

Interdisciplinary Studies

Bachelor of Arts (BA)

ISF is an interdisciplinary major and a research-driven program of liberal education. It offers students the unique opportunity to develop an individualized cross-disciplinary research program that includes a course of study and a senior thesis. The course of study is made up of courses taken in the social sciences, the humanities, and/or the professional schools and colleges, alongside the required courses in ISF.

The capstone experience is a scholarly, rigorously-researched, 40-page required senior thesis, which represents a sustained inquiry in the social sciences or humanities based on original, cross-disciplinary research.

ISF has identified a number of interdisciplinary research fields that have engendered excellent scholarship and attracted students across campus. ISF students may pursue other research fields identified in consultation with ISF faculty and academic advisers. The already-defined ISF research fields provide models and resources about scholarly interests. The research fields found on the ISF website are there to help ISF students identify their own research interests and customize their own research program and course of liberal arts study.

Declaring the Major

Students may apply to the major once per semester. The application deadline is approximately the end of the sixth week of the semester. Students are encouraged to meet with an ISF faculty adviser well in advance of the application deadline date. The application package should consist of a well-conceived research program, including a proposed course of study and an intellectual justification of their proposed study. Research programs must be interdisciplinary, integrating methodological or theoretical approaches from at least three academic disciplines (departments or programs). Interdisciplinary work may be comparative, historical, regional, thematic, or problem-focused. The research program should not replicate an existing major. The purpose of the ISF major is to allow undergraduates to combine work across disciplines in courses and with faculty where no other structured program exists. Finally, the research program must be feasible, and the senior thesis must answer a manageable research question in a semester's hard work (ISF 190). Each student's proposed research program is discussed with and approved by a faculty adviser to assure feasibility, but the final responsibility is the student's.

The nature of the major requires repeated elaboration of the proposed research program, course of study, and senior thesis that best combine students' individual research interests and the ISF program goals. Students are assigned an adviser upon acceptance into the major, although faculty members outside ISF may serve as advisers when appropriate, as approved by the ISF director.

Honors Program

All honors students enroll in the senior thesis seminar with other majors (ISF 190). Students seeking honors must identify and seek out senate faculty members from other departments, ideally members of the ISF Faculty Advisory Board, to serve as second readers. Students must then let their ISF 190 instructor know that they intend to pursue honors in the major, and will give the name of their second reader to the ISF 190 instructor. Their grades in ISF 190 will be constituted by an average of grades assigned by the ISF 190 Instructor and the second readers.

Students eligible for honors must have an overall grade point average (GPA) of at least 3.6, including grades in ISF courses, at the beginning of the semester in which they enroll in ISF 190. Students in the honors option will be nominated for a degree of honors (honors, high honors, highest honors) by the ISF instructor, the second reader, or another ladder faculty member. The assessment of the degree of honors will be made by an ISF Honors Committee consisting of no fewer than two teaching faculty of the ISF Program and two academic senate members under the oversight of the ISF director. The ISF Honors Committee will use the criteria of scholarly originality, methodological sophistication (including interdisciplinarity), the quality of source interpretation, and excellence in writing and argumentation to adjudicate the degree of honors to be conferred. To allow adequate time for the Honors Committee to assess and review the senior honors theses, students seeking honors will be required to turn in their final senior theses at the beginning of the Reading/Review/Recitation Week.

Minor Program

There is no minor program in Interdisciplinary Studies.

In addition to the University, campus, and college requirements, listed on the College Requirements tab, students must fulfill the below requirements specific to their major program.

General Guidelines

1. All courses taken to fulfill the major requirements below must be taken for graded credit, other than courses listed which are offered on a *Pass/No Pass* basis only. Other exceptions to this requirement are noted as applicable.
2. No more than one upper division course may be used to simultaneously fulfill requirements for a student's major and minor programs, with the exception of minors offered outside of the College of Letters & Science.
3. A minimum grade point average (GPA) of 2.0 must be maintained in both upper and lower division courses used to fulfill the major requirements.

For information regarding residence requirements and unit requirements, please see the College Requirements tab.

Summary of Major Requirements

Prerequisites

One "Disciplines" and one "World Regions" course

Upper Division Requirements

Course of Study: Minimum six courses, 20 units

Core Methodology: Two courses

Interdisciplinary Research Methods: One course

Senior Thesis: One course

The ISF prerequisite requirement consists of two courses, one on the Disciplines, and the other on World Regions. Both courses need to be taken for a B- or better. Courses fulfilling this prerequisite are listed below. A prospective major can apply to the major by filling out an application after they have completed their first course (with a B- or better) and are currently enrolled in their second required course; their final acceptance into the program will be contingent on receiving a grade of B- or better in the second course.

