

Civil Engineering

Bachelor of Science (BS)

The Department of Civil and Environmental Engineering's (CEE) undergraduate program offers opportunities for rigorous academic learning, fellowship, hands-on experience, and leadership. Classes are relatively small, so students get to know both the faculty and fellow students.

The program in civil and environmental engineering, which is top-ranked nationally, provides students with a strong fundamental background in engineering science, design, and practice. Students learn to solve societal problems—in California, the United States, and the world—such as:

- Improving civil infrastructure
- Protecting resources
- Mitigating hazards
- Creating efficient and sustainable civil systems

CEE's four-year curriculum leads to an ABET-accredited Bachelor of Science (BS) degree in Civil Engineering. Undergraduates at Berkeley have opportunities for professional interactions and community service. CEE has active student chapters of the American Society of Civil Engineers and the national honor society of Chi Epsilon as well as five nationally-ranked competition teams.

Areas of Emphasis

Students with a specific interest within civil engineering may choose to emphasize one of the following areas: engineering and project management; environmental engineering; geosystems; structural engineering, mechanics, and materials; or transportation engineering. See suggestions (<http://www.ce.berkeley.edu/undergrad/curriculum/emphasis>) for elective courses and the capstone design project.

Selection of an area of emphasis is optional. A BS in engineering is awarded whether or not a student follows the broad and general program or chooses an area of emphasis.

Accreditation

The BS program in Civil Engineering is accredited by the Engineering Accreditation Commission of the ABET, Inc. (<http://www.abet.org/accreditation>)

Admission to the Major

Prospective undergraduates to the College of Engineering will apply for admission to a specific program in the college. For further information, see the College of Engineering's website (<http://coe.berkeley.edu/students/prospective-students/admissions.html>).

Admission to Engineering via a Change of College application for current UC Berkeley students is highly unlikely and very competitive as there few, if any, spaces that open in the college each year to students admitted to other colleges at UC Berkeley. For further information regarding a Change of College to Engineering, see the college's website (<http://coe.berkeley.edu/students/current-undergraduates/change-of-college>).

Minor Program

CEE does not offer a minor in Civil Engineering. Instead, the department offers the following specialized minors:

Environmental Engineering (<http://guide.berkeley.edu/archive/2016-17/undergraduate/degree-programs/environmental-engineering>)

GeoSystems (<http://guide.berkeley.edu/archive/2016-17/undergraduate/degree-programs/geosystems>)

Structural Engineering (<http://guide.berkeley.edu/archive/2016-17/undergraduate/degree-programs/structural-engineering>)

In addition to the University, campus, and college requirements, students must fulfill the below requirements specific to their major program.

General Guidelines

1. All technical courses (courses in engineering, mathematics, chemistry, physics, statistics, biological sciences, and computer science) must be taken for a letter grade.
2. No more than one upper division course may be used to simultaneously fulfill requirements for a student's major and minor programs.
3. A minimum overall grade point average (GPA) of 2.0 is required for all work undertaken at UC Berkeley.
4. A minimum GPA of 2.0 is required for all technical courses taken in satisfaction of major requirements.

For information regarding residence requirements and unit requirements, see the College Requirements tab.

For a detailed plan of study by year and semester, see the Plan of Study tab.

Lower Division Requirements

| | | |
|---|---|-----|
| MATH 1A | Calculus | 4 |
| MATH 1B | Calculus | 4 |
| MATH 53 | Multivariable Calculus | 4 |
| MATH 54 | Linear Algebra and Differential Equations | 4 |
| CHEM 1A & 1AL | General Chemistry and General Chemistry Laboratory ¹ | 4 |
| or CHEM 4A | General Chemistry and Quantitative Analysis | |
| PHYSICS 7A | Physics for Scientists and Engineers | 4 |
| PHYSICS 7B | Physics for Scientists and Engineers | 4 |
| ENGIN 7 | Introduction to Computer Programming for Scientists and Engineers | 4 |
| CIV ENG C30/MEC ENG C85 | Introduction to Solid Mechanics | 3 |
| CIV ENG 60 | Structure and Properties of Civil Engineering Materials | 3 |
| CIV ENG 92 | Introduction to Civil and Environmental Engineering | 1 |
| CIV ENG 93 | Engineering Data Analysis | 3 |
| Civil Engineering Sophomore Elective, select one of the following: ² | | |
| CIV ENG 11 | Engineered Systems and Sustainability | 3 |
| or CIV ENG 70 | Engineering Geology | |
| First Basic Science Elective, select one of the following: ² | | |
| BIOLOGY 1B | General Biology Lecture and Laboratory | 3-4 |

| | | |
|---|--|---|
| or CIV ENG 70 | Engineering Geology | |
| Second Basic Science Elective, select one of the following: | | 4 |
| PHYSICS 7C | Physics for Scientists and Engineers | |
| CHEM 1B | General Chemistry | |
| CHEM 4B | General Chemistry and Quantitative Analysis ¹ | |

¹ CHEM 4A and CHEM 4B are intended for students majoring in chemistry or a closely-related field.

² CIV ENG 70 cannot be used to fulfill both requirements.

Upper Division Requirements

Students with a specific interest within civil engineering may choose to emphasize one of the following areas in their choice of electives: engineering and project management, environmental engineering, geosystems (geoengineering), structural engineering, or transportation engineering. See suggested courses (<http://www.ce.berkeley.edu/undergrad/curriculum/emphasis>) for each area of interest.

| | | |
|--|--|-----|
| CIV ENG 100 | Elementary Fluid Mechanics | 4 |
| CIV ENG 130N | Mechanics of Structures | 3 |
| CIV ENG 192 | The Art and Science of Civil and Environmental Engineering Practice | 1 |
| Engineering Science Elective, select one of the following: | | 3-4 |
| ENGIN 115 | Engineering Thermodynamics | |
| MEC ENG 40 | Thermodynamics | |
| MEC ENG 104 | Engineering Mechanics II | |
| Design Elective, select one of the following: ¹ | | 3-4 |
| CIV ENG 105 | Environmental Fluid Mechanics and Hydrology | |
| CIV ENG 112 | Environmental Engineering Design | |
| CIV ENG 122N | Design of Steel Structures & CIV ENG 122N and Structural Steel Design Project | |
| CIV ENG 123N | Design of Reinforced Concrete Structures & CIV ENG 123N and Structural Concrete Design Project | |
| CIV ENG 153 | Transportation Facility Design | |
| CIV ENG 177 | Foundation Engineering Design | |
| CIV ENG 180 | Life-Cycle Design and Construction | |
| CIV ENG 186 | Design of Cyber-Physical Systems | |
| Elective Core, select four of the following: | | 12 |
| CIV ENG 103 | Introduction to Hydrology | |
| CIV ENG 111 | Environmental Engineering | |
| CIV ENG 120 | Structural Engineering | |
| CIV ENG 155 | Transportation Systems Engineering | |
| CIV ENG 167 | Engineering Project Management ⁴ | |
| CIV ENG 175 | Geotechnical and Geoenvironmental Engineering | |
| CIV ENG 191 | Civil and Environmental Engineering Systems Analysis | |
| Engineering Electives ^{2,3} | | 15 |

¹ For Design Electives that are 4 units, 1 of the 4 units can be applied toward the 15 unit Engineering Electives requirement.

² Engineering Electives must include at least 15 additional units of upper division technically oriented engineering coursework offered in the College of Engineering or in chemical engineering. Students may receive up to 3 units of Engineering Elective credit for work on a research project in CIV ENG H194.

³ The 15 units of Engineering Electives cannot include:

- Any course taken on a *Pass/No Pass* basis; or
- Any of the following courses: BIO ENG 100, CHM ENG 185, COMPSCI 195, COMPSCI H195, DES INV 190, ENGIN 125, ENGIN 157AC, IND ENG 172, IND ENG 185, IND ENG 186, IND ENG 190 series, IND ENG 191, IND ENG 192, IND ENG 195, MEC ENG 106, MEC ENG 190K, MEC ENG 191AC and MEC ENG 191K.

