# Psychology

# Bachelor of Arts (BA)

Psychology as a scientific discipline aims to describe, understand, and predict the behavior of living organisms. In doing so, psychology embraces the many factors that influence behavior—from sensory experience to complex cognition, from the role of genetics to that of social and cultural environments, from the processes that explain behavior in early childhood to those that operate in older ages, and from normal development to pathological conditions. The Psychology Department at UC Berkeley reflects the diversity of our discipline's mission covering six key areas of research: Behavioral and Systems Neuroscience; Clinical Science; Cognition; Cognitive Neuroscience; Developmental, and Social-Personality Psychology. Despite the existence of these specialization areas, the program learning goals focus on fostering methodological, statistical, and critical thinking skills that are not tied to any one particular content area in psychology but are relevant for all of them.

The major serves three purposes:

- For the liberal arts student, the study of psychology provides an avenue for increased self-understanding and insight into the behavior of others. The objective study of behavior is one of the major themes of intellectual history in the last hundred-plus years.
- For students preparing for training in such professions as medicine, law, education and business, psychology provides important basic knowledge and principles.
- For students who plan on pursuing graduate work in psychology, the undergraduate major seeks to establish a sound foundation of research principles and knowledge of a variety of content areas.

# **Declaring the Major**

Psychology is a capped (impacted) major at UC Berkeley. This means that due to high demand, the program unfortunately cannot accommodate every student who wishes to major in Psychology. As part of the terms of being a capped major, all students who apply to the major and meet the following criteria are guaranteed admission:

- 1. Have a 3.2 grade point average (GPA) in *the seven/eight* prerequisite courses. (Note: GPA is not rounded up.)
- 2. Students who entered UC Berkeley as a freshman must declare the major by their 5th semester OR prior to the accumulation of 80 semester units including work in progress (AP or college credit obtained in high school do not count towards the 80 units). Those who entered Berkeley as a junior level transfer must declare the major no later than their first semester at UC Berkeley.
- Submit the application to the major by the posted deadline. Please refer to the department website (http://psychology.berkeley.edu/ students/undergraduate-program/applying-major) for exact deadlines.

If any of the above criteria are not met, students may still be admitted to the major. However, there is **no guarantee**. Please understand that applications will not be processed until all prerequisite courses are complete and final grades have been posted. This may mean that students will not technically be admitted to the major until the beginning of the following semester.

# **Honors Program**

Students with a 3.5 GPA in their major and 3.3 GPA overall may apply for admission to the honors program. For students interested in the honors program, it is recommended to participate in the Undergraduate Research Apprentice Program (http://research.berkeley.edu/urap) (URAP) or departmental research during their junior year. This will prepare them for experimental research and design necessary for completing their own project.

Students are *required* to complete the following courses, none of which count toward major requirements:

- PSYCH 102 Statistics for Psychological Research is a 3 unit upper division course that is designed to introduce students to the data analysis techniques researchers using the field of psychology. This course is only offered in fall and may be taken as early as the junior year. This course *must* be taken for a letter grade (P/NP grading not accepted). Completion of PSYCH 10/PSYCH 101 is a required prerequisite to this course.
- UGIS 192B or PSYCH 199 Students applying to the honors program are required to be a research apprentice in the laboratory of their intended faculty sponsor. Students must begin their research project in the spring of their junior year. The URAP office will provide the students enrollment information for UGIS 192 (course control number and class entry code) to register via Tele-BEARS and the Psychology Student Services Office will provide enrollment information for Psych 199. A minimum of 2 units of UGIS 192 or Psych 199 is required.
- PSYCH H194A / PSYCH H194B Honors students are required to concurrently enroll in Psychology H194A-B (2 units per semester), the honors seminar, in their senior year. This course provides excellent supplemental background for preparing the thesis.
- PSYCH H195A / PSYCH H195B Psychology H195A-B is offered for 1-3 units per semester and is mandatory in order to receive honors in the major. The course is sequential with a grade of In Progress or "IP" for the "A" portion and the final grade assigned for both semesters at the end of the "B" portion.

## Minor Program

There is no minor program in Psychology.

In addition to the University, campus, and college requirements, listed on the College Requirements tab, students must fulfill the below requirements specific to their major program.

## **General Guidelines**

- All courses taken to fulfill the major requirements below must be taken for graded credit, other than courses listed which are offered on a *Pass/No Pass* basis only. Other exceptions to this requirement are noted as applicable.
- No more than one upper division course may be used to simultaneously fulfill requirements for a student's major and minor programs, with the exception of minors offered outside of the College of Letters & Science.
- A minimum grade point average (GPA) of 2.0 must be maintained in both upper and lower division courses used to fulfill the major requirements.

For information regarding residence requirements and unit requirements, please see the College Requirements tab.

\*\*Please contact the students services offices (http:// psychology.berkeley.edu/students/undergraduate-program/academicadvising) or make an appointment with your student services adviser (http://psychology.berkeley.edu/students/undergraduate-program/majoradvising) for any questions related to these requirements.\*\*

## Lower Division Prerequisites: Plan I

Applicable to freshman admitted to UC Berkeley fall 2016 or later and transfers admitted spring 2017 or later.

