

# Psychology

---

Psychology as a scientific discipline aims to describe, understand, and predict the behavior of living organisms. In doing so, psychology embraces the many factors that influence behavior—from sensory experience to complex cognition, from the role of genetics to that of social and cultural environments, from the processes that explain behavior in early childhood to those that operate in older ages, and from typical development to pathological conditions. The Department of Psychology at Berkeley reflects the diversity of our discipline's mission covering six key areas of research: Behavioral and Systems Neuroscience; Clinical Science; Cognition; Cognitive Neuroscience; Developmental, and Social-Personality Psychology. Our program learning goals focus on honing methodological, statistical and critical thinking skills relevant to all areas of Psychology research, enabling students with sufficient breadth to retain perspective in the field of psychology and sufficient depth to permit successful independent and significant research.

The major academic objectives of the PhD program are for students to:

- Develop an understanding of the different theoretical and empirical frameworks that have defined and shaped the field.
- Develop an understanding of the central questions and issues in contemporary psychology.
- Develop expertise in one or more relevant research methodologies.
- Build expertise in formulating testable hypotheses and designing appropriate studies.
- Hone ability to critically evaluate scientific research.
- Develop expertise in statistics and advanced data analytic approaches.
- Develop an awareness of the importance of science to humanity while recognizing its limits (i.e., some scientific knowledge is culture specific and may not be applicable to the human condition universally).
- Develop competence as a teacher of undergraduates and mentor to graduate students.

Students select one of the following concentrations:

**Behavioral and Systems Neuroscience:** The Behavioral & Systems Neuroscience area encompasses faculty and students united by a common interest in the neurobiological/physiological bases of behavior, including but not limited to circadian and seasonal rhythms, decision making, sex differentiation and behavior, energy balance, bird song and animal communication, animal spatial orientation and navigation, gene-environment interactions, selective attention and visual perception, social behavior, attachment, developmental processes, physiological substrates of emotion and stress, and motivation. The methodologies currently employed by faculty and students cover the entire spectrum from behavioral study of animals and humans to computational, cellular, molecular and neuroimaging analyses.

**Clinical Science:** The Clinical Science Faculty at UC Berkeley conduct translational research in which we study foundational mechanistic processes (e.g., emotion, sleep, intimate relationships, social competence, temperament, reward systems, family dynamics, and

culture) with the goal of better understanding and ameliorating human problems. Our faculty study these processes in at-risk or in patient populations (e.g., schizophrenia, bipolar and other mood disorders, sleep disorders, dementia and other neurological diseases, ADHD and comorbid conditions) and/or in treatments. The treatment research we conduct is used to develop hypotheses about and/or confirm contributions of the foundational mechanistic processes, and it also contributes to improving treatments for important human problems and in diverse populations.

**Cognition:** The Cognition Program brings together faculty and students engaged in behavioral and computational investigations of fundamental cognitive processes, including learning, memory, categorization, reasoning, language, and perception. Our interdisciplinary approach borrows methods and insights from the cognitive sciences and other areas within the department.

**Cognitive Neuroscience:** Programs in Cognitive Neuroscience focus on neuroimaging and neuropsychological approaches to human behavior. Functional neuroimaging techniques, such as magnetic resonance imaging (MRI) and electroencephalography (EEG), are used to study the neural bases of human behavior. Neuropsychological methods assess varieties of psychological dysfunction associated with brain damage or disease. Areas of specialty within this track include: Sensory and Perceptual Processes, Attention and Working Memory, Learning and Memory, Emotion, and Motor Control.

**Developmental:** Our research goal is to understand how the organism and its capabilities develop throughout the lifespan. Our interdisciplinary approach is multi-species, multi-system, and multidisciplinary in nature. We study change over time in cognitive, linguistic, social, emotional, and neural processes. Our explanations include both neural accounts of the plasticity that is observed in the developing brain and other systems, and computational and psychological accounts of development. The bi-directionality of these processes is emphasized, with the organism's genetically program development being influenced by its physical and social environments and in turn influencing those environments. Thus, our research is situated at the interface between the fields of developmental psychology, computational modeling, psycholinguistics, cognitive psychology, developmental cognitive neuroscience, social psychology, cultural psychology, and clinical psychology. Our research examines numerous areas of development, plasticity, and change including sensory processes, cognitive capacities, language, reasoning, everyday knowledge of the world, emotions, and social relationships. We examine both typical and atypical development, each providing rich insights for better understanding the other and suggesting new approaches for effective treatments and preventive interventions.

