

Philosophy

Bachelor of Arts (BA)

The Department of Philosophy offers an undergraduate major in Philosophy leading to the Bachelor of Arts (BA) degree.

Declaring the Major

Go to 314 Moses Hall (Philosophy Department office). Fill out a Declaration of Major form. Submit to the Student Affairs Officer in 314 Moses.

Forms are available in 314 Moses, but also online:

<https://ls.berkeley.edu/sites/default/files/advmajordeclaration.pdf>

Honors Program

With the consent of the major advisor, a student with an overall 3.5 grade-point average (GPA) or higher and a GPA of 3.7 or higher in courses in the major may apply for admission to the honors program. Students in this program must complete a graduate seminar in the Department of Philosophy and write an acceptable honors thesis, for which four units of credit will be given under PHILOS H195.

Minor Program

To declare the minor, students should contact phildept@berkeley.edu to obtain a minor completion form.

In addition to the University, campus, and college requirements, listed on the College Requirements tab, students must fulfill the below requirements specific to their major program.

General Guidelines

1. All courses taken to fulfill the major requirements below must be taken for graded credit, other than courses listed which are offered on a *Pass/No Pass* basis only. Other exceptions to this requirement are noted as applicable.
2. No more than one upper division course may be used to simultaneously fulfill requirements for a student's major and minor programs with the exception of minors offered outside of the College of Letters & Science.
3. A minimum grade point average (GPA) of 2.0 must be maintained in both upper and lower division courses used to fulfill the major requirements.

For information regarding residence requirements and unit requirements, please see the College Requirements tab.

One of the following courses may be taken on a *Pass/No Pass* basis.

Lower Division Requirements

PHILOS 12A	Introduction to Logic	4
PHILOS 25A	Ancient Philosophy	4
PHILOS 25B	Modern Philosophy	4

PHILOS 135	Theory of Meaning [4]

Electives

Three courses total. Two must be upper division and one may be either upper division or lower division.^{2,3}

¹ You may satisfy this requirement without taking PHILOS 100 by presenting evidence that you received an A or an A+ in at least two out of the first three eligible philosophy courses that you have taken at Berkeley. Here are the eligible philosophy courses: PHILOS 25A; PHILOS 25B; any upper division philosophy course except PHILOS 140A or PHILOS 140B

² One elective may be a course offered in another department, provided the course is approved by the undergraduate adviser.

³ PHILOS H195, PHILOS 198, and PHILOS 199 do not count as electives.

Students who have a strong interest in an area of study outside their major often decide to complete a minor program. These programs have set requirements and are noted officially on the transcript in the memoranda section, but they are not noted on diplomas.

General Guidelines

1. All minors must be declared no later than one semester before a student's Expected Graduation Term (EGT). If the semester before EGT is fall or spring, the deadline is the last day of RRR week. If the semester before EGT is summer, the deadline is the final Friday of Summer Sessions. To declare a minor, contact the department advisor for information on requirements, and the declaration process.
2. All courses taken to fulfill the minor requirements below must be taken for graded credit.
3. A minimum of three of the upper division courses taken to fulfill the minor requirements must be completed at UC Berkeley.
4. A minimum grade point average (GPA) of 2.0 is required for courses used to fulfill the minor requirements.
5. Courses used to fulfill the minor requirements may be applied toward the Seven-Course Breadth requirement for Letters & Science students.
6. No more than one upper division course may be used to simultaneously fulfill requirements for a student's major and minor programs.
7. All minor requirements must be completed prior to the last day of finals during the semester in which the student plans to graduate. Students who cannot finish all courses required for the minor by that time should see a College of Letters & Science adviser.
8. All minor requirements must be completed within the unit ceiling. (For further information regarding the unit ceiling, please see the College Requirements tab.)

Undergraduate students must fulfill the following requirements in addition to those required by their major program.

For detailed lists of courses that fulfill college requirements, please review the College of Letters & Sciences (<http://guide.berkeley.edu/archive/2019-20/undergraduate/colleges-schools/letters-science>) page in this Guide. For College advising appointments, please visit the L&S Advising (<https://ls.berkeley.edu/advising/about-undergraduate-advising-services>) Pages.

