

# Astrophysics

## Bachelor of Arts (BA)

The Department of Astronomy offers an undergraduate major and minor in Astrophysics. This major program prepares students for astrophysics graduate work or other advanced degrees in related fields, teaching, working in the field of computer applications, scientific and technical writing, a career as a field engineer, and other technical fields.

## Declaring the Major

Information, including lists of required courses and forms to complete before declaring, is available here (<http://astro.berkeley.edu/programs/undergraduate-program/astrophysics-declaration>).

## Honors Program

For honors in Astrophysics a student must fulfill the following additional requirements:

1. Maintain a grade point average of at least 3.5 in all courses in astronomy and related fields, and an overall grade point average of at least 3.3 in the University.
2. Carry out an individual research or study project, involving at least 3 units of ASTRON H195.

The student's project is chosen in consultation with a departmental adviser, and the written report is judged by the student's research supervisor and by a departmental adviser.

## Minor Program

Students may petition for the minor in Astrophysics only after they have completed all required courses for the minor in Astrophysics. Graduating seniors must petition no later than two weeks after the end of the term. To petition students must fill out a "Completion of L&S Minor" form available from the College of Letters & Science Advising Office in 206 Evans Hall or from the L&S Advising website (<http://ls-advise.berkeley.edu/fp/00minor.pdf>).

Turn in to the undergraduate adviser:

1. The completed petition for the minor.
2. A copy of transcripts (unofficial transcripts are OK) showing your completed astrophysics courses.

In addition to the University, campus, and college requirements, listed on the College Requirements tab, students must fulfill the below requirements specific to their major program.

## General Guidelines

1. All courses taken to fulfill the major requirements below must be taken for graded credit, other than courses listed which are offered on a *Pass/No Pass* basis only. Other exceptions to this requirement are noted as applicable.
2. No more than one upper division course may be used to simultaneously fulfill requirements for a student's major and minor programs, with the exception of minors offered outside of the College of Letters & Science.

3. A minimum grade point average (GPA) of 2.0 must be maintained in both upper and lower division courses used to fulfill the major requirements.

For information regarding residence requirements and unit requirements, please see the College Requirements tab.

## Lower Division Major Requirements

MATH 1A	Calculus	4
MATH 1B	Calculus	4
MATH 53	Multivariable Calculus	4
MATH 54	Linear Algebra and Differential Equations	4
PHYSICS 7A	Physics for Scientists and Engineers	4
PHYSICS 7B	Physics for Scientists and Engineers	4
PHYSICS 7C	Physics for Scientists and Engineers	4

## Upper Division Major Requirements

### Optional:

These courses are not required but strongly recommended for anyone considering the Astrophysics major. Please consult with the Undergraduate Adviser.

ASTRON 7A Introduction to Astrophysics

ASTRON 7B Introduction to Astrophysics

### Required (choose one of the following):

ASTRON 120 Optical and Infrared Astronomy Laboratory

ASTRON 121 Radio Astronomy Laboratory

### Required (choose two of the following):

ASTRON 160 Stellar Physics

ASTRON C161 Relativistic Astrophysics and Cosmology

ASTRON C162 Planetary Astrophysics

### Required (as needed):

Upper division electives so that the total is 30 units for a single major and 24 units for a double major.