Disciplines

Students must take one of the following introductory courses (or their recognized equivalent, if transfer students):

ANTHRO 3	Introduction to Social and Cultural Anthropology	4
DEV STD C10	Course Not Available	4
ECON 1	Introduction to Economics	4
ECON 2	Introduction to Economics--Lecture Format	4
EDUC 190	Critical Studies in Education	4
GEOG 10	Worldings - Regions, Peoples and States	4
PHILOS 3	The Nature of Mind	4
POL SCI 2	Introduction to Comparative Politics	4
POL SCI 4	Introduction to Political Theory	4
POL SCI 5	Introduction to International Relations	4
PSYCH 1	General Psychology	3
PUB POL 101	Introduction to Public Policy Analysis	4
RHETOR 10	Introduction to Practical Reasoning and Critical Analysis of Argument	4
SOCIOL 1	Introduction to Sociology	4

World Regions

Students must take one of the following lower division courses (or their recognized equivalent, if transfer students):

AFRICAM 4A	Africa: History and Culture	4
AFRICAM 4B	Africa: History and Culture	4
CHINESE 7A	Introduction to Premodern Chinese Literature and Culture	4
CHINESE 7B	Introduction to Modern Chinese Literature and Culture	4
CLASSIC 10A	Introduction to Greek Civilization	4
CLASSIC 10B	Introduction to Roman Civilization	4
HISTART 11	Introduction to Western Art: Renaissance to the Present	4
HISTORY 2	Comparative World History	4
HISTORY 4A	Origins of Western Civilization: The Ancient Mediterranean World	4
HISTORY 4B	Origins of Western Civilization: Medieval Europe	4
HISTORY 5	European Civilization from the Renaissance to the Present	4
HISTORY 6A	History of China: Origins to the Mongol Conquest	4
HISTORY 6B	Introduction to Chinese History from the Mongols to Mao	4
HISTORY 8A	Latin American History: Becoming Latin America, 1492 to 1824	4
HISTORY 8B	Latin American History: Modern Latin America	4
HISTORY 10	African History	4
HISTORY 11	India	4
HISTORY 12	The Middle East	4
HISTORY 14	Introduction to the History of Japan	4
IAS 45	Survey of World History	4
JAPAN 7A	Introduction to Premodern Japanese Literature and Culture	4
JAPAN 7B	Introduction to Modern Japanese Literature and Culture	4

S ASIAN 1A	Course Not Available	4
S ASIAN 1B	Course Not Available	4
SEASIAN 10A	Introduction to the Civilization of Southeast Asia	4
SEASIAN 10B	Introduction to the Civilization of Southeast Asia	4

A Committee of Faculty Advisers will have the discretion, in unusual cases, of accepting applications to the ISF program from students who have completed, with a minimum B- grade, upper division courses that have adequately prepared them for their designated research program and that fulfill the spirit of the prerequisite requirements of disciplinary and regional preparation for the major. Finally, additional courses can be added to each of the two lists as deemed appropriate by the director and the faculty advisory board.

For transfer students, it is strongly recommended that this requirement be completed before enrolling at Berkeley. Transfer students must submit syllabi of courses already taken to their ISF faculty adviser for approval. Both prerequisite courses must be taken for a letter grade.

Note that Academic Senate regulations stipulate that students must have a minimum grade point average of 2.0 before declaring any major in the College of Letters & Science and are required to declare a major by the time they have each completed 60 units.

Upper Division Requirement: Course of Study

Select a minimum of 20 upper division units (at least six courses) drawn from at least three fields or disciplines. Upon consent of an adviser, courses outside of the College of Letters & Science may be accepted when relevant, e.g., courses in Social Welfare, Journalism, Public Policy, City Planning, Business Administration, or Architecture. (For further information, please see Research Fields (<http://isf.ugis.berkeley.edu/isf-research-fields>) on the program's website.) Upon approval from an ISF faculty adviser, a student may include one technical or natural science course as part of their course of study.

Upper Division Requirement: Core Methodology Courses

These courses provide an introduction to interdisciplinary theories and methodologies in the social sciences and the humanities.