University of California Requirements

Entry Level Writing (<http://writing.berkeley.edu/node/78>)

All students who will enter the University of California as freshmen must demonstrate their command of the English language by fulfilling the Entry Level Writing requirement. Fulfillment of this requirement is also a prerequisite to enrollment in all reading and composition courses at UC Berkeley.

American History and American Institutions (<http://guide.berkeley.edu/archive/2019-20/undergraduate/colleges-schools/letters-science/american-history-institutions-requirement>)

The American History and Institutions requirements are based on the principle that a US resident graduated from an American university, should have an understanding of the history and governmental institutions of the United States.

Berkeley Campus Requirement

American Cultures (<http://americancultures.berkeley.edu/students/courses>)

All undergraduate students at Cal need to take and pass this course in order to graduate. The requirement offers an exciting intellectual environment centered on the study of race, ethnicity and culture of the United States. AC courses offer students opportunities to be part of research-led, highly accomplished teaching environments, grappling with the complexity of American Culture.

College of Letters & Science Essential Skills Requirements

Quantitative Reasoning (<http://guide.berkeley.edu/archive/2019-20/undergraduate/colleges-schools/letters-science/quantitative-reasoning-requirement>)

The Quantitative Reasoning requirement is designed to ensure that students graduate with basic understanding and competency in math, statistics, or computer science. The requirement may be satisfied by exam or by taking an approved course.

Foreign Language (<http://guide.berkeley.edu/archive/2019-20/undergraduate/colleges-schools/letters-science/foreign-language-requirement>)

The Foreign Language requirement may be satisfied by demonstrating proficiency in reading comprehension, writing, and conversation in a foreign language equivalent to the second semester college level, either by passing an exam or by completing approved course work.

Reading and Composition (<http://guide.berkeley.edu/archive/2019-20/undergraduate/colleges-schools/letters-science/reading-composition-requirement>)

In order to provide a solid foundation in reading, writing, and critical thinking the College requires two semesters of lower division work in composition in sequence. Students must complete parts A & B reading and composition courses by the end of their second semester and a second-level course by the end of their fourth semester.

College of Letters & Science 7 Course Breadth Requirements

Breadth Requirements (<http://guide.berkeley.edu/archive/2019-20/undergraduate/colleges-schools/letters-science/#breadthrequirements>)

The undergraduate breadth requirements provide Berkeley students with a rich and varied educational experience outside of their major program. As the foundation of a liberal arts education, breadth courses give students a view into the intellectual life of the University while introducing them to a multitude of perspectives and approaches to research and scholarship. Engaging students in new disciplines and with peers from other majors, the breadth experience strengthens interdisciplinary connections and context that prepares Berkeley graduates to understand and solve the complex issues of their day.

Unit Requirements

- 120 total units
- Of the 120 units, 36 must be upper division units
- Of the 36 upper division units, 6 must be taken in courses offered outside your major department

Residence Requirements

For units to be considered in "residence," you must be registered in courses on the Berkeley campus as a student in the College of Letters & Science. Most students automatically fulfill the residence requirement by attending classes here for four years. In general, there is no need to be concerned about this requirement, unless you go abroad for a semester or year or want to take courses at another institution or through UC Extension during your senior year. In these cases, you should make an appointment to meet an adviser to determine how you can meet the Senior Residence Requirement.

Note: Courses taken through UC Extension do not count toward residence.

Senior Residence Requirement

After you become a senior (with 90 semester units earned toward your BA degree), you must complete at least 24 of the remaining 30 units in residence in at least two semesters. To count as residence, a semester must consist of at least 6 passed units. Intercampus Visitor, EAP, and UC Berkeley-Washington Program (UCDC) units are excluded.

You may use a Berkeley Summer Session to satisfy one semester of the Senior Residence requirement, provided that you successfully complete 6 units of course work in the Summer Session and that you have been enrolled previously in the college.