Psychology<sup>1</sup> PSYCH 1 General Psychology **Biological Science**<sup>2</sup> Select two of the following: ANTHRO 1 Introduction to Biological Anthropology BIOLOGY 1A General Biology Lecture **INTEGBI 31** The Ecology and Evolution of Animal Behavior MCELLBI 32 Introduction to Human Physiology PSYCH C61 Brain, Mind, and Behavior (cross-listed as MCELLBI C61) PSYCH C64 Exploring the Brain: Introduction to Neuroscience (cross-listed as MCELLBI C64) Social Science Select two of the following, from two different departments: ANTHRO 3 Introduction to Social and Cultural Anthropology ANTHRO 3AC Introduction to Social/Cultural Anthropology (American Cultures) LINGUIS 5 Language and Linguistics PHILOS 3 The Nature of Mind PHILOS 4 Knowledge and Its Limits PHILOS 5 Science and Human Understanding PHILOS 12A Introduction to Logic PHILOS 25B Modern Philosophy POL SCI 1 Introduction to American Politics POL SCI 2 Introduction to Comparative Politics POL SCI 4 Introduction to Political Theory SOCIOL 1 Introduction to Sociology SOCIOL N1H Introduction to Sociology for Pre-Health Majors SOCIOL 3AC Principles of Sociology: American Cultures Quantitative A total of 3 courses is required. You must take: PSYCH 101 Research and Data Analysis in Psychology Plus two of the following: MATH 10A Methods of Mathematics: Calculus, Statistics, and Combinatorics (highly recommended) MATH 10B Methods of Mathematics: Calculus, Statistics, and Combinatorics (highly recommended) Calculus MATH 1A MATH 1B Calculus MATH 54 Linear Algebra and Differential Equations MATH 55 **Discrete Mathematics** STAT 2 Introduction to Statistics or STAT 20 Introduction to Probability and Statistics

or STAT 20 Introduction to Probability and Statistics or STAT 21 Introductory Probability and Statistics for Business

- <sup>1</sup> AP Psychology with a score of 4 or 5 will satisfy this prerequisite.
- <sup>2</sup> AP Biology with a score of 4 or 5 will satisfy one biological science prerequisite from the first section only (PSYCH C61 or PSYCH C64 will not be satisfied).

## Lower Division Prerequisites: Plan II

Applicable to freshman admitted to UC Berkeley fall 2014 or later and transfers admitted fall 2015 or later.

#### Psychology<sup>1</sup> PSYCH 1 General Psychology **Biological Science**<sup>2</sup> Select one of the following: ANTHRO 1 Introduction to Biological Anthropology BIOLOGY 1A General Biology Lecture **INTEGBI 31** The Ecology and Evolution of Animal Behavior MCELLBI 32 Introduction to Human Physiology Select one of the following: PSYCH C61 Brain, Mind, and Behavior (cross-listed as MCELLBI C61) PSYCH C64 Exploring the Brain: Introduction to Neuroscience (cross-listed as MCELLBI C64) **Social Science** Select two of the following, from two different departments: ANTHRO 3 Introduction to Social and Cultural Anthropology ANTHRO 3AC Introduction to Social/Cultural Anthropology (American Cultures) LINGUIS 5 Language and Linguistics PHILOS 3 The Nature of Mind PHILOS 4 Knowledge and Its Limits PHILOS 12A Introduction to Logic PHILOS 25B Modern Philosophy SOCIOL 1 Introduction to Sociology SOCIOL 3AC Principles of Sociology: American Cultures SOCIOL 3 Course Not Available Quantitative A total of 3 courses is required. - <sup>3</sup> AP US Government or AP Comparative Government with a score of 4 or 5 will satisfy *one* of the social science requirements; the second social science course may not be in political science.

## **Upper Division Requirements: Plan I**

Applicable to freshman admitted to UC Berkeley fall 2016 or later and transfers admitted spring 2017 or later.

### **Tier II Requirements:**

A minimum of five courses from the following, with at least one in each area:

|  | Biological                |   |  |  |
|--|---------------------------|---|--|--|
|  | PSYCH 110                 | Introduction to Biological Psychology <sup>1</sup>                  |  |  |
|  | PSYCH 117                 | Human Neuropsychology   |  |  |
|  | PSYCH C127                | Cognitive Neuroscience (cross-listed with COG SCI C127)             |  |  |
|  | Cognitive & Developmental |   |  |  |
|  | PSYCH C120                | Basic Issues in Cognition (cross-listed with COG SCI C100)          |  |  |
|  | PSYCH C126                | Perception (cross-listed with COG SCI C126)                         |  |  |
|  | PSYCH 140                 | Developmental Psychology  |  |  |
|  | PSYCH C143                | Language Acquisition (cross-listed with<br>LINGUIS C146)            |  |  |
|  | Social/Personality        |   |  |  |
|  | PSYCH 150                 | Psychology of Personality   |  |  |
|  | PSYCH 156                 | Human Emotion   |  |  |
|  | PSYCH 160                 | Social Psychology   |  |  |
|  | PSYCH 166AC               | Cultural Psychology   |  |  |
|  | PSYCH 180                 | Industrial-Organizational Psychology                                |  |  |
|  | Clinical                  |   |  |  |
|  | PSYCH 130                 | Clinical Psychology   |  |  |
|  | PSYCH 131                 | Developmental Psychopathology                                       |  |  |
|  | PSYCH 134                 | Health Psychology   |  |  |
|  | PSYCH 135                 | Treating Mental Illness: Development, Evaluation, and Dissemination |  |  |
|  | Tier III Requirem         | ents:   |  |  |
|  |                           |   |  |  |

Select three additional upper division psychology courses, numbered between PSYCH 104-PSYCH 182, of at least 3 units each. Any excess survey courses will count toward Tier III. The course number 192 is used to designate a new class and may apply toward one of the electives. <sup>2, 3</sup>

- <sup>1</sup> Effective fall 2016: students will not receive credit for PSYCH 110 if MCELLBI C61 Brain, Mind, and Behavior is taken prior. Students must take another course to meet biological sciences requirement.
- <sup>2</sup> Only one of these courses may be a seminar (courses ending in "8").
- <sup>3</sup> PSYCH 102, PSYCH H194A / PSYCH H194B, PSYCH H195A / PSYCH H195B not count toward coursework requirements.