**Social-Personality Psychology:** Social psychology concerns itself with the effects of other people on the individual as well as with interaction between persons. Personality psychology is concerned with the ways individuals perceive, act upon, and understand their respective worlds as they seek to establish adaptive life modes. As our area name implies, the research conducted in the joint Social-Personality area represents an integration of personality and social psychology, not only in terms of the types of questions S-P faculty ask (e.g., What are the specific situations that elicit negative emotions? What kinds of individuals tend to react particularly strongly to these elicitors?) but also in the methods we use.

Most research conducted in our labs brings together tightly controlled laboratory experiments that isolate causal mechanisms with cross-sectional and longitudinal studies that look at psychological processes as they unfold naturally in people's everyday lives and across time.

## Admission to the University

### Minimum Requirements for Admission

The following minimum requirements apply to all graduate programs and will be verified by the Graduate Division:

1. A bachelor's degree or recognized equivalent from an accredited institution;
2. A grade point average of B or better (3.0);
3. If the applicant comes from a country or political entity (e.g., Quebec) where English is not the official language, adequate proficiency in English to do graduate work, as evidenced by a TOEFL score of at least 90 on the iBT test, 570 on the paper-and-pencil test, or an IELTS Band score of at least 7 (note that individual programs may set higher levels for any of these); and
4. Sufficient undergraduate training to do graduate work in the given field.

### Applicants Who Already Hold a Graduate Degree

The Graduate Council views academic degrees not as vocational training certificates, but as evidence of broad training in research methods, independent study, and articulation of learning. Therefore, applicants who already have academic graduate degrees should be able to pursue new subject matter at an advanced level without need to enroll in a related or similar graduate program.

Programs may consider students for an additional academic master's or professional master's degree only if the additional degree is in a distinctly different field.

Applicants admitted to a doctoral program that requires a master's degree to be earned at Berkeley as a prerequisite (even though the applicant already has a master's degree from another institution in the same or a closely allied field of study) will be permitted to undertake the second master's degree, despite the overlap in field.

The Graduate Division will admit students for a second doctoral degree only if they meet the following guidelines:

1. Applicants with doctoral degrees may be admitted for an additional doctoral degree only if that degree program is in a general area of knowledge distinctly different from the field in which they earned their original degree. For example, a physics PhD could be admitted to a doctoral degree program in music or history; however, a student with a doctoral degree in mathematics would not be permitted to add a PhD in statistics.
2. Applicants who hold the PhD degree may be admitted to a professional doctorate or professional master's degree program if there is no duplication of training involved.

Applicants may apply only to one single degree program or one concurrent degree program per admission cycle.

### Required Documents for Applications

1. **Transcripts:** Applicants may upload *unofficial* transcripts with your application for the departmental initial review. *If the applicant is admitted*, then *official* transcripts of all college-level work will be required. Official transcripts must be in sealed envelopes as issued by the school(s) attended. If you have attended Berkeley, upload your unofficial transcript with your application for the departmental initial review. *If you are admitted*, an official transcript with evidence of degree conferral *will not* be required.

2. **Letters of recommendation:** Applicants may request online letters of recommendation through the online application system. Hard copies of recommendation letters must be sent directly to the program, not the Graduate Division.
3. **Evidence of English language proficiency:** All applicants from countries or political entities in which the official language is not English are required to submit official evidence of English language proficiency. This applies to applicants from Bangladesh, Burma, Nepal, India, Pakistan, Latin America, the Middle East, the People's Republic of China, Taiwan, Japan, Korea, Southeast Asia, most European countries, and Quebec (Canada). However, applicants who, at the time of application, have already completed at least one year of full-time academic course work with grades of B or better at a US university may submit an official transcript from the US university to fulfill this requirement. The following courses will not fulfill this requirement:
  - courses in English as a Second Language,
  - courses conducted in a language other than English,
  - courses that will be completed after the application is submitted, and
  - courses of a non-academic nature.

If applicants have previously been denied admission to Berkeley on the basis of their English language proficiency, they must submit new test scores that meet the current minimum from one of the standardized tests.

### Where to Apply

Visit the Berkeley Graduate Division application page (<http://grad.berkeley.edu/admissions/apply>) .

### Admission to the Program

The Department of Psychology invites applications from students who are primarily interested in research. Applicants for the Psychology PhD are required to specify the area to which they wish to apply: Behavioral and Systems Neuroscience; Clinical Science; Cognition; Cognitive Neuroscience; Developmental; and Social-Personality. Applicants are required to name at least one faculty member with whom they wish to work.

