

# Integrative Biology

---

## Overview

The Department of Integrative Biology offers a program of instruction that focuses on the integration of structure and function that influences the biology, ecology, and evolution of organisms. It investigates integration at all levels of organization from molecules to the biosphere and in all branches of the tree of life: plants, animals, fungi, and microbes.

The department draws from many traditional and emerging fields and levels of biological organization in forging new research directions and answering traditional questions in new ways. The faculty has special strengths in the disciplines of functional morphology, organismal physiology, animal behavior, biomechanics, ecology, systematic biology, paleobiology, population genetics, and evolution.

## Research Facilities

**The Botanical Garden**, located on 34 acres in Strawberry Canyon, provides opportunities for research with living plants, supplies teaching material for classes on campus, and serves as an outdoor laboratory for students. Independent student and internship opportunities are available in horticulture and plant conservation. The garden is organized primarily by geographic region: California, South America, Mexico/Central America, South Africa, Australasia, Mediterranean, Eastern North America, and Asia. Specialized collections include succulents and cacti, carnivorous plants, orchids, ferns, roses, tropical plants, a Chinese medicinal herb garden, and an herb garden. Laboratory and greenhouse facilities are available at the Botanical Garden Plant Conservation Research Center. For further information about events, programs, and opportunities, visit the Botanical Garden website. (<http://botanicalgarden.berkeley.edu>) Inquiries can be addressed to the director by mail at UC Botanical Garden, 200 Centennial Drive #5045, Berkeley, CA 94720-5045, by email to [garden@berkeley.edu](mailto:garden@berkeley.edu), or by phone at 510-643-2755.

**The Cancer Research Laboratory (CRL)** is a research institute on the Berkeley campus that carries on a research, teaching, and service program designed to foster interdepartmental participation in cancer research. The central research program represents a multidisciplinary approach to an understanding of the mechanism of neoplastic transformation using a variety of systems. Graduate student and postdoctoral research programs are supported in various areas of tumor biology: biochemistry, cell biology, endocrinology, genetics, immunology, molecular biology, and tumor virology. Currently, CRL provides advanced technical resources to cancer and biomedical researchers in the areas of advanced microscopy, flow cytometry, gene targeting/transgenic mouse technology, human stem-cell facility, and an infectious disease facility. Instrumentation in the facilities is operated by highly-trained staff who offer instruction in the methods and techniques associated with each facility. For more information, visit the CRL website (<http://crl.berkeley.edu>).

**The Center for Interdisciplinary Bio-Inspiration in Education and Research (CIBER)** has been established to lead in the development of a new field of Integrative Systems Biomechanics that moves biology toward greater integration with other disciplines such as physics, mathematics, and engineering to a degree not seen before. The discipline focuses on the physics of how organisms function and interact with their environment. The goal is to discover basic physical principles that can be applied to a diversity of organisms and unique innovations. The fluid and

solid mechanics of organisms are examined using direct experimentation, comparative and phylogenetic approaches, and both mathematical and physical modeling. Using this approach, the next generation of scientists and engineers will gain experience in collaboration across disciplines, as well as how to extract principles in biology that inspire novel design in engineering. In addition to developing innovative methods of teaching and research, CIBER has established an interdisciplinary teaching laboratory that allows students in undergraduate as well as graduate courses to address challenging problems that will give them a meaningful interdisciplinary learning experience. These facilities are being used in a number of existing and new courses at both the undergraduate and graduate levels. For more information on CIBER, visit their website. (<http://ciber.berkeley.edu>)

**The Center for Stable Isotope Biogeochemistry (CSIB)**, located on campus, is an analytical facility established as a University education, research, training, and service unit. The center provides high-precision, state-of-the-art instrumentation for analyzing the stable isotope composition of a diverse array of materials (e.g., plant and animal tissue samples, soils, atmospheric gasses, water, specific compounds, organic matter, etc.), as well as space for purifying, extracting, and preparing sample material for analysis. The center also serves as a focal point for research and training for many programs at Berkeley (e.g., in Biology, Ecology, Paleontology, Anthropology, Geography, Chemistry, Hydrology, Atmospheric, and Soil Sciences). The specialized equipment housed in the facility serves a broad range of student, postdoctoral, and faculty needs. This equipment includes several gas phase isotope ratio mass spectrometers (IRMS); these mass spectrometers have the capabilities of analyzing the isotopic composition of hydrogen, carbon, oxygen, nitrogen, and sulfur in biological and geological samples, gases (biogenic and atmospheric), and water. In addition to the instrument laboratory, the center houses a fully-equipped sample extraction and preparation laboratory for handling a full range of sample types. For more information, visit the CSIB website. (<http://ib.berkeley.edu/groups/biogeochemistry.html>)

**The Field Station for Behavioral Research** is a research institute that supports behavioral studies on animals under natural and seminatural conditions. Situated on 20 acres of wooded hillside at the top of Strawberry Canyon two miles from the central campus, the field station maintains and observes a variety of animal species. Faculty from several Berkeley departments including Integrative Biology conduct research at the station. Its facilities are available for graduate and postdoctoral research with the approval of the director. People interested in the field station may contact the director via the Department of Integrative Biology.

**The Gump South Pacific Research Station, French Polynesia**, is located on Moorea (17° 30' S 149° 50' W), one of the Society Islands, 15 km northwest of the main island of Tahiti. Moorea offers diverse habitats ranging from coral reefs, lagoons, coastal beaches, freshwater streams, wetlands, and mountain forests. The Gump Station occupies 14 hectares (35 acres) of land from the shore to 149m (489 ft.) at the entrance to Cook's Bay, providing excellent access to the ocean, lagoon, and island interior. A range of housing options (shared dormitories or private bungalows) and laboratories allow long- and short-term research and education in a diversity of fields, including marine, freshwater, and terrestrial biology; evolutionary and conservation biology; archaeology; anthropology; ethnobotany; geology; and geomorphology. Facilities include boats and 4WD vehicles. A waterfront marine laboratory contains an open seawater system and equipment for UC Scientific Diving. A large climate-controlled research building contains offices, library/conference room, and several laboratories including space for morphological work (high-quality microscopes) and molecular genetic analyses. The

station is connected to the Internet via multiple ADSL lines and has WiFi access in all common areas. For further information, contact Dr. Neil Davies, Executive Director at [ndavies@moorea.berkeley.edu](mailto:ndavies@moorea.berkeley.edu) ([ndavies@nature.berkeley.edu](mailto:ndavies@nature.berkeley.edu)). More information can be found on the station's website. (<http://moorea.berkeley.edu>)

**The Human Evolution Research Center (HERC)** is dedicated to the study of human origins and evolution. HERC represents an international focal point for field and laboratory research and education. It is a center for the study of the process and products of human evolution. Research by HERC includes both field and laboratory investigation. The center's collections and facilities provide support to faculty and students working on important, large-scale investigations. These include The Middle Awash Project and The Revealing Hominid Origins Initiative (RHOI). For more information on HERC and RHOI, visit the HERC website (<http://herc.berkeley.edu>) and the RHOI website (<http://rhoi.berkeley.edu>).

**The Jane Gray Research Greenhouse** is operated by the Department of Integrative Biology and comprises approximately 2,400 square feet of state-of-the-art research space used for projects by faculty and students. The climate management system is computer-controlled and monitors temperature, humidity, light energy, and wind speed and direction. The system's responses to these conditions can be controlled centrally or from a remote location through an on-screen ARGUS interface to gas heaters, evaporative coolers, vents, fans, and sunshades. The facility provides an ideal resource for plant growth investigations that require closely controlled and monitored conditions. For more information, visit the greenhouse's website. (<http://ib.berkeley.edu/jrg/facilities/greenhouse>)

**The Museum of Paleontology (UCMP)**, a research institute for faculty, staff, students, and qualified visiting scholars, has one of the largest collections of fossil protists, invertebrates, plants, and vertebrates in the nation, as well as large collections of modern vertebrate skeletal elements and invertebrates. The collection is worldwide in scope and especially strong in materials from western North America. Research activities include systematic, paleobiogeographic, paleoecologic, biostratigraphic, evolutionary, and theoretical paleobiologic studies. Fieldwork on all continents by researchers and students associated with the museum continues to sustain substantial collection growth. Special facilities include molecular biology and fossil preparation laboratories, as well as specialized laboratories for microfossils, pollen, and cast production.

UCMP has an active education and outreach program which uses the web as its primary venue for sharing science with a broader audience. The UCMP website (<http://www.ucmp.berkeley.edu>) contains a wealth of information on evolution, paleontology, systematics, and associated sciences, as well as access to collections data and specimen images. Requests for use of the collections or facilities should be mailed to the Director, Museum of Paleontology, Valley Life Sciences Building, University of California, Berkeley; Berkeley, CA 94720.

**The Museum of Vertebrate Zoology** is an Organized Research Unit affiliated with the Department of Integrative Biology and the Berkeley Natural History Museums. It was established in 1908 and has grown to be one of the largest and most important collections of amphibians, reptiles, birds, and mammals in the world. The museum has no public exhibits; it is primarily a research organization and a center for graduate and postdoctoral education. The museum's space in the Valley Life Sciences Building includes all of the collections as well as administrative and research offices for faculty, postdoctoral, and graduate students. In addition, there are laboratories for molecular genetics and biodiversity

informatics. Research activities center on problems in evolutionary biology, with an emphasis on systematics, ecology, functional and developmental morphology, behavior, population and conservation biology, and biogeography. Integration of field and laboratory methods is encouraged. For more information, write to the Director, Museum of Vertebrate Zoology, UC Berkeley; Berkeley, CA 94720, or for the Hastings Reservation, write to Dr. Mark Stromberg, Carmel Valley, CA 93925. More information can be found on the museum's website. (<http://mvz.berkeley.edu>)

**The University and Jepson Herbaria** offer a worldwide reference-research collection, laboratories, archive, and library that form a foundation for basic research in systematic botany, ecology, phytogeography, evolution, and comparative genomics. These resources are available not only to faculty, staff, and students but also to visiting scholars and biologists throughout the United States and other countries. Resources include the following:

1. The collection itself, more than 2.2 million specimens with special strengths in the angiosperm flora of California and elsewhere around the Pacific Rim as well as in cryptogamic groups including ferns, bryophytes, fungi, and algae.
2. Modern laboratories for all types of plant studies ranging from morphology/anatomy to molecular systematics.
3. Extensive electronic resources, including an online flora of California and interface for accessing electronic records from all California herbaria, the world's standard index of algal nomenclature, to the tree of life for green plants.

Visit the website (<http://ucjeps.berkeley.edu>) at for more information. Inquiries should be addressed to: Director, University and Jepson Herbaria, University of California, Berkeley; Berkeley, CA 94720.

