

Economics

The Economics PhD program at UC Berkeley is designed for students interested in pursuing advanced study and conducting original research in economics. The PhD degree is awarded in recognition of the recipient's qualifications as a general economist and of the ability to make scholarly contributions in fields of specialization. New admissions to the graduate program are restricted to students pursuing the PhD degree. There is no external, terminal program for the MA degree.

Admission to the University

Minimum Requirements for Admission

The following minimum requirements apply to all graduate programs and will be verified by the Graduate Division:

1. A bachelor's degree or recognized equivalent from an accredited institution;
2. A grade point average of B or better (3.0);
3. If the applicant comes from a country or political entity (e.g., Quebec) where English is not the official language, adequate proficiency in English to do graduate work, as evidenced by a TOEFL score of at least 90 on the iBT test, 570 on the paper-and-pencil test, or an IELTS Band score of at least 7 on a 9-point scale (note that individual programs may set higher levels for any of these); and
4. Sufficient undergraduate training to do graduate work in the given field.

Applicants Who Already Hold a Graduate Degree

The Graduate Council views academic degrees not as vocational training certificates, but as evidence of broad training in research methods, independent study, and articulation of learning. Therefore, applicants who already have academic graduate degrees should be able to pursue new subject matter at an advanced level without the need to enroll in a related or similar graduate program.

Programs may consider students for an additional academic master's or professional master's degree only if the additional degree is in a distinctly different field.

Applicants admitted to a doctoral program that requires a master's degree to be earned at Berkeley as a prerequisite (even though the applicant already has a master's degree from another institution in the same or a closely allied field of study) will be permitted to undertake the second master's degree, despite the overlap in field.

The Graduate Division will admit students for a second doctoral degree only if they meet the following guidelines:

1. Applicants with doctoral degrees may be admitted for an additional doctoral degree only if that degree program is in a general area of knowledge distinctly different from the field in which they earned their original degree. For example, a physics PhD could be admitted to a doctoral degree program in music or history; however, a student with a doctoral degree in mathematics would not be permitted to add a PhD in statistics.
2. Applicants who hold the PhD degree may be admitted to a professional doctorate or professional master's degree program if there is no duplication of training involved.

Applicants may apply only to one single degree program or one concurrent degree program per admission cycle.

Required Documents for Applications

1. **Transcripts:** Applicants may upload *unofficial* transcripts with your application for the departmental initial review. *If the applicant is admitted*, then *official* transcripts of all college-level work will be required. Official transcripts must be in sealed envelopes as issued by the school(s) attended. If you have attended Berkeley, upload your unofficial transcript with your application for the departmental initial review. *If you are admitted*, an official transcript with evidence of degree conferral *will not* be required.
2. **Letters of recommendation:** Applicants may request online letters of recommendation through the online application system. Hard copies of recommendation letters must be sent directly to the program, not the Graduate Division.
3. **Evidence of English language proficiency:** All applicants from countries or political entities in which the official language is not English are required to submit official evidence of English language proficiency. This applies to applicants from Bangladesh, Burma, Nepal, India, Pakistan, Latin America, the Middle East, the People's Republic of China, Taiwan, Japan, Korea, Southeast Asia, most European countries, and Quebec (Canada). However, applicants who, at the time of application, have already completed at least one year of full-time academic course work with grades of B or better at a US university may submit an official transcript from the US university to fulfill this requirement. The following courses will not fulfill this requirement:
 - courses in English as a Second Language,
 - courses conducted in a language other than English,
 - courses that will be completed after the application is submitted, and
 - courses of a non-academic nature.

If applicants have previously been denied admission to Berkeley on the basis of their English language proficiency, they must submit new test scores that meet the current minimum from one of the standardized tests. Official TOEFL score reports must be sent directly from Educational Test Services (ETS). The institution code for Berkeley is 4833. Official IELTS score reports must be mailed directly to our office from the British Council. TOEFL and IELTS score reports are only valid for two years.

Where to Apply

Visit the Berkeley Graduate Division application page (<http://grad.berkeley.edu/admissions/apply/>).

Admission to the Program

A degree equivalent to a US bachelor's is required for admission to the program. An undergraduate degree in economics is not required for admission to the PhD program, provided that applicants have achieved an adequate background in economics and mathematics at the undergraduate level.