Applicants must hold a bachelor's degree or its equivalent from an institution of acceptable standing, and may hold a master in psychology or another field. Previous concentration in psychology is not required. The department does not have an application for a terminal master's degree: PhD only.

### Normative Time Requirements

#### Normative Time in the Program

Normative time in the Department of Psychology for doctoral degree completion is 10 semesters, and normative time in candidacy is 4 semesters. (See departmental website for details.)

Step I: Students take courses, narrow down their interests to particular areas of specialization, and begin research projects. This takes approximately 1 year.

Step II: Students complete majority of course requirements and prepare for their written and oral Qualifying Examination. This takes approximately 1-2 years.

Step III: Students undertake research for the PhD dissertation under a 3-4 person committee in charge of their research and dissertation. Students do original research and write up the dissertation based on their results. On completion of course requirements and approval of the dissertation by the committee, students are awarded the doctorate. This takes approximately 2 years.

## Time to Advancement

### Curriculum

#### Behavioral and Systems Neuroscience Concentration

##### Courses Required

PSYCH 299 Research (all semesters in residence) 1-12

PSYCH Colloquium - Select one each semester in residence from the following:

PSYCH 229A	Cognition Colloquium	
or PSYCH 229f	Cognitive Neuroscience Colloquium	
PSYCH 239	Clinical Seminar	
PSYCH 249	Developmental Seminar	
PSYCH 259	Personality Seminar	
PSYCH 269	Social Seminar	

PSYCH 292 Introduction to the Profession of Psychology 2

PSYCH 205 Data Analysis 3

PSYCH 206 Structural Equation Modeling (or an advanced data analysis course from another department) 3

PSYCH 293 Second-Year Seminar on Professional Development (Includes 2nd-Year Research Poster requirement) 2

PSYCH 375 Teaching Psychology 2

##### Additional Courses Required for Concentration

PSYCH 210B Proseminar: Cognition, Brain, and Behavior 3

Select two of the following: 6

PSYCH 210A	Proseminar: Cognition, Brain, and Behavior	
PSYCH 210C	Proseminar: Cognition, Brain, and Behavior	
PSYCH 210D	Proseminar: Cognition, Brain, and Behavior	
PSYCH 210E	Proseminar: Cognition, Brain, and Behavior	
PSYCH 290 Series Topic Seminars (3 semesters)		6

#### Clinical Science Concentration

##### Courses Required

PSYCH 299 Research (all semesters in residence) 1-12

PSYCH Colloquium - Select one each semester in residence from the following:

PSYCH 229A	Cognition Colloquium	
or PSYCH 229f	Cognitive Neuroscience Colloquium	
PSYCH 239	Clinical Seminar	
PSYCH 249	Developmental Seminar	
PSYCH 259	Personality Seminar	
PSYCH 269	Social Seminar	

PSYCH 292 Introduction to the Profession of Psychology 2

PSYCH 205 Data Analysis 3

PSYCH 206 Structural Equation Modeling (or an advanced data analysis course from another department) 3

PSYCH 293 Second-Year Seminar on Professional Development (Includes Second-Year Research Poster requirement) 2

PSYCH 375 Teaching Psychology 2

##### Additional Courses Required for Concentration

PSYCH 230 Proseminar: Clinical Psychology 3

PSYCH 237H Intervention: Introduction to Clinical Methods 1

PSYCH 233A Clinical Assessment: Theory, Application, and Practicum 3

or PSYCH 233B Clinical Assessment: Theory, Application, and Practicum

Speciality Clinics to be taken concurrently:

PSYCH 236 Specialty Clinic 3

PSYCH 237E Professional Development in Clinical Science 3

PSYCH 237G Intervention: Specialty Clinics 1,2

#### Cognition & Cognitive Neuroscience Concentrations

##### Courses Required

PSYCH 299 Research (all semesters in residence) 1-12

PSYCH Colloquium - Select one each semester in residence from the following:

PSYCH 229A	Cognition Colloquium	
or PSYCH 229f	Cognitive Neuroscience Colloquium	
PSYCH 239	Clinical Seminar	
PSYCH 249	Developmental Seminar	
PSYCH 259	Personality Seminar	
PSYCH 269	Social Seminar	

PSYCH 292 Introduction to the Profession of Psychology 2

PSYCH 205 Data Analysis 3

PSYCH 206 Structural Equation Modeling (or an advanced data analysis course from another department) 3

PSYCH 293 Second-Year Seminar on Professional Development (Includes Second-Year Research Poster requirement) 2