**The University of California Natural Reserve System (NRS)** was founded in 1965 to establish and maintain significant examples of California's diverse aquatic and terrestrial ecosystems for university-level teaching, research, and public service. The 33 reserves are open to all qualified individuals and institutions for scholarly work in disciplines ranging from geology and environmental sciences to anthropology and art. For more information on the NRS, contact the UC Office of the President at 510-987-0150, or visit the UC Office of the President website (<http://nrs.ucop.edu>). For specific information regarding the four reserves administered by the Berkeley campus, contact faculty reserve manager Mary Power at 510-643-7776 or [mepower@berkeley.edu](mailto:mepower@berkeley.edu). The Berkeley campus administers the following four reserves:

- **The Angelo Coast Reserve** in Mendocino County is one of the most diverse reserves, with 26 terrestrial and four aquatic habitat types. Located along a belt of highly-deformed, well-defined coastal ridges cut by the South Fork of the Eel River, the reserve contains the largest virgin Douglas fir community left in the state as well as four undisturbed watersheds. It is part of the UNESCO California Coast Ranges Biosphere Reserve. For more information, contact Peter Steel at 707-984-6653 or [psteel@nature.berkeley.edu](mailto:psteel@nature.berkeley.edu).
- **The Chickering American River Reserve** in Placer County is located in the sub-alpine headwaters basin of the North Fork of the American River. The reserve has diverse topography, soil, and moisture regimes on sedimentary, igneous, and metamorphic substrates. It supports approximately 1,000 plant species, unusual red fir and mixed-conifer old-growth forest communities, and a variety of large mammals. Long-term research continues on the

endangered wolverine. For more information, contact James Kirchner at 510-643-8559 or kirchner@geomorph.berkeley.edu .

- **The Hans Jenny Pygmy Forest Reserve** in Mendocino County supports elfin forests of endemic pygmy cypress, bishop pine, and unusual evergreen shrub species on highly podsolized old marine terrace soils. This reserve is adjacent to lands managed by The Nature Conservancy. For more information, contact Ronald G. Amundson at 510-643-7890 or earthy@nature.berkeley.edu. (earthy@nature.berkeley.edu)
- **The Hastings Natural History Reserve** in Monterey County contains a representative sample of California's interior Coast Range ecosystem with annual and perennial grasslands, oak woodlands, chaparral, and running streams. The reserve has 620 vascular plant species and 166 bird species. While noted for its 50-year research history on vertebrate ecology and oak woodland biology, the reserve is also conducting important research on native grassland restoration. For more information, contact Mark Stromberg at 831-659-2664 or stromber@berkeley.edu. (stromber@berkeley.edu)

## Integrative Biology

### INTEGBI C13 Origins: from the Big Bang to the Emergence of Humans 4 Units

Terms offered: Fall 2016, Fall 2014, Fall 2013

This course will cover our modern scientific understanding of origins, from the Big Bang to the formation of planets like Earth, evolution by natural selection, the genetic basis of evolution, and the emergence of humans. These ideas are of great intrinsic scientific importance and also have far reaching implications for other aspects of people's lives (e.g., philosophical, religious, and political). A major theme will be the scientific method and how we know what we know.

Origins: from the Big Bang to the Emergence of Humans: Read More [+]

#### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 2 hours of discussion per week

#### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Marshall, Quataert

**Also listed as:** ASTRON C13

Origins: from the Big Bang to the Emergence of Humans: Read Less [-]

### INTEGBI 24 Freshman Seminars 1 Unit

Terms offered: Spring 2018, Fall 2017, Spring 2017

The Berkeley Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Berkeley Seminars are offered in all campus departments, and topics vary from department to department and semester to semester.

Freshman Seminars: Read More [+]

#### Rules & Requirements

**Repeat rules:** Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes.

#### Hours & Format

**Fall and/or spring:** 15 weeks - 1 hour of seminar per week

#### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** The grading option will be decided by the instructor when the class is offered. Final exam required.

Freshman Seminars: Read Less [-]

### INTEGBI 31 The Ecology and Evolution of Animal Behavior 3 Units

Terms offered: Spring 2017, Spring 2016, Spring 2014

Principles of evolution biology as they relate to animal behavior and behavioral ecology with broad coverage of animal groups. Special attention will be paid to the emerging discipline of behavioral ecology.

The Ecology and Evolution of Animal Behavior: Read More [+]

#### Rules & Requirements

**Prerequisites:** Open to all students; designed for those not specializing in biology

**Credit Restrictions:** Students will receive no credit for Integrative Biology 31 after taking Integrative Biology 144, C144 or Psychology C115B.

#### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture, 1 hour of demonstration, and 1 hour of discussion per week

#### Summer:

6 weeks - 5 hours of lecture, 5 hours of demonstration, and 5 hours of discussion per week

8 weeks - 4 hours of lecture, 2 hours of demonstration, and 2 hours of discussion per week

#### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

The Ecology and Evolution of Animal Behavior: Read Less [-]

## INTEGBI C32 Bioinspired Design 3 Units

Terms offered: Spring 2018, Spring 2017

Bioinspired design views the process of how we learn from Nature as an innovation strategy translating principles of function, performance and aesthetics from biology to human technology. The creative design process is driven by interdisciplinary exchange among engineering, biology, art, architecture and business. Diverse teams of students will collaborate on, create, and present original bioinspired design projects. Lectures discuss biomimicry, challenges of extracting principles from Nature, scaling, robustness, and entrepreneurship through case studies highlighting robots that run, fly, and swim, materials like gecko-inspired adhesives, artificial muscles, medical prosthetic devices, and translation to start-ups.

Bioinspired Design: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Open to all students

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture and 1 hour of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Full

**Formerly known as:** Integrative Biology 32

**Also listed as:** L & S C30Z

Bioinspired Design: Read Less [\[-\]](#)

## INTEGBI N33 Topics in Paleontology: The Age of Dinosaurs 2 Units

Terms offered: Summer 1996 10 Week Session

Open without prerequisite to all students and designed for those not specializing in paleontology. Evolution history, and ecology of the dinosaurs and their world, including the earliest mammals and birds. Topics in Paleontology: The Age of Dinosaurs: Read More [\[+\]](#)

### Rules & Requirements

**Repeat rules:** More than one course in this series may be taken for credit with consent of instructor. Course may be repeated for credit when topic changes.

### Hours & Format

**Summer:** 8 weeks - 4 hours of lecture per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

Topics in Paleontology: The Age of Dinosaurs: Read Less [\[-\]](#)

## INTEGBI 35AC Human Biological Variation 4 Units

Terms offered: Fall 2017, Summer 2017 8 Week Session, Fall 2016

This course addresses modern human biological variation from historical, comparative, evolutionary, biomedical, and cultural perspectives. It is designed to introduce students to the fundamentals of comparative biology, evolutionary theory, and genetics.

Human Biological Variation: Read More [\[+\]](#)

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Summer:** 8 weeks - 6 hours of lecture and 2 hours of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Alternative to final exam.

**Instructor:** Hlusko

Human Biological Variation: Read Less [\[-\]](#)

## INTEGBI 37 Topics in Paleontology: The Antecedents of Man 3 Units

Terms offered: Prior to 2007

. Open without prerequisite to all students and designed for those not specializing in paleontology. Survey the evolution, ecology, and history of the primate order. Special emphasis will be given to primate origins, geographic distribution, and the evolution of the human lineage.

Topics in Paleontology: The Antecedents of Man: Read More [\[+\]](#)

### Hours & Format

**Summer:** 8 weeks - 3 hours of lecture and 2 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam not required.

Topics in Paleontology: The Antecedents of Man: Read Less [\[-\]](#)

## INTEGBI 39C Topics in Integrative Biology 2 Units

Terms offered: Spring 2013, Spring 2012, Spring 2011

Reading and discussion of the literature on particular topics in the field of integrative biology. Term paper and oral presentation. Section topics will vary from semester to semester. Students should check with department secretary for each semester's offerings.

Topics in Integrative Biology: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Preferentially open to freshmen; consent of instructor

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Offered for pass/not pass grade only. Final exam required.

Topics in Integrative Biology: [Read Less](#) [-]

## INTEGBI 41 Marine Mammals 2 Units

Terms offered: Summer 2017 8 Week Session, Fall 2013, Fall 2012

A survey of marine mammal evolution, biology, behavior, ecology, and politics with a concentration on those species found in the North Pacific. Coverage would include: origin and evolution of cetaceans, pinnipeds, sirenians, and sea otters; basic biology and anatomy of marine mammal groups, and North Pacific species in particular; ecological interactions and role in nearshore and pelagic marine communities; and interactions between humans and marine mammals.

Marine Mammals: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Designed for those not specializing in Integrative Biology

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture per week

### Summer:

6 weeks - 5 hours of lecture per week

8 weeks - 4 hours of lecture per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

Marine Mammals: [Read Less](#) [-]

## INTEGBI 42 Primate Biology 3 Units

Terms offered: Summer 1996 10 Week Session

An introduction to the order of mammals of which we are members.

The niches of primates in modern ecosystems, their anatomical and behavioral specialization, and their role as indicator species in conservation. The mechanisms and variety of primate social organization compared with that of other animals.

Primate Biology: [Read More](#) [+]

### Rules & Requirements

**Credit Restrictions:** Open to all students but designed for those not specializing in biology.

### Hours & Format

**Summer:** 8 weeks - 6 hours of lecture per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

Primate Biology: [Read Less](#) [-]

## INTEGBI 77A Integrative Human Biology 1 Unit

Terms offered: Fall 2017

Each week a different Integrative Biology faculty member will give a one hour lecture on how their research field contributes to our understanding of human biology. The integration of the disciplines of evolution, ecology, paleontology, comparative physiology, and comparative anatomy in the study of how humans function in ecosystems illuminates our understanding of human biology. During each presentation, the faculty member will also inform students about IB courses they teach, research in their lab, and which Berkeley Natural History Museum they may be affiliated with. This course gives undergraduates an opportunity to learn about the spectrum of research and courses offered by the different IB faculty.

Integrative Human Biology: [Read More](#) [+]

### Rules & Requirements

**Credit Restrictions:** 77A and 77B may each be taken once for credit. Majors are required to take at least one semester of 77A OR 77B.

### Hours & Format

**Fall and/or spring:** 15 weeks - 1 hour of seminar per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Offered for pass/not pass grade only. Final exam required.

**Instructor:** Carlson

Integrative Human Biology: [Read Less](#) [-]

## INTEGBI 77B Integrative Human Biology 1 Unit

Terms offered: Spring 2018

Each week a different Integrative Biology faculty member will give a one hour lecture on how their research field contributes to our understanding of human biology. The integration of the disciplines of evolution, ecology, paleontology, comparative physiology, and comparative anatomy in the study of how humans function in ecosystems illuminates our understanding of human biology. During each presentation, the faculty member will also inform students about IB courses they teach, research in their lab, and which Berkeley Natural History Museum they may be affiliated with. This course gives undergraduates an opportunity to learn about the spectrum of research and courses offered by the different IB faculty.

## INTEGBI C82 Oceans 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

This course offers multidisciplinary approach to begin answering the question "Why are oceans important to us?" Upon a physical, chemical, and geologic base, we introduce the alien world of sea life, the importance of the ocean to the global carbon cycle, and the principles of ecology with a focus on the important concept of energy flow through food webs. Lectures expand beyond science to include current topics as diverse as music, movies, mythology, biomechanics, policy, and trade.