- **Economics:** All applicants are expected to have completed intermediate math-based economic theory courses. Further education in economics and economic theory is helpful, but not required.
- **Math:** Applicants must have knowledge of multivariate calculus, basic matrix algebra, and differential equations; completion of a two-year math sequence, which emphasizes proofs and derivations. Some

knowledge of statistics and elementary probability is highly desirable, as is additional coursework in algebra and real analysis.

The GRE is also required. Please visit our website (<https://www.econ.berkeley.edu/grad/admissions/instructions/>) for all department-specific requirements.

Normative Time Requirements

In advancing to the PhD degree, students pass through two major stages:

- 1) **Preparation for candidacy** typically takes three years. During the first two semesters, students take courses to achieve competence in econometric methods, methods of economic history, and fundamentals of microeconomic and macroeconomic theory. During the next two years, students prepare for examination in two fields of specialization of their choosing, prepare a dissertation prospectus, and take an oral examination. When these steps are completed, students are advanced to candidacy.
- 2) **Completion of a dissertation** after advancing to candidacy typically takes one to two years. The dissertation must be based on original research and represent a significant contribution to the body of economic knowledge.

The entire process takes approximately five to six years, although some students are able to complete the program in less time.

Time to Advancement

Curriculum

During the first two semesters of graduate study, students must take a set of eight core courses to satisfy requirements in mathematics, economic history, economic theory, and econometrics. Syllabi for current and recent economics courses, including the core courses described below, can be found on the (<https://www.econ.berkeley.edu/courses/homepages/>)**Economics Course Home Page Registry**.

Exemptions from Course Requirements

Students with strong backgrounds in math and economics, who have completed the equivalent of the coursework outlined above, may be exempted from some or all of the first-year course requirements. To qualify for an exemption, admitted students must provide documentation of coursework completed and grades received. Students excused from any or all of the required theory courses may be required to take advanced theory courses to supplement previous training. All exemptions from first-year course work must be approved by both the course instructor and the graduate committee chair.

Courses Required

ECON 201A & ECON 201B	Economic Theory and Economic Theory	8
ECON 202A & ECON 202B	Macroeconomics and Macroeconomics	8
ECON 204	Mathematical Tools for Economics	3
ECON 210A	Introduction to Economic History	3
ECON 240A & ECON 240B	Econometrics and Econometrics	9
ECON Electives (2 semesters) per specialized study list:		24
preparation for 2 field exams		
ECON Elective Dept Seminars (12 units/one semester)		12

Preliminary Exams—Field Examination

All graduate students must take written qualifying examinations in two fields of specialization. Students prepare for these examinations in the second year by completing graduate courses offered in their chosen fields.

Fields Available in the Economics Department

- Advanced Economic Theory
- Comparative Economics
- Development Economics
- Econometrics
- Economic History
- Financial Economics
- Industrial Organization
- International Economics
- Labor Economics
- Macroeconomics
- Political Economics
- Psychology and Economics
- Public Finance

Alternative fields offered by another department or designed by the student may be substituted for one of the fields listed above if approved by the graduate committee. Alternative fields may include Economic Demography, Education and Economics, Health Economics, Law and Economics, Resource Economics, Urban and Regional Economics, or City and Regional Planning.

Prospectus

Students must complete at least one semester of any department seminars (<https://www.econ.berkeley.edu/events/seminars/>) prior to taking their oral examination. This is typically done in the third year of study.

Dissertation Prospectus and Oral Examination (QUALIFYING EXAMINATION)

Students are encouraged to begin discussing possible dissertation topics with appropriate faculty members at an early stage. After completing the written field examinations, students choose a faculty member to serve as an advisor on developing a dissertation topic involving significant and original research, and to supervise the writing of a prospectus. The prospectus describes the research to be conducted, the techniques to be used, and initial findings. Students who cannot find an adviser on their own will be matched with a preliminary adviser at the beginning of the third year of study.

Qualifying Examination

When the prospectus is approved by the faculty adviser, the qualifying examination is scheduled. The examining committee consists of four faculty members who conduct an oral examination based on the student's areas of specialization and on the dissertation prospectus. A primary function of the oral examination is to aid the student in developing a dissertation and to determine whether the student is sufficiently prepared to complete original research successfully.

Time in Candidacy

Advancement

Upon successful completion of the oral examination and selection of a dissertation committee, the student is advanced to candidacy. Following advancement to candidacy, students pursue research necessary for the completion of their dissertation.