⁴ Students who take CIV ENG 167 for Elective Core and then take ENGIN 120 for Engineering Electives will receive only two units toward Engineering Electives.

Students in the College of Engineering must complete no fewer than 120 semester units with the following provisions:

1. Completion of the requirements of one engineering major program (<http://coe.berkeley.edu/students/guide/departments>) of study.
2. A minimum overall grade point average of 2.00 (C average) and a minimum 2.00 grade point average in upper division technical coursework required of the major.
3. The final 30 units and two semesters must be completed in residence in the College of Engineering on the Berkeley campus.
4. All technical courses (math, science and engineering), required of the major or not, must be taken on a letter graded basis (unless they are only offered P/NP).
5. Entering freshmen are allowed a maximum of eight semesters to complete their degree requirements. Entering junior transfers are allowed a maximum of four semesters to complete their degree requirements. (Note: junior transfers admitted missing three or more courses from the lower division curriculum are allowed five semesters.) Summer terms are optional and do not count toward the maximum. Students are responsible for planning and satisfactorily completing all graduation requirements within the maximum allowable semesters.
6. Adhere to all college policies and procedures (<http://engineering.berkeley.edu/academics/undergraduate-guide>) as they complete degree requirements.
7. Complete the lower division program before enrolling in upper division engineering courses.

Humanities and Social Science (H/SS) Requirement

To promote a rich and varied educational experience outside of the technical requirements for each major, the College of Engineering has a six-course Humanities and Social Sciences breadth requirement (<http://engineering.berkeley.edu/student-services/degree-requirements/humanities-and-social-sciences>), which must be completed to graduate. This requirement, built into all the engineering programs of study, includes two reading and composition courses (R&C), and four additional courses within which a number of specific conditions must be satisfied. Follow these guidelines to fulfill this requirement:

1. Complete a minimum of six courses from the approved Humanities/ Social Sciences (H/SS) lists (<http://coe.berkeley.edu/hssreq>).
2. Courses must be a minimum of 3 semester units (or 4 quarter units).
3. Two of the six courses must fulfill the college's Reading and Composition (R&C) requirement. These courses must be taken for a letter grade (C- or better required) and must be completed by no later than the end of the sophomore year (fourth semester of enrollment). The first half of R&C, the "A" course, must be completed by the end

of the freshman year; the second half of R&C, the "B" course, must be completed by no later than the end of the sophomore year. View a detailed lists of courses (<http://ls-advise.berkeley.edu/requirement/rccourses.html>) that fulfill Reading and Composition requirements, or use the College of Letters and Sciences search engine (<http://ls-breadth.berkeley.edu>) to view R&C courses offered in a given semester.

4. The four additional courses must be chosen within College of Engineering guidelines from the H/SS lists (see below). These courses may be taken on a Pass/Not Passed basis (P/NP).
5. Two of the six courses must be upper division (courses numbered 100-196).
6. One of the six courses must satisfy the campus American Cultures requirement. For detailed lists of courses that fulfill American Cultures requirements, visit the American Cultures (<http://guide.berkeley.edu/archive/2016-17/undergraduate/colleges-schools/engineering/american-cultures-requirement>) site.
7. A maximum of two exams (Advanced Placement, International Baccalaureate, or A-Level) may be used toward completion of the H/SS requirement. View the list of exams (<http://engineering.berkeley.edu/academics/undergraduate-guide/exams-ap-ib-level-and-transfer-credit-information>) that can be applied toward H/SS requirements.
8. Courses may fulfill multiple categories. For example, if you complete CY PLAN 118AC (<http://guide.berkeley.edu/search/?P=CY%20PLAN%20118AC>) that would satisfy the American Cultures requirement and one upper division H/SS requirement.
9. No courses offered by any engineering department other than BIO ENG 100 (<http://guide.berkeley.edu/search/?P=BIO%20ENG%20100>), COMPSCI C79 (<http://guide.berkeley.edu/search/?P=COMPSCI%20C79>), ENGIN 125 (<http://guide.berkeley.edu/search/?P=ENGIN%20125>), ENGIN 157AC (<http://guide.berkeley.edu/search/?P=ENGIN%20157AC>), MEC ENG 191K (<http://guide.berkeley.edu/search/?P=MEC%20ENG%20191K>) and MEC ENG 191AC (<http://guide.berkeley.edu/search/?P=MEC%20ENG%20191AC>) may be used to complete H/SS requirements.
10. Foreign language courses may be used to complete H/SS requirements. View the list of language options (<http://ls-advise.berkeley.edu/requirement/fl.html>) .
11. Courses numbered 97, 98, 99, or above 196 may not be used to complete any H/SS requirement
12. The College of Engineering uses modified versions of five of the College of Letters and Science (L&S) breadth requirements lists to provide options to our students for completing the H/SS requirement. No courses on the L&S Biological Sciences or Physical Sciences breadth lists may be used to complete H/SS requirements. Within the guidelines above, choose courses from any of the lists below.

- Arts and Literature (<http://guide.berkeley.edu/archive/2016-17/undergraduate/colleges-schools/letters-science/breadth-requirement-arts-literature>)
- Foreign Language (<http://ls-advise.berkeley.edu/requirement/fl.html>)
- Historical Studies (<http://guide.berkeley.edu/archive/2016-17/undergraduate/colleges-schools/letters-science/breadth-requirement-historical-studies>)
- International Studies (<http://guide.berkeley.edu/archive/2016-17/undergraduate/colleges-schools/letters-science/breadth-requirement-international-studies>)

- Philosophy and Values (<http://guide.berkeley.edu/archive/2016-17/undergraduate/colleges-schools/letters-science/breadth-requirement-philosophy-values>)
- Social and Behavioral Studies (<http://guide.berkeley.edu/archive/2016-17/undergraduate/colleges-schools/letters-science/breadth-requirement-social-behavioral-sciences>)

Class Schedule Requirements

- Minimum units per semester: 12.0.
- Maximum units per semester: 20.5.
- Minimum technical courses: College of Engineering undergraduates must enroll each semester in no fewer than two technical courses (of a minimum of 3 units each) required of the major program of study in which the student is officially declared. (Note: for most majors, normal progress will require enrolling in 3-4 technical courses each semester).
- All technical courses (math, science, engineering), required of the major or not, must be taken on a letter graded basis (unless only offered as P/NP).
- A student's proposed schedule must be approved by a faculty adviser (or on approval from the dean or a designated staff adviser) each semester prior to enrolling in courses.

Minimum Academic (Grade) Requirements

- A minimum overall and semester grade point average of 2.00 (C average) is required of engineering undergraduates. A student will be subject to dismissal from the University if during any fall or spring semester their overall UC GPA falls below a 2.00, or their semester GPA is less than 2.00.
- Students must achieve a minimum grade point average of 2.00 (C average) in upper division technical courses required of the major curriculum each semester. A student will be subject to dismissal from the University if their upper division technical grade point average falls below 2.00.
- A minimum overall grade point average of 2.00, and a minimum 2.00 grade point average in upper division technical course work required of the major is needed to earn a Bachelor of Science in Engineering.

Unit Requirements

To earn a Bachelor of Science in Engineering, students must complete at least 120 semester units of courses subject to certain guidelines:

- Completion of the requirements of one engineering major program (<http://coe.berkeley.edu/students/guide/departments>) of study.
- A maximum of 16 units of special studies coursework (courses numbered 97, 98, 99, 197, 198, or 199) is allowed towards the 120 units; a maximum of four is allowed in a given semester.
- A maximum of 4 units of physical education from any school attended will count towards the 120 units.
- Students may receive unit credit for courses graded P (including P/NP units taken through EAP) up to a limit of one-third of the total units taken and passed on the Berkeley campus at the time of graduation.