Oceans: Read More [+]

### Rules & Requirements

**Credit Restrictions:** Students will receive no credit for Earth and Planetary Science C82/Geography C82/Integrative Biology C82 after completing Integrative Biology 82 or Earth and Planetary Science N82.

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

### Summer:

6 weeks - 7.5 hours of lecture and 2.5 hours of discussion per week

8 weeks - 5.5 hours of lecture and 1.5 hours of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Also listed as:** EPS C82/GEOG C82

Oceans: Read Less [-]

## INTEGBI 84 Sophomore Seminar 1 or 2 Units

Terms offered: Spring 2018, Fall 2017, Fall 2014

Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Sophomore Seminar: Read More [+]

### Rules & Requirements

**Prerequisites:** At discretion of instructor

**Repeat rules:** Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes.

### Hours & Format

#### Fall and/or spring:

5 weeks - 3-6 hours of seminar per week

10 weeks - 1.5-3 hours of seminar per week

15 weeks - 1-2 hours of seminar per week

#### Summer:

6 weeks - 2.5-5 hours of seminar per week

8 weeks - 1.5-3.5 hours of seminar and 2-4 hours of seminar per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** The grading option will be decided by the instructor when the class is offered. Final exam required.

Sophomore Seminar: Read Less [-]

## INTEGBI 87 Introduction to Research Methods in Biology 2 Units

Terms offered: Summer 2014 8 Week Session, Summer 2013 8 Week Session, Summer 2012 8 Week Session

This course provides a functional understanding of hypothesis/data driven research and exposure to current approaches and methods in biological science. The lectures address foundational concepts of the scientific method, research ethics, scientific communication, and how to understand scientific literature. The labs provide exposure to faculty research and experimental methods. The course is geared to incoming freshmen, sophomores, and transfer students interested in learning more about research.

Introduction to Research Methods in Biology: Read More [+]

### Rules & Requirements

**Prerequisites:** Consent of instructor

### Hours & Format

**Summer:** 8 weeks - 1 hour of lecture, 1 hour of discussion, and 3 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam not required.

**Instructor:** Matsui

Introduction to Research Methods in Biology: Read Less [-]

## INTEGBI 88 Leadership Communications for Biology Scholars 1 Unit

Terms offered: Fall 2009, Fall 2008, Fall 2007

Leadership skills and abilities such as communication, collaboration, critical thinking, and resourcefulness are critical to academic, professional, and personal success. The need for enlightened leaders is evident in every aspect of health and science such as designing innovative health programs, obtaining funding, conducting cutting-edge research, developing and gaining support to implement policy solutions. This course provides an understanding of the principles of leadership and communications for students in the Biology Scholars Program. Students will nurture those traits in themselves and apply those principles in situations specifically related to the health and science sectors. Leadership Communications for Biology Scholars: Read More [+]

### Rules & Requirements

**Prerequisites:** Acceptance into Biology Scholars Program

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Hayes, Kim, Myrick

## INTEGBI 95 Special Research Project in Biology 1B 2 Units

Terms offered: Spring 2017, Fall 2016, Spring 2016

Students enrolled in Biology 1B can participate in special field research in addition to attending regular laboratory sections. Students work independently with minimal supervision. Students will learn how to develop a project, collect and record data, conduct and analyze experiments, write a report, and make an oral presentation. Project may require traveling to off-campus sites, and may include night or weekend work.

Special Research Project in Biology 1B: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Consent of instructor; selected by interview

### Hours & Format

**Fall and/or spring:** 15 weeks - 4 hours of fieldwork and 2 hours of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Offered for pass/not pass grade only. Final exam not required.

Special Research Project in Biology 1B: [Read Less](#) [-]

## INTEGBI 95B Lawrence Hall of Science Teaching Assistant 1 - 2 Units

Terms offered: Not yet offered

Enrollment into this course is for students interested in teaching science to children under the guidance of the Lawrence Hall of Science Instructors and Staff. As a LHS Teaching Assistant (TA), you will have the opportunity to assist with workshops serving grade school-aged children and to lead small discussion groups. The workshops consist of organismal biology related materials. You will undergo training in the Hall's Animal Discovery Room to ensure that you are prepared to support school and public programs scheduled in that space. There will also be opportunities to travel to nearby school districts to give presentations on the materials you work with.

Lawrence Hall of Science Teaching Assistant: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Students must be concurrently enrolled or have completed Biology 1B

### Hours & Format

**Fall and/or spring:** 15 weeks - 3-6 hours of fieldwork per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Offered for pass/not pass grade only. Final exam not required.

## INTEGBI C96 Studying the Biological Sciences 1 Unit

Terms offered: Fall 2017, Fall 2016, Fall 2015

Freshmen will be introduced to the "culture" of the biological sciences, along with an in-depth orientation to the academic life and the culture of the university as they relate to majoring in biology. Students will learn concepts, skills, and information that they can use in their major course, and as future science professionals. Restricted to freshmen in the biology scholars program.

Studying the Biological Sciences: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Consent of instructor

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Offered for pass/not pass grade only. Final exam required.

**Instructor:** Matsui

**Also listed as:** MCELLBI C96/PLANTBI C96

Studying the Biological Sciences: [Read Less](#) [-]

## INTEGBI 98 Directed Group Study 1 - 4 Units

Terms offered: Spring 2016, Fall 2015, Spring 2015

Lectures and small group discussions focusing on topics of interest, varying from semester to semester.

Directed Group Study: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Freshmen and sophomores only

**Repeat rules:** Course may be repeated for credit.

### Hours & Format

**Fall and/or spring:** 15 weeks - 1-4 hours of directed group study per week

### Summer:

6 weeks - 2.5-10 hours of directed group study per week

8 weeks - 1.5-7.5 hours of directed group study per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Offered for pass/not pass grade only. Final exam not required.

Directed Group Study: [Read Less](#) [-]

## INTEGBI 99 Supervised Independent Study and Research 1 - 3 Units

Terms offered: Spring 2015, Spring 2014, Fall 2013

Lower division independent study and research intended for the academically superior student. Enrollment only with prior approval of faculty adviser directing the research.

Supervised Independent Study and Research: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** GPA of 3.4 or greater

**Repeat rules:** Course may be repeated for credit.

### Hours & Format

**Fall and/or spring:** 15 weeks - 0 hours of independent study per week

### Summer:

6 weeks - 1-3 hours of independent study per week

8 weeks - 1-3 hours of independent study per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Offered for pass/not pass grade only. Final exam not required.

**Formerly known as:** Botany 99, Physiology 99, Anatomy 99

Supervised Independent Study and Research: Read Less [\[-\]](#)

## INTEGBI 100B Principles of Biodiversity 3 Units

Terms offered: Fall 2012, Spring 2002, Spring 2001

Biogeographic, temporal, and historical patterns of change in biological diversity; phylogenetics and systematics; processes involved in origin and extinction of taxa and floras/faunas; population structure and demography (including human populations); community processes and maintenance of diversity; ecosystem function; global change; human uses of and effects on biodiversity; conservation biology.

Principles of Biodiversity: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Biology 1B

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

Principles of Biodiversity: Read Less [\[-\]](#)

## INTEGBI C100 Communicating Ocean Science 4 Units

Terms offered: Spring 2018, Spring 2016, Spring 2015

For undergraduates interested in improving their ability to communicate their scientific knowledge by teaching ocean science in elementary schools or science centers/aquariums. The course will combine instruction in inquiry-based teaching methods and learning pedagogy with six weeks of supervised teaching experience in a local school classroom or the Lawrence Hall of Science with a partner. Thus, students will practice communicating scientific knowledge and receive mentoring on how to improve their presentations.

Communicating Ocean Science: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** One course in introductory biology, geology, chemistry, physics, or marine science required and interest in ocean science; junior, senior, or graduate standing; consent of instructor required for sophomores

### Hours & Format

**Fall and/or spring:** 15 weeks - 2.5 hours of lecture, 1 hour of discussion, and 2 hours of fieldwork per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Ingram

**Also listed as:** EPS C100/GEOG C146

Communicating Ocean Science: Read Less [\[-\]](#)

## INTEGBI 101 Introduction to Scientific Writing 4 Units

Terms offered: Spring 2018, Fall 1997

This course will introduce students to concepts and techniques for effective communication of scientific findings, both within the scientific community and to the general public. Students will be exposed to a variety of formats, including systematic observations in field journals, proposals, conference presentations, seminars, journal articles, popular science writing, and interviews. Students can expect to gain a sense of confidence in writing and public speaking about research. Direct language is valued in scientific writing, but creative approaches to style and structure will be emphasized.

Introduction to Scientific Writing: Read More [\[+\]](#)

### Hours & Format

**Fall and/or spring:** 15 weeks - 4 hours of seminar per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Alternative to final exam.

**Instructor:** Fine

Introduction to Scientific Writing: Read Less [\[-\]](#)

## INTEGBI 102LF Introduction to California Plant Life with Laboratory 4 Units

Terms offered: Spring 2018, Spring 2015, Spring 2013

The relationship of the main plant groups and the plant communities of California to climate, soils, vegetation, geological and recent history, and conservation. Laboratory will also include at least two Saturday field trips and focus on main plant groups and major plant families in California, and use of keys to identify introduced and especially native pteridophytes, conifers, and flowering plants of the state.

Introduction to California Plant Life with Laboratory: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Biology 1B or consent of instructor

**Credit Restrictions:** Student will receive partial credit for 102LF after taking 102.

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture and 6 hours of laboratory per week

**Summer:** 8 weeks - 4 hours of lecture and 12 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Formerly known as:** 102L

Introduction to California Plant Life with Laboratory: Read Less [\[-\]](#)

## INTEGBI 103LF Invertebrate Zoology with Laboratory 5 Units

Terms offered: Spring 2018, Spring 2016, Spring 2014

Introductory survey of the biology of invertebrates, stressing comparative functional morphology, phylogeny, natural history, and aspects of physiology and development. Laboratory study of invertebrate diversity and functional morphology, and field study of the natural history of local marine invertebrates.

Invertebrate Zoology with Laboratory: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Biology 1A-1B

**Credit Restrictions:** Students will receive partial credit for 103LF after taking 103.

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 6 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

Invertebrate Zoology with Laboratory: Read Less [\[-\]](#)

## INTEGBI 104LF Natural History of the Vertebrates with Laboratory 5 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

Biology of the vertebrates, exclusive of fish. Laboratory and field study of local vertebrates exclusive of fish.

Natural History of the Vertebrates with Laboratory: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Biology 1A-1B

**Credit Restrictions:** Students will receive partial credit for 104LF after taking 104.

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture, 4 hours of fieldwork, and 3 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** McGuire, Bowie, Shabel

Natural History of the Vertebrates with Laboratory: Read Less [\[-\]](#)

## INTEGBI C105 Natural History Museums and Biodiversity Science 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

(1) survey of museum resources, including strategies for accession, conservation, collecting and acquiring material, administration, and policies; (2) strategies for making collections digitally available (digitization, databasing, georeferencing, mapping); (3) tools and approaches for examining historical specimens (genomics, isotopes, ecology, morphology, etc); and (4) data integration and inference. The final third of the course will involve individual projects within a given museum.

