African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 143A or consent of instructor.

Development of scholarly material for theatrical presentation and enhancement of dramatic performance techniques through discussions, improvisations and readings of work conceived by the class and/or writers in other African American Studies courses. All source material will be based on the research of scholars in the field of African American Studies. Final exam required.

THEATER C183C/AFRICAM C143C Black Theatre Workshop 3 Units**Department:** Theater, Dance, and Performance Studies; African American Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 143A or equivalent or consent of instructor.

Study and production of a play by an African American writer. The play will be studied within its social and historical context. Students will be introduced to the various aspects of theatre production. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

THEATER H195A Honors Course 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Hours to be arranged.

Prerequisites: Honors status in the Department of Theater, Dance, and Performance Studies. Theater production projects also require 60 and 162; dance production projects also require 60 and 146B.

Independent study and conferences with faculty sponsor leading to preparation of a major research paper on a single aspect of theater, dance, or performance studies. May include a performance component. Final exam not required. Formerly known as Dramatic Art H195A.

THEATER H195B Honors Course 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Hours to be arranged.**Prerequisites:** Honors status in the Department of Dramatic Art; successful completion of H195A and consent of production chair if performance is involved.

Development of subject studied in H195A, either as a bachelor's thesis or a laboratory project in acting, directing, playwriting, design, or dance.

Final exam not required. Formerly known as Dramatic Art H195B.

THEATER 196 University Theatre Workshop 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 12 hours of Studio per week for 15 weeks.**Prerequisites:** Department approval; theater projects also require 60 and 162; dance projects also require 60 and 146B.

Individual directorial projects for advanced undergraduates. Research, tryout, callbacks, and rehearsals which result in performing for the public will average 20 hours per week.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Dramatic Art 196.

THEATER 197 Field Studies in Technical Theatre 1 - 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Hours to be arranged.**Prerequisites:** Consent of Instructor.

Supervised experience, in connection with theatrical production in field of: scenic construction; costume construction and conservation; theatrical lighting; stage management; publicity; theatre management; production management.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required. Formerly known as Dramatic Art 197.

THEATER 198 Directed Group Study for Undergraduates 0.5 - 5 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** to 5 hours of Directed group study per week for 15 weeks.

Supervised group study of special topics, subject to approval by the chair. Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required. Formerly known as Dramatic Art 198.

THEATER 199 Supervised Independent Study and Research 1 - 3 Units**Department:** Theater, Dance, and Performance St**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Individual study.**Prerequisites:** Eight or more units in the Department of Dramatic Art, with an average grade of B. Restricted to honor students.

Reading and conference with an instructor in an area not corresponding with any regular course.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required.

Formerly known as Dramatic Art 199.

THEATER 200 Graduate Colloquium on Interdisciplinary Research in Performance 1 or 2 Units**Department:** Theater, Dance, and Performance St**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Colloquium per week for 15 weeks.

This course is designed to introduce graduate students to the research resources of the University, to the research interests and methodologies of the faculty affiliated with the Ph.D. program, to theater as a profession, and to trends and developments in theater studies. Students will work collaboratively on research projects.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Graduate students in dramatic art are required to take this course at least three times, the first time for 2 units and thereafter for 1 unit. Final exam not required. Formerly known as Dramatic Art 200.

THEATER 200A Introductory Colloquium on Interdisciplinary Research in Performance 2 Units**Department:** Theater, Dance, and Performance St**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Colloquium per week for 15 weeks.

This course is designed to introduce graduate students to the research resources of the University, to the methodologies and research interests of the faculty affiliated with the Ph.D. program, to the demands of a professional academic career, and to trends and developments in theater, dance, and performance studies.

Final exam not required.

THEATER 200B Research Colloquium 2 Units**Department:** Theater, Dance, and Performance St**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Colloquium per week for 15 weeks.

This course is designed to provide an opportunity for graduate students to work with one another to advance their individual research projects and present their ongoing work.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

THEATER 201 Performance Theory 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This core seminar for graduate students focuses on key issues in the theory of performance, with an emphasis on contemporary theoretical inquiry. Topics can include issues of representation and identity, presence, community, social efficacy, space, corporeality, audience, and transnational flows.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Dramatic Art 201.

THEATER 202 Methodologies in Performance Studies 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

The study of different approaches and contemporary methodologies for analyzing performances of various kinds within their cultural and historical context. Specific methodologies can include archival research, field methods, etc. The specific focus in any one course is contingent upon the focus of the instructor.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Dramatic Art 202.

THEATER 203 Performance Practicum: Lab Run 2 - 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1.5 to 3 hours of Seminar per week for 15 weeks.

This course is constructed around the making of performance, culminating in Lab Run, an event created, directed, and/or performed by graduate students. Lab Run will receive public performances near the end of the semester. The course is also conceived as a forum for exploring the relationship between live performance and the critical discourses of performance studies.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Dramatic Art 203.

THEATER 266 Special Topics: Theater Arts 1 - 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Number of units will vary depending on specific course format and requirements. 1 hour of lecture or 3 hours of laboratory per week per unit.

Topics vary from semester to semester and have included The Power of Music and Poetry in the Theater; Modern Drama and Theater, 1940 to the Present; Theaters, Tricksters, and Cultural Exchange; Art as Social Action; and The Invisible World (Process Seminar).

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Dramatic Art 266.

THEATER 277 Special Studies in Directing 1 - 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of studio per week per unit.**Prerequisites:** Advancement to candidacy for the Ph.D. and consent of instructor.

Advanced practice in play direction.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Dramatic Art 277.

THEATER 294 Directed Research 1 - 12 Units**Department:** Theater, Dance, and Performance St**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Zero hours of Independent study per week for 15 weeks.**Prerequisites:** Graduate standing in Dramatic Art and consent of instructor.

Meetings to be arranged, either individually or as a group to explore fields not covered in courses listed elsewhere in Dramatic Art's offerings. May be taken by students engaged in writing dissertations.

A maximum of 12 units may be divided among several instructors during a semester. Final exam not required. Formerly known as Dramatic Art 294.

THEATER 299 Special Study 1 - 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 unit of credit for every 3 hours of independent study.**Prerequisites:** Graduate standing.

May be taken when preparing prospectus, graduate portfolio, and/or oral presentation before qualifying oral examination. May not be substituted for available seminars.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Dramatic Art 299.

THEATER 300 Professional Preparation: Supervised Teaching in Dramatic Art 2 - 4 Units**Department:** Theater, Dance, and Performance St**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Hours to be arranged.**Prerequisites:** Graduate standing, appointment as a teaching assistant or associate, or consent of instructor.

Discussion, problem review and development, course development, supervised practice of teaching.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as Dramatic Art 300.

THEATER 602 Individual Study for Doctoral Students 1 - 12 Units**Department:** Theater, Dance, and Performance St**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Hours to be arranged. Hours to be arranged.

Individual study in consultation with the major field adviser, intended to provide an opportunity for qualified students to prepare themselves for the various examinations required of candidates for the Ph.D.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Course does not satisfy unit or residence requirements for doctoral degree. Final exam not required. Formerly known as Dramatic Art 602.

Tibetan (TIBETAN)

TIBETAN 1A Elementary Tibetan 5 Units**Department:** Tibetan**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 5 hours of lecture and additional time in the language laboratory per week.**Prerequisites:** 1A is prerequisite to 1B.

A beginning Tibetan class developing listening, speaking, reading, and writing skills in modern Tibetan (Lhasa dialect).

Final exam not required.

TIBETAN 1B Elementary Tibetan 5 Units**Department:** Tibetan**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 5 hours of lecture and additional time in the language laboratory per week.**Prerequisites:** 1A.

A beginning Tibetan class developing listening, speaking, reading, and writing skills in modern Tibetan (Lhasa dialect).

Final exam not required.

TIBETAN 10A Intermediate Tibetan 3 Units**Department:** Tibetan**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1B; 10A is prerequisite to 10B.

This course, a continuation of 1A-1B (elementary Tibetan), is designed to further develop the student's skills in modern standard Tibetan. The emphasis is on communication skills in vernacular Tibetan, as well as grammar, reading, and writing.

Final exam required. Formerly known as 100A-100B.

TIBETAN 10B Intermediate Tibetan 3 Units**Department:** Tibetan**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 10A.

This course, a continuation of 1A-1B (elementary Tibetan), is designed to further develop the student's skills in modern standard Tibetan. The emphasis is on communication skills in vernacular Tibetan, as well as grammar, reading, and writing.

Final exam required. Formerly known as 100A-100B..

TIBETAN 24 Freshman Seminar 1 Unit**Department:** Tibetan**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of seminar per week for 15 weeks. 1.5 hours of seminar per week for 10 weeks. 2 hours of seminar per week for 8 weeks. 3 hours of seminar per week for 6 weeks. 3 hours of seminar per week for 5 weeks.

The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and topics vary from department to department and semester to semester. Enrollment limited to fifteen freshmen.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

TIBETAN 84 Sophomore Seminar 1 Unit**Department:** Tibetan**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of seminar per week for 15 weeks. 1 and 1 half hours of seminar per week for 10 weeks. 2 hours of seminar per week for 8 weeks. 3 hours of seminar per week for 6 weeks. 3 hours of seminar per week for 5 weeks.

Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

TIBETAN 100S Advanced Tibetan Conversation 1 Unit**Department:** Tibetan**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 10B or equivalent, or consent of instructor.

This course is designed for advanced students of Tibetan language. Its goal is to provide an opportunity for students to further develop their colloquial Tibetan conversation skills. More sophisticated linguistic forms are used and reinforced while dealing with various socio-cultural topics, with a particular focus on Buddhist-related subjects toward the end of the term. Primary emphasis will be on the Lhasa dialect of Tibetan, though some variant dialects may also be introduced.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

TIBETAN 110A Intensive Readings in Tibetan 4 Units**Department:** Tibetan**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 1B or consent of instructor.

This course is an intensive introduction to reading classical Tibetan literature. Following an introduction to basic grammar, the course moves quickly into selected readings from Buddhist texts in Tibetan. It typically builds on basic skills acquired in 1A-1B (elementary Tibetan), though with consent it may be taken independently.

Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam required.

TIBETAN 110B Intensive Readings in Tibetan 4 Units**Department:** Tibetan**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course is an intensive introduction to reading classical Tibetan literature. Following an introduction to basic grammar, the course moves quickly into selected readings from Buddhist texts in Tibetan. It typically builds on basic skills acquired in 1A-1B (elementary Tibetan), though with consent it may be taken independently.