Normal Progress

Students in the College of Engineering must enroll in a full-time program and make normal progress each semester toward the bachelor's degree. The continued enrollment of students who fail to achieve minimum academic progress shall be subject to the approval of the dean. (Note: students with official accommodations established by the Disabled

Students' Program, with health or family issues, or with other reasons deemed appropriate by the dean may petition for an exception to normal progress rules.)

For more detailed information regarding the courses listed below (e.g., elective information, GPA requirements, etc.), see the College Requirements and Major Requirements tabs.

| Freshman | | | | |
|---|------|-------|---|-------|
| | Fall | Units | Spring | Units |

| Free Electives | | 2 | Free Electives | 2 |
| | | 15-16 | | 14-16 |
| Total Units: 120-127 | | | | |

¹ CHEM 4A is intended for students majoring in chemistry or a closely-related field.

- ² BIOLOGY 1B or CIV ENG 70
- ³ CIV ENG 11 or CIV ENG 70. If CIV ENG 70 was taken in the freshman year students must take CIV ENG 11. CIV ENG 70 is only offered in the fall semester. CIV ENG 11 is only offered in the spring semester.
- ⁴ Choose one of the following: PHYSICS 7C, CHEM 1B, or CHEM 4B.
- ⁵ Choose four of the following: CIV ENG 103, CIV ENG 111, CIV ENG 120, CIV ENG 155, CIV ENG 167, CIV ENG 175, CIV ENG 191.
- ⁶ Choose one of the following: ENGIN 115, MEC ENG 40, MEC ENG 104.
- ⁷ Engineering Electives must include at least 15 additional units of upper division technically oriented engineering coursework offered in the College of Engineering or in chemical engineering. Students may receive up to three units of Engineering Elective credit for work on a research project in CIV ENG H194. Students who take CIV ENG 167 for Elective Core and then take ENGIN 120 for Engineering Electives will receive only two units toward Engineering Electives.
- ⁸ The 15 units of Engineering Electives cannot include:
 - Any course taken on a *Pass/No Pass* basis; or
 - Any of the following courses: BIO ENG 100, CHM ENG 185, COMPSCI 195, COMPSCI H195, DES INV 190, ENGIN 125, ENGIN 157AC, IND ENG 172, IND ENG 185, IND ENG 186, IND ENG 190 series, IND ENG 191, IND ENG 192, IND ENG 195, MEC ENG 106, MEC ENG 190K, MEC ENG 191AC and MEC ENG 191K.
- ⁹ Choose one of the following: CIV ENG 105, CIV ENG 112, CIV ENG 122N plus CIV ENG 122L, CIV ENG 123N plus CIV ENG 123L, CIV ENG 153, CIV ENG 177, CIV ENG 180, CIV ENG 186. Note that for the courses listed in this category that are 4 units, 1 of the 4 units can be applied toward the 15 unit Engineering Electives requirement.

Mission

The Civil Engineering undergraduate program educates engineering leaders who will contribute to solving societal problems by improving the civil infrastructure, resource protection, natural hazard mitigation, and the efficient and sustainable functioning of engineered and natural systems in California, the United States, and the world. These objectives are achieved by:

- Educating students with fundamental mathematical, scientific, and engineering knowledge to have a significant and positive long-term impact on the field of civil and environmental engineering.
- Inspiring students and preparing them for successful professional careers, for further studies in high-quality graduate programs in engineering or other professional fields, and for a lifetime of learning.
- Emphasizing the importance of professional and personal ethics, business and management leadership, and service to society.

Learning Goals for the Major

- Ability to apply knowledge of mathematics, science, and engineering.
- Ability to design and conduct experiments, as well as to analyze and interpret data.
- Ability to design a system, component, or process to meet desired needs.
- Ability to function on multidisciplinary teams.
- Ability to identify, formulate, and solve engineering problems.
- Understanding of professional and ethical responsibility.

7. Ability to communicate effectively.
8. Understand the impact of engineering solutions in a global and societal context.
9. Recognition of the need for, and an ability to engage in life-long learning.
10. Knowledge of contemporary issues.
11. Ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Faculty Advisers

Each student in CEE is assigned a faculty adviser in civil and environmental engineering. Students are notified of the name of their adviser shortly after they arrive at Berkeley.

Faculty advisers (and, indeed, all faculty members) hold regularly scheduled office hours throughout the school year for the purpose of helping with course content; giving general advice on courses, career objectives, graduate school, letters of recommendation, and summer internships.

Students are required to meet with their faculty adviser each semester prior to their enrollment appointment to access the online course registration system.

College of Engineering Advising

Students are also assigned an engineering student services (ESS) adviser in the College of Engineering. ESS advisers help with a wide range of issues by assisting with course selection and academic decision-making, suggesting enrichment opportunities, explaining graduation requirements and college policies, monitoring progress towards the degree, and providing support or referrals to campus resources to help students reach their academic and personal goals. Explore the ESS website (<http://engineering.berkeley.edu/student-services/advising>) for detailed information on advising services.

Departmental Advising

CEE's undergraduate adviser answers registration questions, assists with course selection and academic decision-making, describes courses, interprets departmental policy, and makes referrals to resources on campus. The department's undergraduate adviser is located in the CEE Academic Affairs Office, 750 Davis Hall.

Further Information

See CEE Advising (<http://www.ce.berkeley.edu/undergrad/advising>) for more advising resources.

Student Organizations

Join one or more of the active student organizations with CEE and the College of Engineering. Learn to apply CEE knowledge outside of the classroom, get leadership and teamwork experience, meet students with similar interests, go on tours and field trips, and participate in community service projects.

CEE organizations

- ASCE Student Chapter (<http://www.calasce.org>) has a membership of over 230 students.
- Chi Epsilon (<http://www.ocf.berkeley.edu/%7Echiep>) is the undergraduate honor society in CEE (invitation only).

- Competition teams: Concrete Canoe team (<http://calconcretecanoe.squarespace.com/#who-we-are>) , Steel Bridge team (<http://zackm.github.io/SteelBridgeRevamp/about.html>) , Environmental team (<https://www.facebook.com/calenvironmental>) , Construction team (<https://callink.berkeley.edu/organization/constructionteam>) , Geo Wall team (<https://www.facebook.com/calgeowall>) , and the Seismic Design team (<https://www.facebook.com/CalSeismicDesign>) .
- Institute of Transportation Engineers Student Chapter (<http://cal-ite.weebly.com>) .

COE organizations

- Society of Women Engineers (<http://swe.berkeley.edu>)
- Engineers Without Borders (<http://ewb.berkeley.edu>) (EWB)
- Engineers for a Sustainable World (<http://eswberkeley.weebly.com>) (ESW)

Undergraduate Participation in Research

Gain hands-on research experience while at Berkeley. Research experience adds to the quality of the undergraduate program and introduces students to the importance of graduate study.

Research opportunities

- COE's u (<http://coe.berkeley.edu/students/current-undergraduates/student-research>) undergraduate research opportunities (<http://coe.berkeley.edu/students/current-undergraduates/student-research>)
- Undergraduate Research at Berkeley (<http://research.berkeley.edu>)
- Berkeley Undergraduate Research Apprentice Program (<http://research.berkeley.edu/urap>)
- Supervised independent study (<http://www.ce.berkeley.edu/undergrad/curriculum/independent>) CIV ENG 99, CIV ENG 199, and CIV ENG H194). Receive course credit.
- Competition teams: Concrete Canoe (<http://calconcretecanoe.squarespace.com/#who-we-are>) , Steel Bridge (<http://zackm.github.io/SteelBridgeRevamp/about.html>) , Environmental (<https://www.facebook.com/calenvironmental>) , Construction (<https://callink.berkeley.edu/organization/constructionteam>) , and Seismic Design (<https://www.facebook.com/CalSeismicDesign>) .
- Laboratory volunteer

Study Abroad

Civil and environmental engineering is a profession that depends on collaboration with colleagues nationally and internationally. Thus, the department strongly encourages its students to expand their horizons through an international educational experience. See Berkeley's extensive Education Abroad Program (<http://eap.ucop.edu/Pages/index-new.html>) .