CHEM 104A Advanced Inorganic Chemistry

CHEM 104B Advanced Inorganic Chemistry

CHEM 105 Instrumental Methods in Analytical Chemistry

CHEM 108 Inorganic Synthesis and Reactions

CHEM 112A Course Not Available

CHEM 112B Course Not Available

CHEM 120A Physical Chemistry

CHEM 120B Physical Chemistry

CHEM 122 Quantum Mechanics and Spectroscopy

CHEM 125 Physical Chemistry Laboratory

CHEM 143 Nuclear Chemistry

COMPSCI 160 User Interface Design and Development

COMPSCI 164 Programming Languages and Compilers

COMPSCI 169 Software Engineering

COMPSCI 184 Foundations of Computer Graphics

COMPSCI 186 Introduction to Database Systems

COMPSCI 188 Introduction to Artificial Intelligence

COMPSCI 195 Social Implications of Computer Technology

EPS 108 Geodynamics

EPS 122 Physics of the Earth and Planetary Interiors

MATH 104 Introduction to Analysis

MATH 110	Linear Algebra
MATH 121A	Mathematical Tools for the Physical Sciences
MATH 121B	Mathematical Tools for the Physical Sciences
MATH 128A	Numerical Analysis
MATH 128B	Numerical Analysis
MATH 160	History of Mathematics
MATH 185	Introduction to Complex Analysis
PHYSICS 105	Analytic Mechanics
PHYSICS 110A	Electromagnetism and Optics
PHYSICS 110E	Electromagnetism and Optics
PHYSICS 111A	Instrumentation Laboratory
PHYSICS 111E	Advanced Experimentation Laboratory
PHYSICS 112	Introduction to Statistical and Thermal Physics
PHYSICS 129	Particle Physics
PHYSICS 137A	Quantum Mechanics
PHYSICS 137E	Quantum Mechanics
PHYSICS 142	Introduction to Plasma Physics
STAT 135	Concepts of Statistics
STAT 153	Introduction to Time Series

<sup>1</sup> ASTRON 7A and ASTRON 7B are recommended prerequisites for all upper division courses.

<sup>2</sup> The 30 unit requirement (or 24 units for double majors with another major) is the sum of astronomy upper division courses and the electives.

Students who have a strong interest in an area of study outside their major often decide to complete a minor program. These programs have set requirements and are noted officially on the transcript in the memoranda section, but are not noted on diplomas.

## General Guidelines

1. All courses taken to fulfill the minor requirements below must be taken for graded credit.
2. A minimum of three of the upper division courses taken to fulfill the minor requirements must be completed at UC Berkeley.
3. A minimum grade point average (GPA) of 2.0 is required for courses used to fulfill the minor requirements.
4. Courses used to fulfill the minor requirements may be applied toward the Seven-Course Breadth requirement, for Letters & Science students.
5. No more than one upper division course may be used to simultaneously fulfill requirements for a student's major and minor programs.
6. All minor requirements must be completed prior to the last day of finals during the semester in which you plan to graduate. If you cannot finish all courses required for the minor by that time, please see a College of Letters & Science adviser.
7. All minor requirements must be completed within the unit ceiling. (For further information regarding the unit ceiling, please see the College Requirements tab.

## Lower Division Major Requirements

MATH 1A	Calculus	4
MATH 1B	Calculus	4
MATH 53	Multivariable Calculus	4

MATH 54	Linear Algebra and Differential Equations	4
PHYSICS 7A	Physics for Scientists and Engineers	4
PHYSICS 7B	Physics for Scientists and Engineers	4
PHYSICS 7C	Physics for Scientists and Engineers	4

## Upper Division Major Requirements

### Optional:

The following are recommended for the minor, but are not required.

ASTRON 7A	Introduction to Astrophysics
ASTRON 7B	Introduction to Astrophysics

### Required (choose two of the following):

ASTRON 120	Optical and Infrared Astronomy Laboratory
ASTRON 121	Radio Astronomy Laboratory
ASTRON 160	Stellar Physics
ASTRON C161	Relativistic Astrophysics and Cosmology
ASTRON C162	Planetary Astrophysics

### Required (choose three of the following electives):

CHEM 104A	Advanced Inorganic Chemistry
CHEM 104B	Advanced Inorganic Chemistry
CHEM 105	Instrumental Methods in Analytical Chemistry
CHEM 108	Inorganic Synthesis and Reactions
CHEM 112A	Course Not Available
CHEM 112B	Course Not Available
CHEM 120A	Physical Chemistry
CHEM 120B	Physical Chemistry
CHEM 122	Quantum Mechanics and Spectroscopy
CHEM 125	Physical Chemistry Laboratory
CHEM 143	Nuclear Chemistry
EPS 108	Geodynamics
EPS 122	Physics of the Earth and Planetary Interiors
COMPSCI 160	User Interface Design and Development
COMPSCI 164	Programming Languages and Compilers
COMPSCI 169	Software Engineering
COMPSCI 184	Foundations of Computer Graphics
COMPSCI 186	Introduction to Database Systems
COMPSCI 188	Introduction to Artificial Intelligence
MATH 104	Introduction to Analysis
MATH 110	Linear Algebra
MATH 121A	Mathematical Tools for the Physical Sciences
MATH 121B	Mathematical Tools for the Physical Sciences
MATH 128A	Numerical Analysis
MATH 128B	Numerical Analysis
MATH 160	History of Mathematics
MATH 185	Introduction to Complex Analysis
PHYSICS 105	Analytic Mechanics
PHYSICS 110A	Electromagnetism and Optics
PHYSICS 110E	Electromagnetism and Optics
PHYSICS 111A	Instrumentation Laboratory
PHYSICS 111B	Advanced Experimentation Laboratory
PHYSICS 112	Introduction to Statistical and Thermal Physics
PHYSICS 129	Particle Physics
PHYSICS 137A	Quantum Mechanics