ISF 100A	Introduction to Social Theory and Cultural Analysis	4
Select one of the following:		
ISF 100B	Introduction to Social Theory and Cultural Analysis	
ISF 100C	Language and Identity	
ISF 100D	Introduction to Technology, Society, and Culture	
ISF 100E	The Globalization of Rights, Values, and Laws in the 21st Century	
ISF 100F	Theorizing Modern Capitalism: Controversies and Interpretations	
ISF 100G	Introduction to Science, Society, and Ethics	
ISF C100G	Introduction to Science, Technology, and Society	
ISF 100H	Introduction to Media and International Relations	

One course from the list of approved courses taught in other departments.

¹ The list changes every semester; please see the ISF website (<http://isf.ugis.berkeley.edu/isf-courses>) for the current list.

Upper Division Requirement: Interdisciplinary Research Methods

ISF 189 Introduction to Interdisciplinary Research Methods 4

Upper Division Requirement: Senior Thesis

For further details on the requirements for the thesis, including the creative thesis option, please see the program's website (<http://live-isf.pantheon.berkeley.edu/isf-senior-thesis-isf-190>).

ISF 190 Senior Thesis 4

Undergraduate students in the College of Letters & Science must fulfill the following requirements in addition to those required by their major program.

For detailed lists of courses that fulfill college requirements, please review the College of Letters & Sciences (<http://guide.berkeley.edu/archive/2017-18/undergraduate/colleges-schools/letters-science>) page in this Guide.

Entry Level Writing (<http://writing.berkeley.edu/node/78>)

All students who will enter the University of California as freshmen must demonstrate their command of the English language by fulfilling the Entry Level Writing requirement. Fulfillment of this requirement is also a prerequisite to enrollment in all reading and composition courses at UC Berkeley.

American History and American Institutions (<http://guide.berkeley.edu/archive/2017-18/undergraduate/colleges-schools/letters-science/american-history-institutions-requirement>)

The American History and Institutions requirements are based on the principle that a US resident graduated from an American university, should have an understanding of the history and governmental institutions of the United States.

American Cultures (<http://americancultures.berkeley.edu/students/courses>)

American Cultures is the one requirement that all undergraduate students at Cal need to take and pass in order to graduate. The requirement offers an exciting intellectual environment centered on the study of race, ethnicity and culture of the United States. AC courses offer students opportunities to be part of research-led, highly accomplished teaching environments, grappling with the complexity of American Culture.

Quantitative Reasoning

The Quantitative Reasoning requirement is designed to ensure that students graduate with basic understanding and competency in math, statistics, or computer science. The requirement may be satisfied by exam or by taking an approved course.

Foreign Language

The Foreign Language requirement may be satisfied by demonstrating proficiency in reading comprehension, writing, and conversation in a

foreign language equivalent to the second semester college level, either by passing an exam or by completing approved course work.

Reading and Composition

In order to provide a solid foundation in reading, writing, and critical thinking the College requires two semesters of lower division work in composition in sequence. Students must complete a first-level reading and composition course by the end of their second semester and a second-level course by the end of their fourth semester.

Breadth Requirements

The undergraduate breadth requirements provide Berkeley students with a rich and varied educational experience outside of their major program. As the foundation of a liberal arts education, breadth courses give students a view into the intellectual life of the University while introducing them to a multitude of perspectives and approaches to research and scholarship. Engaging students in new disciplines and with peers from other majors, the breadth experience strengthens interdisciplinary connections and context that prepares Berkeley graduates to understand and solve the complex issues of their day.

Unit Requirements

- 120 total units, including at least 60 L&S units
- Of the 120 units, 36 must be upper division units
- Of the 36 upper division units, 6 must be taken in courses offered outside your major department

Residence Requirements

For units to be considered in "residence," you must be registered in courses on the Berkeley campus as a student in the College of Letters & Science. Most students automatically fulfill the residence requirement by attending classes here for four years. In general, there is no need to be concerned about this requirement, unless you go abroad for a semester or year or want to take courses at another institution or through UC Extension during your senior year. In these cases, you should make an appointment to meet an adviser to determine how you can meet the Senior Residence Requirement.

Note: Courses taken through UC Extension do not count toward residence.

Senior Residence Requirement

After you become a senior (with 90 semester units earned toward your BA degree), you must complete at least 24 of the remaining 30 units in residence in at least two semesters. To count as residence, a semester must consist of at least 6 passed units. Intercampus Visitor, EAP, and UC Berkeley-Washington Program (UCDC) units are excluded.