Civil Engineering

CIV ENG 11 Engineered Systems and Sustainability 3 Units

Terms offered: Spring 2018, Spring 2017, Summer 2016 8 Week Session
An introduction to key engineered systems (e.g., energy, water supply, buildings, transportation) and their environmental impacts. Basic principles of environmental science needed to understand natural processes as they are influenced by human activities. Overview of concepts and methods of sustainability analysis. Critical evaluation of engineering approaches to address sustainability.

Engineered Systems and Sustainability: Read More [+]

Rules & Requirements

Prerequisites: Chemistry 1A, Mathematics 1A

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Summer: 8 weeks - 6 hours of lecture per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/
Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Harley, Horvath, Nelson

Engineered Systems and Sustainability: Read Less [-]

CIV ENG 24 Freshman Seminars 1 Unit

Terms offered: Spring 2018, Fall 2017, Spring 2017

The Berkeley Seminar Program has been designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Berkeley seminars are offered in all campus departments, and topics vary from department to department and semester to semester.

Freshman Seminars: Read More [+]

Rules & Requirements

Repeat rules: Course may be repeated for credit as topic varies. Course may be repeated for credit when topic changes.

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of seminar per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/
Undergraduate

Grading/Final exam status: The grading option will be decided by the instructor when the class is offered. Final exam required.

Freshman Seminars: Read Less [-]

CIV ENG C30 Introduction to Solid Mechanics 3 Units

Terms offered: Spring 2018, Fall 2017, Summer 2017 10 Week Session
A review of equilibrium for particles and rigid bodies. Application to truss structures. The concepts of deformation, strain, and stress. Equilibrium equations for a continuum. Elements of the theory of linear elasticity. The states of plane stress and plane strain. Solution of elementary elasticity problems (beam bending, torsion of circular bars). Euler buckling in elastic beams.

Introduction to Solid Mechanics: Read More [+]

Rules & Requirements

Prerequisites: Mathematics 53 and 54 (may be taken concurrently);
Physics 7A

Credit Restrictions: Students will receive no credit for Mechanical Engineering C85/Civil and Environmental Engineering C30 after completing Mechanical Engineering W85. A deficient grade in Mechanical Engineering W85 may be removed by taking Mechanical Engineering C85/Civil and Environmental Engineering C30.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Summer:

6 weeks - 7.5 hours of lecture and 2.5 hours of discussion per week

10 weeks - 4.5 hours of lecture and 1.5 hours of discussion per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/
Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Armero, Papadopoulos, Zohdi

Also listed as: MEC ENG C85

Introduction to Solid Mechanics: Read Less [-]

CIV ENG W30 Introduction to Solid Mechanics 3 Units

Terms offered: Summer 2016, Summer 2016 10 Week Session, Summer 2015 10 Week Session, Summer 2015 8 Week Session

A review of equilibrium for particles and rigid bodies. Application to truss structures. The concepts of deformation, strain, and stress. Equilibrium equations for a continuum. Elements of the theory of linear elasticity. The states of plane stress and plane strain. Solution of elementary elasticity problems (beam bending, torsion of circular bars). Euler buckling in elastic beams.

Introduction to Solid Mechanics: Read More [+]

Objectives Outcomes

Course Objectives: To learn statics and mechanics of materials

Student Learning Outcomes:

- Correctly draw free-body
- Apply the equations of equilibrium to two and three-dimensional solids
- Understand the concepts of stress and strain
- Ability to calculate deflections in engineered systems
- Solve simple boundary value problems in linear elastostatics (tension, torsion, beam bending)

Rules & Requirements

Prerequisites: Mathematics 53 and 54 (may be taken concurrently); Physics 7A

Credit Restrictions: Students will receive no credit for Mechanical Engineering W85/Civil and Environmental Engineering W30 after completing Mechanical Engineering C85/Civil and Environmental Engineering C30. A deficient grade in Mechanical Engineering C85/Civil and Environmental Engineering C30 may be removed by taking Mechanical Engineering W85/Civil and Environmental Engineering W30.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of web-based lecture and 1 hour of web-based discussion per week

Summer:

6 weeks - 7.5 hours of web-based lecture and 2.5 hours of web-based discussion per week
 8 weeks - 6 hours of web-based lecture and 2 hours of web-based discussion per week
 10 weeks - 4.5 hours of web-based lecture and 1.5 hours of web-based discussion per week

Online: This is an online course.

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Govindjee

Also listed as: MEC ENG W85

Introduction to Solid Mechanics: Read Less [-]

CIV ENG 60 Structure and Properties of Civil Engineering Materials 3 Units

Terms offered: Spring 2018, Fall 2017, Spring 2017

Introduction to structure and properties of civil engineering materials such as asphalt, cements, concrete, geological materials (e.g. soil and rocks), steel, polymers, and wood. The properties range from elastic, plastic and fracture properties to porosity and thermal and environmental responses. Laboratory tests include evaluation of behavior of these materials under a wide range of conditions.

Structure and Properties of Civil Engineering Materials: Read More [+]

Rules & Requirements

Repeat rules: Students may receive two units of credit for 60 after taking Engineering 45. One unit of a deficient grade may be removed in Engineering 45 with 60.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Monteiro, Ostertag

Structure and Properties of Civil Engineering Materials: Read Less [-]

CIV ENG 70 Engineering Geology 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

Principles of physical and structural geology; the influence of geological factors on engineering works and the environment. Field trip.

Engineering Geology: Read More [+]

Rules & Requirements

Prerequisites: Chemistry 1A (may be taken concurrently)

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of laboratory per week

Summer: 8 weeks - 6 hours of lecture and 4 hours of laboratory per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Glaser, Sitar

Engineering Geology: Read Less [-]

CIV ENG 88 Data Science for Smart Cities 2 Units

Terms offered: Fall 2017, Fall 2016, Spring 2016

Cities become more dependent on the data flows that connect infrastructures between themselves, and users to infrastructures. Design and operation of smart, efficient, and resilient cities nowadays require data science skills. This course provides an introduction to working with data generated within transportation systems, power grids, communication networks, as well as collected via crowd-sensing and remote sensing technologies, to build demand- and supply-side urban services based on data analytics.

Data Science for Smart Cities: Read More [\[+\]](#)

Rules & Requirements

Prerequisites: Corequisite or Prerequisite: Foundations of Data Science (COMPSCI C8/INFO C8/STAT C8). This course is a Data Science connector course and is meant to be taken concurrent with or after COMPSCI C8/INFO C8/STAT C8. Students may take more than one Data Science connector course if they wish, concurrent with or after having taken the C8 course

Hours & Format

Fall and/or spring: 15 weeks - 0.5 hours of lecture, 0.5 hours of discussion, and 1 hour of laboratory per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructor: Pozdnukhov

Data Science for Smart Cities: Read Less [\[-\]](#)

CIV ENG 88B Time Series Analysis: Sea Level Rise and Coastal Flooding 2 Units

Terms offered: Spring 2018, Spring 2017

In this course, we will pursue analysis of long-term records of coastal water levels in the context of sea level rise. We will cover the collection, evaluation, visualization and analysis of time series data using long-term records of sea levels from coastal sites around the world. Specific topics will include extreme events and distributions, frequency-based descriptions, averaging, filtering, harmonic analysis, trend identification, extrapolations, and decision-making under uncertainty.