Final exam required.

TIBETAN C114/BUDDSTD C114/S ASIAN C114 Tibetan Buddhism 4 Units**Department:** Tibetan; Group in Buddhist Studies; South Asian**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course is a broad introduction to the history, doctrine, and culture of the Buddhism of Tibet. We will begin with the introduction of Buddhism to Tibet in the eighth century and move on to the evolution of the major schools of Tibetan Buddhism, Tibetan Buddhist literature, ritual and monastic practice, the place of Buddhism in Tibetan political history, and the contemporary situation of Tibetan Buddhism both inside and outside of Tibet.

Final exam required. Formerly known as Buddhism 114.

TIBETAN 115 Contemporary Tibet 4 Units**Department:** Tibetan**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

This course seeks to develop a critical understanding of contemporary Tibet, characterized as it is by modernity, invasion, Maoism, liberalization, exile, and diaspora. It explores the cultural dynamism of the Tibetans over the last 100 years as expressed in literature, film, music, modern art, and political protest. The core topics include intra-Tibetan arguments regarding the preservation and "modernization" of traditional cultural forms, the development of new aesthetic creations and values, the constraints and opportunities on cultural life under colonialism and in the diaspora, and the religious nationalism of the recent political protests.

Take-Home Final Exam

TIBETAN C154/BUDDSTD C154/S ASIAN C154 Death, Dreams, and Visions in Tibetan Buddhism 4 Units**Department:** Tibetan; Group in Buddhist Studies; South Asian**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Tibetan Buddhists view the moment of death as a rare opportunity for transformation. This course examines how Tibetans have used death and dying in the path to enlightenment. Readings will address how Tibetan funerary rituals work to assist the dying toward this end, and how Buddhist practitioners prepare for this crucial moment through tantric meditation, imaginative rehearsals, and explorations of the dream state.

Final exam required. Instructor: Dalton

TIBETAN C214/BUDDSTD C214/S ASIAN C214 Seminar in Tibetan Buddhism 2 or 4 Units**Department:** Tibetan; Group in Buddhist Studies; South Asian**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.

This course provides a place for graduate-level seminars in Tibetan Buddhism that rely primarily on secondary sources and Tibetan texts in translation. Content will vary between semesters but will typically focus on a particular theme. Themes will be chosen according to student interests, with an eye toward introducing students to the breadth of available western scholarship on Tibet, from classics in the field to the latest publications.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Dalton

TIBETAN C224/BUDDSTD C224/S ASIAN C224 Readings in Tibetan Buddhist Texts 2 or 4 Units**Department:** Tibetan; Group in Buddhist Studies; South Asian**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

This graduate seminar provides an introduction to a broad range of Tibetan Buddhist texts as well as to the methods and resources for their study. Readings for the course will be drawn from a variety of genres and historical periods, including (1) chronicles and histories, (2) biographical literature, (3) doctrinal treatises, (4) canonical texts, (5) ritual manuals, (6) pilgrimage guides, and (7) liturgical texts. The seminar is designed to be of interest to graduate students interested in premodern Tibet from any perspective (literature, religion, art, history, philosophy, law, etc.). Students are required to do all of the readings in the original classical Tibetan. The course will also introduce students to "tools and methods" for the study of Tibetan Buddhist literature, including standard lexical and bibliographic references, digital resources, and secondary literature in modern languages. The content of the course will vary from semester to semester to account for the needs and interests of particular students. Final exam not required. Instructor: Dalton

TIBETAN 298 Directed Study for Graduate Students 1 - 8 Units**Department:** Tibetan**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Hours to be arranged.

Special tutorial or seminar on selected topics not covered by available courses or seminars.

Final exam not required.

TIBETAN 299 Thesis Preparation and Related Research 1 - 8 Units**Department:** Tibetan**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Hours to be arranged.**Prerequisites:** Consent of thesis supervisor and graduate adviser.

Final exam not required.

TIBETAN 601 Individual Study for Master's Students 1 - 8 Units**Department:** Tibetan**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.

Hours and format: Zero hours of Independent study per week for 15 weeks. 1.5 to 15 hours of Independent study per week for 8 weeks. 2.5 to 20 hours of Independent study per week for 6 weeks.

Prerequisites: Consent of graduate adviser.

Individual study with the comprehensive or language requirements in consultation with the graduate adviser. Units may not be used to meet either unit or residence requirements for a master's degree.

Final exam not required.

TIBETAN 602 Individual Study for Doctoral Students 1 - 8 Units**Department:** Tibetan**Course level:** Graduate examination preparation**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Hours to be arranged.

Individual study in consultation with the major field adviser, intended to provide an opportunity for qualified students to prepare for various examinations required of candidates for the Ph.D.

Final exam not required.

Turkish (TURKISH)

TURKISH 1A Elementary Modern Turkish 5 Units**Department:** Turkish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 5 hours of Lecture per week for 15 weeks.

Sequence begins Fall.

Final exam required.

TURKISH 1B Elementary Modern Turkish 5 Units**Department:** Turkish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 5 hours of Lecture per week for 15 weeks.

Sequence begins Fall.

Final exam required.

TURKISH 10 Elementary Turkish 10 Units**Department:** Turkish**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 20 hours of Lecture per week for 8 weeks.

This course is equivalent to a full year of elementary Turkish. It will train students in the four language skills speaking, comprehension, reading, and writing. It will be taught with an interactional approach, aiming at communicative competence.

Students will receive no credit for 10 after taking 1A-1B. Final exam required.

TURKISH 100A Intermediate Modern Turkish 5 Units**Department:** Turkish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 5 hours of Lecture per week for 15 weeks.**Prerequisites:** 1A-1B or equivalent.

Sequence begins Fall.

Final exam required.

TURKISH 100B Intermediate Modern Turkish 5 Units**Department:** Turkish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 5 hours of Lecture per week for 15 weeks.**Prerequisites:** 1A-1B or equivalent.

Sequence begins Fall.

Final exam required.

TURKISH 101A Readings in Modern Turkish 3 Units**Department:** Turkish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 100A-100B or consent of instructor.

Selected topics from modern Turkish literary works.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

TURKISH 101B Readings in Modern Turkish 3 Units**Department:** Turkish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 100A-100B or equivalent.

Selected topics from modern Turkish literary works.

Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam required.

TURKISH H195 Senior Honors 2 - 4 Units**Department:** Turkish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks.**Prerequisites:** Limited to senior honors candidates.

Directed study centered upon preparation of an honors thesis.

Course may be repeated for a maximum of 4 units. Final exam not required.

TURKISH 198 Directed Group Study for Upper Division Students 1 - 4 Units**Department:** Turkish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Directed group study per week for 15 weeks.

Instruction in areas not covered by regularly scheduled courses.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

TURKISH 199 Supervised Independent Study and Research 1 - 4 Units**Department:** Turkish**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks.

Enrollment is restricted by regulations in the .

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

TURKISH 298 Seminar 1 - 4 Units**Department:** Turkish**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hour of Independent study per week for 15 weeks.**Prerequisites:** Consent of instructor.

Special topics in Turkish. Topics vary and are announced at the beginning of each semester.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

Undergrad Interdisciplinary Studies (UGIS)

UGIS 5A Doing Research: Critical Inquiry at Berkeley 1 Unit**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 2.5 hours of Lecture per week for 6 weeks.

Introduces the nature of research and the research university's role in the production of knowledge. Explores differences and similarities among modes of inquiry in sciences, social sciences, and humanities by looking at UCB faculty and their various approaches to current problems. Examines challenges and rewards of doing research. Profiles undergraduate researchers. Online course for new freshmen culminates in (optional) welcome week activities.

Final exam required.

UGIS W5 Doing Research: Critical Inquiry at Berkeley 1 Unit**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 2.5 hours of Web-based lecture per week for 6 weeks. This is an online course.

Introduces the nature of research and the research university's role in the production of knowledge. Explores differences and similarities among modes of inquiry in sciences, social sciences, and humanities by looking at UCB faculty and their various approaches to current problems. Examines challenges and rewards of doing research. Profiles undergraduate researchers. Online course for new freshmen culminates in (optional) welcome week activities. This course is web-based.

Final exam required. Formerly known as 5.

UGIS C10/OPTOM C10 The Eye and Vision in a Changing Environment 2 Units**Department:** Undergraduate Interdisciplinary Studies; Optometry; Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

Course covers introduction to the basis of common sight reducing visual disorders with major public health implications for society--e.g., myopia, cataracts, diabetic hypertensive eye disorders, developmental disorders (e.g., lazy eye), and environmentally induced disease and disorders (solar eye burns, cataracts). Major approaches to the prevention, diagnosis, and treatment of common disorders will be addressed in terms of the biological and optical sciences underlying the treatment or prevention. Impact of eye care on society and health and care delivery will be reviewed.

Final exam required. Instructor: Adams

UGIS 39B Freshman/Sophomore Seminar 1.5 - 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 1 hour of seminar per week per unit.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small-seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester.

Course may be repeated for credit when topic changes. Priority given to freshmen and sophomores. Final exam required.

UGIS 80A It's Elementary! Exploring Science with Young Students 2 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** The grading option will be decided by the instructor when the class is offered.**Hours and format:** 2 hours of Discussion per week for 15 weeks.

This course introduces the fundamentals of K-5 science education through demonstrations, skill modeling, and discussion. Topics include inquiry-based and cooperative learning strategies; team building and management tools; and assessment techniques. Students are placed in an elementary school and are provided the support needed to successfully participate in the classroom. This seminar offers an opportunity to explore teaching, foster children's natural curiosity, and inspire local students.

Students will receive no credit for Undergraduate Interdisciplinary Studies 80A after taking Undergraduate Interdisciplinary Studies 82. Final exam not required. Instructor: Johnson

UGIS 80B It's Elementary! Exploring Math with Young Students 2 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 2 hours of Discussion per week for 15 weeks.

This course introduces the fundamentals of K-5 math education through demonstrations, skill modeling, and discussion. Topics include inquiry-based and cooperative learning strategies; team building and management tools; and assessment techniques. Students are placed in an elementary school and are provided the support needed to successfully participate in the classroom. This seminar offers an opportunity to explore teaching, foster children's natural curiosity, and inspire local students.

Students will receive no credit for Undergraduate Interdisciplinary Studies 80B after taking Undergraduate Interdisciplinary Studies 82. Final exam not required. Instructor: Nolan

UGIS 81A Teaching Science with Middle School Students 2 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 2 hours of Discussion per week for 15 weeks.**Prerequisites:** Undergraduate Interdisciplinary Studies 80A.

