

New Media

The Undergraduate Certificate in New Media program emphasizes the critical understanding and practice of new media through diverse and interdisciplinary perspectives. The certificate introduces students to the changing new media landscape that is transforming the way we think in the fields of art, technology, the humanities, and social sciences. Through critical thinking and making, our students learn to innovate as they question the impact of new media on the human experience and cultivate technological equity in our communities. The certificate is not an official program offered by Undergraduate Education and will not be noted on a student's transcript.

Core Class

Students should take a project-based undergraduate seminar in NWMEDIA with learning goals that will include new media theory, new media tools, prototyping, evaluation methods, and collaboration methods. Any NWMEDIA undergraduate course will count towards the core class. Students can also petition the academic committee to have a course that substantially deals with new media that they have taken in another department count towards fulfilling this requirement.

Currently, the BCNM offers the following undergraduate classes:

NWMEDIA R1B	New Media Reading and Composition	4
NWMEDIA 39A	Freshman Seminar in New Media	1-4
NWMEDIA 90	Introduction to New Media	1-4
NWMEDIA 150AC	New Media and American Cultures	4
NWMEDIA 151A	Transforming Tech: Issues and Interventions in STEM and Silicon Valley	4
NWMEDIA C166	Critical Practices: People, Places, Participation	4
NWMEDIA 190	Special Topics in New Media	1-4
NWMEDIA 191	Special Topics in New Media	1-4
NWMEDIA 198	Directed Group Study	1-3

New Media Engagement

Experience new media beyond the classroom. By petition, students can have their own new media activities and events on campus and in the community count towards this requirement. Students can also help organize and manage a BCNM conference, lecture, hackathon, or workshop.

Graduate Class — choose option 1 or 2

Option 1: Enroll in a New Media Graduate-Level Course

Students will be challenged to think critically about new media in the graduate-level courses the BCNM offers. They will produce either a design project or a substantial paper depending on the class, showing their thorough appreciation for transformations in new media. Since these courses are intended for graduates, students will need to seek instructor approval to enroll in the class. Currently, the BCNM offers the following graduate courses:

NWMEDIA 200	History and Theory of New Media	4
NWMEDIA 201	Questioning New Media	3
NWMEDIA 202	New Media Methods	3
NWMEDIA C203	Critical Making	4

NWMEDIA 204	Critical Practices: People, Places, Participation	4
NWMEDIA 205	Locative Media	4
NWMEDIA C262	Theory and Practice of Tangible User Interfaces	4
NWMEDIA C263	Course Not Available	3
NWMEDIA C265	Interface Aesthetics	3
NWMEDIA 290	Special Topics in New Media	1-4

Option 2: Produce a final project during an independent study on a new media topic

Students may enroll in an independent study with a BCNM faculty member to produce an extended paper or final project on a new media topic of their choice. Topics must be pre-approved by the BCNM Director. The paper should exhibit the student's thorough command of new media concepts.

NWMEDIA 104 Critical Practices: People, Places, Participation 4 Units

Terms offered: Prior to 2007

Critical Practices is a hands-on studio design course where students work at the intersection of technological innovation and socially engaged art. Students will integrate a suite of digital fabrication tools with social design methods to create work that engages in cultural critique. Working with innovative technologies and radical, new art practices, this course will explore: hybrid art forms, critical design for community engagement, interventions in public spaces, tactical media, and disobedient objects. These new making strategies will reframe our notions of people, places and participation.

NWMEDIA 151AC Transforming Tech: Issues and Interventions in STEM and Silicon Valley 4 Units

Terms offered: Summer 2024 8 Week Session, Summer 2023 8 Week Session, Fall 2020

In this course, we will study major tech industry controversies and heavily criticized tech products, policies, and effects, including technologies used at the U.S.-Mexico border, social media platforms' spread of disinformation and fake news, racial bias in algorithms, and internet trolling and harassment. We will also examine tech companies' long-running tendency to exclude women and non-Asian minorities, and how tech workers have occasionally come under fire for the industry's harms. Students will be required to brainstorm and design their own interventions into the workings of the tech sector to make it more inclusive, equitable, and diverse.

NWMEDIA 197 New Media Theory in Practice 4 Units

Terms offered: Not yet offered

New Media Theory in Practice is a summer course that asks students to plan and generate public and collective experiences inspired by new media theory. These experiences range in form: from tours of the digital infrastructures of the Bay Area to artistic performances that utilize new media technologies. During the first part of the class, students conduct rigorous historical and cultural research on a specific site and design a structure for a collective experience of that site. Reading in related new media theory will provide the conceptual scaffolding for practical decisions.

NWMEDIA 202 New Media Methods 3 Units

Terms offered: Fall 2014

In this methods course we will study key languages of new media innovation, ranging from flow charts to scripting languages and circuit diagrams. Our study method involves the creation and application of sensing devices in an urban context, and engages students in establishing chains of references which connect ground truth to data, data to information, information to people, people to actions, and actions to policies. Taking into account technical, political, cultural and literacy questions we seek to connect our data production work with information needs of underserved communities in the Bay Area region.

NWMEDIA C203 Critical Making 4 Units

Terms offered: Spring 2022, Spring 2021, Spring 2020, Spring 2019, Spring 2018

Critical Making will operationalize and critique the practice of “making” through both foundational literature and hands on studio culture. As hybrid practitioners, students will develop fluency in readily collaging and incorporating a variety of physical materials and protocols into their practice. Students will envision and create future computational experiences that critically explore social and culturally relevant technological themes. No previous technical knowledge is required to take this course. Class projects involve basic programming, electronic circuitry, and digital fabrication design. Tutorials and instruction will be provided, but students will be expected to develop basic skills in these areas to complete course projects.

From postcards and maps to mobile phones, this course considers the history and future of locative media, as technological, situated, and navigational ways of expressing and understanding space, location, and bodies.

This is a theory and making course. It is designed to help students traverse the nuances between a) critically engaging with theoretical ideas and implementing the questions that they raise into their practice and b) critically engaging with the technological production of space and place, and implementing the questions that it raises into theory.