Natural History Museums and Biodiversity Science: Read More [\[+\]](#)

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Alternative to final exam.

**Instructors:** Gillespie, Mishler, Will, Marshall, McGuire

**Also listed as:** ESPM C105

Natural History Museums and Biodiversity Science: Read Less [\[-\]](#)

## INTEGBI 106A Physical and Chemical Environment of the Ocean 4 Units

Terms offered: Spring 2012, Spring 2010, Spring 2008

The biological implications of marine physics and chemistry. History and properties of seawater. Geophysical fluids. Currents and circulations. Deep sea. Waves, tides, and bottom boundary layers. The coastal ocean; estuaries. Air/sea interaction. Mixing. Formation of water masses. Modeling biological and geochemical processes. Ocean and climate change.

Physical and Chemical Environment of the Ocean: Read More [a]

### Rules & Requirements

**Prerequisites:** Biology 1B; Chemistry 1A or 4A; Mathematics 1A or 16A; Physics 7A or 8A. Recommended: Integrative Biology 82

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

Physical and Chemical Environment of the Ocean: Read Less [-]

## INTEGBI C107L Principles of Plant Morphology with Laboratory 4 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

An analysis of the structural diversity of land plants with emphasis on the developmental mechanisms responsible for this variation in morphology and the significance of this diversity in relation to adaptation and evolution.

Principles of Plant Morphology with Laboratory: Read More [a]

### Rules & Requirements

**Prerequisites:** Biology 1A-1B

### Hours & Format

**Fall and/or spring:** 15 weeks - 1 hour of lecture, 1 hour of discussion, and 4 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Specht

**Also listed as:** PLANTBI C107L

Principles of Plant Morphology with Laboratory: Read Less [-]

## INTEGBI C109 Evolution and Ecology of Development 3 Units

Terms offered: Fall 2016

From the seahorse's body to the venus flytrap's jaws to the human brain, nature abounds with amazing adaptations. This interdisciplinary course explores how and why such biodiversity evolves as well as what limits diversity. Lectures and case studies will focus on core concepts, recent advances, and integrative approaches, placing special emphasis on the interplay between gene regulatory networks, the environment, and population genetics.

Evolution and Ecology of Development: Read More [a]

### Objectives Outcomes

- Student Learning Outcomes:**
- Explain how an interdisciplinary approach involving genetics, development, evolutionary biology, and ecology can be used to understand the processes that generate patterns of biodiversity.
  - List and describe major questions, findings, and experimental approaches in the field of ecological and evolutionary developmental biology.
  - Discuss biological research using specialized terminology and defend your opinions.
  - Critically evaluate and interpret the primary scientific literature.
  - Combine factual material with deductive reasoning to propose hypotheses and future research directions

### Rules & Requirements

**Prerequisites:** BIOLOGY 1A and 1B

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Alternative to final exam.

**Instructor:** Blackman

**Also listed as:** PLANTBI C109

Evolution and Ecology of Development: Read Less [-]

## **INTEGBI C110L Biology of Fungi with Laboratory 4 Units**

Terms offered: Fall 2016, Fall 2014

Selected aspects of fungi: their structure, reproduction, physiology, ecology, genetics and evolution; their role in plant disease, human welfare, and industry. Offered even fall semesters.

Biology of Fungi with Laboratory: [Read More](#) [+]

### **Rules & Requirements**

**Prerequisites:** Biology 1B

### **Hours & Format**

**Fall and/or spring:** 15 weeks - 2 hours of lecture and 6 hours of laboratory per week

### **Additional Details**

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Bruns, Taylor

**Also listed as:** PLANTBI C110L

Biology of Fungi with Laboratory: [Read Less](#) [-]

## **INTEGBI 112 Horticultural Methods in the Botanical Garden 1 Unit**

Terms offered: Fall 2017, Fall 2016, Spring 2015

An introduction to horticultural techniques utilizing the diverse collections of the University Botanical Garden.

Horticultural Methods in the Botanical Garden: [Read More](#) [+]

### **Rules & Requirements**

**Prerequisites:** Consent of instructor

### **Hours & Format**

**Fall and/or spring:** 15 weeks - 3 hours of fieldwork per week

### **Additional Details**

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Offered for pass/not pass grade only. Final exam required.

**Instructor:** Licht

**Formerly known as:** 112L

Horticultural Methods in the Botanical Garden: [Read Less](#) [-]

## **INTEGBI 113L Paleobiological Perspectives on Ecology and Evolution 4 Units**

Terms offered: Spring 2018, Spring 2017, Spring 2016

This course will center around answering the following questions: What do the fossil and geologic records have to tell us about the nature of ecological and evolutionary processes? What do they teach us that cannot be learned from the living world alone? In answering these questions, the course will provide an introduction to the analysis of key problems in paleobiology, with an emphasis on how evolutionary and ecological processes operate on geologic timescales.

Paleobiological Perspectives on Ecology and Evolution: [Read More](#) [+]

### **Rules & Requirements**

**Prerequisites:** Prior biology experience, or consent of instructor. No paleontological or geological background required

### **Hours & Format**

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

### **Additional Details**

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Marshall

**Formerly known as:** 108

Paleobiological Perspectives on Ecology and Evolution: [Read Less](#) [-]

## INTEGBI 114 Infectious Disease Dynamics 4 Units

Terms offered: Spring 2017

Many of the challenges of managing infectious disease are essentially ecological and evolutionary problems. Disease follows the rules of species interactions as it spreads through host populations while resistance to antibiotics occurs through the rules of evolutionary biology. The key aim of the module is to teach ecological and evolutionary principles in the light of infectious diseases affecting human populations and societies as well as agriculture and wildlife. This is applied ecology and applied evolution writ large.

Infectious Disease Dynamics: [Read More](#) [+]

### Objectives Outcomes

**Student Learning Outcomes:** - Understanding the role of infectious disease in natural populations and communities

- Understand the role of disease in shaping human agriculture and societies
- Describe how infectious disease may be important in conservation
- Discuss when parasite virulence makes sense in the light of evolution
- Explain how to apply ecological and evolutionary principles to the treatment and control of infectious
- Present a scientific poster on the evidence for coevolution between a pair of species.

### Rules & Requirements

**Prerequisites:** Bio 1A and Bio 1B or equivalent required, Ecology or Evolution course suggested

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Boots

Infectious Disease Dynamics: [Read Less](#) [-]

## INTEGBI 115 Introduction to Systems in Biology and Medicine 4 Units

Terms offered: Spring 2015, Spring 2014, Fall 2013

This course is aimed at students wishing to understand the general principles of how biological systems operate. Topics include feedback regulation; competition and cooperation; genetic switches and circuits; random processes; chaos; mechanisms for error correction; and the properties of networks. Examples are selected from many fields including medicine, physiology, ecology, biochemistry, cell biology, and genetics. Students will learn to conceptualize and quantify interactions within biological systems using simple mathematical models and computer programs. No previous experience in programming is required.

Introduction to Systems in Biology and Medicine: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Biology 1A, Mathematics 1A or 16B

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture and 2 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Lim

Introduction to Systems in Biology and Medicine: [Read Less](#) [-]

## INTEGBI 116L Medical Parasitology 4 Units

Terms offered: Summer 2017 First 6 Week Session, Summer 2016 10 Week Session, Summer 2016 First 6 Week Session

This course includes the biology, epidemiology, pathogenesis, treatment, and prevention of various medically important parasitic infections. Life cycles of parasitic helminths and protozoa, the biological aspects of the host-parasite relationship, the epidemiology of the infection, and the interplay of social, economical, and ecological factors which contribute to the disease will be covered in both lectures and videos.

Medical Parasitology: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** 1A, 1B, or equivalent

### Hours & Format

**Summer:** 6 weeks - 6 hours of lecture and 6 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Sakanari

Medical Parasitology: [Read Less](#) [-]

## INTEGBI 117 Medical Ethnobotany 2 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

Biological diversity and ethno-linguistic diversity sustain traditional botanical medicine systems of the world. Major topics covered in this course include cultural origins of medicinal plant knowledge on plant-derived pharmaceuticals and phytomedicines; field research methods in ethnobotany and ethnopharmacology; examples of how traditional botanical medicines provide safe, effective, affordable, and sustainable primary health care to tropical countries; human physiology, human diseases, and mechanisms of action of plant-derived drugs.

Medical Ethnobotany: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Bio 1A

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture per week

**Summer:** 6 weeks - 5 hours of lecture per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Carlson

Medical Ethnobotany: [Read Less](#) [-]

## INTEGBI 117LF Medical Ethnobotany Laboratory 2 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

Laboratory will focus on studying medicinal plants from the major ecosystems and geographical regions of the world. Students will learn common names, scientific names, plant families, field identification, habitats, and ethnomedical uses of medicinal plants. How the medicinal plant is prepared, administered, and used as a phytomedicine will also be discussed. There will be reference to the phylogenetic relationships between the plant families and genera represented by the medicinal plants.

Medical Ethnobotany Laboratory: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Bio 1B

### Hours & Format

**Fall and/or spring:** 15 weeks - 6 hours of laboratory per week

**Summer:** 6 weeks - 8 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Carlson

Medical Ethnobotany Laboratory: [Read Less](#) [-]

## INTEGBI 118 Host-Pathogen Interactions: A Trans-Discipline Outlook 4 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

The second half of the 20th century is marked by great strides in the battle against infectious diseases. However, the forces that drive pathogen evolution continue to pose new challenges for science and medicine. In this course we will cover various aspects relating to host-pathogen interactions, focusing on animals and their bacterial pathogens. We will address the ecology of host-pathogen interactions, their shaping by co-evolution, examine prominent molecular mechanisms taking part in this warfare and learn how ancient mechanisms are used and reused through millions of years of evolution. The course will examine how better understanding of host-pathogen interactions can suggest new strategies for fighting infectious diseases.

Host-Pathogen Interactions: A Trans-Discipline Outlook: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Biology 1A-1B

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Shapira

Host-Pathogen Interactions: A Trans-Discipline Outlook: [Read Less](#) [-]

## INTEGBI 119 Evaluating Scientific Evidence in Medicine 3 Units

Terms offered: Spring 2015, Fall 2014, Spring 2013

A course in critical analysis of medical reports and studies using recent controversial topics in medicine. Course will focus on information gathering, hypothesis testing, evaluating study design, methodological problems, mechanisms of bias, interpretation of results, statistics, and attribution of causation. Students participate in a mock trial as a way to demonstrate their abilities to gather, critically analyze, and present scientific and medical evidence.