## **Upper Division Requirements: Plan II**

Applicable to freshman admitted fall 2014 or later and transfers admitted fall 2015 or later.

## Tier II Requirements:

A minimum of five courses from the following, with at least one in each area:

| Biological    |   |
|---------------|---|
| PSYCH 110     | Introduction to Biological Psychology                               |
| PSYCH 125     | The Developing Brain  |
| PSYCH C127    | Cognitive Neuroscience (cross-listed with COG SCI C127)             |
| Cognitive & D | evelopmental  |
| PSYCH C120    | Basic Issues in Cognition (cross-listed with COG SCI C100)          |
| PSYCH C126    | Perception (cross-listed with COG SCI C126)                         |
| PSYCH 140     | Developmental Psychology  |
| PSYCH C143    | Language Acquisition (cross-listed with LINGUIS C146)               |
| Social/Person | ality   |
| PSYCH 150     | Psychology of Personality   |
| PSYCH 156     | Human Emotion   |
| PSYCH 160     | Social Psychology   |
| PSYCH 166AC   | Cultural Psychology   |
| PSYCH 180     | Industrial-Organizational Psychology                                |
| Clinical      |   |
| PSYCH 130     | Clinical Psychology   |
| PSYCH 131     | Developmental Psychopathology                                       |
| PSYCH 134     | Health Psychology   |
| PSYCH 135     | Treating Mental Illness: Development, Evaluation, and Dissemination |
|               |   |

### **Tier III Requirements:**

Select three additional upper division psychology courses, numbered between PSYCH 104-PSYCH 182, of at least 3 units each.  $^{\rm 1,\,2}$ 

<sup>1</sup> Only one of these courses may be a seminar (courses ending in "8").

 <sup>2</sup> PSYCH 102, PSYCH H194A / PSYCH H194B, PSYCH H195A / PSYCH H195B, PSYCH 197, PSYCH 198 & PSYCH 199 do not count toward coursework requirements.

## **Upper Division Requirements: Plan III**

Applicable to freshman admitted fall 2013/spring 2014 and transfers admitted fall 2013–spring 2015.

## **Tier II Requirements**

PSYCH 101 Research and Data Analysis in Psychology<sup>1</sup>

A minimum of five courses from the following, with at least one in each area:

## Biological

| PSYCH 110  | Introduction to Biological Psychology                   |
|------------|---|
| PSYCH 125  | The Developing Brain                                    |
| PSYCH C127 | Cognitive Neuroscience (cross-listed with COG SCI C127) |

## Cognitive & Developmental

PSYCH C120 Basic Issues in Cognition (cross-listed with COG SCI C100)

| PSYCH C126    | Perception (cross-listed with COG SCI C126)           |
|---------------|---|
| PSYCH 140     | Developmental Psychology                              |
| PSYCH C143    | Language Acquisition (cross-listed with LINGUIS C146) |
| Social/Person | ality   |
| PSYCH 150     | Psychology of Personality                             |
| PSYCH 156     | Human Emotion   |
| PSYCH 160     | Social Psychology                                     |
| PSYCH 166AC   | Cultural Psychology                                   |
| PSYCH 180     | Industrial-Organizational Psychology                  |
| Clinical      |   |
| PSYCH 130     | Clinical Psychology                                   |
| PSYCH 131     | Developmental Psychopathology                         |
| PSYCH 134     | Health Psychology                                     |
| <br>          |   |

## **Tier III Requirements:**

Select three additional upper division psychology courses, numbered between PSYCH 104-PSYCH 182, of at least 3 units each. <sup>2, 3</sup>

<sup>1</sup> Also listed as PSYCH 10.

- <sup>2</sup> Only one of these courses may be a seminar (courses ending in "8").
- <sup>3</sup> PSYCH 102, PSYCH H194A / PSYCH H194B, PSYCH H195A / PSYCH H195B, PSYCH 197, PSYCH 198 & PSYCH 199 do not count toward coursework requirements.

## **Upper Division Requirements: Plan IV**

Applicable to all students admitted prior to fall 2013.

## **Required Courses**

|    | PSYCH 101                       | Research and Data Analysis in Psychology <sup>1</sup>    |
|----|---------------------------------|--|
| TI | hree of the Foll                | owing Decade Courses                                     |
|    | PSYCH 110                       | Introduction to Biological Psychology                    |
|    | PSYCH C120                      | Basic Issues in Cognition (cross-listed as COG SCI C100) |
|    | PSYCH 130                       | Clinical Psychology                                      |
|    | PSYCH 140                       | Developmental Psychology                                 |
|    | PSYCH 150                       | Psychology of Personality                                |
|    | PSYCH 160                       | Social Psychology  |
|    | PSYCH 180                       | Industrial-Organizational Psychology                     |
| E  | lective Courses                 | 5  |
|    | <b>F</b> airs and <b>s</b> airs | with a visition of at least Q visits from accuracy       |

Four courses with a value of at least 3 units from courses numbered PSYCH 104-182.