This course introduces the fundamentals of sixth to eighth grade science education through demonstrations, skill modeling, and discussion. Topics include inquiry-based pedagogy, assessment techniques, empirically-based lesson revision, and adolescent development. Students are placed in a middle school and are provided the support needed to successfully participate in the classroom. This seminar offers an opportunity to explore teaching, foster children's natural curiosity, and inspire local students. Students will receive no credit for Undergraduate Interdisciplinary Studies 81A after taking Undergraduate Interdisciplinary Studies 82. Final exam not required. Instructor: Johnson

UGIS 81B Teaching Math with Middle School Students 2 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 2 hours of Discussion per week for 15 weeks.**Prerequisites:** Undergraduate Interdisciplinary Studies 80B.

This course introduces the fundamentals of sixth to eighth grade math education through demonstrations, skill modeling, and discussion. Topics include inquiry-based pedagogy, assessment techniques, empirically-based lesson revision, and adolescent development. Students are placed in a middle school and are provided the support needed to successfully participate in the classroom. This seminar offers an opportunity to explore teaching, foster children's natural curiosity, and inspire local students. Students will receive no credit for Undergraduate Interdisciplinary Studies 81B after taking Undergraduate Interdisciplinary Studies 82. Final exam not required. Instructor: Nolan

UGIS 82 K-8 Teaching and Inquiry-Based Lesson Design in the Science and Mathematics Classroom 2 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Seminar per week for 15 weeks. 4 hours of Seminar per week for 8 weeks.

This course surveys basic approaches to K-8 science and math teaching through modeling inquiry-based teaching and discussion. Topics include inquiry-based pedagogy, assessment techniques, lesson plan design and revision, and child development. Students are placed in science and math learning environments with upper elementary and middle school children to practice teaching. This seminar offers an opportunity to explore teaching, foster children's natural curiosity, and inspire local students. No restrictions. Final exam not required. Instructor: Nolan

UGIS 98 Directed Group Study for Lower Division Students 1 - 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 to 4 hour of Directed group study per week for 15 weeks.

Seminars for the group study of topics not covered by regularly scheduled courses. Topics may vary from semester to semester.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

UGIS 110 Introduction to Disability Studies 3 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks.

This course focuses on the social and personal meaning of disability and chronic illness. We will explore definitions and conceptual models for the study of disability, the history of disabled people, bio-ethical perspectives, the depiction of disability in literature and the arts, public attitudes, and legal and social policies. The course will investigate the interaction of disability with social factors such as gender, sexual orientation, race, ethnicity, and class. The course is for students with and without disabilities, and may be of special interest to students preparing for careers in the health professions, education, law, architecture, social work, or gerontology.

Final exam required.

UGIS 112 Women and Disability 3 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course will explore the intersection of women's experience and disability issues, emphasizing the social and personal impact of disability and chronic illness on relationships, identity, employment, health, body image, sexuality, reproduction, motherhood, and aging. Through real stories of women's lives which reached the media in the last decade and before, students will move toward a dynamic understanding of the impact of a range of physical, emotional, and mental disabilities in the context of current social forces and public policy. We will explore historic perspectives as well as current trends in medicine, independent living, care-giving, insurance, public benefits, law, and community activism as they affect and are affected by disabled women and girls and their families. We will discuss controversial ethical issues such as prenatal screening, wrongful birth law suits, and physician-assisted suicide. Course readings will draw on the rich literature of disabled women's anthologies, biography and autobiography, scholarly and popular literature of disability, feminist analyses, creative writing, women's art, film, and theatre.

Final exam required. Instructor: Saxton

UGIS 113 Disability Studies in Practice 3 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 6 hours of Internship and 1 hour of Seminar per week for 15 weeks.**Prerequisites:** Consent of instructor.

A graded service-learning internship course in disability studies. Students will draw lessons from working in collaboration with major disability rights and independent living organizations. Each student will do an internship at one of these organizations for six hours a week. In an additional one-hour a week seminar together, students will first prepare for the internships, setting objectives for skills to be learned and planning effective projects, and then analyze and reflect on the work done, both in order to create greater understanding of each intern's individual experiences and in order to think critically about how "service" and "organizing" can address the needs and goals of the disability community. Students must apply in advance for admission into this course.

Final exam required. Instructor: Schweik

UGIS 120 Introduction to Applied Language Studies 3 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and fieldwork per week.

This course is an introduction to the study of language as applied to real world problems in specific situations in which people use and learn languages, e.g., language learning and teaching, language socialization, bilingualism and multilingualism, language policy and planning, computer-mediated communication, stylistics, translation, intercultural communication, language and symbolic power, political and commercial rhetoric. Fieldwork consists of observation and analysis of language-related real world problems.

Final exam required. Instructor: Kramsch

UGIS C133/HISTORY C191/HMEDSCI C133 Death, Dying, and Modern Medicine: Historical and Contemporary Perspectives 4 Units**Department:** Undergraduate Interdisciplinary Studies; Health and Medical Sciences; History; Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 2 hours of Discussion per week for 15 weeks. 6 hours of Lecture and 2 hours of Discussion per week for 8 weeks. 8 hours of Lecture and 2 hours of Discussion per week for 6 weeks.

This course will study the end of life--dying and death--from the perspective of medicine and history. It seeks to confront the humanist with the quotidian dilemmas of modern clinical practice and medicine's deep engagement with death more generally. It invites pre-med, pre-law, and public policy students to understand these matters in light of the historical and, more broadly, literary and artistic perspectives of the humanities. Final exam required. Instructors: Laqueur, Micco

UGIS C136/AMERSTD C112F/ESPM C191/HISTART C189 The American Forest: Its Ecology, History, and Representation 4 Units**Department:** Undergraduate Interdisciplinary Studies; American Studies; Environ Sci, Policy, and Management; History of Art; Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

The American forest will be examined in terms of its ecology, history, and representations in paintings, photographs, and literary essays. This examination seeks to understand the American forest in its scientific and economic parameters, as well as the historic, social, and ideological dimensions which have contributed to the evolution of our present attitudes toward the forest.

Final exam required. Instructors: Lovell, McBride

UGIS 140 The Hand-Printed Book in Its Historical Context 2 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Studio per week for 15 weeks.

The "Hand-Printed Book" is a studio course taught in the Bancroft press room. Using antique presses and 19th century type, each class produces by hand a rare first edition of a work from the Bancroft collections that has never been published before. As students learn how hand-produced books have been made in the west for the last 500 years, they are also taught about the history of the book, using examples from Bancroft's rare books and manuscripts collection.

Final exam not required. Instructor: Ferriss

UGIS C155/HISTORY C175B/RELIGST C135 Jewish Civilization: Modern Period 4 Units

Department: Undergraduate Interdisciplinary Studies; History; Religious Studies; Undergrad Interdisciplinary Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This is the fourth course in a four-course sequence in the history of Jewish culture and civilization. It explores the major themes in Jewish history from 1750 to the present, with special attention paid to the transformation of Jewish communal and individual identity in the modern world. Topics to be treated include the breakdown of traditional society, enlightenment and emancipation, assimilation, Hasidism, racial anti-Semitism, colonialism, Zionism, and contemporary Jewish life in Europe, North America, and Israel. The multicultural nature of Jewish history will be highlighted throughout the course through the treatment of non-European Jewish narratives alongside the more familiar Ashkenazi perspective.

Final exam required.

UGIS 156 Human Rights Interdisciplinary Minor Capstone Workshop 1 or 3 Units

Department: Undergrad Interdisciplinary Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

Hours and format: 3 hours of seminar every month; 8 hours final conference.

Prerequisites: History C187 or L&S C140V.

The HRI Capstone Workshop structures the process of turning research projects into conference papers in preparation for the HRI conference.

The course allows students to tackle common research and writing problems together in a series of group advising sessions.

Final exam not required. Instructor: Gallagher

UGIS W157 Experiential Learning: Context, Self-Reflection and Professional Development 4 Units

Department: Undergrad Interdisciplinary Studies

Course level: Undergraduate

Term course may be offered: Spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of web-based lecture and 3 hours of web-based discussion per week for 10 weeks. This is an online course.

This course facilitates your learning and self-reflection about various types of organizational contexts, structures, and cultures and about the development of practical strategies to promote successful internship experiences. A series of audio-visual lectures, practical exercises, writing assignments, projects, and online group discussions will guide you through all stages of your internship experience. The course will also present a range of theories, methods, and real-world example for examining management and organizational theory and practice.

Course may be repeated for credit when topic changes. Final exam required. Instructor: Clark

UGIS 160A Art 4 Units

Department: Undergrad Interdisciplinary Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 4 hours of Lecture per week for 15 weeks.

This course delves into various facets of the Arts in Washington, D.C., whether involving public arts through museums such as the Smithsonian, or performance venues such as theatres; art history and public issues involving arts sponsorship and presentation.

Final exam required.

UGIS 161 International Non-governmental Organizations 4 Units

Department: Undergrad Interdisciplinary Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 4 hours of Lecture per week for 15 weeks.

As the international community seeks to define the "post Cold War era," and more recently, the "post 9-11 era," increasing attention focuses on the role of non-governmental organizations (NGOs). NGOs appear to be playing an increasingly critical role in affecting international political and economic outcomes. NGOs act as knowledge providers for national governments and international organizations. They act as watchdogs and lobbyists for policy change. They act as critical intermediaries that can provide cross-national linkages between governmental players, or between governments and local populations. This course examines both conceptual and practical issues surrounding NGOs and international relations.

Final exam not required. Instructor: Doherty

UGIS 162A Political Science: Behind the Bully Pulpit - The History of Presidential Speech 4 Units

Department: Undergrad Interdisciplinary Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 4 hours of Lecture per week for 15 weeks.

As history has shown, there is no bully pulpit in the world like the American presidency. Whether it was Roosevelt declaring war on the Japanese or Regan declaring war on government bureaucracy, they, like all presidents, understood the power of their words to make history and to change it. This course will study the history of the presidency through their speeches. We will read and analyze remarks delivered from the podium in economic booms and busts, in times of social unrest, and even in moments of humor. By reading others and drafting our own, we will also learn the elements of an effective speech and how to craft and deliver one. A few former and current presidential speechwriters will be featured as guests throughout the semester. Course requirements include the 750-word op-ed, preparation and delivery of a 10-minute speech, writing a mid-term paper based on course materials and sitting for a final exam.