Evaluating Scientific Evidence in Medicine: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Biology 1A-1B

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture, 1 hour of discussion, and 1 hour of laboratory per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

## INTEGBI 132 Survey of Human Physiology 4 Units

Terms offered: Spring 2018, Summer 2017 8 Week Session, Spring 2017

Mechanisms by which key physiological priorities are maintained in healthy humans. From a basis in elementary theories of information and control, we develop an understanding of homeostasis of cellular composition, structure, and energy metabolism. We then study neural and endocrine signaling in humans, and develop the key concepts of control and homeostasis in all the major organ and multi-organ systems, including cardiovascular, respiratory, renal, metabolic, reproductive, and immune systems, growth and development, and sensory and motor systems.

Survey of Human Physiology: Read More [a+]

### Rules & Requirements

**Prerequisites:** Integrative Biology 131, Biology 1A

**Credit Restrictions:** Students will receive no credit for Integrative Biology 132 after completing Molecular and Cell Biology 136.

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Summer:** 8 weeks - 6 hours of lecture and 2 hours of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Brooks, Kaufer, Lehman

## INTEGBI 132L Mammalian Physiology Laboratory 2 Units

Terms offered: Spring 2018, Spring 2017, Summer 2016 8 Week Session

In the laboratory component of Integrative Biology 132, students gain hands-on experience measuring physiological parameters, interpreting physiological data, designing experiments, and communicating ideas in writing and orally. Guided investigations include measurements of membrane potentials, responses of skeletal muscle to electrical stimulation, electromyography, pulmonary and cardiovascular measurements in humans, contractility and regulation of the frog heart, human electrocardiography, and renal control of body fluids. In two independent investigations, students identify their own questions, develop hypotheses, design and perform experiments, and present their studies in symposia. Background in elementary statistics, data analysis and oral presentation are also provided.

Mammalian Physiology Laboratory: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Previous or concurrent enrollment in 132 or equivalent, or consent of instructor

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of laboratory per week

**Summer:** 8 weeks - 6 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Brooks, Kaufer, Lehman

## INTEGBI 133 Anatomy Enrichment Program 2 Units

Terms offered: Spring 2011, Spring 2010, Spring 2009

The purpose of the course is for University students to teach human anatomy to grades K-7 in the public schools. The UCB students work in groups of 2-3 to plan their presentations of the systems of the body and then enter the school rooms to teach what they have learned in 131.

Anatomy Enrichment Program: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** 131 with a grade of A or B

**Repeat rules:** Course may be repeated for credit.

### Hours & Format

**Fall and/or spring:** 15 weeks - 4 hours of fieldwork per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Offered for pass/not pass grade only. Final exam required.

Anatomy Enrichment Program: [Read Less](#) [-]

## INTEGBI 135 The Mechanics of Organisms 4 Units

Terms offered: Spring 2016, Fall 2013, Fall 2011

Organism design in terms of mechanical principles; basics of fluid and solid mechanics with examples of their biological implications, stressing the dependence of mechanical behavior and locomotion on the structure of molecules, tissues, structural elements, whole organisms, and habitats. The Mechanics of Organisms: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Introductory physics and biology recommended

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Dudley, Full, Koehl

## INTEGBI C135L Laboratory in the Mechanics of Organisms 3 Units

Terms offered: Spring 2015, Spring 2014, Spring 2013, Spring 2012

Introduction to laboratory and field study of the biomechanics of animals and plants using fundamental biomechanical techniques and equipment. Course has a series of rotations involving students in experiments demonstrating how solid and fluid mechanics can be used to discover the way in which diverse organisms move and interact with their physical environment. The laboratories emphasize sampling methodology, experimental design, and statistical interpretation of results. Latter third of course devoted to independent research projects. Written reports and class presentation of project results are required.

Laboratory in the Mechanics of Organisms: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Integrative Biology 135 or consent of instructor; for Electrical Engineering and Computer Science students, Electrical Engineering 105, 120 or Computer Science 184

**Credit Restrictions:** Students will receive no credit for C135L after taking 135L.

### Hours & Format

**Fall and/or spring:** 15 weeks - 6 hours of laboratory, 1 hour of discussion, and 1 hour of fieldwork per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Formerly known as:** Integrative Biology 135L

## INTEGBI 136 The Biology of Sex 4 Units

Terms offered: Fall 2014, Summer 1991 10 Week Session

The ability to reproduce is a defining characteristic of life, and of great interest to biologists as well as humanity in general. What is sex, and why did it develop? Why do we have sexual reproduction, whereas some animals do not? This course will provide a comprehensive overview on the biology of sex from an evolutionary perspective with an emphasis on humans in comparison to other species. The course will consist of two lectures each week, and a lab where we discuss a paper, watch videos, or have discussion sections on specific topics that were covered in class. The Biology of Sex: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Biology 1B, introductory genetics (Mendelian genetics, recombination, chromosomes)

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 2 hours of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Bachtrog

The Biology of Sex: Read Less [\[-\]](#)

## INTEGBI 137 Human Endocrinology 4 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

Course will address the role of hormones in physiology with a focus on humans. Regulation of hormone secretion and mechanisms of hormone action will be discussed. Physiological processes to be addressed include reproduction, metabolism, water balance, growth, fetal development. Experimental and clinical aspects will be addressed. Human Endocrinology: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Biology 1A-1B; human physiology (132) strongly recommended

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Hayes

Human Endocrinology: Read Less [\[-\]](#)

## INTEGBI 138 Comparative Endocrinology 4 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

The primary goal of this course is to provide students with a broad understanding of the evolution of hormonal systems. A comparative approach allows us to envisage how the complex mammalian endocrine system presumably evolved from that of more primitive vertebrates. Students will learn about endocrine pathways and endocrine-based behaviors of jawless fishes, fishes, amphibia, reptiles, birds, and mammals. In addition, students will gain an understanding of the experimental methods used in endocrine research. The class teaches students how to read and interpret the primary scientific literature; thus it encourages the critical thinking that is a fundamental skill for any scientist. Comparative Endocrinology: Read More [\[+\]](#)

Comparative Endocrinology: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Biology 1A-1B. Organic Chemistry recommended

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Bentley

Comparative Endocrinology: Read Less [\[-\]](#)

## INTEGBI 139 The Neurobiology of Stress 4 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

This course is designed to be an interdisciplinary course. It will adopt a broad-based approach to explore the concepts of stress, health, and disease, with a particular focus on current primary literature. The course will cover multiple dimensions in the study of stress, which employ genetic, epigenetic, molecular, cellular, physiological, and cognitive approaches, especially in the context of endocrine and neuroscience research. We will analyze the individual response to stress, how genetic and environmental factors play a role in it, how it translates to physiological and mental health and well-being vs. pathological conditions, and put that in a public health perspective.

The Neurobiology of Stress: [Read More](#) [+]

### Objectives Outcomes

**Course Objectives:** This course will emphasize the interconnected and multidirectional relationships between biology, behavior and the social environment. The study of stress is necessarily an interdisciplinary endeavor. This course is designed to explore the role of genes, hormones and experiences as they affect the stress-response and subsequently brain and behavior.

### Rules & Requirements

**Prerequisites:** Biology 1A or Psychology 110. You will need a good understanding of the fundamentals of biology to do well in this class

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Kaufer

The Neurobiology of Stress: [Read Less](#) [-]

## INTEGBI 140 Biology of Human Reproduction 4 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

Course focuses on biological and cultural aspects of human reproduction including conception, embryology, pregnancy, labor, delivery, lactation, infant/child development, puberty, and reproductive aging. This includes study of factors that diminish and factors that enhance fertility, reproduction, and maternal-child health. We explore evolutionary, ecological, environmental, cultural, ethnobiological, and nutritional determinants of fertility, reproductive rate, infant survival, and population growth.

Biology of Human Reproduction: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Biology 1A or equivalent

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Summer:** 6 weeks - 8 hours of lecture and 2 hours of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Carlson

Biology of Human Reproduction: [Read Less](#) [-]

## INTEGBI 141 Human Genetics 3 Units

Terms offered: Summer 2017 8 Week Session, Summer 2016 10 Week Session, Summer 2016 8 Week Session

Principles of inheritance, especially as applied to human traits, including molecular aspects of genetics, the genetic constitutions of populations, and questions of heredity/environment.

Human Genetics: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** One course in biological science

**Credit Restrictions:** Students will receive no credit for 141 after taking Molecular and Cell Biology 142 or C142 and Integrative Biology C163.

### Hours & Format

**Summer:** 8 weeks - 6 hours of lecture per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

Human Genetics: [Read Less](#) [-]

## INTEGBI C142L Introduction to Human Osteology 6 Units

Terms offered: Spring 2018, Spring 2016, Spring 2014

An intensive study of the human skeleton, reconstruction of individual and population characteristics, emphasizing methodology and analysis of human populations from archaeological and paleontological contexts, taphonomy, and paleopathology.

Introduction to Human Osteology: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Anthropology 1, Biology 1B

### Hours & Format

**Fall and/or spring:** 15 weeks - 6 hours of lecture and 14 hours of laboratory per week

## INTEGBI C143B Hormones and Behavior 3 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

This course provides a comprehensive overview of behavioral endocrinology beginning with hormone production and actions on target issues and continuing with an exploration of a variety of behaviors and their hormonal regulation/consequences. The course uses a comparative approach to examine the reciprocal interactions between the neuroendocrine system and behavior, considering the effects of hormone on development and adult behavior in addition to how behavior regulates endocrine physiology. While much of the course focuses on non-human vertebrate species, the relevance to humans is explored where appropriate. Topics include sexual differentiation and sex differences in behavior, reproductive, parental, and aggressive behaviors, and hormonal and behavioral homeostatic regulation.

Hormones and Behavior: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Completion of biological prerequisites for the major and consent of instructor; a course in mammalian physiology recommended

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture and 1 hour of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Kriegsfeld

**Also listed as:** PSYCH C116

Hormones and Behavior: Read Less [\[-\]](#)

## **INTEGBI C144 Animal Behavior 4 Units**

Terms offered: Fall 2017, Fall 2016, Fall 2015

An introduction to comparative animal behavior and behavioral physiology in an evolutionary context, including but not limited to analysis of behavior, genetics and development, learning, aggression, reproduction, adaptiveness, and physiological substrates.

Animal Behavior: Read More [+]

### **Rules & Requirements**

**Prerequisites:** Biology 1A, 1B, or Environmental Science, Policy, and Management 140. Molecular and Cell Biology 140 and C160 recommended

**Credit Restrictions:** Students will receive no credit for 144 after taking C144, 145, 146LF, or Psychology C115B.

### **Hours & Format**

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

### **Additional Details**

## **INTEGBI C145 Animal Communication 3 Units**

Terms offered: Spring 2018

Communication is central to the lives of most, if not all animals. How and why animals communicate is thus central to understanding the ecology, behavior, neurobiology, and evolution of animal systems. This course will focus on understanding the basic principles driving the communication system of a species, drawing together topics ranging from the physical properties of the environment, physiology of sensory systems, animal behavior and ecology, using examples from classic and recent publications.