Only ONE of these courses can be seminar (ending ins "8"). PSYCH H194A/PSYCH H194B, PSYCH H195A/PSYCH H195B, PSYCH 197, PSYCH 198, & PSYCH 199 do not count towards coursework requirements.

The course number 192 used to designate a new class and may apply toward one of the electives.

### Breadth Courses

Above courses must include at least 1 course from each of the 4 subareas:

Cognition, Brain & Behavior (110-129)

Clinical Science (130-139)

Developmental (140-149)

Social/Personality (150-169, 180)

<sup>1</sup> Also listed as PSYCH 10.

Undergraduate students in the College of Letters & Science must fulfill the following requirements in addition to those required by their major program.

For detailed lists of courses that fulfill college requirements, please review the College of Letters & Sciences (http://guide.berkeley.edu/ archive/2016-17/undergraduate/colleges-schools/letters-science) page in this Guide.

## **Entry Level Writing**

All students who will enter the University of California as freshmen must demonstrate their command of the English language by fulfilling the Entry Level Writing requirement. Fulfillment of this requirement is also a prerequisite to enrollment in all reading and composition courses at UC Berkeley.

## **American History and American Institutions**

The American History and Institutions requirements are based on the principle that a US resident graduated from an American university should have an understanding of the history and governmental institutions of the United States.

## **American Cultures**

American Cultures is the one requirement that all undergraduate students at Cal need to take and pass in order to graduate. The requirement offers an exciting intellectual environment centered on the study of race, ethnicity and culture of the United States. AC courses offer students opportunities to be part of research-led, highly accomplished teaching environments, grappling with the complexity of American Culture.

## **Quantitative Reasoning**

The Quantitative Reasoning requirement is designed to ensure that students graduate with basic understanding and competency in math, statistics, or computer science. The requirement may be satisfied by exam or by taking an approved course.

# Foreign Language

The Foreign Language requirement may be satisfied by demonstrating proficiency in reading comprehension, writing, and conversation in a foreign language equivalent to the second semester college level, either by passing an exam or by completing approved course work.

## **Reading and Composition**

In order to provide a solid foundation in reading, writing and critical thinking the College requires two semesters of lower division work in composition in sequence. Students must complete a first-level reading and composition course by the end of their second semester and a second-level course by the end of their fourth semester.

## **Breadth Requirements**

The undergraduate breadth requirements provide Berkeley students with a rich and varied educational experience outside of their major program. As the foundation of a liberal arts education, breadth courses give students a view into the intellectual life of the University while introducing them to a multitude of perspectives and approaches to research and scholarship. Engaging students in new disciplines and with peers from other majors, the breadth experience strengthens interdisciplinary connections and context that prepares Berkeley graduates to understand and solve the complex issues of their day.

## **Unit Requirements**

- 120 total units, including at least 60 L&S units
- Of the 120 units, 36 must be upper division units
- Of the 36 upper division units, 6 must be taken in courses offered outside your major department

## **Residence Requirements**

For units to be considered in "residence," you must be registered in courses on the Berkeley campus as a student in the College of Letters & Science. Most students automatically fulfill the residence requirement by attending classes here for four years. In general, there is no need to be concerned about this requirement, unless you go abroad for a semester or year or want to take courses at another institution or through UC Extension during your senior year. In these cases, you should make an appointment to meet an adviser to determine how you can meet the Senior Residence Requirement.

Note: Courses taken through UC Extension do not count toward residence.

## **Senior Residence Requirement**

After you become a senior (with 90 semester units earned toward your BA degree), you must complete at least 24 of the remaining 30 units in residence in at least two semesters. To count as residence, a semester must consist of at least 6 passed units. Intercampus Visitor, EAP, and UC Berkeley-Washington Program (UCDC) units are excluded.

You may use a Berkeley Summer Session to satisfy one semester of the Senior Residence requirement, provided that you successfully complete 6 units of course work in the Summer Session and that you have been enrolled previously in the college.

## **Modified Senior Residence Requirement**

Participants in the UC Education Abroad Program (EAP) or the UC Berkeley Washington Program (UCDC) may meet a Modified Senior Residence requirement by completing 24 (excluding EAP) of their final 60 semester units in residence. At least 12 of these 24 units must be completed after you have completed 90 units.

## **Upper Division Residence Requirement**

You must complete in residence a minimum of 18 units of upper division courses (excluding EAP units), 12 of which must satisfy the requirements for your major.

Students are encouraged to familiarize themselves with the Psychology major requirements before making a program plan. For more detailed information regarding the courses listed below (e.g., elective information, GPA requirements, etc.,), see the College Requirements and Major Requirements tabs.

Total Units: 121

- <sup>1</sup> This is a sample program plan. This plan assumes that the student has completed the Entry Level Writing and American History and Institutions requirements prior to admission requirements prior to admission.
- <sup>2</sup> Students are strongly advised to work with an academic adviser to determine a personal program plan. Your program plan will differ depending on previous credit received, your course schedule, and available offerings.
- <sup>3</sup> Declare major the spring term of second year.
- <sup>4</sup> Students should also understand that while L&S Breadth requirements can be shuffled around within the plan, that is not the case for the lower-division prerequisites for the major. For majors with additional requirements for declaration, there is a limited window of eligibility for guaranteed admission.
- <sup>5</sup> All courses are subject to change every semester. Students must check the Online Schedule of Classes (http:// schedule.berkeley.edu) for the most up-to-date course offerings.