PSYCH 375 Teaching Psychology 2

##### Additional Courses Required for Concentration

Select three of the following: 9

PSYCH 210A	Proseminar: Cognition, Brain, and Behavior	
PSYCH 210B	Proseminar: Cognition, Brain, and Behavior	
PSYCH 210C	Proseminar: Cognition, Brain, and Behavior	
PSYCH 210D	Proseminar: Cognition, Brain, and Behavior	
PSYCH 210E	Proseminar: Cognition, Brain, and Behavior	
PSYCH 290 Series Topic Seminars (4 semesters)		8

#### Developmental Concentration

##### Courses Required

PSYCH 299 Research (all semesters in residence) 1-12

PSYCH Colloquium - Select one each semester in residence from the following:

PSYCH 229A	Cognition Colloquium	
or PSYCH 229f	Cognitive Neuroscience Colloquium	
PSYCH 239	Clinical Seminar	
PSYCH 249	Developmental Seminar	
PSYCH 259	Personality Seminar	

PSYCH 269	Social Seminar	
PSYCH 292	Introduction to the Profession of Psychology	2
PSYCH 205	Data Analysis	3
PSYCH 206	Structural Equation Modeling (or an advanced data analysis course from another department)	3
PSYCH 293	Second-Year Seminar on Professional Development (Includes 2nd-Year Research Poster requirement)	2
PSYCH 375	Teaching Psychology	2
<b>Additional Courses Required for Concentration</b>		
PSYCH 240A	Proseminar: Biological, Cognitive, and Language Development	3
PSYCH 240B	Proseminar: Emotional, Social, and Psychopathological Development	3
PSYCH 290 Series Topic Seminars (3 semesters)		6

### Social-Personality Concentration

#### Courses Required

PSYCH 299 Research (all semesters in residence) 1-12

PSYCH Colloquium - Select one each semester in residence from the following:

PSYCH 229A	Cognition Colloquium	
or PSYCH 229f	Cognitive Neuroscience Colloquium	
PSYCH 239	Clinical Seminar	
PSYCH 249	Developmental Seminar	
PSYCH 259	Personality Seminar	
PSYCH 269	Social Seminar	
PSYCH 292	Introduction to the Profession of Psychology	2
PSYCH 205	Data Analysis	3
PSYCH 206	Structural Equation Modeling (or an advanced data analysis course from another department)	3
PSYCH 293	Second-Year Seminar on Professional Development (Includes Second-Year Research Poster requirement)	2
PSYCH 375	Teaching Psychology	2

#### Additional Courses Required for Concentration

PSYCH 250A	Perspectives in Personality: Overview	3
PSYCH 250D	Principles and Pragmatics of Personality Measurement	3
PSYCH 260B	Proseminar Course in Social Psychology	3
PSYCH 290 Series Topic Seminars (3 semesters)		6

### Additional Program Requirements

- Second-Year Poster Presentation
- Third-Year Paper Requirement
- Qualifying Examination
- CITI Protocol Course Certifications
- Internship, Field Work, or Practicum—*Clinical Science only*
- Clinical Practice—*Clinical Science only*

### Time in Candidacy

- Dissertation Proposal
- Dissertation
- Dissertation Presentation/Exit Talk

### Professional Development

- PSYCH 292, PSYCH 293, and PSYCH 375
- Presentations
- Teaching
- Professional Conference Attendance
- Workshops

### Psychology

#### PSYCH 205 Data Analysis 3 Units

Terms offered: Spring 2018, Spring 2017, Fall 2015

This course serves both as a refresher for undergraduate statistics and as a preparation for more advanced courses. This course will cover fundamental principles of statistical thinking including probability theory, distributions, modeling, parameter fitting, error estimation, statistical significance and cross-validation. In addition, the course will cover all statistical tests that are part of the generalized mixed effect models: n-way analysis of variance (ANOVA), multiple regression, analysis of covariance, logistic regression, between subjects, within subjects, mixed designs and designs with random factors. Students will also be introduced to statistical programming using the computer language R. Data Analysis: Read More [+]

#### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

#### Additional Details

**Subject/Course Level:** Psychology/Graduate

**Grading:** Letter grade.

Data Analysis: Read Less [-]

#### PSYCH 206 Structural Equation Modeling 3 Units

Terms offered: Spring 2017, Spring 2015

This course is intended to provide an introduction to the principles and practice of structural equation modeling, including matrix algebra, LISREL notation, measurement models and confirmatory factor analysis (CFA), path models, and structural models. In addition, we will cover multiple ways to handle longitudinal data (e.g., latent growth and simplex models) and advanced topics such as mediation and latent variable interactions. Data analytic examples and assignments will come from psychological research applications. Students will be strongly encouraged to incorporate their own data as well.