Modified Senior Residence Requirement

Participants in the UC Education Abroad Program (EAP), Berkeley Summer Abroad, or the UC Berkeley Washington Program (UCDC)

may meet a Modified Senior Residence requirement by completing 24 (excluding EAP) of their final 60 semester units in residence. At least 12 of these 24 units must be completed after you have completed 90 units.

Upper Division Residence Requirement

You must complete in residence a minimum of 18 units of upper division courses (excluding UCEAP units), 12 of which must satisfy the requirements for your major.

Mission

The Undergraduate Student Learning Initiative (USLI) is a campuswide project that has been under development at Berkeley since Fall 2007. This initiative is designed to promote and facilitate learning for undergraduates across campus. In connection with this initiative, the Philosophy Department has articulated the following goals for our undergraduate majors.

The primary goal that we expect our undergraduate philosophy majors to achieve is to become capable of engaging with the main topics and issues in contemporary academic philosophy and with the historical tradition by which contemporary philosophy is informed. Students who graduate from our program should be able to think both analytically and creatively about philosophical issues and texts. They should be able to analyse and raise objections to philosophical views and arguments that are presented to them, and to develop and defend their own views on philosophical topics. They should be able to do this both in writing and in oral discussion with other students and with instructors. Achieving these objectives requires that students acquire more general skills in writing, reading, and oral argument: they need to be able to organize their ideas, express them clearly both in writing and in speaking, and construct plausible arguments in their defense.

Learning Goals for the Major

This primary goal includes the following more specific goals:

1. A broad general understanding of the work of major figures in the history of philosophy, including Plato, Aristotle, Descartes, and Kant.
2. A deeper and more detailed understanding of the work of at least two historically important philosophers.
3. Familiarity with the most important topics in a range of areas which are typically regarded as lying at the center of contemporary philosophical thought, including metaphysics, theory of knowledge, philosophy of mind, and the philosophy of language.
4. Familiarity with the most important topics in ethics and the related field of political philosophy.
5. Familiarity with formal logic, including both the ability to understand the logical symbolism used in many contemporary philosophical texts, and to carry out logical proofs and derivations within a formal system.
6. The general capacity to think analytically and creatively about philosophical texts and issues.
7. The general capacity to express philosophical ideas and defend them effectively in argument, both in writing and orally.

Assessment

Students' attainment of these goals is measured by assessment of their performance in the courses required for the major. All philosophy undergraduate courses, with the exception of those in logic, require students to write several essays over the course of the semester; many of them also require a final exam where the questions also take the form of short philosophical essays. These essays are evaluated by the instructor

with an eye both to the student's mastery of the specific subject matter covered by the course, and to the student's mastery of more general skills in philosophical thinking and writing. A higher standard of thinking and writing is required for upper division than for lower division courses. More ambitious students have the option of taking graduate seminars as electives, where the standard for philosophical writing is higher still.

In logic courses, students' competence in formal logic is evaluated through assessment of their performance in weekly problem sets and examinations (typically including a midterm and a final).

All of our courses, again with the exception of those in formal logic, require students to engage in oral philosophical discussion, typically during sections taught by graduate student instructors. In many courses, students' contributions to discussion are assessed as part of the overall assessment of their performance in the class. We recognize it as a shortcoming in our program, however, that our courses are often too large to allow much discussion, and as a result, we are not confident that all of our students do in fact become proficient in this aspect of the primary goal of the program. We think it very important that students have the opportunity to develop their skills in oral discussion of philosophical issues, and we are hoping to be able to introduce as a requirement that students take one undergraduate seminar which offers ample opportunity for discussion with a faculty member and with their peers. So far, the small size of the faculty compared with the large size of enrollment in philosophy classes has prevented us from doing this, but we hope that faculty size will increase to a degree that will make this change in the program feasible.