Final exam required. Instructor: Gottheimer

UGIS 162B Political Science: America and the Arab-Israeli Conflict: Issues in Policy and Diplomacy 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks.

This course focuses on American policy towards the Arab-Israeli conflict. It is neither a comprehensive history of the conflict nor of US policy. Instead, it focuses on key issues that shape and define Americas approach to the conflict, its management, and resolution. The course is very much Washington-centric, taught from the blended perspective of a practitioner but with an analytical and historical bent. It will examine core issues, such as the problem of bias and objectivity, the US-Israel relationship, the American approach to negotiations, the role of domestic politics in shaping US policy, and the international dynamics involved in the formulation of US policy.

Final exam required. Instructor: Miller

UGIS 162C Political Science: Campaign Effects and Management 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks.

What does political science research tell us about how to manage a political campaign? We'll begin by discussing the magnitude of effects campaigns have in the face of prevailing forces such as partisanship and macroeconomic health. Next, we'll review experiments that test get-out-the-vote techniques and examine the use of technology in motivating voters. Finally, we'll analyze partisan biases and think about how voters can be persuaded. Parts of this course are quantitative in nature, and students should feel comfortable reading about and working with political data.

Final exam not required. Instructor: Strauss

UGIS 162D Political Science: Manias, Panics and Crashes: The Politics of Financial Crises 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks.

This class is designed to help students explore the political dimensions of financial crises. To do so we will study the behavior of the financial elites, and the dynamic system of rules, norms, markets, and organizations that constitute the political environment of international finance. We will examine the current global financial crisis in comparative and historical perspective. Our inquiry will include an intellectual dialogue with the work of theorists, market participants, and policymakers. How can we prevent another financial catastrophe? What should we do about banks that are "too big to fail"? Will I be able to find a job when I graduate? What can the IMF do to help developing countries cope? How will U.S.-China diplomatic relations be impacted? Is U.S. financial hegemony slowly relegating itself to the dustbin of history? Is the current policy response adequate or are we merely creating another bubble? The Global Financial Crisis is on everyone's minds.

Final exam not required. Instructor: Tubin

UGIS 162E Political Science: Environmental Policymaking and the Politics of Climate Change 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks.

World leaders at the United Nations Framework Convention on Climate Change (UNFCCC) held in Copenhagen this past December announced that they reached "a meaningful agreement" that will lead to a global treaty to address climate change. Many observers see the politics of the Copenhagen Accord as a glimpse into the new world order in which international diplomatic power will increasingly be shared by the United States (U.S.) and emerging powers, such as China. Climate change policy also offers a lens through which the U.S. domestic environmental policymaking process can be viewed and its evolution better understood. This course will examine the dynamics of global environmental treaty-making after first studying the development of U.S. environmental protection efforts. Students will then analyze the international and domestic efforts that led up to the Copenhagen Accord and assess what is needed and likely to result from the next UNFCCC meeting to be held in Mexico City in 2010.

Final exam not required. Instructor: Wagner

UGIS 162F Political Science: The Politics of Foreign Policy: From John F. Kennedy to Barack Obama 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks.

The course will look at American foreign policy from John F. Kennedy in the 1960s to Barack Obama today. Studying and analyzing the major foreign policy issues from the Cuban Missile Crisis to Vietnam to the two wars in Iraq to the war in Afghanistan and the ongoing war on terrorism we will discuss and debate the role domestic politics played in our major foreign policy issues. The course will look at the role of the president, Congress, and interest groups in determining foreign policy.

Final exam required. Instructor: Guttman

UGIS 162H Political Science: Interest Group Politics: Lobbying and Influences 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks.

This course will explore the role of interest groups and lobbyists in the American political process. We will discuss what makes an influential lobbyist in Washington. We will examine the ways in which organized interests try to achieve their goals, and what determines whether or not they are successful. We will investigate whether the tens of thousands of lobbyists roaming the streets of Washington improve or detract from the quality of American democracy.

Final exam not required. Instructor: Drutman

UGIS 162I Political Science: Lobbying, Money, and Influence in Washington 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This course will be an intense examination of lobbying in Washington with particular attention given to the role of money and campaign finance in the operation of what has become a highly sophisticated and poorly understood network of advocacy and influence. The approach of the instructor is to provide a basic understanding of three different but interrelated knowledge sets: the Congress, political money, and lobbying by interest groups.

Final exam not required. Instructor: Billet

UGIS 162J Political Science: U.S. Supreme Court: Judicial Politics and Constitutional Interpretation 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.

This course will introduce students to the Supreme Court of the United States and its work. Besides covering the Court's historical origins, its institutional power and limitations, and its current cases, this course will attempt to de-mystify one of the nation's most cloistered governmental institutions. Students will learn the nuts and bolts of what happens to a case from the day a petition to review a dispute arrives at the Supreme Court until the day the justices issue a final opinion.

Final exam required. Instructors: Bravin,J., Bravin,N.

UGIS 162K Spies! The Politics of Intelligence 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

In this course, students will be introduced to recent issues concerning intelligence, such as intelligence failure, reform, and oversight, with a focus on how the change in U.S. intelligence in the post-9/11 context has increasingly emphasized domestic or "homeland" intelligence. Students will gain an understanding of the different types of intelligence, the range of responsibilities that the different Intelligence Community members hold, and the relationship between intelligence and the policymaking process.

Final exam required. Instructor: Cain

UGIS 162L Middle East Politics and the Arab "Spring" 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course provides an overview of modern Middle Eastern politics with the aim of gaining a deeper understanding of the recent events of the Arab "Spring." This course begins with a historical analysis outlining the development of the states in the Middle East. Through this course, students will gain an understanding of the dynamics of the Middle Eastern politics and society.

Final exam not required. Instructor: Robbins

UGIS 162M U.S. Foreign Policy in the Middle East 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

What are the United States' interests in the Middle East? Who and what determine those interests? And how are those interests pursued? This course addresses these questions in two parts. Students should leave this class with a strong understanding of the challenges that the U.S. faces in the Middle East, as well as an informed viewpoint regarding how well America is meeting those challenges.

Final exam not required. Instructor: Trager

UGIS 162N American Political Journalism 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This class will explore the relationships among politics, news media, and government. It will do so by focusing on particular news events in which the role of the media becomes an integral part of the story.

Final exam required. Instructor: Lozada

UGIS 162O The Science of Politics: Campaigns and Elections 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This class will teach you how to better understand the fundamental factors that drive elections in America and to learn some of the skills employed by political professionals. Many of your assignments will require you to apply the lessons of this class to real time events. Our goal in this class is to go beyond the spin and hyperbole of many election commentators and understand how voters decide and how strategists persuade.

Final exam required. Instructor: Goldstein

UGIS 162P Beyond Sovereignty 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The decline of traditional sovereignty is the focus of this course. The nature of that transformation--what is causing it, why, and with what implications--will be the object of our concern. While time frames are elusive, the bulk of our attention will be on the post-Cold War world. Final exam not required. Instructor: Starrels

UGIS 162R Looking at the World: U.S. Foreign Policy and National Security 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

This course combines two areas of continual fascination in Washington and beyond - US foreign policy and policies regarding national security. The course provides students with a framework to understand policy analysis, development, and implementation while introducing them to a range of the most pressing substantive policy issues the US is currently facing. The course will alternate between foreign policy issues and functional organizational tools used to address these issues. Take home final exam Instructors: Lester, Preble

UGIS 162S U.S. Foreign Policy Toward Africa 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Term course may be offered:** Fall**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of lecture per week.

This course will focus on the evolution of U.S. foreign policy toward Africa from African independence until present day. Specific themes include economic development, China's economic expansion, foreign aid, democracy, and human rights. Specific attention will focus on the role of race and ethnic politics and their influence on U.S. policy. research paper/group presentations Instructor: Demessie

UGIS 162T Foreign Policy in Asia 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Term course may be offered:** Spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and 1 hour of discussion per week.

What are the most pressing foreign policy challenges in Asia today? How do American foreign policymakers respond to crises in Asia?

To what extent does domestic politics influence or inform our policy making? This course seeks to help students develop the analytical skills necessary to understand American policy toward Asia, especially in preparation for a career in foreign policy. policy planning simulation Instructor: Nardi

UGIS 165 A Window Into How Washington Works 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The federal government effects policy (e.g., enhancing public safety, protecting the environment, promoting a viable and growing economy, etc.) primarily in three ways: taxing, spending, and regulating. This course will explore how regulations -- an important instrument of government and one of the easiest ways for a President to make his/her mark -- are developed, amended, or repealed, with an emphasis on how the various institutions of the federal government are involved in the process and how they interact with the other interested entities. Final exam not required. Instructor: Katzen

UGIS 171 The Middle East Conflict in Living Color and the American Civil War on Stage 3 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Over the past four years, this course has canvassed the Washington theater scene and discovered a wealth of politically and socially attuned material on DC stages. Washington has, rather suprisingly, emerged as the second most vibrant theatrical city in the nation, surpassing Chicago and Los Angeles in number of performances offered, audience in attendance, and union actors appearing in Equity-contracted productions. The city now boasts some of the finest classical, flagship, and culturally specific theaters in the country. This advent of a robust theater scene planted at the seat of power has created a unique cultural profile: that of an artistic force able to speak truth to power. Yet often times, theatrical institutions are constricted by the divided nature of the audience they play for, or the critical community that critiques them, or differing notions about the purpose of theater. What kind of portraits are emerging from area theaters in this politicized capital? What are the practical politics within these institutions that seek to engage and entertain their patrons?.

Final exam not required. Instructor: Roth

UGIS 173 Museums and Society: The Power of Display in Washington DC 3 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course explores museums as dynamic sites of intellectual and cultural debate, and as institutions vested with the authority to define aesthetics, history, heritage, and even citizenship. Now more than ever, as the process of globalization raises questions about the fluidity, preservation, and "authenticity" of culture, museums of all kinds are attracting great interest both as places to visit and as a subject of critical analysis in their own right. As places defined by the collection, display, and interpretation of objects, museums are bound up in questions of permanence and transience, difference and identity, equity and privilege--issues that lie at the heart of what is termed the "new museology." But as institutional repositories of community memory or indigenous knowledge, they are also bound up in questions of representation, access and ownership--issues that move the debate over museum collections squarely into the politics of local, state, and national control over heritage. If ownership and control are the new realities of international heritage policy (and law), museums have quickly emerged as important sites on which and through which these claims are being made.

Final exam required. Instructor: Reddy

UGIS 175 Washington Ethics: Crisis, Reform, and Reaction 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 15 weeks. 6 hours of Lecture per week for 8 weeks.