Animal Communication: Read More [+]

### **Rules & Requirements**

**Prerequisites:** Biology 1B. Animal Behavior (ESPM C126/IB C144) recommended

### **Hours & Format**

**Fall and/or spring:** 15 weeks - 3 hours of lecture per week

### **Additional Details**

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Elias

**Formerly known as:** Environ Sci, Policy, and Management 156

Animal Communication: Read Less [-]

## INTEGBI 146LF Behavioral Ecology with Laboratory 5 Units

Terms offered: Spring 2017, Spring 2015, Spring 2013

An in-depth examination of the ecological and evolutionary bases for behavioral diversity. Topics covered include behavior as an adaptive response, sexual selection, animal mating systems, group living, and cooperative and competitive interactions. Current conceptual approaches to these topics are explored, with an emphasis upon rigorous testing of hypotheses drawn from primary literature. Hands-on laboratory training in the methods of experimental design, data collection, and data analysis.

Behavioral Ecology with Laboratory: Read More [+]

### Rules & Requirements

**Prerequisites:** Integrative Biology 144 or Integrative Biology C144/ Environmental Science, Policy and Management C126 or consent of instructor

**Credit Restrictions:** Students will receive partial credit for Integrative Biology 146LF after taking Integrative Biology 146.

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture, 1 hour of discussion, and 3 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Lacey

## INTEGBI 147 Biology of Aging 3 Units

Terms offered: Prior to 2007

This course will focus on studying the molecular mechanisms of aging and the age-related changes that take place in cells and tissues. It introduces animal models used for the study of the genetics and biochemistry of aging as well as discusses the similarities and differences in aging mechanisms across species. Students will learn the age-related changes taking place in the major physiological systems in humans. Special attention will be given to differentiating normal aging processes from diseases that normally affect the elderly.

Biology of Aging: Read More [+]

### Rules & Requirements

**Prerequisites:** BIOLOGY 1A

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Shapira, Caporale

Molecular Ecology: Read Less [-]

**INTEGBI 150 Evolutionary Environmental Physiology 3 Units**

Terms offered: Spring 2018, Spring 2017, Spring 2016

Evolutionary physiology studies how physiological traits arise and are modified during adaptation to the environment. An integrative understanding of the origin and maintenance of physiological traits, encompassing levels of biological hierarchy from molecular to ecological and biogeographic, is essential for improving human health and stewarding the natural world through the current era of rapid environmental change. This course consists of three parts: 1) big questions in evolutionary physiology and how they are addressed; 2) a student-led exploration of how environmental factors have shaped physiological evolution; and 3) predicting responses to global change using evolutionary physiology.

Evolutionary Environmental Physiology: Read More [+]

**Rules & Requirements**

**Prerequisites:** Biology 1A-1B or equivalent

**Hours & Format**

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

## INTEGBI C155 Holocene Paleoecology: How Humans Changed the Earth 3 Units

Terms offered: Spring 2014, Spring 2011, Spring 1998

Since the end of the Pleistocene and especially with the development of agriculturally based societies humans have had cumulative and often irreversible impacts on natural landscapes and biotic resources worldwide. Thus "global change" and the biodiversity crisis are not exclusively developments of the industrial and post-industrial world. This course uses a multi-disciplinary approach, drawing upon methods and data from archaeology, palynology, geomorphology, paleontology, and historical ecology to unravel the broad trends of human ecodynamics over the past 10,000 years.

## INTEGBI 158LF Biology and Geomorphology of Tropical Islands 13 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

Natural history and evolutionary biology of island terrestrial and freshwater organisms, and of marine organisms in the coral reef and lagoon systems will be studied, and the geomorphology of volcanic islands, coral reefs, and reef islands will be discussed. Features of island biogeography will be illustrated with topics linked to subsequent field studies on the island of Moorea (French Polynesia).

Biology and Geomorphology of Tropical Islands: Read More [ + ]

### Hours & Format

**Fall and/or spring:** 15 weeks - 12 hours of lecture and 6 hours of fieldwork per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Also listed as:** ESPM C107

## INTEGBI 159 The Living Planet: Impact of the Biosphere on the Earth System 3 Units

Terms offered: Fall 2015, Fall 2013, Fall 2011

Earth is a complex dynamic system. Interplay between its components (solid earth, oceans, and atmosphere) governs conditions on the planet's outside that we and other biota inhabit. In turn, life asserts a vast influence on the abiotic components; in fact, the biosphere itself is a crucial system component. We will explore the effect that 3.5 billion years of evolving biosphere had on System Earth and vice versa (e.g., in terms of climate), including the recent human impact on the system.

The Living Planet: Impact of the Biosphere on the Earth System: Read More [ + ]

### Rules & Requirements

**Prerequisites:** Biology 1B or consent of instructor

**Credit Restrictions:** Students will receive two units of credit after taking Earth and Planetary Science 8, Earth and Planetary Science C141/Geography C141, or Geography 40.

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture and 2 hours of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Looy, Duijnstee

The Living Planet: Impact of the Biosphere on the Earth System: Read Less [ - ]

## INTEGBI 160 Evolution 4 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

An analysis of the patterns and processes of organic evolution. History and philosophy of evolutionary thought; the different lines of evidence and fields of inquiry that bear on the understanding of evolution. The major features and processes of evolution through geologic times; the generation of new forms and new lineages; extinction; population processes of selection, adaptation, and other forces; genetics, genomics, and the molecular basis of evolution; evolutionary developmental biology; sexual selection; behaviorial evolution; applications of evolutionary biology to medical, agricultural, conservational, and anthropological research.

Evolution: Read More [ + ]

### Rules & Requirements

**Prerequisites:** Biology 1B

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

## INTEGBI 161 Population and Evolutionary Genetics 4 Units

Terms offered: Spring 2017, Spring 2015, Spring 2013

Population genetics provides the theoretical foundation for modern evolutionary thinking. It also provides a basis for understanding genetic variation within populations. We will study population genetic theory and use it to illuminate a number of different topics, including the existence of sex, altruism and cooperation, genome evolution speciation, and human genetic variation and evolution.

Population and Evolutionary Genetics: Read More [ + ]

### Rules & Requirements

**Prerequisites:** Biology 1A/1B, Mathematics 16A or 10A

**Repeat rules:** Course may be repeated for credit.

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 2 hours of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Nielson, Slatkin

Population and Evolutionary Genetics: Read Less [ - ]

## INTEGBI 162 Ecological Genetics 4 Units

Terms offered: Fall 2016, Fall 2014, Fall 2010

This course integrates ecology, genetics, and evolutionary biology. It presents contemporary approaches to studying evolution in natural populations, including analyzing heritability of ecologically important traits, using molecular techniques to decompose genotypes, documenting and measuring the magnitude of selection in natural systems, and using models to predict evolution in natural populations. Case studies are used to examine evolutionary effects of ecological interactions among organisms, the importance of population size and structure, and interactions among populations through migration and dispersal.

Ecological Genetics: Read More [+]

### Rules & Requirements

**INTEGBI 169 Evolutionary Medicine 4 Units**

Terms offered: Spring 2018, Spring 2017, Spring 2016

This course explores the ways that evolutionary theory, natural selection, drift, genetics, and epigenetics can illuminate our understanding of human health and disease. The course begins with an overview of primate and hominid evolution and human genetic variation. We then evaluate reproductive biology and maternal/child health through an evolutionary lens. We explore how human ecosystem interactions influence diet, metabolic adaptations, hematological adaptations, human microbiome, and human pathogens. We examine evolutionary concepts related to aging, senescence and development of cancer. Finally we study psychology, behavior, and social/cultural organization through an evolutionary perspective.

Evolutionary Medicine: Read More [+]

**Rules & Requirements**

**INTEGBI 170LF Methods in Population and Community Ecology 3 Units**

Terms offered: Spring 2017, Spring 2015

This course is a hands-on introduction to common research methods in population and community ecology. Each method and its application are first presented in a lecture session, illustrated with published examples. The method is then practiced in a subsequent group field exercise, conducted in a local terrestrial, aquatic, or marine habitat.

The course focuses on sampling methods, experimental designs, and statistical analyses used to investigate patterns of species distribution and abundance, interspecific associations, and local species diversity. Graded assignments include write-ups of field exercise results, and an in-depth review paper and oral in-class presentation on an ecological method of particular interest to the student.

Methods in Population and Community Ecology: Read More [-]

**Objectives Outcomes**

**Course Objectives:** This course is designed as a hands-on introduction to common research methods in population and community ecology. Students will learn how to quantitatively describe and statistically analyze patterns in (1) the distribution, abundance, and size/age distributions of populations, (2) the diversity and similarity of multi-species assemblages, (3) interspecific association, and (4) habitat preference and selectivity. They will also be taught the fundamentals of experimental design and apply them in a field predator-prey manipulation.

**Rules & Requirements**

**Prerequisites:** Integrative Biology 153 or comparable upper-division course in ecology from Integrative Biology or Environmental Science Policy and Management course lists (or by consent of instructor); introductory course in statistics strongly recommended

**Credit Restrictions:** Students will receive no credit for Integrative Biology 170LF after completing Integrative Biology 153L.

**Hours & Format**

**Fall and/or spring:** 15 weeks - 8 hours of laboratory per week

**Additional Details**

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Alternative to final exam.

**Instructor:** Sousa

**Formerly known as:** Integrative Biology 153LF

Methods in Population and Community Ecology: Read Less [-]

## INTEGBI C171 Freshwater Ecology 3 Units

Terms offered: Spring 2018

Lakes, rivers, wetlands, and estuaries are biologically rich, dynamic, and among the most vital and the most vulnerable of Earth's ecosystems. Lectures will introduce general topics including the natural history of freshwater biota and habitats, ecological interactions, and ecosystem linkages and dynamics. Broad principles will be illustrated with results from selected recent research publications. Factors affecting resilience or vulnerability of freshwater ecosystems to change will be examined. Course requirements: two exams and a short synthesis paper projecting the future states of a freshwater or estuarine ecosystem of the student's choice under plausible scenarios of local, regional, or global change.

Freshwater Ecology: [Read More](#) [+]

Freshwater Ecology: [Read Less](#) [-]

## INTEGBI 172 Coevolution: From Genes to Ecosystems 4 Units

Terms offered: Spring 2017

The biological world is shaped by interactions among species. These inter-specific interactions, such as between predators and prey, plants and pollinators, or hosts and pathogens, have led to an impressive array of adaptations, helping to explain the incredible organismal and genetic diversity on Earth. Our understanding of coevolution (the responses to reciprocal selection acting on two interacting populations) has been greatly facilitated in the last few years by conceptual advancements, new methods allowing direct tests of theory, next generation sequencing technology, and the advance of 'omics' approaches.

Coevolution: From Genes to Ecosystems: [Read More](#) [+]

### Rules & Requirements

Coevolution: From Genes to Ecosystems: [Read Less](#) [-]

## INTEGBI 173LF Mammalogy with Laboratory 5 Units

Terms offered: Fall 2016, Fall 2014, Spring 2014

An advanced course in the biology of mammals. Topics covered include elements of modern mammalian biology such as morphology, physiology, ecology, and behavior. For all topics, the traits that define mammals are emphasized, as is the variation on these themes evident within modern mammalian lineages. Laboratory and field explore the biology of modern mammals. Laboratories use the extensive collections of the Museum of Vertebrate Zoology to introduce students to mammalian diversity in a phylogenetic context.