Time Series Analysis: Sea Level Rise and Coastal Flooding: Read More [\[+\]](#)

Rules & Requirements

Prerequisites: Concurrent or prior enrollment in Foundations of Data Science (COMPSCI C8 / DATASCI C8 / INFO C8 / STAT C8) and Math 1A

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of lecture and 1 hour of laboratory per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructor: Stacey

CIV ENG 92 Introduction to Civil and Environmental Engineering 1 Unit

Terms offered: Fall 2017, Fall 2016, Fall 2015

A course designed to familiarize the entering student with the nature and scope of civil and environmental engineering and its component specialty areas.

Introduction to Civil and Environmental Engineering: Read More [\[+\]](#)

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of lecture per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

Introduction to Civil and Environmental Engineering: Read Less [\[-\]](#)

CIV ENG 93 Engineering Data Analysis 3 Units

Terms offered: Spring 2018, Fall 2017, Spring 2017

Application of the concepts and methods of probability theory and statistical inference to CEE problems and data; graphical data analysis and sampling; elements of set theory; elements of probability theory; random variables and expectation; simulation; statistical inference. Applications to various CEE problems and real data will be developed by use of MATLAB and existing codes. The course also introduces the student to various domains of uncertainty analysis in CEE.

Engineering Data Analysis: Read More [+]

Rules & Requirements

Prerequisites: Engineering 7

Credit Restrictions: Students will receive no credit after taking Statistics 25.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Summer: 6 weeks - 5 hours of lecture and 7.5 hours of laboratory per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Der Kiureghian, Hansen, Madanat, Rubin

Engineering Data Analysis: Read Less [-]

CIV ENG 98 Supervised Group Study and Research 1 - 3 Units

Terms offered: Spring 2018, Fall 2017, Spring 2017

Supervised group study and research by lower division students.

Supervised Group Study and Research: Read More [+]

Rules & Requirements

Prerequisites: Consent of instructor

Credit Restrictions: Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog.

Repeat rules: Course may be repeated for credit.

Hours & Format

Fall and/or spring: 15 weeks - 1-3 hours of directed group study per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

Supervised Group Study and Research: Read Less [-]

CIV ENG 99 Supervised Independent Study and Research 1 - 4 Units

Terms offered: Spring 2018, Fall 2017, Spring 2017

Supervised independent study by lower division students.

Supervised Independent Study and Research: Read More [+]

Rules & Requirements

Prerequisites: Freshman or sophomore standing and consent of instructor. Minimum grade point average of 3.3 required

Repeat rules: Course may be repeated for credit.

Hours & Format

Fall and/or spring: 15 weeks - 1-4 hours of independent study per week

Summer: 8 weeks - 2-7.5 hours of independent study per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

Supervised Independent Study and Research: Read Less [-]

CIV ENG 100 Elementary Fluid Mechanics 4 Units

Terms offered: Fall 2017, Summer 2017 8 Week Session, Fall 2016

Fluid statics and dynamics, including laboratory experiments with technical reports. Fundamentals: integral and differential formulations of the conservation laws are solved in special cases such as boundary layers and pipe flow. Flow visualization and computation techniques are introduced using Matlab. Empirical equations are used for turbulent flows, drag, pumps, and open channels. Principles of empirical equations are also discussed: dimensional analysis, regression, and uncertainty.

Elementary Fluid Mechanics: Read More [+]

Rules & Requirements

Prerequisites: Physics 7A and Mathematics 53 required; concurrent enrollment in Engineering 7, Civil and Environmental Engineering C30/ Mechanical Engineering C85 recommended

Hours & Format

Summer: 8 weeks - 6 hours of lecture and 3 hours of laboratory per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Chow, Stacey, Variano

Elementary Fluid Mechanics: Read Less [-]

CIV ENG 101 Fluid Mechanics of Rivers, Streams, and Wetlands 3 Units

Terms offered: Fall 2014, Spring 2013, Fall 2010

Analysis of steady and unsteady open-channel flow and application to rivers and streams. Examination of mixing and transport in rivers and streams. Effects of channel complexity. Floodplain dynamics and flow routing. Interaction of vegetation and fluid flows. Freshwater and tidal marshes. Sediment transport in rivers, streams, and wetlands. Implications for freshwater ecosystem function.

Fluid Mechanics of Rivers, Streams, and Wetlands: Read More [+]

Rules & Requirements

Prerequisites: 100 or Mechanical Engineering 106 or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Variano

Fluid Mechanics of Rivers, Streams, and Wetlands: Read Less [-]

CIV ENG 103 Introduction to Hydrology 3 Units

Terms offered: Fall 2017, Spring 2017, Spring 2016

Course addresses principles and practical aspects of hydrology. Topics in introduction to hydrology include hydrologic cycle, precipitation, evaporation, infiltration, snow and snowmelt, and streamflow; introduction to geomorphology, GIS (Geographic Information Systems) applications, theory of unit hydrograph, frequency analysis, flood routing through reservoirs and rivers; introduction to rainfall-runoff analyses, watershed modeling, urban hydrology, and introduction to groundwater hydrology. Introduction to Hydrology: Read More [+]

Rules & Requirements

Prerequisites: 93 and 100

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Thompson

Introduction to Hydrology: Read Less [-]

CIV ENG 105 Environmental Fluid Mechanics and Hydrology 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2013

Hands-on design course in applied fluid mechanics, hydrology and water resources. Course goes beyond basic examples of fluid flow to develop environmental engineering solutions to real-world problems. A class team project is used to 1) explore the design process and project management, mirroring a workplace setting; and (ii) to integrate concepts from hydrology and fluid mechanics with structural, geotechnical and transportation engineering for a holistic design approach. Specific project topics vary with offering. Example topics include: engineering for air quality, design for sea-level rise mitigation, and development of alternative water supplies to address scarcity and post-disaster management.

Environmental Fluid Mechanics and Hydrology: Read More [+]

Objectives Outcomes

Course Objectives: To develop and defend design criteria

To gain familiarity with the process of design and project management, from proposal writing to preliminary design delivery

To integrate fundamental engineering principles, subject to the needs and constraints of a specific design.

Rules & Requirements

Prerequisites: Civil and Environmental Engineering 100 or equivalent; two core courses, upper-division standing in science and engineering

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructors: Chow, Stacey, Variano, Thompson

Environmental Fluid Mechanics and Hydrology: Read Less [-]

CIV ENG C106 Air Pollution 3 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

This course is an introduction to air pollution and the chemistry of earth's atmosphere. We will focus on the fundamental natural processes controlling trace gas and aerosol concentrations in the atmosphere, and how anthropogenic activity has affected those processes at the local, regional, and global scales. Specific topics include stratospheric ozone depletion, increasing concentrations of green house gasses, smog, and changes in the oxidation capacity of the troposphere.

Air Pollution: Read More [+]

Rules & Requirements

Prerequisites: Chemistry 1A-1B, Physics 8A or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Goldstein

Also listed as: EPS C180/ESPM C180

Air Pollution: Read Less [-]

CIV ENG 107 Climate Change Mitigation 3 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

Assessment of technological options for responding to climate change. Overview of climate-change science; sources, sinks, and atmospheric dynamics of greenhouse gases. Current systems for energy supply and use. Renewable energy resources, transport, storage, and transformation technologies. Technological opportunities for improving end-use energy efficiency. Recovery, sequestration, and disposal of greenhouse gases. Societal context for implementing engineered responses.