Structural Equation Modeling: Read More [+]

#### Rules & Requirements

**Prerequisites:** Psychology 205

#### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture per week

## PSYCH 214 Functional MRI Methods 3 Units

Terms offered: Fall 2016, Fall 2015, Fall 2014

This is a hands-on course teaching the principles of functional MRI (fMRI) data analysis. We will teach you how to work with data and code to get a deeper understanding of how fMRI methods work, how they can fail, how to fix them, and how to develop new methods. We will cover the basic concepts in neuroimaging analysis, and how they relate to the wider world of statistics, engineering and computer science. At the same time we will teach you techniques of data analysis that will make your work easier to organize, understand, explain and share. At the end of the course we expect you to be able to analyze fMRI data using Python and keep track of your work with version control using git.

Consciousness: Read Less [-]

## PSYCH C223 Proseminar: Problem Solving and Understanding 3 Units

Terms offered: Spring 2018, Spring 2016, Spring 2015, Fall 2013, Spring 2011

Students will examine problem solving in children and adults, from a predominantly cognitive science perspective, beginning with an examination of thinking involved in diverse problem types. Students will then analyze the literature concerning cognitive issues that transcend problem types, including representation, "understanding," access and availability of knowledge, access to one's own cognitive processing, categorization, the architecture of knowledge, and the control of cognition.

Proseminar: Problem Solving and Understanding: Read More [+]

### Rules & Requirements

Clinical Assessment: Theory, Application, and Practicum: Read Less [-]

## PSYCH 234D Theories of Cognitive Behavior Therapy 3 Units

Terms offered: Fall 2016, Fall 2013, Spring 2009

Central features of cognitive behavior therapy; basics of several cognitive-behavioral theories; evidence of efficacy and effectiveness of methods; methods for assessing, conceptualizing and treating patients; theories, methods, and efficacy evidence for several disorders, primarily anxiety and affective disorders.

Theories of Cognitive Behavior Therapy: Read More [+]

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture per week

### Additional Details

**Subject/Course Level:** Psychology/Graduate

**Grading:** Letter grade.

Theories of Cognitive Behavior Therapy: Read Less [-]

## PSYCH 236 Specialty Clinic 3 Units

Terms offered: Spring 2018, Fall 2017, Spring 2017

A Specialty Clinic is offered to graduate students in the Clinical Science program. Each course combines didactics and hands-on clinical work. Students in the course work with the instructor to develop the topic of interest by reviewing the empirical literature, defining and developing an intervention/consultation, defining a clinical population, marketing and delivering the intervention/consultation, and evaluating the effectiveness of the intervention/consultation. A number of readings are included in the course, and class discussion is a central part of the course. Written products are also a part of the course, either in the form of a presentation or publication of findings from the clinic. A Specialty Clinic also includes its own Case Conference and supervisors to handle supervision of the clinical cases.

Specialty Clinic: Read More [+]

### Rules & Requirements

**Prerequisites:** Open only to Clinical Science Program graduate students

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of clinic per week

## PSYCH 292 Introduction to the Profession of Psychology 2 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

This course provides both a broad review of the field of psychology and an introduction to the faculty of this department. Faculty from various program areas will present biographical information and discuss their particular research programs, as well as summarizing current developments in their areas. The course will also cover topics in professional development (e.g., scientific writing, convention presentations, journal review processes, professional and scientific ethics, and special issues facing women and minority psychologists). Required of all first-year students in the graduate program.

Introduction to the Profession of Psychology: Read More [+]

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture per week

### Additional Details

**Subject/Course Level:** Psychology/Graduate

**Grading:** Offered for satisfactory/unsatisfactory grade only.

**Formerly known as:** 292A

Introduction to the Profession of Psychology: Read Less [-]

## PSYCH 293 Second-Year Seminar on Professional Development 2 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

This course will focus on various issues related to professional development. Topics may include planning a research program, preparing for qualifying exams, choosing a dissertation committee, identifying career options, presenting work at conferences and in journals, preparing grant proposals, preparing for job interviews, juggling professional and personal life, and recognizing obstacles in career development. The seminar participants will select actual topics at the beginning of the term, and all will be expected to participate in the discussions. All participants will present their research at a departmental poster session at the end of the term. Required of all second-year students.

Second-Year Seminar on Professional Development: Read More [+]

### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of seminar per week