Mammalogy with Laboratory: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** 104LF

**Credit Restrictions:** Students will receive partial credit for 173LF after taking 173.

Fish Ecology: Read Less [-]

## INTEGBI 177LF Ichthyology 4 Units

Terms offered: Not yet offered

We will study the anatomy, physiology, life history, diversity, evolution, behavior, biogeography and ecology of the fishes, the most diverse of all vertebrate groups and the dominant group of vertebrates in aquatic habitats. Aside from serving as a comprehensive introduction to the science of ichthyology, the course will provide a solid foundation in anatomy, physiology, evolution, life history, and ecology and will prepare you well for careers in fisheries science, ichthyology, aquaculture, oceanography or vertebrate biology.

Ichthyology: Read More [+]

### Rules & Requirements

**Prerequisites:** Bio 1B prerequisite. Students are encouraged to enroll concurrently or subsequently in IB C176L (Fish Ecology)

### Hours & Format

**Summer:** 6 weeks - 8 hours of lecture and 6 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

Ichthyology: Read Less [-]

## INTEGBI 181L Paleobotany - The 500-Million Year History of a Greening Planet 4 Units

Terms offered: Spring 2018, Spring 2016, Fall 2014

Introduction to the evolution of plants and terrestrial ecosystems through time. From the invasion of land to the present, we will follow the evolution of major plant groups through important moments of the Phanerozoic eon (the past 540 million years). By studying fossilized plant assemblages, we will interpret how major environmental changes unfolded across landscapes in the past and how plants have influenced the shaping of our planet. Lectures will be complemented by an interactive laboratory covering paleobotanical research techniques, study of fossil and living plant form and function in the lab and field, and analysis of peer-reviewed literature.

Paleobotany - The 500-Million Year History of a Greening Planet: Read More [+]

### Rules & Requirements

**Prerequisites:** Courses in botany and geology are recommended

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Looy

**Formerly known as:** Integrative Biology 181

**Also listed as:** ANTHRO C100

Human Paleontology: Read Less [-]

## INTEGBI C187 Human Biogeography of the Pacific 3 Units

Terms offered: Spring 2015, Spring 2013

This course examines the history of human dispersal across Oceania from the perspectives of biogeography and evolutionary ecology. H. sapiens faced problems of dispersal, colonization, and extinction, and adapted in a variety of ways to the diversity of insular ecosystems. A dual evolutionary model takes into account cultural evolution and transmission, as well as biological evolution of human populations. This course also explores the impacts of human populations on isolated and fragile insular ecosystems, and the reciprocal effects of anthropogenic change on human cultures.

Human Biogeography of the Pacific: Read More [+]

### Rules & Requirements

**Prerequisites:** Biology 1B strongly recommended, or evidence the student has mastered an equivalent set of basic concepts in evolution and ecology

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

## INTEGBI 190 Seminar for Integrative Biology Majors 1 - 3 Units

Terms offered: Spring 2016, Spring 2015, Spring 2014

This upper-division undergraduate course will allow students to pursue specialized topics in biology in a seminar format. The specific content of the course will vary based on the topic and the instructor. In general, weekly meetings will provide a forum for extended discussion of selected aspects of evolutionary biology. Supplementary readings and assignments will provide critical background information and keep students engaged in relevant topics between weekly meetings.

Seminar for Integrative Biology Majors: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Consent of instructor

**Repeat rules:** Course may be repeated for credit.

### Hours & Format

**Fall and/or spring:** 15 weeks - 1-3 hours of seminar per week

### Summer:

6 weeks - 2.5-7.5 hours of seminar per week

8 weeks - 1.5-5.5 hours of seminar per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam not required.

Seminar for Integrative Biology Majors: [Read Less](#) [-]

## INTEGBI 191 Directed Undergraduate Research 3 Units

Terms offered: Spring 2017, Fall 2016, Summer 2015 10 Week Session

This course is intended for advanced undergraduates wishing to pursue independent research projects under the mentorship of an IB faculty member. Research projects will be rigorous and will provide significant training in the methods of evolutionary research. A project proposal is required to enroll and students are expected to produce a substantial written summary of their work.

Directed Undergraduate Research: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Consent of instructor and departmental adviser

### Hours & Format

**Fall and/or spring:** 15 weeks - 9 hours of independent study per week

### Summer:

8 weeks - 17 hours of independent study per week

10 weeks - 13.5 hours of independent study per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

Directed Undergraduate Research: [Read Less](#) [-]

## INTEGBI 194 Undergraduate Student Instructor for Integrative Biology Courses 1 - 3 Units

Terms offered: Fall 2016, Spring 2016, Fall 2015

UGSI will work under supervision of instructor and/or GSI. The UGSI will attend any mandatory preparatory and review meetings, be available in the classroom (discussion or laboratory) to respond to student questions, facilitate lesson plans, perform other tasks as assigned. UGSIs do not evaluate students' work or assign grades.

Undergraduate Student Instructor for Integrative Biology Courses: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Must have completed course applying to UGSI with a grade of B or better; or consent of instructor

**Repeat rules:** Course may be repeated for credit.

### Hours & Format

**Fall and/or spring:** 15 weeks - 3-4 hours of lecture per week

### Summer:

6 weeks - 8-10 hours of lecture per week

8 weeks - 6-8 hours of lecture per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Offered for pass/not pass grade only. Final exam not required.

Undergraduate Student Instructor for Integrative Biology Courses: [Read Less](#) [-]

## INTEGBI C195 Introduction to Global Health Disparities Research 2 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

This course is designed to prepare trainees in the UC Berkeley "Minority Health/Global Health" (MH/GH) program to conduct a ten-week infectious disease research project in a disease-endemic country. The course provides a background in neglected tropical disease research, international research ethics, and the conduct of health research in low-resource settings.

Introduction to Global Health Disparities Research: [Read More](#) [+]

### Hours & Format

**Fall and/or spring:** 15 weeks - 1 hour of lecture and 1 hour of discussion per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Reingold

**Also listed as:** PB HLTH C117

## INTEGBI C200 Principles of Phylogenetics 4 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

The core theory and methodology for comparative biology, beginning with issues in building phylogenetic trees, with emphases on both morphology and molecules, and both living and fossil organisms. Also covers the many applications of phylogenetic trees to systematics, biogeography, speciation, conservation, population genetics, ecology, behavior, development, functional morphology, and macroevolution that have revolutionized those fields. Labs are closely integrated with lectures and cover the major algorithms and computer software used to implement these approaches. Requirements include participation in discussions, two exams, and a term project.

Principles of Phylogenetics: [Read More](#) [+]

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 3 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Graduate

**Grading:** Letter grade.

**Instructors:** Ackerly, Mishler, Will

**Also listed as:** ESPM C200

Principles of Phylogenetics: [Read Less](#) [-]

## INTEGBI C204 Research Reviews in Animal Behavior: Behavior Review 1 Unit

Terms offered: Spring 2018, Fall 2017, Spring 2017

This course will provide a rigorous, critical review of current research in animal behavior. Emphases will include hypothesis testing and experimental design, as well as methods of data collection and analysis. Each week, a student in the course will present original research in the form of a seminar presentation, grant proposal, or manuscript. Through discussion with seminar participants, presenters will gain critical feedback regarding their research.

Research Reviews in Animal Behavior: Behavior Review: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Graduate standing, basic course in animal behavior. Instructor approval required

**Repeat rules:** Course may be repeated for credit.

### Hours & Format

**Fall and/or spring:** 15 weeks - 1.5 hours of seminar per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Graduate

**Grading:** Letter grade.

**Instructors:** Lacey, Caldwell, Bentley, Elias

**Also listed as:** ESPM C204

Research Reviews in Animal Behavior: Behavior Review: [Read Less](#) [-]

## INTEGBI C205 Quantitative Methods for Ecological and Environmental Modeling 3 Units

Terms offered: Fall 2015, Fall 2013, Fall 2012, Fall 2011, Fall 2009  
This course will review the background mathematical and statistical tools necessary for students interested in pursuing ecological and environmental modeling. Topics include linear algebra; difference equation, ordinary differential equation, and partial differential equation models; stochastic processes; parameter estimation; and a number of statistical techniques. This course will be recommended as a prerequisite for advanced modeling courses in Integrative Biology, Energy and Resources Group, and Environmental Science, Policy, and Management. Quantitative Methods for Ecological and Environmental Modeling: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Consent of instructor

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Graduate

**Grading:** Letter grade.

**Also listed as:** ENE,RES C205/ESPM C205

Quantitative Methods for Ecological and Environmental Modeling: Read Less [\[-\]](#)

## INTEGBI 206 Statistical Phylogenetics 3 Units

Terms offered: Fall 2012, Fall 2011, Fall 2010  
This course is aimed at students who wish to understand the evolutionary models and methods for estimating phylogenies (which are trees representing how organisms are related to one another). Topics include continuous-time Markov chains as applied in phylogenetics; maximum likelihood estimation; Bayesian estimation; the combinatorics of evolutionary trees; Markov chain Monte Carlo; distance and parsimony methods for estimating trees; optimization strategies for finding best trees. Students will learn to write computer programs that implement many of the methods discussed in class, and apply their knowledge in a research project.

Statistical Phylogenetics: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** College level course in calculus

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Graduate

**Grading:** Letter grade.

**Instructor:** Huelsenbeck

Statistical Phylogenetics: Read Less [\[-\]](#)

## INTEGBI C215 Communicating Ocean Science 4 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016, Spring 2015, Fall 2014, Spring 2014, Spring 2013

For graduate students interested in improving their ability to communicate their scientific knowledge by teaching ocean science in elementary schools or science centers/aquariums. The course will combine instruction in inquiry-based teaching methods and learning pedagogy with six weeks of supervised teaching experience in a local school classroom or the Lawrence Hall of Science with a partner. Thus, students will practice communicating scientific knowledge and receive mentoring on how to improve their presentations.

Communicating Ocean Science: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** One course in introductory biology, geology, chemistry, physics, or marine science required and interest in ocean science, junior, senior, or graduate standing; consent of instructor required for sophomores

### Hours & Format

**Fall and/or spring:** 15 weeks - 2.5 hours of lecture, 1 hour of discussion, and 2 hours of fieldwork per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Professional course for teachers or prospective teachers

**Grading:** Letter grade.

**Instructor:** Ingram

**Also listed as:** EPS C301/GEOG C301

Communicating Ocean Science: Read Less [\[-\]](#)

## INTEGBI C216 Freshwater Ecology 3 Units

Terms offered: Spring 2015, Spring 2014, Spring 2013  
This graduate course will combine formal lectures and discussion, with the overall goal of exposing students to general concepts in freshwater ecology. We will discuss a broad range of topics including freshwater environments and biota, natural selection and adaptive evolution, food webs and trophic cascades, cross-ecosystem linkages, and social-ecological resilience of freshwater ecosystems under global change. Upper division undergraduates are welcome, with permission of the instructors.