You may use a Berkeley Summer Session to satisfy one semester of the Senior Residence requirement, provided that you successfully complete 6 units of course work in the Summer Session and that you have been enrolled previously in the college.

Modified Senior Residence Requirement

Participants in the UC Education Abroad Program (EAP) or the UC Berkeley Washington Program (UCDC) may meet a Modified Senior Residence requirement by completing 24 (excluding EAP) of their final

60 semester units in residence. At least 12 of these 24 units must be completed after you have completed 90 units.

Upper Division Residence Requirement

You must complete in residence a minimum of 18 units of upper division courses (excluding EAP units), 12 of which must satisfy the requirements for your major.

Mission

The Interdisciplinary Studies Field Major (ISF) is a unique major on campus in that it requires students to engage in a major research project. This enables them not only to engage in qualitative and/or quantitative research but also to organize, synthesize, and communicate—in oral and written form—relevant data and results against the background of evolving theories and key concepts in the social sciences and/or humanities. As student research interests change in relation to larger patterns of social, cultural, and technological transformations, the department carefully monitors existing methodological courses to allow for ongoing flexibility with regard to innovative key concepts and new theoretical tools.

Learning Goals for the Major

1. Develop strong interdisciplinary research skills by creating a course of study in the context of which students can explore new phenomena, problems, themes, and issues pertaining to larger social, cultural, technological, and historical transformations.
 - Develop research question against the background of at least three disciplinary fields.
 - Learn to develop a research proposal, which integrates multilingual assets and/or multicultural capacities and/or fieldwork experiences or internships.
 - Gain excellent skills to access library services.
 - Develop structure of research thesis, argument, and bibliography.
 - Gain historical and geographical knowledge of relevance to the research project.
 - Link undergraduate research interests to post-graduation plans for graduate school and/or professional life.
2. Acquire awareness of methodological approaches in the social sciences and/or humanities in order to apply interdisciplinary methods and key concepts to the study and analysis of a particular social or cultural phenomenon under conditions of larger social and global transformations.
 - Learn about the most important theoretical traditions of the transatlantic social sciences and/or humanities.
 - Study central concepts embedded in the dominant social science methodologies and or humanities methodologies.
 - Explore new social theories emerging from the larger context of global and technological transformations.
 - Participate in the expansion of conceptual innovation and creativity through the exploratory formation of new concepts with the capacity to empirically grasp new social and technological phenomena.
3. Expand critical reading, thinking, analytical, and technological skills acquired in upper division courses through their application in the context of the research project.
 - Explore extent, relevance, and limits of traditional conceptual apparatuses to ongoing undergraduate research project.
4. Demonstrate organizational, argumentative, multilingual, and communicative skills through successful design, structuration, execution, and presentation of a major interdisciplinary research project.
 - Evaluate quality of arguments, ideas, and concepts in support of the thesis.
 - Translate ideas and concepts into a variety of environments in relation to the thesis.
 - Pursue field work abroad if applicable.
 - Integration of technological innovations, networks, and the internet in the expansion of critical acquisition of knowledge in a global, informational, and networked world.
 - Organization of research data, argument, and theoretical framework.
 - Integration of assets and capacities in the research project.
 - Communicate research results on the basis of multimedia technologies.
 - Preparation of thesis in print media.

Advising Hours

263 Evans Hall

Monday through Friday, 9 to 11:45 a.m. and 1:45 to 5:30 p.m.

Interdisciplinary Studies

ISF 10 Enduring Questions and Great Books of the Western Tradition 4 Units

Terms offered: Fall 2018, Spring 2018, Fall 2017

This course is a broad survey of major canonical works ("Great Books") emphasizing from the premodern traditions of Western Civilization since the Greeks. These texts offer responses to central questions that, across the disciplinary divides, continue to inform contemporary work in the social sciences and the humanities. By considering these enduring questions and the responses of writers in Ancient, Medieval, Early Modern, and Modern Europe, we seek to examine core issues of the liberal arts as they find expression across what would later become disciplinary divisions.

Enduring Questions and Great Books of the Western Tradition: Read More [+]

Objectives Outcomes

Course Objectives: To offer students an intense engagement with canonical thinkers of the western tradition, demonstrating the enduring nature of their queries and questions across the disciplines of the social sciences and humanities.