PHYSICS 137B Quantum Mechanics

PHYSICS 142 Introduction to Plasma Physics

STAT 135 Concepts of Statistics

STAT 153 Introduction to Time Series

Undergraduate students in the College of Letters & Science must fulfill the following requirements in addition to those required by their major program.

For detailed lists of courses that fulfill college requirements, please review the College of Letters & Sciences (<http://guide.berkeley.edu/archive/2017-18/undergraduate/colleges-schools/letters-science>) page in this Guide.

## Entry Level Writing (<http://writing.berkeley.edu/node/78>)

All students who will enter the University of California as freshmen must demonstrate their command of the English language by fulfilling the Entry Level Writing requirement. Fulfillment of this requirement is also a prerequisite to enrollment in all reading and composition courses at UC Berkeley.

## American History and American Institutions (<http://guide.berkeley.edu/archive/2017-18/undergraduate/colleges-schools/letters-science/american-history-institutions-requirement>)

The American History and Institutions requirements are based on the principle that a US resident graduated from an American university, should have an understanding of the history and governmental institutions of the United States.

## American Cultures (<http://americancultures.berkeley.edu/students/courses>)

American Cultures is the one requirement that all undergraduate students at Cal need to take and pass in order to graduate. The requirement offers an exciting intellectual environment centered on the study of race, ethnicity and culture of the United States. AC courses offer students opportunities to be part of research-led, highly accomplished teaching environments, grappling with the complexity of American Culture.

## Quantitative Reasoning

The Quantitative Reasoning requirement is designed to ensure that students graduate with basic understanding and competency in math, statistics, or computer science. The requirement may be satisfied by exam or by taking an approved course.

## Foreign Language

The Foreign Language requirement may be satisfied by demonstrating proficiency in reading comprehension, writing, and conversation in a foreign language equivalent to the second semester college level, either by passing an exam or by completing approved course work.

## Reading and Composition

In order to provide a solid foundation in reading, writing, and critical thinking the College requires two semesters of lower division work in composition in sequence. Students must complete a first-level reading

and composition course by the end of their second semester and a second-level course by the end of their fourth semester.

## Breadth Requirements

The undergraduate breadth requirements provide Berkeley students with a rich and varied educational experience outside of their major program. As the foundation of a liberal arts education, breadth courses give students a view into the intellectual life of the University while introducing them to a multitude of perspectives and approaches to research and scholarship. Engaging students in new disciplines and with peers from other majors, the breadth experience strengthens interdisciplinary connections and context that prepares Berkeley graduates to understand and solve the complex issues of their day.

## Unit Requirements

- 120 total units, including at least 60 L&S units
- Of the 120 units, 36 must be upper division units
- Of the 36 upper division units, 6 must be taken in courses offered outside your major department

## Residence Requirements

For units to be considered in "residence," you must be registered in courses on the Berkeley campus as a student in the College of Letters & Science. Most students automatically fulfill the residence requirement by attending classes here for four years. In general, there is no need to be concerned about this requirement, unless you go abroad for a semester or year or want to take courses at another institution or through UC Extension during your senior year. In these cases, you should make an appointment to meet an adviser to determine how you can meet the Senior Residence Requirement.

Note: Courses taken through UC Extension do not count toward residence.

## Senior Residence Requirement

After you become a senior (with 90 semester units earned toward your BA degree), you must complete at least 24 of the remaining 30 units in residence in at least two semesters. To count as residence, a semester must consist of at least 6 passed units. Intercampus Visitor, EAP, and UC Berkeley-Washington Program (UCDC) units are excluded.