Freshwater Ecology: Read More [\[+\]](#)

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture and 1 hour of discussion per week

**Subject/Course Level:** Integrative Biology/Graduate

**Grading:** Letter grade.

**Instructors:** Carlson, Power

**Also listed as:** ESPM C216

Freshwater Ecology: Read Less [\[-\]](#)

## INTEGBI C217 Biomimetic Engineering -- Engineering from Biology 3 Units

Terms offered: Fall 2017, Spring 2014, Fall 2010

Study of nature's solutions to specific problems with the aim of determining appropriate engineering analogs. Morphology, scaling, and design in organisms applied to engineering structures. Mechanical principles in nature and their application to engineering devices. Mechanical behavior of biological materials as governed by underlying microstructure, with the potential for synthesis into engineered materials. Trade-offs between redundancy and efficiency. Students will work in teams on projects where they will take examples of designs, concepts, and models from biology and determine their potential in specific engineering applications.

Biomimetic Engineering -- Engineering from Biology: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Graduate standing in engineering or consent of instructor

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture per week

## INTEGBI C226 Isotopics 2 Units

Terms offered: Fall 2016, Fall 2015, Fall 2014

This seminar will explore current topics that employ the use of stable isotopes. Discussion topics include the areas of biology, paleontology, biogeochemistry, soil science, and atmospheric science. Students will be required to lead at least one discussion of relevant literature in the topic area.

Isotopics: Read More [\[+\]](#)

### Hours & Format

**Fall and/or spring:** 10 weeks - 3 hours of seminar per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Graduate

**Grading:** Offered for satisfactory/unsatisfactory grade only.

**Instructors:** Amundson, Dawson, Mambelli

**Also listed as:** ESPM C225

Isotopics: Read Less [\[-\]](#)

## **INTEGBI C227 Stable Isotope Ecology 5 Units**

Terms offered: Spring 2016, Spring 2014, Spring 2012

Course focuses on principles and applications of stable isotope chemistry as applied to the broad science of ecology. Lecture topics include principles of isotope behavior and chemistry, and isotope measurements in the context of terrestrial, aquatic, and marine ecological processes and problems. Students participate in a set of laboratory exercises involving preparation of samples of choice for isotopic analyses, the use of the mass spectrometer and optical analysis systems, and the analysis of data.

Terms offered: Fall 2009, Fall 2006, Fall 2004

Current issues in macroevolution and paleobiology, using both neontological and paleontological data.

Seminar in Evolution above the Species Level: Read More [\[+\]](#)

### **Rules & Requirements**

**Repeat rules:** Course may be repeated for credit.

### **Hours & Format**

**Fall and/or spring:** 15 weeks - 2 hours of seminar per week

### **Additional Details**

**Subject/Course Level:** Integrative Biology/Graduate

**Grading:** Letter grade.

Seminar in Evolution above the Species Level: Read Less [\[-\]](#)

## **INTEGBI 281 Seminar in Evolution 2 Units**

Terms offered: Spring 2018, Spring 2017, Spring 2016

Advanced study and current literature in various fields of evolution.

Topics vary from year to year.

Seminar in Evolution: Read More [\[+\]](#)

### **Hours & Format**

**Fall and/or spring:** 15 weeks - 2 hours of seminar per week

### **Additional Details**

**Subject/Course Level:** Integrative Biology/Graduate

**Grading:** Offered for satisfactory/unsatisfactory grade only.

**Instructor:** Padian

Seminar in Evolution: Read Less [\[-\]](#)

## **INTEGBI 283 Seminar in Vertebrate Evolution and Paleontology 1 Unit**

Terms offered: Fall 2017, Fall 2016, Spring 2016

Presentations and discussions of original research and new literature in vertebrate evolution and paleontology. Syllabus and reading list will vary as topics change from semester to semester. Open to Undergraduate students with permission. Enrollment limit: 20.

Seminar in Vertebrate Evolution and Paleontology: Read More [\[+\]](#)

### **Rules & Requirements**

**Prerequisites:** 183, 183L or consent of instructor

**Credit Restrictions:** Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog.

### **Hours & Format**

**Fall and/or spring:** 15 weeks - 1 hour of seminar per week

### **Additional Details**

**Subject/Course Level:** Integrative Biology/Graduate

**Grading:** Letter grade.

**Instructor:** Padian

Seminar in Vertebrate Evolution and Paleontology: Read Less [\[-\]](#)

## **INTEGBI 286 Seminars in Paleontology 2 Units**

Terms offered: Spring 2018, Fall 2017, Spring 2017

Advanced study and current literature in various fields of paleontology.

Topics vary from year to year.

Seminars in Paleontology: Read More [\[+\]](#)

### **Rules & Requirements**

**Repeat rules:** Course may be repeated for credit.

### **Hours & Format**

**Fall and/or spring:** 15 weeks - 2 hours of seminar per week

## **INTEGBI 304 Dissemination of Research: Your Interface with the Public 2 Units**

Terms offered: Spring 2018, Spring 2017, Fall 2012

This course will consist of lectures and class discussions about mechanisms of communicating about science to the public. We will consider how to convey the issues, process, and findings of scientific research to a variety of audiences using different media (e.g., posters, web pages, newsletters, newspaper and magazine articles, books, television). Projects conducted by teams of students under the direct supervision of the instructors will include preparation of outreach materials (e.g., posters, newsletters, web pages).

Dissemination of Research: Your Interface with the Public: [Read More](#) [\[+\]](#)

### **Hours & Format**

**Fall and/or spring:** 15 weeks - 2 hours of lecture per week

### **Additional Details**

**Subject/Course Level:** Integrative Biology/Professional course for teachers or prospective teachers

**Grading:** Letter grade.

Dissemination of Research: Your Interface with the Public: [Read Less](#) [\[-\]](#)

## **INTEGBI 305 Academic Survivorship 2 Units**

Terms offered: Spring 2015, Fall 2011, Fall 2006

Series of lectures and workshops to prepare graduate students for many aspects of academic careers, including grant proposal writing, giving talks at meetings or to academic departments, preparing job applications and having job interviews, advising graduate students and postdocs, reviewing manuscripts and grant proposals, service activities and time management, working at teaching college vs. research universities, alternative careers, etc.

Academic Survivorship: [Read More](#) [\[+\]](#)

### **Hours & Format**

**Fall and/or spring:** 15 weeks - 2 hours of seminar per week

### **Additional Details**

**Subject/Course Level:** Integrative Biology/Professional course for teachers or prospective teachers

**Grading:** Offered for satisfactory/unsatisfactory grade only.

Academic Survivorship: [Read Less](#) [\[-\]](#)

## INTEGBI 375 Teaching Colloquium: Graduate Student Instructor Training 2 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

Series of workshops and seminars involving graduate students and faculty participation. The main objectives of this course are to train graduate students to become effective instructors and to discuss important issues that graduate students face when teaching undergraduate classes.

Teaching Colloquium: Graduate Student Instructor Training: Read More [\[+\]](#)

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of seminar per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Professional course for teachers or prospective teachers

**Grading:** Offered for satisfactory/unsatisfactory grade only.

**Formerly known as:** Integrative Biology 303

Teaching Colloquium: Graduate Student Instructor Training: Read Less [\[-\]](#)

## INTEGBI 400 Training in Stable Isotope Methods and Mass Spectrometry 1 Unit

Terms offered: Fall 2017, Fall 2016, Fall 2015

An intensive lecture and laboratory training course on the fundamental principles and practical applications of stable isotope methods in biogeochemistry, ecology, physiology, and environmental science. Topics covered are sample preparation, operating of an isotope ratio mass spectrometer, and analysis of stable isotope data. This course is required for all students interested in using the facilities housed in the Center for Stable Isotope Biogeochemistry for their research.

Training in Stable Isotope Methods and Mass Spectrometry: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Consent of instructor

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Other professional

**Grading:** Offered for satisfactory/unsatisfactory grade only.

**Instructor:** Dawson

Training in Stable Isotope Methods and Mass Spectrometry: Read Less [\[-\]](#)

## INTEGBI C407 Introduction to Scientific Diving 3 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

Diving physics, physiology, medicine, rescue, decompression, theory, navigation, environment, marine life, research methods, equipment, and University regulations. Course leads to University certification to use underwater life support apparatus for study or research under University auspices.

Introduction to Scientific Diving: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Advanced scuba certification, swim test, medical exam, and consent of instructor

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Other professional

**Grading:** Letter grade.

**Instructors:** Hayward, Scott

**Formerly known as:** Integrative Biology C407/Physical Education C407

**Also listed as:** PHYS ED C407

Introduction to Scientific Diving: Read Less [\[-\]](#)

## INTEGBI 601 Individual Study for Master's Students 1 - 8 Units

Terms offered: Spring 2016, Fall 2015, Spring 2015

Individual study for the comprehensive requirements in consultation with the major adviser. Units may not be used to meet either unit or residence requirements for a master's degree.

Individual Study for Master's Students: Read More [\[+\]](#)

### Rules & Requirements

**Repeat rules:** Course may be repeated for credit.

### Hours & Format

**Fall and/or spring:** 15 weeks - 0 hours of independent study per week

### Additional Details

**Subject/Course Level:** Integrative Biology/Graduate examination preparation

**Grading:** Offered for satisfactory/unsatisfactory grade only.

Individual Study for Master's Students: Read Less [\[-\]](#)

## **INTEGBI 602 Individual Study for Doctoral Students 1 - 8 Units**

Terms offered: Spring 2016, Fall 2015, Spring 2015

Individual study in consultation with the major adviser. Intended to provide an opportunity for qualified students to prepare themselves for the various examinations required for candidates for the Ph.D.

Individual Study for Doctoral Students: [Read More](#) [+]

### **Rules & Requirements**

**Credit Restrictions:** Course does not satisfy unit or residence requirements for doctoral degree.

**Repeat rules:** Course may be repeated for credit.

### **Hours & Format**

**Fall and/or spring:** 15 weeks - 0 hours of independent study per week

### **Additional Details**

**Subject/Course Level:** Integrative Biology/Graduate examination preparation

**Grading:** Offered for satisfactory/unsatisfactory grade only.

Individual Study for Doctoral Students: [Read Less](#) [-]

## **INTEGBI N602 Individual Study for Doctoral Students 1 - 6 Units**

Terms offered: Prior to 2007

Formerly < Paleon 602, Zoology 602, Botany 602, Physiol 602, Anatomy 602> Individual study in consultation with the major field adviser.

Intended to provide an opportunity for qualified students to prepare themselves for the various examinations required for candidates for the Ph.D.

Individual Study for Doctoral Students: [Read More](#) [+]

### **Rules & Requirements**

**Credit Restrictions:** Course does not satisfy unit or residence requirements for doctoral degree.

**Repeat rules:** Course may be repeated for credit.

### **Hours & Format**

**Summer:** 8 weeks - 1-6 hours of independent study per week