Climate Change Mitigation: Read More [+]

Rules & Requirements

Prerequisites: Upper division or graduate standing in engineering or physical science, or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Nazaroff

Climate Change Mitigation: Read Less [-]

CIV ENG 110 Water Systems of the Future 3 Units

Terms offered: Spring 2018, Spring 2017, Fall 1999

This course will familiarize students with the complex infrastructure used to meet human water demands; competing uses and demands; water and wastewater infrastructure; technologies to enable recovery of water, energy, and other resources from wastewater; supply planning; trends and forecasting; costs, pricing and financing; environmental justice; methods to assess sustainability; regulatory, policy and institutional challenges; and water's contribution to other sectors (e.g., energy, food, buildings). Innovation, both barriers and opportunities, will be highlighted. California and the U.S. will be emphasized but global challenges will be discussed. Students will study, critique, and recommend improvements for a real-world system.

Water Systems of the Future: Read More [+]

Objectives Outcomes

Course Objectives: Consider costs and tradeoffs in water supply planning under uncertainty for real-world water systems
Critically evaluate water planning and innovation potential for real-world utilities given future uncertainties and competing priorities.
Explore the innovation ecosystem in the water sector, its opportunities and challenges, and analyze case studies
Introduce the technologies that are currently in use for treating and managing water and wastewater, as well as innovations that have the potential to dramatically change water infrastructure.
Provide overview and examples of concepts and methods for analyzing the sustainability of water systems
Provide overview of the complex infrastructure systems that supply and manage water and wastewater.

Student Learning Outcomes: Ability to apply knowledge of mathematics, science, and engineering. MODERATE
Ability to communicate effectively. EXTENSIVE
Ability to design a system, component, or process to meet desired needs. MODERATE
Ability to function on multi-disciplinary teams. EXTENSIVE
Ability to identify, formulate and solve engineering problems. MODERATE
Ability to use the techniques, skills, and modern engineering tools necessary for engineering practice. MODERATE
Knowledge of contemporary issues. EXTENSIVE
Recognition of the need for, and an ability to engage in life-long learning. EXTENSIVE
Understand the impact of engineering solutions in a global and societal context. EXTENSIVE
Understanding of professional and ethical responsibility. EXTENSIVE

Rules & Requirements

Prerequisites: Upper division status or consent of the instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Nelson

Water Systems of the Future: Read Less [-]

CIV ENG 111 Environmental Engineering 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

Quantitative overview of air and water contaminants and their engineering control. Elementary environmental chemistry and transport. Reactor models. Applications of fundamentals to selected current issues in water quality engineering, air quality engineering, air quality engineering, and hazardous waste management.

Environmental Engineering: Read More [+]

Rules & Requirements

Prerequisites: Upper division standing in engineering or physical sciences, or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

CIV ENG 111L Water and Air Quality Laboratory 1 Unit

Terms offered: Fall 2017, Fall 2016, Spring 2016

This laboratory course is designed to accompany the lecture topics in Civil Engineering 111. Each laboratory activity will provide an opportunity to understand key concepts in water and air quality through hands-on experimentation. Laboratory topics include phase partitioning, acid/base reactions, redox reactions, biochemical oxygen demand, absorption, gas transfer, reactor hydraulics, particle destabilization, disinfection, and combustion emissions.

Water and Air Quality Laboratory: Read More [+]

Rules & Requirements

Prerequisites: Civil Engineering 111 (may be taken concurrently)

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of lecture and 3 hours of laboratory per week

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam not required.

Instructor: Hermanowicz

Environmental Engineering Design: Read Less [-]

CIV ENG 113 Ecological Engineering for Water Quality Improvement 3 Units

Terms offered: Spring 2017, Fall 2003, Fall 2002

Ecological engineering approaches for treating contaminated water using natural processes to improve water quality. Emphasis on combining basic science and engineering approaches to understand the fundamental processes that govern the effectiveness of complex natural treatment systems. Applications include constructed wetlands, waste stabilization ponds, stormwater bioretention, decentralized wastewater management, ecological sanitation. Laboratory sessions will consist of design and monitoring of laboratory and full-scale natural treatment systems, including a range of water quality measurements.

Ecological Engineering for Water Quality Improvement: Read More [\[+\]](#)

Objectives Outcomes

Course Objectives: Become familiar with common applications of natural treatment systems through lectures, reading materials, laboratory activities, and field trips

Develop a solid understanding of the fundamental processes in ecological engineering approaches to natural treatment systems that govern the removal or transformation of contaminants in water

Learn common design approaches for waste stabilization ponds and wetlands, as well as their necessary operation and maintenance activities Measure key water quality parameters and evaluate the performance of mesocosm ponds and wetlands based on the data collected throughout the semester

Understand and appreciate the complexity of these systems compared to mechanical treatment systems

Student Learning Outcomes: Ability to apply knowledge of mathematics, science, and engineering. EXTENSIVE
Ability to communicate effectively. MODERATE
Ability to design a system, component, or process to meet desired needs. EXTENSIVE

Ability to design and conduct experiments, as well as to analyze and interpret data. EXTENSIVE

Ability to function on multi-disciplinary teams. MODERATE

Ability to identify, formulate and solve engineering problems. EXTENSIVE

Ability to use the techniques, skills, and modern engineering tools

necessary for engineering practice. EXTENSIVE

Knowledge of contemporary issues. MODERATE

Recognition of the need for, and an ability to engage in life-long learning. MODERATE

Understand the impact of engineering solutions in a global and societal context. MODERATE

Understanding of professional and ethical responsibility. MODERATE

Rules & Requirements

Prerequisites: 111 or consent of instructor

Credit Restrictions: Civ Eng 113N

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Also listed as: ESPM C128

Chemistry of Soils: Read Less [-]

CIV ENG 120 Structural Engineering 3 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

Introduction to design and analysis of structural systems. Loads and load placement. Proportioning of structural members in steel, reinforced concrete, and timber. Structural analysis theory. Hand and computer analysis methods, validation of results from computer analysis. Applications, including bridges, building frames, and long-span cable structures.

Structural Engineering: Read More [+]

Rules & Requirements

Prerequisites: Civil and Environmental Engineering C30/Mechanical Engineering C85 required; Civil and Environmental Engineering 60 (maybe taken concurrently)

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Summer: 6 weeks - 5 hours of lecture and 7.5 hours of laboratory per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Moehle

Structural Engineering: Read Less [-]

CIV ENG 121 Structural Analysis 3 Units

Terms offered: Fall 2017, Fall 2016, Spring 2016

Theory and application of structural analysis. Stiffness and flexibility methods, with emphasis on the direct stiffness method. Equilibrium and compatibility. Virtual work. Response of linear and simple nonlinear structures to static loads. Use of computer programs for structural analysis. Modeling of two- and three-dimensional structures. Verification and interpretation of structural response.

Structural Analysis: Read More [+]

Objectives Outcomes

Course Objectives: Collapse load factor determination of simple structures by lower bound theorem of plastic analysis.

Consistent process of writing equilibrium and compatibility relations for small and large structures permitting solution by hand and by matrix algebra software. Identification of degree of static indeterminacy. Force-deformation relations for truss and frame elements. Modeling of structures. Nodes, elements, loading, organization of information for describing structural model, element properties and loading.

Solution of simple statically indeterminate structures by the force method of analysis. Understanding of structure flexibility and flexibility coefficients. Treatment of nodal loads and non-mechanical element deformations.

Solution of statically indeterminate structures of any size by the displacement method of analysis. Stiffness coefficients. Treatment of element and thermal loads. Computer implementation in the form of the direct stiffness approach.

Structural systems and their use in buildings and bridges. Parametric studies.

Work and energy principles. Principles of virtual work and complementary virtual work. Relation between virtual work principles and equilibrium/compatibility relations.

Student Learning Outcomes: Analyze any type of truss and frame structure with the displacement method of analysis by hand and by computer. Determine internal forces, deformations, global displacements, support reactions. Error checking of computer analysis results (ABET Learning Goals: 1, 3, 5).

Determine the collapse load of simple perfectly-plastic truss and frame structures under equilibrium considerations (ABET Learning Goals: 1, 3, 5).