You may use a Berkeley Summer Session to satisfy one semester of the Senior Residence requirement, provided that you successfully complete 6 units of course work in the Summer Session and that you have been enrolled previously in the college.

## Modified Senior Residence Requirement

Participants in the UC Education Abroad Program (EAP) or the UC Berkeley Washington Program (UCDC) may meet a Modified Senior Residence requirement by completing 24 (excluding EAP) of their final 60 semester units in residence. At least 12 of these 24 units must be completed after you have completed 90 units.

## Upper Division Residence Requirement

You must complete in residence a minimum of 18 units of upper division courses (excluding EAP units), 12 of which must satisfy the requirements for your major.

## Undergraduate and Graduate Advising

Dexter Stewart, the Department of Astronomy's undergraduate and graduate adviser, is available to answer your questions relating to the Astrophysics major and minor, graduate degrees, and other related student matters.

Email: [dexters@berkeley.edu](mailto:dexters@berkeley.edu)

Phone: 510-642-8520

Fax: 510-642-3411

Hours:

- **Drop-in advising** is available from 1 to 4 p.m., Mondays through Fridays.
- **Appointments** are available 11 a.m. to 6 p.m., Mondays through Fridays.

## Undergraduate Faculty Adviser

James Graham (<http://astro.berkeley.edu/faculty-profile/james-graham>) is the Department of Astronomy's undergraduate faculty adviser. He is available to assist with issues that arise during your time as an undergraduate student in the Astrophysics program; he is a great resource for explanations pertaining to the content of courses. Please email him to set up an appointment ([jrg@berkeley.edu](mailto:jrg@berkeley.edu)).

## Graduate Faculty Adviser

Aaron Parsons (<http://astro.berkeley.edu/faculty-profile/aaron-parsons>) is the Department of Astronomy's graduate faculty adviser. He is available to assist with a number of course and research matters that may arise during your graduate career; please email him to set up an appointment ([aparsons@astro.berkeley.edu](mailto:aparsons@astro.berkeley.edu)).

## Astrophysics

### ASTRON 3 Introduction to Modern Cosmology 2 Units

Terms offered: Fall 2015, Spring 2015, Spring 2014

Description of research and results in modern extragalactic astronomy and cosmology. We read the stories of discoveries of the principles of our Universe. Simple algebra is used.

Introduction to Modern Cosmology: Read More [+]

#### Hours & Format

**Fall and/or spring:** 15 weeks - 2 hours of lecture per week

#### Additional Details

**Subject/Course Level:** Astronomy/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Bloom, Ma

Introduction to Modern Cosmology: Read Less [-]

### ASTRON 7A Introduction to Astrophysics 4 Units

Terms offered: Fall 2018, Fall 2017, Fall 2016

This is the first part of an overview of astrophysics, with an emphasis on the way in which physics is applied to astronomy. This course deals with the solar system and stars, while 7B covers galaxies and cosmology. Solar system topics include orbital mechanics, geology of terrestrial planets, planetary atmospheres, and the formation of the solar system. The study of stars will treat determination of observations, properties and stellar structure, and evolution. The physics in this course includes mechanics and gravitation; kinetic theory of gases; properties of radiation and radiative energy transport; quantum mechanics of photons, atoms, and electrons; and magnetic fields.

Introduction to Astrophysics: Read More [+]

#### Rules & Requirements

**Prerequisites:** Math 1A -1B. Physics 5A, 5B/5BL, 5C/5CL or Physics 7A/B

**Credit Restrictions:** Students will receive 2 units of credit for Astronomy 7A after taking Astronomy 10; 6 units of credit for both Astronomy 7A-7B after taking Astronomy 10.

#### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of laboratory per week

#### Additional Details

**Subject/Course Level:** Astronomy/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Chiang, Kriek, Weisz

Introduction to Astrophysics: Read Less [-]

## ASTRON 7B Introduction to Astrophysics 4 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

This is the second part of an overview of astrophysics, which begins with 7A. This course covers the Milky Way galaxy, star formation and the interstellar medium, galaxies, black holes, quasars, dark matter, the expansion of the universe and its large-scale structure, and cosmology and the Big Bang. The physics in this course includes that used in 7A (mechanics and gravitation; kinetic theory of gases; properties of radiation and radiative energy transport; quantum mechanics of photons, atoms, and electrons; and magnetic fields) and adds the special and general theories of relativity.