Student Learning Outcomes: Students are expected to acquire a familiarity with many core debates in the western intellectual tradition, and to be able to identify the pre-disciplinary and interdisciplinary roots of contemporary inquiries in the social sciences and humanities.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

ISF 60 Technology and Values 3 Units

Terms offered: Spring 2018, Spring 2008, Fall 2006

If science and technology are value-laden activities, then where exactly do the values lie? In this class, we will pick apart the black-box of science and technology and look for values not just in terms of bad actors, corruption, or "implications," but in the processes that constitute modern technoscience itself. These processes include: the ways in which researchers construct problems, solutions, facts, and artifacts; the norms, standards, stories, and patronage relations that underlie science and technology; and finally, how the future is imagined and realized. Readings will include academic and journalistic texts as well as science fiction.

ISF 61 Moral Reasoning and Human Action: The Quest for Judgment 3 Units

Terms offered: Spring 2017, Fall 2016, Spring 2015

This is an interdisciplinary survey course that seeks to understand how we define justice, evil, and individual responsibility in modern society. In particular we are going to probe carefully how humans reflect on and practice the process of moral reasoning. We will focus on human behavior in extreme situations: war, life and death conflicts, genocide and mass killing, as well as competing conceptions of human freedom. The course has a distinctive dual purpose. On the one hand we want to encourage the learning of critical thinking skills. This includes the ability to systematically evaluate information and competing moral claims. Also, it is intended as an exposure to the interdisciplinary approach. That is, how can different perspectives illuminate the same issue? With this in mind the course draws on important work from philosophy and ethics, social psychology, jurisprudential analysis, historical-political accounts, and personal memoirs.

ISF 62 Representations of Self-Deception in the Modern World 3 Units

Terms offered: Fall 2014, Fall 2012, Spring 2012

In this course, we will utilize works in the humanities and the social sciences in order to explore a number of dimensions of self-deception in the modern world. The focus will be upon the willingness to falsify both personal life as well as one's position in the public sphere. The course will begin with an examination of the psychological dimension, emphasizing the importance of the nature of unconscious experience. In this context, we will examine how self-awareness is shaped by personal relationships, especially family arrangements. In addition, we will look at the manner in which people often engage in acts of self-deception with regard to the political realm.

ISF 100A Introduction to Social Theory and Cultural Analysis 4 Units

Terms offered: Fall 2018, Summer 2018 First 6 Week Session, Spring 2018

This course, required of all ISF majors but open to all students, provides an introduction to the works of foundational social theorists of the nineteenth century, including Karl Marx and Max Weber. Writing in what might be called the "pre disciplinary" period of the modern social sciences, their works cross the boundaries of anthropology, economics, history, political science, sociology, and are today claimed by these and other disciplines as essential texts. We will read intensively and critically from their respective works, situating their intellectual contributions in the history of social transformations wrought by industrialization and urbanization, political revolution, and the development of modern consumer society.

ISF 100B Introduction to Social Theory and Cultural Analysis 4 Units

Terms offered: Spring 2018, Spring 2015, Fall 2014

This is a course exploring how we understand the idea of the self in contemporary social worlds. The course shares the presumption that the modern self is a created endeavor. It charts traditional and contemporary understandings of individual identity, the maturation process and the notion of an inner life, the concepts of freedom and individual agency, the force of evolution and heredity, and the influence of social causation. The course stresses the complex interplay between the development of a sense of self, and the socialization pressures at work in the family, society, and global cultures.

ISF 100C Language and Identity 4 Units

Terms offered: Spring 2018, Spring 2017, Summer 2013 Second 6 Week Session

This course examines the role of language in the construction of social identities, and how language is tied to various forms of symbolic power at the national and international levels. Drawing on case studies from Southeast Asia, Europe, Canada, and the U.S., we will pay special attention to topics such as the legitimization of a national language, the political use of language in nation-building processes, the endangerment of indigenous languages, and processes of linguistic subordination and domination. This course will be interdisciplinary in its attempt to understand language in terms of history, politics, anthropology and sociology.