Curriculum

Students are required to take 12 courses overall, including a number of required courses; these required courses are selected and designed with reference to the specific goals from the numbered list above, as follows:

- Goal 1: PHILOS 25A and PHILOS 25B (both required)
- Goal 2: Courses in the 160-187 sequence (two of these required)
- Goal 3: PHILOS 122, PHILOS 125, PHILOS 131, PHILOS 132, and PHILOS 135 (two of these required)
- Goal 4: PHILOS 104, PHILOS 105, PHILOS 107, PHILOS 115 (one of these required)
- Goal 5: PHILOS 12A (required)
- Goal 6: All of our courses, except for those in formal logic
- Goal 7: All of our courses (except for those in formal logic), but especially PHILOS 100, which is a dedicated course in philosophical writing

The goals described in this statement will be communicated to our undergraduate students by posting a prominent link to this statement on our department website, on the same page that is used to inform students about the course requirements for the philosophy major.

PHILOS W12A Introduction to Logic 4 Units

Terms offered: Summer 2020 8 Week Session, Summer 2019 8 Week Session, Summer 2018 8 Week Session

Intended as a first course in logic for students with no previous exposure to the subject, the course treats symbolic logic. Students will learn to formalize reasoning in symbolic languages with precisely defined meanings and rules of inference. Symbolic logic is by nature a mathematical subject, but the course does not presuppose any prior coursework in mathematics—only an openness to mathematical reasoning.

The course concentrates on three systems of symbolic logic: propositional logic (or sentential logic); syllogistic logic; and predicate logic (or first-order logic). Students from philosophy, mathematics, computer science, and linguistics will find important connections between symbolic logic and their other coursework.

PHILOS 17 Concepts of the Person in Novel, Drama, and Film 3 Units

Terms offered: Prior to 2007

In any culture, the way we act implies some view of what it is to be a person, and indeed what it is to be a particular kind of person, e.g., black or white, male or female, citizen or non-citizen. This view determines what roles and privileges are available to specific individuals and how these individuals will think of themselves and evaluate their actions and obligations. We will focus on works of philosophy, literature and film which have had a powerful and lasting impact on our culture.

Terms offered: Fall 2016, Fall 2015, Fall 2014

The teachings of Confucius (6th to 5th century B.C.) have had a profound influence on Chinese and East Asian cultures, and have attracted significant interest throughout the world. In what ways are they still of relevance to life in the twenty-first century? The course will consider the contemporary implications of Confucius' teachings for such topics as: family, rituals, life and death, fate, contentment and anxiety, anger and resentment, courage, respectfulness, modesty and humility, trustworthiness, learning, self-cultivation, semblances of virtue. In addition to reading selected passages from the Analects, we will also consider commentaries by later Confucians and read contemporary philosophical articles on the relevant topics.

PHILOS 127 Rationality and Irrationality in Science 3 Units

Terms offered: Spring 2004

Science is often regarded as preeminently rational. Yet recent work in philosophy, history and sociology of science suggests that scientific knowledge is no more rationally established than other sorts of knowledge, and that scientists' convictions are driven more by party loyalty and ego than by a pureminded pursuit of truth. This course will consider the case for and against the rationality of science. It will also consider the recent controversy concerning "scientific" creationism.

PHILOS 136 Philosophy of Perception 4 Units

Terms offered: Fall 2019, Fall 2015, Fall 2014

The philosophy of perception is a microcosm of the metaphysics of mind. Its central problems - What is perception? What is the nature of perceptual consciousness? How can one fit an account of perceptual experience into a broader account of the nature of the mind and the world? - are problems at the heart of metaphysics. It is often justifiably said that the theory of perception (and especially vision) is the area of psychology and neuroscience that has made the greatest progress in recent years. Despite this progress, or perhaps because of it, philosophical problems about perception retain a great urgency, both for philosophy and for science.

PHILOS 170 Descartes 4 Units

Terms offered: Fall 2020, Fall 2018, Summer 2017 First 6 Week Session
An intensive introduction to Descartes's views on physics, metaphysics and epistemology through examination of Descartes' early works on method, physics and physiology. This includes an in-depth study of the Meditations, focusing on both Descartes' epistemological project and his anti-scholastic metaphysics supplemented by readings from the Objections and Replies, the Principles, and several important pieces of secondary literature. Issues discussed include the method of doubt, the Cartesian circle, Descartes' mode of presentation in the Meditations, the creation and ontological status of the eternal truths, the status of the human being, the nature of substance, mind-body dualism and Descartes' physics as presented in the Principles.