Introduction to Astrophysics: Read More [\[+\]](#)

### Rules & Requirements

**Prerequisites:** Math 1A-1B or their equivalent. Physics 5A, 5B/5BL, 5C/5CL or Physics 7ABC

**Credit Restrictions:** Students will receive 2 units of credit for Astronomy 7B after taking Astronomy 10; 6 units of credit for both Astronomy 7A-7B after taking Astronomy 10.

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of laboratory per week

### Additional Details

**Subject/Course Level:** Astronomy/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Bloom, Chiang, Quataert

## ASTRON 10 Introduction to General Astronomy 4 Units

Terms offered: Summer 2018 First 6 Week Session, Summer 2018 Second 6 Week Session, Summer 2017 Second 6 Week Session

A description of modern astronomy with emphasis on the structure and evolution of stars, galaxies, and the Universe. Additional topics optionally discussed include quasars, pulsars, black holes, and extraterrestrial communication, etc. Individual instructor's synopses available from the department.

Introduction to General Astronomy: Read More [\[+\]](#)

### Rules & Requirements

**Credit Restrictions:** Students will receive no credit for Astronomy 10 after taking Astronomy 7A or 7B, XAstronomy 10. Students can remove a deficient grade in XAstronomy 10 by taking Astronomy 10, Letter and Science C70U or Astronomy C10.

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

### Summer:

6 weeks - 8 hours of lecture and 2.5 hours of discussion per week

8 weeks - 6 hours of lecture and 2 hours of discussion per week

### Additional Details

**Subject/Course Level:** Astronomy/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Bloom

## ASTRON C12 The Planets 3 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

A tour of the mysteries and inner workings of our solar system. What are planets made of? Why do they orbit the sun the way they do? How do planets form, and what are they made of? Why do some bizarre moons have oceans, volcanoes, and ice floes? What makes the Earth hospitable for life? Is the Earth a common type of planet or some cosmic quirk? This course will introduce basic physics, chemistry, and math to understand planets, moons, rings, comets, asteroids, atmospheres, and oceans. Understanding other worlds will help us save our own planet and help us understand our place in the universe.

The Planets: [Read More](#) [+]

## ASTRON C13 Origins: from the Big Bang to the Emergence of Humans 4 Units

Terms offered: Fall 2018, Fall 2016, Fall 2014

This course will cover our modern scientific understanding of origins, from the Big Bang to the formation of planets like Earth, evolution by natural selection, the genetic basis of evolution, and the emergence of humans. These ideas are of great intrinsic scientific importance and also have far reaching implications for other aspects of people's lives (e.g., philosophical, religious, and political). A major theme will be the scientific method and how we know what we know.

Origins: from the Big Bang to the Emergence of Humans: Read More [+]

## ASTRON 84 Sophomore Seminar 1 or 2 Units

Terms offered: Spring 2017, Fall 2016, Fall 2015

Sophomore seminars are small interactive courses offered by faculty members in departments all across the campus. Sophomore seminars offer opportunity for close, regular intellectual contact between faculty members and students in the crucial second year. The topics vary from department to department and semester to semester. Enrollment limited to 15 sophomores.

Sophomore Seminar: Read More [+]

### Rules & Requirements

**Prerequisites:** At discretion of instructor

**Repeat rules:** Course may be repeated for credit when topic changes. Course may be repeated for credit when topic changes.

### Hours & Format

#### Fall and/or spring:

5 weeks - 3-6 hours of seminar per week

10 weeks - 1.5-3 hours of seminar per week

15 weeks - 1-2 hours of seminar per week

#### Summer:

6 weeks - 2.5-5 hours of seminar per week

8 weeks - 1.5-3.5 hours of seminar and 2-4 hours of seminar per week

### Additional Details

**Subject/Course Level:** Astronomy/Undergraduate

**Grading/Final exam status:** The grading option will be decided by the instructor when the class is offered. Final exam required.

Sophomore Seminar: Read Less [-]

## ASTRON 98 Directed Group Study 1 - 4 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

Topics will vary with instructor.