ISF 100E The Globalization of Rights, Values, and Laws in the 21st Century 4 Units

Terms offered: Summer 2018 First 6 Week Session, Fall 2013, Fall 2012

This interdisciplinary course is an introduction to the complex interplay of transnational values, international rights and legal institutions that increasingly govern social, cultural and geopolitical interactions in our contemporary world. Theoretical and methodological tools from the social sciences, jurisprudence, and philosophy will be applied in the analyses of these interplays. A study of rights and norms presupposes not only an understanding of the empirical evolution of rights traditions (including constitutional traditions) in a variety of global regions, but also an understanding of the theories of rights and laws that support such traditions as they are embedded in them (just war theories, peace theories, etc.) The study of rights and norms also requires an exploration of the transformations of crucial international norms and rights due to the formation of supranational institutions and organizations in the 20th century (UN, UNESCO, GO's, etc.). The course will provide the students with an opportunity to place emerging transnational rights institutions into a historical and geopolitical framework.

ISF 100F Theorizing Modern Capitalism: Controversies and Interpretations 4 Units

Terms offered: Fall 2018, Fall 2016, Fall 2015

The focus of this course will be on the various ways the nature and trajectory of modern capitalism has been interpreted. Our stress will be on post-Marxist works of analysis. The initial focal point will be on the work of Max Weber and Joseph Schumpeter, as well as important current debates in economic history and social theory generated by their work. Both Weber and Schumpeter display a strong fascination and elaboration with the work of Marx. The way they analyze Marx is very revealing about the way contemporary analysts seek to understand the capitalist system. We will also consider a number of current efforts that look at the systemic nature of capitalism. In particular, we are interested in how economic historians now see the development of capitalism. We also want to examine the Weberian tradition in terms of the role of culture in shaping economic behavior. Debates about the nature of globalization will also be considered as well as analysis of the changing nature of work. Theorizing Modern Capitalism: Controversies and Interpretations: Read More [+]

ISF 100I Consumer Society and Culture 4 Units

Terms offered: Summer 2017 Second 6 Week Session

In many ways, consumption defines our lives – our identities as consumers are even more important, some would argue, our identities as workers or producers. But what are the implications of a society in which “you are what you consume?” In this class, we will address questions such as: Under what conditions does a “consumer society” develop? What does global commodity chain tell us about colonialization, global inequality, and environmental injustice? How can we shape the life cycle of basic commodities—from raw materials to iPhones—in a socially sustainable way? This course will be interdisciplinary in its attempt to understand consumer society and culture in terms of political economy, geography, history, anthropology and sociology.

Consumer Society and Culture: [Read More](#) [+]

Objectives Outcomes

Course Objectives: The goal of this course is to provide students with a broad overview of debates and theories about consumption, and to provide them with an opportunity to explore a consumption-related topic themselves.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Summer: 6 weeks - 8 hours of lecture per week

Additional Details

Subject/Course Level: Interdisciplinary Studies Field Maj/Undergraduate

Grading/Final exam status: Letter grade. Alternative to final exam.

Instructor: Xu

ISF 100J The Social Life of Computing 4 Units

Terms offered: Fall 2018, Fall 2017

In this class, we will look at computing as a social phenomenon: to see it not just as a technology that transforms but to see it as a technology that has evolved, and is being put to use, in very particular ways, by particular groups of people. We will be doing this by employing a variety of methods, primarily historical and ethnographic, oriented around a study of practices. We will pay attention to technical details but ground these technical details in social organization (a term whose meaning should become clearer and clearer as the class progresses). We will study the social organization of computing around different kinds of hardware, software, ideologies, and ideas.

ISF 100K HEALTH AND DEVELOPMENT 4 Units

Terms offered: Spring 2018

Development is often defined as a process of economic growth. Only recently there has been a growing disagreement about this definition and scholars argue that development should be understood as a process of improving human conditions. Health is an important indicator of human development. It is still not conclusive whether economic growth automatically translates into better population health and whether healthy population is a precondition of economic growth because there are other factors that affect both health and development. This course will focus on this debate and examine social, political, demographic and epidemiologic determinants of health in relation to levels of economic development.

HEALTH AND DEVELOPMENT: Read More [+]

Objectives Outcomes

Student Learning Outcomes: Upon completion of this course, students will learn about:

- the main concepts, theories and controversies linking health to broader social and economic development;
 - the social, political, demographic and epidemiologic determinants of health in relation to levels of economic development;
 - the effect of economic policy, globalization, climate change, and urbanization on health;
 - the main components of an effective healthcare policy;
 - how to compare health policies of different countries;
 - how policy shapes health and development in the developed and the developing world
- how health inequities within and between countries affect human development.