This course explores the history, theory, and practice of public attempts to reform electoral and political processes at the national level. Emphasis will be on key players and institutions in Washington, D.C., and key theories underlying our conceptions of good government and politics.

Final exam required. Instructor: Clark

UGIS 176 Ensuring Food Safety: Role of Producers, Consumers, and Public Health Agencies 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

The course offers students an opportunity to gain insights into how the knowledge and expertise they acquire during their university studies can be applied to facilitating or enhancing efforts by public health agencies (local, state, national, and international) and by food producers, food manufacturers, food distributors, and other pertinent industry, to ensure food safety.

Final exam not required. Instructor: Ekperigin

UGIS 176A Negotiating with Terrorists 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course will serve to teach and discuss the topic "Negotiating with Terrorists." The focus will be on negotiations with collective terrorist movements, not on bargaining with hostage takers in the course of single-event hostage taking incidences. The course will be organized in four thematic blocks with three classes each. All of the classes will be based on working on analytic themes. During classes, case studies will be equally discussed to foster understanding of these matters.

Final exam not required. Instructor: Goerzig

UGIS 176B Green Governance 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Term course may be offered:** Spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of lecture and 1 hour of discussion per week. How do we create a sustainable world? What is the role of energy and environmental policy? Will technical innovation lead to better solutions?

What is the role of the consumer? Should business climate change planning be under government mandate or voluntary? Will market-based solutions work? What metrics should we use to determine the relative effectiveness of various policies? These are the sorts of questions we will ask in this course.

class project presentations Instructor: DuPuis

UGIS 177 The Politics of Education 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Students will study the ways power and politics affect and are affected by such issues as reform and innovation, centralization and decentralization within federal systems of governance, privatization and school choice, race and ethnicity, poverty and inequality, professionalism and bureaucratization, and testing and accountability.

Final exam not required. Instructor: Martinez

UGIS 187 Project-Based Instruction 4 Units**Department:** Undergrad Interdisciplinary Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture and 3 hours of fieldwork and 1 hour of discussion per week.**Prerequisites:** Education 131.

Framed around the topic of sustainability, the course engages students from different math, science, and engineering majors in the process of applying the content knowledge from their discipline to build project-based curricula for presentation as part of a 45-hour field placement in a local high school classroom. Students develop pedagogical content knowledge and relate teaching theory to practice through readings, classroom activities, discussion, lesson planning, and field observations.

Final exam not required. Instructor: Johnson

UGIS 188 Research Methods for Science and Mathematics K-12 Teachers 3 Units

Department: Undergrad Interdisciplinary Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 2 hours of Seminar and 2 hours of Laboratory per week for 15 weeks.

Students undertake several in-depth research projects to develop methods for engaging in authentic research in the science or mathematics content area related to their major. Interactive lectures and labs are designed to meet the needs of future teachers by practicing specific techniques--including statistics, mathematical modeling, and scientific writing--needed to address scientific questions so that they may guide their future K-12 students to develop skills in problem solving and research.

Final exam not required. Instructors: G. Johnson, Nolan

UGIS 189 Integrating Research Methods into K-12 Teaching in Mathematics and Science 1 or 3 Units

Department: Undergrad Interdisciplinary Studies

Course level: Undergraduate

Term course may be offered: Summer

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 4 hours of seminar per week.

Prerequisites: Concurrent internship in a research lab with the Cal Teach Summer Institute.

This course is designed to provide connections between research methods and science and math content learned in a research lab with teaching in the K-12 classroom. Hands-on inquiry-based science and math lessons are modeled and discussed. Students write research proposals, create posters demonstrating their research accomplishments, develop K-12 lesson plans that align with their research, and assemble digital portfolios on standards-based teaching and assessment.

In lieu of a final examination, this course has a final presentation of research posters. For further details, please see remarks section.

Instructor: Nolan

UGIS 192A Supervised Research: Humanities 1 - 4 Units

Department: Undergrad Interdisciplinary Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

Hours and format: Requires 3 hours of work per week per unit.

Undergraduate Research Apprenticeship Program (URAP). Directed individual research on topics connected to faculty scholarship.

Course may be repeated for credit when topic changes. Students may enroll in only one section of 192 per semester. Final exam not required.

UGIS 192B Supervised Research: Social Sciences 1 - 4 Units

Department: Undergrad Interdisciplinary Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

Hours and format: Requires 3 hours of work per week per unit.

Undergraduate Research Apprenticeship Program (URAP). Directed individual research on topics connected to faculty scholarship.

Course may be repeated for credit when topic changes. Students may enroll in only one section of 192 per semester. Final exam not required.

UGIS 192C Supervised Research: Biological Sciences 1 - 4 Units

Department: Undergrad Interdisciplinary Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

Hours and format: Requires 3 hours of work per week per unit.

Undergraduate Research Apprenticeship Program (URAP). Directed individual research on topics connected to faculty scholarship.

Course may be repeated for credit when topic changes. Students may enroll in only one section of 192 per semester. Final exam not required.

UGIS 192D Supervised Research: Physical Sciences 1 - 4 Units

Department: Undergrad Interdisciplinary Studies

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: Offered for pass/not pass grade only.

A variety of topics in finance with emphasis on current problems and research.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Business Administration 139.

UGBA 141 Production and Operations Management 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 104 or equivalent, or consent of instructor.

A survey of the concepts and methodologies for management control of production and operations systems. Topics include inventory control, material requirements planning for multistage production systems, aggregate planning, scheduling, and production distribution.

Final exam required. Formerly known as Business Administration 142.

UGBA 143 Game Theory and Business Decisions 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** Mathematics 1B or 16B, Statistics 21, or equivalent.

This course provides an introduction to game theory and decision analysis. Game theory is concerned with strategic interactions among players (multi-player games), and decision analysis is concerned with making choices under uncertainty (single-player games). Emphasis is placed on applications.

Final exam required.

UGBA 147 Special Topics in Manufacturing and Information Technology 1 - 4 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hour of Lecture per week for 15 weeks. 2.5 to 10 hours of Lecture per week for 6 weeks.**Prerequisites:** Business Administration 140.

A variety of topics in manufacturing and information technology with emphasis on current problems and research.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Business Administration 149.

UGBA 151 Management of Human Resources 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 105

The designs of systems of rewards, assessment, and manpower development. The interaction of selection, placement, training, personnel evaluation, and career ladders within an on-going organization. Role of the staff manager. Introduction of change. Implications of behavioral research for management problems and policies.

Final exam required. Formerly known as Business Administration 151.

UGBA 152 Negotiation and Conflict Resolution 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 105

The purpose of this course is to understand the theory and processes of negotiation as practiced in a variety of settings. It is designed to be relevant to the broad spectrum of negotiation problems faced by managers and professionals. By focusing on the behavior of individuals, groups, and organizations in the context of competitive situations, the course will allow students the opportunity to develop negotiation skills experientially in useful analytical frameworks (e.g.- simulations, cases). Final exam required. Formerly known as Business Administration 152.

UGBA 154 Power and Politics in Organizations 2 or 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** unit(s):2 hours of lecture per week; 3 unit(s):3 hours of lecture per week.

This course will provide students with a sense of "political intelligence."

After taking this course, students will be able to: (1) diagnose the true distribution of power in organizations, (2) identify strategies for building sources of power, (3) develop techniques for influencing others, (4) understand the role of power in building cooperation and leading change in organizations, and (5) make sense of others' attempts to influence them. These skills are essential for effective and satisfying career building.

Final exam required.

UGBA 155 Leadership 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.

The purpose of this course is for the students to develop understanding of the theory and practice of leadership in various organizational settings. It is designed to allow students the opportunity to develop leadership skills through experiential exercises, behavioral and self-assessments, case studies, class discussions, and lectures.

Final exam required.

UGBA 156AC Diversity in the Workplace 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 10, 105, 151 recommended.

This course introduces students to various theories on diversity in business and the importance of human capital equity and inclusion to organizations. Students will engage in community-based projects to be more conscious of the social impact of positive human relations and to foster equity, social justice, and civic responsibility. Emphasis placed on experiential learning with issues of race, ethnicity, gender, generational status, spirituality, sexual orientation, and physical and mental ability. Satisfies the American Cultures requirement
Final exam not required.

UGBA 157 Special Topics in the Management of Organizations 1 - 4 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hour of Lecture per week for 15 weeks. 2.5 to 10 hours of Lecture per week for 6 weeks.**Prerequisites:** 105

A variety of topics in organizational behavior and industrial relations with emphasis on current problems and research.
Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required. Formerly known as Business Administration 159.

UGBA 160 Consumer Behavior 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 106

Consumer behavior is the study of how consumers process information, form attitudes and judgments, and make decisions. Its study is critical to understand how consumers think and behave, which is critical for a company wishing to develop a customer focus. Given how different people are, it is amazing how similarly their minds work. Consumer psychology is the systematic study of how consumers perceive information, how they encode it in memory, integrate it with other sources of information, retrieve it from memory, and utilize it to make decisions. It is one of the building blocks of the study of marketing and provides the student with a set of tools with diverse applications.
Final exam required.

UGBA 161 Marketing Research: Tools and Techniques for Data Collection and Analysis 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 106

Marketing research objectives; qualitative research, surveys, experiments, sampling, data analysis.

Final exam required. Formerly known as Business Administration 161.

UGBA 162 Brand Management and Strategy 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.**Prerequisites:** 106

This course is an introduction to product management in marketing consumer and industrial goods and services. The course will cover analysis of market information, development of product strategy, programming strategy, and implementation.
Final exam required. Formerly known as Business Administration 162.

Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 101A or Economics 101A or consent of instructor.

This course examines how market forces influence the development of cities and the development and pricing of real estate assets. Topics include city formation; city size; land rent and land use; the operation of residential, commercial and industrial property markets; and the impacts of government policies, including the provision of public services, the imposition property taxes and fees, transportation pricing and investment, and land use regulations.

Final exam required. Instructor: Helsley

UGBA 187 Special Topics in Real Estate Economics and Finance 1 - 4 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hour of Lecture per week for 15 weeks. 2.5 to 10 hours of Lecture per week for 6 weeks.

A variety of topics in real estate economics and finance with emphasis on current problems and research.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

UGBA 190S Strategy for the Information Technology Firm 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week. 6 hours of lecture per week for 8 weeks.