Directed Group Study: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Restricted to freshmen and sophomores; consent of instructor

**Credit Restrictions:** Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog.

**Repeat rules:** Course may be repeated for credit when topic changes. Course may be repeated for credit when topic changes.

### Hours & Format

**Fall and/or spring:** 15 weeks - 1-4 hours of directed group study per week

### Additional Details

**Subject/Course Level:** Astronomy/Undergraduate

**Grading/Final exam status:** Offered for pass/not pass grade only. Final exam not required.

Directed Group Study: [Read Less](#) [-]

## ASTRON 99 Directed Study in Astronomy 1 - 3 Units

Terms offered: Spring 2016, Spring 2015, Fall 2014

Supervised observational studies or directed reading for lower division students.

### Rules & Requirements

**Prerequisites:** 7A-B, 10 and consent of instructor

**Repeat rules:** Course may be repeated for credit without restriction.

### Hours & Format

**Fall and/or spring:** 15 weeks - 1-3 hours of independent study per week

**Summer:** 6 weeks - 2.5-7.5 hours of independent study per week

### Additional Details

**Subject/Course Level:** Astronomy/Undergraduate

**Grading/Final exam status:** Offered for pass/not pass grade only. Final exam not required.

Directed Study in Astronomy: [Read Less](#) [-]

## ASTRON 120 Optical and Infrared Astronomy Laboratory 4 Units

Terms offered: Fall 2018, Fall 2017, Fall 2016

This course requires four to six experiments such as the following: accurate position and brightness measurements of stars; laboratory exploration of the characteristics of two-dimensional charge-coupled devices (CCDs) and infrared detectors; measurement of the distance, reddening, and age of a star cluster; measurement of the Stokes parameters and linear polarization of diffuse synchrotron and reflection nebulae; measurement of the period and pulse shape of the Crab pulsar using Fourier techniques. Professional telescopes will be used such as those at Leuschner Observatory and Lick Observatory. There is a emphasis on error analysis, software development in the IDL language, and high-quality written reports.

Optical and Infrared Astronomy Laboratory: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Astronomy 7A-7B recommended; Mathematics 54; Physics 7A-7B-7C (7C may be taken concurrently)

### Hours & Format

**Fall and/or spring:** 15 weeks - 4 hours of laboratory and 1 hour of lecture per week

### Additional Details

**Subject/Course Level:** Astronomy/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructor:** Graham

Optical and Infrared Astronomy Laboratory: [Read Less](#) [-]

## ASTRON 121 Radio Astronomy Laboratory 4 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

Several basic laboratory experiments that concentrate on microwave electronics and techniques; construction of receiving, observing, and data analysis systems for two radioastronomical telescopes, a single-dish 21-cm line system and a 12-GHz interferometer; use of these telescopes for astronomical observing projects including structure of the Milky Way galaxy, precise position measurement of several radio sources, and measurement of the radio brightness distributions of the sun and moon with high angular resolution. There is a heavy emphasis on digital data acquisition, software development in the IDL language, and high-quality written reports.

Radio Astronomy Laboratory: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** 7A-7B; Mathematics 53, 54; Physics 7A-7B-7C; Physics 110B recommended

### Hours & Format

**Fall and/or spring:** 15 weeks - 4 hours of discussion and 1 hour of lecture per week

### Additional Details

**Subject/Course Level:** Astronomy/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Heiles, Parsons

## ASTRON 160 Stellar Physics 4 Units

Terms offered: Spring 2018, Fall 2016, Fall 2015

Topics covered include some, but not necessarily all, of the following.

Observational constraints on the properties and evolution of stars.

Theory of stellar structure and evolution. Stellar atmospheres and stellar

spectroscopy. Stellar nucleosynthesis. Supernovae. Degeneracy of

matter and structure of collapsed stars. Elements of gas dynamics,

accretion onto compact objects, and x-ray sources. Dynamics and

evolution of close binary systems. Stellar pulsation.

Stellar Physics: [Read More](#) [+]

### Rules & Requirements

**Prerequisites:** Senior standing in astronomy/physics or consent of instructor. Physics 112 (may be taken concurrently) and either Physics 110A-110B or Physics 137A-137B

**Credit Restrictions:** Students will receive no credit for Astronomy 160 after completing Astronomy C160A/Physics C160A, Astronomy 160A/Physics 160A. A deficient grade in Astronomy C160A/Physics C160A, Astronomy 160A/Physics 160A maybe removed by taking Astronomy 160.