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture per week

Summer: 10 weeks - 4.5 hours of lecture per week

ISF C100C Word and Image 4 Units

Terms offered: Spring 2011, Spring 2007, Spring 2004

This course is designed to sharpen our skills in understanding what happens when the world of images and words meet. Starting with the work from the Western "classical" tradition we will proceed to investigate how word/image constellations operate in a variety of media, including sculpture and poetry, painting and prose, death masks, tableaux vivants, photography, and advertising.

ISF C100G Introduction to Science, Technology, and Society 4 Units

Terms offered: Fall 2018, Spring 2018, Spring 2016, Spring 2015

This course provides an overview of the field of Science and Technology Studies (STS) as a way to study how our knowledge and technology shape and are shaped by social, political, historical, economic, and other factors. We will learn key concepts of the field (e.g., how technologies are understood and used differently in different communities) and apply them to a wide range of topics, including geography, history, environmental and information science, and others. Questions this course will address include: how are scientific facts constructed? How are values embedded in technical systems?

Introduction to Science, Technology, and Society: Read More [+]

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of lecture and 1.5 hours of discussion per week

Summer:

6 weeks - 7.5 hours of lecture and 3.5 hours of discussion per week

8 weeks - 6 hours of lecture and 3 hours of discussion per week

Additional Details

Subject/Course Level: Interdisciplinary Studies Field Maj/Undergraduate

Grading/Final exam status: Letter grade. Final exam required.

ISF 189 Introduction to Interdisciplinary Research Methods 4 Units

Terms offered: Fall 2018, Spring 2018, Fall 2017

This class is an introduction to research methods, leading students through different units built around specific learning goals and practical exercises. The course is designed to teach a range of research skills, including the ability to formulate research questions and to engage in scholarly conversations and arguments; the identification, evaluation, mobilization, and interpretation of sources; methods and instruments of field research (interviews, questionnaires, and sampling) and statistical thinking; and the construction of viable arguments and explanation in the human sciences. At the same time, the course is designed to help students identify their own thesis topic, bibliography, and methodological orientation.

Introduction to Interdisciplinary Research Methods: Read More [+]

Rules & Requirements

Prerequisites: Interdisciplinary Studies Field Majors and intended ISF majors

Hours & Format

Fall and/or spring: 15 weeks - 3 hours of seminar per week

Summer:

6 weeks - 8 hours of seminar per week

8 weeks - 6 hours of seminar per week

10 weeks - 4.5 hours of seminar per week

ISF 190 Senior Thesis 4 Units

Terms offered: Fall 2018, Spring 2018, Fall 2017

The ISF Senior Thesis requirement is the capstone experience and final product of the ISF major. The thesis is a sustained, original, and critical examination of a central interdisciplinary research question, developed under the guidance of the ISF 190 instructor. The thesis represents a mature synthesis of research skills, critical thinking, and competent writing. As the final product of a student's work in the major, the thesis is not the place to explore a new set of disciplines or research problems for the first time, but should develop methods of inquiry and bridge the several disciplines that students have developed in their course of study.

Senior Thesis: Read More [+]

Rules & Requirements

Prerequisites: Senior standing; completion of ISF core courses; declared in the major

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of seminar per week

Summer: 8 weeks - 6 hours of seminar per week

Additional Details

Subject/Course Level: Interdisciplinary Studies Field Maj/Undergraduate

Grading/Final exam status: Letter grade. Final exam not required.

Senior Thesis: Read Less [-]

ISF 197 Field Studies 1 - 4 Units

Terms offered: Prior to 2007

Supervised experience relevant to the student's specific area of concentration in the Interdisciplinary Studies Field Major in off-campus organizations. Regular individual meetings with faculty sponsor and written reports required.

Field Studies: Read More [+]

Rules & Requirements

Prerequisites: Upper division standing, declared in the Interdisciplinary Studies Field Major, and consent of instructor

Repeat rules: Course may be repeated for credit without restriction.

Hours & Format

Fall and/or spring: 15 weeks - 1-4 hours of fieldwork per week

Summer:

6 weeks - 2.5-10 hours of fieldwork per week

8 weeks - 1.5-7.5 hours of fieldwork per week

10 weeks - 1.5-6 hours of fieldwork per week

Additional Details

Subject/Course Level: Interdisciplinary Studies Field Maj/Undergraduate

Grading/Final exam status: Offered for pass/not pass grade only. Final exam not required.

Instructors: Ehrlich, Holub, Klee, Wren