# **Accelerated Program Plans**

For students considering graduating in less than four years, it's important to acknowledge the reasons to undertake such a plan of study. While there are advantages to pursuing a three-year degree plan such as reducing financial burdens, they are not for everyone and do involve sacrifices; especially with respect to participating in co-curricular activities, depth of study, and summer internships, which typically lead to jobs upon graduation. All things considered, please see the tables for three and three and a half year degree options.

3.5 Year Plan (http://psychology.berkeley.edu/sites/default/files/ undergraduate-program/3.5%20Year%20Plan\_1.xlsx)

3 Year Plan (http://psychology.berkeley.edu/sites/default/files/ undergraduate-program/3%20Year%20Plan\_1.xlsx)

## Mission

The Psychology Department at Berkeley reflects the diversity of the discipline's mission covering six key areas of research: Behavioral and Systems Neuroscience; Clinical Science; Cognition; Cognitive Neuroscience; Developmental, and Social-Personality Psychology. Despite the existence of these specialization areas, the program learning goals focus on fostering methodological, statistical, and critical thinking skills that are not tied to any one particular content area in psychology but are relevant for all of them.

Most of the program level goals are introduced in PSYCH 1 (General Psychology). These goals are extended and reinforced in a majority of the core courses. These include PSYCH 101, Research Methods, required of all majors, and the upper division decade courses that survey the major fields of psychology: PSYCH 110: Biological Psychology; PSYCH C120: Cognitive Psychology, PSYCH 130: Clinical Psychology, PSYCH 140: Developmental Psychology, PSYCH 150: Personality Psychology, PSYCH 160: Social Psychology. The program is designed to ensure that all students gain broad exposure to the field of psychology. In addition, students are encouraged to develop a deeper understanding of at least one major content area in psychology.

## Learning Goals for the Major

- Define basic concepts that characterize psychology as a field of scientific inquiry and appreciate the various subfields that form the discipline as well as things that differentiate it from other related disciplines. Develop an understanding of the central questions and issues in contemporary psychology.
- 2. Be familiar with the range of methods used to investigate psychological questions.
- 3. Develop skills to critically evaluate the presentation of scientific ideas and research in the popular media.
- 4. Develop competence in reading and evaluating original scientific papers.
- 5. Become familiar with the basic concepts of statistics and develop skills in evaluating information from a statistical perspective.
- Develop and articulate, both orally and in written form, a testable hypothesis or an argument drawing from an existing body of literature.
- Develop competence in interpreting graphical data to understand what is being compared/manipulated (independent variables) and what is being measured (dependent variables).

- 8. Be familiar with the history of psychology as a field and different theoretical and empirical frameworks that have defined and shaped the field.
- Apply a psychological principle to an everyday problem or take an everyday problem and identify the relevant psychological mechanisms/issues.
- Develop a deeper understanding of one of the major content areas of psychology (i.e., social/personality, developmental, clinical, cognitive, biological).
- Develop an understanding and an appreciation of how social (e.g., environmental/cultural) and biological (e.g., genes, hormones) factors jointly shape human behavior.
- 12. Develop an awareness of the importance of science to humanity while recognizing its limits (i.e., some scientific knowledge is culture specific and may not applicable to the human condition universally).

# Psychology

## **PSYCH 1 General Psychology 3 Units**

Terms offered: Spring 2018, Fall 2017, Spring 2017 Introduction to the principal areas, problems, and concepts of psychology. This course is required for the major; students not considering a psychology major are directed to 2. General Psychology: Read More [+]

## **Rules & Requirements**

**Credit Restrictions:** Student receives a failing grade in PSYCH 1 and is eligible to take PSYCH W1 or PSYCH N1 in order to remove the deficient grade in lieu of repeating PSYCH 1.

**Repeat rules:** When receiving a failing grade in this course or a course equivalent (i.e. Psych W1 or N1).

### Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

#### Summer:

6 weeks - 5 hours of lecture and 2.5 hours of discussion per week 8 weeks - 4 hours of lecture and 2 hours of discussion per week

### **Additional Details**

Subject/Course Level: Psychology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

# PSYCH 5 Technology vs. Psychology: The Internet Revolution and the Rise of the Virtual Self 2 Units

Terms offered: Summer 2017 Second 6 Week Session, Fall 1995 Most people have an online alter ego that is stronger and sexier but also angrier, more impulsive, and less ethical. These traits can become incorporated into offline personality, turning us into our avatar. Other psychological damage comes from the lack of online privacy and our new relationship with information. But the "Net" effect is not all bad; technology can also contribute to psychological wellbeing and make possible new treatments, including computerized therapy and virtual reality exposure therapy.

# PSYCH 48 Brain Development and Aging 1 Unit

Terms offered: Summer 2013 10 Week Session, Summer 2013 First 6 Week Session

This is an introductory survey course on brain and cognitive development. It gives an overview of brain structure and function and how it changes throughout life. Topics include: effect of pre-natal maternal and paternal behavior in brain development; critical periods; experience-dependent changes in the brain; the adolescent brain; and the aging brain. We will also discuss developmental disorders such as Down syndrome and the putative benefits of exercise and diet to brain health. Brain Development and Aging: Read More [+]

**Rules & Requirements** 

Prerequisites: One year of college level biology

**Credit Restrictions:** Students will receive no credit for Psychology 48 after taking Psychology 125.

Hours & Format

Fall and/or spring: 15 weeks - 1 hour of lecture per week

Summer: 6 weeks - 3 hours of lecture per week

#### **Additional Details**

Subject/Course Level: Psychology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Brain Development and Aging: Read Less [-]

## **PSYCH C61 Brain, Mind, and Behavior 3** Units

Terms offered: Spring 2018, Spring 2017, Spring 2016 Introduction to human brain mechanisms of sensation, movement, perception, thinking, learning, memory, and emotion in terms of anatomy, physiology, and chemistry of the nervous system in health and disease. Intended for students in the humanities and social sciences and others not majoring in the biological sciences.