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

### Additional Details

**Subject/Course Level:** Astronomy/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Filippenko, Quataert, Lu

Stellar Physics: [Read Less](#) [-]

## ASTRON C161 Relativistic Astrophysics and Cosmology 4 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

Elements of general relativity. Physics of pulsars, cosmic rays, black holes. The cosmological distance scale, elementary cosmological models, properties of galaxies and quasars. The mass density and age of the universe. Evidence for dark matter and dark energy and concepts of the early universe and of galaxy formation. Reflections on astrophysics as a probe of the extrema of physics.

Relativistic Astrophysics and Cosmology: Read More [+]

### Rules & Requirements

**Prerequisites:** 110A-110B; 112 (may be taken concurrently)

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture and 1 hour of discussion per week

### Additional Details

**Subject/Course Level:** Astronomy/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam required.

**Instructors:** Boggs, Holzapfel, A. Lee, Ma, Quataert

**Also listed as:** PHYSICS C161

Relativistic Astrophysics and Cosmology: Read Less [-]

## ASTRON C162 Planetary Astrophysics 4 Units

Terms offered: Fall 2018, Fall 2017, Fall 2016

Physics of planetary systems, both solar and extra-solar. Star and planet formation, radioactive dating, small-body dynamics and interaction of radiation with matter, tides, planetary interiors, atmospheres, and magnetospheres. High-quality oral presentations may be required in addition to problem sets and a final exam.

Planetary Astrophysics: Read More [+]

### Rules & Requirements

**Prerequisites:** Mathematics 53, 54; Physics 7A-7B-7C

### Hours & Format

**Fall and/or spring:** 15 weeks - 3 hours of lecture per week

### Additional Details

**Subject/Course Level:** Astronomy/Undergraduate

**Grading/Final exam status:** Letter grade. Alternative to final exam.

**Instructors:** Chiang, de Pater, Marcy

**Also listed as:** EPS C162

Planetary Astrophysics: Read Less [-]

## ASTRON H195 Special Study for Honors Candidates 2 - 4 Units

Terms offered: Spring 2018, Spring 2017, Spring 2016

Individual project of research or study.

Special Study for Honors Candidates: Read More [+]

### Hours & Format

**Fall and/or spring:** 15 weeks - 2-4 hours of independent study per week

### Additional Details

**Subject/Course Level:** Astronomy/Undergraduate

**Grading/Final exam status:** Letter grade. Final exam not required.

Special Study for Honors Candidates: Read Less [-]

## ASTRON 198 Directed Group Study 1 - 4 Units

Terms offered: Fall 2018, Spring 2018, Fall 2017

Topics will vary with instructor.

Directed Group Study: Read More [+]

### Rules & Requirements

**Credit Restrictions:** Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog.

**Repeat rules:** Course may be repeated for credit without restriction.

### Hours & Format

**Fall and/or spring:** 15 weeks - 1-4 hours of directed group study per week

### Additional Details

**Subject/Course Level:** Astronomy/Undergraduate

**Grading/Final exam status:** Offered for pass/not pass grade only. Final exam not required.

Directed Group Study: Read Less [-]

## **ASTRON 199 Supervised Independent Study and Research 1 - 4 Units**

Terms offered: Summer 2018 First 6 Week Session, Spring 2018, Summer 2017 First 6 Week Session

Supervised Independent Study and Research: [Read More](#) [+]

### **Rules & Requirements**

**Credit Restrictions:** Enrollment is restricted; see the Introduction to Courses and Curricula section of this catalog.

**Repeat rules:** Course may be repeated for credit without restriction.

### **Hours & Format**

**Fall and/or spring:** 15 weeks - 1-4 hours of independent study per week

#### **Summer:**

6 weeks - 1-5 hours of independent study per week

8 weeks - 1-4 hours of independent study per week

### **Additional Details**

**Subject/Course Level:** Astronomy/Undergraduate

**Grading/Final exam status:** Offered for pass/not pass grade only. Final exam not required.