Identify the structural response contribution of individual elements and identify the effect of changes in element properties on the results (ABET Learning Goals: 1, 3, 11).

Perform analysis of statically determinate truss and frame structures under equilibrium and compatibility considerations. Perform equilibrium checks of given results under given loading. Perform compatibility checks for given deformations (ABET Learning Goals: 1, 3, 5).

Recognize force flow in beam, arch and cable structures and their derivatives, like suspension bridges, cable-stayed bridges, roofs and high-rise buildings (ABET Learning Goals: 3, 8, 10, 11).

Understand basic structural systems and their use throughout history and in modern times. (ABET Learning Goals: 3, 8, 10, 11)

Understand structural modeling. Be able to assess the complexity of a structural model and identify number of unknowns in the solution of the structural response to given loading. Be able to select the most appropriate solution method for hand calculations (ABET Learning Goals: 1, 3, 5).

Rules & Requirements

Prerequisites: Civ Eng 120 and Civ Eng 130 or equivalent

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of

CIV ENG 122L Structural Steel Design Project 1 Unit

Terms offered: Spring 2018, Spring 2017, Spring 2016

Introduction to one or more comprehensive structural design problems. Design teams will conceive structural system; determine design loads; conduct preliminary and final design of structure and its foundation; prepare construction cost estimate; prepare final report containing project description, design criteria, cost estimate, structural drawings, and supporting calculations; and make "client" presentations as required. Structural Steel Design Project: Read More [\[+\]](#)

Rules & Requirements

Prerequisites: Civil and Environmental Engineering 122N

Credit Restrictions: Students will receive no credit for Civil and Environmental Engineering 122L after taking Civil and Environmental Engineering 122 or 123L.

Hours & Format

Fall and/or spring: 15 weeks - 1.5 hours of lecture per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam not required.

Instructors: Astaneh, Stojadinovic

Structural Steel Design Project: Read Less [\[-\]](#)

CIV ENG 122N Design of Steel Structures 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

Introduction to materials and methods of steel construction; behavior and design of tension members, compression members, flexural members and beam-columns; design of welds, bolts, shear connections and moment connections; design of spread footings or other foundation elements, introduction to design of earthquake-resistant steel structures including concentrically braced frames and moment frames. Design of Steel Structures: Read More [\[+\]](#)

Rules & Requirements

Prerequisites: Civil and Environmental Engineering 120 or equivalent

Design of Reinforced Concrete Structures: Read Less [\[-\]](#)

CIV ENG 124 Structural Design in Timber 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

Characteristics and properties of wood as a structural material; design and detailing of structural elements and entire structures of wood. Topics include allowable stresses, design and detailing of solid sawn and glulam beams and columns, nailed and bolted connections, plywood diaphragms and shear walls. Case studies.

Structural Design in Timber: Read More [+]

Rules & Requirements

Prerequisites: 120

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/
Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Mahin, Filippou

Structural Design in Timber: Read Less [-]

CIV ENG 130N Mechanics of Structures 3 Units

Terms offered: Spring 2018, Summer 2017 8 Week Session, Spring 2017

Elastic and plastic stress and deformation analysis of bars, shafts, beams, and columns; energy and variational methods; plastic analysis of structures; stability analysis of structures; computer-aided mathematical techniques for solution of engineering problems and modular computer programming methods.

Mechanics of Structures: Read More [+]

Rules & Requirements

Prerequisites: C30/Mechanical Engineering C85, and either 60 or Engineering 45

Credit Restrictions: Students will receive no credit for 130N after taking 130.

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Summer: 8 weeks - 4 hours of lecture and 6 hours of laboratory per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/
Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Filippou, Govindjee, Li

Mechanics of Structures: Read Less [-]

CIV ENG C133 Engineering Analysis Using the Finite Element Method 3 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

This is an introductory course on the finite element method and is intended for seniors in engineering and applied science disciplines. The course covers the basic topics of finite element technology, including domain discretization, polynomial interpolation, application of boundary conditions, assembly of global arrays, and solution of the resulting algebraic systems. Finite element formulations for several important field equations are introduced using both direct and integral approaches. Particular emphasis is placed on computer simulation and analysis of realistic engineering problems from solid and fluid mechanics, heat transfer, and electromagnetism. The course uses FEMLAB, a multiphysics MATLAB-based finite element program that possesses a wide array of modeling capabilities and is ideally suited for instruction. Assignments will involve both paper- and computer-based exercises. Computer-based assignments will emphasize the practical aspects of finite element model construction and analysis.

Engineering Analysis Using the Finite Element Method: Read More [+]

Rules & Requirements

Prerequisites: Engineering 7 or 77 or Computer Science 61A; Mathematics 53 and 54; senior status in engineering or applied science

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of laboratory per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/
Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Also listed as: MEC ENG C180

Engineering Analysis Using the Finite Element Method: Read Less [-]

CIV ENG 140 Failure Mechanisms in Civil Engineering Materials 3 Units

Terms offered: Spring 2013, Spring 2010, Spring 2009

The failure mechanisms in civil engineering materials (cement-based materials, metallic- and polymer-based materials) are associated with processing, microstructure, stress states, and environmental changes. Fracture mechanics of brittle, quasi-brittle, and ductile materials; cracking processes in monolithic, particulate, and fiber reinforced materials; examples of ductile/brittle failure transitions in civil engineering structures; retrofitting of existing structures; non-destructive techniques for damage detection.

Failure Mechanisms in Civil Engineering Materials: Read More [+]

Rules & Requirements

Prerequisites: 60

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/
Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Ostertag

Failure Mechanisms in Civil Engineering Materials: Read Less [-]

CIV ENG 153 Transportation Facility Design 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

A capstone class with the objective to design transportation facilities based on operational capacity, site constraints, and environmental design considerations. Emphasis on airports, including landside and airside elements, and environmental assessment and mitigation techniques.

Transportation Facility Design: Read More [+]

Rules & Requirements

Prerequisites: 155

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/
Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Hansen

Transportation Facility Design: Read Less [-]

CIV ENG 155 Transportation Systems Engineering 3 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

Operation, management, control, design, and evaluation of passenger and freight transportation systems. Their economic role. Demand analysis. Overall logistical structure. Performance models and modeling techniques: time-space diagrams, queuing theory, network analysis, and simulation. Design of control strategies for simple systems. Feedback effects. Paradoxes. Transportation impact modeling; noise; air pollution. Multi-criteria evaluation and decision making. Financing and politics. Transportation Systems Engineering: Read More [+]

Rules & Requirements

Prerequisites: Sophomore standing in engineering or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/
Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Cassidy, Daganzo, Hansen, Kanafani, Madanat

Transportation Systems Engineering: Read Less [-]

CIV ENG 156 Infrastructure Planning and Management 3 Units

Terms offered: Fall 2014, Spring 2014, Fall 2011

This course focuses on physical infrastructure systems that support society, including transportation, communications, power, water, and waste. These are complex, large-scale systems that must be planned and managed over a long-term horizon. Economics-based, analytical tools are covered, including topics of supply, demand, and evaluation. Problem sets, case studies, and a class project provide for hands-on experience with a range of infrastructure systems, issues, and methods of analysis. Infrastructure Planning and Management: Read More [+]

Rules & Requirements

Prerequisites: Mathematics 1A-1B and Civil Engineering 93 (or equivalent)

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/
Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Walker

Infrastructure Planning and Management: Read Less [-]

CIV ENG 165 Concrete Materials, Construction, and Sustainability 3 Units

Terms offered: Spring 2018, Fall 2016, Spring 2016

Concrete materials: cements, supplementary cementitious materials, water, and admixtures. Sustainability analysis of concrete materials and mixtures. Development of special concretes: self-leveling concrete, high-performance concrete, and mass concrete. Consideration of sustainability of concrete construction methods used for buildings, highways, airfields, bridges, dams and other hydraulic structures. Non-destructive methods. Discussion of long-term durability. Comprehensive group projects. Concrete Materials, Construction, and Sustainability: Read More [+]

Rules & Requirements

Prerequisites: 60

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Monteiro

Concrete Materials, Construction, and Sustainability: Read Less [-]

CIV ENG 166 Construction Engineering 3 Units

Terms offered: Spring 2016, Fall 2014, Fall 2012

Introduction to construction engineering and field operations. The construction industry, construction methods and practice, productivity improvement, equipment selection, site layout formwork, erection of steel and concrete structures. Labs demonstrate the concepts covered. Field trips to local construction projects.