Brain, Mind, and Behavior: Read More [+] Rules & Requirements

**Credit Restrictions:** Students will receive no credit for Molecular and Cell Biology/Psychology C61 after taking Molecular and Cell Biology 61, N61, W61, Molecular and Cell Biology 104, C100A/Chemistry C130, Molecular and Cell Biology 110, 130A, 136, 160, C160/Neuroscience C160 or Integrative Biology 132. A deficient grade in Molecular and Cell Biology 61, N61, or W61 can be removed with Molecular and Cell Biology C61. <BR/>Students cannot credit for both MCELLBI/PSYCH C61 AND Psych 110.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1 hour of discussion per week

**Additional Details** 

Subject/Course Level: Psychology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Presti

# **PSYCH 114 Biology of Learning 3 Units**

Terms offered: Spring 2018, Spring 2017, Spring 2016 The biology of learning and neural plasticity is critical to our understanding of development, culture, behavioral change, uniqueness of individuals, and limits to an organism's potential. We will study experimental investigations of behavior and neurobiology at the cellular and circuit level to get a basic introduction to what is known and unknown about learning and neural plasticity. Topics may include associative learning, habit formation, fear, memory systems, neurons, synapses, dendritic spines and axonal boutons, LTP, and adult neurogenesis. We will discuss these topics in the context of normal development and disease. Students will become familiar with thinking about the brain at the level of circuits, cells, synapses, and proteins. Biology of Learning: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

## **Additional Details**

Subject/Course Level: Psychology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Instructor: Wilbrecht

Biology of Learning: Read Less [-]

## **PSYCH C116 Hormones and Behavior 3 Units**

Terms offered: Spring 2018, Spring 2017, Spring 2016 This course provides a comprehensive overview of behavorial endocrinology beginning with hormone production and actions on target issues and continuing with an exploration of a variety of behaviors and their hormonal regulation/consequences. The course uses a comparative approach to examine the reciprocal interactions between the neuroendocrine system and behavior, considering the effects of hormone on development and adult behavior in addition to how behavior regulates endocrine physiology. While much of the course focuses on nonhuman vertebrate species, the relevance to humans is explored where appropriate. Topics include sexual differentiation and sex differences in behavior, reproductive, parental, and aggressive behaviors, and hormonal and behavior: Read More [+] **Rules & Requirements** 

**Prerequisites:** Completion of biological prerequisites for the major and consent of instructor; a course in mammalian physiology recommended

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

**Additional Details** 

Subject/Course Level: Psychology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

Grading/Final exam status: Letter grade. Final exam required.

The Evolution of Human Social Behavior: Read Less [-]

# **PSYCH 125 The Developing Brain 3 Units**

Terms offered: Spring 2018, Spring 2016, Fall 2014 What are the changes in brain structure and function that underlie improvements in cognitive abilities over childhood and adolescence? Or, coming from a different perspective, what insights can we gain regarding the neural basis of cognition by examining how the brain develops? And how are such findings relevant for medicine, education, and the law? The cutting-edge new field of developmental cognitive neuroscience is beginning to address these and other questions. This course will constitute an overview of current research and methods in this field, focusing on both typically and atypically developing children and adolescents. There is no textbook for this course; all readings will be primary sources (e.g., journal articles). The Developing Brain: Read More [+]

**Rules & Requirements** 

**Prerequisites:** Recommend prior coursework in neuroscience, such as Psych/MCB c61, Psych 110, Psych 117, or Psych/COGSCI C127

**Credit Restrictions:** Students will receive no credit for 125 after taking 192 Fall 2007. <BR/>Students will not receive credit for Psychology 125 after taking Psychology N125. A failing grade in Psychology N125 may be removed by taking Psychology 125.

# PSYCH 135 Treating Mental Illness: Development, Evaluation, and Dissemination 3 Units

### Terms offered: Fall 2016, Spring 2016

Although progress has been made in developing and disseminating evidence-based treatments for most forms of mental illness, there are still huge gaps in our knowledge base. Coverage of serious mental illness with adequate and disseminable intervention strategies is all too limited. Hence, there is a great need for the next generation of clinical scientists to contribute to the mission of treatment development for mental illness. In this course we will learn about, and critique, treatment development models. We will review the steps in treatment development spanning from the study of mechanisms on to proof of concept and to establishing the feasibility of novel treatment ideas.

Treating Mental Illness: Development, Evaluation, and Dissemination: Read More [+]

## **PSYCH 137 Mind-Body and Health 3 Units**

## Terms offered: Not yet offered

Course explores psychosomatics or mind-body interactions in a dozen diseases/disorders from recurrent ailments (e.g., asthma, gastrointestinal disorders) and chronic diseases (e.g., hypertension) to "terminal" diseases (e.g., cancer, AIDS); also included are specific disorders of appetite, sleep, and sexual functioning. For each of these, (i) symptoms (physical and psychological) are outlined, (ii) epidemiological data are used to illustrate socio-cultural underpinnings of health, and (iii) etiology examines how emotion, personality, and other psychological variables interact with the biological. Finally, (iv) psychosocial assessment and (v) cognitive-behavioral-affective treatments are presented for each disease/ disorder.