This course is a strategy and general management course for students interested in pursuing careers in the global information technology industry. Students are taught to view the IT industry through the eyes of the general manager/CEO (whether at a start-up or an industry giant). They learn how to evaluate strategic options and their consequences, how to understand the perspectives of various industry players, and how to anticipate how they are likely to behave under various circumstances. These include the changing economics of production, the role network effects and standards have on adoption of new products and services, the tradeoffs among potential pricing strategies, and the regulatory and public policy context.

Final exam required.

UGBA 190T Special Topics in Innovation and Design 1 - 4 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hours of lecture per week. 2 to 7 hours of lecture per week for 8 weeks. 2 to 10 hours of lecture per week for 6 weeks.

Advanced study in the fields of innovation and design that will address current and emerging issues. Topics will vary with each offering and will be announced at the beginning of each term.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

UGBA 190V Corporate Strategy in Telecommunications and Media 2 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of lecture per week. 5 hours of lecture per week for 6 weeks.

This course is an intensive and in-depth study of the rapidly evolving global telecommunications and media industry viewed through the perspective of an entrepreneur/innovator (whether at a start-up or an established company) attempting to introduce a new product or service into the market. The course is fundamentally about strategy and general management, but will draw from a variety of disciplines including public policy, law, marketing, economics, finance, engineering, and physics to identify the key issues, analyze the potential options and understand the consequences of the decisions made by management.

Final exam required.

UGBA 191C Communication for Leaders 2 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 hour of Lecture and 2 hours of Discussion per week for 15 weeks. 1.5 hours of Lecture and 3.5 hours of Discussion per week for 8 weeks. 2.5 hours of Lecture and 5 hours of Discussion per week for 6 weeks.

This course is a workshop in the fundamentals of public speaking skills in today's business environment. Each student will give speeches, coach, and debate each other, and take part in a variety of listening and other communication exercises. The course focuses on authenticity, persuasion, and advocacy.

Final exam not required.

UGBA 191I Improvisational Leadership 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week. 7 hours of lecture per week for 6 weeks.

This class explores the broad principles of improvisation, a performing art form that has developed pedagogical methods to enhance individual spontaneity, listening and awareness, expressive skills, risk-taking, and one's ability to make authentic social and emotional connections. The ultimate aim of the course is to help students develop an innovative and improvisational leadership mindset, sharpening in-the-moment decision making and the ability to quickly recognize and act upon opportunities when presented. In practical terms, this course strives to enhance students' business communication skills and increase both interpersonal intuition and confidence.

Final paper.

UGBA 191P Leadership and Personal Development 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week. 7 hours of lecture per week for 6 weeks.

This course is highly interactive and challenges you to explore questions central to your own leadership journey. The ultimate aim of the class is to help you develop a lifelong leadership development practice, where continuous personal growth is valued and actively pursued.

Final exam required.

UGBA 192A Leading Nonprofit and Social Enterprises 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7 hours of Lecture per week for 6 weeks.**Prerequisites:** 101A or equivalent.

This course prepares students conceptually and practically to found, lead, and manage organizations in the nonprofit sector. The course focuses on mission and theory of change (strategy), role of the board in governance, managing and marketing to multiple constituencies, role of advocacy in meeting mission, leadership styles and managing organizational culture, resource development (philanthropy), nonprofit financial management, managing for impact, HR management (volunteering), and cross-sector alliances.

Final exam not required. Formerly known as Business Administration 115.

UGBA 192L Applied Impact Evaluation 2 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.

This course covers the methods and applications of impact evaluations, which is the science of measuring the causal impact of a program or policy on outcomes of interest. At its essence, impact evaluation is about generating evidence on which policies work, and which don't. This subject matter should appeal to three main audiences: (1) those in decision-making positions, such as policy makers and business leaders, and need to consume the information generated from impact evaluations to make informed evidence-based decisions, (2) project managers, development practitioners and business managers who commission impact evaluations and (3) researchers who actually design and implement impact evaluations.

Final project due at the end of the final exam period.

UGBA 192N Topics in Non-Profit Management 1 - 5 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 5 hour of Lecture per week for 15 weeks. 2.5 to 12.5 hours of Lecture per week for 6 weeks.

Advanced study in the field of non-profit management that will address current and emerging issues. Topics will vary with each offering and will be announced at the beginning of each term.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

UGBA 192P Strategic Corporate Social Responsibility and Consulting Projects 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

Discuss the field of strategic CSR through a series of lectures, guest speakers, and projects. The course will examine best practices used by companies to engage in socially responsible business practices. It will provide students with a flavor of the complex dilemmas one can face in business in trying to do both "good for society" and "well for shareholders." It looks at CSR from a corporation perspective, and how this supports core business objectives, core competencies, and bottom-line profits.

Final exam not required. Instructor: Sweeney

UGBA 192T Topics in Corporate Social Responsibility 1 - 4 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hour of Lecture per week for 15 weeks. 2.5 to 10 hours of Lecture per week for 6 weeks.

Advanced study in the field of corporate social responsibility that will address current and emerging issues. Topics will vary with each offering and will be announced at the beginning of each term.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

UGBA 193C Curricular Practical Training for International Students 0 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** Internship for 6 weeks. Internship.**Prerequisites:** International students only.

This is a zero-unit internship course for non-immigrant international students participating in internships under the Curricular Practical Training program. Requires a paper exploring how the theoretical constructs learned in UGBA courses were applied during the internship.

Final exam required.

UGBA 193I Business Abroad 1 - 4 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 to 12 hours of Lecture and 3 to 12 hours of Lecture per week for 6 weeks.**Prerequisites:** To be determined by instructor depending on topic.

This course includes both formal learning in lectures, experiential learning, and action research through site visits abroad. Students and instructor will visit with international companies and/or organizations to learn about the business opportunities and challenges of operating in a specific country or region. Evaluation is based on student participation, presentations, and a research paper. Country and business industry focus may vary from term to term depending upon the instructor.

Final exam not required.

UGBA 194 Undergraduate Colloquium on Business Topics 1 Unit**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.**Hours and format:** 1 hour of lecture per week. 2 hours of lecture per week for 6 weeks.

This is a speakers series course designed to give students insights from practitioners into complex issues facing American business leaders. Each week a guest speaker will discuss an issue related to a particular theme, ranging from corporate governance to the social responsibilities of business. Students will be challenged to synthesize, question, and extend those insights under the guidance of the instructor.

Course may be repeated for credit when topic changes. Final exam required.

UGBA 195A Entrepreneurship 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.

This course takes students through the new venture process using a 20-30 page business plan as the main deliverable. Students write a plan which lays a foundation for a new venture. Through the planning process that tightly links market and financial planning, a business plan creates a set of standards to which investors and teammates can evaluate actual performance, laying the foundation for an "operation plan" once the business is launched.

Final exam not required. Formerly known as Business Administration 195.

UGBA 195P Perspectives on Entrepreneurship 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks. 7.5 hours of Lecture per week for 6 weeks.

This course explores and examines key issues facing entrepreneurs and their businesses. It is intended to provide a broad spectrum of topics across many business disciplines including accounting, finance, marketing, organizational behavior, production/quality, technology, etc. Students will acquire a keen understanding of both the theoretical and real world tools used by today's entrepreneurial business leaders in achieving success in today's global business environment.

Final exam required.

UGBA 195S Entrepreneurship To Address Global Poverty 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.

This course examines whether and how entrepreneurial ventures can meaningfully address global poverty vs. more traditional approaches such as foreign aid, private philanthropy or corporate social responsibility initiatives. Combining lectures, case studies, and interviews with social entrepreneurs, it explores poverty and entrepreneurship before focusing on their intersection in various bottom-of-pyramid markets, from health, housing, and education to energy, agriculture, and finance.

Final exam not required.

UGBA 195T Topics in Entrepreneurship 1 - 3 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 3 hour of Lecture per week for 15 weeks.

Courses of this kind will cover issues in entrepreneurship that either appeal to a specialized interest by type of firm being started (e.g., new ventures in computer software) or in the aspect of the entrepreneurial process being considered (e.g., new venture funding). The courses typically will be designed to take advantage of the access offered by the University and the locale to knowledgeable and experienced members of the business community.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

UGBA 196 Special Topics in Business Administration 1 - 4 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. UGBA 199 Supervised Independent Study and Research 1 - 4 Units**Department:** Undergrad. Business Administration**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Offered for pass/not pass grade only.

Hours and format: Zero hours of Independent study per week for 15 weeks. 1 to 4 hour of Independent study per week for 8 weeks. 1 to 4 hour of Independent study per week for 6 weeks.

Prerequisites: Consent of instructor.

Enrollment restrictions apply.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog. Final exam not required. Formerly known as Business Administration 199.

Vietnamese (VIETNMS)

VIETNMS 1A Introductory Vietnamese 5 Units**Department:** Vietnamese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 5 hours of Lecture and 1 to 2 hour of Discussion per week for 15 weeks.**Prerequisites:** 1A or equivalent or consent of instructor is a prerequisite for 1B.

An introduction to modern spoken and written Vietnamese, including intensive drill on basic phonology and grammar. By the end of the second semester the student should be able to function successfully in ordinary Vietnamese conversation and read simple texts of moderate difficulty. Final exam required. Formerly known as Vietnamese 1A.

VIETNMS 1B Introductory Vietnamese 5 Units**Department:** Vietnamese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 5 hours of Lecture and 1 to 2 hour of Discussion per week for 15 weeks.**Prerequisites:** 1A or equivalent or consent of instructor.

An introduction to modern spoken and written Vietnamese, including intensive drill on basic phonology and grammar. By the end of the second semester the student should be able to function successfully in ordinary Vietnamese conversation and read simple texts of moderate difficulty. Final exam required. Formerly known as Vietnamese 1B.

VIETNMS 15 Intensive Introductory Vietnamese 10 Units**Department:** Vietnamese**Course level:** Undergraduate**Term course may be offered:** Summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 20 hours of Lecture and 5 hours of Discussion per week for 8 weeks.

Provides the learner with essential vocabulary, grammar, and literacy through intensive drills and written and oral exercises. By the end of the course, students should be able to function successfully in everyday Vietnamese conversation and read simple texts of moderate difficulty. Final exam required. Instructor: Tran

VIETNMS 100A Intermediate Vietnamese 5 Units**Department:** Vietnamese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 5 hours of Lecture and 1 to 2 hour of Discussion per week for 15 weeks.**Prerequisites:** 1A-1B, or consent of instructor; 100A or consent of instructor is a prerequisite for 100B.