Construction Engineering: Read More [+]

Rules & Requirements

Prerequisites: Upper division standing, 167 recommended

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 3 hours of laboratory per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Horvath

Construction Engineering: Read Less [-]

CIV ENG 167 Engineering Project Management 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

Principles of economics, decision making, and law applied to company and project management. Business ownership, liability and insurance, cash flow analysis, and financial management. Project life-cycle, design-construction interface, contracts, estimating, scheduling, cost control. Engineering Project Management: Read More [+]

Rules & Requirements

Prerequisites: 93 (can be taken concurrently) or equivalent

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Ibbs, Tommelein

Engineering Project Management: Read Less [-]

CIV ENG 171 Rock Mechanics 3 Units

Terms offered: Spring 2017, Spring 2016, Spring 2015

Geological and geophysical exploration for structures in rock; properties and behavior of rock masses; rock slope stability; geological engineering of underground openings; evaluation of rock foundations, including dams. Rock Mechanics: Read More [+]

Rules & Requirements

Prerequisites: Civil and Environmental Engineering 70 or an introductory course in physical geology and upper division standing in Engineering

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Glaser

Rock Mechanics: Read Less [-]

CIV ENG 173 Groundwater and Seepage 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

Introduction to principles of groundwater flow, including steady and transient flow through porous media, numerical analysis, pumping tests, groundwater geology, contaminant transport, and design of waste containment systems.

Groundwater and Seepage: Read More [+]

Rules & Requirements

Prerequisites: Senior standing in engineering or science, 100 recommended

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Rubin, Sitar

Groundwater and Seepage: Read Less [-]

CIV ENG 174 Engineering Geomatics 3 Units

Terms offered: Summer 2015 First 6 Week Session, Summer 2014 10 Week Session, Summer 2014 First 6 Week Session

Engineering Geomatics is a field that integrates collections, processing, and analysis of digital geospatial data. This new field is anchored in the established field of geodetics that describes the complex shape of the Earth, elements and usage of topographic data and maps. Basic and advanced GPS satellite mapping. Digital globe technology. Advanced laser-LIDAR mapping. Quantitative terrain modeling, change detection, and analysis. Hydrogeomatics-seafloor mapping.

Engineering Geomatics: Read More [+]

Hours & Format

Summer: 6 weeks - 6 hours of lecture and 5 hours of laboratory per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Engineering Geomatics: Read Less [-]

CIV ENG 175 Geotechnical and Geoenvironmental Engineering 3 Units

Terms offered: Spring 2018, Fall 2017, Fall 2016

Soil formation and identification. Engineering properties of soils. Fundamental aspects of soil characterization and response, including soil mineralogy, soil-water movement, effective stress, consolidation, soil strength, and soil compaction. Use of soils and geosynthetic materials in geotechnical and geoenvironmental applications. Introduction to site investigation techniques. Laboratory testing and evaluation of soil composition and properties.

Geotechnical and Geoenvironmental Engineering: Read More [+]

Rules & Requirements

Prerequisites: Civil and Environmental Engineering C30/Mechanical Engineering C85 (may be taken concurrently). Civil and Environmental Engineering 100 recommended

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 2 hours of laboratory per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Bray, Pestana, Seed, Sitar

Geotechnical and Geoenvironmental Engineering: Read Less [-]

CIV ENG 176 Environmental Geotechnics 3 Units

Terms offered: Spring 2016, Spring 2015, Spring 2014

Principles of environmental geotechnics applied to waste encapsulation and remediation of contaminated sites. Characterization of soils and wastes, engineering properties of soils and geosynthetic materials and their use in typical applications. Fate and transport of contaminants. Fundamental principles and practices in groundwater remediation. Application of environmental geotechnics in the design and construction of waste containment systems. Discussion of soil remediation and emerging technologies.

Environmental Geotechnics: Read More [+]

Rules & Requirements

Prerequisites: 175 required (or consent of instructor). 111 and 173 recommended

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Pestana, Sitar

Environmental Geotechnics: Read Less [-]

CIV ENG 177 Foundation Engineering Design 3 Units

Terms offered: Spring 2017, Spring 2016, Fall 2014

Principles of foundation engineering. Shear strength of soil and theories related to the analysis and design of shallow and deep foundations, and retaining structures. Structural design of foundation elements; piles, pile caps, and retaining structures. The course has a group project that incorporates both geotechnical and structural components of different foundation elements.

Foundation Engineering Design: Read More [\[+\]](#)

Rules & Requirements

Prerequisites: Civil and Environmental Engineering 175 required, Civil and Environmental Engineering 120 recommended

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Bray, Seed

Foundation Engineering Design: Read Less [\[-\]](#)

CIV ENG C178 Applied Geophysics 3 Units

Terms offered: Fall 2017, Fall 2016, Fall 2015

The theory and practice of geophysical methods for determining the subsurface distribution of physical rock and soil properties. Measurements of gravity and magnetic fields, electrical and electromagnetic fields, and seismic velocity are interpreted to map the subsurface distribution of density, magnetic susceptibility, electrical conductivity, and mechanical properties.

Applied Geophysics: Read More [\[+\]](#)

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details

Subject/Course Level: Civil and Environmental Engineering/ Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Rector

Also listed as: EPS C178

Applied Geophysics: Read Less [\[-\]](#)

CIV ENG 179 Geosystems Engineering Design 3 Units

Terms offered: Spring 2018, Fall 1996

Geosystem engineering design principles and concepts. Fundamental aspects of the geomechanical and geoenvironmental responses of soil are applied to analyze and design civil systems, such as earth dams and levees, earth retention systems, building and bridge foundations, solid-waste fills, and tailings dams. Students form teams to design geotechnical aspects of a civil project and prepare/present a design document. Field trip to a project site.

Geosystems Engineering Design: Read More [\[+\]](#)

Rules & Requirements

Prerequisites: CE 175

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Additional Details

Grading/Final exam status: Letter grade. Final exam required.

Instructors: Bray, Sitar, Soga

Geosystems Engineering Design: Read Less [\[-\]](#)

CIV ENG 180 Life-Cycle Design and Construction 4 Units

Terms offered: Spring 2018, Spring 2017, Spring 2015

Course encompasses two design aspects of a civil and environmental engineering system: 1) Design of whole system, component, or life-cycle phase, subject to engineering standards and constraints, and 2) production system design (e.g., cost estimation and control, scheduling, commercial and legal terms, site layout design). Students form teams to address real-life projects and prepare project documentation and a final presentation.

Life-Cycle Design and Construction: Read More [\[+\]](#)

Rules & Requirements

Prerequisites: Civil and Environmental Engineering 167

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

CIV ENG 191 Civil and Environmental Engineering Systems Analysis 3 Units

Terms offered: Spring 2018, Fall 2016, Fall 2015

This course is organized around five real-world large-scale CEE systems problems. The problems provide the motivation for the study of quantitative tools that are used for planning or managing these systems. The problems include design of a public transportation system for an urban area, resource allocation for the maintenance of a water supply system, development of repair and replacement policies for reinforced concrete bridge decks, traffic signal control for an arterial street, scheduling in a large-scale construction project.