Fourth Year Paper

In the fourth year students will work with their advisor to write a complete draft of a research paper. The topic can be on what was done for the orals examination, or something new. Students may be excused from this requirement under exceptional circumstances (e.g., lengthy field work), but they would need to submit a letter to the Graduate Chair from the student's advisor requesting an exception. The deadline for submitting the paper will be late spring semester. Note: this is a new requirement that comes into force only for students in the cohort starting in 2018 and more recent cohorts.

Dissertation

Students are encouraged to select dissertation topics that can be completed in one to two years. Except in highly unusual cases, a dissertation does not exceed 300 pages of double-spaced typescript, and dissertations of 100 pages or less are entirely acceptable if they are significant contributions to the body of economic knowledge.

Upon completion of the dissertation and its acceptance by the dissertation committee, the student is awarded the PhD degree.

Professional Placement

Students who have received, or will soon receive, the PhD in Economics are assisted by the department in finding suitable career positions. The department learns of available openings for qualified economists through an exchange of information with universities, colleges, government agencies, and research institutes.

The department staff coordinates and facilitates placement activities, and a faculty member oversees and advises placement. Serious effort is made to help students find positions in which their capacities will be both used and rewarded. The department has been highly successful in placing students, which is a reflection on the quality of its students and their training, and the importance the department places on this activity.

Past placement outcomes can be found on the department's website (<https://www.econ.berkeley.edu/grad/program/placement-outcomes/>).

ECON 206 Mechanism Design and Agency Theory 3 Units

Terms offered: Spring 2019, Spring 2018, Spring 2017

This course will study the optimal design of mechanisms in the presence of incomplete information and imperfect observability. The course will begin with the "classic" principal-agent problem and will then develop its applications to the "implicit contracts" theory of agency and to the choice of government policies for regulated industries. The second half of the course will treat the design of auctions, regulation with costly or imperfect monitoring, mechanism design with limited contracts.

ECON 219A Foundations of Psychology and Economics 3 Units

Terms offered: Fall 2021, Fall 2019, Fall 2018

This course presents psychological and experimental economics research demonstrating departures from perfect rationality, self-interest, and other classical assumptions of economics and explores ways that these departures can be mathematically modeled and incorporated into mainstream positive and normative economics. The course will focus on the behavioral evidence itself, especially on specific formal assumptions that capture the findings in a way that can be used by economists. Economic applications will be used for illustrative purposes, but the course will emphasize formal theory.

ECON C225 Workshop in Institutional Analysis 2 Units

Terms offered: Fall 2021, Spring 2021, Fall 2020, Fall 2015, Fall 2014, Fall 2013

This seminar features current research of faculty, from UC Berkeley and elsewhere, and of advanced doctoral students who are investigating the efficacy of economic and non-economic forms of organization. An interdisciplinary perspective--combining aspects of law, economics, and organization--is maintained. Markets, hierarchies, hybrids, bureaus, and the supporting institutions of law and politics all come under scrutiny. The aspiration is to progressively build toward a new science of organization.

Workshop in Institutional Analysis: Read More [\[+\]](#)

Rules & Requirements

Prerequisites: Economics 100 or 101; Business Administration 110 or equivalent; or consent of instructor

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week

Additional Details

Subject/Course Level: Economics/Graduate

Grading: Offered for satisfactory/unsatisfactory grade only.

Also listed as: PHDBA C270

Workshop in Institutional Analysis: Read Less [\[-\]](#)

ECON 230A Public Economics 3 Units

Terms offered: Fall 2021, Fall 2020, Fall 2019

The economic and policy analysis of government expenditures, taxes, and intergovernmental fiscal relations. 230A is not a prerequisite for 230B.

Public Economics: Read More [\[+\]](#)

Hours & Format

Fall and/or spring: 15 weeks - 2 hours of lecture per week

Subject/Course Level: Economics/Graduate

Grading: Letter grade.

Public Economics: Read Less [\[-\]](#)

ECON 230B Public Economics 3 Units

Terms offered: Spring 2021, Spring 2020, Spring 2019

Government intervention changes opportunities and incentives for firms, families, individuals, service providers, and state and local government. This course considers the incentive effects of government expenditure programs. The primary emphasis will be in the examination of the effect of social expenditure programs on individuals and families. Most of the papers will be empirical. The course will not contain an explicit section on methodology and econometric techniques; instead, relevant econometric techniques (e.g., discrete choice, duration analysis) will be discussed in the context of the empirical literature.