A second-year course in Vietnamese vocabulary and syntax with intensive drills on short colloquial expressions and auditory recognition of speech patterns. First semester course stresses phraseology, sentence building, rules of composition and development of students' communicative skills. By the end of the second semester students will learn to speak and write simple compositions and will have a cursory introduction to Vietnamese literature and sample readings from contemporary Vietnamese writers. Final exam required. Formerly known as Vietnamese 100A.

VIETNMS 100B Intermediate Vietnamese 5 Units**Department:** Vietnamese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.**Hours and format:** 5 hours of Lecture and 1 to 2 hour of Discussion per week for 15 weeks.**Prerequisites:** 100A, or consent of instructor.

A second-year course in Vietnamese vocabulary and syntax with intensive drills on short colloquial expressions and auditory recognition of speech patterns. First semester course stresses phraseology, sentence building, rules of composition and development of students' communicative skills. By the end of the second semester students will learn to speak and write simple compositions and will have a cursory introduction to Vietnamese literature and sample readings from contemporary Vietnamese writers. Final exam required. Formerly known as Vietnamese 100B.

VIETNMS 101A Advanced Vietnamese 3 Units**Department:** Vietnamese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 100B or equivalent.

This course is designed for students who have already achieved an intermediate degree of proficiency in speaking, reading, and writing modern Vietnamese. Objective: to move students toward a greater level of fluency in each of these key areas and provide an introduction to the literature and culture of Vietnam by reading Vietnamese language texts. Readings will vary from semester to semester and will include novels, short stories, poetry, and essays from the classical, colonial, post-colonial, and contemporary periods. Topics to be addressed in class are the nature of the Sino-Vietnamese classical tradition; cultural legacies of French colonialism; the regional character of literary and cultural production; the emergence of a distinctive Vietnamese modernity, and the history of Vietnamese gender norms and relations. Regular attendance and participation in classroom activities is mandatory and no English will be spoken in class.

Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam required.

VIETNMS 101B Advanced Vietnamese 3 Units**Department:** Vietnamese**Course level:** Undergraduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** 101A or equivalent.

A continuation of 101A, with the goal of conversational fluency, advanced reading competence, and facility in writing. This course also provides an introduction to the literature and culture of Vietnam through a close reading of Vietnamese language texts. Readings will vary from semester to semester and will include novels, short stories, poetry, and essays from the classical, colonial, and contemporary periods. Among the topics to be addressed in class are the nature of the Sino-Vietnamese classical tradition, the cultural legacies of French colonialism, the regional character of literary and cultural production, the emergence of a distinctive Vietnamese modernity, and the history of Vietnamese gender norms and relations. Regular attendance and participation in classroom activities is mandatory and no English will be spoken in class.

Course may be repeated for credit with consent of instructor. Course may be repeated for credit when topic changes. Final exam required.

Vision Science (VIS SCI)

VIS SCI 24 Freshman Seminars 1 Unit

Department: Vision Science

Course level: Undergraduate

Terms course may be offered: Fall and spring

Grading: The grading option will be decided by the instructor when the class is offered.

Hours and format: 1 hour of Seminar per week for 15 weeks.

The Freshman Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Freshman seminars are offered in all campus departments, and topics vary from department to department and semester to semester. Enrollment limited to 15 freshmen.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

VIS SCI 39 Freshman and Sophomore Seminar 1.5 - 3 Units

Department: Vision Science

Course level: Undergraduate

Term course may be offered: Fall

Grading: Offered for pass/not pass grade only.

Freshman and sophomore seminars offer lower division students the opportunity to explore an intellectual topic with a faculty member and a group of peers in a small seminar setting. These seminars are offered in all campus departments; topics vary from department to department and from semester to semester. Enrollment limits are set by the faculty but the suggested limit is 25.

Course may be repeated for credit when topic changes. Final exam not required.

VIS SCI 84 Sophomore Seminar 1 or 2 Units

Department: Vision Science

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: The grading option will be decided by the instructor when the class is offered.

Hours and format: 1 hour of seminar per week per unit for 15 weeks. 1 and 1 half hours of seminar per week per unit for 10 weeks. 2 hours of seminar per week per unit for 8 weeks. 3 hours of seminar per week per unit for 5 weeks.

Prerequisites: At discretion of instructor.

Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

VIS SCI 199 Supervised Independent Study and Research 1 - 4 Units

Department: Vision Science

Course level: Undergraduate

Terms course may be offered: Fall, spring and summer

Grading: Offered for pass/not pass grade only.

Hours and format: Zero hours of Independent study per week for 15 weeks. 1.5 to 7.5 hours of Independent study per week for 8 weeks.

Prerequisites: Upper division status and consent of instructor, the student's major adviser and the departmental chair.

Supervised independent study and research. Enrollment restrictions apply; see the Introduction to Courses and Curricula section of this catalog.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

VIS SCI 201A Seminar in Vision Science 2 Units

Department: Vision Science

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 2 hours of Seminar per week for 15 weeks.

Prerequisites: Consent of instructor.

Graduate seminar in vision science.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam required.

VIS SCI 201B Seminar in Vision Science 2 Units

Department: Vision Science

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: 2 hours of Seminar per week for 15 weeks.

Prerequisites: Consent of instructor.

Graduate seminar in vision science.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

VIS SCI 203A Geometric Optics 4 Units

Department: Vision Science

Course level: Graduate

Terms course may be offered: Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass.

Hours and format: 3 hours of Lecture, 2 hours of Laboratory, and 1 hour of Discussion per week for 15 weeks.

Geometrical methods applied to the optics of lenses, mirrors, and prisms. Thin lens eye models, magnification, astigmatism, prism properties of lenses, thick lenses.

Final exam required. Formerly known as 101.

VIS SCI 203B Optical System and Physical Optics 4 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture, 2 hours of Laboratory, and 1 hour of Discussion per week for 15 weeks.**Prerequisites:** 203A.

Principles of optical systems, principles and clinical applications of apertures and stops, aberrations and optical instruments. Optics of the eye. Selected topics in physical optics, diffraction, interference, polarization.

Final exam not required. Formerly known as 102.

VIS SCI 205 Visual Perception Sensitivity 4.5 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3.5 hours of Lecture and 2 hours of Laboratory per week for 15 weeks.

Psychophysical basis for clinical tests in acuity, perimetry, and color vision. The visual stimulus and photometry. Visual receptors.

Psychophysical method and visual threshold. Light sensitivity. Contrast sensitivity. Light and dark adaptation. Temporal and spatial properties of visual function. Color vision and abnormalities. Changes with age and disease. Visual illusion. Basis for advanced diagnostic procedures.

Final exam required. Formerly known as 104.

VIS SCI 206A Anatomy and Physiology of the Eye 2 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 7.5 weeks.

This course focuses on the anatomy and physiology of the eyeball.

Overview of the gross anatomy of the eye followed by eye-relevant cellular and molecular biology. Cellular and molecular details of structure and function of each of the various non-neural components.

Final exam required. Instructors: Gong, Fleiszig

VIS SCI 206B Anatomy and Physiology of the Eye and Visual System 3 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2.5 hours of lecture .5 hour of laboratory per week.**Prerequisites:** ViS Sci 206A.

Structure and function of the tissues of the eye, ocular appendages, and the central visual pathways. Basic concepts of physiological, neurological, embryological, and immunological processes as they relate to the eye and vision. Foster an appreciation of the pathophysiology of various disease processes. Convey the importance of anatomy and physiology in the medical approach to ocular disease processes.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required.

VIS SCI 206C Anatomy and Physiology of the Eye and Visual System 2 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Course may be repeated for credit only if failed the first time.**Prerequisites:** 206A-206B.

Problem-based learning approach using clinical case examples.

Continuation of 206A-206B.

Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as 106C.

VIS SCI 206D Neuroanatomy and Neurophysiology of the Eye and Visual System 2 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 4 hours of Lecture per week for 7.5 weeks.**Prerequisites:** 206A (must be taken concurrently).

Structure and function of the neurosensory retina, photoreceptors, RPE including blood supply. Current concepts of etiology and management of major retinal conditions. Overview of diagnostic techniques in retinal imaging, electrophysiologic testing and new genetic approaches.

Structure and function of the early visual pathway including retinal ganglion cells, optic nerves, lateral geniculate nucleus and visual cortex. Pupillary responses. Specialization in the visual cortex.

Final exam required. Formerly known as half of 206A. Instructors:

Flannery, Freeman

VIS SCI 212A Optics and Dioptrics of the Eye 2 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks plus library assignments.**Prerequisites:** Consent of instructor.

Introduction for graduate students to basic principles of classic and modern geometric optics (thick lens systems, mirrors, prisms, apertures, and stops) and physical optics (interference, diffraction, and polarization) with emphasis on dioptrics of the human eye (including schematic eyes, aberrations, and entoptic phenomena).

Final exam required.

VIS SCI 212B Visual Neurophysiology and Development 2 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks plus library assignment.**Prerequisites:** Consent of instructor.

Introduction for graduate students. Visual pathways will be considered from retina to lateral geniculate to visual cortex. Basic organization at each stage will be covered. Primary focus will be studies of receptive field characteristics and associated visual function. Development and plasticity of the same visual pathways will also be covered. Evidence and implications will be explored from controlled rearing procedures and studies of abnormal visual exposure.

Final exam required.

VIS SCI 212D Anatomy and Vegetative Physiology of the Eye 2 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** Consent of instructor.

Introduction for graduate students to a general survey of the orbit, anterior and posterior segment of the eye, extraocular muscles, and neuroanatomy of the eye. Vegetative physiology of the cornea and tear film, aqueous humor, crystalline lens, vitreous humor, epithelial tissue (iris, ciliary body and retina), and photochemistry.

Final exam required.

VIS SCI 212E Color Vision and Visual Sensitivity 2 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture per week for 5 weeks.**Prerequisites:** Consent of instructor.

Introduction for graduate students to sensory aspects of light and color vision including: psychophysical methods, spectral response of the eye, mechanisms of sensitivity control, dark adaptation, color discrimination, mechanisms of normal and defective color vision.

Final exam not required.

VIS SCI 212F Spatial and Binocular Vision, Eye Movements, and Motion Perception 2 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of lecture and library assignments per week for 5 weeks.**Prerequisites:** Consent of instructor.

Introduction for graduate students to human spatial vision including contrast sensitivity, visual acuity, and spatial localization. Introduction to eye movements, motion perception, and motor and sensory aspects of binocular vision including pursuit, vergence, and saccadic eye movements, accommodation, stereopsis, and binocular space perception. Perception of real and apparent motion.