Mind-Body and Health: Read More [+] **Objectives Outcomes** 

Course Objectives: To be acquainted with cognitive, affective,

behavioral treatments and lifestyle change

To be acquainted with psychological assessment of relevant symptoms and sequelae

To interpret epidemiological findings from a socio-cultural perspective of health

To learn relevant terminology in health-related disciplines

To recognize physical as well as behavioral symptoms of diseases/ disorders

To trace the evolution of the field of psychosomatics

To uncover the psychosomatic etiology of diseases and disorders covered in the course

To understand the different types of psychosomatic processes

### Hours & Format

Summer: 6 weeks - 7.5 hours of lecture per week

# **PSYCH 145 Relationships: Development and Clinical Implications of Intimate Ties 3 Units**

Terms offered: Summer 2002 10 Week Session, Summer 2001 10 Week Session, Summer 2000 10 Week Session

This lecture course focuses on the close relationships that most individuals – usually, beginning in infancy -- will have formed during their lifetime, as well as the way such relationships can favorably or unfavorably influence an individual's emotions and affect those of others. From infancy through young adulthood and old age, secure vs. insecure (e.g., ambivalent, avoidant, or unpredictable/frightening) relationships affect not only an individual's happiness and general well-being, but also the eventual presence or absence of clinical symptomatology. Favorable vs. unfavorable relationships with parents, peers, close friends and romantic partners will be discussed, together with their consequences for psychological health and overall

# PSYCH 149 Early Development & Learning Science Core Seminar 3 Units

Terms offered: Spring 2009, Fall 1999, Fall 1998

This course serves as the foundation to the Early Development & Learning Science minor. It will help students understand how best to promote children's robust early development and learning, integrating a variety of different perspectives. A wide range of approaches, representing different disciplines—education neuroscience, psychology, public health, public policy, and social work—will be presented by visiting lecturers to impart key aspects of supporting young children. Each perspective is necessary to understand and integrate with the others to most effectively address the complex problems facing young children and their families today.

Early Development & Learning Science Core Seminar: Read More [+] Rules & Requirements

Prerequisites: Prioritizing ED&LS Summer-Only Minor Students

**Repeat rules:** Course may be repeated for credit with different topic and consent of instructor. Course may be repeated for credit when topic changes.

#### Hours & Format

## **PSYCH 149A Early Learning: Engaging** Interactions and Environments 3 Units

### Terms offered: Not yet offered

A new lecture and practice course designed to increase participants' knowledge and skills in providing preschool children with high quality early learning experiences. Using the research-based CLASS© tool as a framework, students learn how to engage in more effective teacher-child interactions and create environments that promote young children's social-emotional and cognitive development. Observation and analysis of classroom practices, through video recording, enable each student to receive individualized feedback from the instructor, as well as from peers. The focus is on professional growth, including developing abilities to support children's cultural and linguistic diversity.

Early Learning: Engaging Interactions and Environments: Read More [+] **Objectives Outcomes** 

**Course Objectives:** Participants will (further) develop their skills in facilitating Social and Emotional Support, Well-Organized Classrooms, Instructional Interactions. The course is grouped into five modules using these three areas as focal points. Each class meeting will give students the opportunity to know, see, do, and reflect, as the core components of effective and intentional interactions with young children.

#### **Rules & Requirements**

**Prerequisites:** No previous coursework needed, but students must be currently working in an early education classroom to provide regular access to interacting with young children

#### Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Summer: 12 weeks - 4 hours of lecture per week

**Additional Details** 

Subject/Course Level: Psychology/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

# PSYCH 149C Design Thinking for ED&LS 3 Units

### Terms offered: Not yet offered

This course will teach a human-centered, evidence-based method for finding new ways to solve persistent problems: Design Thinking. Design Thinking is a methodology for collaborative problem solving pioneered at the design firm IDEO and Stanford University to come up with gamechanging solutions to difficult problems. As student learners accustomed to taking others' perspectives and problem solving, we are especially well-suited to use Design Thinking.

We will be tackling the problem of children's school readiness. The goal of this class is to find imaginative and practical solutions -- imaginative enough to be exciting and effective for children and families, and practical enough to be able to pilot these solutions during the class.

Design Thinking for ED&LS: Read More [+] Rules & Requirements

Prerequisites: Prioritizing ED&LS Summer-Only Minor Students

# **PSYCH 162 Human Happiness 3 Units**

Terms offered: Summer 2011 10 Week Session, Summer 2011 Second 6 Week Session, Summer 2009 Second 6 Week Session This course will take an interdisciplinary approach to an understanding of happiness. The first part of the course will be devoted to the different treatments of happiness in the world's philosophical traditions, focusing up close on conceptions or the good life in classical Greek and Judeo-Christian thought, the great traditions in East Asian thought (Taoism, Buddhism, Confucianism), and ideas about happiness that emerged more recently in the age of Enlightenment. With these different perspectives as a framework, the course will then turn to treatments of happiness in the behavioral sciences, evolutionary scholarship, and neuroscience. Special emphasis will be given to understanding how happiness arises in experiences of the moral emotions, including gratitude, compassion, reverence and awe, as well as aesthetic emotions like humor and beauty.

Human Happiness: Read More [+]

**Rules & Requirements** 

Prerequisites: 160 or consent of instructor

**Credit Restrictions:** Students will receive no credit for 162 after taking C162, Letters and Science C160V or 160C.

## Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Summer: 6 weeks - 5.5 hours of lecture and 2.5 hours of discussion per week

Additional Details

Subject/Course Level: Psychology/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

## **PSYCH N162 Human Happiness 3 Units**

Terms offered: Summer 2014 10 Week Session, Summer 2014 First 6 Week Session

This course will take an interdisciplinary approach to an understanding of happiness. We will first review the different treatments of happiness in the world's philosophical traditions: conceptions of the good life in classical Greek and Judeo-Christian thought, the great East Asian philosophies, and ideas about happiness that emerged in the age of Enlightenment. With these different perspectives as a framework, the course will turn to treatments of happiness in the behavioral sciences, evolutionary scholarship, and neuroscience. Special Emphasis will be given to understanding how happiness arises in experiences of the moral emotions, including gratitude, compassion, reverence and awe, and aesthetic emotions like humor and beauty.

# **PSYCH 165 Psychology of Creativity 3 Units**

Terms offered: Fall 2012, Fall 2010

This is a course on creativity, both at the individual and the group level. We will consider traits of highly creative individuals (vs. less creative individuals) and the ways in which they think. We will also investigate the ways in which influence processes affect individual creativity and will then focus on group creativity, including techniques by which creativity is hindered or stimulated. Finally, we will consider applications from organizations as we consider cultures in which creativity thrives. Throughout the course, discussion will be encouraged and we will also do some experiential exercises. The course will be a combination of lecture, discussion, and experiential learning. Psychology of Creativity: Read More [+] **Rules & Requirements**

## **PSYCH 166AC Cultural Psychology 3 Units**

Terms offered: Summer 2017 Second 6 Week Session, Spring 2017, Spring 2015

The course will review research on culture, race, and ethnicity and will consider the implications of these findings for our understanding of race, culture, and ethnicity in American society. Mounting evidence suggests that psychological processes are culture-specific, theory-driven, and context-dependent. This course will focus on the effects that theories of mind, person, self, and social institutions have on human cognition, motivation, emotion, and social interactions in American society. Students will gain a better appreciation of the ways that cultural traditions and social practices regulate and transform psychological functioning. Simply, the course is about how culture affects psyche and how psyche affects culture.

Cultural Psychology: Read More [+] Rules & Requirements

Prerequisites: 1; 160 is recommended

Requirements this course satisfies: Satisfies the American Cultures requirement

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture and 1 hour of discussion per week

Summer: 6 weeks - 7.5 hours of lecture and 0 hours of discussion per week

### **Additional Details**

# **PSYCH 167AC Stigma and Prejudice 3 Units**

Terms offered: Spring 2018, Fall 2017, Fall 2015

Traditionally, research on prejudice and stereotyping has focused on the psychological mechanisms that lead people to be biased against others. Recent research has begun to shed light on the psychological legacy of prejudice and stereotyping for their targets. This course will review the major contributions of each of these literatures, providing students with a broad understanding of both classic and current issues in the field. The course will be divided into three sections: bias (i.e., the perpetrator's perspective), stigma (i.e., the target's perspective), and intergroup relations.

Stigma and Prejudice: Read More [+] Rules & Requirements

## **PSYCH 190A Early Learning: Engaging** Interactions and Environments 3 Units

## Terms offered: Fall 2015

A new lecture and practice course designed to increase participants' knowledge and skills in providing preschool children with high quality early learning experiences. Using the research-based CLASS© tool as a framework, students learn how to engage in more effective teacher-child interactions and create environments that promote young children's social-emotional and cognitive development. Observation and analysis of classroom practices, through video recording, enable each student to receive individualized feedback from the instructor, as well as from peers. The focus is on professional growth, including developing abilities to support children's cultural and linguistic diversity.

Early Learning: Engaging Interactions and Environments: Read More [+] **Objectives Outcomes** 

**Course Objectives:** Participants will (further) develop their skills in facilitating Social and Emotional Support, Well-Organized Classrooms, Instructional Interactions. The course is grouped into five modules using these three areas as focal points. Each class meeting will give students the opportunity to know, see, do, and reflect, as the core components of effective and intentional interactions with young children.

#### **Rules & Requirements**

**Prerequisites:** No previous coursework needed, but students must be currently working in an early education classroom to provide regular access to interacting with young children

#### Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

**Additional Details** 

Subject/Course Level: Psychology/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructor: Hinshaw

## PSYCH 192P Psychology Post Baccalaureate Capstone 3 Units

## Terms offered: Fall 2017, Spring 2017, Fall 2016

The Psychology Post Baccalaureate Program at UC Berkeley is intended to serve as a training program for students who have interest in pursuing graduate degrees in Psychology but who are lacking necessary academic training and research experience. In addition to the required course and lab work, Post Baccalaureate students are required to complete a twopart research learning project, called The Capstone Experience. The Capstone Experience consists of two components: an applied written submission and a formal research presentation.

Psychology Post Baccalaureate Capstone: Read More [+] **Objectives Outcomes** 

**Course Objectives:** Students will receive training in APA style writing and presentation skills.

Student Learning Outcomes: Students will learn APA writing and presentation styles.

#### **Rules & Requirements**