Final exam not required. Instructors: Banks, Malik, Schor

VIS SCI 212G Molecular Genetics of Vertebrate Eye Development and Diseases 2 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 5 weeks.**Prerequisites:** Graduate student in vision science or consent of instructor in charge.

The primary focus of this course is to teach the molecular basis of vertebrate eye development and related disease. This course will cover some of the basic principles of molecular and cell biology, commonly used techniques and experimental approaches, as well as the biological mechanisms for vertebrate eye development and related eye diseases. Recent progress in identifying important ocular genes and the approaches used to identify them will be discussed.

Final exam not required. Instructor: Gong

VIS SCI 215 Visual System Development 2 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** 206B.

Development of the eye and visual system. Normal development of the eye, retina, and central visual pathways. Effects of visual deprivation. Assessment of optical and visual function in human infants. Refraction and refractive error in infants and children. Development of visuomotor function, spatial vision, color vision, binocular vision, and depth perception.

Final exam required. Formerly known as 115.

VIS SCI 217 Oculomotor Functions and Neurology 2 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1.5 hours of Lecture and 10 hours of Laboratory per week for 15 weeks.**Prerequisites:** 203B or consent of instructor.

Neuro-anatomical pathways for the control of eye position and movement; gaze holding, image stabilization and tracking eye movement systems; oculomotor signs of disorders of the central nervous system (palsies, nystagmus, oculomoplegia, cog-wheel pursuits, saccadic dysmetria); the near visual-motor response and the synergistic coupling of accommodation and convergence; binocular misalignment (heterophoria and fixation disparity); and presbyopia.

Final exam not required. Formerly known as 117.

VIS SCI 219 Binocular Vision and Space Perception 2 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1.5 hours of Lecture and 10 hours of Laboratory per week for 15 weeks.**Prerequisites:** 203A-203B.

Perception of space, direction, and distance. Binocular retinal correspondence, horopters, differential magnification effects and anomalies of binocular vision development. Sensory vision, local stereopsis, static and dynamic stereopsis, binocular depth cues.

Final exam not required. Formerly known as 118.

VIS SCI 230 Ethics in Scientific Research 2 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Thirty hours of seminar per semester.

This seminar will examine a range of ethical issues that arise in the process of doing science. Beginning with the philosophical and social foundations, we will consider the pathogenesis of fraud, statistics and deception, the ethics of authorship and publication, research with human subjects, the use of animals, the definition(s) of misconduct and the difference between misconduct and questionable research practices, the relationship between industry and science, and finally, the responsibilities and obligations of the scientist in society.

Final exam required.

VIS SCI 262 Visual Cognitive Neuroscience 2 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 2 hours of Lecture per week for 15 weeks.**Prerequisites:** Consent of instructor.

The course will provide an overview of visual cognitive neuroscience, drawing from neuroanatomy, neurophysiology in humans and animal models, psychophysics, neuroimaging, neuropharmacology, neuropsychology, and computational models of vision and cognition. Topics will include basic anatomy and physiology of the mammalian visual system, motion perception and processing, depth perception and representation of visual space, brightness and color, object and face recognition, visual attention, developmental and adult plasticity, perceptual learning, multisensory integration, and visual awareness. Course may be repeated for credit. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Silver

VIS SCI 265 Neural Computation 3 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Calculus, differential equations, basic probability and statistics, linear algebra, and familiarity with high level programming languages such as Matlab.

This course provides an introduction to the theory of neural computation. The goal is to familiarize students with the major theoretical frameworks and models used in neuroscience and psychology, and to provide hands-on experience in using these models. Topics include neural network models, supervised and unsupervised learning rules, associative memory models, probabilistic/graphical models, and models of neural coding in the brain.

Final exam not required. Instructor: Olshausen

VIS SCI C265/NEUROSC C265 Neural Computation 3 Units**Department:** Vision Science; Neuroscience**Course level:** Graduate**Terms course may be offered:** Fall and spring. Offered even-numbered years.**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Calculus, differential equations, basic probability and statistics, linear algebra, and familiarity with high level programming languages such as Matlab.

This course provides an introduction to the theory of neural computation. The goal is to familiarize students with the major theoretical frameworks and models used in neuroscience and psychology, and to provide hands-on experience in using these models. Topics include neural network models, supervised and unsupervised learning rules, associative memory models, probabilistic/graphical models, and models of neural coding in the brain.

Final exam not required. Instructor: Olshausen

VIS SCI C280/COMPSCI C280 Computer Vision 3 Units**Department:** Vision Science; Computer Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture per week for 15 weeks.**Prerequisites:** Knowledge of linear algebra and calculus. Mathematics 1A-1B, 53, 54 or equivalent.

Paradigms for computational vision. Relation to human visual perception. Mathematical techniques for representing and reasoning, with curves, surfaces and volumes. Illumination and reflectance models. Color perception. Image segmentation and aggregation. Methods for bottom-up three dimensional shape recovery: Line drawing analysis, stereo, shading, motion, texture. Use of object models for prediction and recognition. Final exam required. Instructor: Malik

VIS SCI 298 Group Studies, Seminars, or Group Research 1 - 6 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall and spring**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 1 to 4 hours of lecture per week.

Group studies of selected topics. Advanced studies in various subjects through special seminars on topics to be selected each year, informal groups studying special problems, group participation in experimental problems and analysis.

Final exam not required.

VIS SCI 299 Research in Vision Science 1 - 12 Units**Department:** Vision Science**Course level:** Graduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** Hours varied.**Prerequisites:** Consent of instructor. Research.

Final exam not required.

VIS SCI 300 Teaching Methods in Vision Science 1 Unit**Department:** Vision Science**Course level:** Professional course for teachers or prospective teachers**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** 1 hour of class every other week.**Prerequisites:** Graduate standing in vision science.

Instruction in teaching methods and materials, in vision science and optometry; practice teaching in classrooms and laboratory.

Course may be repeated for credit when topic changes. Final exam not required. Instructor: Silver

VIS SCI 601 Individual Study for Master's Students 1 - 6 Units**Department:** Vision Science**Course level:** Graduate examination preparation**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks.**Prerequisites:** Consent of instructor.

Individual study for the comprehensive requirements in consultation with the adviser in vision science.

Course does not satisfy unit or residence requirements for master's degree. Final exam required.

VIS SCI 602 Individual Study for Doctoral Students 1 - 6 Units**Department:** Vision Science**Course level:** Graduate examination preparation**Terms course may be offered:** Fall and spring**Grading:** Offered for satisfactory/unsatisfactory grade only.**Hours and format:** Zero hours of Independent study per week for 15 weeks.**Prerequisites:** Consent of instructor.

Individual study in consultation with the adviser in vision science, intended to provide an opportunity for qualified students to prepare themselves for the various examinations required for the Ph. D.

Course does not satisfy unit or residence requirements. Final exam required.

Visual Studies (VIS STD)

VIS STD 180A Introduction to Visual Studies: Word and Image 4 Units**Department:** Visual Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: Thirty hours lecture and 90 hours studio per semester.**Prerequisites:** Environmental Design 11A-11B or consent of instructor; A is prerequisite to B.

Projects in graphic form, color, and word-image relationships.

Final exam not required.

VIS STD 180B Introduction to Visual Studies: Word and Image 4 Units**Department:** Visual Studies**Course level:** Undergraduate**Terms course may be offered:** Fall and spring

Grading: Letter grade. Qualified students may select to take this course pass/not pass. This is part one of a year long series course. A provisional grade of IP (in progress) will be applied and later replaced with the final grade after completing part two of the series.

Hours and format: Thirty hours lecture and 90 hours studio per semester.**Prerequisites:** Environmental Design 11A-11B or consent of instructor; A is prerequisite to B.

Projects in graphic form, color, and word-image relationships.

Final exam not required.

VIS STD 181 Introduction to Photography 4 Units**Department:** Visual Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 3 hours of Lecture and 3 hours of Laboratory per week for 15 weeks. 6 hours of Lecture and 6 hours of Laboratory per week for 8 weeks.

This course will use the visual vocabulary of the digital camera as a way to record, respond and create. Students will gain technical mastery over the camera, image workflow, image editing, printing, and other forms of presentation. Exposure to the history and to the most current trends of the medium will broaden students' understanding of how photographs speak. Topics of discussion will include lighting, timing, creating a sense of place, and building a narrative structure. Final exam not required.

VIS STD 185X Selected Topics: Word and Image: Special Topics:**Word and Image 1 - 4 Units****Department:** Visual Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours lecture/seminar per unit per semester.**Prerequisites:** Environmental Design 11A-11B.

Studio sections in areas such as calligraphy, the history of letter forms, and typography. For current offerings see the departmental announcement.

Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam not required.

VIS STD 186A Selected Topics: Photography: Documentary Photography 3 Units**Department:** Visual Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours of lecture/seminar or 60 hours of studio/laboratory per unit per semester.**Prerequisites:** 181

Studio sections in Photography as an Art Form, Documentary Photography, Light and Motion Studies, Artificial Lighting Photography. For current section offerings see departmental announcement. Course may be repeated for credit when topic changes. Final exam not required. Instructor: Benton

VIS STD 186B Selected Topics: Photography: Photography As an Art Form 1 - 4 Units**Department:** Visual Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 7.5 hours of studio per week for 8 weeks. 7.5 hours of studio per week for 8 weeks. 7.5 hours of studio per week for 8 weeks.**Prerequisites:** 181

Studio sections in Photography as an Art Form, Documentary Photography, Light and Motion Studies, Artificial Lighting Photography. For current section offerings see departmental announcement. Course may be repeated for credit when topic changes. Final exam not required. Formerly known as 186C.

VIS STD 186X Selected Topics: Photography: Special Topics: Photography 1 - 4 Units**Department:** Visual Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours of lecture/seminar or 60 hours of studio/laboratory per unit per semester.

Studio sections in Photography as an Art Form, Documentary Photography, Light and Motion Studies, Artificial Lighting Photography. For current section offerings see departmental announcement. Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes. Final exam required.

VIS STD 187A Selected Topics: Drawing: Freehand Drawing 1 - 4 Units**Department:** Visual Studies**Course level:** Undergraduate**Terms course may be offered:** Fall, spring and summer**Grading:** Letter grade. Qualified students may select to take this course pass/not pass.**Hours and format:** 15 hours lecture/seminar or 60 hours studio/laboratory per unit per semester.**Prerequisites:** Environmental Design 11A-11B.

Course may be repeated for credit when topic changes. Final exam not required.
